I answer that, As stated above (a. 1), good is the cause of love, as being its object. But good is not the object of the appetite, except as apprehended. And therefore love demands some apprehension of the good that is loved. For this reason the Philosopher (Ethic. ix, 5,12) says that bodily sight is the beginning of sensitive love: and in like manner the contemplation of spiritual beauty or goodness is the beginning of spiritual love. Accordingly knowledge is the cause of love for the same reason as good is, which can be loved only if known.

Reply to Objection 1. He who seeks science, is not entirely without knowledge thereof: but knows something about it already in some respect, either in a general way, or in some one of its effects, or from having heard it commended, as Augustine says (De Trin. x, 1,2). But to have it is not to know it thus, but to know it perfectly.

Reply to Objection 2. Something is required for the perfection of knowledge, that is not requisite for the perfection of love. For knowledge belongs to the reason, whose function it is to distinguish things which in reality are united, and to unite together, after a fashion, things that are distinct, by comparing one with another. Consequently the perfection of knowledge requires that man should know distinctly all that is in a thing, such as its parts, powers, and properties. On the other hand, love is in the appetitive power, which regards as it is in itself: wherefore it suffices, for the perfection of love, that a thing be loved according as it is known in itself. Hence it is, therefore, that a thing is loved more than it is known; since it can be loved perfectly, even without being perfectly known. This is most evident in regard to the sciences, which some love through having a certain general knowledge of them: for instance, they know that rhetoric is a science that enables man to persuade others; and this is what they love in rhetoric. The same applies to the love of God.

Reply to Objection 3. Even natural love, which is in all things, is caused by a kind of knowledge, not indeed existing in natural things themselves, but in Him Who created their nature, as stated above (q. 26, a. 1; cf. Ia, q. 6, a. 1, ad 2).

Objection 1. It would seem that likeness is not a cause of love. For the same thing is not the cause of contraries. But likeness is the cause of hatred; for it is written (Prov. 13:10) that “among the proud there are always contentions”; and the Philosopher says (Ethic. viii, 1) that “potters quarrel with one another.” Therefore likeness is not a cause of love.

Objection 2. Further, Augustine says (Confess. iv, 14) that “a man loves in another that which he would not be himself: thus he loves an actor, but would not himself be an actor.” But it would not be so, if likeness were the proper cause of love; for in that case a man would love in another, that which he possesses himself, or would like to possess. Therefore likeness is not a cause of love.

Objection 3. Further, everyone loves that which he needs, even if he have it not: thus a sick man loves health, and a poor man loves riches. But in so far as he needs them and lacks them, he is unlike them. Therefore not only likeness but also unlikeness is a cause of love.

Objection 4. Further, the Philosopher says (Rhet. ii, 4) that “we love those who bestow money and health on us; and also those who retain their friendship for the dead.” But all are not such. Therefore likeness is not a cause of love.

On the contrary, It is written (Ecclus. 13:19): “Every beast loveth its like.”

I answer that, Likeness, properly speaking, is a cause of love. But it must be observed that likeness between things is twofold. One kind of likeness arises from each thing having the same quality actually: for example, two things possessing the quality of whiteness are said to be alike. Another kind of likeness arises from one thing having potentially and by way of inclination, a quality which the other has actually: thus we may say that a heavy body existing outside its proper place is like another heavy body that exists in its proper place: or again, according as potentiality bears a resemblance to its act; since act is contained, in a manner, in the potentiality itself.

Accordingly the first kind of likeness causes love of friendship or well-being. For the very fact that two men are alike, having, as it were, one form, makes them to be, in a manner, one in that form: thus two men are one thing in the species of humanity, and two white men are

one thing in whiteness. Hence the affections of one tend to the other, as being one with him; and he wishes good to him as to himself. But the second kind of likeness causes love of concupiscence, or friendship founded on usefulness or pleasure: because whatever is in potentiality, as such, has the desire for its act; and it takes pleasure in its realization, if it be a sentient and cognitive being.

Now it has been stated above (q. 26, a. 4), that in the love of concupiscence, the lover, properly speaking, loves himself, in willing the good that he desires. But a man loves himself more than another: because he is one with himself substantially, whereas with another he is one only in the likeness of some form. Consequently, if this other's likeness to him arising from the participation of a form, hinders him from gaining the good that he loves, he becomes hateful to him, not for being like him, but for hindering him from gaining his own good. This is why “potters quarrel among themselves,” because they hinder one another's gain: and why “there are contentions among the proud,” because they hinder one another in attaining the position they covet.

Hence the Reply to the First Objection is evident.

Reply to Objection 2. Even when a man loves in another what he loves not in himself, there is a certain likeness of proportion: because as the latter is to that which is loved in him, so is the former to that which he loves in himself: for instance, if a good singer love a good writer, we can see a likeness of proportion, inasmuch as each one has that which is becoming to him in respect of his art.

Reply to Objection 3. He that loves what he needs, bears a likeness to what he loves, as potentiality bears a likeness to its act, as stated above.

Reply to Objection 4. According to the same likeness of potentiality to its act, the illiberal man loves the man who is liberal, in so far as he expects from him something which he desires. The same applies to the man who is constant in his friendship as compared to one who is inconstant. For in either case friendship seems to be based on usefulness. We might also say that although not all men have these virtues in the complete habit, yet they have them according to certain seminal principles in the reason, in force of which principles the man who is not virtuous loves the virtuous man, as being in conformity with his own natural reason.

Objection 1. It would seem that some other passion can be the cause of love. For the Philosopher (*Ethic.* viii, 3) says that some are loved for the sake of the pleasure they give. But pleasure is a passion. Therefore another passion is a cause of love.

Objection 2. Further, desire is a passion. But we love some because we desire to receive something from them: as happens in every friendship based on usefulness. Therefore another passion is a cause of love.

Objection 3. Further, Augustine says (*De Trin.* x, 1): “When we have no hope of getting a thing, we love it but half-heartedly or not at all, even if we see how beautiful it is.” Therefore hope too is a cause of love.

On the contrary, All the other emotions of the soul are caused by love, as Augustine says (*De Civ. Dei* xiv, 7,9).

I answer that, There is no other passion of the soul that does not presuppose love of some kind. The reason is that every other passion of the soul implies either movement towards something, or rest in something. Now every movement towards something, or rest in something, arises from some kinship or aptness to

that thing; and in this does love consist. Therefore it is not possible for any other passion of the soul to be universally the cause of every love. But it may happen that some other passion is the cause of some particular love: just as one good is the cause of another.

Reply to Objection 1. When a man loves a thing for the pleasure it affords, his love is indeed caused by pleasure; but that very pleasure is caused, in its turn, by another preceding love; for none takes pleasure save in that which is loved in some way.

Reply to Objection 2. Desire for a thing always presupposes love for that thing. But desire of one thing can be the cause of another thing’s being loved; thus he that desires money, for this reason loves him from whom he receives it.

Reply to Objection 3. Hope causes or increases love; both by reason of pleasure, because it causes pleasure; and by reason of desire, because hope strengthens desire, since we do not desire so intensely that which we have no hope of receiving. Nevertheless hope itself is of a good that is loved.

FIRST PART OF THE SECOND PART, QUESTION 28

Of the Effects of Love (In Six Articles)

We now have to consider the effects of love: under which head there are six points of inquiry:

- (1) Whether union is an effect of love?
- (2) Whether mutual indwelling is an effect of love?
- (3) Whether ecstasy is an effect of love?
- (4) Whether zeal is an effect of love?
- (5) Whether love is a passion that is hurtful to the lover?
- (6) Whether love is cause of all that the lover does?

Whether union is an effect of love?

Ia IIae q. 28 a. 1

Objection 1. It would seem that union is not an effect of love. For absence is incompatible with union. But love is compatible with absence; for the Apostle says (Gal. 4:18): “Be zealous for that which is good in a good thing always” (speaking of himself, according to a gloss), “and not only when I am present with you.” Therefore union is not an effect of love.

Objection 2. Further, every union is either according to essence, thus form is united to matter, accident to subject, and a part to the whole, or to another part in order to make up the whole: or according to likeness, in genus, species, or accident. But love does not cause union of essence; else love could not be between things essentially distinct. On the other hand, love does not cause union of likeness, but rather is caused by it, as stated above (q. 27, a. 3). Therefore union is not an effect of love.

Objection 3. Further, the sense in act is the sensible in act, and the intellect in act is the thing actually understood. But the lover in act is not the beloved in act. Therefore union is the effect of knowledge rather than of love.

On the contrary, Dionysius says (Div. Nom. iv) that every love is a “unitive love.”

I answer that, The union of lover and beloved is twofold. The first is real union; for instance, when the beloved is present with the lover. The second is union of affection: and this union must be considered in relation to the preceding apprehension; since movement of the appetite follows apprehension. Now love being twofold, viz. love of concupiscence and love of friendship; each of these arises from a kind of apprehension of the oneness of the thing loved with the lover. For when we love a thing, by desiring it, we apprehend it as belonging to our well-being. In like manner when a man loves another with the love of friendship, he wills good to him, just as he wills good to himself: wherefore he apprehends him as his other self, in so far, to wit, as he wills good to him as to himself. Hence a friend is called a man’s “other self” (Ethic. ix, 4), and Augustine says (Confess. iv, 6), “Well did one say to his friend: Thou half of my soul.”

The first of these unions is caused “effectively” by love; because love moves man to desire and seek the presence of the beloved, as of something suitable and belonging to him. The second union is caused “formally” by love; because love itself is this union or bond. In this sense Augustine says (De Trin. viii, 10) that “love is a vital principle uniting, or seeking to unite two together, the lover, to wit, and the beloved.” For in describing it as “uniting” he refers to the union of affection, without which there is no love: and in saying that “it seeks to unite,” he refers to real union.

Reply to Objection 1. This argument is true of real union. That is necessary to pleasure as being its cause; desire implies the real absence of the beloved: but love remains whether the beloved be absent or present.

Reply to Objection 2. Union has a threefold relation to love. There is union which causes love; and this is substantial union, as regards the love with which one loves oneself; while as regards the love wherewith one loves other things, it is the union of likeness, as stated above (q. 27, a. 3). There is also a union which is essentially love itself. This union is according to a bond of affection, and is likened to substantial union, inasmuch as the lover stands to the object of his love, as to himself, if it be love of friendship; as to something belonging to himself, if it be love of concupiscence. Again there is a union, which is the effect of love. This is real union, which the lover seeks with the object of his love. Moreover this union is in keeping with the demands of love: for as the Philosopher relates (Polit. ii, 1), “Aristophanes stated that lovers would wish to be united both into one,” but since “this would result in either one or both being destroyed,” they seek a suitable and becoming union—to live together, speak together, and be united together in other like things.

Reply to Objection 3. Knowledge is perfected by the thing known being united, through its likeness, to the knower. But the effect of love is that the thing itself which is loved, is, in a way, united to the lover, as stated above. Consequently the union caused by love is closer than that which is caused by knowledge.

Objection 1. It would seem that love does not cause mutual indwelling, so that the lover be in the beloved and vice versa. For that which is in another is contained in it. But the same cannot be container and contents. Therefore love cannot cause mutual indwelling, so that the lover be in the beloved and vice versa.

Objection 2. Further, nothing can penetrate within a whole, except by means of a division of the whole. But it is the function of the reason, not of the appetite where love resides, to divide things that are really united. Therefore mutual indwelling is not an effect of love.

Objection 3. Further, if love involves the lover being in the beloved and vice versa, it follows that the beloved is united to the lover, in the same way as the lover is united to the beloved. But the union itself is love, as stated above (a. 1). Therefore it follows that the lover is always loved by the object of his love; which is evidently false. Therefore mutual indwelling is not an effect of love.

On the contrary, It is written (1 Jn. 4:16): “He that abideth in charity abideth in God, and God in him.” Now charity is the love of God. Therefore, for the same reason, every love makes the beloved to be in the lover, and vice versa.

I answer that, This effect of mutual indwelling may be understood as referring both to the apprehensive and to the appetitive power. Because, as to the apprehensive power, the beloved is said to be in the lover, inasmuch as the beloved abides in the apprehension of the lover, according to Phil. 1:7, “For that I have you in my heart”: while the lover is said to be in the beloved, according to apprehension, inasmuch as the lover is not satisfied with a superficial apprehension of the beloved, but strives to gain an intimate knowledge of everything pertaining to the beloved, so as to penetrate into his very soul. Thus it is written concerning the Holy Ghost, Who is God’s Love, that He “searcheth all things, yea the deep things of God” (1 Cor. 2:10).

As the appetitive power, the object loved is said to be in the lover, inasmuch as it is in his affections, by a kind of complacency: causing him either to take pleasure in it, or in its good, when present; or, in the absence of the object loved, by his longing, to tend towards it with the love of concupiscence, or towards the good that he wills to the beloved, with the love of friendship: not in-

deed from any extrinsic cause (as when we desire one thing on account of another, or wish good to another on account of something else), but because the complacency in the beloved is rooted in the lover’s heart. For this reason we speak of love as being “intimate”; and “of the bowels of charity.” On the other hand, the lover is in the beloved, by the love of concupiscence and by the love of friendship, but not in the same way. For the love of concupiscence is not satisfied with any external or superficial possession or enjoyment of the beloved; but seeks to possess the beloved perfectly, by penetrating into his heart, as it were. Whereas, in the love of friendship, the lover is in the beloved, inasmuch as he reckons what is good or evil to his friend, as being so to himself; and his friend’s will as his own, so that it seems as though he felt the good or suffered the evil in the person of his friend. Hence it is proper to friends “to desire the same things, and to grieve and rejoice at the same,” as the Philosopher says (Ethic. ix, 3 and Rhet. ii, 4). Consequently in so far as he reckons what affects his friend as affecting himself, the lover seems to be in the beloved, as though he were become one with him: but in so far as, on the other hand, he wills and acts for his friend’s sake as for his own sake, looking on his friend as identified with himself, thus the beloved is in the lover.

In yet a third way, mutual indwelling in the love of friendship can be understood in regard to reciprocal love: inasmuch as friends return love for love, and both desire and do good things for one another.

Reply to Objection 1. The beloved is contained in the lover, by being impressed on his heart and thus becoming the object of his complacency. On the other hand, the lover is contained in the beloved, inasmuch as the lover penetrates, so to speak, into the beloved. For nothing hinders a thing from being both container and contents in different ways: just as a genus is contained in its species, and vice versa.

Reply to Objection 2. The apprehension of the reason precedes the movement of love. Consequently, just as the reason divides, so does the movement of love penetrate into the beloved, as was explained above.

Reply to Objection 3. This argument is true of the third kind of mutual indwelling, which is not to be found in every kind of love.

Objection 1. It would seem that ecstasy is not an effect of love. For ecstasy seems to imply loss of reason. But love does not always result in loss of reason: for lovers are masters of themselves at times. Therefore love does not cause ecstasy.

Objection 2. Further, the lover desires the beloved

to be united to him. Therefore he draws the beloved to himself, rather than betakes himself into the beloved, going forth out from himself as it were.

Objection 3. Further, love unites the beloved to the lover, as stated above (a. 1). If, therefore, the lover goes out from himself, in order to betake himself into

the beloved, it follows that the lover always loves the beloved more than himself: which is evidently false. Therefore ecstasy is not an effect of love.

On the contrary, Dionysius says (Div. Nom. iv) that “the Divine love produces ecstasy,” and that “God Himself suffered ecstasy through love.” Since therefore according to the same author (Div. Nom. iv), every love is a participated likeness of the Divine Love, it seems that every love causes ecstasy.

I answer that, To suffer ecstasy means to be placed outside oneself. This happens as to the apprehensive power and as to the appetitive power. As to the apprehensive power, a man is said to be placed outside himself, when he is placed outside the knowledge proper to him. This may be due to his being raised to a higher knowledge; thus, a man is said to suffer ecstasy, inasmuch as he is placed outside the connatural apprehension of his sense and reason, when he is raised up so as to comprehend things that surpass sense and reason: or it may be due to his being cast down into a state of debasement; thus a man may be said to suffer ecstasy, when he is overcome by violent passion or madness. As to the appetitive power, a man is said to suffer ecstasy, when that power is borne towards something else, so that it goes forth out from itself, as it were.

The first of these ecstasies is caused by love disposi-

tively in so far, namely, as love makes the lover dwell on the beloved, as stated above (a. 2), and to dwell intently on one thing draws the mind from other things. The second ecstasy is caused by love directly; by love of friendship, simply; by love of concupiscence not simply but in a restricted sense. Because in love of concupiscence, the lover is carried out of himself, in a certain sense; in so far, namely, as not being satisfied with enjoying the good that he has, he seeks to enjoy something outside himself. But since he seeks to have this extrinsic good for himself, he does not go out from himself simply, and this movement remains finally within him. On the other hand, in the love of friendship, a man’s affection goes out from itself simply; because he wishes and does good to his friend, by caring and providing for him, for his sake.

Reply to Objection 1. This argument is true of the first kind of ecstasy.

Reply to Objection 2. This argument applies to love of concupiscence, which, as stated above, does not cause ecstasy simply.

Reply to Objection 3. He who loves, goes out from himself, in so far as he wills the good of his friend and works for it. Yet he does not will the good of his friend more than his own good: and so it does not follow that he loves another more than himself.

Whether zeal is an effect of love?

Ia IIae q. 28 a. 4

Objection 1. It would seem that zeal is not an effect of love. For zeal is a beginning of contention; wherefore it is written (1 Cor. 3:3): “Whereas there is among you zeal [Douay: ‘envying’] and contention,” etc. But contention is incompatible with love. Therefore zeal is not an effect of love.

Objection 2. Further, the object of love is the good, which communicates itself to others. But zeal is opposed to communication; since it seems an effect of zeal, that a man refuses to share the object of his love with another: thus husbands are said to be jealous of [zelare] their wives, because they will not share them with others. Therefore zeal is not an effect of love.

Objection 3. Further, there is no zeal without hatred, as neither is there without love: for it is written (Ps. 72:3): “I had a zeal on occasion of the wicked.” Therefore it should not be set down as an effect of love any more than of hatred.

On the contrary, Dionysius says (Div. Nom. iv): “God is said to be a zealot, on account of his great love for all things.”

I answer that, Zeal, whatever way we take it, arises from the intensity of love. For it is evident that the more intensely a power tends to anything, the more vigorously it withstands opposition or resistance. Since therefore love is “a movement towards the object loved,” as Augustine says (QQ. 83, qu. 35), an intense love seeks to remove everything that opposes it.

But this happens in different ways according to love of concupiscence, and love of friendship. For in love of concupiscence he who desires something intensely, is moved against all that hinders his gaining or quietly enjoying the object of his love. It is thus that husbands are said to be jealous of their wives, lest association with others prove a hindrance to their exclusive individual rights. In like manner those who seek to excel, are moved against those who seem to excel, as though these were a hindrance to their excelling. And this is the zeal of envy, of which it is written (Ps. 36:1): “Be not emulous of evil doers, nor envy [zelaveris] them that work iniquity.”

On the other hand, love of friendship seeks the friend’s good: wherefore, when it is intense, it causes a man to be moved against everything that opposes the friend’s good. In this respect, a man is said to be zealous on behalf of his friend, when he makes a point of repelling whatever may be said or done against the friend’s good. In this way, too, a man is said to be zealous on God’s behalf, when he endeavors, to the best of his means, to repel whatever is contrary to the honor or will of God; according to 3 Kings 19:14: “With zeal I have been zealous for the Lord of hosts.” Again on the words of Jn. 2:17: “The zeal of Thy house hath eaten me up,” a gloss says that “a man is eaten up with a good zeal, who strives to remedy whatever evil he perceives; and if he cannot, bears with it and laments it.”

Reply to Objection 1. The Apostle is speaking in this passage of the zeal of envy; which is indeed the cause of contention, not against the object of love, but for it, and against that which is opposed to it.

Reply to Objection 2. Good is loved inasmuch as it can be communicated to the lover. Consequently whatever hinders the perfection of this communication, becomes hateful. Thus zeal arises from love of good. But through defect of goodness, it happens that certain small goods cannot, in their entirety, be possessed by many at the same time: and from the love of such things arises

the zeal of envy. But it does not arise, properly speaking, in the case of those things which, in their entirety, can be possessed by many: for no one envies another the knowledge of truth, which can be known entirely by many; except perhaps one may envy another his superiority in the knowledge of it.

Reply to Objection 3. The very fact that a man hates whatever is opposed to the object of his love, is the effect of love. Hence zeal is set down as an effect of love rather than of hatred.

Whether love is a passion that wounds the lover?

Ia IIae q. 28 a. 5

Objection 1. It would seem that love wounds the lover. For languor denotes a hurt in the one that languishes. But love causes languor: for it is written (Cant 2:5): "Stay me up with flowers, compass me about with apples; because I languish with love." Therefore love is a wounding passion.

Objection 2. Further, melting is a kind of dissolution. But love melts that in which it is: for it is written (Cant 5:6): "My soul melted when my beloved spoke." Therefore love is a dissolvent: therefore it is a corruptive and a wounding passion.

Objection 3. Further, fervor denotes a certain excess of heat; which excess has a corruptive effect. But love causes fervor: for Dionysius (Coel. Hier. vii) in reckoning the properties belonging to the Seraphim's love, includes "hot" and "piercing" and "most fervent." Moreover it is said of love (Cant 8:6) that "its lamps are fire and flames." Therefore love is a wounding and corruptive passion.

On the contrary, Dionysius says (Div. Nom. iv) that "everything loves itself with a love that holds it together," i.e. that preserves it. Therefore love is not a wounding passion, but rather one that preserves and perfects.

I answer that, As stated above (q. 26, Aa. 1,2; q. 27, a. 1), love denotes a certain adapting of the appetitive power to some good. Now nothing is hurt by being adapted to that which is suitable to it; rather, if possible, it is perfected and bettered. But if a thing be adapted to that which is not suitable to it, it is hurt and made worse thereby. Consequently love of a suitable good perfects and betters the lover; but love of a good which is unsuitable to the lover, wounds and worsens him. Wherefore man is perfected and bettered chiefly by the love of

God: but is wounded and worsened by the love of sin, according to Osee 9:10: "They became abominable, as those things which they loved."

And let this be understood as applying to love in respect of its formal element, i.e. in regard to the appetite. But in respect of the material element in the passion of love, i.e. a certain bodily change, it happens that love is hurtful, by reason of this change being excessive: just as it happens in the senses, and in every act of a power of the soul that is exercised through the change of some bodily organ.

In reply to the objections, it is to be observed that four proximate effects may be ascribed to love: viz. melting, enjoyment, languor, and fervor. Of these the first is "melting," which is opposed to freezing. For things that are frozen, are closely bound together, so as to be hard to pierce. But it belongs to love that the appetite is fitted to receive the good which is loved, inasmuch as the object loved is in the lover, as stated above (a. 2). Consequently the freezing or hardening of the heart is a disposition incompatible with love: while melting denotes a softening of the heart, whereby the heart shows itself to be ready for the entrance of the beloved. If, then, the beloved is present and possessed, pleasure or enjoyment ensues. But if the beloved be absent, two passions arise; viz. sadness at its absence, which is denoted by "languor" (hence Cicero in De Tusc. Quaest. iii, 11 applies the term "ailment" chiefly to sadness); and an intense desire to possess the beloved, which is signified by "fervor." And these are the effects of love considered formally, according to the relation of the appetitive power to its object. But in the passion of love, other effects ensue, proportionate to the above, in respect of a change in the organ.

Whether love is cause of all that the lover does?

Ia IIae q. 28 a. 6

Objection 1. It would seem that the lover does not do everything from love. For love is a passion, as stated above (q. 26, a. 2). But man does not do everything from passion: but some things he does from choice, and some things from ignorance, as stated in Ethic. v, 8. Therefore not everything that a man does, is done from

love.

Objection 2. Further, the appetite is a principle of movement and action in all animals, as stated in De Anima iii, 10. If, therefore, whatever a man does is done from love, the other passions of the appetitive faculty are superfluous.

Objection 3. Further, nothing is produced at one and the same time by contrary causes. But some things are done from hatred. Therefore all things are not done from love.

On the contrary, Dionysius says (Div. Nom. iv) that “all things, whatever they do, they do for the love of good.”

I answer that, Every agent acts for an end, as stated above (q. 1, a. 2). Now the end is the good desired and loved by each one. Wherefore it is evident that every agent, whatever it be, does every action from love of some kind.

Reply to Objection 1. This objection takes love as

a passion existing in the sensitive appetite. But here we are speaking of love in a general sense, inasmuch as it includes intellectual, rational, animal, and natural love: for it is in this sense that Dionysius speaks of love in chapter iv of De Divinis Nominibus.

Reply to Objection 2. As stated above (a. 5; q. 27, a. 4) desire, sadness and pleasure, and consequently all the other passions of the soul, result from love. Wherefore every act proceeds from any passion, proceeds also from love as from a first cause: and so the other passions, which are proximate causes, are not superfluous.

Reply to Objection 3. Hatred also is a result of love, as we shall state further on (q. 29, a. 2).

Objection 1. It would seem that union is not an effect of love. For absence is incompatible with union. But love is compatible with absence; for the Apostle says (Gal. 4:18): “Be zealous for that which is good in a good thing always” (speaking of himself, according to a gloss), “and not only when I am present with you.” Therefore union is not an effect of love.

Objection 2. Further, every union is either according to essence, thus form is united to matter, accident to subject, and a part to the whole, or to another part in order to make up the whole: or according to likeness, in genus, species, or accident. But love does not cause union of essence; else love could not be between things essentially distinct. On the other hand, love does not cause union of likeness, but rather is caused by it, as stated above (q. 27, a. 3). Therefore union is not an effect of love.

Objection 3. Further, the sense in act is the sensible in act, and the intellect in act is the thing actually understood. But the lover in act is not the beloved in act. Therefore union is the effect of knowledge rather than of love.

On the contrary, Dionysius says (Div. Nom. iv) that every love is a “unitive love.”

I answer that, The union of lover and beloved is twofold. The first is real union; for instance, when the beloved is present with the lover. The second is union of affection: and this union must be considered in relation to the preceding apprehension; since movement of the appetite follows apprehension. Now love being twofold, viz. love of concupiscence and love of friendship; each of these arises from a kind of apprehension of the oneness of the thing loved with the lover. For when we love a thing, by desiring it, we apprehend it as belonging to our well-being. In like manner when a man loves another with the love of friendship, he wills good to him, just as he wills good to himself: wherefore he apprehends him as his other self, in so far, to wit, as he wills good to him as to himself. Hence a friend is called a man’s “other self” (Ethic. ix, 4), and Augustine says (Confess. iv, 6), “Well did one say to his friend: Thou half of my soul.”

The first of these unions is caused “effectively” by love; because love moves man to desire and seek the presence of the beloved, as of something suitable and belonging to him. The second union is caused “formally” by love; because love itself is this union or bond. In this sense Augustine says (De Trin. viii, 10) that “love is a vital principle uniting, or seeking to unite two together, the lover, to wit, and the beloved.” For in describing it as “uniting” he refers to the union of affection, without which there is no love: and in saying that “it seeks to unite,” he refers to real union.

Reply to Objection 1. This argument is true of real union. That is necessary to pleasure as being its cause; desire implies the real absence of the beloved: but love remains whether the beloved be absent or present.

Reply to Objection 2. Union has a threefold relation to love. There is union which causes love; and this is substantial union, as regards the love with which one loves oneself; while as regards the love wherewith one loves other things, it is the union of likeness, as stated above (q. 27, a. 3). There is also a union which is essentially love itself. This union is according to a bond of affection, and is likened to substantial union, inasmuch as the lover stands to the object of his love, as to himself, if it be love of friendship; as to something belonging to himself, if it be love of concupiscence. Again there is a union, which is the effect of love. This is real union, which the lover seeks with the object of his love. Moreover this union is in keeping with the demands of love: for as the Philosopher relates (Polit. ii, 1), “Aristophanes stated that lovers would wish to be united both into one,” but since “this would result in either one or both being destroyed,” they seek a suitable and becoming union—to live together, speak together, and be united together in other like things.

Reply to Objection 3. Knowledge is perfected by the thing known being united, through its likeness, to the knower. But the effect of love is that the thing itself which is loved, is, in a way, united to the lover, as stated above. Consequently the union caused by love is closer than that which is caused by knowledge.

Objection 1. It would seem that love does not cause mutual indwelling, so that the lover be in the beloved and vice versa. For that which is in another is contained in it. But the same cannot be container and contents. Therefore love cannot cause mutual indwelling, so that the lover be in the beloved and vice versa.

Objection 2. Further, nothing can penetrate within a whole, except by means of a division of the whole. But it is the function of the reason, not of the appetite where love resides, to divide things that are really united. Therefore mutual indwelling is not an effect of love.

Objection 3. Further, if love involves the lover being in the beloved and vice versa, it follows that the beloved is united to the lover, in the same way as the lover is united to the beloved. But the union itself is love, as stated above (a. 1). Therefore it follows that the lover is always loved by the object of his love; which is evidently false. Therefore mutual indwelling is not an effect of love.

On the contrary, It is written (1 Jn. 4:16): “He that abideth in charity abideth in God, and God in him.” Now charity is the love of God. Therefore, for the same reason, every love makes the beloved to be in the lover, and vice versa.

I answer that, This effect of mutual indwelling may be understood as referring both to the apprehensive and to the appetitive power. Because, as to the apprehensive power, the beloved is said to be in the lover, inasmuch as the beloved abides in the apprehension of the lover, according to Phil. 1:7, “For that I have you in my heart”: while the lover is said to be in the beloved, according to apprehension, inasmuch as the lover is not satisfied with a superficial apprehension of the beloved, but strives to gain an intimate knowledge of everything pertaining to the beloved, so as to penetrate into his very soul. Thus it is written concerning the Holy Ghost, Who is God’s Love, that He “searcheth all things, yea the deep things of God” (1 Cor. 2:10).

As the appetitive power, the object loved is said to be in the lover, inasmuch as it is in his affections, by a kind of complacency: causing him either to take pleasure in it, or in its good, when present; or, in the absence of the object loved, by his longing, to tend towards it with the love of concupiscence, or towards the good that he wills to the beloved, with the love of friendship: not in-

deed from any extrinsic cause (as when we desire one thing on account of another, or wish good to another on account of something else), but because the complacency in the beloved is rooted in the lover’s heart. For this reason we speak of love as being “intimate”; and “of the bowels of charity.” On the other hand, the lover is in the beloved, by the love of concupiscence and by the love of friendship, but not in the same way. For the love of concupiscence is not satisfied with any external or superficial possession or enjoyment of the beloved; but seeks to possess the beloved perfectly, by penetrating into his heart, as it were. Whereas, in the love of friendship, the lover is in the beloved, inasmuch as he reckons what is good or evil to his friend, as being so to himself; and his friend’s will as his own, so that it seems as though he felt the good or suffered the evil in the person of his friend. Hence it is proper to friends “to desire the same things, and to grieve and rejoice at the same,” as the Philosopher says (Ethic. ix, 3 and Rhet. ii, 4). Consequently in so far as he reckons what affects his friend as affecting himself, the lover seems to be in the beloved, as though he were become one with him: but in so far as, on the other hand, he wills and acts for his friend’s sake as for his own sake, looking on his friend as identified with himself, thus the beloved is in the lover.

In yet a third way, mutual indwelling in the love of friendship can be understood in regard to reciprocal love: inasmuch as friends return love for love, and both desire and do good things for one another.

Reply to Objection 1. The beloved is contained in the lover, by being impressed on his heart and thus becoming the object of his complacency. On the other hand, the lover is contained in the beloved, inasmuch as the lover penetrates, so to speak, into the beloved. For nothing hinders a thing from being both container and contents in different ways: just as a genus is contained in its species, and vice versa.

Reply to Objection 2. The apprehension of the reason precedes the movement of love. Consequently, just as the reason divides, so does the movement of love penetrate into the beloved, as was explained above.

Reply to Objection 3. This argument is true of the third kind of mutual indwelling, which is not to be found in every kind of love.

Objection 1. It would seem that ecstasy is not an effect of love. For ecstasy seems to imply loss of reason. But love does not always result in loss of reason: for lovers are masters of themselves at times. Therefore love does not cause ecstasy.

Objection 2. Further, the lover desires the beloved to be united to him. Therefore he draws the beloved to himself, rather than betakes himself into the beloved, going forth out from himself as it were.

Objection 3. Further, love unites the beloved to the lover, as stated above (a. 1). If, therefore, the lover goes out from himself, in order to betake himself into the beloved, it follows that the lover always loves the beloved more than himself: which is evidently false. Therefore ecstasy is not an effect of love.

On the contrary, Dionysius says (Div. Nom. iv) that “the Divine love produces ecstasy,” and that “God Himself suffered ecstasy through love.” Since therefore according to the same author (Div. Nom. iv), every love is a participated likeness of the Divine Love, it seems that every love causes ecstasy.

I answer that, To suffer ecstasy means to be placed outside oneself. This happens as to the apprehensive power and as to the appetitive power. As to the apprehensive power, a man is said to be placed outside himself, when he is placed outside the knowledge proper to him. This may be due to his being raised to a higher knowledge; thus, a man is said to suffer ecstasy, inasmuch as he is placed outside the connatural apprehension of his sense and reason, when he is raised up so as to comprehend things that surpass sense and reason: or it may be due to his being cast down into a state of

debasement; thus a man may be said to suffer ecstasy, when he is overcome by violent passion or madness. As to the appetitive power, a man is said to suffer ecstasy, when that power is borne towards something else, so that it goes forth out from itself, as it were.

The first of these ecstasies is caused by love dispositively in so far, namely, as love makes the lover dwell on the beloved, as stated above (a. 2), and to dwell intently on one thing draws the mind from other things. The second ecstasy is caused by love directly; by love of friendship, simply; by love of concupiscence not simply but in a restricted sense. Because in love of concupiscence, the lover is carried out of himself, in a certain sense; in so far, namely, as not being satisfied with enjoying the good that he has, he seeks to enjoy something outside himself. But since he seeks to have this extrinsic good for himself, he does not go out from himself simply, and this movement remains finally within him. On the other hand, in the love of friendship, a man’s affection goes out from itself simply; because he wishes and does good to his friend, by caring and providing for him, for his sake.

Reply to Objection 1. This argument is true of the first kind of ecstasy.

Reply to Objection 2. This argument applies to love of concupiscence, which, as stated above, does not cause ecstasy simply.

Reply to Objection 3. He who loves, goes out from himself, in so far as he wills the good of his friend and works for it. Yet he does not will the good of his friend more than his own good: and so it does not follow that he loves another more than himself.

Objection 1. It would seem that zeal is not an effect of love. For zeal is a beginning of contention; wherefore it is written (1 Cor. 3:3): “Whereas there is among you zeal [Douay: ‘envying’] and contention,” etc. But contention is incompatible with love. Therefore zeal is not an effect of love.

Objection 2. Further, the object of love is the good, which communicates itself to others. But zeal is opposed to communication; since it seems an effect of zeal, that a man refuses to share the object of his love with another: thus husbands are said to be jealous of [zelare] their wives, because they will not share them with others. Therefore zeal is not an effect of love.

Objection 3. Further, there is no zeal without hatred, as neither is there without love: for it is written (Ps. 72:3): “I had a zeal on occasion of the wicked.” Therefore it should not be set down as an effect of love any more than of hatred.

On the contrary, Dionysius says (Div. Nom. iv): “God is said to be a zealot, on account of his great love for all things.”

I answer that, Zeal, whatever way we take it, arises from the intensity of love. For it is evident that the more intensely a power tends to anything, the more vigorously it withstands opposition or resistance. Since therefore love is “a movement towards the object loved,” as Augustine says (QQ. 83, qu. 35), an intense love seeks to remove everything that opposes it.

But this happens in different ways according to love of concupiscence, and love of friendship. For in love of concupiscence he who desires something intensely, is moved against all that hinders his gaining or quietly enjoying the object of his love. It is thus that husbands are said to be jealous of their wives, lest association with others prove a hindrance to their exclusive individual rights. In like manner those who seek to excel, are moved against those who seem to excel, as though these were a hindrance to their excelling. And this is the zeal of envy, of which it is written (Ps. 36:1): “Be

not emulous of evil doers, nor envy [zelaveris] them that work iniquity.”

On the other hand, love of friendship seeks the friend’s good: wherefore, when it is intense, it causes a man to be moved against everything that opposes the friend’s good. In this respect, a man is said to be zealous on behalf of his friend, when he makes a point of repelling whatever may be said or done against the friend’s good. In this way, too, a man is said to be zealous on God’s behalf, when he endeavors, to the best of his means, to repel whatever is contrary to the honor or will of God; according to 3 Kings 19:14: “With zeal I have been zealous for the Lord of hosts.” Again on the words of Jn. 2:17: “The zeal of Thy house hath eaten me up,” a gloss says that “a man is eaten up with a good zeal, who strives to remedy whatever evil he perceives; and if he cannot, bears with it and laments it.”

Reply to Objection 1. The Apostle is speaking in this passage of the zeal of envy; which is indeed the cause of contention, not against the object of love, but for it, and against that which is opposed to it.

Reply to Objection 2. Good is loved inasmuch as it can be communicated to the lover. Consequently whatever hinders the perfection of this communication, becomes hateful. Thus zeal arises from love of good. But through defect of goodness, it happens that certain small goods cannot, in their entirety, be possessed by many at the same time: and from the love of such things arises the zeal of envy. But it does not arise, properly speaking, in the case of those things which, in their entirety, can be possessed by many: for no one envies another the knowledge of truth, which can be known entirely by many; except perhaps one may envy another his superiority in the knowledge of it.

Reply to Objection 3. The very fact that a man hates whatever is opposed to the object of his love, is the effect of love. Hence zeal is set down as an effect of love rather than of hatred.

Objection 1. It would seem that love wounds the lover. For languor denotes a hurt in the one that languishes. But love causes languor: for it is written (Cant 2:5): “Stay me up with flowers, compass me about with apples; because I languish with love.” Therefore love is a wounding passion.

Objection 2. Further, melting is a kind of dissolution. But love melts that in which it is: for it is written (Cant 5:6): “My soul melted when my beloved spoke.” Therefore love is a dissolvent: therefore it is a corruptive and a wounding passion.

Objection 3. Further, fervor denotes a certain excess of heat; which excess has a corruptive effect. But love causes fervor: for Dionysius (Coel. Hier. vii) in reckoning the properties belonging to the Seraphim’s love, includes “hot” and “piercing” and “most fervent.” Moreover it is said of love (Cant 8:6) that “its lamps are fire and flames.” Therefore love is a wounding and corruptive passion.

On the contrary, Dionysius says (Div. Nom. iv) that “everything loves itself with a love that holds it together,” i.e. that preserves it. Therefore love is not a wounding passion, but rather one that preserves and perfects.

I answer that, As stated above (q. 26, Aa. 1,2; q. 27, a. 1), love denotes a certain adapting of the appetitive power to some good. Now nothing is hurt by being adapted to that which is suitable to it; rather, if possible, it is perfected and bettered. But if a thing be adapted to that which is not suitable to it, it is hurt and made worse thereby. Consequently love of a suitable good perfects and betters the lover; but love of a good which is unsuitable to the lover, wounds and worsens him. Wherefore man is perfected and bettered chiefly by the love of

God: but is wounded and worsened by the love of sin, according to Osee 9:10: “They became abominable, as those things which they loved.”

And let this be understood as applying to love in respect of its formal element, i.e. in regard to the appetite. But in respect of the material element in the passion of love, i.e. a certain bodily change, it happens that love is hurtful, by reason of this change being excessive: just as it happens in the senses, and in every act of a power of the soul that is exercised through the change of some bodily organ.

In reply to the objections, it is to be observed that four proximate effects may be ascribed to love: viz. melting, enjoyment, languor, and fervor. Of these the first is “melting,” which is opposed to freezing. For things that are frozen, are closely bound together, so as to be hard to pierce. But it belongs to love that the appetite is fitted to receive the good which is loved, inasmuch as the object loved is in the lover, as stated above (a. 2). Consequently the freezing or hardening of the heart is a disposition incompatible with love: while melting denotes a softening of the heart, whereby the heart shows itself to be ready for the entrance of the beloved. If, then, the beloved is present and possessed, pleasure or enjoyment ensues. But if the beloved be absent, two passions arise; viz. sadness at its absence, which is denoted by “languor” (hence Cicero in *De Tusc. Quaest.* iii, 11 applies the term “ailment” chiefly to sadness); and an intense desire to possess the beloved, which is signified by “fervor.” And these are the effects of love considered formally, according to the relation of the appetitive power to its object. But in the passion of love, other effects ensue, proportionate to the above, in respect of a change in the organ.

Objection 1. It would seem that the lover does not do everything from love. For love is a passion, as stated above (q. 26, a. 2). But man does not do everything from passion: but some things he does from choice, and some things from ignorance, as stated in *Ethic.* v, 8. Therefore not everything that a man does, is done from love.

Objection 2. Further, the appetite is a principle of movement and action in all animals, as stated in *De Anima* iii, 10. If, therefore, whatever a man does is done from love, the other passions of the appetitive faculty are superfluous.

Objection 3. Further, nothing is produced at one and the same time by contrary causes. But some things are done from hatred. Therefore all things are not done from love.

On the contrary, Dionysius says (*Div. Nom.* iv) that “all things, whatever they do, they do for the love of good.”

I answer that, Every agent acts for an end, as stated above (q. 1, a. 2). Now the end is the good desired and loved by each one. Wherefore it is evident that every agent, whatever it be, does every action from love of some kind.

Reply to Objection 1. This objection takes love as a passion existing in the sensitive appetite. But here we are speaking of love in a general sense, inasmuch as it includes intellectual, rational, animal, and natural love: for it is in this sense that Dionysius speaks of love in chapter iv of *De Divinis Nominibus*.

Reply to Objection 2. As stated above (a. 5; q. 27, a. 4) desire, sadness and pleasure, and consequently all the other passions of the soul, result from love. Wherefore every act proceeds from any passion, proceeds also from love as from a first cause: and so the other passions, which are proximate causes, are not superfluous.

Reply to Objection 3. Hatred also is a result of love, as we shall state further on (q. 29, a. 2).

FIRST PART OF THE SECOND PART, QUESTION 29

Of Hatred (In Six Articles)

We must now consider hatred: concerning which there are six points of inquiry:

- (1) Whether evil is the cause and the object of hatred?
- (2) Whether love is the cause of hatred?
- (3) Whether hatred is stronger than love?
- (4) Whether a man can hate himself?
- (5) Whether a man can hate the truth?
- (6) Whether a thing can be the object of universal hatred?

Whether evil is the cause and object of hatred?

Ia IIae q. 29 a. 1

Objection 1. It would seem that evil is not the object and cause of hatred. For everything that exists, as such, is good. If therefore evil be the object of hatred, it follows that nothing but the lack of something can be the object of hatred: which is clearly untrue.

Objection 2. Further, hatred of evil is praiseworthy; hence (2 Macc 3:1) some are praised for that “the laws were very well kept, because of the godliness of Onias the high-priest, and the hatred of their souls [Douay: ‘his soul’] had no evil.” If, therefore, nothing but evil be the object of hatred, it would follow that all hatred is commendable: and this is clearly false.

Objection 3. Further, the same thing is not at the same time both good and evil. But the same thing is lovable and hateful to different subjects. Therefore hatred is not only of evil, but also of good.

On the contrary, Hatred is the opposite of love. But the object of love is good, as stated above (q. 26, a. 1; q. 27, a. 1). Therefore the object of hatred is evil.

I answer that, Since the natural appetite is the result of apprehension (though this apprehension is not in the same subject as the natural appetite), it seems that what applies to the inclination of the natural appetite, applies also to the animal appetite, which does result from an apprehension in the same subject, as stated above (q. 26, a. 1). Now, with regard to the natural appetite, it is evident, that just as each thing is naturally attuned and adapted to that which is suitable to it, wherein consists natural love; so has it a natural dissonance from that which opposes and destroys it; and this is natural hatred.

So, therefore, in the animal appetite, or in the intellectual appetite, love is a certain harmony of the appetite with that which is apprehended as suitable; while hatred is dissonance of the appetite from that which is apprehended as repugnant and hurtful. Now, just as whatever is suitable, as such, bears the aspect of good; so whatever is repugnant, as such, bears the aspect of evil. And therefore, just as good is the object of love, so evil is the object of hatred.

Reply to Objection 1. Being, as such, has not the aspect of repugnance but only of fittingness; because being is common to all things. But being, inasmuch as it is this determinate being, has an aspect of repugnance to some determinate being. And in this way, one being is hateful to another, and is evil; though not in itself, but by comparison with something else.

Reply to Objection 2. Just as a thing may be apprehended as good, when it is not truly good; so a thing may be apprehended as evil, whereas it is not truly evil. Hence it happens sometimes that neither hatred of evil nor love of good is good.

Reply to Objection 3. To different things the same thing may be lovable or hateful: in respect of the natural appetite, owing to one and the same thing being naturally suitable to one thing, and naturally unsuitable to another: thus heat is becoming to fire and unbecoming to water: and in respect of the animal appetite, owing to one and the same thing being apprehended by one as good, by another as bad.

Whether love is a cause of hatred?

Ia IIae q. 29 a. 2

Objection 1. It would seem that love is not a cause of hatred. For “the opposite members of a division are naturally simultaneous” (Prædic. x). But love and hatred are opposite members of a division, since they are contrary to one another. Therefore they are naturally simultaneous. Therefore love is not the cause of hatred.

Objection 2. Further, of two contraries, one is not the cause of the other. But love and hatred are con-

traries. Therefore love is not the cause of hatred.

Objection 3. Further, that which follows is not the cause of that which precedes. But hatred precedes love, seemingly: since hatred implies a turning away from evil, whereas love implies a turning towards good. Therefore love is not the cause of hatred.

On the contrary, Augustine says (De Civ. Dei xiv, 7,9) that all emotions are caused by love. Therefore ha-

tred also, since it is an emotion of the soul, is caused by love.

I answer that, As stated above (a. 1), love consists in a certain agreement of the lover with the object loved, while hatred consists in a certain disagreement or dissonance. Now we should consider in each thing, what agrees with it, before that which disagrees: since a thing disagrees with another, through destroying or hindering that which agrees with it. Consequently love must needs precede hatred; and nothing is hated, save through being contrary to a suitable thing which is loved. And hence it is that every hatred is caused by love.

Reply to Objection 1. The opposite members of a division are sometimes naturally simultaneous, both really and logically; e.g. two species of animal, or two species of color. Sometimes they are simultaneous logically, while, in reality, one precedes, and causes the other; e.g. the species of numbers, figures and movements. Sometimes they are not simultaneous either really or logically; e.g. substance and accident; for substance is in reality the cause of accident; and being is

predicated of substance before it is predicated of accident, by a priority of reason, because it is not predicated of accident except inasmuch as the latter is in substance. Now love and hatred are naturally simultaneous, logically but not really. Wherefore nothing hinders love from being the cause of hatred.

Reply to Objection 2. Love and hatred are contraries if considered in respect of the same thing. But if taken in respect of contraries, they are not themselves contrary, but consequent to one another: for it amounts to the same that one love a certain thing, or that one hate its contrary. Thus love of one thing is the cause of one's hating its contrary.

Reply to Objection 3. In the order of execution, the turning away from one term precedes the turning towards the other. But the reverse is the case in the order of intention: since approach to one term is the reason for turning away from the other. Now the appetitive movement belongs rather to the order of intention than to that of execution. Wherefore love precedes hatred: because each is an appetitive movement.

Whether hatred is stronger than love?

Ia IIae q. 29 a. 3

Objection 1. It would seem that hatred is stronger than love. For Augustine says (QQ. 83, qu. 36): "There is no one who does not flee from pain, more than he desires pleasure." But flight from pain pertains to hatred; while desire for pleasure belongs to love. Therefore hatred is stronger than love.

Objection 2. Further, the weaker is overcome by the stronger. But love is overcome by hatred: when, that is to say, love is turned into hatred. Therefore hatred is stronger than love.

Objection 3. Further, the emotions of the soul are shown by their effects. But man insists more on repelling what is hateful, than on seeking what is pleasant: thus also irrational animals refrain from pleasure for fear of the whip, as Augustine instances (QQ. 83, qu. 36). Therefore hatred is stronger than love.

On the contrary, Good is stronger than evil; because "evil does nothing except in virtue of good," as Dionysius says (Div. Nom. iv). But hatred and love differ according to the difference of good and evil. Therefore love is stronger than hatred.

I answer that, It is impossible for an effect to be stronger than its cause. Now every hatred arises from some love as its cause, as above stated (a. 2). Therefore it is impossible for hatred to be stronger than love absolutely.

But furthermore, love must needs be, absolutely speaking, stronger than hatred. Because a thing is moved to the end more strongly than to the means. Now turning away from evil is directed as a means to the

gaining of good. Wherefore, absolutely speaking, the soul's movement in respect of good is stronger than its movement in respect of evil.

Nevertheless hatred sometimes seems to be stronger than love, for two reasons. First, because hatred is more keenly felt than love. For, since the sensitive perception is accompanied by a certain impression; when once the impression has been received it is not felt so keenly as in the moment of receiving it. Hence the heat of a hectic fever, though greater, is nevertheless not felt so much as the heat of tertian fever; because the heat of the hectic fever is habitual and like a second nature. For this reason, love is felt more keenly in the absence of the object loved; thus Augustine says (De Trin. x, 12) that "love is felt more keenly when we lack what we love." And for the same reason, the unbecomingness of that which is hated is felt more keenly than the becomingness of that which is loved. Secondly, because comparison is made between a hatred and a love which are not mutually corresponding. Because, according to different degrees of good there are different degrees of love to which correspond different degrees of hatred. Wherefore a hatred that corresponds to a greater love, moves us more than a lesser love.

Hence it is clear how to reply to the First Objection. For the love of pleasure is less than the love of self-preservation, to which corresponds flight from pain. Wherefore we flee from pain more than we love pleasure.

Objection 1. It would seem that a man can hate himself. For it is written (Ps. 10:6): “He that loveth iniquity, hateth his own soul.” But many love iniquity. Therefore many hate themselves.

Objection 2. Further, him we hate, to whom we wish and work evil. But sometimes a man wishes and works evil to himself, e.g. a man who kills himself. Therefore some men hate themselves.

Objection 3. Further, Boethius says (De Consol. ii) that “avarice makes a man hateful”; whence we may conclude that everyone hates a miser. But some men are misers. Therefore they hate themselves.

On the contrary, The Apostle says (Eph. 5:29) that “no man ever hated his own flesh.”

I answer that, Properly speaking, it is impossible for a man to hate himself. For everything naturally desires good, nor can anyone desire anything for himself, save under the aspect of good: for “evil is outside the scope of the will,” as Dionysius says (Div. Nom. iv). Now to love a man is to will good to him, as stated above (q. 26, a. 4). Consequently, a man must, of necessity, love himself; and it is impossible for a man to hate himself, properly speaking.

But accidentally it happens that a man hates himself: and this in two ways. First, on the part of the good which a man wills to himself. For it happens sometimes that what is desired as good in some particular respect, is simply evil; and in this way, a man accidentally wills

evil to himself; and thus hates himself. Secondly, in regard to himself, to whom he wills good. For each thing is that which is predominant in it; wherefore the state is said to do what the king does, as if the king were the whole state. Now it is clear that man is principally the mind of man. And it happens that some men account themselves as being principally that which they are in their material and sensitive nature. Wherefore they love themselves according to what they take themselves to be, while they hate that which they really are, by desiring what is contrary to reason. And in both these ways, “he that loveth iniquity hateth” not only “his own soul,” but also himself.

Wherefore the reply to the First Objection is evident.

Reply to Objection 2. No man wills and works evil to himself, except he apprehend it under the aspect of good. For even they who kill themselves, apprehend death itself as a good, considered as putting an end to some unhappiness or pain.

Reply to Objection 3. The miser hates something accidental to himself, but not for that reason does he hate himself: thus a sick man hates his sickness for the very reason that he loves himself. Or we may say that avarice makes man hateful to others, but not to himself. In fact, it is caused by inordinate self-love, in respect of which, man desires temporal goods for himself more than he should.

Objection 1. It would seem that a man cannot hate the truth. For good, true, and being are convertible. But a man cannot hate good. Neither, therefore, can he hate the truth.

Objection 2. Further, “All men have a natural desire for knowledge,” as stated in the beginning of the Metaphysics i, 1. But knowledge is only of truth. Therefore truth is naturally desired and loved. But that which is in a thing naturally, is always in it. Therefore no man can hate the truth.

Objection 3. Further, the Philosopher says (Rhet. ii, 4) that “men love those who are straightforward.” But there can be no other motive for this save truth. Therefore man loves the truth naturally. Therefore he cannot hate it.

On the contrary, The Apostle says (Gal. 4:16): “Am I become your enemy because I tell you the truth?”*

I answer that, Good, true and being are the same in reality, but differ as considered by reason. For good is considered in the light of something desirable, while being and true are not so considered: because good is

“what all things seek.” Wherefore good, as such, cannot be the object of hatred, neither in general nor in particular. Being and truth in general cannot be the object of hatred: because disagreement is the cause of hatred, and agreement is the cause of love; while being and truth are common to all things. But nothing hinders some particular being or some particular truth being an object of hatred, in so far as it is considered as hurtful and repugnant; since hurtfulness and repugnance are not incompatible with the notion of being and truth, as they are with the notion of good.

Now it may happen in three ways that some particular truth is repugnant or hurtful to the good we love. First, according as truth is in things as in its cause and origin. And thus man sometimes hates a particular truth, when he wishes that what is true were not true. Secondly, according as truth is in man’s knowledge, which hinders him from gaining the object loved: such is the case of those who wish not to know the truth of faith, that they may sin freely; in whose person it is said (Job 21:14): “We desire not the knowledge of Thy ways.” Thirdly, a particular truth is hated, as being repugnant,

* St. Thomas quotes the passage, probably from memory, as though it were an assertion: “I am become,” etc.

inasmuch as it is in the intellect of another man: as, for instance, when a man wishes to remain hidden in his sin, he hates that anyone should know the truth about his sin. In this respect, Augustine says (Confess. x, 23) that men “love truth when it enlightens, they hate it when it reproves.” This suffices for the Reply to the First Objection.

Reply to Objection 2. The knowledge of truth is

lovable in itself: hence Augustine says that men love it when it enlightens. But accidentally, the knowledge of truth may become hateful, in so far as it hinders one from accomplishing one’s desire.

Reply to Objection 3. The reason why we love those who are straightforward is that they make known the truth, and the knowledge of the truth, considered in itself, is a desirable thing.

Whether anything can be an object of universal hatred?

Ia IIae q. 29 a. 6

Objection 1. It would seem that a thing cannot be an object of universal hatred. Because hatred is a passion of the sensitive appetite, which is moved by an apprehension in the senses. But the senses cannot apprehend the universal. Therefore a thing cannot be an object of universal hatred.

Objection 2. Further, hatred is caused by disagreement; and where there is disagreement, there is nothing in common. But the notion of universality implies something in common. Therefore nothing can be the object of universal hatred.

Objection 3. Further, the object of hatred is evil. But “evil is in things, and not in the mind” (Metaph. vi, 4). Since therefore the universal is in the mind only, which abstracts the universal from the particular, it would seem that hatred cannot have a universal object.

On the contrary, The Philosopher says (Rhet. ii, 4) that “anger is directed to something singular, whereas hatred is also directed to a thing in general; for everybody hates the thief and the backbiter.”

I answer that, There are two ways of speaking of the universal: first, as considered under the aspect of universality; secondly, as considered in the nature to which it is ascribed: for it is one thing to consider the universal man, and another to consider a man as man. If, therefore, we take the universal, in the first way, no sensitive power, whether of apprehension or of appetite, can attain the universal: because the universal is obtained by abstraction from individual matter, on which every sensitive power is based.

Nevertheless the sensitive powers, both of apprehension and of appetite, can tend to something universally.

Thus we say that the object of sight is color considered generically; not that the sight is cognizant of universal color, but because the fact that color is cognizant by the sight, is attributed to color, not as being this particular color, but simply because it is color. Accordingly hatred in the sensitive faculty can regard something universally: because this thing, by reason of its common nature, and not merely as an individual, is hostile to the animal—for instance, a wolf in regard to a sheep. Hence a sheep hates the wolf universally. On the other hand, anger is always caused by something in particular: because it is caused by some action of the one that hurts us; and actions proceed from individuals. For this reason the Philosopher says (Rhet. ii, 4) that “anger is always directed to something singular, whereas hatred can be directed to a thing in general.”

But according as hatred is in the intellectual part, since it arises from the universal apprehension of the intellect, it can regard the universal in both ways.

Reply to Objection 1. The senses do not apprehend the universal, as such: but they apprehend something to which the character of universality is given by abstraction.

Reply to Objection 2. That which is common to all cannot be a reason of hatred. But nothing hinders a thing from being common to many, and at variance with others, so as to be hateful to them.

Reply to Objection 3. This argument considers the universal under the aspect of universality: and thus it does not come under the sensitive apprehension or appetite.

Objection 1. It would seem that evil is not the object and cause of hatred. For everything that exists, as such, is good. If therefore evil be the object of hatred, it follows that nothing but the lack of something can be the object of hatred: which is clearly untrue.

Objection 2. Further, hatred of evil is praiseworthy; hence (2 Macc 3:1) some are praised for that “the laws were very well kept, because of the godliness of Onias the high-priest, and the hatred of their souls [Douay: ‘his soul’] had no evil.” If, therefore, nothing but evil be the object of hatred, it would follow that all hatred is commendable: and this is clearly false.

Objection 3. Further, the same thing is not at the same time both good and evil. But the same thing is lovable and hateful to different subjects. Therefore hatred is not only of evil, but also of good.

On the contrary, Hatred is the opposite of love. But the object of love is good, as stated above (q. 26, a. 1; q. 27, a. 1). Therefore the object of hatred is evil.

I answer that, Since the natural appetite is the result of apprehension (though this apprehension is not in the same subject as the natural appetite), it seems that what applies to the inclination of the natural appetite, applies also to the animal appetite, which does result from an apprehension in the same subject, as stated above (q. 26, a. 1). Now, with regard to the natural appetite, it is evident, that just as each thing is naturally attuned and adapted to that which is suitable to it, wherein consists natural love; so has it a natural dissonance from that which opposes and destroys it; and this is natural hatred.

So, therefore, in the animal appetite, or in the intellectual appetite, love is a certain harmony of the appetite with that which is apprehended as suitable; while hatred is dissonance of the appetite from that which is apprehended as repugnant and hurtful. Now, just as whatever is suitable, as such, bears the aspect of good; so whatever is repugnant, as such, bears the aspect of evil. And therefore, just as good is the object of love, so evil is the object of hatred.

Reply to Objection 1. Being, as such, has not the aspect of repugnance but only of fittingness; because being is common to all things. But being, inasmuch as it is this determinate being, has an aspect of repugnance to some determinate being. And in this way, one being is hateful to another, and is evil; though not in itself, but by comparison with something else.

Reply to Objection 2. Just as a thing may be apprehended as good, when it is not truly good; so a thing may be apprehended as evil, whereas it is not truly evil. Hence it happens sometimes that neither hatred of evil nor love of good is good.

Reply to Objection 3. To different things the same thing may be lovable or hateful: in respect of the natural appetite, owing to one and the same thing being naturally suitable to one thing, and naturally unsuitable to another: thus heat is becoming to fire and unbecoming to water: and in respect of the animal appetite, owing to one and the same thing being apprehended by one as good, by another as bad.

Objection 1. It would seem that love is not a cause of hatred. For “the opposite members of a division are naturally simultaneous” (Praedic. x). But love and hatred are opposite members of a division, since they are contrary to one another. Therefore they are naturally simultaneous. Therefore love is not the cause of hatred.

Objection 2. Further, of two contraries, one is not the cause of the other. But love and hatred are contraries. Therefore love is not the cause of hatred.

Objection 3. Further, that which follows is not the cause of that which precedes. But hatred precedes love, seemingly: since hatred implies a turning away from evil, whereas love implies a turning towards good. Therefore love is not the cause of hatred.

On the contrary, Augustine says (De Civ. Dei xiv, 7,9) that all emotions are caused by love. Therefore hatred also, since it is an emotion of the soul, is caused by love.

I answer that, As stated above (a. 1), love consists in a certain agreement of the lover with the object loved, while hatred consists in a certain disagreement or dissonance. Now we should consider in each thing, what agrees with it, before that which disagrees: since a thing disagrees with another, through destroying or hindering that which agrees with it. Consequently love must needs precede hatred; and nothing is hated, save through being contrary to a suitable thing which is loved. And hence it is that every hatred is caused by love.

Reply to Objection 1. The opposite members of a

division are sometimes naturally simultaneous, both really and logically; e.g. two species of animal, or two species of color. Sometimes they are simultaneous logically, while, in reality, one precedes, and causes the other; e.g. the species of numbers, figures and movements. Sometimes they are not simultaneous either really or logically; e.g. substance and accident; for substance is in reality the cause of accident; and being is predicated of substance before it is predicated of accident, by a priority of reason, because it is not predicated of accident except inasmuch as the latter is in substance. Now love and hatred are naturally simultaneous, logically but not really. Wherefore nothing hinders love from being the cause of hatred.

Reply to Objection 2. Love and hatred are contraries if considered in respect of the same thing. But if taken in respect of contraries, they are not themselves contrary, but consequent to one another: for it amounts to the same that one love a certain thing, or that one hate its contrary. Thus love of one thing is the cause of one’s hating its contrary.

Reply to Objection 3. In the order of execution, the turning away from one term precedes the turning towards the other. But the reverse is the case in the order of intention: since approach to one term is the reason for turning away from the other. Now the appetitive movement belongs rather to the order of intention than to that of execution. Wherefore love precedes hatred: because each is an appetitive movement.

Objection 1. It would seem that hatred is stronger than love. For Augustine says (QQ. 83, qu. 36): “There is no one who does not flee from pain, more than he desires pleasure.” But flight from pain pertains to hatred; while desire for pleasure belongs to love. Therefore hatred is stronger than love.

Objection 2. Further, the weaker is overcome by the stronger. But love is overcome by hatred: when, that is to say, love is turned into hatred. Therefore hatred is stronger than love.

Objection 3. Further, the emotions of the soul are shown by their effects. But man insists more on repelling what is hateful, than on seeking what is pleasant: thus also irrational animals refrain from pleasure for fear of the whip, as Augustine instances (QQ. 83, qu. 36). Therefore hatred is stronger than love.

On the contrary, Good is stronger than evil; because “evil does nothing except in virtue of good,” as Dionysius says (Div. Nom. iv). But hatred and love differ according to the difference of good and evil. Therefore love is stronger than hatred.

I answer that, It is impossible for an effect to be stronger than its cause. Now every hatred arises from some love as its cause, as above stated (a. 2). Therefore it is impossible for hatred to be stronger than love absolutely.

But furthermore, love must needs be, absolutely speaking, stronger than hatred. Because a thing is moved to the end more strongly than to the means. Now turning away from evil is directed as a means to the

gaining of good. Wherefore, absolutely speaking, the soul’s movement in respect of good is stronger than its movement in respect of evil.

Nevertheless hatred sometimes seems to be stronger than love, for two reasons. First, because hatred is more keenly felt than love. For, since the sensitive perception is accompanied by a certain impression; when once the impression has been received it is not felt so keenly as in the moment of receiving it. Hence the heat of a hectic fever, though greater, is nevertheless not felt so much as the heat of tertian fever; because the heat of the hectic fever is habitual and like a second nature. For this reason, love is felt more keenly in the absence of the object loved; thus Augustine says (De Trin. x, 12) that “love is felt more keenly when we lack what we love.” And for the same reason, the unbecomingness of that which is hated is felt more keenly than the becomingness of that which is loved. Secondly, because comparison is made between a hatred and a love which are not mutually corresponding. Because, according to different degrees of good there are different degrees of love to which correspond different degrees of hatred. Wherefore a hatred that corresponds to a greater love, moves us more than a lesser love.

Hence it is clear how to reply to the First Objection. For the love of pleasure is less than the love of self-preservation, to which corresponds flight from pain. Wherefore we flee from pain more than we love pleasure.

Objection 1. It would seem that a man can hate himself. For it is written (Ps. 10:6): “He that loveth iniquity, hateth his own soul.” But many love iniquity. Therefore many hate themselves.

Objection 2. Further, him we hate, to whom we wish and work evil. But sometimes a man wishes and works evil to himself, e.g. a man who kills himself. Therefore some men hate themselves.

Objection 3. Further, Boethius says (De Consol. ii) that “avarice makes a man hateful”; whence we may conclude that everyone hates a miser. But some men are misers. Therefore they hate themselves.

On the contrary, The Apostle says (Eph. 5:29) that “no man ever hated his own flesh.”

I answer that, Properly speaking, it is impossible for a man to hate himself. For everything naturally desires good, nor can anyone desire anything for himself, save under the aspect of good: for “evil is outside the scope of the will,” as Dionysius says (Div. Nom. iv). Now to love a man is to will good to him, as stated above (q. 26, a. 4). Consequently, a man must, of necessity, love himself; and it is impossible for a man to hate himself, properly speaking.

But accidentally it happens that a man hates himself: and this in two ways. First, on the part of the good which a man wills to himself. For it happens sometimes that what is desired as good in some particular respect, is simply evil; and in this way, a man accidentally wills

evil to himself; and thus hates himself. Secondly, in regard to himself, to whom he wills good. For each thing is that which is predominant in it; wherefore the state is said to do what the king does, as if the king were the whole state. Now it is clear that man is principally the mind of man. And it happens that some men account themselves as being principally that which they are in their material and sensitive nature. Wherefore they love themselves according to what they take themselves to be, while they hate that which they really are, by desiring what is contrary to reason. And in both these ways, “he that loveth iniquity hateth” not only “his own soul,” but also himself.

Wherefore the reply to the First Objection is evident.

Reply to Objection 2. No man wills and works evil to himself, except he apprehend it under the aspect of good. For even they who kill themselves, apprehend death itself as a good, considered as putting an end to some unhappiness or pain.

Reply to Objection 3. The miser hates something accidental to himself, but not for that reason does he hate himself: thus a sick man hates his sickness for the very reason that he loves himself. Or we may say that avarice makes man hateful to others, but not to himself. In fact, it is caused by inordinate self-love, in respect of which, man desires temporal goods for himself more than he should.

Objection 1. It would seem that a man cannot hate the truth. For good, true, and being are convertible. But a man cannot hate good. Neither, therefore, can he hate the truth.

Objection 2. Further, “All men have a natural desire for knowledge,” as stated in the beginning of the *Metaphysics* i, 1. But knowledge is only of truth. Therefore truth is naturally desired and loved. But that which is in a thing naturally, is always in it. Therefore no man can hate the truth.

Objection 3. Further, the Philosopher says (*Rhet.* ii, 4) that “men love those who are straightforward.” But there can be no other motive for this save truth. Therefore man loves the truth naturally. Therefore he cannot hate it.

On the contrary, The Apostle says (*Gal.* 4:16): “Am I become your enemy because I tell you the truth?”*

I answer that, Good, true and being are the same in reality, but differ as considered by reason. For good is considered in the light of something desirable, while being and true are not so considered: because good is “what all things seek.” Wherefore good, as such, cannot be the object of hatred, neither in general nor in particular. Being and truth in general cannot be the object of hatred: because disagreement is the cause of hatred, and agreement is the cause of love; while being and truth are common to all things. But nothing hinders some particular being or some particular truth being an object of hatred, in so far as it is considered as hurtful and repug-

nant; since hurtfulness and repugnance are not incompatible with the notion of being and truth, as they are with the notion of good.

Now it may happen in three ways that some particular truth is repugnant or hurtful to the good we love. First, according as truth is in things as in its cause and origin. And thus man sometimes hates a particular truth, when he wishes that what is true were not true. Secondly, according as truth is in man’s knowledge, which hinders him from gaining the object loved: such is the case of those who wish not to know the truth of faith, that they may sin freely; in whose person it is said (*Job* 21:14): “We desire not the knowledge of Thy ways.” Thirdly, a particular truth is hated, as being repugnant, inasmuch as it is in the intellect of another man: as, for instance, when a man wishes to remain hidden in his sin, he hates that anyone should know the truth about his sin. In this respect, Augustine says (*Confess.* x, 23) that men “love truth when it enlightens, they hate it when it reproves.” This suffices for the Reply to the First Objection.

Reply to Objection 2. The knowledge of truth is lovable in itself: hence Augustine says that men love it when it enlightens. But accidentally, the knowledge of truth may become hateful, in so far as it hinders one from accomplishing one’s desire.

Reply to Objection 3. The reason why we love those who are straightforward is that they make known the truth, and the knowledge of the truth, considered in itself, is a desirable thing.

* St. Thomas quotes the passage, probably from memory, as though it were an assertion: “I am become,” etc.

Objection 1. It would seem that a thing cannot be an object of universal hatred. Because hatred is a passion of the sensitive appetite, which is moved by an apprehension in the senses. But the senses cannot apprehend the universal. Therefore a thing cannot be an object of universal hatred.

Objection 2. Further, hatred is caused by disagreement; and where there is disagreement, there is nothing in common. But the notion of universality implies something in common. Therefore nothing can be the object of universal hatred.

Objection 3. Further, the object of hatred is evil. But “evil is in things, and not in the mind” (Metaph. vi, 4). Since therefore the universal is in the mind only, which abstracts the universal from the particular, it would seem that hatred cannot have a universal object.

On the contrary, The Philosopher says (Rhet. ii, 4) that “anger is directed to something singular, whereas hatred is also directed to a thing in general; for everybody hates the thief and the backbiter.”

I answer that, There are two ways of speaking of the universal: first, as considered under the aspect of universality; secondly, as considered in the nature to which it is ascribed: for it is one thing to consider the universal man, and another to consider a man as man. If, therefore, we take the universal, in the first way, no sensitive power, whether of apprehension or of appetite, can attain the universal: because the universal is obtained by abstraction from individual matter, on which every sensitive power is based.

Nevertheless the sensitive powers, both of apprehension and of appetite, can tend to something universally.

Thus we say that the object of sight is color considered generically; not that the sight is cognizant of universal color, but because the fact that color is cognizant by the sight, is attributed to color, not as being this particular color, but simply because it is color. Accordingly hatred in the sensitive faculty can regard something universally: because this thing, by reason of its common nature, and not merely as an individual, is hostile to the animal—for instance, a wolf in regard to a sheep. Hence a sheep hates the wolf universally. On the other hand, anger is always caused by something in particular: because it is caused by some action of the one that hurts us; and actions proceed from individuals. For this reason the Philosopher says (Rhet. ii, 4) that “anger is always directed to something singular, whereas hatred can be directed to a thing in general.”

But according as hatred is in the intellectual part, since it arises from the universal apprehension of the intellect, it can regard the universal in both ways.

Reply to Objection 1. The senses do not apprehend the universal, as such: but they apprehend something to which the character of universality is given by abstraction.

Reply to Objection 2. That which is common to all cannot be a reason of hatred. But nothing hinders a thing from being common to many, and at variance with others, so as to be hateful to them.

Reply to Objection 3. This argument considers the universal under the aspect of universality: and thus it does not come under the sensitive apprehension or appetite.

Objection 1. It would seem that man's happiness consists in wealth. For since happiness is man's last end, it must consist in that which has the greatest hold on man's affections. Now this is wealth: for it is written (Eccles. 10:19): "All things obey money." Therefore man's happiness consists in wealth.

Objection 2. Further, according to Boethius (De Consol. iii), happiness is "a state of life made perfect by the aggregate of all good things." Now money seems to be the means of possessing all things: for, as the Philosopher says (Ethic. v, 5), money was invented, that it might be a sort of guarantee for the acquisition of whatever man desires. Therefore happiness consists in wealth.

Objection 3. Further, since the desire for the sovereign good never fails, it seems to be infinite. But this is the case with riches more than anything else; since "a covetous man shall not be satisfied with riches" (Eccles. 5:9). Therefore happiness consists in wealth.

On the contrary, Man's good consists in retaining happiness rather than in spreading it. But as Boethius says (De Consol. ii), "wealth shines in giving rather than in hoarding: for the miser is hateful, whereas the generous man is applauded." Therefore man's happiness does not consist in wealth.

I answer that, It is impossible for man's happiness to consist in wealth. For wealth is twofold, as the Philosopher says (Polit. i, 3), viz. natural and artificial. Natural wealth is that which serves man as a remedy for his natural wants: such as food, drink, clothing, cars, dwellings, and such like, while artificial wealth is that which is not a direct help to nature, as money, but is invented by the art of man, for the convenience of exchange, and as a measure of things salable.

Now it is evident that man's happiness cannot consist in natural wealth. For wealth of this kind is sought for the sake of something else, viz. as a support of human nature: consequently it cannot be man's last end, rather is it ordained to man as to its end. Wherefore in the order of nature, all such things are below man, and made for him, according to Ps. 8:8: "Thou hast sub-

jected all things under his feet."

And as to artificial wealth, it is not sought save for the sake of natural wealth; since man would not seek it except because, by its means, he procures for himself the necessaries of life. Consequently much less can it be considered in the light of the last end. Therefore it is impossible for happiness, which is the last end of man, to consist in wealth.

Reply to Objection 1. All material things obey money, so far as the multitude of fools is concerned, who know no other than material goods, which can be obtained for money. But we should take our estimation of human goods not from the foolish but from the wise: just as it is for a person whose sense of taste is in good order, to judge whether a thing is palatable.

Reply to Objection 2. All things salable can be had for money: not so spiritual things, which cannot be sold. Hence it is written (Prov. 17:16): "What doth it avail a fool to have riches, seeing he cannot buy wisdom."

Reply to Objection 3. The desire for natural riches is not infinite: because they suffice for nature in a certain measure. But the desire for artificial wealth is infinite, for it is the servant of disordered concupiscence, which is not curbed, as the Philosopher makes clear (Polit. i, 3). Yet this desire for wealth is infinite otherwise than the desire for the sovereign good. For the more perfectly the sovereign good is possessed, the more it is loved, and other things despised: because the more we possess it, the more we know it. Hence it is written (Ecclus. 24:29): "They that eat me shall yet hunger." Whereas in the desire for wealth and for whatsoever temporal goods, the contrary is the case: for when we already possess them, we despise them, and seek others: which is the sense of Our Lord's words (Jn. 4:13): "Whosoever drinketh of this water," by which temporal goods are signified, "shall thirst again." The reason of this is that we realize more their insufficiency when we possess them: and this very fact shows that they are imperfect, and the sovereign good does not consist therein.

Objection 1. It would seem that man's happiness consists in honors. For happiness or bliss is "the reward of virtue," as the Philosopher says (Ethic. i, 9). But honor more than anything else seems to be that by which virtue is rewarded, as the Philosopher says (Ethic. iv, 3). Therefore happiness consists especially in honor.

Objection 2. Further, that which belongs to God and to persons of great excellence seems especially to be happiness, which is the perfect good. But that is honor, as the Philosopher says (Ethic. iv, 3). Moreover, the Apostle says (1 Tim. 1:17): "To... the only God be honor and glory." Therefore happiness consists in honor.

Objection 3. Further, that which man desires above all is happiness. But nothing seems more desirable to man than honor: since man suffers loss in all other things, lest he should suffer loss of honor. Therefore happiness consists in honor.

On the contrary, Happiness is in the happy. But honor is not in the honored, but rather in him who honors, and who offers deference to the person honored, as the Philosopher says (Ethic. i, 5). Therefore happiness does not consist in honor.

I answer that, It is impossible for happiness to consist in honor. For honor is given to a man on account

of some excellence in him; and consequently it is a sign and attestation of the excellence that is in the person honored. Now a man's excellence is in proportion, especially to his happiness, which is man's perfect good; and to its parts, i.e. those goods by which he has a certain share of happiness. And therefore honor can result from happiness, but happiness cannot principally consist therein.

Reply to Objection 1. As the Philosopher says (Ethic. i, 5), honor is not that reward of virtue, for which the virtuous work: but they receive honor from men by way of reward, "as from those who have nothing greater to offer." But virtue's true reward is happiness itself, for which the virtuous work: whereas if they worked for honor, it would no longer be a virtue, but ambition.

Reply to Objection 2. Honor is due to God and to persons of great excellence as a sign of attestation of excellence already existing: not that honor makes them excellent.

Reply to Objection 3. That man desires honor above all else, arises from his natural desire for happiness, from which honor results, as stated above. Wherefore man seeks to be honored especially by the wise, on whose judgment he believes himself to be excellent or happy.

Objection 1. It would seem that man's happiness consists in glory. For happiness seems to consist in that which is paid to the saints for the trials they have undergone in the world. But this is glory: for the Apostle says (Rom. 8:18): "The sufferings of this time are not worthy to be compared with the glory to come, that shall be revealed in us." Therefore happiness consists in glory.

Objection 2. Further, good is diffusive of itself, as stated by Dionysius (Div. Nom. iv). But man's good is spread abroad in the knowledge of others by glory more than by anything else: since, according to Ambrose*, glory consists "in being well known and praised." Therefore man's happiness consists in glory.

Objection 3. Further, happiness is the most enduring good. Now this seems to be fame or glory; because by this men attain to eternity after a fashion. Hence Boethius says (De Consol. ii): "You seem to beget unto yourselves eternity, when you think of your fame in future time." Therefore man's happiness consists in fame or glory.

On the contrary, Happiness is man's true good. But it happens that fame or glory is false: for as Boethius says (De Consol. iii), "many owe their renown to the lying reports spread among the people. Can anything be more shameful? For those who receive false fame, must needs blush at their own praise." Therefore man's happiness does not consist in fame or glory.

I answer that, Man's happiness cannot consist in human fame or glory. For glory consists "in being well known and praised," as Ambrose† says. Now the thing known is related to human knowledge otherwise than to God's knowledge: for human knowledge is caused by the things known, whereas God's knowledge is the cause of the things known. Wherefore the perfection of human good, which is called happiness, cannot be

caused by human knowledge: but rather human knowledge of another's happiness proceeds from, and, in a fashion, is caused by, human happiness itself, inchoate or perfect. Consequently man's happiness cannot consist in fame or glory. On the other hand, man's good depends on God's knowledge as its cause. And therefore man's beatitude depends, as on its cause, on the glory which man has with God; according to Ps. 90:15,16: "I will deliver him, and I will glorify him; I will fill him with length of days, and I will show him my salvation."

Furthermore, we must observe that human knowledge often fails, especially in contingent singulars, such as are human acts. For this reason human glory is frequently deceptive. But since God cannot be deceived, His glory is always true; hence it is written (2 Cor. 10:18): "He... is approved... whom God commendeth."

Reply to Objection 1. The Apostle speaks, then, not of the glory which is with men, but of the glory which is from God, with His Angels. Hence it is written (Mk. 8:38): "The Son of Man shall confess him in the glory of His Father, before His angels"‡.

Reply to Objection 2. A man's good which, through fame or glory, is in the knowledge of many, if this knowledge be true, must needs be derived from good existing in the man himself: and hence it presupposes perfect or inchoate happiness. But if the knowledge be false, it does not harmonize with the thing: and thus good does not exist in him who is looked upon as famous. Hence it follows that fame can nowise make man happy.

Reply to Objection 3. Fame has no stability; in fact, it is easily ruined by false report. And if sometimes it endures, this is by accident. But happiness endures of itself, and for ever.

* Augustine, Contra Maxim. Arian. ii. 13 † Augustine, Contra Maxim. Arian. ii. 13 ‡ St. Thomas joins Mk. 8:38 with Lk. 12:8 owing to a possible variant in his text, or to the fact that he was quoting from memory

Objection 1. It would seem that happiness consists in power. For all things desire to become like to God, as to their last end and first beginning. But men who are in power, seem, on account of the similarity of power, to be most like to God: hence also in Scripture they are called "gods" (Ex. 22:28), "Thou shalt not speak ill of the gods." Therefore happiness consists in power.

Objection 2. Further, happiness is the perfect good. But the highest perfection for man is to be able to rule others; which belongs to those who are in power. Therefore happiness consists in power.

Objection 3. Further, since happiness is supremely desirable, it is contrary to that which is before all to be shunned. But, more than aught else, men shun servitude, which is contrary to power. Therefore happiness consists in power.

On the contrary, Happiness is the perfect good. But power is most imperfect. For as Boethius says (De Consol. iii), "the power of man cannot relieve the gnawings of care, nor can it avoid the thorny path of anxiety": and further on: "Think you a man is powerful who is surrounded by attendants, whom he inspires with fear indeed, but whom he fears still more?"

I answer that, It is impossible for happiness to consist in power; and this for two reasons. First because power has the nature of principle, as is stated in *Metaph.* v, 12, whereas happiness has the nature of last end. Secondly, because power has relation to good and evil: whereas happiness is man's proper and perfect good. Wherefore some happiness might consist in the good use of power, which is by virtue, rather than in power itself.

Now four general reasons may be given to prove that happiness consists in none of the foregoing ex-

ternal goods. First, because, since happiness is man's supreme good, it is incompatible with any evil. Now all the foregoing can be found both in good and in evil men. Secondly, because, since it is the nature of happiness to "satisfy of itself," as stated in *Ethic.* i, 7, having gained happiness, man cannot lack any needful good. But after acquiring any one of the foregoing, man may still lack many goods that are necessary to him; for instance, wisdom, bodily health, and such like. Thirdly, because, since happiness is the perfect good, no evil can accrue to anyone therefrom. This cannot be said of the foregoing: for it is written (*Eccles.* 5:12) that "riches" are sometimes "kept to the hurt of the owner"; and the same may be said of the other three. Fourthly, because man is ordained to happiness through principles that are in him; since he is ordained thereto naturally. Now the four goods mentioned above are due rather to external causes, and in most cases to fortune; for which reason they are called goods of fortune. Therefore it is evident that happiness nowise consists in the foregoing.

Reply to Objection 1. God's power is His goodness: hence He cannot use His power otherwise than well. But it is not so with men. Consequently it is not enough for man's happiness, that he become like God in power, unless he become like Him in goodness also.

Reply to Objection 2. Just as it is a very good thing for a man to make good use of power in ruling many, so is it a very bad thing if he makes a bad use of it. And so it is that power is towards good and evil.

Reply to Objection 3. Servitude is a hindrance to the good use of power: therefore is it that men naturally shun it; not because man's supreme good consists in power.

Objection 1. It would seem that man's happiness consists in bodily goods. For it is written (Ecclus. 30:16): "There is no riches above the riches of the health of the body." But happiness consists in that which is best. Therefore it consists in the health of the body.

Objection 2. Further, Dionysius says (Div. Nom. v), that "to be" is better than "to live," and "to live" is better than all that follows. But for man's being and living, the health of the body is necessary. Since, therefore, happiness is man's supreme good, it seems that health of the body belongs more than anything else to happiness.

Objection 3. Further, the more universal a thing is, the higher the principle from which it depends; because the higher a cause is, the greater the scope of its power. Now just as the causality of the efficient cause consists in its flowing into something, so the causality of the end consists in its drawing the appetite. Therefore, just as the First Cause is that which flows into all things, so the last end is that which attracts the desire of all. But being itself is that which is most desired by all. Therefore man's happiness consists most of all in things pertaining to his being, such as the health of the body.

On the contrary, Man surpasses all other animals in regard to happiness. But in bodily goods he is surpassed by many animals; for instance, by the elephant in longevity, by the lion in strength, by the stag in fleetness. Therefore man's happiness does not consist in goods of the body.

I answer that, It is impossible for man's happiness to consist in the goods of the body; and this for two reasons. First, because, if a thing be ordained to another as to its end, its last end cannot consist in the preservation of its being. Hence a captain does not intend as a last end, the preservation of the ship entrusted to him, since a ship is ordained to something else as its end, viz. to navigation. Now just as the ship is entrusted to the captain that he may steer its course, so man is given over to his will and reason; according to Ecclus. 15:14: "God made man from the beginning and left him in the hand of his own counsel." Now it is evident that man is or-

daind to something as his end: since man is not the supreme good. Therefore the last end of man's reason and will cannot be the preservation of man's being.

Secondly, because, granted that the end of man's will and reason be the preservation of man's being, it could not be said that the end of man is some good of the body. For man's being consists in soul and body; and though the being of the body depends on the soul, yet the being of the human soul depends not on the body, as shown above (Ia, q. 75, a. 2); and the very body is for the soul, as matter for its form, and the instruments for the man that puts them into motion, that by their means he may do his work. Wherefore all goods of the body are ordained to the goods of the soul, as to their end. Consequently happiness, which is man's last end, cannot consist in goods of the body.

Reply to Objection 1. Just as the body is ordained to the soul, as its end, so are external goods ordained to the body itself. And therefore it is with reason that the good of the body is preferred to external goods, which are signified by "riches," just as the good of the soul is preferred to all bodily goods.

Reply to Objection 2. Being taken simply, as including all perfection of being, surpasses life and all that follows it; for thus being itself includes all these. And in this sense Dionysius speaks. But if we consider being itself as participated in this or that thing, which does not possess the whole perfection of being, but has imperfect being, such as the being of any creature; then it is evident that being itself together with an additional perfection is more excellent. Hence in the same passage Dionysius says that things that live are better than things that exist, and intelligent better than living things.

Reply to Objection 3. Since the end corresponds to the beginning; this argument proves that the last end is the first beginning of being, in Whom every perfection of being is: Whose likeness, according to their proportion, some desire as to being only, some as to living being, some as to being which is living, intelligent and happy. And this belongs to few.

Objection 1. It would seem that man's happiness consists in pleasure. For since happiness is the last end, it is not desired for something else, but other things for it. But this answers to pleasure more than to anything else: "for it is absurd to ask anyone what is his motive in wishing to be pleased" (Ethic. x, 2). Therefore happiness consists principally in pleasure and delight.

Objection 2. Further, "the first cause goes more deeply into the effect than the second cause" (De Causis i). Now the causality of the end consists in its attracting the appetite. Therefore, seemingly that which moves most the appetite, answers to the notion of the last end. Now this is pleasure: and a sign of this is that delight so far absorbs man's will and reason, that it causes him to despise other goods. Therefore it seems that man's last end, which is happiness, consists principally in pleasure.

Objection 3. Further, since desire is for good, it seems that what all desire is best. But all desire delight; both wise and foolish, and even irrational creatures. Therefore delight is the best of all. Therefore happiness, which is the supreme good, consists in pleasure.

On the contrary, Boethius says (De Consol. iii): "Any one that chooses to look back on his past excesses, will perceive that pleasures had a sad ending: and if they can render a man happy, there is no reason why we should not say that the very beasts are happy too."

I answer that, Because bodily delights are more generally known, "the name of pleasure has been appropriated to them" (Ethic. vii, 13), although other delights excel them: and yet happiness does not consist in them. Because in every thing, that which pertains to its essence is distinct from its proper accident: thus in man it is one thing that he is a mortal rational animal, and another that he is a risible animal. We must therefore consider that every delight is a proper accident resulting from happiness, or from some part of happiness; since the reason that a man is delighted is that he has some fitting good, either in reality, or in hope, or at least in memory. Now a fitting good, if indeed it be the perfect good, is precisely man's happiness: and if it is imperfect, it is a share of happiness, either proximate, or remote, or at least apparent. Therefore it is evident that neither is delight, which results from the perfect good, the very essence of happiness, but something resulting therefrom as its proper accident.

But bodily pleasure cannot result from the perfect good even in that way. For it results from a good appre-

hended by sense, which is a power of the soul, which power makes use of the body. Now good pertaining to the body, and apprehended by sense, cannot be man's perfect good. For since the rational soul excels the capacity of corporeal matter, that part of the soul which is independent of a corporeal organ, has a certain infinity in regard to the body and those parts of the soul which are tied down to the body: just as immaterial things are in a way infinite as compared to material things, since a form is, after a fashion, contracted and bounded by matter, so that a form which is independent of matter is, in a way, infinite. Therefore sense, which is a power of the body, knows the singular, which is determinate through matter: whereas the intellect, which is a power independent of matter, knows the universal, which is abstracted from matter, and contains an infinite number of singulars. Consequently it is evident that good which is fitting to the body, and which causes bodily delight through being apprehended by sense, is not man's perfect good, but is quite a trifle as compared with the good of the soul. Hence it is written (Wis. 7:9) that "all gold in comparison of her, is as a little sand." And therefore bodily pleasure is neither happiness itself, nor a proper accident of happiness.

Reply to Objection 1. It comes to the same whether we desire good, or desire delight, which is nothing else than the appetite's rest in good: thus it is owing to the same natural force that a weighty body is borne downwards and that it rests there. Consequently just as good is desired for itself, so delight is desired for itself and not for anything else, if the preposition "for" denote the final cause. But if it denote the formal or rather the motive cause, thus delight is desirable for something else, i.e. for the good, which is the object of that delight, and consequently is its principle, and gives it its form: for the reason that delight is desired is that it is rest in the thing desired.

Reply to Objection 2. The vehemence of desire for sensible delight arises from the fact that operations of the senses, through being the principles of our knowledge, are more perceptible. And so it is that sensible pleasures are desired by the majority.

Reply to Objection 3. All desire delight in the same way as they desire good: and yet they desire delight by reason of the good and not conversely, as stated above (ad 1). Consequently it does not follow that delight is the supreme and essential good, but that every delight results from some good, and that some delight results from that which is the essential and supreme good.

Objection 1. It would seem that some good of the soul constitutes man's happiness. For happiness is man's good. Now this is threefold: external goods, goods of the body, and goods of the soul. But happiness does not consist in external goods, nor in goods of the body, as shown above (Aa. 4,5). Therefore it consists in goods of the soul.

Objection 2. Further, we love that for which we desire good, more than the good that we desire for it: thus we love a friend for whom we desire money, more than we love money. But whatever good a man desires, he desires it for himself. Therefore he loves himself more than all other goods. Now happiness is what is loved above all: which is evident from the fact that for its sake all else is loved and desired. Therefore happiness consists in some good of man himself: not, however, in goods of the body; therefore, in goods of the soul.

Objection 3. Further, perfection is something belonging to that which is perfected. But happiness is a perfection of man. Therefore happiness is something belonging to man. But it is not something belonging to the body, as shown above (a. 5). Therefore it is something belonging to the soul; and thus it consists in goods of the soul.

On the contrary, As Augustine says (De Doctr. Christ. i, 22), "that which constitutes the life of happiness is to be loved for its own sake." But man is not to be loved for his own sake, but whatever is in man is to be loved for God's sake. Therefore happiness consists in no good of the soul.

I answer that, As stated above (q. 1, a. 8), the end is twofold: namely, the thing itself, which we desire to attain, and the use, namely, the attainment or possession of that thing. If, then, we speak of man's last end, it is impossible for man's last end to be the soul itself or something belonging to it. Because the soul, considered in itself, is as something existing in potentiality: for it becomes knowing actually, from being potentially knowing; and actually virtuous, from being potentially virtuous. Now since potentiality is for the sake of act

as for its fulfilment, that which in itself is in potentiality cannot be the last end. Therefore the soul itself cannot be its own last end.

In like manner neither can anything belonging to it, whether power, habit, or act. For that good which is the last end, is the perfect good fulfilling the desire. Now man's appetite, otherwise the will, is for the universal good. And any good inherent to the soul is a participated good, and consequently a portioned good. Therefore none of them can be man's last end.

But if we speak of man's last end, as to the attainment or possession thereof, or as to any use whatever of the thing itself desired as an end, thus does something of man, in respect of his soul, belong to his last end: since man attains happiness through his soul. Therefore the thing itself which is desired as an end, is that which constitutes happiness, and makes man happy; but the attainment of this thing is called happiness. Consequently we must say that happiness is something belonging to the soul; but that which constitutes happiness is something outside the soul.

Reply to Objection 1. Inasmuch as this division includes all goods that man can desire, thus the good of the soul is not only power, habit, or act, but also the object of these, which is something outside. And in this way nothing hinders us from saying that what constitutes happiness is a good of the soul.

Reply to Objection 2. As far as the proposed objection is concerned, happiness is loved above all, as the good desired; whereas a friend is loved as that for which good is desired; and thus, too, man loves himself. Consequently it is not the same kind of love in both cases. As to whether man loves anything more than himself with the love of friendship there will be occasion to inquire when we treat of Charity.

Reply to Objection 3. Happiness, itself, since it is a perfection of the soul, is an inherent good of the soul; but that which constitutes happiness, viz. which makes man happy, is something outside his soul, as stated above.

Objection 1. It would seem that some created good constitutes man's happiness. For Dionysius says (Div. Nom. vii) that Divine wisdom "unites the ends of first things to the beginnings of second things," from which we may gather that the summit of a lower nature touches the base of the higher nature. But man's highest good is happiness. Since then the angel is above man in the order of nature, as stated in Ia, q. 111, a. 1, it seems that man's happiness consists in man somehow reaching the angel.

Objection 2. Further, the last end of each thing is that which, in relation to it, is perfect: hence the part is for the whole, as for its end. But the universe of creatures which is called the macrocosm, is compared to man who is called the microcosm (Phys. viii, 2), as perfect to imperfect. Therefore man's happiness consists in the whole universe of creatures.

Objection 3. Further, man is made happy by that which lulls his natural desire. But man's natural desire does not reach out to a good surpassing his capacity. Since then man's capacity does not include that good which surpasses the limits of all creation, it seems that man can be made happy by some created good. Consequently some created good constitutes man's happiness.

On the contrary, Augustine says (De Civ. Dei xix, 26): "As the soul is the life of the body, so God is man's life of happiness: of Whom it is written: 'Happy is that people whose God is the Lord' (Ps. 143:15)."

I answer that, It is impossible for any created good to constitute man's happiness. For happiness is the perfect good, which lulls the appetite altogether; else it

would not be the last end, if something yet remained to be desired. Now the object of the will, i.e. of man's appetite, is the universal good; just as the object of the intellect is the universal true. Hence it is evident that naught can lull man's will, save the universal good. This is to be found, not in any creature, but in God alone; because every creature has goodness by participation. Wherefore God alone can satisfy the will of man, according to the words of Ps. 102:5: "Who satisfieth thy desire with good things." Therefore God alone constitutes man's happiness.

Reply to Objection 1. The summit of man does indeed touch the base of the angelic nature, by a kind of likeness; but man does not rest there as in his last end, but reaches out to the universal fount itself of good, which is the common object of happiness of all the blessed, as being the infinite and perfect good.

Reply to Objection 2. If a whole be not the last end, but ordained to a further end, then the last end of a part thereof is not the whole itself, but something else. Now the universe of creatures, to which man is compared as part to whole, is not the last end, but is ordained to God, as to its last end. Therefore the last end of man is not the good of the universe, but God himself.

Reply to Objection 3. Created good is not less than that good of which man is capable, as of something intrinsic and inherent to him: but it is less than the good of which he is capable, as of an object, and which is infinite. And the participated good which is in an angel, and in the whole universe, is a finite and restricted good.

FIRST PART OF THE SECOND PART, QUESTION 3

What Is Happiness (In Eight Articles)

We have now to consider (1) what happiness is, and (2) what things are required for it. Concerning the first there are eight points of inquiry:

- (1) Whether happiness is something uncreated?
- (2) If it be something created, whether it is an operation?
- (3) Whether it is an operation of the sensitive, or only of the intellectual part?
- (4) If it be an operation of the intellectual part, whether it is an operation of the intellect, or of the will?
- (5) If it be an operation of the intellect, whether it is an operation of the speculative or of the practical intellect?
- (6) If it be an operation of the speculative intellect, whether it consists in the consideration of speculative sciences?
- (7) Whether it consists in the consideration of separate substances viz. angels?
- (8) Whether it consists in the sole contemplation of God seen in His Essence?

Whether happiness is something uncreated?

Ia IIae q. 3 a. 1

Objection 1. It would seem that happiness is something uncreated. For Boethius says (De Consol. iii): “We must needs confess that God is happiness itself.”

Objection 2. Further, happiness is the supreme good. But it belongs to God to be the supreme good. Since, then, there are not several supreme goods, it seems that happiness is the same as God.

Objection 3. Further, happiness is the last end, to which man’s will tends naturally. But man’s will should tend to nothing else as an end, but to God, Who alone is to be enjoyed, as Augustine says (De Doctr. Christ. i, 5,22). Therefore happiness is the same as God.

On the contrary, Nothing made is uncreated. But man’s happiness is something made; because according to Augustine (De Doctr. Christ. i, 3): “Those things are to be enjoyed which make us happy.” Therefore happiness is not something uncreated.

I answer that, As stated above (q. 1, a. 8; q. 2, a. 7), our end is twofold. First, there is the thing itself which we desire to attain: thus for the miser, the end is money. Secondly there is the attainment or possession, the use or enjoyment of the thing desired; thus we may say that the end of the miser is the possession of money; and the end of the intemperate man is to enjoy something

pleasurable. In the first sense, then, man’s last end is the uncreated good, namely, God, Who alone by His infinite goodness can perfectly satisfy man’s will. But in the second way, man’s last end is something created, existing in him, and this is nothing else than the attainment or enjoyment of the last end. Now the last end is called happiness. If, therefore, we consider man’s happiness in its cause or object, then it is something uncreated; but if we consider it as to the very essence of happiness, then it is something created.

Reply to Objection 1. God is happiness by His Essence: for He is happy not by acquisition or participation of something else, but by His Essence. On the other hand, men are happy, as Boethius says (De Consol. iii), by participation; just as they are called “gods,” by participation. And this participation of happiness, in respect of which man is said to be happy, is something created.

Reply to Objection 2. Happiness is called man’s supreme good, because it is the attainment or enjoyment of the supreme good.

Reply to Objection 3. Happiness is said to be the last end, in the same way as the attainment of the end is called the end.

Whether happiness is an operation?

Ia IIae q. 3 a. 2

Objection 1. It would seem that happiness is not an operation. For the Apostle says (Rom. 6:22): “You have your fruit unto sanctification, and the end, life everlasting.” But life is not an operation, but the very being of living things. Therefore the last end, which is happiness, is not an operation.

Objection 2. Further, Boethius says (De Consol. iii) that happiness is “a state made perfect by the ag-

gregate of all good things.” But state does not indicate operation. Therefore happiness is not an operation.

Objection 3. Further, happiness signifies something existing in the happy one: since it is man’s final perfection. But the meaning of operation does not imply anything existing in the operator, but rather something proceeding therefrom. Therefore happiness is not an operation.

Objection 4. Further, happiness remains in the happy one. Now operation does not remain, but passes. Therefore happiness is not an operation.

Objection 5. Further, to one man there is one happiness. But operations are many. Therefore happiness is not an operation.

Objection 6. Further, happiness is in the happy one uninterruptedly. But human operation is often interrupted; for instance, by sleep, or some other occupation, or by cessation. Therefore happiness is not an operation.

On the contrary, The Philosopher says (Ethic. i, 13) that “happiness is an operation according to perfect virtue.”

I answer that, In so far as man’s happiness is something created, existing in him, we must needs say that it is an operation. For happiness is man’s supreme perfection. Now each thing is perfect in so far as it is actual; since potentiality without act is imperfect. Consequently happiness must consist in man’s last act. But it is evident that operation is the last act of the operator, wherefore the Philosopher calls it “second act” (De Anima ii, 1): because that which has a form can be potentially operating, just as he who knows is potentially considering. And hence it is that in other things, too, each one is said to be “for its operation” (De Coel ii, 3). Therefore man’s happiness must of necessity consist in an operation.

Reply to Objection 1. Life is taken in two senses. First for the very being of the living. And thus happiness is not life: since it has been shown (q. 2, a. 5) that the being of a man, no matter in what it may consist, is not that man’s happiness; for of God alone is it true that His Being is His Happiness. Secondly, life means the operation of the living, by which operation the principle of life is made actual: thus we speak of active and contemplative life, or of a life of pleasure. And in this sense eternal life is said to be the last end, as is clear from Jn. 17:3: “This is eternal life, that they may know Thee, the only true God.”

Reply to Objection 2. Boethius, in defining happiness, considered happiness in general: for considered thus it is the perfect common good; and he signified this by saying that happiness is “a state made perfect by the aggregate of all good things,” thus implying that the state of a happy man consists in possessing the perfect good. But Aristotle expressed the very essence of happiness, showing by what man is established in this state, and that it is by some kind of operation. And so it is that he proves happiness to be “the perfect good” (Ethic. i, 7).

Reply to Objection 3. As stated in Metaph. ix, 7 action is twofold. One proceeds from the agent into outward matter, such as “to burn” and “to cut.” And such an operation cannot be happiness: for such an operation is an action and a perfection, not of the agent, but rather of the patient, as is stated in the same passage. The other is an action that remains in the agent, such as to feel, to understand, and to will: and such an action is a perfection and an act of the agent. And such an operation can be happiness.

Reply to Objection 4. Since happiness signifies some final perfection; according as various things capable of happiness can attain to various degrees of perfection, so must there be various meanings applied to happiness. For in God there is happiness essentially; since His very Being is His operation, whereby He enjoys no other than Himself. In the happy angels, the final perfection is in respect of some operation, by which they are united to the Uncreated Good: and this operation of theirs is one only and everlasting. But in men, according to their present state of life, the final perfection is in respect of an operation whereby man is united to God: but this operation neither can be continual, nor, consequently, is it one only, because operation is multiplied by being discontinued. And for this reason in the present state of life, perfect happiness cannot be attained by man. Wherefore the Philosopher, in placing man’s happiness in this life (Ethic. i, 10), says that it is imperfect, and after a long discussion, concludes: “We call men happy, but only as men.” But God has promised us perfect happiness, when we shall be “as the angels. . . in heaven” (Mat. 22:30).

Consequently in regard to this perfect happiness, the objection fails: because in that state of happiness, man’s mind will be united to God by one, continual, everlasting operation. But in the present life, in as far as we fall short of the unity and continuity of that operation so do we fall short of perfect happiness. Nevertheless it is a participation of happiness: and so much the greater, as the operation can be more continuous and more one. Consequently the active life, which is busy with many things, has less of happiness than the contemplative life, which is busied with one thing, i.e. the contemplation of truth. And if at any time man is not actually engaged in this operation, yet since he can always easily turn to it, and since he ordains the very cessation, by sleeping or occupying himself otherwise, to the aforesaid occupation, the latter seems, as it were, continuous. From these remarks the replies to Objections 5 and 6 are evident.

Objection 1. It would seem that happiness consists in an operation of the senses also. For there is no more excellent operation in man than that of the senses, except the intellectual operation. But in us the intellectual operation depends on the sensitive: since “we cannot understand without a phantasm” (De Anima iii, 7). Therefore happiness consists in an operation of the senses also.

Objection 2. Further, Boethius says (De Consol. iii) that happiness is “a state made perfect by the aggregate of all good things.” But some goods are sensible, which we attain by the operation of the senses. Therefore it seems that the operation of the senses is needed for happiness.

Objection 3. Further, happiness is the perfect good, as we find proved in Ethic. i, 7: which would not be true, were not man perfected thereby in all his parts. But some parts of the soul are perfected by sensitive operations. Therefore sensitive operation is required for happiness.

On the contrary, Irrational animals have the sensitive operation in common with us: but they have not happiness in common with us. Therefore happiness does not consist in a sensitive operation.

I answer that, A thing may belong to happiness in three ways: (1) essentially, (2) antecedently, (3) consequently. Now the operation of sense cannot belong to happiness essentially. For man’s happiness consists essentially in his being united to the Uncreated Good, Which is his last end, as shown above (a. 1): to Which man cannot be united by an operation of his senses. Again, in like manner, because, as shown above (q. 2, a. 5), man’s happiness does not consist in goods of the

body, which goods alone, however, we attain through the operation of the senses.

Nevertheless the operations of the senses can belong to happiness, both antecedently and consequently: antecedently, in respect of imperfect happiness, such as can be had in this life, since the operation of the intellect demands a previous operation of the sense; consequently, in that perfect happiness which we await in heaven; because at the resurrection, “from the very happiness of the soul,” as Augustine says (Ep. ad Dioscor.) “the body and the bodily senses will receive a certain overflow, so as to be perfected in their operations”; a point which will be explained further on when we treat of the resurrection (IIa IIae, Qq. 82 -85). But then the operation whereby man’s mind is united to God will not depend on the senses.

Reply to Objection 1. This objection proves that the operation of the senses is required antecedently for imperfect happiness, such as can be had in this life.

Reply to Objection 2. Perfect happiness, such as the angels have, includes the aggregate of all good things, by being united to the universal source of all good; not that it requires each individual good. But in this imperfect happiness, we need the aggregate of those goods that suffice for the most perfect operation of this life.

Reply to Objection 3. In perfect happiness the entire man is perfected, in the lower part of his nature, by an overflow from the higher. But in the imperfect happiness of this life, it is otherwise; we advance from the perfection of the lower part to the perfection of the higher part.

Objection 1. It would seem that happiness consists in an act of the will. For Augustine says (De Civ. Dei xix, 10,11), that man’s happiness consists in peace; wherefore it is written (Ps. 147:3): “Who hath placed peace in thy end [Douay: ‘borders’]”. But peace pertains to the will. Therefore man’s happiness is in the will.

Objection 2. Further, happiness is the supreme good. But good is the object of the will. Therefore happiness consists in an operation of the will.

Objection 3. Further, the last end corresponds to the first mover: thus the last end of the whole army is victory, which is the end of the general, who moves all the men. But the first mover in regard to operations is the will: because it moves the other powers, as we shall state further on (q. 9, Aa. 1,3). Therefore happiness regards the will.

Objection 4. Further, if happiness be an operation, it must needs be man’s most excellent operation. But the love of God, which is an act of the will, is a more excellent operation than knowledge, which is an operation of the intellect, as the Apostle declares (1 Cor. 13). Therefore it seems that happiness consists in an act of the will.

Objection 5. Further, Augustine says (De Trin. xiii, 5) that “happy is he who has whatever he desires, and desires nothing amiss.” And a little further on (6) he adds: “He is most happy who desires well, whatever he desires: for good things make a man happy, and such a man already possesses some good—i.e. a good will.” Therefore happiness consists in an act of the will.

On the contrary, Our Lord said (Jn. 17:3): “This is eternal life: that they may know Thee, the only true God.” Now eternal life is the last end, as stated above

(a. 2, ad 1). Therefore man's happiness consists in the knowledge of God, which is an act of the intellect.

I answer that, As stated above (q. 2, a. 6) two things are needed for happiness: one, which is the essence of happiness: the other, that is, as it were, its proper accident, i.e. the delight connected with it. I say, then, that as to the very essence of happiness, it is impossible for it to consist in an act of the will. For it is evident from what has been said (Aa. 1,2; q. 2, a. 7) that happiness is the attainment of the last end. But the attainment of the end does not consist in the very act of the will. For the will is directed to the end, both absent, when it desires it; and present, when it is delighted by resting therein. Now it is evident that the desire itself of the end is not the attainment of the end, but is a movement towards the end: while delight comes to the will from the end being present; and not conversely, is a thing made present, by the fact that the will delights in it. Therefore, that the end be present to him who desires it, must be due to something else than an act of the will.

This is evidently the case in regard to sensible ends. For if the acquisition of money were through an act of the will, the covetous man would have it from the very moment that he wished for it. But at the moment it is far from him; and he attains it, by grasping it in his hand, or in some like manner; and then he delights in the money got. And so it is with an intelligible end. For at first we desire to attain an intelligible end; we attain it, through its being made present to us by an act of the intellect; and then the delighted will rests in the end when attained.

So, therefore, the essence of happiness consists in an act of the intellect: but the delight that results from happiness pertains to the will. In this sense Augustine says (Confess. x, 23) that happiness is "joy in truth,"

because, to wit, joy itself is the consummation of happiness.

Reply to Objection 1. Peace pertains to man's last end, not as though it were the very essence of happiness; but because it is antecedent and consequent thereto: antecedent, in so far as all those things are removed which disturb and hinder man in attaining the last end: consequent inasmuch as when man has attained his last end, he remains at peace, his desire being at rest.

Reply to Objection 2. The will's first object is not its act: just as neither is the first object of the sight, vision, but a visible thing. Wherefore, from the very fact that happiness belongs to the will, as the will's first object, it follows that it does not belong to it as its act.

Reply to Objection 3. The intellect apprehends the end before the will does: yet motion towards the end begins in the will. And therefore to the will belongs that which last of all follows the attainment of the end, viz. delight or enjoyment.

Reply to Objection 4. Love ranks above knowledge in moving, but knowledge precedes love in attaining: for "naught is loved save what is known," as Augustine says (De Trin. x, 1). Consequently we first attain an intelligible end by an act of the intellect; just as we first attain a sensible end by an act of sense.

Reply to Objection 5. He who has whatever he desires, is happy, because he has what he desires: and this indeed is by something other than the act of his will. But to desire nothing amiss is needed for happiness, as a necessary disposition thereto. And a good will is reckoned among the good things which make a man happy, forasmuch as it is an inclination of the will: just as a movement is reduced to the genus of its terminus, for instance, "alteration" to the genus "quality."

Whether happiness is an operation of the speculative, or of the practical intellect?

Ia IIae q. 3 a. 5

Objection 1. It would seem that happiness is an operation of the practical intellect. For the end of every creature consists in becoming like God. But man is like God, by his practical intellect, which is the cause of things understood, rather than by his speculative intellect, which derives its knowledge from things. Therefore man's happiness consists in an operation of the practical intellect rather than of the speculative.

Objection 2. Further, happiness is man's perfect good. But the practical intellect is ordained to the good rather than the speculative intellect, which is ordained to the true. Hence we are said to be good, in reference to the perfection of the practical intellect, but not in reference to the perfection of the speculative intellect, according to which we are said to be knowing or understanding. Therefore man's happiness consists in an act of the practical intellect rather than of the speculative.

Objection 3. Further, happiness is a good of man himself. But the speculative intellect is more concerned

with things outside man; whereas the practical intellect is concerned with things belonging to man himself, viz. his operations and passions. Therefore man's happiness consists in an operation of the practical intellect rather than of the speculative.

On the contrary, Augustine says (De Trin. i, 8) that "contemplation is promised us, as being the goal of all our actions, and the everlasting perfection of our joys."

I answer that, Happiness consists in an operation of the speculative rather than of the practical intellect. This is evident for three reasons. First because if man's happiness is an operation, it must needs be man's highest operation. Now man's highest operation is that of his highest power in respect of its highest object: and his highest power is the intellect, whose highest object is the Divine Good, which is the object, not of the practical but of the speculative intellect. Consequently happiness consists principally in such an operation, viz. in the contemplation of Divine things. And since that "seems

to be each man's self, which is best in him," according to Ethic. ix, 8, and x, 7, therefore such an operation is most proper to man and most delightful to him.

Secondly, it is evident from the fact that contemplation is sought principally for its own sake. But the act of the practical intellect is not sought for its own sake but for the sake of action: and these very actions are ordained to some end. Consequently it is evident that the last end cannot consist in the active life, which pertains to the practical intellect.

Thirdly, it is again evident, from the fact that in the contemplative life man has something in common with things above him, viz. with God and the angels, to whom he is made like by happiness. But in things pertaining to the active life, other animals also have something in common with man, although imperfectly.

Therefore the last and perfect happiness, which we await in the life to come, consists entirely in contemplation. But imperfect happiness, such as can be had here, consists first and principally, in an operation of the practical intellect directing human actions and passions, as stated in Ethic. x, 7,8.

Reply to Objection 1. The asserted likeness of the

practical intellect to God is one of proportion; that is to say, by reason of its standing in relation to what it knows, as God does to what He knows. But the likeness of the speculative intellect to God is one of union and "information"; which is a much greater likeness. And yet it may be answered that, in regard to the principal thing known, which is His Essence, God has not practical but merely speculative knowledge.

Reply to Objection 2. The practical intellect is ordained to good which is outside of it: but the speculative intellect has good within it, viz. the contemplation of truth. And if this good be perfect, the whole man is perfected and made good thereby: such a good the practical intellect has not; but it directs man thereto.

Reply to Objection 3. This argument would hold, if man himself were his own last end; for then the consideration and direction of his actions and passions would be his happiness. But since man's last end is something outside of him, to wit, God, to Whom we reach out by an operation of the speculative intellect; therefore, man's happiness consists in an operation of the speculative intellect rather than of the practical intellect.

Whether happiness consists in the consideration of speculative sciences?

Ia IIae q. 3 a. 6

Objection 1. It would seem that man's happiness consists in the consideration of speculative sciences. For the Philosopher says (Ethic. i, 13) that "happiness is an operation according to perfect virtue." And in distinguishing the virtues, he gives no more than three speculative virtues—"knowledge," "wisdom" and "understanding," which all belong to the consideration of speculative sciences. Therefore man's final happiness consists in the consideration of speculative sciences.

Objection 2. Further, that which all desire for its own sake, seems to be man's final happiness. Now such is the consideration of speculative sciences; because, as stated in Metaph. i, 1, "all men naturally desire to know"; and, a little farther on (2), it is stated that speculative sciences are sought for their own sakes. Therefore happiness consists in the consideration of speculative sciences.

Objection 3. Further, happiness is man's final perfection. Now everything is perfected, according as it is reduced from potentiality to act. But the human intellect is reduced to act by the consideration of speculative sciences. Therefore it seems that in the consideration of these sciences, man's final happiness consists.

On the contrary, It is written (Jer. 9:23): "Let not the wise man glory in his wisdom": and this is said in reference to speculative sciences. Therefore man's final happiness does not consist in the consideration of these.

I answer that, As stated above (a. 2, ad 4), man's happiness is twofold, one perfect, the other imperfect. And by perfect happiness we are to understand that which attains to the true notion of happiness; and by

imperfect happiness that which does not attain thereto, but partakes of some particular likeness of happiness. Thus perfect prudence is in man, with whom is the idea of things to be done; while imperfect prudence is in certain irrational animals, who are possessed of certain particular instincts in respect of works similar to works of prudence.

Accordingly perfect happiness cannot consist essentially in the consideration of speculative sciences. To prove this, we must observe that the consideration of a speculative science does not extend beyond the scope of the principles of that science: since the entire science is virtually contained in its principles. Now the first principles of speculative sciences are received through the senses, as the Philosopher clearly states at the beginning of the Metaphysics (i, 1), and at the end of the Posterior Analytics (ii, 15). Wherefore the entire consideration of speculative sciences cannot extend farther than knowledge of sensibles can lead. Now man's final happiness, which is his final perfection cannot consist in the knowledge of sensibles. For a thing is not perfected by something lower, except in so far as the lower partakes of something higher. Now it is evident that the form of a stone or of any sensible, is lower than man. Consequently the intellect is not perfected by the form of a stone, as such, but inasmuch as it partakes of a certain likeness to that which is above the human intellect, viz. the intelligible light, or something of the kind. Now whatever is by something else is reduced to that which is of itself. Therefore man's final perfection must needs be through knowledge of something above the human

intellect. But it has been shown (Ia, q. 88, a. 2), that man cannot acquire through sensibles, the knowledge of separate substances, which are above the human intellect. Consequently it follows that man's happiness cannot consist in the consideration of speculative sciences. However, just as in sensible forms there is a participation of the higher substances, so the consideration of speculative sciences is a certain participation of true and perfect happiness.

Reply to Objection 1. In his book on Ethics the Philosopher treats of imperfect happiness, such as can be had in this life, as stated above (a. 2, ad 4).

Reply to Objection 2. Not only is perfect happiness naturally desired, but also any likeness or participation thereof.

Reply to Objection 3. Our intellect is reduced to act, in a fashion, by the consideration of speculative sciences, but not to its final and perfect act.

Whether happiness consists in the knowledge of separate substances, namely, angels?

Ia IIae q. 3 a. 7

Objection 1. It would seem that man's happiness consists in the knowledge of separate substances, namely, angels. For Gregory says in a homily (xxvi in Evang.): "It avails nothing to take part in the feasts of men, if we fail to take part in the feasts of angels"; by which he means final happiness. But we can take part in the feasts of the angels by contemplating them. Therefore it seems that man's final happiness consists in contemplating the angels.

Objection 2. Further, the final perfection of each thing is for it to be united to its principle: wherefore a circle is said to be a perfect figure, because its beginning and end coincide. But the beginning of human knowledge is from the angels, by whom men are enlightened, as Dionysius says (Coel. Hier. iv). Therefore the perfection of the human intellect consists in contemplating the angels.

Objection 3. Further, each nature is perfect, when united to a higher nature; just as the final perfection of a body is to be united to the spiritual nature. But above the human intellect, in the natural order, are the angels. Therefore the final perfection of the human intellect is to be united to the angels by contemplation.

On the contrary, It is written (Jer. 9:24): "Let him that glorieth, glory in this, that he understandeth and knoweth Me." Therefore man's final glory or happiness consists only in the knowledge of God.

I answer that, As stated above (a. 6), man's perfect happiness consists not in that which perfects the intellect by some participation, but in that which is so by its essence. Now it is evident that whatever is the perfection of a power is so in so far as the proper formal object of that power belongs to it. Now the proper object of the intellect is the true. Therefore the contemplation of whatever has participated truth, does not per-

fect the intellect with its final perfection. Since, therefore, the order of things is the same in being and in truth (Metaph ii, 1); whatever are beings by participation, are true by participation. Now angels have being by participation: because in God alone is His Being His Essence, as shown in the Ia, q. 44, a. 1. It follows that contemplation of Him makes man perfectly happy. However, there is no reason why we should not admit a certain imperfect happiness in the contemplation of the angels; and higher indeed than in the consideration of speculative science.

Reply to Objection 1. We shall take part in the feasts of the angels, by contemplating not only the angels, but, together with them, also God Himself.

Reply to Objection 2. According to those that hold human souls to be created by the angels, it seems fitting enough, that man's happiness should consist in the contemplation of the angels, in the union, as it were, of man with his beginning. But this is erroneous, as stated in Ia, q. 90, a. 3. Wherefore the final perfection of the human intellect is by union with God, Who is the first principle both of the creation of the soul and of its enlightenment. Whereas the angel enlightens as a minister, as stated in the Ia, q. 111, a. 2, ad 2. Consequently, by his ministration he helps man to attain to happiness; but he is not the object of man's happiness.

Reply to Objection 3. The lower nature may reach the higher in two ways. First, according to a degree of the participating power: and thus man's final perfection will consist in his attaining to a contemplation such as that of the angels. Secondly, as the object is attained by the power: and thus the final perfection of each power is to attain that in which is found the fulness of its formal object.

Whether man's happiness consists in the vision of the divine essence?

Ia IIae q. 3 a. 8

Objection 1. It would seem that man's happiness does not consist in the vision of the Divine Essence. For Dionysius says (Myst. Theol. i) that by that which is highest in his intellect, man is united to God as to something altogether unknown. But that which is seen in its essence is not altogether unknown. Therefore the final perfection of the intellect, namely, happiness, does

not consist in God being seen in His Essence.

Objection 2. Further, the higher the perfection belongs to the higher nature. But to see His own Essence is the perfection proper to the Divine intellect. Therefore the final perfection of the human intellect does not reach to this, but consists in something less.

On the contrary, It is written (1 Jn. 3:2): "When

He shall appear, we shall be like to Him; and [Vulg.: 'because'] we shall see Him as He is."

I answer that, Final and perfect happiness can consist in nothing else than the vision of the Divine Essence. To make this clear, two points must be observed. First, that man is not perfectly happy, so long as something remains for him to desire and seek: secondly, that the perfection of any power is determined by the nature of its object. Now the object of the intellect is "what a thing is," i.e. the essence of a thing, according to *De Anima* iii, 6. Wherefore the intellect attains perfection, in so far as it knows the essence of a thing. If therefore an intellect knows the essence of some effect, whereby it is not possible to know the essence of the cause, i.e. to know of the cause "what it is"; that intellect cannot be said to reach that cause simply, although it may be able to gather from the effect the knowledge of that the cause is. Consequently, when man knows an effect, and knows that it has a cause, there naturally remains in the man the desire to know about the cause, "what it is." And this desire is one of wonder, and causes inquiry, as is stated in the beginning of the *Metaphysics* (i, 2). For instance, if a man, knowing the eclipse of the sun, consider that it must be due to some cause, and know not what that cause is, he wonders about it, and from wondering proceeds to inquire. Nor does this inquiry

cease until he arrive at a knowledge of the essence of the cause.

If therefore the human intellect, knowing the essence of some created effect, knows no more of God than "that He is"; the perfection of that intellect does not yet reach simply the First Cause, but there remains in it the natural desire to seek the cause. Wherefore it is not yet perfectly happy. Consequently, for perfect happiness the intellect needs to reach the very Essence of the First Cause. And thus it will have its perfection through union with God as with that object, in which alone man's happiness consists, as stated above (*Aa.* 1,7; *q.* 2, a. 8).

Reply to Objection 1. Dionysius speaks of the knowledge of wayfarers journeying towards happiness.

Reply to Objection 2. As stated above (*q.* 1, a. 8), the end has a twofold acceptation. First, as to the thing itself which is desired: and in this way, the same thing is the end of the higher and of the lower nature, and indeed of all things, as stated above (*q.* 1, a. 8). Secondly, as to the attainment of this thing; and thus the end of the higher nature is different from that of the lower, according to their respective habitudes to that thing. So then in the happiness of God, Who, in understanding his Essence, comprehends It, is higher than that of a man or angel who sees It indeed, but comprehends It not.

FIRST PART OF THE SECOND PART, QUESTION 30

Of Concupiscence (In Four Articles)

We have now to consider concupiscence: under which head there are four points of inquiry:

- (1) Whether concupiscence is in the sensitive appetite only?
- (2) Whether concupiscence is a specific passion?
- (3) Whether some concupiscences are natural, and some not natural?
- (4) Whether concupiscence is infinite?

Whether concupiscence is in the sensitive appetite only?

Ia IIae q. 30 a. 1

Objection 1. It would seem that concupiscence is not only in the sensitive appetite. For there is a concupiscence of wisdom, according to Wis. 6:21: "The concupiscence [Douay: 'desire'] of wisdom bringeth to the everlasting kingdom." But the sensitive appetite can have no tendency to wisdom. Therefore concupiscence is not only in the sensitive appetite.

Objection 2. Further, the desire for the commandments of God is not in the sensitive appetite: in fact the Apostle says (Rom. 7:18): "There dwelleth not in me, that is to say, in my flesh, that which is good." But desire for God's commandments is an act of concupiscence, according to Ps. 118:20: "My soul hath coveted [concupivit] to long for thy justifications." Therefore concupiscence is not only in the sensitive appetite.

Objection 3. Further, to each power, its proper good is a matter of concupiscence. Therefore concupiscence is in each power of the soul, and not only in the sensitive appetite.

On the contrary, Damascene says (De Fide Orth. ii, 12) that "the irrational part which is subject and amenable to reason, is divided into the faculties of concupiscence and anger. This is the irrational part of the soul, passive and appetitive." Therefore concupiscence is in the sensitive appetite.

I answer that, As the Philosopher says (Rhet. i, 11), "concupiscence is a craving for that which is pleasant." Now pleasure is twofold, as we shall state later on (q. 31, Aa. 3,4): one is in the intelligible good, which is the good of reason; the other is in good perceptible to the senses. The former pleasure seems to belong to soul alone: whereas the latter belongs to both soul and

body: because the sense is a power seated in a bodily organ: wherefore sensible good is the good of the whole composite. Now concupiscence seems to be the craving for this latter pleasure, since it belongs to the united soul and body, as is implied by the Latin word "concupiscentia." Therefore, properly speaking, concupiscence is in the sensitive appetite, and in the concupiscible faculty, which takes its name from it.

Reply to Objection 1. The craving for wisdom, or other spiritual goods, is sometimes called concupiscence; either by reason of a certain likeness; or on account of the craving in the higher part of the soul being so vehement that it overflows into the lower appetite, so that the latter also, in its own way, tends to the spiritual good, following the lead of the higher appetite, the result being that the body itself renders its service in spiritual matters, according to Ps. 83:3: "My heart and my flesh have rejoiced in the living God."

Reply to Objection 2. Properly speaking, desire may be not only in the lower, but also in the higher appetite. For it does not imply fellowship in craving, as concupiscence does; but simply movement towards the thing desired.

Reply to Objection 3. It belongs to each power of the soul to seek its proper good by the natural appetite, which does not arise from apprehension. But the craving for good, by the animal appetite, which arises from apprehension, belongs to the appetitive power alone. And to crave a thing under the aspect of something delightful to the senses, wherein concupiscence properly consists, belongs to the concupiscible power.

Whether concupiscence is a specific passion?

Ia IIae q. 30 a. 2

Objection 1. It would seem that concupiscence is not a specific passion of the concupiscible power. For passions are distinguished by their objects. But the object of the concupiscible power is something delightful to the senses; and this is also the object of concupiscence, as the Philosopher declares (Rhet. i, 11). Therefore concupiscence is not a specific passion of the concupiscible faculty.

Objection 2. Further, Augustine says (QQ. 83, qu. 33) that "covetousness is the love of transitory things": so that it is not distinct from love. But all specific passions are distinct from one another. Therefore concupiscence is not a specific passion in the concupiscible faculty.

Objection 3. Further, to each passion of the concupiscible faculty there is a specific contrary passion in

that faculty, as stated above (q. 23, a. 4). But no specific passion of the concupiscible faculty is contrary to concupiscence. For Damascene says (De Fide Orth. ii, 12) that “good when desired gives rise to concupiscence; when present, it gives joy: in like manner, the evil we apprehend makes us fear, the evil that is present makes us sad”: from which we gather that as sadness is contrary to joy, so is fear contrary to concupiscence. But fear is not in the concupiscible, but in the irascible part. Therefore concupiscence is not a specific passion of the concupiscible faculty.

On the contrary, Concupiscence is caused by love, and tends to pleasure, both of which are passions of the concupiscible faculty. Hence it is distinguished from the other concupiscible passions, as a specific passion.

I answer that, As stated above (a. 1; q. 23, a. 1), the good which gives pleasure to the senses is the common object of the concupiscible faculty. Hence the various concupiscible passions are distinguished according to the differences of that good. Now the diversity of this object can arise from the very nature of the object, or from a diversity in its active power. The diversity, derived from the nature of the active object, causes a material difference of passions: while the difference in regard to its active power causes a formal diversity of passions, in respect of which the passions differ specifically.

Now the nature of the motive power of the end or of the good, differs according as it is really present, or absent: because, according as it is present, it causes the faculty to find rest in it; whereas, according as it

is absent, it causes the faculty to be moved towards it. Wherefore the object of sensible pleasure causes love, inasmuch as, so to speak, it attunes and conforms the appetite to itself; it causes concupiscence, inasmuch as, when absent, it draws the faculty to itself; and it causes pleasure, inasmuch as, when present, it makes the faculty to find rest in itself. Accordingly, concupiscence is a passion differing “in species” from both love and pleasure. But concupiscences of this or that pleasurable object differ “in number.”

Reply to Objection 1. Pleasurable good is the object of concupiscence, not absolutely, but considered as absent: just as the sensible, considered as past, is the object of memory. For these particular conditions diversify the species of passions, and even of the powers of the sensitive part, which regards particular things.

Reply to Objection 2. In the passage quoted we have causal, not essential predication: for covetousness is not essentially love, but an effect of love. We may also say that Augustine is taking covetousness in a wide sense, for any movement of the appetite in respect of good to come: so that it includes both love and hope.

Reply to Objection 3. The passion which is directly contrary to concupiscence has no name, and stands in relation to evil, as concupiscence in regard to good. But since, like fear, it regards the absent evil; sometimes it goes by the name of fear, just as hope is sometimes called covetousness. For a small good or evil is reckoned as though it were nothing: and consequently every movement of the appetite in future good or evil is called hope or fear, which regard good and evil as arduous.

Whether some concupiscences are natural, and some not natural?

Ia IIae q. 30 a. 3

Objection 1. It would seem that concupiscences are not divided into those which are natural and those which are not. For concupiscence belongs to the animal appetite, as stated above (a. 1, ad 3). But the natural appetite is contrasted with the animal appetite. Therefore no concupiscence is natural.

Objection 2. Further, material differences makes no difference of species, but only numerical difference; a difference which is outside the purview of science. But if some concupiscences are natural, and some not, they differ only in respect of their objects; which amounts to a material difference, which is one of number only. Therefore concupiscences should not be divided into those that are natural and those that are not.

Objection 3. Further, reason is contrasted with nature, as stated in Phys. ii, 5. If therefore in man there is a concupiscence which is not natural, it must needs be rational. But this is impossible: because, since concupiscence is a passion, it belongs to the sensitive appetite, and not to the will, which is the rational appetite. Therefore there are no concupiscences which are not natural.

On the contrary, The Philosopher (Ethic. iii, 11 and Rhetor. i, 11) distinguishes natural concupiscences

from those that are not natural.

I answer that, As stated above (a. 1), concupiscence is the craving for pleasurable good. Now a thing is pleasurable in two ways. First, because it is suitable to the nature of the animal; for example, food, drink, and the like: and concupiscence of such pleasurable things is said to be natural. Secondly, a thing is pleasurable because it is apprehended as suitable to the animal: as when one apprehends something as good and suitable, and consequently takes pleasure in it: and concupiscence of such pleasurable things is said to be not natural, and is more wont to be called “cupidity.”

Accordingly concupiscences of the first kind, or natural concupiscences, are common to men and other animals: because to both is there something suitable and pleasurable according to nature: and in these all men agree; wherefore the Philosopher (Ethic. iii, 11) calls them “common” and “necessary.” But concupiscences of the second kind are proper to men, to whom it is proper to devise something as good and suitable, beyond that which nature requires. Hence the Philosopher says (Rhet. i, 11) that the former concupiscences are “irrational,” but the latter, “rational.” And because

different men reason differently, therefore the latter are also called (Ethic. iii, 11) “peculiar and acquired,” i.e. in addition to those that are natural.

Reply to Objection 1. The same thing that is the object of the natural appetite, may be the object of the animal appetite, once it is apprehended. And in this way there may be an animal concupiscence of food, drink, and the like, which are objects of the natural appetite.

Reply to Objection 2. The difference between those concupiscences that are natural and those that are not, is not merely a material difference; it is also, in a way, formal, in so far as it arises from a difference in the active object. Now the object of the appetite is the apprehended good. Hence diversity of the active object follows from diversity of apprehension: ac-

ording as a thing is apprehended as suitable, either by absolute apprehension, whence arise natural concupiscences, which the Philosopher calls “irrational” (Rhet. i, 11); or by apprehension together with deliberation, whence arise those concupiscences that are not natural, and which for this very reason the Philosopher calls “rational” (Rhet. i, 11).

Reply to Objection 3. Man has not only universal reason, pertaining to the intellectual faculty; but also particular reason pertaining to the sensitive faculty, as stated in the Ia, q. 78, a. 4; Ia, q. 81, a. 3: so that even rational concupiscence may pertain to the sensitive appetite. Moreover the sensitive appetite can be moved by the universal reason also, through the medium of the particular imagination.

Whether concupiscence is infinite?

Ia IIae q. 30 a. 4

Objection 1. It would seem that concupiscence is not infinite. For the object of concupiscence is good, which has the aspect of an end. But where there is infinity there is no end (Metaph. ii, 2). Therefore concupiscence cannot be infinite.

Objection 2. Further, concupiscence is of the fitting good, since it proceeds from love. But the infinite is without proportion, and therefore unfitting. Therefore concupiscence cannot be infinite.

Objection 3. Further, there is no passing through infinite things: and thus there is no reaching an ultimate term in them. But the subject of concupiscence is not delighted until he attain the ultimate term. Therefore, if concupiscence were infinite, no delight would ever ensue.

On the contrary, The Philosopher says (Polit. i, 3) that “since concupiscence is infinite, men desire an infinite number of things.”

I answer that, As stated above (a. 3), concupiscence is twofold; one is natural, the other is not natural. Natural concupiscence cannot be actually infinite: because it is of that which nature requires; and nature ever tends to something finite and fixed. Hence man never desires infinite meat, or infinite drink. But just as in nature there is potential successive infinity, so can this kind of concupiscence be infinite successively; so that, for instance, after getting food, a man may desire food yet again; and so of anything else that nature requires: because these bodily goods, when obtained, do not last for ever, but fail. Hence Our Lord said to the woman of Samaria (Jn. 4:13): “Whosoever drinketh of this water, shall thirst again.”

But non-natural concupiscence is altogether infinite. Because, as stated above (a. 3), it follows from the reason, and it belongs to the reason to proceed to infinity. Hence he that desires riches, may desire to be rich, not

up to a certain limit, but to be simply as rich as possible.

Another reason may be assigned, according to the Philosopher (Polit. i, 3), why a certain concupiscence is finite, and another infinite. Because concupiscence of the end is always infinite: since the end is desired for its own sake, e.g. health: and thus greater health is more desired, and so on to infinity; just as, if a white thing of itself dilates the sight, that which is more white dilates yet more. On the other hand, concupiscence of the means is not infinite, because the concupiscence of the means is in suitable proportion to the end. Consequently those who place their end in riches have an infinite concupiscence of riches; whereas those who desire riches, on account of the necessities of life, desire a finite measure of riches, sufficient for the necessities of life, as the Philosopher says (Polit. i, 3). The same applies to the concupiscence of any other things.

Reply to Objection 1. Every object of concupiscence is taken as something finite: either because it is finite in reality, as being once actually desired; or because it is finite as apprehended. For it cannot be apprehended as infinite, since the infinite is that “from which, however much we may take, there always remains something to be taken” (Phys. iii, 6).

Reply to Objection 2. The reason is possessed of infinite power, in a certain sense, in so far as it can consider a thing infinitely, as appears in the addition of numbers and lines. Consequently, the infinite, taken in a certain way, is proportionate to reason. In fact the universal which the reason apprehends, is infinite in a sense, inasmuch as it contains potentially an infinite number of singulars.

Reply to Objection 3. In order that a man be delighted, there is no need for him to realize all that he desires: for he delights in the realization of each object of his concupiscence.

Objection 1. It would seem that concupiscence is not only in the sensitive appetite. For there is a concupiscence of wisdom, according to Wis. 6:21: “The concupiscence [Douay: ‘desire’] of wisdom bringeth to the everlasting kingdom.” But the sensitive appetite can have no tendency to wisdom. Therefore concupiscence is not only in the sensitive appetite.

Objection 2. Further, the desire for the commandments of God is not in the sensitive appetite: in fact the Apostle says (Rom. 7:18): “There dwelleth not in me, that is to say, in my flesh, that which is good.” But desire for God’s commandments is an act of concupiscence, according to Ps. 118:20: “My soul hath coveted [concupivit] to long for thy justifications.” Therefore concupiscence is not only in the sensitive appetite.

Objection 3. Further, to each power, its proper good is a matter of concupiscence. Therefore concupiscence is in each power of the soul, and not only in the sensitive appetite.

On the contrary, Damascene says (De Fide Orth. ii, 12) that “the irrational part which is subject and amenable to reason, is divided into the faculties of concupiscence and anger. This is the irrational part of the soul, passive and appetitive.” Therefore concupiscence is in the sensitive appetite.

I answer that, As the Philosopher says (Rhet. i, 11), “concupiscence is a craving for that which is pleasant.” Now pleasure is twofold, as we shall state later on (q. 31, Aa. 3,4): one is in the intelligible good, which is the good of reason; the other is in good perceptible to the senses. The former pleasure seems to belong to soul alone: whereas the latter belongs to both soul and

body: because the sense is a power seated in a bodily organ: wherefore sensible good is the good of the whole composite. Now concupiscence seems to be the craving for this latter pleasure, since it belongs to the united soul and body, as is implied by the Latin word “concupiscencia.” Therefore, properly speaking, concupiscence is in the sensitive appetite, and in the concupiscible faculty, which takes its name from it.

Reply to Objection 1. The craving for wisdom, or other spiritual goods, is sometimes called concupiscence; either by reason of a certain likeness; or on account of the craving in the higher part of the soul being so vehement that it overflows into the lower appetite, so that the latter also, in its own way, tends to the spiritual good, following the lead of the higher appetite, the result being that the body itself renders its service in spiritual matters, according to Ps. 83:3: “My heart and my flesh have rejoiced in the living God.”

Reply to Objection 2. Properly speaking, desire may be not only in the lower, but also in the higher appetite. For it does not imply fellowship in craving, as concupiscence does; but simply movement towards the thing desired.

Reply to Objection 3. It belongs to each power of the soul to seek its proper good by the natural appetite, which does not arise from apprehension. But the craving for good, by the animal appetite, which arises from apprehension, belongs to the appetitive power alone. And to crave a thing under the aspect of something delightful to the senses, wherein concupiscence properly consists, belongs to the concupiscible power.

Objection 1. It would seem that concupiscence is not a specific passion of the concupiscible power. For passions are distinguished by their objects. But the object of the concupiscible power is something delightful to the senses; and this is also the object of concupiscence, as the Philosopher declares (*Rhet.* i, 11). Therefore concupiscence is not a specific passion of the concupiscible faculty.

Objection 2. Further, Augustine says (*QQ.* 83, qu. 33) that “covetousness is the love of transitory things”: so that it is not distinct from love. But all specific passions are distinct from one another. Therefore concupiscence is not a specific passion in the concupiscible faculty.

Objection 3. Further, to each passion of the concupiscible faculty there is a specific contrary passion in that faculty, as stated above (q. 23, a. 4). But no specific passion of the concupiscible faculty is contrary to concupiscence. For Damascene says (*De Fide Orth.* ii, 12) that “good when desired gives rise to concupiscence; when present, it gives joy: in like manner, the evil we apprehend makes us fear, the evil that is present makes us sad”: from which we gather that as sadness is contrary to joy, so is fear contrary to concupiscence. But fear is not in the concupiscible, but in the irascible part. Therefore concupiscence is not a specific passion of the concupiscible faculty.

On the contrary, Concupiscence is caused by love, and tends to pleasure, both of which are passions of the concupiscible faculty. Hence it is distinguished from the other concupiscible passions, as a specific passion.

I answer that, As stated above (a. 1; q. 23, a. 1), the good which gives pleasure to the senses is the common object of the concupiscible faculty. Hence the various concupiscible passions are distinguished according to the differences of that good. Now the diversity of this object can arise from the very nature of the object, or from a diversity in its active power. The diversity, derived from the nature of the active object, causes a

material difference of passions: while the difference in regard to its active power causes a formal diversity of passions, in respect of which the passions differ specifically.

Now the nature of the motive power of the end or of the good, differs according as it is really present, or absent: because, according as it is present, it causes the faculty to find rest in it; whereas, according as it is absent, it causes the faculty to be moved towards it. Wherefore the object of sensible pleasure causes love, inasmuch as, so to speak, it attunes and conforms the appetite to itself; it causes concupiscence, inasmuch as, when absent, it draws the faculty to itself; and it causes pleasure, inasmuch as, when present, it makes the faculty to find rest in itself. Accordingly, concupiscence is a passion differing “in species” from both love and pleasure. But concupiscences of this or that pleasurable object differ “in number.”

Reply to Objection 1. Pleasurable good is the object of concupiscence, not absolutely, but considered as absent: just as the sensible, considered as past, is the object of memory. For these particular conditions diversify the species of passions, and even of the powers of the sensitive part, which regards particular things.

Reply to Objection 2. In the passage quoted we have causal, not essential predication: for covetousness is not essentially love, but an effect of love. We may also say that Augustine is taking covetousness in a wide sense, for any movement of the appetite in respect of good to come: so that it includes both love and hope.

Reply to Objection 3. The passion which is directly contrary to concupiscence has no name, and stands in relation to evil, as concupiscence in regard to good. But since, like fear, it regards the absent evil; sometimes it goes by the name of fear, just as hope is sometimes called covetousness. For a small good or evil is reckoned as though it were nothing: and consequently every movement of the appetite in future good or evil is called hope or fear, which regard good and evil as arduous.

Objection 1. It would seem that concupiscences are not divided into those which are natural and those which are not. For concupiscence belongs to the animal appetite, as stated above (a. 1, ad 3). But the natural appetite is contrasted with the animal appetite. Therefore no concupiscence is natural.

Objection 2. Further, material differences makes no difference of species, but only numerical difference; a difference which is outside the purview of science. But if some concupiscences are natural, and some not, they differ only in respect of their objects; which amounts to a material difference, which is one of number only. Therefore concupiscences should not be divided into those that are natural and those that are not.

Objection 3. Further, reason is contrasted with nature, as stated in Phys. ii, 5. If therefore in man there is a concupiscence which is not natural, it must needs be rational. But this is impossible: because, since concupiscence is a passion, it belongs to the sensitive appetite, and not to the will, which is the rational appetite. Therefore there are no concupiscences which are not natural.

On the contrary, The Philosopher (Ethic. iii, 11 and Rhetor. i, 11) distinguishes natural concupiscences from those that are not natural.

I answer that, As stated above (a. 1), concupiscence is the craving for pleasurable good. Now a thing is pleasurable in two ways. First, because it is suitable to the nature of the animal; for example, food, drink, and the like: and concupiscence of such pleasurable things is said to be natural. Secondly, a thing is pleasurable because it is apprehended as suitable to the animal: as when one apprehends something as good and suitable, and consequently takes pleasure in it: and concupiscence of such pleasurable things is said to be not natural, and is more wont to be called “cupidity.”

Accordingly concupiscences of the first kind, or natural concupiscences, are common to men and other animals: because to both is there something suitable and

pleasurable according to nature: and in these all men agree; wherefore the Philosopher (Ethic. iii, 11) calls them “common” and “necessary.” But concupiscences of the second kind are proper to men, to whom it is proper to devise something as good and suitable, beyond that which nature requires. Hence the Philosopher says (Rhet. i, 11) that the former concupiscences are “irrational,” but the latter, “rational.” And because different men reason differently, therefore the latter are also called (Ethic. iii, 11) “peculiar and acquired,” i.e. in addition to those that are natural.

Reply to Objection 1. The same thing that is the object of the natural appetite, may be the object of the animal appetite, once it is apprehended. And in this way there may be an animal concupiscence of food, drink, and the like, which are objects of the natural appetite.

Reply to Objection 2. The difference between those concupiscences that are natural and those that are not, is not merely a material difference; it is also, in a way, formal, in so far as it arises from a difference in the active object. Now the object of the appetite is the apprehended good. Hence diversity of the active object follows from diversity of apprehension: according as a thing is apprehended as suitable, either by absolute apprehension, whence arise natural concupiscences, which the Philosopher calls “irrational” (Rhet. i, 11); or by apprehension together with deliberation, whence arise those concupiscences that are not natural, and which for this very reason the Philosopher calls “rational” (Rhet. i, 11).

Reply to Objection 3. Man has not only universal reason, pertaining to the intellectual faculty; but also particular reason pertaining to the sensitive faculty, as stated in the Ia, q. 78, a. 4; Ia, q. 81, a. 3: so that even rational concupiscence may pertain to the sensitive appetite. Moreover the sensitive appetite can be moved by the universal reason also, through the medium of the particular imagination.

Objection 1. It would seem that concupiscence is not infinite. For the object of concupiscence is good, which has the aspect of an end. But where there is infinity there is no end (Metaph. ii, 2). Therefore concupiscence cannot be infinite.

Objection 2. Further, concupiscence is of the fitting good, since it proceeds from love. But the infinite is without proportion, and therefore unfitting. Therefore concupiscence cannot be infinite.

Objection 3. Further, there is no passing through infinite things: and thus there is no reaching an ultimate term in them. But the subject of concupiscence is not delighted until he attain the ultimate term. Therefore, if concupiscence were infinite, no delight would ever ensue.

On the contrary, The Philosopher says (Polit. i, 3) that “since concupiscence is infinite, men desire an infinite number of things.”

I answer that, As stated above (a. 3), concupiscence is twofold; one is natural, the other is not natural. Natural concupiscence cannot be actually infinite: because it is of that which nature requires; and nature ever tends to something finite and fixed. Hence man never desires infinite meat, or infinite drink. But just as in nature there is potential successive infinity, so can this kind of concupiscence be infinite successively; so that, for instance, after getting food, a man may desire food yet again; and so of anything else that nature requires: because these bodily goods, when obtained, do not last for ever, but fail. Hence Our Lord said to the woman of Samaria (Jn. 4:13): “Whoever drinketh of this water, shall thirst again.”

But non-natural concupiscence is altogether infinite. Because, as stated above (a. 3), it follows from the reason, and it belongs to the reason to proceed to infinity. Hence he that desires riches, may desire to be rich, not

up to a certain limit, but to be simply as rich as possible.

Another reason may be assigned, according to the Philosopher (Polit. i, 3), why a certain concupiscence is finite, and another infinite. Because concupiscence of the end is always infinite: since the end is desired for its own sake, e.g. health: and thus greater health is more desired, and so on to infinity; just as, if a white thing of itself dilates the sight, that which is more white dilates yet more. On the other hand, concupiscence of the means is not infinite, because the concupiscence of the means is in suitable proportion to the end. Consequently those who place their end in riches have an infinite concupiscence of riches; whereas those who desire riches, on account of the necessities of life, desire a finite measure of riches, sufficient for the necessities of life, as the Philosopher says (Polit. i, 3). The same applies to the concupiscence of any other things.

Reply to Objection 1. Every object of concupiscence is taken as something finite: either because it is finite in reality, as being once actually desired; or because it is finite as apprehended. For it cannot be apprehended as infinite, since the infinite is that “from which, however much we may take, there always remains something to be taken” (Phys. iii, 6).

Reply to Objection 2. The reason is possessed of infinite power, in a certain sense, in so far as it can consider a thing infinitely, as appears in the addition of numbers and lines. Consequently, the infinite, taken in a certain way, is proportionate to reason. In fact the universal which the reason apprehends, is infinite in a sense, inasmuch as it contains potentially an infinite number of singulars.

Reply to Objection 3. In order that a man be delighted, there is no need for him to realize all that he desires: for he delights in the realization of each object of his concupiscence.

FIRST PART OF THE SECOND PART, QUESTION 31

Of Delight Considered in Itself*

(In Eight Articles)

We must now consider delight and sadness. Concerning delight four things must be considered: (1) Delight in itself; (2) The causes of delight; (3) Its effects; (4) Its goodness and malice.

Under the first head there are eight points of inquiry:

- (1) Whether delight is a passion?
- (2) Whether delight is subject to time?
- (3) Whether it differs from joy?
- (4) Whether it is in the intellectual appetite?
- (5) Of the delights of the higher appetite compared with the delight of the lower;
- (6) Of sensible delights compared with one another;
- (7) Whether any delight is non-natural?
- (8) Whether one delight can be contrary to another?

Whether delight is a passion?

Ia IIae q. 31 a. 1

Objection 1. It would seem that delight is not a passion. For Damascene (*De Fide Orth.* ii, 22) distinguishes operation from passion, and says that “operation is a movement in accord with nature, while passion is a movement contrary to nature.” But delight is an operation, according to the Philosopher (*Ethic.* vii, 12; x, 5). Therefore delight is not a passion.

Objection 2. Further, “To be passive is to be moved,” as stated in *Phys.* iii, 3. But delight does not consist in being moved, but in having been moved; for it arises from good already gained. Therefore delight is not a passion.

Objection 3. Further, delight is a kind of a perfection of the one who is delighted; since it “perfects operation,” as stated in *Ethic.* x, 4,5. But to be perfected does not consist in being passive or in being altered, as stated in *Phys.* vii, 3 and *De Anima* ii, 5. Therefore delight is not a passion.

On the contrary, Augustine (*De Civ. Dei* ix, 2; xiv, 5 seqq) reckons delight, joy, or gladness among the other passions of the soul.

I answer that, The movements of the sensitive appetite, are properly called passions, as stated above (q. 22, a. 3). Now every emotion arising from a sensitive apprehension, is a movement of the sensitive appetite: and this must needs be said of delight, since, according to the Philosopher (*Rhet.* i, 11) “delight is a certain movement of the soul and a sensible establishing thereof all at once, in keeping with the nature of the thing.”

In order to understand this, we must observe that just as in natural things some happen to attain to their natural perfections, so does this happen in animals. And though movement towards perfection does not occur all at once, yet the attainment of natural perfection does occur all at once. Now there is this difference between animals and other natural things, that when these lat-

ter are established in the state becoming their nature, they do not perceive it, whereas animals do. And from this perception there arises a certain movement of the soul in the sensitive appetite; which movement is called delight. Accordingly by saying that delight is “a movement of the soul,” we designate its genus. By saying that it is “an establishing in keeping with the thing’s nature,” i.e. with that which exists in the thing, we assign the cause of delight, viz. the presence of a becoming good. By saying that this establishing is “all at once,” we mean that this establishing is to be understood not as in the process of establishment, but as in the fact of complete establishment, in the term of the movement, as it were: for delight is not a “becoming” as Plato[†] maintained, but a “complete fact,” as stated in *Ethic.* vii, 12. Lastly, by saying that this establishing is “sensible,” we exclude the perfections of insensible things wherein there is no delight. It is therefore evident that, since delight is a movement of the animal appetite arising from an apprehension of sense, it is a passion of the soul.

Reply to Objection 1. Connatural operation, which is unhindered, is a second perfection, as stated in *De Anima* ii, 1: and therefore when a thing is established in its proper connatural and unhindered operation, delight follows, which consists in a state of completion, as observed above. Accordingly when we say that delight is an operation, we designate, not its essence, but its cause.

Reply to Objection 2. A twofold movement is to be observed in an animal: one, according to the intention of the end, and this belongs to the appetite; the other, according to the execution, and this belongs to the external operation. And so, although in him who has already gained the good in which he delights, the movement of execution ceases, by which he tends to the end; yet the movement of the appetitive faculty does not cease, since, just as before it desired that which it

* or, Pleasure † Phileb. 32,33

had not, so afterwards does it delight in that which it possesses. For though delight is a certain repose of the appetite, if we consider the presence of the pleasurable good that satisfies the appetite, nevertheless there remains the impression made on the appetite by its object, by reason of which delight is a kind of movement.

Reply to Objection 3. Although the name of passion is more appropriate to those passions which have a corruptive and evil tendency, such as bodily ailments, as also sadness and fear in the soul; yet some passions have a tendency to something good, as stated above (q. 23, Aa. 1,4): and in this sense delight is called a passion.

Whether delight is in time?

Ia IIae q. 31 a. 2

Objection 1. It would seem that delight is in time. For “delight is a kind of movement,” as the Philosopher says (Rhet. i, 11). But all movement is in time. Therefore delight is in time.

Objection 2. Further, a thing is said to last long and to be morose in respect of time. But some pleasures are called morose. Therefore pleasure is in time.

Objection 3. Further, the passions of the soul are of one same genus. But some passions of the soul are in time. Therefore delight is too.

On the contrary, The Philosopher says (Ethic. x, 4) that “no one takes pleasure according to time.”

I answer that, A thing may be in time in two ways: first, by itself; secondly, by reason of something else, and accidentally as it were. For since time is the measure of successive things, those things are of themselves said to be in time, to which succession or something pertaining to succession is essential: such are movement, repose, speech and such like. On the other hand, those things are said to be in time, by reason of something else and not of themselves, to which succession is not essential, but which are subject to something successive. Thus the fact of being a man is not essentially something successive; since it is not a movement, but the term of a movement or change, viz. of this being begot-

ten: yet, because human being is subject to changeable causes, in this respect, to be a man is in time.

Accordingly, we must say that delight, of itself indeed, is not in time: for it regards good already gained, which is, as it were, the term of the movement. But if this good gained be subject to change, the delight therein will be in time accidentally: whereas if it be altogether unchangeable, the delight therein will not be in time, either by reason of itself or accidentally.

Reply to Objection 1. As stated in De Anima iii, 7, movement is twofold. One is “the act of something imperfect, i.e. of something existing in potentiality, as such”: this movement is successive and is in time. Another movement is “the act of something perfect, i.e. of something existing in act,” e.g. to understand, to feel, and to will and such like, also to have delight. This movement is not successive, nor is it of itself in time.

Reply to Objection 2. Delight is said to be long lasting or morose, according as it is accidentally in time.

Reply to Objection 3. Other passions have not for their object a good obtained, as delight has. Wherefore there is more of the movement of the imperfect in them than in delight. And consequently it belongs more to delight not to be in time.

Whether delight differs from joy?

Ia IIae q. 31 a. 3

Objection 1. It would seem that delight is altogether the same as joy. Because the passions of the soul differ according to their objects. But delight and joy have the same object, namely, a good obtained. Therefore joy is altogether the same as delight.

Objection 2. Further, one movement does not end in two terms. But one and the same movement, that of desire, ends in joy and delight. Therefore delight and joy are altogether the same.

Objection 3. Further, if joy differs from delight, it seems that there is equal reason for distinguishing gladness, exultation, and cheerfulness from delight, so that they would all be various passions of the soul. But this seems to be untrue. Therefore joy does not differ from delight.

On the contrary, We do not speak of joy in irrational animals; whereas we do speak of delight in them. Therefore joy is not the same as delight.

I answer that, Joy, as Avicenna states (De Anima

iv), is a kind of delight. For we must observe that, just as some concupiscences are natural, and some not natural, but consequent to reason, as stated above (q. 30, a. 3), so also some delights are natural, and some are not natural but rational. Or, as Damascene (De Fide Orth. ii, 13) and Gregory of Nyssa* put it, “some delights are of the body, some are of the soul”; which amounts to the same. For we take delight both in those things which we desire naturally, when we get them, and in those things which we desire as a result of reason. But we do not speak of joy except when delight follows reason; and so we do not ascribe joy to irrational animals, but only delight.

Now whatever we desire naturally, can also be the object of reasoned desire and delight, but not vice versa. Consequently whatever can be the object of delight, can also be the object of joy in rational beings. And yet everything is not always the object of joy; since sometimes one feels a certain delight in the body, without

* Nemesius, De Nat. Hom. xviii.

rejoicing thereat according to reason. And accordingly delight extends to more things than does joy.

Reply to Objection 1. Since the object of the appetite of the soul is an apprehended good, diversity of apprehension pertains, in a way, to diversity of the object. And so delights of the soul, which are also called joys, are distinct from bodily delights, which are not called otherwise than delights: as we have observed above in regard to concupiscences (q. 30, a. 3, ad 2).

Reply to Objection 2. A like difference is to be observed in concupiscences also: so that delight corresponds to concupiscence, while joy corresponds to desire, which seems to pertain more to concupiscence of

the soul. Hence there is a difference of repose corresponding to the difference of movement.

Reply to Objection 3. These other names pertaining to delight are derived from the effects of delight; for “laetitia” [gladness] is derived from the “dilation” of the heart, as if one were to say “latitia”; “exultation” is derived from the exterior signs of inward delight, which appear outwardly in so far as the inward joy breaks forth from its bounds; and “cheerfulness” is so called from certain special signs and effects of gladness. Yet all these names seem to belong to joy; for we do not employ them save in speaking of rational beings.

Whether delight is in the intellectual appetite?

Ia IIae q. 31 a. 4

Objection 1. It would seem that delight is not in the intellectual appetite. Because the Philosopher says (Rhet. i, 11) that “delight is a sensible movement.” But sensible movement is not in an intellectual power. Therefore delight is not in the intellectual appetite.

Objection 2. Further, delight is a passion. But every passion is in the sensitive appetite. Therefore delight is only in the sensitive appetite.

Objection 3. Further, delight is common to us and to the irrational animals. Therefore it is not elsewhere than in that power which we have in common with irrational animals.

On the contrary, It is written (Ps. 36:4): “Delight in the Lord.” But the sensitive appetite cannot reach to God; only the intellectual appetite can. Therefore delight can be in the intellectual appetite.

I answer that, As stated above (a. 3), a certain delight arises from the apprehension of the reason. Now on the reason apprehending something, not only the sensitive appetite is moved, as regards its application to some particular thing, but also the intellectual appetite, which is called the will. And accordingly in the intellectual appetite or will there is that delight which is called joy, but not bodily delight.

However, there is this difference of delight in either power, that delight of the sensitive appetite is accompanied by a bodily transmutation, whereas delight of the intellectual appetite is nothing but the mere movement

of the will. Hence Augustine says (De Civ. Dei xiv, 6) that “desire and joy are nothing else but a volition of consent to the things we wish.”

Reply to Objection 1. In this definition of the Philosopher, he uses the word “sensible” in its wide acceptance for any kind of perception. For he says (Ethic. x, 4) that “delight is attendant upon every sense, as it is also upon every act of the intellect and contemplation.” Or we may say that he is defining delight of the sensitive appetite.

Reply to Objection 2. Delight has the character of passion, properly speaking, when accompanied by bodily transmutation. It is not thus in the intellectual appetite, but according to simple movement: for thus it is also in God and the angels. Hence the Philosopher says (Ethic. vii, 14) that “God rejoices by one simple act”: and Dionysius says at the end of De Coel. Hier., that “the angels are not susceptible to our passible delight, but rejoice together with God with the gladness of incorruption.”

Reply to Objection 3. In us there is delight, not only in common with dumb animals, but also in common with angels. Wherefore Dionysius says (De Coel. Hier.) that “holy men often take part in the angelic delights.” Accordingly we have delight, not only in the sensitive appetite, which we have in common with dumb animals, but also in the intellectual appetite, which we have in common with the angels.

Whether bodily and sensible pleasures are greater than spiritual and intellectual pleasures?

Ia IIae q. 31 a. 5

Objection 1. It would seem that bodily and sensible pleasures are greater than spiritual and intelligible pleasures. For all men seek some pleasure, according to the Philosopher (Ethic. x, 2,4). But more seek sensible pleasures, than intelligible spiritual pleasures. Therefore bodily pleasures are greater.

Objection 2. Further, the greatness of a cause is known by its effect. But bodily pleasures have greater effects; since “they alter the state of the body, and in

some they cause madness” (Ethic. vii, 3). Therefore bodily pleasures are greater.

Objection 3. Further, bodily pleasures need to be tempered and checked, by reason of their vehemence: whereas there is no need to check spiritual pleasures. Therefore bodily pleasures are greater.

On the contrary, It is written (Ps. 118:103): “How sweet are Thy words to my palate; more than honey to my mouth!” And the Philosopher says (Ethic. x, 7) that

“the greatest pleasure is derived from the operation of wisdom.”

Answer that, As stated above (a. 1), pleasure arises from union with a suitable object perceived or known. Now, in the operations of the soul, especially of the sensitive and intellectual soul, it must be noted that, since they do not pass into outward matter, they are acts or perfections of the agent, e.g. to understand, to feel, to will and the like: because actions which pass into outward matter, are actions and perfections rather of the matter transformed; for “movement is the act produced by the mover in the thing moved” (Phys. iii, 3). Accordingly the aforesaid actions of the sensitive and intellectual soul, are themselves a certain good of the agent, and are known by sense and intellect. Wherefore from them also does pleasure arise, and not only from their objects.

If therefore we compare intellectual pleasures with sensible pleasures, according as we delight in the very actions, for instance in sensitive and in intellectual knowledge; without doubt intellectual pleasures are much greater than sensible pleasures. For man takes much more delight in knowing something, by understanding it, than in knowing something by perceiving it with his sense. Because intellectual knowledge is more perfect; and because it is better known, since the intellect reflects on its own act more than sense does. Moreover intellectual knowledge is more beloved: for there is no one who would not forfeit his bodily sight rather than his intellectual vision, as beasts or fools are deprived thereof, as Augustine says in *De Civ. Dei* (*De Trin.* xiv, 14).

If, however, intellectual spiritual pleasures be compared with sensible bodily pleasures, then, in themselves and absolutely speaking, spiritual pleasures are greater. And this appears from the consideration of the three things needed for pleasure, viz. the good which is brought into conjunction, that to which it is conjoined, and the conjunction itself. For spiritual good is both greater and more beloved than bodily good: a sign whereof is that men abstain from even the greatest bodily pleasures, rather than suffer loss of honor which is an intellectual good. Likewise the intellectual faculty is much more noble and more knowing than the sensitive faculty. Also the conjunction is more intimate, more perfect and more firm. More intimate, because the

senses stop at the outward accidents of a thing, whereas the intellect penetrates to the essence; for the object of the intellect is “what a thing is.” More perfect, because the conjunction of the sensible to the sense implies movement, which is an imperfect act: wherefore sensible pleasures are not perceived all at once, but some part of them is passing away, while some other part is looked forward to as yet to be realized, as is manifest in pleasures of the table and in sexual pleasures: whereas intelligible things are without movement: hence pleasures of this kind are realized all at once. More firm; because the objects of bodily pleasure are corruptible, and soon pass away; whereas spiritual goods are incorruptible.

On the other hand, in relation to us, bodily pleasures are more vehement, for three reasons. First, because sensible things are more known to us, than intelligible things. Secondly, because sensible pleasures, through being passions of the sensitive appetite, are accompanied by some alteration in the body: whereas this does not occur in spiritual pleasures, save by reason of a certain reaction of the superior appetite on the lower. Thirdly, because bodily pleasures are sought as remedies for bodily defects or troubles, whence various griefs arise. Wherefore bodily pleasures, by reason of their succeeding griefs of this kind, are felt the more, and consequently are welcomed more than spiritual pleasures, which have no contrary griefs, as we shall state farther on (q. 35, a. 5).

Reply to Objection 1. The reason why more seek bodily pleasures is because sensible goods are known better and more generally: and, again, because men need pleasures as remedies for many kinds of sorrow and sadness: and since the majority cannot attain spiritual pleasures, which are proper to the virtuous, hence it is that they turn aside to seek those of the body.

Reply to Objection 2. Bodily transmutation arises more from bodily pleasures, inasmuch as they are passions of the sensitive appetite.

Reply to Objection 3. Bodily pleasures are realized in the sensitive faculty which is governed by reason: wherefore they need to be tempered and checked by reason. But spiritual pleasures are in the mind, which is itself the rule: wherefore they are in themselves both sober and moderate.

Whether the pleasures of touch are greater than the pleasures afforded by the other senses? Ia IIae q. 31 a. 6

Objection 1. It would seem that the pleasures of touch are not greater than the pleasures afforded by the other senses. Because the greatest pleasure seems to be that without which all joy is at an end. But such is the pleasure afforded by the sight, according to the words of Tob. 5:12: “What manner of joy shall be to me, who sit in darkness, and see not the light of heaven?” There-

fore the pleasure afforded by the sight is the greatest of sensible pleasures.

Objection 2. Further, “every one finds treasure in what he loves,” as the Philosopher says (*Rhet.* i, 11). But “of all the senses the sight is loved most”*. Therefore the greatest pleasure seems to be afforded by sight.

Objection 3. Further, the beginning of friendship

* *Metaph.* i, 1

which is for the sake of the pleasant is principally sight. But pleasure is the cause of such friendship. Therefore the greatest pleasure seems to be afforded by sight.

On the contrary, The Philosopher says (Ethic. iii, 10), that the greatest pleasures are those which are afforded by the touch.

I answer that, As stated above (q. 25, a. 2, ad 1; q. 27, a. 4, ad 1), everything gives pleasure according as it is loved. Now, as stated in Metaph. i, 1, the senses are loved for two reasons: for the purpose of knowledge, and on account of their usefulness. Wherefore the senses afford pleasure in both these ways. But because it is proper to man to apprehend knowledge itself as something good, it follows that the former pleasures of the senses, i.e. those which arise from knowledge, are proper to man: whereas pleasures of the senses, as loved for their usefulness, are common to all animals.

If therefore we speak of that sensible pleasure by which reason of knowledge, it is evident that the sight affords greater pleasure than any other sense. On the other hand, if we speak of that sensible pleasure which is by reason of usefulness, then the greatest pleasure is afforded by the touch. For the usefulness of sensible things is gauged by their relation to the preservation of the animal's nature. Now the sensible objects of touch bear the closest relation to this usefulness: for the touch takes cognizance of those things which are vital to an animal, namely, of things hot and cold and the like. Wherefore in this respect, the pleasures of touch are greater as being more closely related to the end. For this reason, too, other animals which do not experience sensible pleasure save by reason of usefulness, derive no pleasure from the other senses except as subordinated to the sensible objects of the touch: "for dogs do not take

delight in the smell of hares, but in eating them; . . . nor does the lion feel pleasure in the lowing of an ox, but in devouring it" (Ethic. iii, 10).

Since then the pleasure afforded by touch is the greatest in respect of usefulness, and the pleasure afforded by sight the greatest in respect of knowledge; if anyone wish to compare these two, he will find that the pleasure of touch is, absolutely speaking, greater than the pleasure of sight, so far as the latter remains within the limits of sensible pleasure. Because it is evident that in everything, that which is natural is most powerful: and it is to these pleasures of the touch that the natural concupiscences, such as those of food, sexual union, and the like, are ordained. If, however, we consider the pleasures of sight, inasmuch sight is the handmaid of the mind, then the pleasures of sight are greater, forasmuch as intellectual pleasures are greater than sensible.

Reply to Objection 1. Joy, as stated above (a. 3), denotes pleasure of the soul; and this belongs principally to the sight. But natural pleasure belongs principally to the touch.

Reply to Objection 2. The sight is loved most, "on account of knowledge, because it helps us to distinguish many things," as is stated in the same passage (Metaph. i, 1).

Reply to Objection 3. Pleasure causes carnal love in one way; the sight, in another. For pleasure, especially that which is afforded by the touch, is the final cause of the friendship which is for the sake of the pleasant: whereas the sight is a cause like that from which a movement has its beginning, inasmuch as the beholder on seeing the lovable object receives an impression of its image, which entices him to love it and to seek its delight.

Whether any pleasure is not natural?

Ia IIae q. 31 a. 7

Objection 1. It would seem that no pleasure is not natural. For pleasure is to the emotions of the soul what repose is to bodies. But the appetite of a natural body does not repose save in a connatural place. Neither, therefore, can the repose of the animal appetite, which is pleasure, be elsewhere than in something connatural. Therefore no pleasure is non-natural.

Objection 2. Further, what is against nature is violent. But "whatever is violent causes grief" (Metaph. v, 5). Therefore nothing which is unnatural can give pleasure.

Objection 3. Further, the fact of being established in one's own nature, if perceived, gives rise to pleasure, as is evident from the Philosopher's definition quoted above (a. 1). But it is natural to every thing to be established in its nature; because natural movement tends to a natural end. Therefore every pleasure is natural.

On the contrary, The Philosopher says (Ethic. vii, 5,6) that some things are pleasant "not from nature but from disease."

I answer that, We speak of that as being natural, which is in accord with nature, as stated in Phys. ii, 1. Now, in man, nature can be taken in two ways. First, inasmuch as intellect and reason is the principal part of man's nature, since in respect thereof he has his own specific nature. And in this sense, those pleasures may be called natural to man, which are derived from things pertaining to man in respect of his reason: for instance, it is natural to man to take pleasure in contemplating the truth and in doing works of virtue. Secondly, nature in man may be taken as contrasted with reason, and as denoting that which is common to man and other animals, especially that part of man which does not obey reason. And in this sense, that which pertains to the preservation of the body, either as regards the individual, as food, drink, sleep, and the like, or as regards the species, as sexual intercourse, are said to afford man natural pleasure. Under each kind of pleasures, we find some that are "not natural" speaking absolutely, and yet "connatural" in some respect. For it happens in an in-

dividual that some one of the natural principles of the species is corrupted, so that something which is contrary to the specific nature, becomes accidentally natural to this individual: thus it is natural to this hot water to give heat. Consequently it happens that something which is not natural to man, either in regard to reason, or in regard to the preservation of the body, becomes unnatural to this individual man, on account of there being some corruption of nature in him. And this corruption

may be either on the part of the body—from some ailment; thus to a man suffering from fever, sweet things seem bitter, and vice versa—or from an evil temperament; thus some take pleasure in eating earth and coals and the like; or on the part of the soul; thus from custom some take pleasure in cannibalism or in the unnatural intercourse of man and beast, or other such things, which are not in accord with human nature.

This suffices for the answers to the objections.

Whether one pleasure can be contrary to another?

Ia IIae q. 31 a. 8

Objection 1. It would seem that one pleasure cannot be contrary to another. Because the passions of the soul derive their species and contrariety from their objects. Now the object of pleasure is the good. Since therefore good is not contrary to good, but “good is contrary to evil, and evil to good,” as stated in Praedic. viii; it seems that one pleasure is not contrary to another.

Objection 2. Further, to one thing there is one contrary, as is proved in Metaph. x, 4. But sadness is contrary to pleasure. Therefore pleasure is not contrary to pleasure.

Objection 3. Further, if one pleasure is contrary to another, this is only on account of the contrariety of the things which give pleasure. But this difference is material: whereas contrariety is a difference of form, as stated in Metaph. x, 4. Therefore there is no contrariety between one pleasure and another.

On the contrary, Things of the same genus that impede one another are contraries, as the Philosopher states (Phys. viii, 8). But some pleasures impede one another, as stated in Ethic. x, 5. Therefore some pleasures are contrary to one another.

I answer that, Pleasure, in the emotions of the soul, is likened to repose in natural bodies, as stated above (q. 23, a. 4). Now one repose is said to be contrary to another when they are in contrary termini; thus, “repose in a high place is contrary to repose in a low place” (Phys. v, 6). Wherefore it happens in the emotions of the soul that one pleasure is contrary to another.

Reply to Objection 1. This saying of the Philosopher is to be understood of good and evil as applied to virtues and vices: because one vice may be contrary to another vice, whereas no virtue can be contrary to another virtue. But in other things nothing prevents one good from being contrary to another, such as hot and cold, of which the former is good in relation to fire, the latter, in relation to water. And in this way one pleasure can be contrary to another. That this is impossible with regard to the good of virtue, is due to the fact that virtue’s good depends on fittingness in relation to some one thing—i.e. the reason.

Reply to Objection 2. Pleasure, in the emotions of the soul, is likened to natural repose in bodies: because its object is something suitable and connatural, so to speak. But sadness is like a violent repose; because its object is disagreeable to the animal appetite, just as the place of violent repose is disagreeable to the natural appetite. Now natural repose is contrary both to violent repose of the same body, and to the natural repose of another, as stated in Phys. v, 6. Wherefore pleasure is contrary to both to another pleasure and to sadness.

Reply to Objection 3. The things in which we take pleasure, since they are the objects of pleasure, cause not only a material, but also a formal difference, if the formality of pleasurable be different. Because difference in the formal object causes a specific difference in acts and passions, as stated above (q. 23, Aa. 1,4; q. 30, a. 2).

Objection 1. It would seem that delight is not a passion. For Damascene (*De Fide Orth.* ii, 22) distinguishes operation from passion, and says that “operation is a movement in accord with nature, while passion is a movement contrary to nature.” But delight is an operation, according to the Philosopher (*Ethic.* vii, 12; x, 5). Therefore delight is not a passion.

Objection 2. Further, “To be passive is to be moved,” as stated in *Phys.* iii, 3. But delight does not consist in being moved, but in having been moved; for it arises from good already gained. Therefore delight is not a passion.

Objection 3. Further, delight is a kind of a perfection of the one who is delighted; since it “perfects operation,” as stated in *Ethic.* x, 4,5. But to be perfected does not consist in being passive or in being altered, as stated in *Phys.* vii, 3 and *De Anima* ii, 5. Therefore delight is not a passion.

On the contrary, Augustine (*De Civ. Dei* ix, 2; xiv, 5 seqq) reckons delight, joy, or gladness among the other passions of the soul.

Answer that, The movements of the sensitive appetite, are properly called passions, as stated above (q. 22, a. 3). Now every emotion arising from a sensitive apprehension, is a movement of the sensitive appetite: and this must needs be said of delight, since, according to the Philosopher (*Rhet.* i, 11) “delight is a certain movement of the soul and a sensible establishing thereof all at once, in keeping with the nature of the thing.”

In order to understand this, we must observe that just as in natural things some happen to attain to their natural perfections, so does this happen in animals. And though movement towards perfection does not occur all at once, yet the attainment of natural perfection does occur all at once. Now there is this difference between animals and other natural things, that when these latter are established in the state becoming their nature, they do not perceive it, whereas animals do. And from this perception there arises a certain movement of the soul in the sensitive appetite; which movement is called delight. Accordingly by saying that delight is “a movement of the soul,” we designate its genus. By saying

that it is “an establishing in keeping with the thing’s nature,” i.e. with that which exists in the thing, we assign the cause of delight, viz. the presence of a becoming good. By saying that this establishing is “all at once,” we mean that this establishing is to be understood not as in the process of establishment, but as in the fact of complete establishment, in the term of the movement, as it were: for delight is not a “becoming” as Plato* maintained, but a “complete fact,” as stated in *Ethic.* vii, 12. Lastly, by saying that this establishing is “sensible,” we exclude the perfections of insensible things wherein there is no delight. It is therefore evident that, since delight is a movement of the animal appetite arising from an apprehension of sense, it is a passion of the soul.

Reply to Objection 1. Connatural operation, which is unhindered, is a second perfection, as stated in *De Anima* ii, 1: and therefore when a thing is established in its proper connatural and unhindered operation, delight follows, which consists in a state of completion, as observed above. Accordingly when we say that delight is an operation, we designate, not its essence, but its cause.

Reply to Objection 2. A twofold movement is to be observed in an animal: one, according to the intention of the end, and this belongs to the appetite; the other, according to the execution, and this belongs to the external operation. And so, although in him who has already gained the good in which he delights, the movement of execution ceases, by which he tends to the end; yet the movement of the appetitive faculty does not cease, since, just as before it desired that which it had not, so afterwards does it delight in that which it possesses. For though delight is a certain repose of the appetite, if we consider the presence of the pleasurable good that satisfies the appetite, nevertheless there remains the impression made on the appetite by its object, by reason of which delight is a kind of movement.

Reply to Objection 3. Although the name of passion is more appropriate to those passions which have a corruptive and evil tendency, such as bodily ailments, as also sadness and fear in the soul; yet some passions have a tendency to something good, as stated above (q. 23, Aa. 1,4): and in this sense delight is called a passion.

* *Phileb.* 32,33

Objection 1. It would seem that delight is in time. For “delight is a kind of movement,” as the Philosopher says (Rhet. i, 11). But all movement is in time. Therefore delight is in time.

Objection 2. Further, a thing is said to last long and to be morose in respect of time. But some pleasures are called morose. Therefore pleasure is in time.

Objection 3. Further, the passions of the soul are of one same genus. But some passions of the soul are in time. Therefore delight is too.

On the contrary, The Philosopher says (Ethic. x, 4) that “no one takes pleasure according to time.”

I answer that, A thing may be in time in two ways: first, by itself; secondly, by reason of something else, and accidentally as it were. For since time is the measure of successive things, those things are of themselves said to be in time, to which succession or something pertaining to succession is essential: such are movement, repose, speech and such like. On the other hand, those things are said to be in time, by reason of something else and not of themselves, to which succession is not essential, but which are subject to something successive. Thus the fact of being a man is not essentially something successive; since it is not a movement, but the term of a movement or change, viz. of this being begot-

ten: yet, because human being is subject to changeable causes, in this respect, to be a man is in time.

Accordingly, we must say that delight, of itself indeed, is not in time: for it regards good already gained, which is, as it were, the term of the movement. But if this good gained be subject to change, the delight therein will be in time accidentally: whereas if it be altogether unchangeable, the delight therein will not be in time, either by reason of itself or accidentally.

Reply to Objection 1. As stated in De Anima iii, 7, movement is twofold. One is “the act of something imperfect, i.e. of something existing in potentiality, as such”: this movement is successive and is in time. Another movement is “the act of something perfect, i.e. of something existing in act,” e.g. to understand, to feel, and to will and such like, also to have delight. This movement is not successive, nor is it of itself in time.

Reply to Objection 2. Delight is said to be long lasting or morose, according as it is accidentally in time.

Reply to Objection 3. Other passions have not for their object a good obtained, as delight has. Wherefore there is more of the movement of the imperfect in them than in delight. And consequently it belongs more to delight not to be in time.

Objection 1. It would seem that delight is altogether the same as joy. Because the passions of the soul differ according to their objects. But delight and joy have the same object, namely, a good obtained. Therefore joy is altogether the same as delight.

Objection 2. Further, one movement does not end in two terms. But one and the same movement, that of desire, ends in joy and delight. Therefore delight and joy are altogether the same.

Objection 3. Further, if joy differs from delight, it seems that there is equal reason for distinguishing gladness, exultation, and cheerfulness from delight, so that they would all be various passions of the soul. But this seems to be untrue. Therefore joy does not differ from delight.

On the contrary, We do not speak of joy in irrational animals; whereas we do speak of delight in them. Therefore joy is not the same as delight.

I answer that, Joy, as Avicenna states (*De Anima* iv), is a kind of delight. For we must observe that, just as some concupiscences are natural, and some not natural, but consequent to reason, as stated above (q. 30, a. 3), so also some delights are natural, and some are not natural but rational. Or, as Damascene (*De Fide Orth.* ii, 13) and Gregory of Nyssa* put it, “some delights are of the body, some are of the soul”; which amounts to the same. For we take delight both in those things which we desire naturally, when we get them, and in those things which we desire as a result of reason. But we do not speak of joy except when delight follows reason; and so we do not ascribe joy to irrational animals, but only delight.

Now whatever we desire naturally, can also be the object of reasoned desire and delight, but not vice versa. Consequently whatever can be the object of delight, can also be the object of joy in rational beings. And yet everything is not always the object of joy; since sometimes one feels a certain delight in the body, without rejoicing thereat according to reason. And accordingly delight extends to more things than does joy.

Reply to Objection 1. Since the object of the appetite of the soul is an apprehended good, diversity of apprehension pertains, in a way, to diversity of the object. And so delights of the soul, which are also called joys, are distinct from bodily delights, which are not called otherwise than delights: as we have observed above in regard to concupiscences (q. 30, a. 3, ad 2).

Reply to Objection 2. A like difference is to be observed in concupiscences also: so that delight corresponds to concupiscence, while joy corresponds to desire, which seems to pertain more to concupiscence of the soul. Hence there is a difference of repose corresponding to the difference of movement.

Reply to Objection 3. These other names pertaining to delight are derived from the effects of delight; for “laetitia” [gladness] is derived from the “dilation” of the heart, as if one were to say “latitia”; “exultation” is derived from the exterior signs of inward delight, which appear outwardly in so far as the inward joy breaks forth from its bounds; and “cheerfulness” is so called from certain special signs and effects of gladness. Yet all these names seem to belong to joy; for we do not employ them save in speaking of rational beings.

* Nemesius, *De Nat. Hom.* xviii.

Objection 1. It would seem that delight is not in the intellectual appetite. Because the Philosopher says (Rhet. i, 11) that “delight is a sensible movement.” But sensible movement is not in an intellectual power. Therefore delight is not in the intellectual appetite.

Objection 2. Further, delight is a passion. But every passion is in the sensitive appetite. Therefore delight is only in the sensitive appetite.

Objection 3. Further, delight is common to us and to the irrational animals. Therefore it is not elsewhere than in that power which we have in common with irrational animals.

On the contrary, It is written (Ps. 36:4): “Delight in the Lord.” But the sensitive appetite cannot reach to God; only the intellectual appetite can. Therefore delight can be in the intellectual appetite.

I answer that, As stated above (a. 3), a certain delight arises from the apprehension of the reason. Now on the reason apprehending something, not only the sensitive appetite is moved, as regards its application to some particular thing, but also the intellectual appetite, which is called the will. And accordingly in the intellectual appetite or will there is that delight which is called joy, but not bodily delight.

However, there is this difference of delight in either power, that delight of the sensitive appetite is accompanied by a bodily transmutation, whereas delight of the intellectual appetite is nothing but the mere movement

of the will. Hence Augustine says (De Civ. Dei xiv, 6) that “desire and joy are nothing else but a volition of consent to the things we wish.”

Reply to Objection 1. In this definition of the Philosopher, he uses the word “sensible” in its wide acceptance for any kind of perception. For he says (Ethic. x, 4) that “delight is attendant upon every sense, as it is also upon every act of the intellect and contemplation.” Or we may say that he is defining delight of the sensitive appetite.

Reply to Objection 2. Delight has the character of passion, properly speaking, when accompanied by bodily transmutation. It is not thus in the intellectual appetite, but according to simple movement: for thus it is also in God and the angels. Hence the Philosopher says (Ethic. vii, 14) that “God rejoices by one simple act”: and Dionysius says at the end of De Coel. Hier., that “the angels are not susceptible to our passible delight, but rejoice together with God with the gladness of incorruption.”

Reply to Objection 3. In us there is delight, not only in common with dumb animals, but also in common with angels. Wherefore Dionysius says (De Coel. Hier.) that “holy men often take part in the angelic delights.” Accordingly we have delight, not only in the sensitive appetite, which we have in common with dumb animals, but also in the intellectual appetite, which we have in common with the angels.

Objection 1. It would seem that bodily and sensible pleasures are greater than spiritual and intelligible pleasures. For all men seek some pleasure, according to the Philosopher (Ethic. x, 2,4). But more seek sensible pleasures, than intelligible spiritual pleasures. Therefore bodily pleasures are greater.

Objection 2. Further, the greatness of a cause is known by its effect. But bodily pleasures have greater effects; since “they alter the state of the body, and in some they cause madness” (Ethic. vii, 3). Therefore bodily pleasures are greater.

Objection 3. Further, bodily pleasures need to be tempered and checked, by reason of their vehemence; whereas there is no need to check spiritual pleasures. Therefore bodily pleasures are greater.

On the contrary, It is written (Ps. 118:103): “How sweet are Thy words to my palate; more than honey to my mouth!” And the Philosopher says (Ethic. x, 7) that “the greatest pleasure is derived from the operation of wisdom.”

Answer that, As stated above (a. 1), pleasure arises from union with a suitable object perceived or known. Now, in the operations of the soul, especially of the sensitive and intellectual soul, it must be noted that, since they do not pass into outward matter, they are acts or perfections of the agent, e.g. to understand, to feel, to will and the like: because actions which pass into outward matter, are actions and perfections rather of the matter transformed; for “movement is the act produced by the mover in the thing moved” (Phys. iii, 3). Accordingly the aforesaid actions of the sensitive and intellectual soul, are themselves a certain good of the agent, and are known by sense and intellect. Wherefore from them also does pleasure arise, and not only from their objects.

If therefore we compare intellectual pleasures with sensible pleasures, according as we delight in the very actions, for instance in sensitive and in intellectual knowledge; without doubt intellectual pleasures are much greater than sensible pleasures. For man takes much more delight in knowing something, by understanding it, than in knowing something by perceiving it with his sense. Because intellectual knowledge is more perfect; and because it is better known, since the intellect reflects on its own act more than sense does. Moreover intellectual knowledge is more beloved: for there is no one who would not forfeit his bodily sight rather than his intellectual vision, as beasts or fools are deprived thereof, as Augustine says in *De Civ. Dei* (*De Trin.* xiv, 14).

If, however, intellectual spiritual pleasures be compared with sensible bodily pleasures, then, in themselves and absolutely speaking, spiritual pleasures are greater. And this appears from the consideration of the three things needed for pleasure, viz. the good which

is brought into conjunction, that to which it is conjoined, and the conjunction itself. For spiritual good is both greater and more beloved than bodily good: a sign whereof is that men abstain from even the greatest bodily pleasures, rather than suffer loss of honor which is an intellectual good. Likewise the intellectual faculty is much more noble and more knowing than the sensitive faculty. Also the conjunction is more intimate, more perfect and more firm. More intimate, because the senses stop at the outward accidents of a thing, whereas the intellect penetrates to the essence; for the object of the intellect is “what a thing is.” More perfect, because the conjunction of the sensible to the sense implies movement, which is an imperfect act: wherefore sensible pleasures are not perceived all at once, but some part of them is passing away, while some other part is looked forward to as yet to be realized, as is manifest in pleasures of the table and in sexual pleasures: whereas intelligible things are without movement: hence pleasures of this kind are realized all at once. More firm; because the objects of bodily pleasure are corruptible, and soon pass away; whereas spiritual goods are incorruptible.

On the other hand, in relation to us, bodily pleasures are more vehement, for three reasons. First, because sensible things are more known to us, than intelligible things. Secondly, because sensible pleasures, through being passions of the sensitive appetite, are accompanied by some alteration in the body: whereas this does not occur in spiritual pleasures, save by reason of a certain reaction of the superior appetite on the lower. Thirdly, because bodily pleasures are sought as remedies for bodily defects or troubles, whence various griefs arise. Wherefore bodily pleasures, by reason of their succeeding griefs of this kind, are felt the more, and consequently are welcomed more than spiritual pleasures, which have no contrary griefs, as we shall state farther on (q. 35, a. 5).

Reply to Objection 1. The reason why more seek bodily pleasures is because sensible goods are known better and more generally: and, again, because men need pleasures as remedies for many kinds of sorrow and sadness: and since the majority cannot attain spiritual pleasures, which are proper to the virtuous, hence it is that they turn aside to seek those of the body.

Reply to Objection 2. Bodily transmutation arises more from bodily pleasures, inasmuch as they are passions of the sensitive appetite.

Reply to Objection 3. Bodily pleasures are realized in the sensitive faculty which is governed by reason: wherefore they need to be tempered and checked by reason. But spiritual pleasures are in the mind, which is itself the rule: wherefore they are in themselves both sober and moderate.

Objection 1. It would seem that the pleasures of touch are not greater than the pleasures afforded by the other senses. Because the greatest pleasure seems to be that without which all joy is at an end. But such is the pleasure afforded by the sight, according to the words of Tob. 5:12: “What manner of joy shall be to me, who sit in darkness, and see not the light of heaven?” Therefore the pleasure afforded by the sight is the greatest of sensible pleasures.

Objection 2. Further, “every one finds treasure in what he loves,” as the Philosopher says (Rhet. i, 11). But “of all the senses the sight is loved most”*. Therefore the greatest pleasure seems to be afforded by sight.

Objection 3. Further, the beginning of friendship which is for the sake of the pleasant is principally sight. But pleasure is the cause of such friendship. Therefore the greatest pleasure seems to be afforded by sight.

On the contrary, The Philosopher says (Ethic. iii, 10), that the greatest pleasures are those which are afforded by the touch.

I answer that, As stated above (q. 25, a. 2, ad 1; q. 27, a. 4, ad 1), everything gives pleasure according as it is loved. Now, as stated in Metaph. i, 1, the senses are loved for two reasons: for the purpose of knowledge, and on account of their usefulness. Wherefore the senses afford pleasure in both these ways. But because it is proper to man to apprehend knowledge itself as something good, it follows that the former pleasures of the senses, i.e. those which arise from knowledge, are proper to man: whereas pleasures of the senses, as loved for their usefulness, are common to all animals.

If therefore we speak of that sensible pleasure by which reason of knowledge, it is evident that the sight affords greater pleasure than any other sense. On the other hand, if we speak of that sensible pleasure which is by reason of usefulness, then the greatest pleasure is afforded by the touch. For the usefulness of sensible things is gauged by their relation to the preservation of the animal’s nature. Now the sensible objects of touch bear the closest relation to this usefulness: for the touch takes cognizance of those things which are vi-

tal to an animal, namely, of things hot and cold and the like. Wherefore in this respect, the pleasures of touch are greater as being more closely related to the end. For this reason, too, other animals which do not experience sensible pleasure save by reason of usefulness, derive no pleasure from the other senses except as subordinated to the sensible objects of the touch: “for dogs do not take delight in the smell of hares, but in eating them; . . . nor does the lion feel pleasure in the lowing of an ox, but in devouring it” (Ethic. iii, 10).

Since then the pleasure afforded by touch is the greatest in respect of usefulness, and the pleasure afforded by sight the greatest in respect of knowledge; if anyone wish to compare these two, he will find that the pleasure of touch is, absolutely speaking, greater than the pleasure of sight, so far as the latter remains within the limits of sensible pleasure. Because it is evident that in everything, that which is natural is most powerful: and it is to these pleasures of the touch that the natural concupiscences, such as those of food, sexual union, and the like, are ordained. If, however, we consider the pleasures of sight, inasmuch sight is the handmaid of the mind, then the pleasures of sight are greater, forasmuch as intellectual pleasures are greater than sensible.

Reply to Objection 1. Joy, as stated above (a. 3), denotes pleasure of the soul; and this belongs principally to the sight. But natural pleasure belongs principally to the touch.

Reply to Objection 2. The sight is loved most, “on account of knowledge, because it helps us to distinguish many things,” as is stated in the same passage (Metaph. i, 1).

Reply to Objection 3. Pleasure causes carnal love in one way; the sight, in another. For pleasure, especially that which is afforded by the touch, is the final cause of the friendship which is for the sake of the pleasant: whereas the sight is a cause like that from which a movement has its beginning, inasmuch as the beholder on seeing the lovable object receives an impression of its image, which entices him to love it and to seek its delight.

* Metaph. i, 1

Objection 1. It would seem that no pleasure is not natural. For pleasure is to the emotions of the soul what repose is to bodies. But the appetite of a natural body does not repose save in a connatural place. Neither, therefore, can the repose of the animal appetite, which is pleasure, be elsewhere than in something connatural. Therefore no pleasure is non-natural.

Objection 2. Further, what is against nature is violent. But “whatever is violent causes grief” (Metaph. v, 5). Therefore nothing which is unnatural can give pleasure.

Objection 3. Further, the fact of being established in one’s own nature, if perceived, gives rise to pleasure, as is evident from the Philosopher’s definition quoted above (a. 1). But it is natural to every thing to be established in its nature; because natural movement tends to a natural end. Therefore every pleasure is natural.

On the contrary, The Philosopher says (Ethic. vii, 5,6) that some things are pleasant “not from nature but from disease.”

I answer that, We speak of that as being natural, which is in accord with nature, as stated in Phys. ii, 1. Now, in man, nature can be taken in two ways. First, inasmuch as intellect and reason is the principal part of man’s nature, since in respect thereof he has his own specific nature. And in this sense, those pleasures may be called natural to man, which are derived from things pertaining to man in respect of his reason: for instance, it is natural to man to take pleasure in contemplating

the truth and in doing works of virtue. Secondly, nature in man may be taken as contrasted with reason, and as denoting that which is common to man and other animals, especially that part of man which does not obey reason. And in this sense, that which pertains to the preservation of the body, either as regards the individual, as food, drink, sleep, and the like, or as regards the species, as sexual intercourse, are said to afford man natural pleasure. Under each kind of pleasures, we find some that are “not natural” speaking absolutely, and yet “connatural” in some respect. For it happens in an individual that some one of the natural principles of the species is corrupted, so that something which is contrary to the specific nature, becomes accidentally natural to this individual: thus it is natural to this hot water to give heat. Consequently it happens that something which is not natural to man, either in regard to reason, or in regard to the preservation of the body, becomes connatural to this individual man, on account of there being some corruption of nature in him. And this corruption may be either on the part of the body—from some ailment; thus to a man suffering from fever, sweet things seem bitter, and vice versa—or from an evil temperament; thus some take pleasure in eating earth and coals and the like; or on the part of the soul; thus from custom some take pleasure in cannibalism or in the unnatural intercourse of man and beast, or other such things, which are not in accord with human nature.

This suffices for the answers to the objections.

Objection 1. It would seem that one pleasure cannot be contrary to another. Because the passions of the soul derive their species and contrariety from their objects. Now the object of pleasure is the good. Since therefore good is not contrary to good, but “good is contrary to evil, and evil to good,” as stated in *Praedic.* viii; it seems that one pleasure is not contrary to another.

Objection 2. Further, to one thing there is one contrary, as is proved in *Metaph.* x, 4. But sadness is contrary to pleasure. Therefore pleasure is not contrary to pleasure.

Objection 3. Further, if one pleasure is contrary to another, this is only on account of the contrariety of the things which give pleasure. But this difference is material: whereas contrariety is a difference of form, as stated in *Metaph.* x, 4. Therefore there is no contrariety between one pleasure and another.

On the contrary, Things of the same genus that impede one another are contraries, as the Philosopher states (*Phys.* viii, 8). But some pleasures impede one another, as stated in *Ethic.* x, 5. Therefore some pleasures are contrary to one another.

I answer that, Pleasure, in the emotions of the soul, is likened to repose in natural bodies, as stated above (q. 23, a. 4). Now one repose is said to be contrary to another when they are in contrary termini; thus, “repose in a high place is contrary to repose in a low place” (*Phys.* v, 6). Wherefore it happens in the emotions of the soul that one pleasure is contrary to another.

Reply to Objection 1. This saying of the Philosopher is to be understood of good and evil as applied to virtues and vices: because one vice may be contrary to another vice, whereas no virtue can be contrary to another virtue. But in other things nothing prevents one good from being contrary to another, such as hot and cold, of which the former is good in relation to fire, the latter, in relation to water. And in this way one pleasure can be contrary to another. That this is impossible with regard to the good of virtue, is due to the fact that virtue’s good depends on fittingness in relation to some one thing—i.e. the reason.

Reply to Objection 2. Pleasure, in the emotions of the soul, is likened to natural repose in bodies: because its object is something suitable and connatural, so to speak. But sadness is like a violent repose; because its object is disagreeable to the animal appetite, just as the place of violent repose is disagreeable to the natural appetite. Now natural repose is contrary both to violent repose of the same body, and to the natural repose of another, as stated in *Phys.* v, 6. Wherefore pleasure is contrary to both to another pleasure and to sadness.

Reply to Objection 3. The things in which we take pleasure, since they are the objects of pleasure, cause not only a material, but also a formal difference, if the formality of pleasurable-ness be different. Because difference in the formal object causes a specific difference in acts and passions, as stated above (q. 23, Aa. 1,4; q. 30, a. 2).

FIRST PART OF THE SECOND PART, QUESTION 32

Of the Cause of Pleasure (In Eight Articles)

We must now consider the causes of pleasure: and under this head there are eight points of inquiry:

- (1) Whether operation is the proper cause of pleasure?
- (2) Whether movement is a cause of pleasure?
- (3) Whether hope and memory cause pleasure?
- (4) Whether sadness causes pleasure?
- (5) Whether the actions of others are a cause of pleasure to us?
- (6) Whether doing good to another is a cause of pleasure?
- (7) Whether likeness is a cause of pleasure?
- (8) Whether wonder is a cause of pleasure?

Whether operation is the proper cause of pleasure?

Ia IIae q. 32 a. 1

Objection 1. It would seem that operation is not the proper and first cause of pleasure. For, as the Philosopher says (Rhet. i, 11), “pleasure consists in a perception of the senses,” since knowledge is requisite for pleasure, as stated above (q. 31, a. 1). But the objects of operations are knowable before the operations themselves. Therefore operation is not the proper cause of pleasure.

Objection 2. Further, pleasure consists especially in an end gained: since it is this that is chiefly desired. But the end is not always an operation, but is sometimes the effect of the operation. Therefore operation is not the proper and direct cause of pleasure.

Objection 3. Further, leisure and rest consist in cessation from work: and they are objects of pleasure (Rhet. i, 11). Therefore operation is not the proper cause of pleasure.

On the contrary, The Philosopher says (Ethic. vii, 12,13; x, 4) that “pleasure is a connatural and uninterrupted operation.”

I answer that, As stated above (q. 31, a. 1), two things are requisite for pleasure: namely, the attainment of the suitable good, and knowledge of this attainment. Now each of these consists in a kind of operation: because actual knowledge is an operation; and the attainment of the suitable good is by means of an operation. Moreover, the proper operation itself is a suitable good. Wherefore every pleasure must needs be the result of some operation.

Reply to Objection 1. The objects of operations are not pleasurable save inasmuch as they are united to us; either by knowledge alone, as when we take pleasure in thinking of or looking at certain things; or in some other way in addition to knowledge; as when a man takes pleasure in knowing that he has something good—riches, honor, or the like; which would not be pleasurable unless they were apprehended as possessed. For as the Philosopher observes (Polit. ii, 2) “we take great pleasure in looking upon a thing as our own, by reason of the natural love we have for ourselves.” Now to have such like things is nothing else but to use them or to be able to use them: and this is through some operation. Wherefore it is evident that every pleasure is traced to some operation as its cause.

Reply to Objection 2. Even when it is not an operation, but the effect of an operation, that is the end, this effect is pleasant in so far as possessed or effected: and this implies use or operation.

Reply to Objection 3. Operations are pleasant, in so far as they are proportionate and connatural to the agent. Now, since human power is finite, operation is proportionate thereto according to a certain measure. Wherefore if it exceed that measure, it will be no longer proportionate or pleasant, but, on the contrary, painful and irksome. And in this sense, leisure and play and other things pertaining to repose, are pleasant, inasmuch as they banish sadness which results from labor.

Whether movement is a cause of pleasure?

Ia IIae q. 32 a. 2

Objection 1. It would seem that movement is not a cause of pleasure. Because, as stated above (q. 31, a. 1), the good which is obtained and is actually possessed, is the cause of pleasure: wherefore the Philosopher says (Ethic. vii, 12) that pleasure is not compared with generation, but with the operation of a thing already in existence. Now that which is being moved towards some-

thing has it not as yet; but, so to speak, is being generated in its regard, forasmuch as generation or corruption are united to every movement, as stated in Phys. viii, 3. Therefore movement is not a cause of pleasure.

Objection 2. Further, movement is the chief cause of toil and fatigue in our works. But operations through being toilsome and fatiguing are not pleasant but dis-

agreeable. Therefore movement is not a cause of pleasure.

Objection 3. Further, movement implies a certain innovation, which is the opposite of custom. But things “which we are accustomed to, are pleasant,” as the Philosopher says (Rhet. i, 11). Therefore movement is not a cause of pleasure.

On the contrary, Augustine says (Confess. viii, 3): “What means this, O Lord my God, whereas Thou art everlasting joy to Thyself, and some things around Thee evermore rejoice in Thee? What means this, that this portion of things ebbs and flows alternately displeased and reconciled?” From these words we gather that man rejoices and takes pleasure in some kind of alterations: and therefore movement seems to cause pleasure.

I answer that, Three things are requisite for pleasure; two, i.e. the one that is pleased and the pleasurable object conjoined to him; and a third, which is knowledge of this conjunction: and in respect of these three, movement is pleasant, as the Philosopher says (Ethic. vii, 14 and Rhetor. i, 11). For as far as we who feel pleasure are concerned, change is pleasant to us because our nature is changeable: for which reason that which is suitable to us at one time is not suitable at another; thus to warm himself at a fire is suitable to man in winter but not in summer. Again, on the part of the pleasing good which is united to us, change is pleasant. Because the continued action of an agent increases its effect: thus the longer a person remains near the fire, the more he is warmed and dried. Now the natural mode of being consists in a certain measure; and therefore when the continued presence of a pleasant object exceeds the measure of one’s natural mode of being, the removal of that object becomes pleasant. On the part of the knowledge itself (change becomes pleasant), because man desires to know something whole and perfect: when therefore a thing cannot be apprehended all at once as a whole, change in such a thing is pleasant, so

that one part may pass and another succeed, and thus the whole be perceived. Hence Augustine says (Confess. iv, 11): “Thou wouldst not have the syllables stay, but fly away, that others may come, and thou hear the whole. And so whenever any one thing is made up of many, all of which do not exist together, all would please collectively more than they do severally, if all could be perceived collectively.”

If therefore there be any thing, whose nature is unchangeable; the natural mode of whose being cannot be exceeded by the continuation of any pleasing object; and which can behold the whole object of its delight at once—to such a one change will afford no delight. And the more any pleasures approach to this, the more are they capable of being continual.

Reply to Objection 1. Although the subject of movement has not yet perfectly that to which it is moved, nevertheless it is beginning to have something thereof: and in this respect movement itself has something of pleasure. But it falls short of the perfection of pleasure; because the more perfect pleasures regard things that are unchangeable. Moreover movement becomes the cause of pleasure, in so far as thereby something which previously was unsuitable, becomes suitable or ceases to be, as stated above.

Reply to Objection 2. Movement causes toil and fatigue, when it exceeds our natural aptitude. It is not thus that it causes pleasure, but by removing the obstacles to our natural aptitude.

Reply to Objection 3. What is customary becomes pleasant, in so far as it becomes natural: because custom is like a second nature. But the movement which gives pleasure is not that which departs from custom, but rather that which prevents the corruption of the natural mode of being, that might result from continued operation. And thus from the same cause of connaturalness, both custom and movement become pleasant.

Whether hope and memory causes pleasure?

Ia IIae q. 32 a. 3

Objection 1. It would seem that memory and hope do not cause pleasure. Because pleasure is caused by present good, as Damascene says (De Fide Orth. ii, 12). But hope and memory regard what is absent: since memory is of the past, and hope of the future. Therefore memory and hope do not cause pleasure.

Objection 2. Further, the same thing is not the cause of contraries. But hope causes affliction, according to Prov. 13:12: “Hope that is deferred afflicteth the soul.” Therefore hope does not cause pleasure.

Objection 3. Further, just as hope agrees with pleasure in regarding good, so also do desire and love. Therefore hope should not be assigned as a cause of pleasure, any more than desire or love.

On the contrary, It is written (Rom. 12:12): “Rejoicing in hope”; and (Ps. 76:4): “I remembered God,

and was delighted.”

I answer that, Pleasure is caused by the presence of suitable good, in so far as it is felt, or perceived in any way. Now a thing is present to us in two ways. First, in knowledge—i.e. according as the thing known is in the knower by its likeness; secondly, in reality—i.e. according as one thing is in real conjunction of any kind with another, either actually or potentially. And since real conjunction is greater than conjunction by likeness, which is the conjunction of knowledge; and again, since actual is greater than potential conjunction: therefore the greatest pleasure is that which arises from sensation which requires the presence of the sensible object. The second place belongs to the pleasure of hope, wherein there is pleasurable conjunction, not only in respect of apprehension, but also in respect of the faculty or power

of obtaining the pleasurable object. The third place belongs to the pleasure of memory, which has only the conjunction of apprehension.

Reply to Objection 1. Hope and memory are indeed of things which, absolutely speaking, are absent: and yet those are, after a fashion, present, i.e. either according to apprehension only; or according to apprehension and possibility, at least supposed, of attainment.

Reply to Objection 2. Nothing prevents the same thing, in different ways, being the cause of contraries. And so hope, inasmuch as it implies a present appraising of a future good, causes pleasure; whereas, inasmuch as it implies absence of that good, it causes affliction.

tion.

Reply to Objection 3. Love and concupiscence also cause pleasure. For everything that is loved becomes pleasing to the lover, since love is a kind of union or connaturalness of lover and beloved. In like manner every object of desire is pleasing to the one that desires, since desire is chiefly a craving for pleasure. However hope, as implying a certainty of the real presence of the pleasing good, that is not implied either by love or by concupiscence, is reckoned in preference to them as causing pleasure; and also in preference to memory, which is of that which has already passed away.

Whether sadness causes pleasure?

Ia IIae q. 32 a. 4

Objection 1. It would seem that sadness does not cause pleasure. For nothing causes its own contrary. But sadness is contrary to pleasure. Therefore it does not cause it.

Objection 2. Further, contraries have contrary effects. But pleasures, when called to mind, cause pleasure. Therefore sad things, when remembered, cause sorrow and not pleasure.

Objection 3. Further, as sadness is to pleasure, so is hatred to love. But hatred does not cause love, but rather the other way about, as stated above (q. 29, a. 2). Therefore sadness does not cause pleasure.

On the contrary, It is written (Ps. 41:4): "My tears have been my bread day and night": where bread denotes the refreshment of pleasure. Therefore tears, which arise from sadness, can give pleasure.

I answer that, Sadness may be considered in two ways: as existing actually, and as existing in the memory: and in both ways sadness can cause pleasure. Because sadness, as actually existing, causes pleasure, inasmuch as it brings to mind that which is loved, the absence of which causes sadness; and yet the mere thought of it gives pleasure. The recollection of sadness becomes a cause of pleasure, on account of the deliverance which ensued: because absence of evil is

looked upon as something good; wherefore so far as a man thinks that he has been delivered from that which caused him sorrow and pain, so much reason has he to rejoice. Hence Augustine says in *De Civ. Dei* xxii, 31* that "oftentimes in joy we call to mind sad things. . . and in the season of health we recall past pains without feeling pain. . . and in proportion are the more filled with joy and gladness": and again (*Confess.* viii, 3) he says that "the more peril there was in the battle, so much the more joy will there be in the triumph."

Reply to Objection 1. Sometimes accidentally a thing is the cause of its contrary: thus "that which is cold sometimes causes heat," as stated in *Phys.* viii, 1. In like manner sadness is the accidental cause of pleasure, in so far as it gives rise to the apprehension of something pleasant.

Reply to Objection 2. Sad things, called to mind, cause pleasure, not in so far as they are sad and contrary to pleasant things; but in so far as man is delivered from them. In like manner the recollection of pleasant things, by reason of these being lost, may cause sadness.

Reply to Objection 3. Hatred also can be the accidental cause of love: i.e. so far as some love one another, inasmuch as they agree in hating one and the same thing.

Whether the actions of others are a cause of pleasure to us?

Ia IIae q. 32 a. 5

Objection 1. It would seem that the actions of others are not a cause of pleasure to us. Because the cause of pleasure is our own good when conjoined to us. But the actions of others are not conjoined to us. Therefore they are not a cause of pleasure to us.

Objection 2. Further, the action is the agent's own good. If, therefore, the actions of others are a cause of pleasure to us, for the same reason all goods belonging to others will be pleasing to us: which is evidently untrue.

Objection 3. Further, action is pleasant through proceeding from an innate habit; hence it is stated in

Ethic. ii, 3 that "we must reckon the pleasure which follows after action, as being the sign of a habit existing in us." But the actions of others do not proceed from habits existing in us, but, sometimes, from habits existing in the agents. Therefore the actions of others are not pleasing to us, but to the agents themselves.

On the contrary, It is written in the second canonical epistle of John (verse 4): "I was exceeding glad that I found thy children walking in truth."

I answer that, As stated above (a. 1; q. 31, a. 1), two things are requisite for pleasure, namely, the attainment of one's proper good, and the knowledge of having

* Gregory, *Moral.* iv.

obtained it. Wherefore the action of another may cause pleasure to us in three ways. First, from the fact that we obtain some good through the action of another. And in this way, the actions of those who do some good to us, are pleasing to us: since it is pleasant to be benefited by another. Secondly, from the fact that another's action makes us to know or appreciate our own good: and for this reason men take pleasure in being praised or honored by others, because, to wit, they thus become aware of some good existing in themselves. And since this appreciation receives greater weight from the testimony of good and wise men, hence men take greater pleasure in being praised and honored by them. And because a flatterer appears to praise, therefore flattery is pleasing to some. And as love is for something good, while admiration is for something great, so it is pleasant to be loved and admired by others, inasmuch as a man thus becomes aware of his own goodness or greatness, through their giving pleasure to others. Thirdly, from the fact that another's actions, if they be good, are reckoned as one's

own good, by reason of the power of love, which makes a man to regard his friend as one with himself. And on account of hatred, which makes one to reckon another's good as being in opposition to oneself, the evil action of an enemy becomes an object of pleasure: whence it is written (1 Cor. 13:6) that charity "rejoiceth not in iniquity, but rejoiceth with the truth."

Reply to Objection 1. Another's action may be conjoined to me, either by its effect, as in the first way, or by knowledge, as in the second way; or by affection, as in the third way.

Reply to Objection 2. This argument avails for the third mode, but not for the first two.

Reply to Objection 3. Although the actions of another do not proceed from habits that are in me, yet they either produce in me something that gives pleasure; or they make me appreciate or know a habit of mind; or they proceed from the habit of one who is united to me by love.

Whether doing good to another is a cause of pleasure?

Ia IIae q. 32 a. 6

Objection 1. It would seem that doing good to another is not a cause of pleasure. Because pleasure is caused by one's obtaining one's proper good, as stated above (Aa. 1,5; q. 31, a. 1). But doing good pertains not to the obtaining but to the spending of one's proper good. Therefore it seems to be the cause of sadness rather than of pleasure.

Objection 2. Further, the Philosopher says (Ethic. iv, 1) that "illiberality is more connatural to man than prodigality." Now it is a mark of prodigality to do good to others; while it is a mark of illiberality to desist from doing good. Since therefore everyone takes pleasure in a connatural operation, as stated in Ethic. vii, 14 and x, 4, it seems that doing good to others is not a cause of pleasure.

Objection 3. Further, contrary effects proceed from contrary causes. But man takes a natural pleasure in certain kinds of ill-doing, such as overcoming, contradicting or scolding others, or, if he be angry, in punishing them, as the Philosopher says (Rhet. i, 11). Therefore doing good to others is a cause of sadness rather than pleasure.

On the contrary, The Philosopher says (Polit. ii, 2) that "it is most pleasant to give presents or assistance to friends and strangers."

I answer that, Doing good to another may give pleasure in three ways. First, in consideration of the effect, which is the good conferred on another. In this respect, inasmuch as through being united to others by love, we look upon their good as being our own, we take pleasure in the good we do to others, especially to our friends, as in our own good. Secondly, in consideration of the end; as when a man, from doing good to another, hopes to get some good for himself, either from God

or from man: for hope is a cause of pleasure. Thirdly, in consideration of the principle: and thus, doing good to another, can give pleasure in respect of a threefold principle. One is the faculty of doing good: and in this regard, doing good to another becomes pleasant, in so far as it arouses in man an imagination of abundant good existing in him, whereof he is able to give others a share. Wherefore men take pleasure in their children, and in their own works, as being things on which they bestow a share of their own good. Another principle is man's habitual inclination to do good, by reason of which doing good becomes connatural to him: for which reason the liberal man takes pleasure in giving to others. The third principle is the motive: for instance when a man is moved by one whom he loves, to do good to someone: for whatever we do or suffer for a friend is pleasant, because love is the principal cause of pleasure.

Reply to Objection 1. Spending gives pleasure as showing forth one's good. But in so far as it empties us of our own good it may be a cause of sadness; for instance when it is excessive.

Reply to Objection 2. Prodigality is an excessive spending, which is unnatural: wherefore prodigality is said to be contrary to nature.

Reply to Objection 3. To overcome, to contradict, and to punish, give pleasure, not as tending to another's ill, but as pertaining to one's own good, which man loves more than he hates another's ill. For it is naturally pleasant to overcome, inasmuch as it makes a man to appreciate his own superiority. Wherefore all those games in which there is a striving for the mastery, and a possibility of winning it, afford the greatest pleasure: and speaking generally all contests, in so far as they admit hope of victory. To contradict and to scold can

give pleasure in two ways. First, as making man imagine himself to be wise and excellent; since it belongs to wise men and elders to reprove and to scold. Secondly, in so far as by scolding and reproving, one does good to another: for this gives one pleasure, as stated above. It is pleasant to an angry man to punish, in so far as he thinks himself to be removing an apparent slight, which

seems to be due to a previous hurt: for when a man is hurt by another, he seems to be slighted thereby; and therefore he wishes to be quit of this slight by paying back the hurt. And thus it is clear that doing good to another may be of itself pleasant: whereas doing evil to another is not pleasant, except in so far as it seems to affect one's own good.

Whether likeness is a cause of pleasure?

Ia IIae q. 32 a. 7

Objection 1. It would seem that likeness is not a cause of pleasure. Because ruling and presiding seem to imply a certain unlikeness. But "it is natural to take pleasure in ruling and presiding," as stated in Rhetor. i, 11. Therefore unlikeness, rather than likeness, is a cause of pleasure.

Objection 2. Further, nothing is more unlike pleasure than sorrow. But those who are burdened by sorrow are most inclined to seek pleasures, as the Philosopher says (Ethic. vii, 14). Therefore unlikeness, rather than likeness, is a cause of pleasure.

Objection 3. Further, those who are satiated with certain delights, derive not pleasure but disgust from them; as when one is satiated with food. Therefore likeness is not a cause of pleasure.

On the contrary, Likeness is a cause of love, as above stated (q. 27, a. 3): and love is the cause of pleasure. Therefore likeness is a cause of pleasure.

I answer that, Likeness is a kind of unity; hence that which is like us, as being one with us, causes pleasure; just as it causes love, as stated above (q. 27, a. 3). And if that which is like us does not hurt our own good, but increase it, it is pleasurable simply; for instance one man in respect of another, one youth in relation to another. But if it be hurtful to our own good, thus accidentally it causes disgust or sadness, not as being like and one with us, but as hurtful to that which is yet more one with us.

Now it happens in two ways that something like is hurtful to our own good. First, by destroying the measure of our own good, by a kind of excess; because good, especially bodily good, as health, is conditioned by a certain measure: wherefore superfluous good or any bodily pleasure, causes disgust. Secondly, by being directly contrary to one's own good: thus a potter

dislikes other potters, not because they are potters, but because they deprive him of his own excellence or profits, which he seeks as his own good.

Reply to Objection 1. Since ruler and subject are in communion with one another, there is a certain likeness between them: but this likeness is conditioned by a certain superiority, since ruling and presiding pertain to the excellence of a man's own good: because they belong to men who are wise and better than others; the result being that they give man an idea of his own excellence. Another reason is that by ruling and presiding, a man does good to others, which is pleasant.

Reply to Objection 2. That which gives pleasure to the sorrowful man, though it be unlike sorrow, bears some likeness to the man that is sorrowful: because sorrows are contrary to his own good. Wherefore the sorrowful man seeks pleasure as making for his own good, in so far as it is a remedy for its contrary. And this is why bodily pleasures, which are contrary to certain sorrows, are more sought than intellectual pleasures, which have no contrary sorrow, as we shall state later on (q. 35, a. 5). And this explains why all animals naturally desire pleasure: because animals ever work through sense and movement. For this reason also young people are most inclined to seek pleasures; on account of the many changes to which they are subject, while yet growing. Moreover this is why the melancholic has a strong desire for pleasures, in order to drive away sorrow: because his "body is corroded by a base humor," as stated in Ethic. vii, 14.

Reply to Objection 3. Bodily goods are conditioned by a certain fixed measure: wherefore surfeit of such things destroys the proper good, and consequently gives rise to disgust and sorrow, through being contrary to the proper good of man.

Whether wonder is a cause of pleasure?

Ia IIae q. 32 a. 8

Objection 1. It would seem that wonder is not a cause of pleasure. Because wonder is the act of one who is ignorant of the nature of something, as Damascene says. But knowledge, rather than ignorance, is a cause of pleasure. Therefore wonder is not a cause of pleasure.

Objection 2. Further, wonder is the beginning of wisdom, being as it were, the road to the search of

truth, as stated in the beginning of Metaph. i, 2. But "it is more pleasant to think of what we know, than to seek what we know not," as the Philosopher says (Ethic. x, 7): since in the latter case we encounter difficulties and hindrances, in the former not; while pleasure arises from an operation which is unhindered, as stated in Ethic. vii, 12,13. Therefore wonder hinders rather than causes pleasure.

Objection 3. Further, everyone takes pleasure in what he is accustomed to: wherefore the actions of habits acquired by custom, are pleasant. But “we wonder at what is unwonted,” as Augustine says (Tract. xxiv in Joan.). Therefore wonder is contrary to the cause of pleasure.

On the contrary, The Philosopher says (Rhet. i, 11) that wonder is the cause of pleasure.

I answer that, It is pleasant to get what one desires, as stated above (q. 23, a. 4): and therefore the greater the desire for the thing loved, the greater the pleasure when it is attained: indeed the very increase of desire brings with it an increase of pleasure, according as it gives rise to the hope of obtaining that which is loved, since it was stated above (a. 3, ad 3) that desire resulting from hope is a cause of pleasure. Now wonder is a kind of desire for knowledge; a desire which comes to man when he sees an effect of which the cause either is unknown to him, or surpasses his knowledge or faculty of understanding. Consequently wonder is a cause of pleasure, in so far as it includes a hope of getting the knowledge which one desires to have. For this reason whatever is wonderful is pleasing, for instance things that are scarce. Also, representations of things, even of those which are not pleasant in themselves, give rise to pleasure; for the soul rejoices in comparing one thing with another, because comparison of one thing with another is the proper and connatural act of the reason, as the Philosopher says (Poet. iv). This again is why “it is

more delightful to be delivered from great danger, because it is something wonderful,” as stated in Rhetor. i, 11.

Reply to Objection 1. Wonder gives pleasure, not because it implies ignorance, but in so far as it includes the desire of learning the cause, and in so far as the wonderer learns something new, i.e. that the cause is other than he had thought it to be.*

Reply to Objection 2. Pleasure includes two things; rest in the good, and perception of this rest. As to the former therefore, since it is more perfect to contemplate the known truth, than to seek for the unknown, the contemplation of what we know, is in itself more pleasing than the research of what we do not know. Nevertheless, as to the second, it happens that research is sometimes more pleasing accidentally, in so far as it proceeds from a greater desire: for greater desire is awakened when we are conscious of our ignorance. This is why man takes the greatest pleasure in finding or learning things for the first time.

Reply to Objection 3. It is pleasant to do what we are wont to do, inasmuch as this is connatural to us, as it were. And yet things that are of rare occurrence can be pleasant, either as regards knowledge, from the fact that we desire to know something about them, in so far as they are wonderful; or as regards action, from the fact that “the mind is more inclined by desire to act intensely in things that are new,” as stated in Ethic. x, 4, since more perfect operation causes more perfect pleasure.

* According to another reading:—that he is other than he thought himself to be.

Objection 1. It would seem that operation is not the proper and first cause of pleasure. For, as the Philosopher says (Rhet. i, 11), “pleasure consists in a perception of the senses,” since knowledge is requisite for pleasure, as stated above (q. 31, a. 1). But the objects of operations are knowable before the operations themselves. Therefore operation is not the proper cause of pleasure.

Objection 2. Further, pleasure consists especially in an end gained: since it is this that is chiefly desired. But the end is not always an operation, but is sometimes the effect of the operation. Therefore operation is not the proper and direct cause of pleasure.

Objection 3. Further, leisure and rest consist in cessation from work: and they are objects of pleasure (Rhet. i, 11). Therefore operation is not the proper cause of pleasure.

On the contrary, The Philosopher says (Ethic. vii, 12,13; x, 4) that “pleasure is a connatural and uninterrupted operation.”

I answer that, As stated above (q. 31, a. 1), two things are requisite for pleasure: namely, the attainment of the suitable good, and knowledge of this attainment. Now each of these consists in a kind of operation: because actual knowledge is an operation; and the attainment of the suitable good is by means of an operation. Moreover, the proper operation itself is a suitable good. Wherefore every pleasure must needs be the result of some operation.

Reply to Objection 1. The objects of operations are not pleasurable save inasmuch as they are united to us; either by knowledge alone, as when we take pleasure in thinking of or looking at certain things; or in some other way in addition to knowledge; as when a man takes pleasure in knowing that he has something good—riches, honor, or the like; which would not be pleasurable unless they were apprehended as possessed. For as the Philosopher observes (Polit. ii, 2) “we take great pleasure in looking upon a thing as our own, by reason of the natural love we have for ourselves.” Now to have such like things is nothing else but to use them or to be able to use them: and this is through some operation. Wherefore it is evident that every pleasure is traced to some operation as its cause.

Reply to Objection 2. Even when it is not an operation, but the effect of an operation, that is the end, this effect is pleasant in so far as possessed or effected: and this implies use or operation.

Reply to Objection 3. Operations are pleasant, in so far as they are proportionate and connatural to the agent. Now, since human power is finite, operation is proportionate thereto according to a certain measure. Wherefore if it exceed that measure, it will be no longer proportionate or pleasant, but, on the contrary, painful and irksome. And in this sense, leisure and play and other things pertaining to repose, are pleasant, inasmuch as they banish sadness which results from labor.

Objection 1. It would seem that movement is not a cause of pleasure. Because, as stated above (q. 31, a. 1), the good which is obtained and is actually possessed, is the cause of pleasure: wherefore the Philosopher says (*Ethic.* vii, 12) that pleasure is not compared with generation, but with the operation of a thing already in existence. Now that which is being moved towards something has it not as yet; but, so to speak, is being generated in its regard, forasmuch as generation or corruption are united to every movement, as stated in *Phys.* viii, 3. Therefore movement is not a cause of pleasure.

Objection 2. Further, movement is the chief cause of toil and fatigue in our works. But operations through being toilsome and fatiguing are not pleasant but disagreeable. Therefore movement is not a cause of pleasure.

Objection 3. Further, movement implies a certain innovation, which is the opposite of custom. But things “which we are accustomed to, are pleasant,” as the Philosopher says (*Rhet.* i, 11). Therefore movement is not a cause of pleasure.

On the contrary, Augustine says (*Confess.* viii, 3): “What means this, O Lord my God, whereas Thou art everlasting joy to Thyself, and some things around Thee evermore rejoice in Thee? What means this, that this portion of things ebbs and flows alternately displeased and reconciled?” From these words we gather that man rejoices and takes pleasure in some kind of alterations: and therefore movement seems to cause pleasure.

I answer that, Three things are requisite for pleasure; two, i.e. the one that is pleased and the pleasurable object conjoined to him; and a third, which is knowledge of this conjunction: and in respect of these three, movement is pleasant, as the Philosopher says (*Ethic.* vii, 14 and *Rhetor.* i, 11). For as far as we who feel pleasure are concerned, change is pleasant to us because our nature is changeable: for which reason that which is suitable to us at one time is not suitable at another; thus to warm himself at a fire is suitable to man in winter but not in summer. Again, on the part of the pleasing good which is united to us, change is pleasant. Because the continued action of an agent increases its effect: thus the longer a person remains near the fire, the more he is warmed and dried. Now the natural mode of being consists in a certain measure; and

therefore when the continued presence of a pleasant object exceeds the measure of one’s natural mode of being, the removal of that object becomes pleasant. On the part of the knowledge itself (change becomes pleasant), because man desires to know something whole and perfect: when therefore a thing cannot be apprehended all at once as a whole, change in such a thing is pleasant, so that one part may pass and another succeed, and thus the whole be perceived. Hence Augustine says (*Confess.* iv, 11): “Thou wouldst not have the syllables stay, but fly away, that others may come, and thou hear the whole. And so whenever any one thing is made up of many, all of which do not exist together, all would please collectively more than they do severally, if all could be perceived collectively.”

If therefore there be any thing, whose nature is unchangeable; the natural mode of whose being cannot be exceeded by the continuation of any pleasing object; and which can behold the whole object of its delight at once—to such a one change will afford no delight. And the more any pleasures approach to this, the more are they capable of being continual.

Reply to Objection 1. Although the subject of movement has not yet perfectly that to which it is moved, nevertheless it is beginning to have something thereof: and in this respect movement itself has something of pleasure. But it falls short of the perfection of pleasure; because the more perfect pleasures regard things that are unchangeable. Moreover movement becomes the cause of pleasure, in so far as thereby something which previously was unsuitable, becomes suitable or ceases to be, as stated above.

Reply to Objection 2. Movement causes toil and fatigue, when it exceeds our natural aptitude. It is not thus that it causes pleasure, but by removing the obstacles to our natural aptitude.

Reply to Objection 3. What is customary becomes pleasant, in so far as it becomes natural: because custom is like a second nature. But the movement which gives pleasure is not that which departs from custom, but rather that which prevents the corruption of the natural mode of being, that might result from continued operation. And thus from the same cause of connaturalness, both custom and movement become pleasant.

Objection 1. It would seem that memory and hope do not cause pleasure. Because pleasure is caused by present good, as Damascene says (*De Fide Orth.* ii, 12). But hope and memory regard what is absent: since memory is of the past, and hope of the future. Therefore memory and hope do not cause pleasure.

Objection 2. Further, the same thing is not the cause of contraries. But hope causes affliction, according to Prov. 13:12: “Hope that is deferred afflicteth the soul.” Therefore hope does not cause pleasure.

Objection 3. Further, just as hope agrees with pleasure in regarding good, so also do desire and love. Therefore hope should not be assigned as a cause of pleasure, any more than desire or love.

On the contrary, It is written (Rom. 12:12): “Rejoicing in hope”; and (Ps. 76:4): “I remembered God, and was delighted.”

I answer that, Pleasure is caused by the presence of suitable good, in so far as it is felt, or perceived in any way. Now a thing is present to us in two ways. First, in knowledge—i.e. according as the thing known is in the knower by its likeness; secondly, in reality—i.e. according as one thing is in real conjunction of any kind with another, either actually or potentially. And since real conjunction is greater than conjunction by likeness, which is the conjunction of knowledge; and again, since actual is greater than potential conjunction: therefore the greatest pleasure is that which arises from sensation which requires the presence of the sensible object. The

second place belongs to the pleasure of hope, wherein there is pleasurable conjunction, not only in respect of apprehension, but also in respect of the faculty or power of obtaining the pleasurable object. The third place belongs to the pleasure of memory, which has only the conjunction of apprehension.

Reply to Objection 1. Hope and memory are indeed of things which, absolutely speaking, are absent: and yet those are, after a fashion, present, i.e. either according to apprehension only; or according to apprehension and possibility, at least supposed, of attainment.

Reply to Objection 2. Nothing prevents the same thing, in different ways, being the cause of contraries. And so hope, inasmuch as it implies a present appraising of a future good, causes pleasure; whereas, inasmuch as it implies absence of that good, it causes affliction.

Reply to Objection 3. Love and concupiscence also cause pleasure. For everything that is loved becomes pleasing to the lover, since love is a kind of union or connaturalness of lover and beloved. In like manner every object of desire is pleasing to the one that desires, since desire is chiefly a craving for pleasure. However hope, as implying a certainty of the real presence of the pleasing good, that is not implied either by love or by concupiscence, is reckoned in preference to them as causing pleasure; and also in preference to memory, which is of that which has already passed away.

Objection 1. It would seem that sadness does not cause pleasure. For nothing causes its own contrary. But sadness is contrary to pleasure. Therefore it does not cause it.

Objection 2. Further, contraries have contrary effects. But pleasures, when called to mind, cause pleasure. Therefore sad things, when remembered, cause sorrow and not pleasure.

Objection 3. Further, as sadness is to pleasure, so is hatred to love. But hatred does not cause love, but rather the other way about, as stated above (q. 29, a. 2). Therefore sadness does not cause pleasure.

On the contrary, It is written (Ps. 41:4): “My tears have been my bread day and night”: where bread denotes the refreshment of pleasure. Therefore tears, which arise from sadness, can give pleasure.

I answer that, Sadness may be considered in two ways: as existing actually, and as existing in the memory: and in both ways sadness can cause pleasure. Because sadness, as actually existing, causes pleasure, inasmuch as it brings to mind that which is loved, the absence of which causes sadness; and yet the mere thought of it gives pleasure. The recollection of sadness becomes a cause of pleasure, on account of the deliverance which ensued: because absence of evil is

looked upon as something good; wherefore so far as a man thinks that he has been delivered from that which caused him sorrow and pain, so much reason has he to rejoice. Hence Augustine says in *De Civ. Dei* xxii, 31* that “oftentimes in joy we call to mind sad things. . . and in the season of health we recall past pains without feeling pain. . . and in proportion are the more filled with joy and gladness”: and again (*Confess.* viii, 3) he says that “the more peril there was in the battle, so much the more joy will there be in the triumph.”

Reply to Objection 1. Sometimes accidentally a thing is the cause of its contrary: thus “that which is cold sometimes causes heat,” as stated in *Phys.* viii, 1. In like manner sadness is the accidental cause of pleasure, in so far as it gives rise to the apprehension of something pleasant.

Reply to Objection 2. Sad things, called to mind, cause pleasure, not in so far as they are sad and contrary to pleasant things; but in so far as man is delivered from them. In like manner the recollection of pleasant things, by reason of these being lost, may cause sadness.

Reply to Objection 3. Hatred also can be the accidental cause of love: i.e. so far as some love one another, inasmuch as they agree in hating one and the same thing.

* Gregory, *Moral.* iv.

Objection 1. It would seem that the actions of others are not a cause of pleasure to us. Because the cause of pleasure is our own good when conjoined to us. But the actions of others are not conjoined to us. Therefore they are not a cause of pleasure to us.

Objection 2. Further, the action is the agent's own good. If, therefore, the actions of others are a cause of pleasure to us, for the same reason all goods belonging to others will be pleasing to us: which is evidently untrue.

Objection 3. Further, action is pleasant through proceeding from an innate habit; hence it is stated in *Ethic.* ii, 3 that "we must reckon the pleasure which follows after action, as being the sign of a habit existing in us." But the actions of others do not proceed from habits existing in us, but, sometimes, from habits existing in the agents. Therefore the actions of others are not pleasing to us, but to the agents themselves.

On the contrary, It is written in the second canonical epistle of John (verse 4): "I was exceeding glad that I found thy children walking in truth."

I answer that, As stated above (a. 1; q. 31, a. 1), two things are requisite for pleasure, namely, the attainment of one's proper good, and the knowledge of having obtained it. Wherefore the action of another may cause pleasure to us in three ways. First, from the fact that we obtain some good through the action of another. And in this way, the actions of those who do some good to us, are pleasing to us: since it is pleasant to be benefited by another. Secondly, from the fact that another's action makes us to know or appreciate our own good: and for this reason men take pleasure in being praised or hon-

ored by others, because, to wit, they thus become aware of some good existing in themselves. And since this appreciation receives greater weight from the testimony of good and wise men, hence men take greater pleasure in being praised and honored by them. And because a flatterer appears to praise, therefore flattery is pleasing to some. And as love is for something good, while admiration is for something great, so it is pleasant to be loved and admired by others, inasmuch as a man thus becomes aware of his own goodness or greatness, through their giving pleasure to others. Thirdly, from the fact that another's actions, if they be good, are reckoned as one's own good, by reason of the power of love, which makes a man to regard his friend as one with himself. And on account of hatred, which makes one to reckon another's good as being in opposition to oneself, the evil action of an enemy becomes an object of pleasure: whence it is written (1 Cor. 13:6) that charity "rejoiceth not in iniquity, but rejoiceth with the truth."

Reply to Objection 1. Another's action may be conjoined to me, either by its effect, as in the first way, or by knowledge, as in the second way; or by affection, as in the third way.

Reply to Objection 2. This argument avails for the third mode, but not for the first two.

Reply to Objection 3. Although the actions of another do not proceed from habits that are in me, yet they either produce in me something that gives pleasure; or they make me appreciate or know a habit of mind; or they proceed from the habit of one who is united to me by love.

Objection 1. It would seem that doing good to another is not a cause of pleasure. Because pleasure is caused by one's obtaining one's proper good, as stated above (Aa. 1,5; q. 31, a. 1). But doing good pertains not to the obtaining but to the spending of one's proper good. Therefore it seems to be the cause of sadness rather than of pleasure.

Objection 2. Further, the Philosopher says (Ethic. iv, 1) that "illiberality is more connatural to man than prodigality." Now it is a mark of prodigality to do good to others; while it is a mark of illiberality to desist from doing good. Since therefore everyone takes pleasure in a connatural operation, as stated in Ethic. vii, 14 and x, 4, it seems that doing good to others is not a cause of pleasure.

Objection 3. Further, contrary effects proceed from contrary causes. But man takes a natural pleasure in certain kinds of ill-doing, such as overcoming, contradicting or scolding others, or, if he be angry, in punishing them, as the Philosopher says (Rhet. i, 11). Therefore doing good to others is a cause of sadness rather than pleasure.

On the contrary, The Philosopher says (Polit. ii, 2) that "it is most pleasant to give presents or assistance to friends and strangers."

I answer that, Doing good to another may give pleasure in three ways. First, in consideration of the effect, which is the good conferred on another. In this respect, inasmuch as through being united to others by love, we look upon their good as being our own, we take pleasure in the good we do to others, especially to our friends, as in our own good. Secondly, in consideration of the end; as when a man, from doing good to another, hopes to get some good for himself, either from God or from man: for hope is a cause of pleasure. Thirdly, in consideration of the principle: and thus, doing good to another, can give pleasure in respect of a threefold principle. One is the faculty of doing good: and in this regard, doing good to another becomes pleasant, in so far as it arouses in man an imagination of abundant good existing in him, whereof he is able to give others a share.

Wherefore men take pleasure in their children, and in their own works, as being things on which they bestow a share of their own good. Another principle is man's habitual inclination to do good, by reason of which doing good becomes connatural to him: for which reason the liberal man takes pleasure in giving to others. The third principle is the motive: for instance when a man is moved by one whom he loves, to do good to someone: for whatever we do or suffer for a friend is pleasant, because love is the principal cause of pleasure.

Reply to Objection 1. Spending gives pleasure as showing forth one's good. But in so far as it empties us of our own good it may be a cause of sadness; for instance when it is excessive.

Reply to Objection 2. Prodigality is an excessive spending, which is unnatural: wherefore prodigality is said to be contrary to nature.

Reply to Objection 3. To overcome, to contradict, and to punish, give pleasure, not as tending to another's ill, but as pertaining to one's own good, which man loves more than he hates another's ill. For it is naturally pleasant to overcome, inasmuch as it makes a man to appreciate his own superiority. Wherefore all those games in which there is a striving for the mastery, and a possibility of winning it, afford the greatest pleasure: and speaking generally all contests, in so far as they admit hope of victory. To contradict and to scold can give pleasure in two ways. First, as making man imagine himself to be wise and excellent; since it belongs to wise men and elders to reprove and to scold. Secondly, in so far as by scolding and reproving, one does good to another: for this gives one pleasure, as stated above. It is pleasant to an angry man to punish, in so far as he thinks himself to be removing an apparent slight, which seems to be due to a previous hurt: for when a man is hurt by another, he seems to be slighted thereby; and therefore he wishes to be quit of this slight by paying back the hurt. And thus it is clear that doing good to another may be of itself pleasant: whereas doing evil to another is not pleasant, except in so far as it seems to affect one's own good.

Objection 1. It would seem that likeness is not a cause of pleasure. Because ruling and presiding seem to imply a certain unlikeness. But “it is natural to take pleasure in ruling and presiding,” as stated in Rhetor. i, 11. Therefore unlikeness, rather than likeness, is a cause of pleasure.

Objection 2. Further, nothing is more unlike pleasure than sorrow. But those who are burdened by sorrow are most inclined to seek pleasures, as the Philosopher says (Ethic. vii, 14). Therefore unlikeness, rather than likeness, is a cause of pleasure.

Objection 3. Further, those who are satiated with certain delights, derive not pleasure but disgust from them; as when one is satiated with food. Therefore likeness is not a cause of pleasure.

On the contrary, Likeness is a cause of love, as above stated (q. 27, a. 3): and love is the cause of pleasure. Therefore likeness is a cause of pleasure.

I answer that, Likeness is a kind of unity; hence that which is like us, as being one with us, causes pleasure; just as it causes love, as stated above (q. 27, a. 3). And if that which is like us does not hurt our own good, but increase it, it is pleasurable simply; for instance one man in respect of another, one youth in relation to another. But if it be hurtful to our own good, thus accidentally it causes disgust or sadness, not as being like and one with us, but as hurtful to that which is yet more one with us.

Now it happens in two ways that something like is hurtful to our own good. First, by destroying the measure of our own good, by a kind of excess; because good, especially bodily good, as health, is conditioned by a certain measure: wherefore superfluous good or any bodily pleasure, causes disgust. Secondly, by being directly contrary to one’s own good: thus a potter

dislikes other potters, not because they are potters, but because they deprive him of his own excellence or profits, which he seeks as his own good.

Reply to Objection 1. Since ruler and subject are in communion with one another, there is a certain likeness between them: but this likeness is conditioned by a certain superiority, since ruling and presiding pertain to the excellence of a man’s own good: because they belong to men who are wise and better than others; the result being that they give man an idea of his own excellence. Another reason is that by ruling and presiding, a man does good to others, which is pleasant.

Reply to Objection 2. That which gives pleasure to the sorrowful man, though it be unlike sorrow, bears some likeness to the man that is sorrowful: because sorrows are contrary to his own good. Wherefore the sorrowful man seeks pleasure as making for his own good, in so far as it is a remedy for its contrary. And this is why bodily pleasures, which are contrary to certain sorrows, are more sought than intellectual pleasures, which have no contrary sorrow, as we shall state later on (q. 35, a. 5). And this explains why all animals naturally desire pleasure: because animals ever work through sense and movement. For this reason also young people are most inclined to seek pleasures; on account of the many changes to which they are subject, while yet growing. Moreover this is why the melancholic has a strong desire for pleasures, in order to drive away sorrow: because his “body is corroded by a base humor,” as stated in Ethic. vii, 14.

Reply to Objection 3. Bodily goods are conditioned by a certain fixed measure: wherefore surfeit of such things destroys the proper good, and consequently gives rise to disgust and sorrow, through being contrary to the proper good of man.

Objection 1. It would seem that wonder is not a cause of pleasure. Because wonder is the act of one who is ignorant of the nature of something, as Damascene says. But knowledge, rather than ignorance, is a cause of pleasure. Therefore wonder is not a cause of pleasure.

Objection 2. Further, wonder is the beginning of wisdom, being as it were, the road to the search of truth, as stated in the beginning of *Metaph.* i, 2. But “it is more pleasant to think of what we know, than to seek what we know not,” as the Philosopher says (*Ethic.* x, 7): since in the latter case we encounter difficulties and hindrances, in the former not; while pleasure arises from an operation which is unhindered, as stated in *Ethic.* vii, 12,13. Therefore wonder hinders rather than causes pleasure.

Objection 3. Further, everyone takes pleasure in what he is accustomed to: wherefore the actions of habits acquired by custom, are pleasant. But “we wonder at what is unwonted,” as Augustine says (*Tract.* xxiv in *Joan.*). Therefore wonder is contrary to the cause of pleasure.

On the contrary, The Philosopher says (*Rhet.* i, 11) that wonder is the cause of pleasure.

I answer that, It is pleasant to get what one desires, as stated above (q. 23, a. 4): and therefore the greater the desire for the thing loved, the greater the pleasure when it is attained: indeed the very increase of desire brings with it an increase of pleasure, according as it gives rise to the hope of obtaining that which is loved, since it was stated above (a. 3, ad 3) that desire resulting from hope is a cause of pleasure. Now wonder is a kind of desire for knowledge; a desire which comes to man when he sees an effect of which the cause either is unknown to him, or surpasses his knowledge or faculty of understanding. Consequently wonder is a cause of pleasure, in so far as it includes a hope of getting the

knowledge which one desires to have. For this reason whatever is wonderful is pleasing, for instance things that are scarce. Also, representations of things, even of those which are not pleasant in themselves, give rise to pleasure; for the soul rejoices in comparing one thing with another, because comparison of one thing with another is the proper and connatural act of the reason, as the Philosopher says (*Poet.* iv). This again is why “it is more delightful to be delivered from great danger, because it is something wonderful,” as stated in *Rhetor.* i, 11.

Reply to Objection 1. Wonder gives pleasure, not because it implies ignorance, but in so far as it includes the desire of learning the cause, and in so far as the wonderer learns something new, i.e. that the cause is other than he had thought it to be.*

Reply to Objection 2. Pleasure includes two things; rest in the good, and perception of this rest. As to the former therefore, since it is more perfect to contemplate the known truth, than to seek for the unknown, the contemplation of what we know, is in itself more pleasing than the research of what we do not know. Nevertheless, as to the second, it happens that research is sometimes more pleasing accidentally, in so far as it proceeds from a greater desire: for greater desire is awakened when we are conscious of our ignorance. This is why man takes the greatest pleasure in finding or learning things for the first time.

Reply to Objection 3. It is pleasant to do what we are wont to do, inasmuch as this is connatural to us, as it were. And yet things that are of rare occurrence can be pleasant, either as regards knowledge, from the fact that we desire to know something about them, in so far as they are wonderful; or as regards action, from the fact that “the mind is more inclined by desire to act intensely in things that are new,” as stated in *Ethic.* x, 4, since more perfect operation causes more perfect pleasure.

* According to another reading:—that he is other than he thought himself to be.

FIRST PART OF THE SECOND PART, QUESTION 33

Of the Effects of Pleasure (In Four Articles)

We must now consider the effects of pleasure; and under this head there are four points of inquiry:

- (1) Whether expansion is an effect of pleasure?
- (2) Whether pleasure causes thirst or desire for itself?
- (3) Whether pleasure hinders the use of reason?
- (4) Whether pleasure perfects operation?

Whether expansion is an effect of pleasure?

Ia IIae q. 33 a. 1

Objection 1. It would seem that expansion is not an effect of pleasure. For expansion seems to pertain more to love, according to the Apostle (2 Cor. 6:11): "Our heart is enlarged." Wherefore it is written (Ps. 118:96) concerning the precept of charity: "Thy commandment is exceeding broad." But pleasure is a distinct passion from love. Therefore expansion is not an effect of pleasure.

Objection 2. Further, when a thing expands it is enabled to receive more. But receiving pertains to desire, which is for something not yet possessed. Therefore expansion seems to belong to desire rather than to pleasure.

Objection 3. Further, contraction is contrary to expansion. But contraction seems to belong to pleasure, for the hand closes on that which we wish to grasp firmly: and such is the affection of appetite in regard to that which pleases it. Therefore expansion does not pertain to pleasure.

On the contrary, In order to express joy, it is written (Is. 60:5): "Thou shalt see and abound, thy heart shall wonder and be enlarged." Moreover pleasure is called by the name of "laetitia" as being derived from "dilatatio" [expansion], as stated above (q. 31, a. 3, ad 3).

I answer that, Breadth [latitudo] is a dimension of bodily magnitude: hence it is not applied to the emotions of the soul, save metaphorically. Now expansion denotes a kind of movement towards breadth; and it belongs to pleasure in respect of the two things requisite for pleasure. One of these is on the part of the appre-

hensive power, which is cognizant of the conjunction with some suitable good. As a result of this apprehension, man perceives that he has attained a certain perfection, which is a magnitude of the spiritual order: and in this respect man's mind is said to be magnified or expanded by pleasure. The other requisite for pleasure is on the part of the appetitive power, which acquiesces in the pleasurable object, and rests therein, offering, as it were, to enfold it within itself. And thus man's affection is expanded by pleasure, as though it surrendered itself to hold within itself the object of its pleasure.

Reply to Objection 1. In metaphorical expressions nothing hinders one and the same thing from being attributed to different things according to different likenesses. And in this way expansion pertains to love by reason of a certain spreading out, in so far as the affection of the lover spreads out to others, so as to care, not only for his own interests, but also for what concerns others. On the other hand expansion pertains to pleasure, in so far as a thing becomes more ample in itself so as to become more capacious.

Reply to Objection 2. Desire includes a certain expansion arising from the imagination of the thing desired; but this expansion increases at the presence of the pleasurable object: because the mind surrenders itself more to that object when it is already taking pleasure in it, than when it desires it before possessing it; since pleasure is the end of desire.

Reply to Objection 3. He that takes pleasure in a thing holds it fast, by clinging to it with all his might: but he opens his heart to it that he may enjoy it perfectly.

Whether pleasure causes thirst or desire for itself?

Ia IIae q. 33 a. 2

Objection 1. It would seem that pleasure does not cause desire for itself. Because all movement ceases when repose is reached. But pleasure is, as it were, a certain repose of the movement of desire, as stated above (q. 23, a. 4; q. 25, a. 2). Therefore the movement of desire ceases when pleasure is reached. Therefore pleasure does not cause desire.

Objection 2. Further, a thing does not cause its contrary. But pleasure is, in a way, contrary to desire, on the

part of the object: since desire regards a good which is not yet possessed, whereas pleasure regards the good that is possessed. Therefore pleasure does not cause desire for itself.

Objection 3. Further, distaste is incompatible with desire. But pleasure often causes distaste. Therefore it does not cause desire.

On the contrary, Our Lord said (Jn. 4:13): "Whosoever drinketh of this water, shall thirst again":

where, according to Augustine (Tract. xv in Joan.), water denotes pleasures of the body.

I answer that, Pleasure can be considered in two ways; first, as existing in reality; secondly, as existing in the memory. Again thirst, or desire, can be taken in two ways; first, properly, as denoting a craving for something not possessed; secondly, in general, as excluding distaste.

Considered as existing in reality, pleasure does not of itself cause thirst or desire for itself, but only accidentally; provided we take thirst or desire as denoting a craving for some thing not possessed: because pleasure is an emotion of the appetite in respect of something actually present. But it may happen that what is actually present is not perfectly possessed: and this may be on the part of the thing possessed, or on the part of the possessor. On the part of the thing possessed, this happens through the thing possessed not being a simultaneous whole; wherefore one obtains possession of it successively, and while taking pleasure in what one has, one desires to possess the remainder: thus if a man is pleased with the first part of a verse, he desires to hear the second part, as Augustine says (Confess. iv, 11). In this way nearly all bodily pleasures cause thirst for themselves, until they are fully realized, because pleasures of this kind arise from some movement: as is evident in pleasures of the table. On the part of the possessor, this happens when a man possesses a thing which is perfect in itself, yet does not possess it perfectly, but obtains possession of it little by little. Thus in this life, a faint perception of Divine knowledge affords us delight, and delight sets up a thirst or desire for perfect knowledge; in which sense we may understand the words of Eccclus. 24:29: "They that drink me shall yet thirst."

On the other hand, if by thirst or desire we understand the mere intensity of the emotion, that excludes distaste, thus more than all others spiritual pleasures cause thirst or desire for themselves. Because bodily

pleasures become distasteful by reason of their causing an excess in the natural mode of being, when they are increased or even when they are protracted; as is evident in the case of pleasures of the table. This is why, when a man arrives at the point of perfection in bodily pleasures, he wearies of them, and sometimes desires another kind. Spiritual pleasures, on the contrary, do not exceed the natural mode of being, but perfect nature. Hence when their point of perfection is reached, then do they afford the greatest delight: except, perchance, accidentally, in so far as the work of contemplation is accompanied by some operation of the bodily powers, which tire from protracted activity. And in this sense also we may understand those words of Eccclus. 24:29: "They that drink me shall yet thirst": for, even of the angels, who know God perfectly, and delight in Him, it is written (1 Pet. 1:12) that they "desire to look at Him."

Lastly, if we consider pleasure, not as existing in reality, but as existing in the memory, thus it has of itself a natural tendency to cause thirst and desire for itself: when, to wit, man returns to that disposition, in which he was when he experienced the pleasure that is past. But if he be changed from that disposition, the memory of that pleasure does not give him pleasure, but distaste: for instance, the memory of food in respect of a man who has eaten to repletion.

Reply to Objection 1. When pleasure is perfect, then it includes complete rest; and the movement of desire, tending to what was not possessed, ceases. But when it is imperfect, then the desire, tending to what was not possessed, does not cease altogether.

Reply to Objection 2. That which is possessed imperfectly, is possessed in one respect, and in another respect is not possessed. Consequently it may be the object of desire and pleasure at the same time.

Reply to Objection 3. Pleasures cause distaste in one way, desire in another, as stated above.

Whether pleasure hinders the use of reason?

Ia IIae q. 33 a. 3

Objection 1. It would seem that pleasure does not hinder the use of reason. Because repose facilitates very much the due use of reason: wherefore the Philosopher says (Phys. vii, 3) that "while we sit and rest, the soul is inclined to knowledge and prudence"; and it is written (Wis. 8:16): "When I go into my house, I shall repose myself with her," i.e. wisdom. But pleasure is a kind of repose. Therefore it helps rather than hinders the use of reason.

Objection 2. Further, things which are not in the same subject though they be contraries, do not hinder one another. But pleasure is in the appetitive faculty, while the use of reason is in the apprehensive power. Therefore pleasure does not hinder the use of reason.

Objection 3. Further, that which is hindered by another, seems to be moved, as it were, thereby. But

the use of an apprehensive power moves pleasure rather than is moved by it: because it is the cause of pleasure. Therefore pleasure does not hinder the use of reason.

On the contrary, The Philosopher says (Ethic. vi, 5), that "pleasure destroys the estimate of prudence."

I answer that, As is stated in Ethic. x, 5, "appropriate pleasures increase activity. . . whereas pleasures arising from other sources are impediments to activity." Accordingly there is a certain pleasure that is taken in the very act of reason, as when one takes pleasure in contemplating or in reasoning: and such pleasure does not hinder the act of reason, but helps it; because we are more attentive in doing that which gives us pleasure, and attention fosters activity.

On the other hand bodily pleasures hinder the use of reason in three ways. First, by distracting the rea-

son. Because, as we have just observed, we attend much to that which pleases us. Now when the attention is firmly fixed on one thing, it is either weakened in respect of other things, or it is entirely withdrawn from them; and thus if the bodily pleasure be great, either it entirely hinders the use of reason, by concentrating the mind's attention on itself; or else it hinders it considerably. Secondly, by being contrary to reason. Because some pleasures, especially those that are in excess, are contrary to the order of reason: and in this sense the Philosopher says that "bodily pleasures destroy the estimate of prudence, but not the speculative estimate," to which they are not opposed, "for instance that the three angles of a triangle are together equal to two right angles." In the first sense, however, they hinder both estimates. Thirdly, by fettering the reason: in so far as bodily pleasure is followed by a certain alteration in the body, greater even than in the other passions, in proportion as the appetite is more vehemently affected towards a present than towards an absent thing. Now such bod-

ily disturbances hinder the use of reason; as may be seen in the case of drunkards, in whom the use of reason is fettered or hindered.

Reply to Objection 1. Bodily pleasure implies indeed repose of the appetite in the object of pleasure; which repose is sometimes contrary to reason; but on the part of the body it always implies alteration. And in respect of both points, it hinders the use of reason.

Reply to Objection 2. The powers of the appetite and of apprehension are indeed distinct parts, but belonging to the one soul. Consequently when the soul is very intent on the action of one part, it is hindered from attending to a contrary act of the other part.

Reply to Objection 3. The use of reason requires the due use of the imagination and of the other sensitive powers, which are exercised through a bodily organ. Consequently alteration in the body hinders the use of reason, because it hinders the act of the imagination and of the other sensitive powers.

Whether pleasure perfects operation?

Ia IIae q. 33 a. 4

Objection 1. It would seem that pleasure does not perfect operation. For every human operation depends on the use of reason. But pleasure hinders the use of reason, as stated above (a. 3). Therefore pleasure does not perfect, but weakens human operation.

Objection 2. Further, nothing perfects itself or its cause. But pleasure is an operation (Ethic. vii, 12; x, 4), i.e. either in its essence or in its cause. Therefore pleasure does not perfect operation.

Objection 3. Further, if pleasure perfects operation, it does so either as end, or as form, or as agent. But not as end; because operation is not sought for the sake of pleasure, but rather the reverse, as stated above (q. 4, a. 2): nor as agent, because rather is it the operation that causes pleasure: nor again as form, because, according to the Philosopher (Ethic. x, 4), "pleasure does not perfect operation, as a habit does." Therefore pleasure does not perfect operation.

On the contrary, The Philosopher says (Ethic. x, 4) that "pleasure perfects operation."

I answer that, Pleasure perfects operation in two ways. First, as an end: not indeed according as an end is that on "account of which a thing is"; but according as every good which is added to a thing and completes it, can be called its end. And in this sense the Philosopher says (Ethic. x, 4) that "pleasure perfects operation. . . as

some end added to it": that is to say, inasmuch as to this good, which is operation, there is added another good, which is pleasure, denoting the repose of the appetite in a good that is presupposed. Secondly, as agent; not indeed directly, for the Philosopher says (Ethic. x, 4) that "pleasure perfects operation, not as a physician makes a man healthy, but as health does": but it does so indirectly; inasmuch as the agent, through taking pleasure in his action, is more eagerly intent on it, and carries it out with greater care. And in this sense it is said in Ethic. x, 5 that "pleasures increase their appropriate activities, and hinder those that are not appropriate."

Reply to Objection 1. It is not every pleasure that hinders the act of reason, but only bodily pleasure; for this arises, not from the act of reason, but from the act of the concupiscible faculty, which act is intensified by pleasure. On the contrary, pleasure that arises from the act of reason, strengthens the use of reason.

Reply to Objection 2. As stated in Phys. ii, 3 two things may be causes of one another, if one be the efficient, the other the final cause. And in this way, operation is the efficient cause of pleasure, while pleasure perfects operation by way of final cause, as stated above.

The Reply to the Third Objection is evident for what has been said.

Objection 1. It would seem that expansion is not an effect of pleasure. For expansion seems to pertain more to love, according to the Apostle (2 Cor. 6:11): “Our heart is enlarged.” Wherefore it is written (Ps. 118:96) concerning the precept of charity: “Thy commandment is exceeding broad.” But pleasure is a distinct passion from love. Therefore expansion is not an effect of pleasure.

Objection 2. Further, when a thing expands it is enabled to receive more. But receiving pertains to desire, which is for something not yet possessed. Therefore expansion seems to belong to desire rather than to pleasure.

Objection 3. Further, contraction is contrary to expansion. But contraction seems to belong to pleasure, for the hand closes on that which we wish to grasp firmly: and such is the affection of appetite in regard to that which pleases it. Therefore expansion does not pertain to pleasure.

On the contrary, In order to express joy, it is written (Is. 60:5): “Thou shall see and abound, thy heart shall wonder and be enlarged.” Moreover pleasure is called by the name of “laetitia” as being derived from “dilatatio” [expansion], as stated above (q. 31, a. 3, ad 3).

I answer that, Breadth [latitudo] is a dimension of bodily magnitude: hence it is not applied to the emotions of the soul, save metaphorically. Now expansion denotes a kind of movement towards breadth; and it belongs to pleasure in respect of the two things requisite for pleasure. One of these is on the part of the appre-

hensive power, which is cognizant of the conjunction with some suitable good. As a result of this apprehension, man perceives that he has attained a certain perfection, which is a magnitude of the spiritual order: and in this respect man’s mind is said to be magnified or expanded by pleasure. The other requisite for pleasure is on the part of the appetitive power, which acquiesces in the pleasurable object, and rests therein, offering, as it were, to enfold it within itself. And thus man’s affection is expanded by pleasure, as though it surrendered itself to hold within itself the object of its pleasure.

Reply to Objection 1. In metaphorical expressions nothing hinders one and the same thing from being attributed to different things according to different likenesses. And in this way expansion pertains to love by reason of a certain spreading out, in so far as the affection of the lover spreads out to others, so as to care, not only for his own interests, but also for what concerns others. On the other hand expansion pertains to pleasure, in so far as a thing becomes more ample in itself so as to become more capacious.

Reply to Objection 2. Desire includes a certain expansion arising from the imagination of the thing desired; but this expansion increases at the presence of the pleasurable object: because the mind surrenders itself more to that object when it is already taking pleasure in it, than when it desires it before possessing it; since pleasure is the end of desire.

Reply to Objection 3. He that takes pleasure in a thing holds it fast, by clinging to it with all his might: but he opens his heart to it that he may enjoy it perfectly.

Objection 1. It would seem that pleasure does not cause desire for itself. Because all movement ceases when repose is reached. But pleasure is, as it were, a certain repose of the movement of desire, as stated above (q. 23, a. 4; q. 25, a. 2). Therefore the movement of desire ceases when pleasure is reached. Therefore pleasure does not cause desire.

Objection 2. Further, a thing does not cause its contrary. But pleasure is, in a way, contrary to desire, on the part of the object: since desire regards a good which is not yet possessed, whereas pleasure regards the good that is possessed. Therefore pleasure does not cause desire for itself.

Objection 3. Further, distaste is incompatible with desire. But pleasure often causes distaste. Therefore it does not cause desire.

On the contrary, Our Lord said (Jn. 4:13): “Whosoever drinketh of this water, shall thirst again”: where, according to Augustine (Tract. xv in Joan.), water denotes pleasures of the body.

I answer that, Pleasure can be considered in two ways; first, as existing in reality; secondly, as existing in the memory. Again thirst, or desire, can be taken in two ways; first, properly, as denoting a craving for something not possessed; secondly, in general, as excluding distaste.

Considered as existing in reality, pleasure does not of itself cause thirst or desire for itself, but only accidentally; provided we take thirst or desire as denoting a craving for some thing not possessed: because pleasure is an emotion of the appetite in respect of something actually present. But it may happen that what is actually present is not perfectly possessed: and this may be on the part of the thing possessed, or on the part of the possessor. On the part of the thing possessed, this happens through the thing possessed not being a simultaneous whole; wherefore one obtains possession of it successively, and while taking pleasure in what one has, one desires to possess the remainder: thus if a man is pleased with the first part of a verse, he desires to hear the second part, as Augustine says (Confess. iv, 11). In this way nearly all bodily pleasures cause thirst for themselves, until they are fully realized, because pleasures of this kind arise from some movement: as is evident in pleasures of the table. On the part of the possessor, this happens when a man possesses a thing which is perfect in itself, yet does not possess it perfectly, but

obtains possession of it little by little. Thus in this life, a faint perception of Divine knowledge affords us delight, and delight sets up a thirst or desire for perfect knowledge; in which sense we may understand the words of Ecclus. 24:29: “They that drink me shall yet thirst.”

On the other hand, if by thirst or desire we understand the mere intensity of the emotion, that excludes distaste, thus more than all others spiritual pleasures cause thirst or desire for themselves. Because bodily pleasures become distasteful by reason of their causing an excess in the natural mode of being, when they are increased or even when they are protracted; as is evident in the case of pleasures of the table. This is why, when a man arrives at the point of perfection in bodily pleasures, he wearies of them, and sometimes desires another kind. Spiritual pleasures, on the contrary, do not exceed the natural mode of being, but perfect nature. Hence when their point of perfection is reached, then do they afford the greatest delight: except, perchance, accidentally, in so far as the work of contemplation is accompanied by some operation of the bodily powers, which tire from protracted activity. And in this sense also we may understand those words of Ecclus. 24:29: “They that drink me shall yet thirst”: for, even of the angels, who know God perfectly, and delight in Him, it is written (1 Pet. 1:12) that they “desire to look at Him.”

Lastly, if we consider pleasure, not as existing in reality, but as existing in the memory, thus it has of itself a natural tendency to cause thirst and desire for itself: when, to wit, man returns to that disposition, in which he was when he experienced the pleasure that is past. But if he be changed from that disposition, the memory of that pleasure does not give him pleasure, but distaste: for instance, the memory of food in respect of a man who has eaten to repletion.

Reply to Objection 1. When pleasure is perfect, then it includes complete rest; and the movement of desire, tending to what was not possessed, ceases. But when it is imperfect, then the desire, tending to what was not possessed, does not cease altogether.

Reply to Objection 2. That which is possessed imperfectly, is possessed in one respect, and in another respect is not possessed. Consequently it may be the object of desire and pleasure at the same time.

Reply to Objection 3. Pleasures cause distaste in one way, desire in another, as stated above.

Objection 1. It would seem that pleasure does not hinder the use of reason. Because repose facilitates very much the due use of reason: wherefore the Philosopher says (Phys. vii, 3) that “while we sit and rest, the soul is inclined to knowledge and prudence”; and it is written (Wis. 8:16): “When I go into my house, I shall repose myself with her,” i.e. wisdom. But pleasure is a kind of repose. Therefore it helps rather than hinders the use of reason.

Objection 2. Further, things which are not in the same subject though they be contraries, do not hinder one another. But pleasure is in the appetitive faculty, while the use of reason is in the apprehensive power. Therefore pleasure does not hinder the use of reason.

Objection 3. Further, that which is hindered by another, seems to be moved, as it were, thereby. But the use of an apprehensive power moves pleasure rather than is moved by it: because it is the cause of pleasure. Therefore pleasure does not hinder the use of reason.

On the contrary, The Philosopher says (Ethic. vi, 5), that “pleasure destroys the estimate of prudence.”

I answer that, As is stated in Ethic. x, 5, “appropriate pleasures increase activity. . . whereas pleasures arising from other sources are impediments to activity.” Accordingly there is a certain pleasure that is taken in the very act of reason, as when one takes pleasure in contemplating or in reasoning: and such pleasure does not hinder the act of reason, but helps it; because we are more attentive in doing that which gives us pleasure, and attention fosters activity.

On the other hand bodily pleasures hinder the use of reason in three ways. First, by distracting the reason. Because, as we have just observed, we attend much to that which pleases us. Now when the attention is firmly fixed on one thing, it is either weakened in respect of other things, or it is entirely withdrawn from

them; and thus if the bodily pleasure be great, either it entirely hinders the use of reason, by concentrating the mind’s attention on itself; or else it hinders it considerably. Secondly, by being contrary to reason. Because some pleasures, especially those that are in excess, are contrary to the order of reason: and in this sense the Philosopher says that “bodily pleasures destroy the estimate of prudence, but not the speculative estimate,” to which they are not opposed, “for instance that the three angles of a triangle are together equal to two right angles.” In the first sense, however, they hinder both estimates. Thirdly, by fettering the reason: in so far as bodily pleasure is followed by a certain alteration in the body, greater even than in the other passions, in proportion as the appetite is more vehemently affected towards a present than towards an absent thing. Now such bodily disturbances hinder the use of reason; as may be seen in the case of drunkards, in whom the use of reason is fettered or hindered.

Reply to Objection 1. Bodily pleasure implies indeed repose of the appetite in the object of pleasure; which repose is sometimes contrary to reason; but on the part of the body it always implies alteration. And in respect of both points, it hinders the use of reason.

Reply to Objection 2. The powers of the appetite and of apprehension are indeed distinct parts, but belonging to the one soul. Consequently when the soul is very intent on the action of one part, it is hindered from attending to a contrary act of the other part.

Reply to Objection 3. The use of reason requires the due use of the imagination and of the other sensitive powers, which are exercised through a bodily organ. Consequently alteration in the body hinders the use of reason, because it hinders the act of the imagination and of the other sensitive powers.

Objection 1. It would seem that pleasure does not perfect operation. For every human operation depends on the use of reason. But pleasure hinders the use of reason, as stated above (a. 3). Therefore pleasure does not perfect, but weakens human operation.

Objection 2. Further, nothing perfects itself or its cause. But pleasure is an operation (Ethic. vii, 12; x, 4), i.e. either in its essence or in its cause. Therefore pleasure does not perfect operation.

Objection 3. Further, if pleasure perfects operation, it does so either as end, or as form, or as agent. But not as end; because operation is not sought for the sake of pleasure, but rather the reverse, as stated above (q. 4, a. 2): nor as agent, because rather is it the operation that causes pleasure: nor again as form, because, according to the Philosopher (Ethic. x, 4), “pleasure does not perfect operation, as a habit does.” Therefore pleasure does not perfect operation.

On the contrary, The Philosopher says (Ethic. x, 4) that “pleasure perfects operation.”

I answer that, Pleasure perfects operation in two ways. First, as an end: not indeed according as an end is that on “account of which a thing is”; but according as every good which is added to a thing and completes it, can be called its end. And in this sense the Philosopher says (Ethic. x, 4) that “pleasure perfects operation. . . as

some end added to it”: that is to say, inasmuch as to this good, which is operation, there is added another good, which is pleasure, denoting the repose of the appetite in a good that is presupposed. Secondly, as agent; not indeed directly, for the Philosopher says (Ethic. x, 4) that “pleasure perfects operation, not as a physician makes a man healthy, but as health does”: but it does so indirectly; inasmuch as the agent, through taking pleasure in his action, is more eagerly intent on it, and carries it out with greater care. And in this sense it is said in Ethic. x, 5 that “pleasures increase their appropriate activities, and hinder those that are not appropriate.”

Reply to Objection 1. It is not every pleasure that hinders the act of reason, but only bodily pleasure; for this arises, not from the act of reason, but from the act of the concupiscible faculty, which act is intensified by pleasure. On the contrary, pleasure that arises from the act of reason, strengthens the use of reason.

Reply to Objection 2. As stated in Phys. ii, 3 two things may be causes of one another, if one be the efficient, the other the final cause. And in this way, operation is the efficient cause of pleasure, while pleasure perfects operation by way of final cause, as stated above.

The Reply to the Third Objection is evident for what has been said.

FIRST PART OF THE SECOND PART, QUESTION 34

Of the Goodness and Malice of Pleasures

(In Four Articles)

We must now consider the goodness and malice of pleasures: under which head there are four points of inquiry:

- (1) Whether every pleasure is evil?
- (2) If not, whether every pleasure is good?
- (3) Whether any pleasure is the greatest good?
- (4) Whether pleasure is the measure or rule by which to judge of moral good and evil?

Whether every pleasure is evil?

Ia IIae q. 34 a. 1

Objection 1. It would seem that every pleasure is evil. For that which destroys prudence and hinders the use of reason, seems to be evil in itself: since man's good is to be "in accord with reason," as Dionysius says (Div. Nom. iv). But pleasure destroys prudence and hinders the use of reason; and so much the more, as the pleasure is greater: wherefore "in sexual pleasures," which are the greatest of all, "it is impossible to understand anything," as stated in Ethic. vii, 11. Moreover, Jerome says in his commentary on Matthew* that "at the time of conjugal intercourse, the presence of the Holy Ghost is not vouchsafed, even if it be a prophet that fulfils the conjugal duty." Therefore pleasure is evil in itself; and consequently every pleasure is evil.

Objection 2. Further, that which the virtuous man shuns, and the man lacking in virtue seeks, seems to be evil in itself, and should be avoided; because, as stated in Ethic. x, 5 "the virtuous man is a kind of measure and rule of human actions"; and the Apostle says (1 Cor. 2:15): "The spiritual man judgeth all things." But children and dumb animals, in whom there is no virtue, seek pleasure: whereas the man who is master of himself does not. Therefore pleasures are evil in themselves and should be avoided.

Objection 3. Further, "virtue and art are concerned about the difficult and the good" (Ethic. ii, 3). But no art is ordained to pleasure. Therefore pleasure is not something good.

On the contrary, It is written (Ps. 36:4): "Delight in the Lord." Since, therefore, Divine authority leads to no evil, it seems that not every pleasure is evil.

I answer that, As stated in Ethic. x, 2,[3] some have maintained that all pleasure is evil. The reason seems to have been that they took account only of sensible and bodily pleasures which are more manifest; since, also in other respects, the ancient philosophers did not discriminate between the intelligible and the sensible, nor between intellect and sense (De Anima iii, 3). And they held that all bodily pleasures should be reckoned as bad, and thus that man, being prone to immoderate pleasures, arrives at the mean of virtue by abstaining from pleasure. But they were wrong in holding this opinion. Because, since none can live without some sensible and

bodily pleasure, if they who teach that all pleasures are evil, are found in the act of taking pleasure; men will be more inclined to pleasure by following the example of their works instead of listening to the doctrine of their words: since, in human actions and passions, wherein experience is of great weight, example moves more than words.

We must therefore say that some pleasures are good, and that some are evil. For pleasure is a repose of the appetitive power in some loved good, and resulting from some operation; wherefore we assign a twofold reason for this assertion. The first is in respect of the good in which a man reposes with pleasure. For good and evil in the moral order depend on agreement or disagreement with reason, as stated above (q. 18, a. 5): just as in the order of nature, a thing is said to be natural, if it agrees with nature, and unnatural, if it disagrees. Accordingly, just as in the natural order there is a certain natural repose, whereby a thing rests in that which agrees with its nature, for instance, when a heavy body rests down below; and again an unnatural repose, whereby a thing rests in that which disagrees with its nature, as when a heavy body rests up aloft: so, in the moral order, there is a good pleasure, whereby the higher or lower appetite rests in that which is in accord with reason; and an evil pleasure, whereby the appetite rests in that which is discordant from reason and the law of God.

The second reason can be found by considering the actions, some of which are good, some evil. Now pleasures which are conjoined to actions are more akin to those actions, than desires, which precede them in point of time. Wherefore, since the desires of good actions are good, and of evil actions, evil; much more are the pleasures of good actions good, and those of evil actions evil.

Reply to Objection 1. As stated above (q. 33, a. 3), it is not the pleasures which result from an act of reason, that hinder the reason or destroy prudence, but extraneous pleasures, such as the pleasures of the body. These indeed hinder the use of reason, as stated above (q. 33, a. 3), either by contrariety of the appetite that rests in something repugnant to reason, which makes the pleasure morally bad; or by fettering the reason: thus in con-

* Origen, Hom. vi in Num.

jugal intercourse, though the pleasure be in accord with reason, yet it hinders the use of reason, on account of the accompanying bodily change. But in this case the pleasure is not morally evil; as neither is sleep, whereby the reason is fettered, morally evil, if it be taken according to reason: for reason itself demands that the use of reason be interrupted at times. We must add, however, that although this fettering of the reason through the pleasure of conjugal intercourse has no moral malice, since it is neither a mortal nor a venial sin; yet it proceeds from a kind of moral malice, namely, from the sin of our first parent; because, as stated in the Ia, q. 98, a. 2 the case was different in the state of innocence.

Reply to Objection 2. The temperate man does not

shun all pleasures, but those that are immoderate, and contrary to reason. The fact that children and dumb animals seek pleasures, does not prove that all pleasures are evil: because they have from God their natural appetite, which is moved to that which is naturally suitable to them.

Reply to Objection 3. Art is not concerned with all kinds of good, but with the making of external things, as we shall state further on (q. 57, a. 3). But actions and passions, which are within us, are more the concern of prudence and virtue than of art. Nevertheless there is an art of making pleasure, namely, “the art of cookery and the art of making arguments,” as stated in Ethic. vii, 12.

Whether every pleasure is good?

Ia IIae q. 34 a. 2

Objection 1. It would seem that every pleasure is good. Because as stated in the Ia, q. 5, a. 6 there are three kinds of good: the virtuous, the useful, and the pleasant. But everything virtuous is good; and in like manner everything useful is good. Therefore also every pleasure is good.

Objection 2. Further, that which is not sought for the sake of something else, is good in itself, as stated in Ethic. i, 6,7. But pleasure is not sought for the sake of something else; for it seems absurd to ask anyone why he seeks to be pleased. Therefore pleasure is good in itself. Now that which is predicated to a thing considered in itself, is predicated thereof universally. Therefore every pleasure is good.

Objection 3. Further, that which is desired by all, seems to be good of itself: because good is “what all things seek,” as stated in Ethic. i, 1. But everyone seeks some kind of pleasure, even children and dumb animals. Therefore pleasure is good in itself: and consequently all pleasure is good.

On the contrary, It is written (Prov. 2:14): “Who are glad when they have done evil, and rejoice in most wicked things.”

I answer that, While some of the Stoics maintained that all pleasures are evil, the Epicureans held that pleasure is good in itself, and that consequently all pleasures are good. They seem to have thus erred through not discriminating between that which is good simply, and that which is good in respect of a particular individual. That which is good simply, is good in itself. Now that which is not good in itself, may be good in respect of some individual in two ways. In one way, because it is suitable to him by reason of a disposition in which he is

now, which disposition, however, is not natural: thus it is sometimes good for a leper to eat things that are poisonous, which are not suitable simply to the human temperament. In another way, through something unsuitable being esteemed suitable. And since pleasure is the repose of the appetite in some good, if the appetite repose in that which is good simply, the pleasure will be pleasure simply, and good simply. But if a man’s appetite repose in that which is good, not simply, but in respect of that particular man, then his pleasure will not be pleasure simply, but a pleasure to him; neither will it be good simply, but in a certain respect, or an apparent good.

Reply to Objection 1. The virtuous and the useful depend on accordance with reason, and consequently nothing is virtuous or useful, without being good. But the pleasant depends on agreement with the appetite, which tends sometimes to that which is discordant from reason. Consequently not every object of pleasure is good in the moral order which depends on the order of reason.

Reply to Objection 2. The reason why pleasure is not sought for the sake of something else is because it is repose in the end. Now the end may be either good or evil; although nothing can be an end except in so far as it is good in respect of such and such a man: and so too with regard to pleasure.

Reply to Objection 3. All things seek pleasure in the same way as they seek good: since pleasure is the repose of the appetite in good. But, just as it happens that not every good which is desired, is of itself and verily good; so not every pleasure is of itself and verily good.

Whether any pleasure is the greatest good?

Ia IIae q. 34 a. 3

Objection 1. It would seem that no pleasure is the greatest good. Because nothing generated is the greatest good: since generation cannot be the last end. But pleasure is a consequence of generation: for the fact that a

thing takes pleasure is due to its being established in its own nature, as stated above (q. 31, a. 1). Therefore no pleasure is the greatest good.

Objection 2. Further, that which is the greatest good

cannot be made better by addition. But pleasure is made better by addition; since pleasure together with virtue is better than pleasure without virtue. Therefore pleasure is not the greatest good.

Objection 3. Further, that which is the greatest good is universally good, as being good of itself: since that which is such of itself is prior to and greater than that which is such accidentally. But pleasure is not universally good, as stated above (a. 2). Therefore pleasure is not the greatest good.

On the contrary, Happiness is the greatest good: since it is the end of man's life. But Happiness is not without pleasure: for it is written (Ps. 15:11): "Thou shalt fill me with joy with Thy countenance; at Thy right hand are delights even to the end."

I answer that, Plato held neither with the Stoics, who asserted that all pleasures are evil, nor with the Epicureans, who maintained that all pleasures are good; but he said that some are good, and some evil; yet, so that no pleasure be the sovereign or greatest good. But, judging from his arguments, he fails in two points. First, because, from observing that sensible and bodily pleasure consists in a certain movement and "becoming," as is evident in satiety from eating and the like; he concluded that all pleasure arises from some "becoming" and movement: and from this, since "becoming" and movement are the acts of something imperfect, it would follow that pleasure is not of the nature of ultimate perfection. But this is seen to be evidently false as regards intellectual pleasures: because one takes pleasure, not only in the "becoming" of knowledge, for instance, when one learns or wonders, as stated above (q. 32, a. 8, ad 2); but also in the act of contemplation, by making use of knowledge already acquired.

Secondly, because by greatest good he understood that which is the supreme good simply, i.e. the good as existing apart from, and unparticipated by, all else, in which sense God is the Supreme Good; whereas we are speaking of the greatest good in human things. Now the greatest good of everything is its last end. And the end, as stated above (q. 1, a. 8; q. 2, a. 7) is twofold; namely, the thing itself, and the use of that thing; thus the miser's end is either money or the possession of money. Accordingly, man's last end may be said to be either God Who is the Supreme Good simply; or the enjoyment of God, which implies a certain pleasure in the last end. And in this sense a certain pleasure of man may be said to be the greatest among human goods.

Reply to Objection 1. Not every pleasure arises from a "becoming"; for some pleasures result from perfect operations, as stated above. Accordingly nothing prevents some pleasure being the greatest good, although every pleasure is not such.

Reply to Objection 2. This argument is true of the greatest good simply, by participation of which all things are good; wherefore no addition can make it better: whereas in regard to other goods, it is universally true that any good becomes better by the addition of another good. Moreover it might be said that pleasure is not something extraneous to the operation of virtue, but that it accompanies it, as stated in Ethic. i, 8.

Reply to Objection 3. That pleasure is the greatest good is due not to the mere fact that it is pleasure, but to the fact that it is perfect repose in the perfect good. Hence it does not follow that every pleasure is supremely good, or even good at all. Thus a certain science is supremely good, but not every science is.

Whether pleasure is the measure or rule by which to judge of moral good or evil?

Ia IIae q. 34 a. 4

Objection 1. It would seem that pleasure is not the measure or rule of moral good and evil. Because "that which is first in a genus is the measure of all the rest" (Metaph. x, 1). But pleasure is not the first thing in the moral genus, for it is preceded by love and desire. Therefore it is not the rule of goodness and malice in moral matters.

Objection 2. Further, a measure or rule should be uniform; hence that movement which is the most uniform, is the measure and rule of all movements (Metaph. x, 1). But pleasures are various and multiform: since some of them are good, and some evil. Therefore pleasure is not the measure and rule of morals.

Objection 3. Further, judgment of the effect from its cause is more certain than judgment of cause from effect. Now goodness or malice of operation is the cause of goodness or malice of pleasure: because "those

pleasures are good which result from good operations, and those are evil which arise from evil operations," as stated in Ethic. x, 5. Therefore pleasures are not the rule and measure of moral goodness and malice.

On the contrary, Augustine, commenting on Ps. 7:10 "The searcher of hearts and reins is God," says: "The end of care and thought is the pleasure which each one aims at achieving." And the Philosopher says (Ethic. vii, 11) that "pleasure is the architect," i.e. the principal, "end*", in regard to which, we say absolutely that this is evil, and that, good."

I answer that, Moral goodness or malice depends chiefly on the will, as stated above (q. 20, a. 1); and it is chiefly from the end that we discern whether the will is good or evil. Now the end is taken to be that in which the will reposes: and the repose of the will and of every appetite in the good is pleasure. And therefore man is reckoned to be good or bad chiefly according to the

* St. Thomas took "finis" as being the nominative, whereas it is the genitive—*tou telous*; and the Greek reads "He" (i.e. the political philosopher), "is the architect of the end."

pleasure of the human will; since that man is good and virtuous, who takes pleasure in the works of virtue; and that man evil, who takes pleasure in evil works.

On the other hand, pleasures of the sensitive appetite are not the rule of moral goodness and malice; since food is universally pleasurable to the sensitive appetite both of good and of evil men. But the will of the good man takes pleasure in them in accordance with reason, to which the will of the evil man gives no heed.

Reply to Objection 1. Love and desire precede pleasure in the order of generation. But pleasure precedes them in the order of the end, which serves a principle in actions; and it is by the principle, which is the rule and measure of such matters, that we form our

judgment.

Reply to Objection 2. All pleasures are uniform in the point of their being the repose of the appetite in something good: and in this respect pleasure can be a rule or measure. Because that man is good, whose will rests in the true good: and that man evil, whose will rests in evil.

Reply to Objection 3. Since pleasure perfects operation as its end, as stated above (q. 33, a. 4); an operation cannot be perfectly good, unless there be also pleasure in good: because the goodness of a thing depends on its end. And thus, in a way, the goodness of the pleasure is the cause of goodness in the operation.

Objection 1. It would seem that every pleasure is evil. For that which destroys prudence and hinders the use of reason, seems to be evil in itself: since man's good is to be "in accord with reason," as Dionysius says (Div. Nom. iv). But pleasure destroys prudence and hinders the use of reason; and so much the more, as the pleasure is greater: wherefore "in sexual pleasures," which are the greatest of all, "it is impossible to understand anything," as stated in Ethic. vii, 11. Moreover, Jerome says in his commentary on Matthew* that "at the time of conjugal intercourse, the presence of the Holy Ghost is not vouchsafed, even if it be a prophet that fulfils the conjugal duty." Therefore pleasure is evil in itself; and consequently every pleasure is evil.

Objection 2. Further, that which the virtuous man shuns, and the man lacking in virtue seeks, seems to be evil in itself, and should be avoided; because, as stated in Ethic. x, 5 "the virtuous man is a kind of measure and rule of human actions"; and the Apostle says (1 Cor. 2:15): "The spiritual man judgeth all things." But children and dumb animals, in whom there is no virtue, seek pleasure: whereas the man who is master of himself does not. Therefore pleasures are evil in themselves and should be avoided.

Objection 3. Further, "virtue and art are concerned about the difficult and the good" (Ethic. ii, 3). But no art is ordained to pleasure. Therefore pleasure is not something good.

On the contrary, It is written (Ps. 36:4): "Delight in the Lord." Since, therefore, Divine authority leads to no evil, it seems that not every pleasure is evil.

I answer that, As stated in Ethic. x, 2,[3] some have maintained that all pleasure is evil. The reason seems to have been that they took account only of sensible and bodily pleasures which are more manifest; since, also in other respects, the ancient philosophers did not discriminate between the intelligible and the sensible, nor between intellect and sense (De Anima iii, 3). And they held that all bodily pleasures should be reckoned as bad, and thus that man, being prone to immoderate pleasures, arrives at the mean of virtue by abstaining from pleasure. But they were wrong in holding this opinion. Because, since none can live without some sensible and bodily pleasure, if they who teach that all pleasures are evil, are found in the act of taking pleasure; men will be more inclined to pleasure by following the example of their works instead of listening to the doctrine of their words: since, in human actions and passions, wherein experience is of great weight, example moves more than words.

We must therefore say that some pleasures are good, and that some are evil. For pleasure is a repose of the appetitive power in some loved good, and resulting from some operation; wherefore we assign a twofold reason for this assertion. The first is in respect of the good in

which a man reposes with pleasure. For good and evil in the moral order depend on agreement or disagreement with reason, as stated above (q. 18, a. 5): just as in the order of nature, a thing is said to be natural, if it agrees with nature, and unnatural, if it disagrees. Accordingly, just as in the natural order there is a certain natural repose, whereby a thing rests in that which agrees with its nature, for instance, when a heavy body rests down below; and again an unnatural repose, whereby a thing rests in that which disagrees with its nature, as when a heavy body rests up aloft: so, in the moral order, there is a good pleasure, whereby the higher or lower appetite rests in that which is in accord with reason; and an evil pleasure, whereby the appetite rests in that which is discordant from reason and the law of God.

The second reason can be found by considering the actions, some of which are good, some evil. Now pleasures which are conjoined to actions are more akin to those actions, than desires, which precede them in point of time. Wherefore, since the desires of good actions are good, and of evil actions, evil; much more are the pleasures of good actions good, and those of evil actions evil.

Reply to Objection 1. As stated above (q. 33, a. 3), it is not the pleasures which result from an act of reason, that hinder the reason or destroy prudence, but extraneous pleasures, such as the pleasures of the body. These indeed hinder the use of reason, as stated above (q. 33, a. 3), either by contrariety of the appetite that rests in something repugnant to reason, which makes the pleasure morally bad; or by fettering the reason: thus in conjugal intercourse, though the pleasure be in accord with reason, yet it hinders the use of reason, on account of the accompanying bodily change. But in this case the pleasure is not morally evil; as neither is sleep, whereby the reason is fettered, morally evil, if it be taken according to reason: for reason itself demands that the use of reason be interrupted at times. We must add, however, that although this fettering of the reason through the pleasure of conjugal intercourse has no moral malice, since it is neither a mortal nor a venial sin; yet it proceeds from a kind of moral malice, namely, from the sin of our first parent; because, as stated in the Ia, q. 98, a. 2 the case was different in the state of innocence.

Reply to Objection 2. The temperate man does not shun all pleasures, but those that are immoderate, and contrary to reason. The fact that children and dumb animals seek pleasures, does not prove that all pleasures are evil: because they have from God their natural appetite, which is moved to that which is naturally suitable to them.

Reply to Objection 3. Art is not concerned with all kinds of good, but with the making of external things, as we shall state further on (q. 57, a. 3). But actions and passions, which are within us, are more the concern of

* Origen, Hom. vi in Num.

prudence and virtue than of art. Nevertheless there is an art of making pleasure, namely, “the art of cookery and the art of making arguments,” as stated in *Ethic.* vii, 12.

Objection 1. It would seem that every pleasure is good. Because as stated in the Ia, q. 5, a. 6 there are three kinds of good: the virtuous, the useful, and the pleasant. But everything virtuous is good; and in like manner everything useful is good. Therefore also every pleasure is good.

Objection 2. Further, that which is not sought for the sake of something else, is good in itself, as stated in Ethic. i, 6,7. But pleasure is not sought for the sake of something else; for it seems absurd to ask anyone why he seeks to be pleased. Therefore pleasure is good in itself. Now that which is predicated to a thing considered in itself, is predicated thereof universally. Therefore every pleasure is good.

Objection 3. Further, that which is desired by all, seems to be good of itself: because good is “what all things seek,” as stated in Ethic. i, 1. But everyone seeks some kind of pleasure, even children and dumb animals. Therefore pleasure is good in itself: and consequently all pleasure is good.

On the contrary, It is written (Prov. 2:14): “Who are glad when they have done evil, and rejoice in most wicked things.”

I answer that, While some of the Stoics maintained that all pleasures are evil, the Epicureans held that pleasure is good in itself, and that consequently all pleasures are good. They seem to have thus erred through not discriminating between that which is good simply, and that which is good in respect of a particular individual. That which is good simply, is good in itself. Now that which is not good in itself, may be good in respect of some individual in two ways. In one way, because it is suitable to him by reason of a disposition in which he is

now, which disposition, however, is not natural: thus it is sometimes good for a leper to eat things that are poisonous, which are not suitable simply to the human temperament. In another way, through something unsuitable being esteemed suitable. And since pleasure is the repose of the appetite in some good, if the appetite reposes in that which is good simply, the pleasure will be pleasure simply, and good simply. But if a man’s appetite reposes in that which is good, not simply, but in respect of that particular man, then his pleasure will not be pleasure simply, but a pleasure to him; neither will it be good simply, but in a certain respect, or an apparent good.

Reply to Objection 1. The virtuous and the useful depend on accordance with reason, and consequently nothing is virtuous or useful, without being good. But the pleasant depends on agreement with the appetite, which tends sometimes to that which is discordant from reason. Consequently not every object of pleasure is good in the moral order which depends on the order of reason.

Reply to Objection 2. The reason why pleasure is not sought for the sake of something else is because it is repose in the end. Now the end may be either good or evil; although nothing can be an end except in so far as it is good in respect of such and such a man: and so too with regard to pleasure.

Reply to Objection 3. All things seek pleasure in the same way as they seek good: since pleasure is the repose of the appetite in good. But, just as it happens that not every good which is desired, is of itself and verily good; so not every pleasure is of itself and verily good.

Objection 1. It would seem that no pleasure is the greatest good. Because nothing generated is the greatest good: since generation cannot be the last end. But pleasure is a consequence of generation: for the fact that a thing takes pleasure is due to its being established in its own nature, as stated above (q. 31, a. 1). Therefore no pleasure is the greatest good.

Objection 2. Further, that which is the greatest good cannot be made better by addition. But pleasure is made better by addition; since pleasure together with virtue is better than pleasure without virtue. Therefore pleasure is not the greatest good.

Objection 3. Further, that which is the greatest good is universally good, as being good of itself: since that which is such of itself is prior to and greater than that which is such accidentally. But pleasure is not universally good, as stated above (a. 2). Therefore pleasure is not the greatest good.

On the contrary, Happiness is the greatest good: since it is the end of man's life. But Happiness is not without pleasure: for it is written (Ps. 15:11): "Thou shalt fill me with joy with Thy countenance; at Thy right hand are delights even to the end."

I answer that, Plato held neither with the Stoics, who asserted that all pleasures are evil, nor with the Epicureans, who maintained that all pleasures are good; but he said that some are good, and some evil; yet, so that no pleasure be the sovereign or greatest good. But, judging from his arguments, he fails in two points. First, because, from observing that sensible and bodily pleasure consists in a certain movement and "becoming," as is evident in satiety from eating and the like; he concluded that all pleasure arises from some "becoming" and movement: and from this, since "becoming" and movement are the acts of something imperfect, it would follow that pleasure is not of the nature of ultimate perfection. But this is seen to be evidently false as regards intellectual pleasures: because one takes pleasure,

not only in the "becoming" of knowledge, for instance, when one learns or wonders, as stated above (q. 32, a. 8, ad 2); but also in the act of contemplation, by making use of knowledge already acquired.

Secondly, because by greatest good he understood that which is the supreme good simply, i.e. the good as existing apart from, and unparticipated by, all else, in which sense God is the Supreme Good; whereas we are speaking of the greatest good in human things. Now the greatest good of everything is its last end. And the end, as stated above (q. 1, a. 8; q. 2, a. 7) is twofold; namely, the thing itself, and the use of that thing; thus the miser's end is either money or the possession of money. Accordingly, man's last end may be said to be either God Who is the Supreme Good simply; or the enjoyment of God, which implies a certain pleasure in the last end. And in this sense a certain pleasure of man may be said to be the greatest among human goods.

Reply to Objection 1. Not every pleasure arises from a "becoming"; for some pleasures result from perfect operations, as stated above. Accordingly nothing prevents some pleasure being the greatest good, although every pleasure is not such.

Reply to Objection 2. This argument is true of the greatest good simply, by participation of which all things are good; wherefore no addition can make it better: whereas in regard to other goods, it is universally true that any good becomes better by the addition of another good. Moreover it might be said that pleasure is not something extraneous to the operation of virtue, but that it accompanies it, as stated in *Ethic. i, 8*.

Reply to Objection 3. That pleasure is the greatest good is due not to the mere fact that it is pleasure, but to the fact that it is perfect repose in the perfect good. Hence it does not follow that every pleasure is supremely good, or even good at all. Thus a certain science is supremely good, but not every science is.

Objection 1. It would seem that pleasure is not the measure or rule of moral good and evil. Because “that which is first in a genus is the measure of all the rest” (Metaph. x, 1). But pleasure is not the first thing in the moral genus, for it is preceded by love and desire. Therefore it is not the rule of goodness and malice in moral matters.

Objection 2. Further, a measure or rule should be uniform; hence that movement which is the most uniform, is the measure and rule of all movements (Metaph. x, 1). But pleasures are various and multifiform: since some of them are good, and some evil. Therefore pleasure is not the measure and rule of morals.

Objection 3. Further, judgment of the effect from its cause is more certain than judgment of cause from effect. Now goodness or malice of operation is the cause of goodness or malice of pleasure: because “those pleasures are good which result from good operations, and those are evil which arise from evil operations,” as stated in Ethic. x, 5. Therefore pleasures are not the rule and measure of moral goodness and malice.

On the contrary, Augustine, commenting on Ps. 7:10 “The searcher of hearts and reins is God,” says: “The end of care and thought is the pleasure which each one aims at achieving.” And the Philosopher says (Ethic. vii, 11) that “pleasure is the architect,” i.e. the principal, “end*, in regard to which, we say absolutely that this is evil, and that, good.”

I answer that, Moral goodness or malice depends chiefly on the will, as stated above (q. 20, a. 1); and it is chiefly from the end that we discern whether the will is

good or evil. Now the end is taken to be that in which the will reposes: and the repose of the will and of every appetite in the good is pleasure. And therefore man is reckoned to be good or bad chiefly according to the pleasure of the human will; since that man is good and virtuous, who takes pleasure in the works of virtue; and that man evil, who takes pleasure in evil works.

On the other hand, pleasures of the sensitive appetite are not the rule of moral goodness and malice; since food is universally pleasurable to the sensitive appetite both of good and of evil men. But the will of the good man takes pleasure in them in accordance with reason, to which the will of the evil man gives no heed.

Reply to Objection 1. Love and desire precede pleasure in the order of generation. But pleasure precedes them in the order of the end, which serves a principle in actions; and it is by the principle, which is the rule and measure of such matters, that we form our judgment.

Reply to Objection 2. All pleasures are uniform in the point of their being the repose of the appetite in something good: and in this respect pleasure can be a rule or measure. Because that man is good, whose will rests in the true good: and that man evil, whose will rests in evil.

Reply to Objection 3. Since pleasure perfects operation as its end, as stated above (q. 33, a. 4); an operation cannot be perfectly good, unless there be also pleasure in good: because the goodness of a thing depends on its end. And thus, in a way, the goodness of the pleasure is the cause of goodness in the operation.

* St. Thomas took “finis” as being the nominative, whereas it is the genitive—*tou telous*; and the Greek reads “He” (i.e. the political philosopher), “is the architect of the end.”

FIRST PART OF THE SECOND PART, QUESTION 35

Of Pain or Sorrow, in Itself

(In Eight Articles)

We have now to consider pain and sorrow: concerning which we must consider: (1) Sorrow or pain in itself; (2) Its cause; (3) Its effects; (4) Its remedies; (5) Its goodness or malice.

Under the first head there are eight points of inquiry:

- (1) Whether pain is a passion of the soul?
- (2) Whether sorrow is the same as pain?
- (3) Whether sorrow or pain is contrary in pleasure?
- (4) Whether all sorrow is contrary to all pleasure?
- (5) Whether there is a sorrow contrary to the pleasure of contemplation?
- (6) Whether sorrow is to be shunned more than pleasure is to be sought?
- (7) Whether exterior pain is greater than interior?
- (8) Of the species of sorrow.

Whether pain is a passion of the soul?

Ia IIae q. 35 a. 1

Objection 1. It would seem that pain is not a passion of the soul. Because no passion of the soul is in the body. But pain can be in the body, since Augustine says (*De Vera Relig.* xii), that “bodily pain is a sudden corruption of the well-being of that thing which the soul, by making evil use of it, made subject to corruption.” Therefore pain is not a passion of the soul.

Objection 2. Further, every passion of the soul belongs to the appetitive faculty. But pain does not belong to the appetitive, but rather to the apprehensive part: for Augustine says (*De Nat. Boni* xx) that “bodily pain is caused by the sense resisting a more powerful body.” Therefore pain is not a passion of the soul.

Objection 3. Further, every passion of the soul belongs to the animal appetite. But pain does not belong to the animal appetite, but rather to the natural appetite; for Augustine says (*Gen. ad lit.* viii, 14): “Had not some good remained in nature, we should feel no pain in being punished by the loss of good.” Therefore pain is not a passion of the soul.

On the contrary, Augustine (*De Civ. Dei* xiv, 8) reckons pain among the passions of the soul; quoting Virgil (*Aeneid*, vi, 733): “hence wild desires and grovelling fears/And human laughter, human tears.” [Translation: Conington.]

I answer that, Just as two things are requisite for pleasure; namely, conjunction with good and perception of this conjunction; so also two things are requisite for pain: namely, conjunction with some evil (which is in so far evil as it deprives one of some good), and perception of this conjunction. Now whatever is conjoined, if it have not the aspect of good or evil in regard to the being to which it is conjoined, cannot cause pleasure or pain. Whence it is evident that something under the aspect of good or evil is the object of the pleasure or pain. But good and evil, as such, are objects of the appetite.

Consequently it is clear that pleasure and pain belong to the appetite.

Now every appetitive movement or inclination consequent to apprehension, belongs to the intellective or sensitive appetite: since the inclination of the natural appetite is not consequent to an apprehension of the subject of that appetite, but to the apprehension of another, as stated in the Ia, q. 103, Aa. 1,3. Since then pleasure and pain presuppose some sense or apprehension in the same subject, it is evident that pain, like pleasure, is in the intellective or sensitive appetite.

Again every movement of the sensitive appetite is called a passion, as stated above (q. 22, Aa. 1,3): and especially those which tend to some defect. Consequently pain, according as it is in the sensitive appetite, is most properly called a passion of the soul: just as bodily ailments are properly called passions of the body. Hence Augustine (*De Civ. Dei* xiv, 7,[8]*) reckons pain especially as being a kind of ailment.

Reply to Objection 1. We speak of the body, because the cause of pain is in the body: as when we suffer something hurtful to the body. But the movement of pain is always in the soul; since “the body cannot feel pain unless the soul feel it,” as Augustine says (*Super Psalm* 87:4).

Reply to Objection 2. We speak of pain of the senses, not as though it were an act of the sensitive power; but because the senses are required for bodily pain, in the same way as for bodily pleasure.

Reply to Objection 3. Pain at the loss of good proves the goodness of the nature, not because pain is an act of the natural appetite, but because nature desires something as good, the removal of which being perceived, there results the passion of pain in the sensitive appetite.

* Quoting Cicero

Objection 1. It would seem that sorrow is not pain. For Augustine says (De Civ. Dei xiv, 7) that “pain is used to express bodily suffering.” But sorrow is used more in reference to the soul. Therefore sorrow is not pain.

Objection 2. Further, pain is only in respect of present evil. But sorrow can refer to both past and future evil: thus repentance is sorrow for the past, and anxiety for the future. Therefore sorrow is quite different from pain.

Objection 3. Further, pain seems not to follow save from the sense of touch. But sorrow can arise from all the senses. Therefore sorrow is not pain, and extends to more objects.

On the contrary, The Apostle says (Rom. 9:2): “I have great sorrow [Douay: ‘sadness’] and continual pain [Douay: ‘sorrow’] in my heart,” thus denoting the same thing by sorrow and pain.

I answer that, Pleasure and pain can arise from a twofold apprehension, namely, from the apprehension of an exterior sense; and from the interior apprehension of the intellect or of the imagination. Now the interior apprehension extends to more objects than the exterior apprehension: because whatever things come under the exterior apprehension, come under the interior, but not conversely. Consequently that pleasure alone which is caused by an interior apprehension is called joy, as stated above (q. 31, a. 3): and in like manner that pain alone which is caused by an interior apprehension, is called sorrow. And just as that pleasure which is caused by an exterior apprehension, is called pleasure but not joy; so too that pain which is caused by an exterior apprehension, is called pain indeed but not sorrow. Ac-

cordingly sorrow is a species of pain, as joy is a species of pleasure.

Reply to Objection 1. Augustine is speaking there of the use of the word: because “pain” is more generally used in reference to bodily pains, which are better known, than in reference to spiritual pains.

Reply to Objection 2. External sense perceives only what is present; but the interior cognitive power can perceive the present, past and future. Consequently sorrow can regard present, past and future: whereas bodily pain, which follows apprehension of the external sense, can only regard something present.

Reply to Objection 3. The sensibles of touch are painful, not only in so far as they are disproportionate to the apprehensive power, but also in so far as they are contrary to nature: whereas the objects of the other senses can indeed be disproportionate to the apprehensive power, but they are not contrary to nature, save as they are subordinate to the sensibles of touch. Consequently man alone, who is a perfectly cognizant animal, takes pleasure in the objects of the other senses for their own sake; whereas other animals take no pleasure in them save as referable to the sensibles of touch, as stated in Ethic. iii, 10. Accordingly, in referring to the objects of the other senses, we do not speak of pain in so far as it is contrary to natural pleasure: but rather of sorrow, which is contrary to joy. So then if pain be taken as denoting bodily pain, which is its more usual meaning, then it is contrasted with sorrow, according to the distinction of interior and exterior apprehension; although, on the part of the objects, pleasure extends further than does bodily pain. But if pain be taken in a wide sense, then it is the genus of sorrow, as stated above.

Objection 1. It would seem that sorrow is not contrary to pleasure. For one of two contraries is not the cause of the other. But sorrow can be the cause of pleasure; for it is written (Mat. 5:5): “Blessed are they that mourn, for they shall be comforted.” Therefore they are not contrary to one another.

Objection 2. Further, one contrary does not denominate the other. But to some, pain or sorrow gives pleasure: thus Augustine says (Confess. iii, 2) that in stage-plays sorrow itself gives pleasure: and (Confess. iv, 5) that “weeping is a bitter thing, and yet it sometimes pleases us.” Therefore pain is not contrary to pleasure.

Objection 3. Further, one contrary is not the matter of the other; because contraries cannot co-exist together. But sorrow can be the matter of pleasure; for Augustine says (De Poenit. xiii): “The penitent should ever sorrow, and rejoice in his sorrow.” The Philosopher too says (Ethic. ix, 4) that, on the other hand, “the evil man feels pain at having been pleased.” Therefore pleasure

and pain are not contrary to one another.

On the contrary, Augustine says (De Civ. Dei xiv, 6) that “joy is the volition of consent to the things we wish: and that sorrow is the volition of dissent from the things we do not wish.” But consent and dissent are contraries. Therefore pleasure and sorrow are contrary to one another.

I answer that, As the Philosopher says (Metaph. x, 4), contrariety is a difference in respect of a form. Now the form or species of a passion or movement is taken from the object or term. Consequently, since the objects of pleasure and sorrow or pain, viz. present good and present evil, are contrary to one another, it follows that pain and pleasure are contrary to one another.

Reply to Objection 1. Nothing hinders one contrary causing the other accidentally: and thus sorrow can be the cause of pleasure. In one way, in so far as from sorrow at the absence of something, or at the presence of its contrary, one seeks the more eagerly for

something pleasant: thus a thirsty man seeks more eagerly the pleasure of a drink, as a remedy for the pain he suffers. In another way, in so far as, from a strong desire for a certain pleasure, one does not shrink from undergoing pain, so as to obtain that pleasure. In each of these ways, the sorrows of the present life lead us to the comfort of the future life. Because by the mere fact that man mourns for his sins, or for the delay of glory, he merits the consolation of eternity. In like manner a man merits it when he shrinks not from hardships and straits in order to obtain it.

Reply to Objection 2. Pain itself can be pleasurable accidentally in so far as it is accompanied by wonder, as in stage-plays; or in so far as it recalls a beloved object to one's memory, and makes one feel one's love for

the thing, whose absence gives us pain. Consequently, since love is pleasant, both pain and whatever else results from love, forasmuch as they remind us of our love, are pleasant. And, for this reason, we derive pleasure even from pains depicted on the stage: in so far as, in witnessing them, we perceive ourselves to conceive a certain love for those who are there represented.

Reply to Objection 3. The will and the reason reflect on their own acts, inasmuch as the acts themselves of the will and reason are considered under the aspect of good or evil. In this way sorrow can be the matter of pleasure, or vice versa, not essentially but accidentally: that is, in so far as either of them is considered under the aspect of good or evil.

Whether all sorrow is contrary to all pleasure?

Ia IIae q. 35 a. 4

Objection 1. It would seem that all sorrow is contrary to all pleasure. Because, just as whiteness and blackness are contrary species of color, so pleasure and sorrow are contrary species of the soul's passions. But whiteness and blackness are universally contrary to one another. Therefore pleasure and sorrow are so too.

Objection 2. Further, remedies are made of things contrary (to the evil). But every pleasure is a remedy for all manner of sorrow, as the Philosopher declares (*Ethic.* vii, 14). Therefore every pleasure is contrary to every sorrow.

Objection 3. Further, contraries are hindrances to one another. But every sorrow hinders any kind of pleasure: as is evident from *Ethic.* x, 5. Therefore every sorrow is contrary to every pleasure.

On the contrary, The same thing is not the cause of contraries. But joy for one thing, and sorrow for the opposite thing, proceed from the same habit: thus from charity it happens that we "rejoice with them that rejoice," and "weep with them that weep" (*Rom.* 12:15). Therefore not every sorrow is contrary to every pleasure.

I answer that, As stated in *Metaph.* x, 4 contrariety is a difference in respect of a form. Now a form may be generic or specific. Consequently things may be contraries in respect of a generic form, as virtue and vice; or in respect of a specific form, as justice and injustice.

Now we must observe that some things are specified by absolute forms, e.g. substances and qualities; whereas other things are specified in relation to something extrinsic, e.g. passions and movements, which derive their species from their terms or objects. Accordingly in those things that are specified by absolute forms, it happens that species contained under contrary genera are not contrary as to their specific nature: but it does not happen for them to have any affinity or fittingness to one another. For intemperance and justice, which are in the contrary genera of virtue and vice, are not contrary to one another in respect of their specific

nature; and yet they have no affinity or fittingness to one another. On the other hand, in those things that are specified in relation to something extrinsic, it happens that species belonging to contrary genera, are not only not contrary to one another, but also that they have a certain mutual affinity or fittingness. The reason of this is that where there is one same relation to two contraries, there is contrariety; e.g. to approach to a white thing, and to approach to a black thing, are contraries; whereas contrary relations to contrary things, implies a certain likeness, e.g. to recede from something white, and to approach to something black. This is most evident in the case of contradiction, which is the principle of opposition: because opposition consists in affirming and denying the same thing, e.g. "white" and "non-white"; while there is fittingness and likeness in the affirmation of one contrary and the denial of the other, as, if I were to say "black" and "not white."

Now sorrow and pleasure, being passions, are specified by their objects. According to their respective genera, they are contrary to one another: since one is a kind of "pursuit," the other a kind of "avoidance," which "are to the appetite, what affirmation and denial are to the intellect" (*Ethic.* vi, 2). Consequently sorrow and pleasure in respect of the same object, are specifically contrary to one another: whereas sorrow and pleasure in respect of objects that are not contrary but disparate, are not specifically contrary to one another, but are also disparate; for instance, sorrow at the death of a friend, and pleasure in contemplation. If, however, those diverse objects be contrary to one another, then pleasure and sorrow are not only specifically contrary, but they also have a certain mutual fittingness and affinity: for instance to rejoice in good and to sorrow for evil.

Reply to Objection 1. Whiteness and blackness do not take their species from their relationship to something extrinsic, as pleasure and sorrow do: wherefore the comparison does not hold.

Reply to Objection 2. Genus is taken from mat-

ter, as is stated in *Metaph.* viii, 2; and in accidents the subject takes the place of matter. Now it has been said above that pleasure and sorrow are generically contrary to one another. Consequently in every sorrow the subject has a disposition contrary to the disposition of the subject of pleasure: because in every pleasure the appetite is viewed as accepting what it possesses, and in every sorrow, as avoiding it. And therefore on the part of the subject every pleasure is a remedy for any kind

of sorrow, and every sorrow is a hindrance of all manner of pleasure: but chiefly when pleasure is opposed to sorrow specifically.

Wherefore the Reply to the Third Objection is evident. Or we may say that, although not every sorrow is specifically contrary to every pleasure, yet they are contrary to one another in regard to their effects: since one has the effect of strengthening the animal nature, while the other results in a kind of discomfort.

Whether there is any sorrow contrary to the pleasure of contemplation?

Ia IIae q. 35 a. 5

Objection 1. It would seem that there is a sorrow that is contrary to the pleasure of contemplation. For the Apostle says (2 Cor. 7:10): “The sorrow that is according to God, worketh penance steadfast unto salvation.” Now to look at God belongs to the higher reason, whose act is to give itself to contemplation, according to Augustine (*De Trin.* xii, 3,4). Therefore there is a sorrow contrary to the pleasure of contemplation.

Objection 2. Further, contrary things have contrary effects. If therefore the contemplation of one contrary gives pleasure, the other contrary will give sorrow: and so there will be a sorrow contrary to the pleasure of contemplation.

Objection 3. Further, as the object of pleasure is good, so the object of sorrow is evil. But contemplation can be an evil: since the Philosopher says (*Metaph.* xii, 9) that “it is unfitting to think of certain things.” Therefore sorrow can be contrary to the pleasure of contemplation.

Objection 4. Further, any work, so far as it is unhindered, can be a cause of pleasure, as stated in *Ethic.* vii, 12,13; x, 4. But the work of contemplation can be hindered in many ways, either so as to destroy it altogether, or as to make it difficult. Therefore in contemplation there can be a sorrow contrary to the pleasure.

Objection 5. Further, affliction of the flesh is a cause of sorrow. But, as it is written (*Eccles.* 12:12) “much study is an affliction of the flesh.” Therefore contemplation admits of sorrow contrary to its pleasure.

On the contrary, It is written (*Wis.* 8:16): “Her,” i.e. wisdom’s, “conversation hath no bitterness nor her company any tediousness; but joy and gladness.” Now the conversation and company of wisdom are found in contemplation. Therefore there is no sorrow contrary to the pleasure of contemplation.

I answer that, The pleasure of contemplation can be understood in two ways. In one way, so that contemplation is the cause, but not the object of pleasure: and then pleasure is taken not in contemplating but in the thing contemplated. Now it is possible to contemplate something harmful and sorrowful, just as to contemplate something suitable and pleasant. Consequently if the pleasure of contemplation be taken in this way, nothing hinders some sorrow being contrary to the pleasure

of contemplation.

In another way, the pleasure of contemplation is understood, so that contemplation is its object and cause; as when one takes pleasure in the very act of contemplating. And thus, according to Gregory of Nyssa*, “no sorrow is contrary to that pleasure which is about contemplation”: and the Philosopher says the same (*Topic.* i, 13; *Ethic.* x, 3). This, however, is to be understood as being the case properly speaking. The reason is because sorrow is of itself contrary to pleasure in a contrary object: thus pleasure in heat is contrary to sorrow caused by cold. But there is no contrary to the object of contemplation: because contraries, as apprehended by the mind, are not contrary, but one is the means of knowing the other. Wherefore, properly speaking, there cannot be a sorrow contrary to the pleasure of contemplation. Nor has it any sorrow annexed to it, as bodily pleasures have, which are like remedies against certain annoyances; thus a man takes pleasure in drinking through being troubled with thirst, but when the thirst is quite driven out, the pleasure of drinking ceases also. Because the pleasure of contemplation is not caused by one’s being quit of an annoyance, but by the fact that contemplation is pleasant in itself: for pleasure is not a “becoming” but a perfect operation, as stated above (q. 31, a. 1).

Accidentally, however, sorrow is mingled with the pleasure of contemplation; and this in two ways: first, on the part of an organ, secondly, through some impediment in the apprehension. On the part of an organ, sorrow or pain is mingled with apprehension, directly, as regards the apprehensive powers of the sensitive part, which have a bodily organ; either from the sensible object disagreeing with the normal condition of the organ, as the taste of something bitter, and the smell of something foul; or from the sensible object, though agreeable, being so continuous in its action on the sense, that it exceeds the normal condition of the organ, as stated above (q. 33, a. 2), the result being that an apprehension which at first was pleasant becomes tedious. But these two things cannot occur directly in the contemplation of the mind; because the mind has no corporeal organ: wherefore it was said in the authority quoted above that intellectual contemplation has neither “bitterness,” nor

* Nemesius, *De Nat. Hom.* xviii.

“tediousness.” Since, however, the human mind, in contemplation, makes use of the sensitive powers of apprehension, to whose acts weariness is incidental; therefore some affliction or pain is indirectly mingled with contemplation.

Nevertheless, in neither of these ways, is the pain thus accidentally mingled with contemplation, contrary to the pleasure thereof. Because pain caused by a hindrance to contemplation, is not contrary to the pleasure of contemplation, but rather is in affinity and in harmony with it, as is evident from what has been said above (a. 4): while pain or sorrow caused by bodily weariness, does not belong to the same genus, wherefore it is altogether disparate. Accordingly it is evident that no sorrow is contrary to pleasure taken in the very act of contemplation; nor is any sorrow connected with it save accidentally.

Reply to Objection 1. The “sorrow which is according to God,” is not caused by the very act of intellectual contemplation, but by something which the mind contemplates: viz. by sin, which the mind considers as

contrary to the love of God.

Reply to Objection 2. Things which are contrary according to nature are not contrary according as they exist in the mind: for things that are contrary in reality are not contrary in the order of thought; indeed rather is one contrary the reason for knowing the other. Hence one and the same science considers contraries.

Reply to Objection 3. Contemplation, in itself, is never evil, since it is nothing else than the consideration of truth, which is the good of the intellect: it can, however, be evil accidentally, i.e. in so far as the contemplation of a less noble object hinders the contemplation of a more noble object; or on the part of the object contemplated, to which the appetite is inordinately attached.

Reply to Objection 4. Sorrow caused by a hindrance to contemplation, is not contrary to the pleasure of contemplation, but is in harmony with it, as stated above.

Reply to Objection 5. Affliction of the flesh affects contemplation accidentally and indirectly, as stated above.

Whether sorrow is to be shunned more than pleasure is to be sought?

Ia IIae q. 35 a. 6

Objection 1. It would seem that sorrow is to be shunned more than pleasure is to be sought. For Augustine says (QQ. 83, qu. 63): “There is nobody that does not shun sorrow more than he seeks pleasure.” Now that which all agree in doing, seems to be natural. Therefore it is natural and right for sorrow to be shunned more than pleasure is sought.

Objection 2. Further, the action of a contrary conduces to rapidity and intensity of movement: for “hot water freezes quicker and harder,” as the Philosopher says (Meteor. i, 12). But the shunning of sorrow is due to the contrariety of the cause of sorrow; whereas the desire for pleasure does not arise from any contrariety, but rather from the suitability of the pleasant object. Therefore sorrow is shunned more eagerly than pleasure is sought.

Objection 3. Further, the stronger the passion which a man resists according to reason, the more worthy is he of praise, and the more virtuous: since “virtue is concerned with the difficult and the good” (Ethic. ii, 3). But the brave man who resists the movement of shunning sorrow, is more virtuous than the temperate man, who resists the movement of desire for pleasure: since the Philosopher says (Rhet. ii, 4) that “the brave and the just are chiefly praised.” Therefore the movement of shunning sorrow is more eager than the movement of seeking pleasure.

On the contrary, Good is stronger than evil, as Dionysius declares (Div. Nom. iv). But pleasure is desirable for the sake of the good which is its object; whereas the shunning of sorrow is on account of evil. Therefore the desire for pleasure is more eager than the shunning of sorrow.

I answer that, The desire for pleasure is of itself more eager than the shunning of sorrow. The reason of this is that the cause of pleasure is a suitable good; while the cause of pain or sorrow is an unsuitable evil. Now it happens that a certain good is suitable without any repugnance at all: but it is not possible for any evil to be so unsuitable as not to be suitable in some way. Wherefore pleasure can be entire and perfect: whereas sorrow is always partial. Therefore desire for pleasure is naturally greater than the shunning of sorrow. Another reason is because the good, which is the object of pleasure, is sought for its own sake: whereas the evil, which is the object of sorrow, is to be shunned as being a privation of good: and that which is by reason of itself is stronger than that which is by reason of something else. Moreover we find a confirmation of this in natural movements. For every natural movement is more intense in the end, when a thing approaches the term that is suitable to its nature, than at the beginning, when it leaves the term that is unsuitable to its nature: as though nature were more eager in tending to what is suitable to it, than in shunning what is unsuitable. Therefore the inclination of the appetitive power is, of itself, more eager in tending to pleasure than in shunning sorrow.

But it happens accidentally that a man shuns sorrow more eagerly than he seeks pleasure: and this for three reasons. First, on the part of the apprehension. Because, as Augustine says (De Trin. x, 12), “love is felt more keenly, when we lack that which we love.” Now from the lack of what we love, sorrow results, which is caused either by the loss of some loved good, or by the presence of some contrary evil. But pleasure suffers no lack of the good loved, for it rests in possession of it. Since

then love is the cause of pleasure and sorrow, the latter is more the shunned, according as love is the more keenly felt on account of that which is contrary to it. Secondly, on the part of the cause of sorrow or pain, which cause is repugnant to a good that is more loved than the good in which we take pleasure. For we love the natural well-being of the body more than the pleasure of eating; and consequently we would leave the pleasure of eating and the like, from fear of the pain occasioned by blows or other such causes, which are contrary to the well-being of the body. Thirdly, on the part of the effect: namely, in so far as sorrow hinders not only one pleasure, but all.

Reply to Objection 1. The saying of Augustine that “sorrow is shunned more than pleasure is sought” is true accidentally but not simply. And this is clear from what he says after: “Since we see that the most savage animals are deterred from the greatest pleasures by fear of pain,” which pain is contrary to life which is loved above all.

Reply to Objection 2. It is not the same with movement from within and movement from without. For movement from within tends to what is suitable more than it recedes from that which is unsuitable; as we remarked above in regard to natural movement. But movement from without is intensified by the very oppo-

sition: because each thing strives in its own way to resist anything contrary to it, as aiming at its own preservation. Hence violent movement is intense at first, and slackens towards the end. Now the movement of the appetitive faculty is from within: since it tends from the soul to the object. Consequently pleasure is, of itself, more to be sought than sorrow is to be shunned. But the movement of the sensitive faculty is from without, as it were from the object of the soul. Consequently the more contrary a thing is the more it is felt. And then too, accidentally, in so far as the senses are requisite for pleasure and pain, pain is shunned more than pleasure is sought.

Reply to Objection 3. A brave man is not praised because, in accordance with reason, he is not overcome by any kind of sorrow or pain whatever, but because he is not overcome by that which is concerned with the dangers of death. And this kind of sorrow is more shunned, than pleasures of the table or of sexual intercourse are sought, which latter pleasures are the object of temperance: thus life is loved more than food and sexual pleasure. But the temperate man is praised for refraining from pleasures of touch, more than for not shunning the pains which are contrary to them, as is stated in *Ethic.* iii, 11.

Whether outward pain is greater than interior sorrow?

Ia IIae q. 35 a. 7

Objection 1. It would seem that outward pain is greater than interior sorrow of the heart. Because outward pain arises from a cause repugnant to the well-being of the body in which is life: whereas interior sorrow is caused by some evil in the imagination. Since, therefore, life is loved more than an imagined good, it seems that, according to what has been said above (a. 6), outward pain is greater than interior sorrow.

Objection 2. Further, the reality moves more than its likeness does. But outward pain arises from the real conjunction of some contrary; whereas inward sorrow arises from the apprehended likeness of a contrary. Therefore outward pain is greater than inward sorrow.

Objection 3. Further, a cause is known by its effect. But outward pain has more striking effects: since man dies sooner of outward pain than of interior sorrow. Therefore outward pain is greater and is shunned more than interior sorrow.

On the contrary, it is written (*Ecclus.* 25:17): “The sadness of the heart is every wound [Douay: ‘plague’], and the wickedness of a woman is all evil.” Therefore, just as the wickedness of a woman surpasses all other wickedness, as the text implies; so sadness of the heart surpasses every outward wound.

I answer that, Interior and exterior pain agree in one point and differ in two. They agree in this, that each is a movement of the appetitive power, as stated above (a. 1). But they differ in respect of those two things

which are requisite for pain and pleasure; namely, in respect of the cause, which is a conjoined good or evil; and in respect of the apprehension. For the cause of outward pain is a conjoined evil repugnant to the body; while the cause of inward pain is a conjoined evil repugnant to the appetite. Again, outward pain arises from an apprehension of sense, chiefly of touch; while inward pain arises from an interior apprehension, of the imagination or of the reason.

If then we compare the cause of inward pain to the cause of outward pain, the former belongs, of itself, to the appetite to which both these pains belong: while the latter belongs to the appetite directly. Because inward pain arises from something being repugnant to the appetite itself, while outward pain arises from something being repugnant to the appetite, through being repugnant to the body. Now, that which is of itself is always prior to that which is by reason of another. Wherefore, from this point of view, inward pain surpasses outward pain. In like manner also on the part of apprehension: because the apprehension of reason and imagination is of a higher order than the apprehension of the sense of touch. Consequently inward pain is, simply and of itself, more keen than outward pain: a sign whereof is that one willingly undergoes outward pain in order to avoid inward pain: and in so far as outward pain is not repugnant to the interior appetite, it becomes in a manner pleasant and agreeable by way of inward joy.

Sometimes, however, outward pain is accompanied by inward pain, and then the pain is increased. Because inward pain is not only greater than outward pain, it is also more universal: since whatever is repugnant to the body, can be repugnant to the interior appetite; and whatever is apprehended by sense may be apprehended by imagination and reason, but not conversely. Hence in the passage quoted above it is said expressively: “Sadness of the heart is every wound,” because even the pains of outward wounds are comprised in the interior sorrows of the heart.

Reply to Objection 1. Inward pain can also arise from things that are destructive of life. And then the comparison of inward to outward pain must not be taken in reference to the various evils that cause pain; but in regard to the various ways in which this cause of pain is compared to the appetite.

Reply to Objection 2. Inward pain is not caused by the apprehended likeness of a thing: for a man is

not inwardly pained by the apprehended likeness itself, but by the thing which the likeness represents. And this thing is all the more perfectly apprehended by means of its likeness, as this likeness is more immaterial and abstract. Consequently inward pain is, of itself, greater, as being caused by a greater evil, forasmuch as evil is better known by an inward apprehension.

Reply to Objection 3. Bodily changes are more liable to be caused by outward pain, both from the fact that outward pain is caused by a corruptive conjoined corporally, which is a necessary condition of the sense of touch; and from the fact that the outward sense is more material than the inward sense, just as the sensitive appetite is more material than the intellective. For this reason, as stated above (q. 22, a. 3; q. 31, a. 5), the body undergoes a greater change from the movement of the sensitive appetite: and, in like manner, from outward than from inward pain.

Whether there are only four species of sorrow?

Ia IIae q. 35 a. 8

Objection 1. It would seem that Damascene’s (De Fide Orth. ii, 14) division of sorrow into four species is incorrect; viz. into “torpor, distress,” which Gregory of Nyssa* calls “anxiety,”—“pity,” and “envy.” For sorrow is contrary to pleasure. But there are not several species of pleasure. Therefore it is incorrect to assign different species of sorrow.

Objection 2. Further, “Repentance” is a species of sorrow; and so are “indignation” and “jealousy,” as the Philosopher states (Rhet. ii, 9,11). But these are not included in the above species. Therefore this division is insufficient.

Objection 3. Further, the members of a division should be things that are opposed to one another. But these species are not opposed to one another. For according to Gregory† “torpor is sorrow depriving of speech; anxiety is the sorrow that weighs down; envy is sorrow for another’s good; pity is sorrow for another’s wrongs.” But it is possible for one to sorrow for another’s wrongs, and for another’s good, and at the same time to be weighed down inwardly, and outwardly to be speechless. Therefore this division is correct.

On the contrary, stands the twofold authority of Gregory of Nyssa‡ and of Damascene.

I answer that, It belongs to the notion of a species that it is something added to the genus. But a thing can be added to a genus in two ways. First, as something belonging of itself to the genus, and virtually contained therein: thus “rational” is added to “animal.” Such an addition makes true species of a genus: as the Philosopher says (Metaph. vii, 12; viii, 2,3). But, secondly, a thing may be added to a genus, that is, as it were, foreign to the notion conveyed by that genus: thus “white” or something of the kind may be added to “animal.” Such

an addition does not make true species of the genus, according to the usual sense in which we speak of genera and species. But sometimes a thing is said to be a species of a certain genus, through having something foreign to that genus indeed, but to which the notion of that genus is applicable: thus a live coal or a flame is said to be a species of fire, because in each of them the nature of fire is applied to a foreign matter. In like manner we speak of astronomy and perspective as being species of mathematics, inasmuch as the principles of mathematics are applied to natural matter.

In accordance with this manner of speaking, the species of sorrow are reckoned by an application of the notion of sorrow to something foreign to it. This foreign matter may be taken on the part of the cause or the object, or of the effect. For the proper object of sorrow is “one’s own evil.” Hence sorrow may be concerned for an object foreign to it either through one’s being sorry for an evil that is not one’s own; and thus we have “pity” which is sorrow for another’s evil, considered, however, as one’s own: or through one’s being sorry for something that is neither evil nor one’s own, but another’s good, considered, however, as one’s own evil: and thus we have “envy.” The proper effect of sorrow consists in a certain “flight of the appetite.” Wherefore the foreign element in the effect of sorrow, may be taken so as to affect the first part only, by excluding flight: and thus we have “anxiety” which weighs on the mind, so as to make escape seem impossible: hence it is also called “perplexity.” If, however, the mind be weighed down so much, that even the limbs become motionless, which belongs to “torpor,” then we have the foreign element affecting both, since there is neither flight, nor is the effect in the appetite. And the reason why torpor espe-

* Nemesius, De Nat. Hom. xix. † Nemesius, De Nat. Hom. xix.

‡ Nemesius

cially is said to deprive one of speech is because of all the external movements the voice is the best expression of the inward thought and desire, not only in men, but also in other animals, as is stated in Polit. i, 1.

Reply to Objection 1. Pleasure is caused by good, which has only one meaning: and so pleasure is not divided into several species as sorrow is; for the latter is caused by evil, which “happens in many ways,” as Dionysius says (Div. Nom. iv).

Reply to Objection 2. Repentance is for one’s own evil, which is the proper object of sorrow: wherefore it does not belong to these species. Jealousy and indignation are included in envy, as we shall explain later (IIa IIae, q. 36, a. 2).

Reply to Objection 3. This division is not according to opposite species; but according to the diversity of foreign matter to which the notion of sorrow is applied, as stated above.

Objection 1. It would seem that pain is not a passion of the soul. Because no passion of the soul is in the body. But pain can be in the body, since Augustine says (*De Vera Relig.* xii), that “bodily pain is a sudden corruption of the well-being of that thing which the soul, by making evil use of it, made subject to corruption.” Therefore pain is not a passion of the soul.

Objection 2. Further, every passion of the soul belongs to the appetitive faculty. But pain does not belong to the appetitive, but rather to the apprehensive part: for Augustine says (*De Nat. Boni* xx) that “bodily pain is caused by the sense resisting a more powerful body.” Therefore pain is not a passion of the soul.

Objection 3. Further, every passion of the soul belongs to the animal appetite. But pain does not belong to the animal appetite, but rather to the natural appetite; for Augustine says (*Gen. ad lit.* viii, 14): “Had not some good remained in nature, we should feel no pain in being punished by the loss of good.” Therefore pain is not a passion of the soul.

On the contrary, Augustine (*De Civ. Dei* xiv, 8) reckons pain among the passions of the soul; quoting Virgil (*Aeneid*, vi, 733): “hence wild desires and grovelling fears/And human laughter, human tears.” [Translation: Conington.]

I answer that, Just as two things are requisite for pleasure; namely, conjunction with good and perception of this conjunction; so also two things are requisite for pain: namely, conjunction with some evil (which is in so far evil as it deprives one of some good), and perception of this conjunction. Now whatever is conjoined, if it have not the aspect of good or evil in regard to the being to which it is conjoined, cannot cause pleasure or pain. Whence it is evident that something under the aspect of good or evil is the object of the pleasure or pain. But good and evil, as such, are objects of the appetite.

Consequently it is clear that pleasure and pain belong to the appetite.

Now every appetitive movement or inclination consequent to apprehension, belongs to the intellective or sensitive appetite: since the inclination of the natural appetite is not consequent to an apprehension of the subject of that appetite, but to the apprehension of another, as stated in the Ia, q. 103, Aa. 1,3. Since then pleasure and pain presuppose some sense or apprehension in the same subject, it is evident that pain, like pleasure, is in the intellective or sensitive appetite.

Again every movement of the sensitive appetite is called a passion, as stated above (q. 22, Aa. 1,3): and especially those which tend to some defect. Consequently pain, according as it is in the sensitive appetite, is most properly called a passion of the soul: just as bodily ailments are properly called passions of the body. Hence Augustine (*De Civ. Dei* xiv, 7,[8]*) reckons pain especially as being a kind of ailment.

Reply to Objection 1. We speak of the body, because the cause of pain is in the body: as when we suffer something hurtful to the body. But the movement of pain is always in the soul; since “the body cannot feel pain unless the soul feel it,” as Augustine says (*Super Psalm* 87:4).

Reply to Objection 2. We speak of pain of the senses, not as though it were an act of the sensitive power; but because the senses are required for bodily pain, in the same way as for bodily pleasure.

Reply to Objection 3. Pain at the loss of good proves the goodness of the nature, not because pain is an act of the natural appetite, but because nature desires something as good, the removal of which being perceived, there results the passion of pain in the sensitive appetite.

* Quoting Cicero

Objection 1. It would seem that sorrow is not pain. For Augustine says (De Civ. Dei xiv, 7) that “pain is used to express bodily suffering.” But sorrow is used more in reference to the soul. Therefore sorrow is not pain.

Objection 2. Further, pain is only in respect of present evil. But sorrow can refer to both past and future evil: thus repentance is sorrow for the past, and anxiety for the future. Therefore sorrow is quite different from pain.

Objection 3. Further, pain seems not to follow save from the sense of touch. But sorrow can arise from all the senses. Therefore sorrow is not pain, and extends to more objects.

On the contrary, The Apostle says (Rom. 9:2): “I have great sorrow [Douay: ‘sadness’] and continual pain [Douay: ‘sorrow’] in my heart,” thus denoting the same thing by sorrow and pain.

I answer that, Pleasure and pain can arise from a twofold apprehension, namely, from the apprehension of an exterior sense; and from the interior apprehension of the intellect or of the imagination. Now the interior apprehension extends to more objects than the exterior apprehension: because whatever things come under the exterior apprehension, come under the interior, but not conversely. Consequently that pleasure alone which is caused by an interior apprehension is called joy, as stated above (q. 31, a. 3): and in like manner that pain alone which is caused by an interior apprehension, is called sorrow. And just as that pleasure which is caused by an exterior apprehension, is called pleasure but not joy; so too that pain which is caused by an exterior apprehension, is called pain indeed but not sorrow. Ac-

cordingly sorrow is a species of pain, as joy is a species of pleasure.

Reply to Objection 1. Augustine is speaking there of the use of the word: because “pain” is more generally used in reference to bodily pains, which are better known, than in reference to spiritual pains.

Reply to Objection 2. External sense perceives only what is present; but the interior cognitive power can perceive the present, past and future. Consequently sorrow can regard present, past and future: whereas bodily pain, which follows apprehension of the external sense, can only regard something present.

Reply to Objection 3. The sensibles of touch are painful, not only in so far as they are disproportionate to the apprehensive power, but also in so far as they are contrary to nature: whereas the objects of the other senses can indeed be disproportionate to the apprehensive power, but they are not contrary to nature, save as they are subordinate to the sensibles of touch. Consequently man alone, who is a perfectly cognizant animal, takes pleasure in the objects of the other senses for their own sake; whereas other animals take no pleasure in them save as referable to the sensibles of touch, as stated in Ethic. iii, 10. Accordingly, in referring to the objects of the other senses, we do not speak of pain in so far as it is contrary to natural pleasure: but rather of sorrow, which is contrary to joy. So then if pain be taken as denoting bodily pain, which is its more usual meaning, then it is contrasted with sorrow, according to the distinction of interior and exterior apprehension; although, on the part of the objects, pleasure extends further than does bodily pain. But if pain be taken in a wide sense, then it is the genus of sorrow, as stated above.

Objection 1. It would seem that sorrow is not contrary to pleasure. For one of two contraries is not the cause of the other. But sorrow can be the cause of pleasure; for it is written (Mat. 5:5): “Blessed are they that mourn, for they shall be comforted.” Therefore they are not contrary to one another.

Objection 2. Further, one contrary does not denominate the other. But to some, pain or sorrow gives pleasure: thus Augustine says (Confess. iii, 2) that in stage-plays sorrow itself gives pleasure: and (Confess. iv, 5) that “weeping is a bitter thing, and yet it sometimes pleases us.” Therefore pain is not contrary to pleasure.

Objection 3. Further, one contrary is not the matter of the other; because contraries cannot co-exist together. But sorrow can be the matter of pleasure; for Augustine says (De Poenit. xiii): “The penitent should ever sorrow, and rejoice in his sorrow.” The Philosopher too says (Ethic. ix, 4) that, on the other hand, “the evil man feels pain at having been pleased.” Therefore pleasure and pain are not contrary to one another.

On the contrary, Augustine says (De Civ. Dei xiv, 6) that “joy is the volition of consent to the things we wish: and that sorrow is the volition of dissent from the things we do not wish.” But consent and dissent are contraries. Therefore pleasure and sorrow are contrary to one another.

I answer that, As the Philosopher says (Metaph. x, 4), contrariety is a difference in respect of a form. Now the form or species of a passion or movement is taken from the object or term. Consequently, since the objects of pleasure and sorrow or pain, viz. present good and present evil, are contrary to one another, it follows that pain and pleasure are contrary to one another.

Reply to Objection 1. Nothing hinders one con-

trary causing the other accidentally: and thus sorrow can be the cause of pleasure. In one way, in so far as from sorrow at the absence of something, or at the presence of its contrary, one seeks the more eagerly for something pleasant: thus a thirsty man seeks more eagerly the pleasure of a drink, as a remedy for the pain he suffers. In another way, in so far as, from a strong desire for a certain pleasure, one does not shrink from undergoing pain, so as to obtain that pleasure. In each of these ways, the sorrows of the present life lead us to the comfort of the future life. Because by the mere fact that man mourns for his sins, or for the delay of glory, he merits the consolation of eternity. In like manner a man merits it when he shrinks not from hardships and straits in order to obtain it.

Reply to Objection 2. Pain itself can be pleasurable accidentally in so far as it is accompanied by wonder, as in stage-plays; or in so far as it recalls a beloved object to one’s memory, and makes one feel one’s love for the thing, whose absence gives us pain. Consequently, since love is pleasant, both pain and whatever else results from love, forasmuch as they remind us of our love, are pleasant. And, for this reason, we derive pleasure even from pains depicted on the stage: in so far as, in witnessing them, we perceive ourselves to conceive a certain love for those who are there represented.

Reply to Objection 3. The will and the reason reflect on their own acts, inasmuch as the acts themselves of the will and reason are considered under the aspect of good or evil. In this way sorrow can be the matter of pleasure, or vice versa, not essentially but accidentally: that is, in so far as either of them is considered under the aspect of good or evil.

Objection 1. It would seem that all sorrow is contrary to all pleasure. Because, just as whiteness and blackness are contrary species of color, so pleasure and sorrow are contrary species of the soul's passions. But whiteness and blackness are universally contrary to one another. Therefore pleasure and sorrow are so too.

Objection 2. Further, remedies are made of things contrary (to the evil). But every pleasure is a remedy for all manner of sorrow, as the Philosopher declares (*Ethic.* vii, 14). Therefore every pleasure is contrary to every sorrow.

Objection 3. Further, contraries are hindrances to one another. But every sorrow hinders any kind of pleasure: as is evident from *Ethic.* x, 5. Therefore every sorrow is contrary to every pleasure.

On the contrary, The same thing is not the cause of contraries. But joy for one thing, and sorrow for the opposite thing, proceed from the same habit: thus from charity it happens that we "rejoice with them that rejoice," and "weep with them that weep" (*Rom.* 12:15). Therefore not every sorrow is contrary to every pleasure.

I answer that, As stated in *Metaph.* x, 4 contrariety is a difference in respect of a form. Now a form may be generic or specific. Consequently things may be contraries in respect of a generic form, as virtue and vice; or in respect of a specific form, as justice and injustice.

Now we must observe that some things are specified by absolute forms, e.g. substances and qualities; whereas other things are specified in relation to something extrinsic, e.g. passions and movements, which derive their species from their terms or objects. Accordingly in those things that are specified by absolute forms, it happens that species contained under contrary genera are not contrary as to their specific nature: but it does not happen for them to have any affinity or fittingness to one another. For intemperance and justice, which are in the contrary genera of virtue and vice, are not contrary to one another in respect of their specific nature; and yet they have no affinity or fittingness to one another. On the other hand, in those things that are specified in relation to something extrinsic, it happens that species belonging to contrary genera, are not only not contrary to one another, but also that they have a certain mutual affinity or fittingness. The reason of this is that where there is one same relation to two contraries, there is contrariety; e.g. to approach to a white thing, and to approach to a black thing, are contraries; whereas

contrary relations to contrary things, implies a certain likeness, e.g. to recede from something white, and to approach to something black. This is most evident in the case of contradiction, which is the principle of opposition: because opposition consists in affirming and denying the same thing, e.g. "white" and "non-white"; while there is fittingness and likeness in the affirmation of one contrary and the denial of the other, as, if I were to say "black" and "not white."

Now sorrow and pleasure, being passions, are specified by their objects. According to their respective genera, they are contrary to one another: since one is a kind of "pursuit," the other a kind of "avoidance," which "are to the appetite, what affirmation and denial are to the intellect" (*Ethic.* vi, 2). Consequently sorrow and pleasure in respect of the same object, are specifically contrary to one another: whereas sorrow and pleasure in respect of objects that are not contrary but disparate, are not specifically contrary to one another, but are also disparate; for instance, sorrow at the death of a friend, and pleasure in contemplation. If, however, those diverse objects be contrary to one another, then pleasure and sorrow are not only specifically contrary, but they also have a certain mutual fittingness and affinity: for instance to rejoice in good and to sorrow for evil.

Reply to Objection 1. Whiteness and blackness do not take their species from their relationship to something extrinsic, as pleasure and sorrow do: wherefore the comparison does not hold.

Reply to Objection 2. Genus is taken from matter, as is stated in *Metaph.* viii, 2; and in accidents the subject takes the place of matter. Now it has been said above that pleasure and sorrow are generically contrary to one another. Consequently in every sorrow the subject has a disposition contrary to the disposition of the subject of pleasure: because in every pleasure the appetite is viewed as accepting what it possesses, and in every sorrow, as avoiding it. And therefore on the part of the subject every pleasure is a remedy for any kind of sorrow, and every sorrow is a hindrance of all manner of pleasure: but chiefly when pleasure is opposed to sorrow specifically.

Wherefore the Reply to the Third Objection is evident. Or we may say that, although not every sorrow is specifically contrary to every pleasure, yet they are contrary to one another in regard to their effects: since one has the effect of strengthening the animal nature, while the other results in a kind of discomfort.

Objection 1. It would seem that there is a sorrow that is contrary to the pleasure of contemplation. For the Apostle says (2 Cor. 7:10): “The sorrow that is according to God, worketh penance steadfast unto salvation.” Now to look at God belongs to the higher reason, whose act is to give itself to contemplation, according to Augustine (De Trin. xii, 3,4). Therefore there is a sorrow contrary to the pleasure of contemplation.

Objection 2. Further, contrary things have contrary effects. If therefore the contemplation of one contrary gives pleasure, the other contrary will give sorrow: and so there will be a sorrow contrary to the pleasure of contemplation.

Objection 3. Further, as the object of pleasure is good, so the object of sorrow is evil. But contemplation can be an evil: since the Philosopher says (Metaph. xii, 9) that “it is unfitting to think of certain things.” Therefore sorrow can be contrary to the pleasure of contemplation.

Objection 4. Further, any work, so far as it is unhindered, can be a cause of pleasure, as stated in Ethic. vii, 12,13; x, 4. But the work of contemplation can be hindered in many ways, either so as to destroy it altogether, or as to make it difficult. Therefore in contemplation there can be a sorrow contrary to the pleasure.

Objection 5. Further, affliction of the flesh is a cause of sorrow. But, as it is written (Eccles. 12:12) “much study is an affliction of the flesh.” Therefore contemplation admits of sorrow contrary to its pleasure.

On the contrary, It is written (Wis. 8:16): “Her,” i.e. wisdom’s, “conversation hath no bitterness nor her company any tediousness; but joy and gladness.” Now the conversation and company of wisdom are found in contemplation. Therefore there is no sorrow contrary to the pleasure of contemplation.

I answer that, The pleasure of contemplation can be understood in two ways. In one way, so that contemplation is the cause, but not the object of pleasure: and then pleasure is taken not in contemplating but in the thing contemplated. Now it is possible to contemplate something harmful and sorrowful, just as to contemplate something suitable and pleasant. Consequently if the pleasure of contemplation be taken in this way, nothing hinders some sorrow being contrary to the pleasure of contemplation.

In another way, the pleasure of contemplation is understood, so that contemplation is its object and cause; as when one takes pleasure in the very act of contemplating. And thus, according to Gregory of Nyssa*, “no sorrow is contrary to that pleasure which is about contemplation”: and the Philosopher says the same (Topic. i, 13; Ethic. x, 3). This, however, is to be understood as being the case properly speaking. The reason is because sorrow is of itself contrary to pleasure in a contrary object: thus pleasure in heat is contrary to sorrow

caused by cold. But there is no contrary to the object of contemplation: because contraries, as apprehended by the mind, are not contrary, but one is the means of knowing the other. Wherefore, properly speaking, there cannot be a sorrow contrary to the pleasure of contemplation. Nor has it any sorrow annexed to it, as bodily pleasures have, which are like remedies against certain annoyances; thus a man takes pleasure in drinking through being troubled with thirst, but when the thirst is quite driven out, the pleasure of drinking ceases also. Because the pleasure of contemplation is not caused by one’s being quit of an annoyance, but by the fact that contemplation is pleasant in itself: for pleasure is not a “becoming” but a perfect operation, as stated above (q. 31, a. 1).

Accidentally, however, sorrow is mingled with the pleasure of contemplation; and this in two ways: first, on the part of an organ, secondly, through some impediment in the apprehension. On the part of an organ, sorrow or pain is mingled with apprehension, directly, as regards the apprehensive powers of the sensitive part, which have a bodily organ; either from the sensible object disagreeing with the normal condition of the organ, as the taste of something bitter, and the smell of something foul; or from the sensible object, though agreeable, being so continuous in its action on the sense, that it exceeds the normal condition of the organ, as stated above (q. 33, a. 2), the result being that an apprehension which at first was pleasant becomes tedious. But these two things cannot occur directly in the contemplation of the mind; because the mind has no corporeal organ: wherefore it was said in the authority quoted above that intellectual contemplation has neither “bitterness,” nor “tediousness.” Since, however, the human mind, in contemplation, makes use of the sensitive powers of apprehension, to whose acts weariness is incidental; therefore some affliction or pain is indirectly mingled with contemplation.

Nevertheless, in neither of these ways, is the pain thus accidentally mingled with contemplation, contrary to the pleasure thereof. Because pain caused by a hindrance to contemplation, is not contrary to the pleasure of contemplation, but rather is in affinity and in harmony with it, as is evident from what has been said above (a. 4): while pain or sorrow caused by bodily weariness, does not belong to the same genus, wherefore it is altogether disparate. Accordingly it is evident that no sorrow is contrary to pleasure taken in the very act of contemplation; nor is any sorrow connected with it save accidentally.

Reply to Objection 1. The “sorrow which is according to God,” is not caused by the very act of intellectual contemplation, but by something which the mind contemplates: viz. by sin, which the mind considers as contrary to the love of God.

* Nemesius, De Nat. Hom. xviii.

Reply to Objection 2. Things which are contrary according to nature are not contrary according as they exist in the mind: for things that are contrary in reality are not contrary in the order of thought; indeed rather is one contrary the reason for knowing the other. Hence one and the same science considers contraries.

Reply to Objection 3. Contemplation, in itself, is never evil, since it is nothing else than the consideration of truth, which is the good of the intellect: it can, however, be evil accidentally, i.e. in so far as the contempla-

tion of a less noble object hinders the contemplation of a more noble object; or on the part of the object contemplated, to which the appetite is inordinately attached.

Reply to Objection 4. Sorrow caused by a hindrance to contemplation, is not contrary to the pleasure of contemplation, but is in harmony with it, as stated above.

Reply to Objection 5. Affliction of the flesh affects contemplation accidentally and indirectly, as stated above.

Objection 1. It would seem that sorrow is to be shunned more than pleasure is to be sought. For Augustine says (QQ. 83, qu. 63): “There is nobody that does not shun sorrow more than he seeks pleasure.” Now that which all agree in doing, seems to be natural. Therefore it is natural and right for sorrow to be shunned more than pleasure is sought.

Objection 2. Further, the action of a contrary conduces to rapidity and intensity of movement: for “hot water freezes quicker and harder,” as the Philosopher says (Meteor. i, 12). But the shunning of sorrow is due to the contrariety of the cause of sorrow; whereas the desire for pleasure does not arise from any contrariety, but rather from the suitableness of the pleasant object. Therefore sorrow is shunned more eagerly than pleasure is sought.

Objection 3. Further, the stronger the passion which a man resists according to reason, the more worthy is he of praise, and the more virtuous: since “virtue is concerned with the difficult and the good” (Ethic. ii, 3). But the brave man who resists the movement of shunning sorrow, is more virtuous than the temperate man, who resists the movement of desire for pleasure: since the Philosopher says (Rhet. ii, 4) that “the brave and the just are chiefly praised.” Therefore the movement of shunning sorrow is more eager than the movement of seeking pleasure.

On the contrary, Good is stronger than evil, as Dionysius declares (Div. Nom. iv). But pleasure is desirable for the sake of the good which is its object; whereas the shunning of sorrow is on account of evil. Therefore the desire for pleasure is more eager than the shunning of sorrow.

I answer that, The desire for pleasure is of itself more eager than the shunning of sorrow. The reason of this is that the cause of pleasure is a suitable good; while the cause of pain or sorrow is an unsuitable evil. Now it happens that a certain good is suitable without any repugnance at all: but it is not possible for any evil to be so unsuitable as not to be suitable in some way. Wherefore pleasure can be entire and perfect: whereas sorrow is always partial. Therefore desire for pleasure is naturally greater than the shunning of sorrow. Another reason is because the good, which is the object of pleasure, is sought for its own sake: whereas the evil, which is the object of sorrow, is to be shunned as being a privation of good: and that which is by reason of itself is stronger than that which is by reason of something else. Moreover we find a confirmation of this in natural movements. For every natural movement is more intense in the end, when a thing approaches the term that is suitable to its nature, than at the beginning, when it leaves the term that is unsuitable to its nature: as though nature were more eager in tending to what is suitable to it, than in shunning what is unsuitable. Therefore the inclination of the appetitive power is, of itself, more eager

in tending to pleasure than in shunning sorrow.

But it happens accidentally that a man shuns sorrow more eagerly than he seeks pleasure: and this for three reasons. First, on the part of the apprehension. Because, as Augustine says (De Trin. x, 12), “love is felt more keenly, when we lack that which we love.” Now from the lack of what we love, sorrow results, which is caused either by the loss of some loved good, or by the presence of some contrary evil. But pleasure suffers no lack of the good loved, for it rests in possession of it. Since then love is the cause of pleasure and sorrow, the latter is more the shunned, according as love is the more keenly felt on account of that which is contrary to it. Secondly, on the part of the cause of sorrow or pain, which cause is repugnant to a good that is more loved than the good in which we take pleasure. For we love the natural well-being of the body more than the pleasure of eating: and consequently we would leave the pleasure of eating and the like, from fear of the pain occasioned by blows or other such causes, which are contrary to the well-being of the body. Thirdly, on the part of the effect: namely, in so far as sorrow hinders not only one pleasure, but all.

Reply to Objection 1. The saying of Augustine that “sorrow is shunned more than pleasure is sought” is true accidentally but not simply. And this is clear from what he says after: “Since we see that the most savage animals are deterred from the greatest pleasures by fear of pain,” which pain is contrary to life which is loved above all.

Reply to Objection 2. It is not the same with movement from within and movement from without. For movement from within tends to what is suitable more than it recedes from that which is unsuitable; as we remarked above in regard to natural movement. But movement from without is intensified by the very opposition: because each thing strives in its own way to resist anything contrary to it, as aiming at its own preservation. Hence violent movement is intense at first, and slackens towards the end. Now the movement of the appetitive faculty is from within: since it tends from the soul to the object. Consequently pleasure is, of itself, more to be sought than sorrow is to be shunned. But the movement of the sensitive faculty is from without, as it were from the object of the soul. Consequently the more contrary a thing is the more it is felt. And then too, accidentally, in so far as the senses are requisite for pleasure and pain, pain is shunned more than pleasure is sought.

Reply to Objection 3. A brave man is not praised because, in accordance with reason, he is not overcome by any kind of sorrow or pain whatever, but because he is not overcome by that which is concerned with the dangers of death. And this kind of sorrow is more shunned, than pleasures of the table or of sexual intercourse are sought, which latter pleasures are the object

of temperance: thus life is loved more than food and sexual pleasure. But the temperate man is praised for refraining from pleasures of touch, more than for not shunning the pains which are contrary to them, as is stated in *Ethic.* iii, 11.

Objection 1. It would seem that outward pain is greater than interior sorrow of the heart. Because outward pain arises from a cause repugnant to the well-being of the body in which is life: whereas interior sorrow is caused by some evil in the imagination. Since, therefore, life is loved more than an imagined good, it seems that, according to what has been said above (a. 6), outward pain is greater than interior sorrow.

Objection 2. Further, the reality moves more than its likeness does. But outward pain arises from the real conjunction of some contrary; whereas inward sorrow arises from the apprehended likeness of a contrary. Therefore outward pain is greater than inward sorrow.

Objection 3. Further, a cause is known by its effect. But outward pain has more striking effects: since man dies sooner of outward pain than of interior sorrow. Therefore outward pain is greater and is shunned more than interior sorrow.

On the contrary, it is written (Ecclus. 25:17): “The sadness of the heart is every wound [Douay: ‘plague’], and the wickedness of a woman is all evil.” Therefore, just as the wickedness of a woman surpasses all other wickedness, as the text implies; so sadness of the heart surpasses every outward wound.

I answer that, Interior and exterior pain agree in one point and differ in two. They agree in this, that each is a movement of the appetitive power, as stated above (a. 1). But they differ in respect of those two things which are requisite for pain and pleasure; namely, in respect of the cause, which is a conjoined good or evil; and in respect of the apprehension. For the cause of outward pain is a conjoined evil repugnant to the body; while the cause of inward pain is a conjoined evil repugnant to the appetite. Again, outward pain arises from an apprehension of sense, chiefly of touch; while inward pain arises from an interior apprehension, of the imagination or of the reason.

If then we compare the cause of inward pain to the cause of outward pain, the former belongs, of itself, to the appetite to which both these pains belong: while the latter belongs to the appetite directly. Because inward pain arises from something being repugnant to the appetite itself, while outward pain arises from something being repugnant to the appetite, through being repugnant to the body. Now, that which is of itself is always prior to that which is by reason of another. Wherefore, from this point of view, inward pain surpasses outward

pain. In like manner also on the part of apprehension: because the apprehension of reason and imagination is of a higher order than the apprehension of the sense of touch. Consequently inward pain is, simply and of itself, more keen than outward pain: a sign whereof is that one willingly undergoes outward pain in order to avoid inward pain: and in so far as outward pain is not repugnant to the interior appetite, it becomes in a manner pleasant and agreeable by way of inward joy. Sometimes, however, outward pain is accompanied by inward pain, and then the pain is increased. Because inward pain is not only greater than outward pain, it is also more universal: since whatever is repugnant to the body, can be repugnant to the interior appetite; and whatever is apprehended by sense may be apprehended by imagination and reason, but not conversely. Hence in the passage quoted above it is said expressively: “Sadness of the heart is every wound,” because even the pains of outward wounds are comprised in the interior sorrows of the heart.

Reply to Objection 1. Inward pain can also arise from things that are destructive of life. And then the comparison of inward to outward pain must not be taken in reference to the various evils that cause pain; but in regard to the various ways in which this cause of pain is compared to the appetite.

Reply to Objection 2. Inward pain is not caused by the apprehended likeness of a thing: for a man is not inwardly pained by the apprehended likeness itself, but by the thing which the likeness represents. And this thing is all the more perfectly apprehended by means of its likeness, as this likeness is more immaterial and abstract. Consequently inward pain is, of itself, greater, as being caused by a greater evil, forasmuch as evil is better known by an inward apprehension.

Reply to Objection 3. Bodily changes are more liable to be caused by outward pain, both from the fact that outward pain is caused by a corruptive conjoined corporally, which is a necessary condition of the sense of touch; and from the fact that the outward sense is more material than the inward sense, just as the sensitive appetite is more material than the intellective. For this reason, as stated above (q. 22, a. 3; q. 31, a. 5), the body undergoes a greater change from the movement of the sensitive appetite: and, in like manner, from outward than from inward pain.

Objection 1. It would seem that Damascene's (De Fide Orth. ii, 14) division of sorrow into four species is incorrect; viz. into "torpor, distress," which Gregory of Nyssa* calls "anxiety,"—"pity," and "envy." For sorrow is contrary to pleasure. But there are not several species of pleasure. Therefore it is incorrect to assign different species of sorrow.

Objection 2. Further, "Repentance" is a species of sorrow; and so are "indignation" and "jealousy," as the Philosopher states (Rhet. ii, 9,11). But these are not included in the above species. Therefore this division is insufficient.

Objection 3. Further, the members of a division should be things that are opposed to one another. But these species are not opposed to one another. For according to Gregory† "torpor is sorrow depriving of speech; anxiety is the sorrow that weighs down; envy is sorrow for another's good; pity is sorrow for another's wrongs." But it is possible for one to sorrow for another's wrongs, and for another's good, and at the same time to be weighed down inwardly, and outwardly to be speechless. Therefore this division is correct.

On the contrary, stands the twofold authority of Gregory of Nyssa‡ and of Damascene.

I answer that, It belongs to the notion of a species that it is something added to the genus. But a thing can be added to a genus in two ways. First, as something belonging of itself to the genus, and virtually contained therein: thus "rational" is added to "animal." Such an addition makes true species of a genus: as the Philosopher says (Metaph. vii, 12; viii, 2,3). But, secondly, a thing may be added to a genus, that is, as it were, foreign to the notion conveyed by that genus: thus "white" or something of the kind may be added to "animal." Such an addition does not make true species of the genus, according to the usual sense in which we speak of genera and species. But sometimes a thing is said to be a species of a certain genus, through having something foreign to that genus indeed, but to which the notion of that genus is applicable: thus a live coal or a flame is said to be a species of fire, because in each of them the nature of fire is applied to a foreign matter. In like manner we speak of astronomy and perspective as be-

ing species of mathematics, inasmuch as the principles of mathematics are applied to natural matter.

In accordance with this manner of speaking, the species of sorrow are reckoned by an application of the notion of sorrow to something foreign to it. This foreign matter may be taken on the part of the cause or the object, or of the effect. For the proper object of sorrow is "one's own evil." Hence sorrow may be concerned for an object foreign to it either through one's being sorry for an evil that is not one's own; and thus we have "pity" which is sorrow for another's evil, considered, however, as one's own: or through one's being sorry for something that is neither evil nor one's own, but another's good, considered, however, as one's own evil: and thus we have "envy." The proper effect of sorrow consists in a certain "flight of the appetite." Wherefore the foreign element in the effect of sorrow, may be taken so as to affect the first part only, by excluding flight: and thus we have "anxiety" which weighs on the mind, so as to make escape seem impossible: hence it is also called "perplexity." If, however, the mind be weighed down so much, that even the limbs become motionless, which belongs to "torpor," then we have the foreign element affecting both, since there is neither flight, nor is the effect in the appetite. And the reason why torpor especially is said to deprive one of speech is because of all the external movements the voice is the best expression of the inward thought and desire, not only in men, but also in other animals, as is stated in Polit. i, 1.

Reply to Objection 1. Pleasure is caused by good, which has only one meaning: and so pleasure is not divided into several species as sorrow is; for the latter is caused by evil, which "happens in many ways," as Dionysius says (Div. Nom. iv).

Reply to Objection 2. Repentance is for one's own evil, which is the proper object of sorrow: wherefore it does not belong to these species. Jealousy and indignation are included in envy, as we shall explain later (Ia IIae, q. 36, a. 2).

Reply to Objection 3. This division is not according to opposite species; but according to the diversity of foreign matter to which the notion of sorrow is applied, as stated above.

* Nemesius, De Nat. Hom. xix. † Nemesius, De Nat. Hom. xix. ‡ Nemesius

FIRST PART OF THE SECOND PART, QUESTION 36

Of the Causes of Sorrow or Pain (In Four Articles)

We must now consider the causes of sorrow: under which head there are four points of inquiry:

- (1) Whether sorrow is caused by the loss of a good or rather by the presence of an evil?
- (2) Whether desire is a cause of sorrow?
- (3) Whether the craving for unity is a cause of sorrow?
- (4) Whether an irresistible power is a cause of sorrow?

Whether sorrow is caused by the loss of good or by the presence of evil?

Ia IIae q. 36 a. 1

Objection 1. It would seem that sorrow is caused by the loss of a good rather than by the presence of an evil. For Augustine says (De viii QQ. Dulcit. qu. 1) that sorrow is caused by the loss of temporal goods. Therefore, in like manner, every sorrow is caused by the loss of some good.

Objection 2. Further, it was said above (q. 35, a. 4) that the sorrow which is contrary to a pleasure, has the same object as that pleasure. But the object of pleasure is good, as stated above (q. 23, a. 4; q. 31, a. 1; q. 35, a. 3). Therefore sorrow is caused chiefly by the loss of good.

Objection 3. Further, according to Augustine (De Civ. Dei xiv, 7,9), love is the cause of sorrow, as of the other emotions of the soul. But the object of love is good. Therefore pain or sorrow is felt for the loss of good rather than for an evil that is present.

On the contrary, Damascene says (De Fide Orth. ii, 12) that “the dreaded evil gives rise to fear, the present evil is the cause of sorrow.”

I answer that, If privations, as considered by the mind, were what they are in reality, this question would seem to be of no importance. For, as stated in the Ia, q. 14, a. 10 and Ia, q. 48, a. 3, evil is the privation of good: and privation is in reality nothing else than the lack of the contrary habit; so that, in this respect, to sorrow for the loss of good, would be the same as to sorrow for the presence of evil. But sorrow is a movement of the appetite in consequence of an apprehension: and even a privation, as apprehended, has the aspect of a being, wherefore it is called “a being of reason.” And in this way evil, being a privation, is regarded as a “contrary.” Accordingly, so far as the movement of the appetite is concerned, it makes a difference which of the two it regards chiefly, the present evil or the good which is lost.

Again, since the movement of the animal appetite holds the same place in the actions of the soul, as natural movement in natural things; the truth of the matter is to

be found by considering natural movements. For if, in natural movements, we observe those of approach and withdrawal, approach is of itself directed to something suitable to nature; while withdrawal is of itself directed to something contrary to nature; thus a heavy body, of itself, withdraws from a higher place, and approaches naturally to a lower place. But if we consider the cause of both these movements, viz. gravity, then gravity itself inclines towards the lower place more than it withdraws from the higher place, since withdrawal from the latter is the reason for its downward tendency.

Accordingly, since, in the movements of the appetite, sorrow is a kind of flight or withdrawal, while pleasure is a kind of pursuit or approach; just as pleasure regards first the good possessed, as its proper object, so sorrow regards the evil that is present. On the other hand love, which is the cause of pleasure and sorrow, regards good rather than evil: and therefore, forasmuch as the object is the cause of a passion, the present evil is more properly the cause of sorrow or pain, than the good which is lost.

Reply to Objection 1. The loss itself of good is apprehended as an evil, just as the loss of evil is apprehended as a good: and in this sense Augustine says that pain results from the loss of temporal goods.

Reply to Objection 2. Pleasure and its contrary pain have the same object, but under contrary aspects: because if the presence of a particular thing be the object of pleasure, the absence of that same thing is the object of sorrow. Now one contrary includes the privation of the other, as stated in Metaph. x, 4: and consequently sorrow in respect of one contrary is, in a way, directed to the same thing under a contrary aspect.

Reply to Objection 3. When many movements arise from one cause, it does not follow that they all regard chiefly that which the cause regards chiefly, but only the first of them. And each of the others regards chiefly that which is suitable to it according to its own nature.

Objection 1. It would seem that desire is not a cause of pain or sorrow. Because sorrow of itself regards evil, as stated above (a. 1): whereas desire is a movement of the appetite towards good. Now movement towards one contrary is not a cause of movement towards the other contrary. Therefore desire is not a cause of pain.

Objection 2. Further, pain, according to Damascene (De Fide Orth. ii, 12), is caused by something present; whereas the object of desire is something future. Therefore desire is not a cause of pain.

Objection 3. Further, that which is pleasant in itself is not a cause of pain. But desire is pleasant in itself, as the Philosopher says (Rhet. i, 11). Therefore desire is not a cause of pain or sorrow.

On the contrary, Augustine says (Enchiridion xxiv): “When ignorance of things necessary to be done, and desire of things hurtful, found their way in: error and pain stole an entrance in their company.” But ignorance is the cause of error. Therefore desire is a cause of sorrow.

I answer that, Sorrow is a movement of the animal appetite. Now, as stated above (a. 1), the appetitive movement is likened to the natural appetite; a likeness, that may be assigned to a twofold cause; one, on the part of the end, the other, on the part of the principle of movement. Thus, on the part of the end, the cause of a heavy body’s downward movement is the lower place; while the principle of that movement is a natural inclination resulting from gravity.

Now the cause of the appetitive movement, on the part of the end, is the object of that movement. And thus, it has been said above (a. 1) that the cause of pain or sorrow is a present evil. On the other hand, the cause, by way or principle, of that movement, is the inward inclination of the appetite; which inclination regards, first of all, the good, and in consequence, the rejection of a contrary evil. Hence the first principle of this appeti-

tive movement is love, which is the first inclination of the appetite towards the possession of good: while the second principle is hatred, which is the first inclination of the appetite towards the avoidance of evil. But since concupiscence or desire is the first effect of love, which gives rise to the greatest pleasure, as stated above (q. 32, a. 6); hence it is that Augustine often speaks of desire or concupiscence in the sense of love, as was also stated (q. 30, a. 2, ad 2): and in this sense he says that desire is the universal cause of sorrow. Sometimes, however, desire taken in its proper sense, is the cause of sorrow. Because whatever hinders a movement from reaching its end is contrary to that movement. Now that which is contrary to the movement of the appetite, is a cause of sorrow. Consequently, desire becomes a cause of sorrow, in so far as we sorrow for the delay of a desired good, or for its entire removal. But it cannot be a universal cause of sorrow: since we sorrow more for the loss of present good, in which we have already taken pleasure, than for the withdrawal of future good which we desire to have.

Reply to Objection 1. The inclination of the appetite to the possession of good causes the inclination of the appetite to fly from evil, as stated above. And hence it is that the appetitive movements that regard good, are reckoned as causing the appetitive movements that regard evil.

Reply to Objection 2. That which is desired, though really future, is, nevertheless, in a way, present, inasmuch as it is hoped for. Or we may say that although the desired good itself is future, yet the hindrance is reckoned as present, and so gives rise to sorrow.

Reply to Objection 3. Desire gives pleasure, so long as there is hope of obtaining that which is desired. But, when hope is removed through the presence of an obstacle, desire causes sorrow.

Objection 1. It would seem that the craving for unity is not a cause of sorrow. For the Philosopher says (Ethic. x, 3) that “this opinion,” which held repletion to be the cause of pleasure, and division*, the cause of sorrow, “seems to have originated in pains and pleasures connected with food.” But not every pleasure or sorrow is of this kind. Therefore the craving for unity is not the universal cause of sorrow; since repletion pertains to unity, and division is the cause of multitude.

Objection 2. Further, every separation is opposed to unity. If therefore sorrow were caused by a craving for unity, no separation would be pleasant: and this is clearly untrue as regards the separation of whatever is

superfluous.

Objection 3. Further, for the same reason we desire the conjunction of good and the removal of evil. But as conjunction regards unity, since it is a kind of union; so separation is contrary to unity. Therefore the craving for unity should not be reckoned, rather than the craving for separation, as causing sorrow.

On the contrary, Augustine says (De Lib. Arb. iii, 23), that “from the pain that dumb animals feel, it is quite evident how their souls desire unity, in ruling and quickening their bodies. For what else is pain but a feeling of impatience of division or corruption?”

I answer that, Forasmuch as the desire or craving

* Aristotle wrote *endeian*, ‘want’; St. Thomas, in the Latin version, read ‘incisionem’; should he have read ‘indigentiam’?

for good is reckoned as a cause of sorrow, so must a craving for unity, and love, be accounted as causing sorrow. Because the good of each thing consists in a certain unity, inasmuch as each thing has, united in itself, the elements of which its perfection consists: wherefore the Platonists held that “one” is a principle, just as “good” is. Hence everything naturally desires unity, just as it desires goodness: and therefore, just as love or desire for good is a cause of sorrow, so also is the love or craving for unity.

Reply to Objection 1. Not every kind of union causes perfect goodness, but only that on which the perfect being of a thing depends. Hence neither does the desire of any kind of unity cause pain or sorrow, as some have maintained: whose opinion is refuted by the Philosopher from the fact that repletion is not al-

ways pleasant; for instance, when a man has eaten to repletion, he takes no further pleasure in eating; because repletion or union of this kind, is repugnant rather than conducive to perfect being. Consequently sorrow is caused by the craving, not for any kind of unity, but for that unity in which the perfection of nature consists.

Reply to Objection 2. Separation can be pleasant, either because it removes something contrary to a thing’s perfection, or because it has some union connected with it, such as union of the sense to its object.

Reply to Objection 3. Separation from things hurtful and corruptive is desired, in so far as they destroy the unity which is due. Wherefore the desire for such like separation is not the first cause of sorrow, whereas the craving for unity is.

Whether an irresistible power is a cause of sorrow?

Ia IIae q. 36 a. 4

Objection 1. It would seem that a greater power should not be reckoned a cause of sorrow. For that which is in the power of the agent is not present but future. But sorrow is for present evil. Therefore a greater power is not a cause of sorrow.

Objection 2. Further, hurt inflicted is the cause of sorrow. But hurt can be inflicted even by a lesser power. Therefore a greater power should not be reckoned as a cause of sorrow.

Objection 3. Further, the interior inclinations of the soul are the causes of the movements of appetite. But a greater power is something external. Therefore it should not be reckoned as a cause of sorrow.

On the contrary, Augustine says (De Nat. Boni xx): “Sorrow in the soul is caused by the will resisting a stronger power: while pain in the body is caused by sense resisting a stronger body.”

I answer that, As stated above (a. 1), a present evil, is cause of sorrow or pain, by way of object. Therefore that which is the cause of the evil being present, should be reckoned as causing pain or sorrow. Now it is evident that it is contrary to the inclination of the appetite to be united with a present evil: and whatever is contrary to a thing’s inclination does not happen to it save by the action of something stronger. Wherefore Augustine reckons a greater power as being the cause of sorrow.

But it must be noted that if the stronger power goes

so far as to transform the contrary inclination into its own inclination there will be no longer repugnance or violence: thus if a stronger agent, by its action on a heavy body, deprives it of its downward tendency, its consequent upward tendency is not violent but natural to it.

Accordingly if some greater power prevail so far as to take away from the will or the sensitive appetite, their respective inclinations, pain or sorrow will not result therefrom; such is the result only when the contrary inclination of the appetite remains. And hence Augustine says (De Nat. Boni xx) that sorrow is caused by the will “resisting a stronger power”: for were it not to resist, but to yield by consenting, the result would be not sorrow but pleasure.

Reply to Objection 1. A greater power causes sorrow, as acting not potentially but actually, i.e. by causing the actual presence of the corruptive evil.

Reply to Objection 2. Nothing hinders a power which is not simply greater, from being greater in some respect: and accordingly it is able to inflict some harm. But if it be nowise stronger, it can do no harm at all: wherefore it cannot bring about that which causes sorrow.

Reply to Objection 3. External agents can be the causes of appetitive movements, in so far as they cause the presence of the object: and it is thus that a greater power is reckoned to be the cause of sorrow.

Objection 1. It would seem that sorrow is caused by the loss of a good rather than by the presence of an evil. For Augustine says (De viii QQ. Dulcit. qu. 1) that sorrow is caused by the loss of temporal goods. Therefore, in like manner, every sorrow is caused by the loss of some good.

Objection 2. Further, it was said above (q. 35, a. 4) that the sorrow which is contrary to a pleasure, has the same object as that pleasure. But the object of pleasure is good, as stated above (q. 23, a. 4; q. 31, a. 1; q. 35, a. 3). Therefore sorrow is caused chiefly by the loss of good.

Objection 3. Further, according to Augustine (De Civ. Dei xiv, 7,9), love is the cause of sorrow, as of the other emotions of the soul. But the object of love is good. Therefore pain or sorrow is felt for the loss of good rather than for an evil that is present.

On the contrary, Damascene says (De Fide Orth. ii, 12) that “the dreaded evil gives rise to fear, the present evil is the cause of sorrow.”

I answer that, If privations, as considered by the mind, were what they are in reality, this question would seem to be of no importance. For, as stated in the Ia, q. 14, a. 10 and Ia, q. 48, a. 3, evil is the privation of good: and privation is in reality nothing else than the lack of the contrary habit; so that, in this respect, to sorrow for the loss of good, would be the same as to sorrow for the presence of evil. But sorrow is a movement of the appetite in consequence of an apprehension: and even a privation, as apprehended, has the aspect of a being, wherefore it is called “a being of reason.” And in this way evil, being a privation, is regarded as a “contrary.” Accordingly, so far as the movement of the appetite is concerned, it makes a difference which of the two it regards chiefly, the present evil or the good which is lost.

Again, since the movement of the animal appetite holds the same place in the actions of the soul, as natural movement in natural things; the truth of the matter is to

be found by considering natural movements. For if, in natural movements, we observe those of approach and withdrawal, approach is of itself directed to something suitable to nature; while withdrawal is of itself directed to something contrary to nature; thus a heavy body, of itself, withdraws from a higher place, and approaches naturally to a lower place. But if we consider the cause of both these movements, viz. gravity, then gravity itself inclines towards the lower place more than it withdraws from the higher place, since withdrawal from the latter is the reason for its downward tendency.

Accordingly, since, in the movements of the appetite, sorrow is a kind of flight or withdrawal, while pleasure is a kind of pursuit or approach; just as pleasure regards first the good possessed, as its proper object, so sorrow regards the evil that is present. On the other hand love, which is the cause of pleasure and sorrow, regards good rather than evil: and therefore, forasmuch as the object is the cause of a passion, the present evil is more properly the cause of sorrow or pain, than the good which is lost.

Reply to Objection 1. The loss itself of good is apprehended as an evil, just as the loss of evil is apprehended as a good: and in this sense Augustine says that pain results from the loss of temporal goods.

Reply to Objection 2. Pleasure and its contrary pain have the same object, but under contrary aspects: because if the presence of a particular thing be the object of pleasure, the absence of that same thing is the object of sorrow. Now one contrary includes the privation of the other, as stated in Metaph. x, 4: and consequently sorrow in respect of one contrary is, in a way, directed to the same thing under a contrary aspect.

Reply to Objection 3. When many movements arise from one cause, it does not follow that they all regard chiefly that which the cause regards chiefly, but only the first of them. And each of the others regards chiefly that which is suitable to it according to its own nature.

Objection 1. It would seem that desire is not a cause of pain or sorrow. Because sorrow of itself regards evil, as stated above (a. 1): whereas desire is a movement of the appetite towards good. Now movement towards one contrary is not a cause of movement towards the other contrary. Therefore desire is not a cause of pain.

Objection 2. Further, pain, according to Damascene (*De Fide Orth.* ii, 12), is caused by something present; whereas the object of desire is something future. Therefore desire is not a cause of pain.

Objection 3. Further, that which is pleasant in itself is not a cause of pain. But desire is pleasant in itself, as the Philosopher says (*Rhet.* i, 11). Therefore desire is not a cause of pain or sorrow.

On the contrary, Augustine says (*Enchiridion* xxiv): “When ignorance of things necessary to be done, and desire of things hurtful, found their way in: error and pain stole an entrance in their company.” But ignorance is the cause of error. Therefore desire is a cause of sorrow.

I answer that, Sorrow is a movement of the animal appetite. Now, as stated above (a. 1), the appetitive movement is likened to the natural appetite; a likeness, that may be assigned to a twofold cause; one, on the part of the end, the other, on the part of the principle of movement. Thus, on the part of the end, the cause of a heavy body’s downward movement is the lower place; while the principle of that movement is a natural inclination resulting from gravity.

Now the cause of the appetitive movement, on the part of the end, is the object of that movement. And thus, it has been said above (a. 1) that the cause of pain or sorrow is a present evil. On the other hand, the cause, by way or principle, of that movement, is the inward inclination of the appetite; which inclination regards, first of all, the good, and in consequence, the rejection of a contrary evil. Hence the first principle of this appeti-

tive movement is love, which is the first inclination of the appetite towards the possession of good: while the second principle is hatred, which is the first inclination of the appetite towards the avoidance of evil. But since concupiscence or desire is the first effect of love, which gives rise to the greatest pleasure, as stated above (q. 32, a. 6); hence it is that Augustine often speaks of desire or concupiscence in the sense of love, as was also stated (q. 30, a. 2, ad 2): and in this sense he says that desire is the universal cause of sorrow. Sometimes, however, desire taken in its proper sense, is the cause of sorrow. Because whatever hinders a movement from reaching its end is contrary to that movement. Now that which is contrary to the movement of the appetite, is a cause of sorrow. Consequently, desire becomes a cause of sorrow, in so far as we sorrow for the delay of a desired good, or for its entire removal. But it cannot be a universal cause of sorrow: since we sorrow more for the loss of present good, in which we have already taken pleasure, than for the withdrawal of future good which we desire to have.

Reply to Objection 1. The inclination of the appetite to the possession of good causes the inclination of the appetite to fly from evil, as stated above. And hence it is that the appetitive movements that regard good, are reckoned as causing the appetitive movements that regard evil.

Reply to Objection 2. That which is desired, though really future, is, nevertheless, in a way, present, inasmuch as it is hoped for. Or we may say that although the desired good itself is future, yet the hindrance is reckoned as present, and so gives rise to sorrow.

Reply to Objection 3. Desire gives pleasure, so long as there is hope of obtaining that which is desired. But, when hope is removed through the presence of an obstacle, desire causes sorrow.

Objection 1. It would seem that the craving for unity is not a cause of sorrow. For the Philosopher says (Ethic. x, 3) that “this opinion,” which held repletion to be the cause of pleasure, and division*, the cause of sorrow, “seems to have originated in pains and pleasures connected with food.” But not every pleasure or sorrow is of this kind. Therefore the craving for unity is not the universal cause of sorrow; since repletion pertains to unity, and division is the cause of multitude.

Objection 2. Further, every separation is opposed to unity. If therefore sorrow were caused by a craving for unity, no separation would be pleasant: and this is clearly untrue as regards the separation of whatever is superfluous.

Objection 3. Further, for the same reason we desire the conjunction of good and the removal of evil. But as conjunction regards unity, since it is a kind of union; so separation is contrary to unity. Therefore the craving for unity should not be reckoned, rather than the craving for separation, as causing sorrow.

On the contrary, Augustine says (De Lib. Arb. iii, 23), that “from the pain that dumb animals feel, it is quite evident how their souls desire unity, in ruling and quickening their bodies. For what else is pain but a feeling of impatience of division or corruption?”

I answer that, Forasmuch as the desire or craving for good is reckoned as a cause of sorrow, so must a craving for unity, and love, be accounted as causing sorrow. Because the good of each thing consists in a cer-

tain unity, inasmuch as each thing has, united in itself, the elements of which its perfection consists: wherefore the Platonists held that “one” is a principle, just as “good” is. Hence everything naturally desires unity, just as it desires goodness: and therefore, just as love or desire for good is a cause of sorrow, so also is the love or craving for unity.

Reply to Objection 1. Not every kind of union causes perfect goodness, but only that on which the perfect being of a thing depends. Hence neither does the desire of any kind of unity cause pain or sorrow, as some have maintained: whose opinion is refuted by the Philosopher from the fact that repletion is not always pleasant; for instance, when a man has eaten to repletion, he takes no further pleasure in eating; because repletion or union of this kind, is repugnant rather than conducive to perfect being. Consequently sorrow is caused by the craving, not for any kind of unity, but for that unity in which the perfection of nature consists.

Reply to Objection 2. Separation can be pleasant, either because it removes something contrary to a thing’s perfection, or because it has some union connected with it, such as union of the sense to its object.

Reply to Objection 3. Separation from things hurtful and corruptive is desired, in so far as they destroy the unity which is due. Wherefore the desire for such like separation is not the first cause of sorrow, whereas the craving for unity is.

* Aristotle wrote *endeian*, ‘want’; St. Thomas, in the Latin version, read ‘incisionem’; should he have read ‘indigentiam’?

Objection 1. It would seem that a greater power should not be reckoned a cause of sorrow. For that which is in the power of the agent is not present but future. But sorrow is for present evil. Therefore a greater power is not a cause of sorrow.

Objection 2. Further, hurt inflicted is the cause of sorrow. But hurt can be inflicted even by a lesser power. Therefore a greater power should not be reckoned as a cause of sorrow.

Objection 3. Further, the interior inclinations of the soul are the causes of the movements of appetite. But a greater power is something external. Therefore it should not be reckoned as a cause of sorrow.

On the contrary, Augustine says (De Nat. Boni xx): “Sorrow in the soul is caused by the will resisting a stronger power: while pain in the body is caused by sense resisting a stronger body.”

I answer that, As stated above (a. 1), a present evil, is cause of sorrow or pain, by way of object. Therefore that which is the cause of the evil being present, should be reckoned as causing pain or sorrow. Now it is evident that it is contrary to the inclination of the appetite to be united with a present evil: and whatever is contrary to a thing’s inclination does not happen to it save by the action of something stronger. Wherefore Augustine reckons a greater power as being the cause of sorrow.

But it must be noted that if the stronger power goes

so far as to transform the contrary inclination into its own inclination there will be no longer repugnance or violence: thus if a stronger agent, by its action on a heavy body, deprives it of its downward tendency, its consequent upward tendency is not violent but natural to it.

Accordingly if some greater power prevail so far as to take away from the will or the sensitive appetite, their respective inclinations, pain or sorrow will not result therefrom; such is the result only when the contrary inclination of the appetite remains. And hence Augustine says (De Nat. Boni xx) that sorrow is caused by the will “resisting a stronger power”: for were it not to resist, but to yield by consenting, the result would be not sorrow but pleasure.

Reply to Objection 1. A greater power causes sorrow, as acting not potentially but actually, i.e. by causing the actual presence of the corruptive evil.

Reply to Objection 2. Nothing hinders a power which is not simply greater, from being greater in some respect: and accordingly it is able to inflict some harm. But if it be nowise stronger, it can do no harm at all: wherefore it cannot bring about that which causes sorrow.

Reply to Objection 3. External agents can be the causes of appetitive movements, in so far as they cause the presence of the object: and it is thus that a greater power is reckoned to be the cause of sorrow.

FIRST PART OF THE SECOND PART, QUESTION 37

Of the Effects of Pain or Sorrow (In Four Articles)

We must now consider the effects of pain or of sorrow: under which head there are four points of inquiry:

- (1) Whether pain deprives one of the power to learn?
- (2) Whether the effect of sorrow or pain is to burden the soul?
- (3) Whether sorrow or pain weakens all activity?
- (4) Whether sorrow is more harmful to the body than all the other passions of the soul?

Whether pain deprives one of the power to learn?

Ia IIae q. 37 a. 1

Objection 1. It would seem that pain does not deprive one of the power to learn. For it is written (Is. 26:9): “When Thou shalt do Thy judgments on the earth, the inhabitants of the world shall learn justice”: and further on (verse 16): “In the tribulation of murmuring Thy instruction was with them.” But the judgments of God and tribulation cause sorrow in men’s hearts. Therefore pain or sorrow, far from destroying, increases the power of learning.

Objection 2. Further, it is written (Is. 28:9): “Whom shall He teach knowledge? And whom shall He make to understand the hearing? Them that are weaned from the milk, that are drawn away from the breasts,” i.e. from pleasures. But pain and sorrow are most destructive of pleasure; since sorrow hinders all pleasure, as stated in Ethic. vii, 14: and (Ecclus. 11:29) it is stated that “the affliction of an hour maketh one forget great delights.” Therefore pain, instead of taking away, increases the faculty of learning.

Objection 3. Further, inward sorrow surpasses outward pain, as stated above (q. 35, a. 7). But man can learn while sorrowful. Much more, therefore, can he learn while in bodily pain.

On the contrary, Augustine says (Soliloq. i, 12): “Although during those days I was tormented with a violent tooth-ache, I was not able to turn over in my mind other things than those I had already learnt; and as to learning anything, I was quite unequal to it, because it required undivided attention.”

I answer that, Since all the powers of the soul are rooted in the one essence of the soul, it must needs happen, when the intention of the soul is strongly drawn towards the action of one power, that it is withdrawn from the action of another power: because the soul, being one, can only have one intention. The result is that if one thing draws upon itself the entire intention of the soul, or a great portion thereof, anything else requiring considerable attention is incompatible therewith.

Now it is evident that sensible pain above all draws the soul’s attention to itself; because it is natural for each thing to tend wholly to repel whatever is contrary to it, as may be observed even in natural things. It is likewise evident that in order to learn anything new, we require study and effort with a strong intention, as is

clearly stated in Prov. 2:4,5: “If thou shalt seek wisdom as money, and shall dig for her as for a treasure, then shalt thou understand learning” [Vulg: ‘the fear of the Lord’]. Consequently if the pain be acute, man is prevented at the time from learning anything: indeed it can be so acute, that, as long as it lasts, a man is unable to give his attention even to that which he knew already. However a difference is to be observed according to the difference of love that a man has for learning or for considering: because the greater his love, the more will he retain the intention of his mind so as to prevent it from turning entirely to the pain.

Reply to Objection 1. Moderate sorrow, that does not cause the mind to wander, can conduce to the acquisition of learning especially in regard to those things by which a man hopes to be freed from sorrow. And thus, “in the tribulation of murmuring,” men are more apt to be taught by God.

Reply to Objection 2. Both pleasure and pain, in so far as they draw upon themselves the soul’s intention, hinder the reason from the act of consideration, wherefore it is stated in Ethic. vii, 11 that “in the moment of sexual pleasure, a man cannot understand anything.” Nevertheless pain attracts the soul’s intention more than pleasure does: thus we observe in natural things that the action of a natural body is more intense in regard to its contrary; for instance, hot water is more accessible to the action of cold, and in consequence freezes harder. If therefore pain or sorrow be moderate, it can conduce accidentally to the facility of learning, in so far as it takes away an excess of pleasure. But, of itself, it is a hindrance; and if it be intense, it prevents it altogether.

Reply to Objection 3. External pain arises from hurt done to the body, so that it involves bodily transmutation more than inward sorrow does: and yet the latter is greater in regard to the formal element of pain, which belongs to the soul. Consequently bodily pain is a greater hindrance to contemplation which requires complete repose, than inward sorrow is. Nevertheless if inward sorrow be very intense, it attracts the intention, so that man is unable to learn anything for the first time: wherefore on account of sorrow Gregory interrupted his commentary on Ezechiel (Hom. xxii in Ezechiel).

Objection 1. It would seem that it is not an effect of sorrow to burden the soul. For the Apostle says (2 Cor. 7:11): “Behold this self-same thing, that you were made sorrowful according to God, how great carefulness it worketh in you: yea, defence, yea indignation,” etc. Now carefulness and indignation imply that the soul is uplifted, which is contrary to being depressed. Therefore depression is not an effect of sorrow.

Objection 2. Further, sorrow is contrary to pleasure. But the effect of pleasure is expansion: the opposite of which is not depression but contraction. Therefore depression should not be reckoned as an effect of sorrow.

Objection 3. Further, sorrow consumes those who are inflicted therewith, as may be gathered from the words of the Apostle (2 Cor. 2:7): “Lest perhaps such an one be swallowed up with overmuch sorrow.” But that which is depressed is not consumed; nay, it is weighed down by something heavy, whereas that which is consumed enters within the consumer. Therefore depression should not be reckoned an effect of sorrow.

On the contrary, Gregory of Nyssa* and Damascene (De Fide Orth. ii, 14) speak of “depressing sorrow.”

I answer that, The effects of the soul’s passions are sometimes named metaphorically, from a likeness to sensible bodies: for the reason that the movements of the animal appetite are like the inclinations of the natural appetite. And in this way fervor is ascribed to love, expansion to pleasure, and depression to sorrow. For a man is said to be depressed, through being hindered in his own movement by some weight. Now it is evident

from what has been said above (q. 23, a. 4; q. 25, a. 4; q. 36, a. 1) that sorrow is caused by a present evil: and this evil, from the very fact that it is repugnant to the movement of the will, depresses the soul, inasmuch as it hinders it from enjoying that which it wishes to enjoy. And if the evil which is the cause of sorrow be not so strong as to deprive one of the hope of avoiding it, although the soul be depressed in so far as, for the present, it fails to grasp that which it craves for; yet it retains the movement whereby to repulse that evil. If, on the other hand, the strength of the evil be such as to exclude the hope of evasion, then even the interior movement of the afflicted soul is absolutely hindered, so that it cannot turn aside either this way or that. Sometimes even the external movement of the body is paralyzed, so that a man becomes completely stupefied.

Reply to Objection 1. That uplifting of the soul ensues from the sorrow which is according to God, because it brings with it the hope of the forgiveness of sin.

Reply to Objection 2. As far as the movement of the appetite is concerned, contraction and depression amount to the same: because the soul, through being depressed so as to be unable to attend freely to outward things, withdraws to itself, closing itself up as it were.

Reply to Objection 3. Sorrow is said to consume man, when the force of the afflicting evil is such as to shut out all hope of evasion: and thus also it both depresses and consumes at the same time. For certain things, taken metaphorically, imply one another, which taken literally, appear to exclude one another.

Objection 1. It would seem that sorrow does not weaken all activity. Because carefulness is caused by sorrow, as is clear from the passage of the Apostle quoted above (a. 2, obj. 1). But carefulness conduces to good work: wherefore the Apostle says (2 Tim. 2:15): “Carefully study to present thyself. . . a workman that needeth not to be ashamed.” Therefore sorrow is not a hindrance to work, but helps one to work well.

Objection 2. Further, sorrow causes desire in many cases, as stated in Ethic. vii, 14. But desire causes intensity of action. Therefore sorrow does too.

Objection 3. Further, as some actions are proper to the joyful, so are others proper to the sorrowful; for instance, to mourn. Now a thing is improved by that which is suitable to it. Therefore certain actions are not hindered but improved by reason of sorrow.

On the contrary, The Philosopher says (Ethic. x, 4) that “pleasure perfects action,” whereas on the other hand, “sorrow hinders it” (Ethic. x, 5).

I answer that, As stated above (a. 2), sorrow at

times does not depress or consume the soul, so as to shut out all movement, internal or external; but certain movements are sometimes caused by sorrow itself. Accordingly action stands in a twofold relation to sorrow. First, as being the object of sorrow: and thus sorrow hinders any action: for we never do that which we do with sorrow, so well as that which we do with pleasure, or without sorrow. The reason for this is that the will is the cause of human actions: and consequently when we do something that gives pain, the action must of necessity be weakened in consequence. Secondly, action stands in relation to sorrow, as to its principle and cause: and such action must needs be improved by sorrow: thus the more one sorrows on account of a certain thing, the more one strives to shake off sorrow, provided there is a hope of shaking it off: otherwise no movement or action would result from that sorrow.

From what has been said the replies to the objections are evident.

* Nemesius, De Nat. Hom. xix.

Objection 1. It would seem that sorrow is not most harmful to the body. For sorrow has a spiritual existence in the soul. But those things which have only a spiritual existence do not cause a transmutation in the body: as is evident with regard to the images of colors, which images are in the air and do not give color to bodies. Therefore sorrow is not harmful to the body.

Objection 2. Further if it be harmful to the body, this can only be due to its having a bodily transmutation in conjunction with it. But bodily transmutation takes place in all the passions of the soul, as stated above (q. 22, Aa. 1,3). Therefore sorrow is not more harmful to the body than the other passions of the soul.

Objection 3. Further, the Philosopher says (Ethic. vii, 3) that “anger and desire drive some to madness”: which seems to be a very great harm, since reason is the most excellent thing in man. Moreover, despair seems to be more harmful than sorrow; for it is the cause of sorrow. Therefore sorrow is not more harmful to the body than the other passions of the soul.

On the contrary, It is written (Prov. 17:22): “A joyful mind maketh age flourishing: a sorrowful spirit drieth up the bones”: and (Prov. 25:20): “As a moth doth by a garment, and a worm by the wood: so the sadness of a man consumeth the heart”: and (Ecclus. 38:19): “Of sadness cometh death.”

I answer that, Of all the soul’s passions, sorrow is most harmful to the body. The reason of this is because sorrow is repugnant to man’s life in respect of the species of its movement, and not merely in respect of its measure or quantity, as is the case with the other passions of the soul. For man’s life consists in a certain movement, which flows from the heart to the other parts of the body: and this movement is befitting to human nature according to a certain fixed measure. Consequently if this movement goes beyond the right measure, it will be repugnant to man’s life in respect of the measure of quantity; but not in respect of its specific character: whereas if this movement be hindered in its progress, it will be repugnant to life in respect of its

species.

Now it must be noted that, in all the passions of the soul, the bodily transmutation which is their material element, is in conformity with and in proportion to the appetitive movement, which is the formal element: just as in everything matter is proportionate to form. Consequently those passions that imply a movement of the appetite in pursuit of something, are not repugnant to the vital movement as regards its species, but they may be repugnant thereto as regards its measure: such are love, joy, desire and the like; wherefore these passions conduce to the well-being of the body; though, if they be excessive, they may be harmful to it. On the other hand, those passions which denote in the appetite a movement of flight or contraction, are repugnant to the vital movement, not only as regards its measure, but also as regards its species; wherefore they are simply harmful: such are fear and despair, and above all sorrow which depresses the soul by reason of a present evil, which makes a stronger impression than future evil.

Reply to Objection 1. Since the soul naturally moves the body, the spiritual movement of the soul is naturally the cause of bodily transmutation. Nor is there any parallel with spiritual images, because they are not naturally ordained to move such other bodies as are not naturally moved by the soul.

Reply to Objection 2. Other passions imply a bodily transmutation which is specifically in conformity with the vital movement: whereas sorrow implies a transmutation that is repugnant thereto, as stated above.

Reply to Objection 3. A lesser cause suffices to hinder the use of reason, than to destroy life: since we observe that many ailments deprive one of the use of reason, before depriving one of life. Nevertheless fear and anger cause very great harm to the body, by reason of the sorrow which they imply, and which arises from the absence of the thing desired. Moreover sorrow too sometimes deprives man of the use of reason: as may be seen in those who through sorrow become a prey to melancholy or madness.

Objection 1. It would seem that pain does not deprive one of the power to learn. For it is written (Is. 26:9): “When Thou shalt do Thy judgments on the earth, the inhabitants of the world shall learn justice”: and further on (verse 16): “In the tribulation of murmuring Thy instruction was with them.” But the judgments of God and tribulation cause sorrow in men’s hearts. Therefore pain or sorrow, far from destroying, increases the power of learning.

Objection 2. Further, it is written (Is. 28:9): “Whom shall He teach knowledge? And whom shall He make to understand the hearing? Them that are weaned from the milk, that are drawn away from the breasts,” i.e. from pleasures. But pain and sorrow are most destructive of pleasure; since sorrow hinders all pleasure, as stated in *Ethic.* vii, 14: and (*Ecclus.* 11:29) it is stated that “the affliction of an hour maketh one forget great delights.” Therefore pain, instead of taking away, increases the faculty of learning.

Objection 3. Further, inward sorrow surpasses outward pain, as stated above (q. 35, a. 7). But man can learn while sorrowful. Much more, therefore, can he learn while in bodily pain.

On the contrary, Augustine says (*Soliloq.* i, 12): “Although during those days I was tormented with a violent tooth-ache, I was not able to turn over in my mind other things than those I had already learnt; and as to learning anything, I was quite unequal to it, because it required undivided attention.”

I answer that, Since all the powers of the soul are rooted in the one essence of the soul, it must needs happen, when the intention of the soul is strongly drawn towards the action of one power, that it is withdrawn from the action of another power: because the soul, being one, can only have one intention. The result is that if one thing draws upon itself the entire intention of the soul, or a great portion thereof, anything else requiring considerable attention is incompatible therewith.

Now it is evident that sensible pain above all draws the soul’s attention to itself; because it is natural for each thing to tend wholly to repel whatever is contrary to it, as may be observed even in natural things. It is likewise evident that in order to learn anything new, we require study and effort with a strong intention, as is

clearly stated in *Prov.* 2:4,5: “If thou shalt seek wisdom as money, and shall dig for her as for a treasure, then shalt thou understand learning” [Vulg: ‘the fear of the Lord’]. Consequently if the pain be acute, man is prevented at the time from learning anything: indeed it can be so acute, that, as long as it lasts, a man is unable to give his attention even to that which he knew already. However a difference is to be observed according to the difference of love that a man has for learning or for considering: because the greater his love, the more will he retain the intention of his mind so as to prevent it from turning entirely to the pain.

Reply to Objection 1. Moderate sorrow, that does not cause the mind to wander, can conduce to the acquisition of learning especially in regard to those things by which a man hopes to be freed from sorrow. And thus, “in the tribulation of murmuring,” men are more apt to be taught by God.

Reply to Objection 2. Both pleasure and pain, in so far as they draw upon themselves the soul’s intention, hinder the reason from the act of consideration, wherefore it is stated in *Ethic.* vii, 11 that “in the moment of sexual pleasure, a man cannot understand anything.” Nevertheless pain attracts the soul’s intention more than pleasure does: thus we observe in natural things that the action of a natural body is more intense in regard to its contrary; for instance, hot water is more accessible to the action of cold, and in consequence freezes harder. If therefore pain or sorrow be moderate, it can conduce accidentally to the facility of learning, in so far as it takes away an excess of pleasure. But, of itself, it is a hindrance; and if it be intense, it prevents it altogether.

Reply to Objection 3. External pain arises from hurt done to the body, so that it involves bodily transmutation more than inward sorrow does: and yet the latter is greater in regard to the formal element of pain, which belongs to the soul. Consequently bodily pain is a greater hindrance to contemplation which requires complete repose, than inward sorrow is. Nevertheless if inward sorrow be very intense, it attracts the intention, so that man is unable to learn anything for the first time: wherefore on account of sorrow Gregory interrupted his commentary on *Ezechiel* (*Hom.* xxii in *Ezechiel*).

Objection 1. It would seem that it is not an effect of sorrow to burden the soul. For the Apostle says (2 Cor. 7:11): “Behold this self-same thing, that you were made sorrowful according to God, how great carefulness it worketh in you: yea, defence, yea indignation,” etc. Now carefulness and indignation imply that the soul is uplifted, which is contrary to being depressed. Therefore depression is not an effect of sorrow.

Objection 2. Further, sorrow is contrary to pleasure. But the effect of pleasure is expansion: the opposite of which is not depression but contraction. Therefore depression should not be reckoned as an effect of sorrow.

Objection 3. Further, sorrow consumes those who are inflicted therewith, as may be gathered from the words of the Apostle (2 Cor. 2:7): “Lest perhaps such an one be swallowed up with overmuch sorrow.” But that which is depressed is not consumed; nay, it is weighed down by something heavy, whereas that which is consumed enters within the consumer. Therefore depression should not be reckoned an effect of sorrow.

On the contrary, Gregory of Nyssa* and Damascene (De Fide Orth. ii, 14) speak of “depressing sorrow.”

I answer that, The effects of the soul’s passions are sometimes named metaphorically, from a likeness to sensible bodies: for the reason that the movements of the animal appetite are like the inclinations of the natural appetite. And in this way fervor is ascribed to love, expansion to pleasure, and depression to sorrow. For a man is said to be depressed, through being hindered in his own movement by some weight. Now it is evident

from what has been said above (q. 23, a. 4; q. 25, a. 4; q. 36, a. 1) that sorrow is caused by a present evil: and this evil, from the very fact that it is repugnant to the movement of the will, depresses the soul, inasmuch as it hinders it from enjoying that which it wishes to enjoy. And if the evil which is the cause of sorrow be not so strong as to deprive one of the hope of avoiding it, although the soul be depressed in so far as, for the present, it fails to grasp that which it craves for; yet it retains the movement whereby to repulse that evil. If, on the other hand, the strength of the evil be such as to exclude the hope of evasion, then even the interior movement of the afflicted soul is absolutely hindered, so that it cannot turn aside either this way or that. Sometimes even the external movement of the body is paralyzed, so that a man becomes completely stupefied.

Reply to Objection 1. That uplifting of the soul ensues from the sorrow which is according to God, because it brings with it the hope of the forgiveness of sin.

Reply to Objection 2. As far as the movement of the appetite is concerned, contraction and depression amount to the same: because the soul, through being depressed so as to be unable to attend freely to outward things, withdraws to itself, closing itself up as it were.

Reply to Objection 3. Sorrow is said to consume man, when the force of the afflicting evil is such as to shut out all hope of evasion: and thus also it both depresses and consumes at the same time. For certain things, taken metaphorically, imply one another, which taken literally, appear to exclude one another.

* Nemesius, De Nat. Hom. xix.

Objection 1. It would seem that sorrow does not weaken all activity. Because carefulness is caused by sorrow, as is clear from the passage of the Apostle quoted above (a. 2, obj. 1). But carefulness conduces to good work: wherefore the Apostle says (2 Tim. 2:15): “Carefully study to present thyself. . . a workman that needeth not to be ashamed.” Therefore sorrow is not a hindrance to work, but helps one to work well.

Objection 2. Further, sorrow causes desire in many cases, as stated in Ethic. vii, 14. But desire causes intensity of action. Therefore sorrow does too.

Objection 3. Further, as some actions are proper to the joyful, so are others proper to the sorrowful; for instance, to mourn. Now a thing is improved by that which is suitable to it. Therefore certain actions are not hindered but improved by reason of sorrow.

On the contrary, The Philosopher says (Ethic. x, 4) that “pleasure perfects action,” whereas on the other hand, “sorrow hinders it” (Ethic. x, 5).

I answer that, As stated above (a. 2), sorrow at

times does not depress or consume the soul, so as to shut out all movement, internal or external; but certain movements are sometimes caused by sorrow itself. Accordingly action stands in a twofold relation to sorrow. First, as being the object of sorrow: and thus sorrow hinders any action: for we never do that which we do with sorrow, so well as that which we do with pleasure, or without sorrow. The reason for this is that the will is the cause of human actions: and consequently when we do something that gives pain, the action must of necessity be weakened in consequence. Secondly, action stands in relation to sorrow, as to its principle and cause: and such action must needs be improved by sorrow: thus the more one sorrows on account of a certain thing, the more one strives to shake off sorrow, provided there is a hope of shaking it off: otherwise no movement or action would result from that sorrow.

From what has been said the replies to the objections are evident.

Objection 1. It would seem that sorrow is not most harmful to the body. For sorrow has a spiritual existence in the soul. But those things which have only a spiritual existence do not cause a transmutation in the body: as is evident with regard to the images of colors, which images are in the air and do not give color to bodies. Therefore sorrow is not harmful to the body.

Objection 2. Further if it be harmful to the body, this can only be due to its having a bodily transmutation in conjunction with it. But bodily transmutation takes place in all the passions of the soul, as stated above (q. 22, Aa. 1,3). Therefore sorrow is not more harmful to the body than the other passions of the soul.

Objection 3. Further, the Philosopher says (Ethic. vii, 3) that “anger and desire drive some to madness”: which seems to be a very great harm, since reason is the most excellent thing in man. Moreover, despair seems to be more harmful than sorrow; for it is the cause of sorrow. Therefore sorrow is not more harmful to the body than the other passions of the soul.

On the contrary, It is written (Prov. 17:22): “A joyful mind maketh age flourishing: a sorrowful spirit drieth up the bones”: and (Prov. 25:20): “As a moth doth by a garment, and a worm by the wood: so the sadness of a man consumeth the heart”: and (Ecclus. 38:19): “Of sadness cometh death.”

I answer that, Of all the soul’s passions, sorrow is most harmful to the body. The reason of this is because sorrow is repugnant to man’s life in respect of the species of its movement, and not merely in respect of its measure or quantity, as is the case with the other passions of the soul. For man’s life consists in a certain movement, which flows from the heart to the other parts of the body: and this movement is befitting to human nature according to a certain fixed measure. Consequently if this movement goes beyond the right measure, it will be repugnant to man’s life in respect of the measure of quantity; but not in respect of its specific character: whereas if this movement be hindered in its progress, it will be repugnant to life in respect of its

species.

Now it must be noted that, in all the passions of the soul, the bodily transmutation which is their material element, is in conformity with and in proportion to the appetitive movement, which is the formal element: just as in everything matter is proportionate to form. Consequently those passions that imply a movement of the appetite in pursuit of something, are not repugnant to the vital movement as regards its species, but they may be repugnant thereto as regards its measure: such are love, joy, desire and the like; wherefore these passions conduce to the well-being of the body; though, if they be excessive, they may be harmful to it. On the other hand, those passions which denote in the appetite a movement of flight or contraction, are repugnant to the vital movement, not only as regards its measure, but also as regards its species; wherefore they are simply harmful: such are fear and despair, and above all sorrow which depresses the soul by reason of a present evil, which makes a stronger impression than future evil.

Reply to Objection 1. Since the soul naturally moves the body, the spiritual movement of the soul is naturally the cause of bodily transmutation. Nor is there any parallel with spiritual images, because they are not naturally ordained to move such other bodies as are not naturally moved by the soul.

Reply to Objection 2. Other passions imply a bodily transmutation which is specifically in conformity with the vital movement: whereas sorrow implies a transmutation that is repugnant thereto, as stated above.

Reply to Objection 3. A lesser cause suffices to hinder the use of reason, than to destroy life: since we observe that many ailments deprive one of the use of reason, before depriving one of life. Nevertheless fear and anger cause very great harm to the body, by reason of the sorrow which they imply, and which arises from the absence of the thing desired. Moreover sorrow too sometimes deprives man of the use of reason: as may be seen in those who through sorrow become a prey to melancholy or madness.

FIRST PART OF THE SECOND PART, QUESTION 38

Of the Remedies of Sorrow or Pain (In Five Articles)

We must now consider the remedies of pain or sorrow: under which head there are five points of inquiry:

- (1) Whether pain or sorrow is assuaged by every pleasure?
- (2) Whether it is assuaged by weeping?
- (3) Whether it is assuaged by the sympathy of friends?
- (4) Whether it is assuaged by contemplating the truth?
- (5) Whether it is assuaged by sleep and baths?

Whether pain or sorrow is assuaged by every pleasure?

Ia IIae q. 38 a. 1

Objection 1. It would seem that not every pleasure assuages every pain or sorrow. For pleasure does not assuage sorrow, save in so far as it is contrary to it: for “remedies work by contraries” (Ethic. ii, 3). But not every pleasure is contrary to every sorrow; as stated above (q. 35, a. 4). Therefore not every pleasure assuages every sorrow.

Objection 2. Further, that which causes sorrow does not assuage it. But some pleasures cause sorrow; since, as stated in Ethic. ix, 4, “the wicked man feels pain at having been pleased.” Therefore not every pleasure assuages sorrow.

Objection 3. Further, Augustine says (Confess. iv, 7) that he fled from his country, where he had been wont to associate with his friend, now dead: “for so should his eyes look for him less, where they were not wont to see him.” Hence we may gather that those things which united us to our dead or absent friends, become burdensome to us when we mourn their death or absence. But nothing united us more than the pleasures we enjoyed in common. Therefore these very pleasures become burdensome to us when we mourn. Therefore not every pleasure assuages every sorrow.

On the contrary, The Philosopher says (Ethic. vii, 14) that “sorrow is driven forth by pleasure, both by a contrary pleasure and by any other, provided it be intense.”

I answer that, As is evident from what has been said above (q. 23, a. 4), pleasure is a kind of repose of the appetite in a suitable good; while sorrow arises from something unsuited to the appetite. Consequently in movements of the appetite pleasure is to sorrow, what, in bodies, repose is to weariness, which is due to a non-

natural transmutation; for sorrow itself implies a certain weariness or ailing of the appetitive faculty. Therefore just as all repose of the body brings relief to any kind of weariness, ensuing from any non-natural cause; so every pleasure brings relief by assuaging any kind of sorrow, due to any cause whatever.

Reply to Objection 1. Although not every pleasure is specifically contrary to every sorrow, yet it is generically, as stated above (q. 35, a. 4). And consequently, on the part of the disposition of the subject, any sorrow can be assuaged by any pleasure.

Reply to Objection 2. The pleasures of wicked men are not a cause of sorrow while they are enjoyed, but afterwards: that is to say, in so far as wicked men repent of those things in which they took pleasure. This sorrow is healed by contrary pleasures.

Reply to Objection 3. When there are two causes inclining to contrary movements, each hinders the other; yet the one which is stronger and more persistent, prevails in the end. Now when a man is made sorrowful by those things in which he took pleasure in common with a deceased or absent friend, there are two causes producing contrary movements. For the thought of the friend’s death or absence, inclines him to sorrow: whereas the present good inclines him to pleasure. Consequently each is modified by the other. And yet, since the perception of the present moves more strongly than the memory of the past, and since love of self is more persistent than love of another; hence it is that, in the end, the pleasure drives out the sorrow. Wherefore a little further on (Confess. iv, 8) Augustine says that his “sorrow gave way to his former pleasures.”

Whether pain or sorrow is assuaged by tears?

Ia IIae q. 38 a. 2

Objection 1. It would seem that tears do not assuage sorrow. Because no effect diminishes its cause. But tears or groans are an effect of sorrow. Therefore they do not diminish sorrow.

Objection 2. Further, just as tears or groans are an effect of sorrow, so laughter is an effect of joy. But

laughter does not lessen joy. Therefore tears do not lessen sorrow.

Objection 3. Further, when we weep, the evil that saddens us is present to the imagination. But the image of that which saddens us increases sorrow, just as the image of a pleasant thing adds to joy. Therefore it

seems that tears do not assuage sorrow.

On the contrary, Augustine says (Confess. iv, 7) that when he mourned the death of his friend, “in groans and in tears alone did he find some little refreshment.”

I answer that, Tears and groans naturally assuage sorrow: and this for two reasons. First, because a hurtful thing hurts yet more if we keep it shut up, because the soul is more intent on it: whereas if it be allowed to escape, the soul’s intention is dispersed as it were on outward things, so that the inward sorrow is lessened. This is why men, burdened with sorrow, make outward show of their sorrow, by tears or groans or even by words, their sorrow is assuaged. Secondly, because an action, that befits a man according to his actual disposition, is always pleasant to him. Now tears and groans are actions befitting a man who is in sorrow or pain; and consequently they become pleasant to him. Since then, as stated above (a. 1), every pleasure assuages sorrow or pain somewhat, it follows that sorrow is assuaged by weeping and groans.

Reply to Objection 1. This relation of the cause to effect is opposed to the relation existing between the cause of sorrow and the sorrowing man. For every ef-

fect is suited to its cause, and consequently is pleasant to it; but the cause of sorrow is disagreeable to him that sorrows. Hence the effect of sorrow is not related to him that sorrows in the same way as the cause of sorrow is. For this reason sorrow is assuaged by its effect, on account of the aforesaid contrariety.

Reply to Objection 2. The relation of effect to cause is like the relation of the object of pleasure to him that takes pleasure in it: because in each case the one agrees with the other. Now every like thing increases its like. Therefore joy is increased by laughter and the other effects of joy: except they be excessive, in which case, accidentally, they lessen it.

Reply to Objection 3. The image of that which saddens us, considered in itself, has a natural tendency to increase sorrow: yet from the very fact that a man imagines himself to be doing that which is fitting according to his actual state, he feels a certain amount of pleasure. For the same reason if laughter escapes a man when he is so disposed that he thinks he ought to weep, he is sorry for it, as having done something unbecoming to him, as Cicero says (De Tusc. Quaest. iii, 27).

Whether pain or sorrow are assuaged by the sympathy of friends?

Ia IIae q. 38 a. 3

Objection 1. It would seem that the sorrow of sympathizing friends does not assuage our own sorrow. For contraries have contrary effects. Now as Augustine says (Confess. viii, 4), “when many rejoice together, each one has more exuberant joy, for they are kindled and inflamed one by the other.” Therefore, in like manner, when many are sorrowful, it seems that their sorrow is greater.

Objection 2. Further, friendship demands mutual love, as Augustine declares (Confess. iv, 9). But a sympathizing friend is pained at the sorrow of his friend with whom he sympathizes. Consequently the pain of a sympathizing friend becomes, to the friend in sorrow, a further cause of sorrow: so that, his pain being doubled his sorrow seems to increase.

Objection 3. Further, sorrow arises from every evil affecting a friend, as though it affected oneself: since “a friend is one’s other self” (Ethic. ix, 4,9). But sorrow is an evil. Therefore the sorrow of the sympathizing friend increases the sorrow of the friend with whom he sympathizes.

On the contrary, The Philosopher says (Ethic. ix, 11) that those who are in pain are consoled when their friends sympathize with them.

I answer that, When one is in pain, it is natural that the sympathy of a friend should afford consola-

tion: whereof the Philosopher indicates a twofold reason (Ethic. ix, 11). The first is because, since sorrow has a depressing effect, it is like a weight whereof we strive to unburden ourselves: so that when a man sees others saddened by his own sorrow, it seems as though others were bearing the burden with him, striving, as it were, to lessen its weight; wherefore the load of sorrow becomes lighter for him: something like what occurs in the carrying of bodily burdens. The second and better reason is because when a man’s friends condole with him, he sees that he is loved by them, and this affords him pleasure, as stated above (q. 32, a. 5). Consequently, since every pleasure assuages sorrow, as stated above (a. 1), it follows that sorrow is mitigated by a sympathizing friend.

Reply to Objection 1. In either case there is a proof of friendship, viz. when a man rejoices with the joyful, and when he sorrows with the sorrowful. Consequently each becomes an object of pleasure by reason of its cause.

Reply to Objection 2. The friend’s sorrow itself would be a cause of sorrow: but consideration of its cause, viz. his love, gives rise rather to pleasure.

And this suffices for the reply to the Third Objection.

Objection 1. It would seem that the contemplation of truth does not assuage sorrow. For it is written (Eccles. 1:18): “He that addeth knowledge addeth also sorrow” [Vulg.: ‘labor’]. But knowledge pertains to the contemplation of truth. Therefore the contemplation of truth does not assuage sorrow.

Objection 2. Further, the contemplation of truth belongs to the speculative intellect. But “the speculative intellect is not a principle of movement”; as stated in *De Anima* iii, 11. Therefore, since joy and sorrow are movements of the soul, it seems that the contemplation of truth does not help to assuage sorrow.

Objection 3. Further, the remedy for an ailment should be applied to the part which ails. But contemplation of truth is in the intellect. Therefore it does not assuage bodily pain, which is in the senses.

On the contrary, Augustine says (*Soliloq.* i, 12): “It seemed to me that if the light of that truth were to dawn on our minds, either I should not feel that pain, or at least that pain would seem nothing to me.”

I answer that, As stated above (q. 3, a. 5), the greatest of all pleasures consists in the contemplation of truth. Now every pleasure assuages pain as stated above (a. 1): hence the contemplation of truth assuages pain or sorrow, and the more so, the more perfectly

one is a lover of wisdom. And therefore in the midst of tribulations men rejoice in the contemplation of Divine things and of future Happiness, according to James 1:2: “My brethren, count it all joy, when you shall fall into divers temptations”: and, what is more, even in the midst of bodily tortures this joy is found; as the “martyr Tiburtius, when he was walking barefoot on the burning coals, said: Methinks, I walk on roses, in the name of Jesus Christ.”*

Reply to Objection 1. “He that addeth knowledge, addeth sorrow,” either on account of the difficulty and disappointment in the search for truth; or because knowledge makes man acquainted with many things that are contrary to his will. Accordingly, on the part of the things known, knowledge causes sorrow: but on the part of the contemplation of truth, it causes pleasure.

Reply to Objection 2. The speculative intellect does not move the mind on the part of the thing contemplated: but on the part of contemplation itself, which is man’s good and naturally pleasant to him.

Reply to Objection 3. In the powers of the soul there is an overflow from the higher to the lower powers: and accordingly, the pleasure of contemplation, which is in the higher part, overflows so as to mitigate even that pain which is in the senses.

Objection 1. It would seem that sleep and baths do not assuage sorrow. For sorrow is in the soul: whereas sleep and baths regard the body. Therefore they do not conduce to the assuaging of sorrow.

Objection 2. Further, the same effect does not seem to ensue from contrary causes. But these, being bodily things, are incompatible with the contemplation of truth which is a cause of the assuaging of sorrow, as stated above (a. 4). Therefore sorrow is not mitigated by the like.

Objection 3. Further, sorrow and pain, in so far as they affect the body, denote a certain transmutation of the heart. But such remedies as these seem to pertain to the outward senses and limbs, rather than to the interior disposition of the heart. Therefore they do not assuage sorrow.

On the contrary, Augustine says (*Confess.* ix, 12): “I had heard that the bath had its name[†] . . . from the fact of its driving sadness from the mind.” And further on, he says: “I slept, and woke up again, and found my grief not a little assuaged”: and quotes the words from the hymn of Ambrose[‡], in which it is said that “Sleep restores the tired limbs to labor, refreshes the weary mind, and banishes sorrow.”

I answer that, As stated above (q. 37, a. 4), sorrow, by reason of its specific nature, is repugnant to the vital movement of the body; and consequently whatever restores the bodily nature to its due state of vital movement, is opposed to sorrow and assuages it. Moreover such remedies, from the very fact that they bring nature back to its normal state, are causes of pleasure; for this is precisely in what pleasure consists, as stated above (q. 31, a. 1). Therefore, since every pleasure assuages sorrow, sorrow is assuaged by such like bodily remedies.

Reply to Objection 1. The normal disposition of the body, so far as it is felt, is itself a cause of pleasure, and consequently assuages sorrow.

Reply to Objection 2. As stated above (q. 31, a. 8), one pleasure hinders another; and yet every pleasure assuages sorrow. Consequently it is not unreasonable that sorrow should be assuaged by causes which hinder one another.

Reply to Objection 3. Every good disposition of the body reacts somewhat on the heart, which is the beginning and end of bodily movements, as stated in *De Causa Mot. Animal.* xi.

* Cf. Dominican Breviary, August 11th, commemoration of St. Tiburtius. † Balneum, from the Greek *balaneion* ‡ Cf. Sarum Breviary: First Sunday after the octave of the Epiphany, Hymn for first Vespers

Objection 1. It would seem that not every pleasure assuages every pain or sorrow. For pleasure does not assuage sorrow, save in so far as it is contrary to it: for “remedies work by contraries” (Ethic. ii, 3). But not every pleasure is contrary to every sorrow; as stated above (q. 35, a. 4). Therefore not every pleasure assuages every sorrow.

Objection 2. Further, that which causes sorrow does not assuage it. But some pleasures cause sorrow; since, as stated in Ethic. ix, 4, “the wicked man feels pain at having been pleased.” Therefore not every pleasure assuages sorrow.

Objection 3. Further, Augustine says (Confess. iv, 7) that he fled from his country, where he had been wont to associate with his friend, now dead: “for so should his eyes look for him less, where they were not wont to see him.” Hence we may gather that those things which united us to our dead or absent friends, become burdensome to us when we mourn their death or absence. But nothing united us more than the pleasures we enjoyed in common. Therefore these very pleasures become burdensome to us when we mourn. Therefore not every pleasure assuages every sorrow.

On the contrary, The Philosopher says (Ethic. vii, 14) that “sorrow is driven forth by pleasure, both by a contrary pleasure and by any other, provided it be intense.”

I answer that, As is evident from what has been said above (q. 23, a. 4), pleasure is a kind of repose of the appetite in a suitable good; while sorrow arises from something unsuited to the appetite. Consequently in movements of the appetite pleasure is to sorrow, what, in bodies, repose is to weariness, which is due to a non-

natural transmutation; for sorrow itself implies a certain weariness or ailing of the appetitive faculty. Therefore just as all repose of the body brings relief to any kind of weariness, ensuing from any non-natural cause; so every pleasure brings relief by assuaging any kind of sorrow, due to any cause whatever.

Reply to Objection 1. Although not every pleasure is specifically contrary to every sorrow, yet it is generically, as stated above (q. 35, a. 4). And consequently, on the part of the disposition of the subject, any sorrow can be assuaged by any pleasure.

Reply to Objection 2. The pleasures of wicked men are not a cause of sorrow while they are enjoyed, but afterwards: that is to say, in so far as wicked men repent of those things in which they took pleasure. This sorrow is healed by contrary pleasures.

Reply to Objection 3. When there are two causes inclining to contrary movements, each hinders the other; yet the one which is stronger and more persistent, prevails in the end. Now when a man is made sorrowful by those things in which he took pleasure in common with a deceased or absent friend, there are two causes producing contrary movements. For the thought of the friend’s death or absence, inclines him to sorrow: whereas the present good inclines him to pleasure. Consequently each is modified by the other. And yet, since the perception of the present moves more strongly than the memory of the past, and since love of self is more persistent than love of another; hence it is that, in the end, the pleasure drives out the sorrow. Wherefore a little further on (Confess. iv, 8) Augustine says that his “sorrow gave way to his former pleasures.”

Objection 1. It would seem that tears do not assuage sorrow. Because no effect diminishes its cause. But tears or groans are an effect of sorrow. Therefore they do not diminish sorrow.

Objection 2. Further, just as tears or groans are an effect of sorrow, so laughter is an effect of joy. But laughter does not lessen joy. Therefore tears do not lessen sorrow.

Objection 3. Further, when we weep, the evil that saddens us is present to the imagination. But the image of that which saddens us increases sorrow, just as the image of a pleasant thing adds to joy. Therefore it seems that tears do not assuage sorrow.

On the contrary, Augustine says (*Confess.* iv, 7) that when he mourned the death of his friend, “in groans and in tears alone did he find some little refreshment.”

I answer that, Tears and groans naturally assuage sorrow: and this for two reasons. First, because a hurtful thing hurts yet more if we keep it shut up, because the soul is more intent on it: whereas if it be allowed to escape, the soul’s intention is dispersed as it were on outward things, so that the inward sorrow is lessened. This is why men, burdened with sorrow, make outward show of their sorrow, by tears or groans or even by words, their sorrow is assuaged. Secondly, because an action, that befits a man according to his actual disposition, is always pleasant to him. Now tears and groans are actions befitting a man who is in sorrow or pain; and consequently they become pleasant to him. Since then,

as stated above (a. 1), every pleasure assuages sorrow or pain somewhat, it follows that sorrow is assuaged by weeping and groans.

Reply to Objection 1. This relation of the cause to effect is opposed to the relation existing between the cause of sorrow and the sorrowing man. For every effect is suited to its cause, and consequently is pleasant to it; but the cause of sorrow is disagreeable to him that sorrows. Hence the effect of sorrow is not related to him that sorrows in the same way as the cause of sorrow is. For this reason sorrow is assuaged by its effect, on account of the aforesaid contrariety.

Reply to Objection 2. The relation of effect to cause is like the relation of the object of pleasure to him that takes pleasure in it: because in each case the one agrees with the other. Now every like thing increases its like. Therefore joy is increased by laughter and the other effects of joy: except they be excessive, in which case, accidentally, they lessen it.

Reply to Objection 3. The image of that which saddens us, considered in itself, has a natural tendency to increase sorrow: yet from the very fact that a man imagines himself to be doing that which is fitting according to his actual state, he feels a certain amount of pleasure. For the same reason if laughter escapes a man when he is so disposed that he thinks he ought to weep, he is sorry for it, as having done something unbecoming to him, as Cicero says (*De Tusc. Quaest.* iii, 27).

Objection 1. It would seem that the sorrow of sympathizing friends does not assuage our own sorrow. For contraries have contrary effects. Now as Augustine says (Confess. viii, 4), “when many rejoice together, each one has more exuberant joy, for they are kindled and inflamed one by the other.” Therefore, in like manner, when many are sorrowful, it seems that their sorrow is greater.

Objection 2. Further, friendship demands mutual love, as Augustine declares (Confess. iv, 9). But a sympathizing friend is pained at the sorrow of his friend with whom he sympathizes. Consequently the pain of a sympathizing friend becomes, to the friend in sorrow, a further cause of sorrow: so that, his pain being doubled his sorrow seems to increase.

Objection 3. Further, sorrow arises from every evil affecting a friend, as though it affected oneself: since “a friend is one’s other self” (Ethic. ix, 4,9). But sorrow is an evil. Therefore the sorrow of the sympathizing friend increases the sorrow of the friend with whom he sympathizes.

On the contrary, The Philosopher says (Ethic. ix, 11) that those who are in pain are consoled when their friends sympathize with them.

I answer that, When one is in pain, it is natural that the sympathy of a friend should afford consola-

tion: whereof the Philosopher indicates a twofold reason (Ethic. ix, 11). The first is because, since sorrow has a depressing effect, it is like a weight whereof we strive to unburden ourselves: so that when a man sees others saddened by his own sorrow, it seems as though others were bearing the burden with him, striving, as it were, to lessen its weight; wherefore the load of sorrow becomes lighter for him: something like what occurs in the carrying of bodily burdens. The second and better reason is because when a man’s friends condole with him, he sees that he is loved by them, and this affords him pleasure, as stated above (q. 32, a. 5). Consequently, since every pleasure assuages sorrow, as stated above (a. 1), it follows that sorrow is mitigated by a sympathizing friend.

Reply to Objection 1. In either case there is a proof of friendship, viz. when a man rejoices with the joyful, and when he sorrows with the sorrowful. Consequently each becomes an object of pleasure by reason of its cause.

Reply to Objection 2. The friend’s sorrow itself would be a cause of sorrow: but consideration of its cause, viz. his love, gives rise rather to pleasure.

And this suffices for the reply to the Third Objection.

Objection 1. It would seem that the contemplation of truth does not assuage sorrow. For it is written (Eccles. 1:18): “He that addeth knowledge addeth also sorrow” [Vulg.: ‘labor’]. But knowledge pertains to the contemplation of truth. Therefore the contemplation of truth does not assuage sorrow.

Objection 2. Further, the contemplation of truth belongs to the speculative intellect. But “the speculative intellect is not a principle of movement”; as stated in *De Anima* iii, 11. Therefore, since joy and sorrow are movements of the soul, it seems that the contemplation of truth does not help to assuage sorrow.

Objection 3. Further, the remedy for an ailment should be applied to the part which ails. But contemplation of truth is in the intellect. Therefore it does not assuage bodily pain, which is in the senses.

On the contrary, Augustine says (*Soliloq.* i, 12): “It seemed to me that if the light of that truth were to dawn on our minds, either I should not feel that pain, or at least that pain would seem nothing to me.”

I answer that, As stated above (q. 3, a. 5), the greatest of all pleasures consists in the contemplation of truth. Now every pleasure assuages pain as stated above (a. 1): hence the contemplation of truth assuages pain or sorrow, and the more so, the more perfectly

one is a lover of wisdom. And therefore in the midst of tribulations men rejoice in the contemplation of Divine things and of future Happiness, according to James 1:2: “My brethren, count it all joy, when you shall fall into divers temptations”: and, what is more, even in the midst of bodily tortures this joy is found; as the “martyr Tiburtius, when he was walking barefoot on the burning coals, said: Methinks, I walk on roses, in the name of Jesus Christ.”*

Reply to Objection 1. “He that addeth knowledge, addeth sorrow,” either on account of the difficulty and disappointment in the search for truth; or because knowledge makes man acquainted with many things that are contrary to his will. Accordingly, on the part of the things known, knowledge causes sorrow: but on the part of the contemplation of truth, it causes pleasure.

Reply to Objection 2. The speculative intellect does not move the mind on the part of the thing contemplated: but on the part of contemplation itself, which is man’s good and naturally pleasant to him.

Reply to Objection 3. In the powers of the soul there is an overflow from the higher to the lower powers: and accordingly, the pleasure of contemplation, which is in the higher part, overflows so as to mitigate even that pain which is in the senses.

* Cf. Dominican Breviary, August 11th, commemoration of St. Tiburtius.

Objection 1. It would seem that sleep and baths do not assuage sorrow. For sorrow is in the soul: whereas sleep and baths regard the body. Therefore they do not conduce to the assuaging of sorrow.

Objection 2. Further, the same effect does not seem to ensue from contrary causes. But these, being bodily things, are incompatible with the contemplation of truth which is a cause of the assuaging of sorrow, as stated above (a. 4). Therefore sorrow is not mitigated by the like.

Objection 3. Further, sorrow and pain, in so far as they affect the body, denote a certain transmutation of the heart. But such remedies as these seem to pertain to the outward senses and limbs, rather than to the interior disposition of the heart. Therefore they do not assuage sorrow.

On the contrary, Augustine says (Confess. ix, 12): “I had heard that the bath had its name* . . . from the fact of its driving sadness from the mind.” And further on, he says: “I slept, and woke up again, and found my grief not a little assuaged”: and quotes the words from the hymn of Ambrose[†], in which it is said that “Sleep restores the tired limbs to labor, refreshes the weary mind, and banishes sorrow.”

I answer that, As stated above (q. 37, a. 4), sorrow, by reason of its specific nature, is repugnant to the vital movement of the body; and consequently whatever restores the bodily nature to its due state of vital movement, is opposed to sorrow and assuages it. Moreover such remedies, from the very fact that they bring nature back to its normal state, are causes of pleasure; for this is precisely in what pleasure consists, as stated above (q. 31, a. 1). Therefore, since every pleasure assuages sorrow, sorrow is assuaged by such like bodily remedies.

Reply to Objection 1. The normal disposition of the body, so far as it is felt, is itself a cause of pleasure, and consequently assuages sorrow.

Reply to Objection 2. As stated above (q. 31, a. 8), one pleasure hinders another; and yet every pleasure assuages sorrow. Consequently it is not unreasonable that sorrow should be assuaged by causes which hinder one another.

Reply to Objection 3. Every good disposition of the body reacts somewhat on the heart, which is the beginning and end of bodily movements, as stated in *De Causa Mot. Animal.* xi.

* Balneum, from the Greek *balaneion* † Cf. Sarum Breviary: First Sunday after the octave of the Epiphany, Hymn for first Vespers

FIRST PART OF THE SECOND PART, QUESTION 39

Of the Goodness and Malice of Sorrow or Pain (In Four Articles)

We must now consider the goodness and malice of pain or sorrow: under which head there are four points of inquiry:

- (1) Whether all sorrow is evil?
- (2) Whether sorrow can be a virtuous good?
- (3) Whether it can be a useful good?
- (4) Whether bodily pain is the greatest evil?

Whether all sorrow is evil?

Ia IIae q. 39 a. 1

Objection 1. It would seem that all sorrow is evil. For Gregory of Nyssa* says: “All sorrow is evil, from its very nature.” Now what is naturally evil, is evil always and everywhere. Therefore, all sorrow is evil.

Objection 2. Further, that which all, even the virtuous, avoid, is evil. But all avoid sorrow, even the virtuous, since as stated in *Ethic.* vii, 11, “though the prudent man does not aim at pleasure, yet he aims at avoiding sorrow.” Therefore sorrow is evil.

Objection 3. Further, just as bodily evil is the object and cause of bodily pain, so spiritual evil is the object and cause of sorrow in the soul. But every bodily pain is a bodily evil. Therefore every spiritual sorrow is an evil of the soul.

On the contrary, Sorrow for evil is contrary to pleasure in evil. But pleasure in evil is evil: wherefore in condemnation of certain men, it is written (*Prov.* 2:14), that “they were glad when they had done evil.” Therefore sorrow for evil is good.

I answer that, A thing may be good or evil in two ways: first considered simply and in itself; and thus all sorrow is an evil, because the mere fact of a man’s appetite being uneasy about a present evil, is itself an evil, because it hinders the response of the appetite in good. Secondly, a thing is said to be good or evil, on the supposition of something else: thus shame is said to be good, on the supposition of a shameful deed done, as stated in *Ethic.* iv, 9. Accordingly, supposing the pres-

ence of something saddening or painful, it is a sign of goodness if a man is in sorrow or pain on account of this present evil. For if he were not to be in sorrow or pain, this could only be either because he feels it not, or because he does not reckon it as something unbecoming, both of which are manifest evils. Consequently it is a condition of goodness, that, supposing an evil to be present, sorrow or pain should ensue. Wherefore Augustine says (*Gen. ad lit.* viii, 14): “It is also a good thing that he sorrows for the good he has lost: for had not some good remained in his nature, he could not be punished by the loss of good.” Because, however, in the science of Morals, we consider things individually—for actions are concerned about individuals—that which is good on some supposition, should be considered as good: just as that which is voluntary on some supposition, is judged to be voluntary, as stated in *Ethic.* iii, 1, and likewise above (q. 6, a. 6).

Reply to Objection 1. Gregory of Nyssa† is speaking of sorrow on the part of the evil that causes it, but not on the part of the subject that feels and rejects the evil. And from this point of view, all shun sorrow, inasmuch as they shun evil: but they do not shun the perception and rejection of evil. The same also applies to bodily pain: because the perception and rejection of bodily evil is the proof of the goodness of nature.

This suffices for the Replies to the Second and Third Objections.

Whether sorrow can be a virtuous good?

Ia IIae q. 39 a. 2

Objection 1. It would seem that sorrow is not a virtuous good. For that which leads to hell is not a virtuous good. But, as Augustine says (*Gen. ad lit.* xii, 33), “Jacob seems to have feared lest he should be troubled overmuch by sorrow, and so, instead of entering into the rest of the blessed, be consigned to the hell of sinners.” Therefore sorrow is not a virtuous good.

Objection 2. Further, the virtuous good is praiseworthy and meritorious. But sorrow lessens praise or merit: for the Apostle says (*2 Cor.* 9:7): “Everyone, as

he hath determined in his heart, not with sadness, or of necessity.” Therefore sorrow is not a virtuous good.

Objection 3. Further, as Augustine says (*De Civ. Dei* xiv, 15), “sorrow is concerned about those things which happen against our will.” But not to will those things which are actually taking place, is to have a will opposed to the decree of God, to Whose providence whatever is done is subject. Since, then, conformity of the human to the Divine will is a condition of the rectitude of the will, as stated above (q. 19, a. 9), it seems

* Nemesius, *De Nat. Hom.* xix. † Nemesius

that sorrow is incompatible with rectitude of the will, and that consequently it is not virtuous.

On the contrary, Whatever merits the reward of eternal life is virtuous. But such is sorrow; as is evident from Mat. 5:5: “Blessed are they that mourn, for they shall be comforted.” Therefore sorrow is a virtuous good.

I answer that, In so far as sorrow is good, it can be a virtuous good. For it has been said above (a. 1) that sorrow is a good inasmuch as it denotes perception and rejection of evil. These two things, as regards bodily pain, are a proof of the goodness of nature, to which it is due that the senses perceive, and that nature shuns, the harmful thing that causes pain. As regards interior sorrow, perception of the evil is sometimes due to a right judgment of reason; while the rejection of the evil is the act of the will, well disposed and detesting that evil. Now every virtuous good results from these two things, the rectitude of the reason and the will. Wherefore it is evident that sorrow may be a virtuous good.

Reply to Objection 1. All the passions of the soul should be regulated according to the rule of reason, which is the root of the virtuous good; but excessive sorrow, of which Augustine is speaking, oversteps this rule, and therefore it fails to be a virtuous good.

Reply to Objection 2. Just as sorrow for an evil arises from a right will and reason, which detest the evil, so sorrow for a good is due to a perverse reason and will, which detest the good. Consequently such sorrow is an obstacle to the praise and merit of the virtuous good; for instance, when a man gives an alms sorrowfully.

Reply to Objection 3. Some things do actually happen, not because God wills, but because He permits them to happen—such as sins. Consequently a will that is opposed to sin, whether in oneself or in another, is not discordant from the Divine will. Penal evils happen actually, even by God’s will. But it is not necessary for the rectitude of his will, that man should will them in themselves: but only that he should not revolt against the order of Divine justice, as stated above (q. 19, a. 10).

Whether sorrow can be a useful good?

Ia IIae q. 39 a. 3

Objection 1. It would seem that sorrow cannot be a useful good. For it is written (Ecclus. 30:25): “Sadness hath killed many, and there is no profit in it.”

Objection 2. Further, choice is of that which is useful to an end. But sorrow is not an object of choice; in fact, “a thing without sorrow is to be chosen rather than the same thing with sorrow” (Topic. iii, 2). Therefore sorrow is not a useful good.

Objection 3. Further, “Everything is for the sake of its own operation,” as stated in De Coel. ii, 3. But “sorrow hinders operation,” as stated in Ethic. x, 5. Therefore sorrow is not a useful good.

On the contrary, The wise man seeks only that which is useful. But according to Eccles. 7:5, “the heart of the wise is where there is mourning, and the heart of fools where there is mirth.” Therefore sorrow is useful.

I answer that, A twofold movement of the appetite ensues from a present evil. One is that whereby the appetite is opposed to the present evil; and, in this respect, sorrow is of no use; because that which is present, cannot be not present. The other movement arises in the appetite to the effect of avoiding or expelling the saddening evil: and, in this respect, sorrow is of use, if it be for something which ought to be avoided. Because there are two reasons for which it may be right to avoid a thing. First, because it should be avoided in itself, on account of its being contrary to good; for instance, sin. Wherefore sorrow for sin is useful as inducing a man to avoid sin: hence the Apostle says (2 Cor. 7:9): “I am glad: not because you were made sorrowful, but

because you were made sorrowful unto penance.” Secondly, a thing is to be avoided, not as though it were evil in itself, but because it is an occasion of evil; either through one’s being attached to it, and loving it too much, or through one’s being thrown headlong thereby into an evil, as is evident in the case of temporal goods. And, in this respect, sorrow for temporal goods may be useful; according to Eccles. 7:3: “It is better to go to the house of mourning, than to the house of feasting: for in that we are put in mind of the end of all.”

Moreover, sorrow for that which ought to be avoided is always useful, since it adds another motive for avoiding it. Because the very evil is in itself a thing to be avoided: while everyone avoids sorrow for its own sake, just as everyone seeks the good, and pleasure in the good. Therefore just as pleasure in the good makes one seek the good more earnestly, so sorrow for evil makes one avoid evil more eagerly.

Reply to Objection 1. This passage is to be taken as referring to excessive sorrow, which consumes the soul: for such sorrow paralyzes the soul, and hinders it from shunning evil, as stated above (q. 37, a. 2).

Reply to Objection 2. Just as any object of choice becomes less eligible by reason of sorrow, so that which ought to be shunned is still more to be shunned by reason of sorrow: and, in this respect, sorrow is useful.

Reply to Objection 3. Sorrow caused by an action hinders that action: but sorrow for the cessation of an action, makes one do it more earnestly.

Objection 1. It would seem that pain is the greatest evil. Because “the worst is contrary to the best” (Ethic. viii, 10). But a certain pleasure is the greatest good, viz. the pleasure of bliss. Therefore a certain pain is the greatest evil.

Objection 2. Further, happiness is man’s greatest good, because it is his last end. But man’s Happiness consists in his “having whatever he will, and in willing naught amiss,” as stated above (q. 3, a. 4, obj. 5; q. 5, a. 8, obj. 3). Therefore man’s greatest good consists in the fulfilment of his will. Now pain consists in something happening contrary to the will, as Augustine declares (De Civ. Dei xiv, 6,15). Therefore pain is man’s greatest evil.

Objection 3. Further, Augustine argues thus (Solliloq. i, 12): “We are composed of two parts, i.e. of a soul and a body, whereof the body is the inferior. Now the sovereign good is the greatest good of the better part: while the supreme evil is the greatest evil of the inferior part. But wisdom is the greatest good of the soul; while the worst thing in the body is pain. Therefore man’s greatest good is to be wise: while his greatest evil is to suffer pain.”

On the contrary, Guilt is a greater evil than punishment, as was stated in the Ia, q. 48, a. 6. But sorrow or pain belongs to the punishment of sin, just as the enjoyment of changeable things is an evil of guilt. For Augustine says (De Vera Relig. xii): “What is pain of the soul, except for the soul to be deprived of that which it was wont to enjoy, or had hoped to enjoy? And this is all that is called evil, i.e. sin, and the punishment of sin.” Therefore sorrow or pain is not man’s greatest evil.

I answer that, It is impossible for any sorrow or

pain to be man’s greatest evil. For all sorrow or pain is either for something that is truly evil, or for something that is apparently evil, but good in reality. Now pain or sorrow for that which is truly evil cannot be the greatest evil: for there is something worse, namely, either not to reckon as evil that which is really evil, or not to reject it. Again, sorrow or pain, for that which is apparently evil, but really good, cannot be the greatest evil, for it would be worse to be altogether separated from that which is truly good. Hence it is impossible for any sorrow or pain to be man’s greatest evil.

Reply to Objection 1. Pleasure and sorrow have two good points in common: namely, a true judgment concerning good and evil; and the right order of the will in approving of good and rejecting evil. Thus it is clear that in pain or sorrow there is a good, by the removal of which they become worse: and yet there is not an evil in every pleasure, by the removal of which the pleasure is better. Consequently, a pleasure can be man’s highest good, in the way above stated (q. 34, a. 3): whereas sorrow cannot be man’s greatest evil.

Reply to Objection 2. The very fact of the will being opposed to evil is a good. And for this reason, sorrow or pain cannot be the greatest evil; because it has an admixture of good.

Reply to Objection 3. That which harms the better thing is worse than that which harms the worse. Now a thing is called evil “because it harms,” as Augustine says (Enchiridion xii). Therefore that which is an evil to the soul is a greater evil than that which is an evil to the body. Therefore this argument does not prove: nor does Augustine give it as his own, but as taken from another*.

* Cornelius Celsus

Objection 1. It would seem that all sorrow is evil. For Gregory of Nyssa* says: “All sorrow is evil, from its very nature.” Now what is naturally evil, is evil always and everywhere. Therefore, all sorrow is evil.

Objection 2. Further, that which all, even the virtuous, avoid, is evil. But all avoid sorrow, even the virtuous, since as stated in *Ethic.* vii, 11, “though the prudent man does not aim at pleasure, yet he aims at avoiding sorrow.” Therefore sorrow is evil.

Objection 3. Further, just as bodily evil is the object and cause of bodily pain, so spiritual evil is the object and cause of sorrow in the soul. But every bodily pain is a bodily evil. Therefore every spiritual sorrow is an evil of the soul.

On the contrary, Sorrow for evil is contrary to pleasure in evil. But pleasure in evil is evil: wherefore in condemnation of certain men, it is written (*Prov.* 2:14), that “they were glad when they had done evil.” Therefore sorrow for evil is good.

I answer that, A thing may be good or evil in two ways: first considered simply and in itself; and thus all sorrow is an evil, because the mere fact of a man’s appetite being uneasy about a present evil, is itself an evil, because it hinders the response of the appetite in good. Secondly, a thing is said to be good or evil, on the supposition of something else: thus shame is said to be good, on the supposition of a shameful deed done, as stated in *Ethic.* iv, 9. Accordingly, supposing the pres-

ence of something saddening or painful, it is a sign of goodness if a man is in sorrow or pain on account of this present evil. For if he were not to be in sorrow or pain, this could only be either because he feels it not, or because he does not reckon it as something unbecoming, both of which are manifest evils. Consequently it is a condition of goodness, that, supposing an evil to be present, sorrow or pain should ensue. Wherefore Augustine says (*Gen. ad lit.* viii, 14): “It is also a good thing that he sorrows for the good he has lost: for had not some good remained in his nature, he could not be punished by the loss of good.” Because, however, in the science of *Morals*, we consider things individually—for actions are concerned about individuals—that which is good on some supposition, should be considered as good: just as that which is voluntary on some supposition, is judged to be voluntary, as stated in *Ethic.* iii, 1, and likewise above (q. 6, a. 6).

Reply to Objection 1. Gregory of Nyssa† is speaking of sorrow on the part of the evil that causes it, but not on the part of the subject that feels and rejects the evil. And from this point of view, all shun sorrow, inasmuch as they shun evil: but they do not shun the perception and rejection of evil. The same also applies to bodily pain: because the perception and rejection of bodily evil is the proof of the goodness of nature.

This suffices for the Replies to the Second and Third Objections.

* Nemesius, *De Nat. Hom.* xix. † Nemesius

Objection 1. It would seem that sorrow is not a virtuous good. For that which leads to hell is not a virtuous good. But, as Augustine says (Gen. ad lit. xii, 33), “Jacob seems to have feared lest he should be troubled overmuch by sorrow, and so, instead of entering into the rest of the blessed, be consigned to the hell of sinners.” Therefore sorrow is not a virtuous good.

Objection 2. Further, the virtuous good is praiseworthy and meritorious. But sorrow lessens praise or merit: for the Apostle says (2 Cor. 9:7): “Everyone, as he hath determined in his heart, not with sadness, or of necessity.” Therefore sorrow is not a virtuous good.

Objection 3. Further, as Augustine says (De Civ. Dei xiv, 15), “sorrow is concerned about those things which happen against our will.” But not to will those things which are actually taking place, is to have a will opposed to the decree of God, to Whose providence whatever is done is subject. Since, then, conformity of the human to the Divine will is a condition of the rectitude of the will, as stated above (q. 19, a. 9), it seems that sorrow is incompatible with rectitude of the will, and that consequently it is not virtuous.

On the contrary, Whatever merits the reward of eternal life is virtuous. But such is sorrow; as is evident from Mat. 5:5: “Blessed are they that mourn, for they shall be comforted.” Therefore sorrow is a virtuous good.

I answer that, In so far as sorrow is good, it can be a virtuous good. For it has been said above (a. 1) that sorrow is a good inasmuch as it denotes perception and

rejection of evil. These two things, as regards bodily pain, are a proof of the goodness of nature, to which it is due that the senses perceive, and that nature shuns, the harmful thing that causes pain. As regards interior sorrow, perception of the evil is sometimes due to a right judgment of reason; while the rejection of the evil is the act of the will, well disposed and detesting that evil. Now every virtuous good results from these two things, the rectitude of the reason and the will. Wherefore it is evident that sorrow may be a virtuous good.

Reply to Objection 1. All the passions of the soul should be regulated according to the rule of reason, which is the root of the virtuous good; but excessive sorrow, of which Augustine is speaking, oversteps this rule, and therefore it fails to be a virtuous good.

Reply to Objection 2. Just as sorrow for an evil arises from a right will and reason, which detest the evil, so sorrow for a good is due to a perverse reason and will, which detest the good. Consequently such sorrow is an obstacle to the praise and merit of the virtuous good; for instance, when a man gives an alms sorrowfully.

Reply to Objection 3. Some things do actually happen, not because God wills, but because He permits them to happen—such as sins. Consequently a will that is opposed to sin, whether in oneself or in another, is not discordant from the Divine will. Penal evils happen actually, even by God’s will. But it is not necessary for the rectitude of his will, that man should will them in themselves: but only that he should not revolt against the order of Divine justice, as stated above (q. 19, a. 10).

Objection 1. It would seem that sorrow cannot be a useful good. For it is written (Ecclus. 30:25): “Sadness hath killed many, and there is no profit in it.”

Objection 2. Further, choice is of that which is useful to an end. But sorrow is not an object of choice; in fact, “a thing without sorrow is to be chosen rather than the same thing with sorrow” (Topic. iii, 2). Therefore sorrow is not a useful good.

Objection 3. Further, “Everything is for the sake of its own operation,” as stated in De Coel. ii, 3. But “sorrow hinders operation,” as stated in Ethic. x, 5. Therefore sorrow is not a useful good.

On the contrary, The wise man seeks only that which is useful. But according to Eccles. 7:5, “the heart of the wise is where there is mourning, and the heart of fools where there is mirth.” Therefore sorrow is useful.

I answer that, A twofold movement of the appetite ensues from a present evil. One is that whereby the appetite is opposed to the present evil; and, in this respect, sorrow is of no use; because that which is present, cannot be not present. The other movement arises in the appetite to the effect of avoiding or expelling the saddening evil: and, in this respect, sorrow is of use, if it be for something which ought to be avoided. Because there are two reasons for which it may be right to avoid a thing. First, because it should be avoided in itself, on account of its being contrary to good; for instance, sin. Wherefore sorrow for sin is useful as inducing a man to avoid sin: hence the Apostle says (2 Cor. 7:9): “I am glad: not because you were made sorrowful, but

because you were made sorrowful unto penance.” Secondly, a thing is to be avoided, not as though it were evil in itself, but because it is an occasion of evil; either through one’s being attached to it, and loving it too much, or through one’s being thrown headlong thereby into an evil, as is evident in the case of temporal goods. And, in this respect, sorrow for temporal goods may be useful; according to Eccles. 7:3: “It is better to go to the house of mourning, than to the house of feasting: for in that we are put in mind of the end of all.”

Moreover, sorrow for that which ought to be avoided is always useful, since it adds another motive for avoiding it. Because the very evil is in itself a thing to be avoided: while everyone avoids sorrow for its own sake, just as everyone seeks the good, and pleasure in the good. Therefore just as pleasure in the good makes one seek the good more earnestly, so sorrow for evil makes one avoid evil more eagerly.

Reply to Objection 1. This passage is to be taken as referring to excessive sorrow, which consumes the soul: for such sorrow paralyzes the soul, and hinders it from shunning evil, as stated above (q. 37, a. 2).

Reply to Objection 2. Just as any object of choice becomes less eligible by reason of sorrow, so that which ought to be shunned is still more to be shunned by reason of sorrow: and, in this respect, sorrow is useful.

Reply to Objection 3. Sorrow caused by an action hinders that action: but sorrow for the cessation of an action, makes one do it more earnestly.

Objection 1. It would seem that pain is the greatest evil. Because “the worst is contrary to the best” (Ethic. viii, 10). But a certain pleasure is the greatest good, viz. the pleasure of bliss. Therefore a certain pain is the greatest evil.

Objection 2. Further, happiness is man’s greatest good, because it is his last end. But man’s Happiness consists in his “having whatever he will, and in willing naught amiss,” as stated above (q. 3, a. 4, obj. 5; q. 5, a. 8, obj. 3). Therefore man’s greatest good consists in the fulfilment of his will. Now pain consists in something happening contrary to the will, as Augustine declares (De Civ. Dei xiv, 6,15). Therefore pain is man’s greatest evil.

Objection 3. Further, Augustine argues thus (Solliloq. i, 12): “We are composed of two parts, i.e. of a soul and a body, whereof the body is the inferior. Now the sovereign good is the greatest good of the better part: while the supreme evil is the greatest evil of the inferior part. But wisdom is the greatest good of the soul; while the worst thing in the body is pain. Therefore man’s greatest good is to be wise: while his greatest evil is to suffer pain.”

On the contrary, Guilt is a greater evil than punishment, as was stated in the Ia, q. 48, a. 6. But sorrow or pain belongs to the punishment of sin, just as the enjoyment of changeable things is an evil of guilt. For Augustine says (De Vera Relig. xii): “What is pain of the soul, except for the soul to be deprived of that which it was wont to enjoy, or had hoped to enjoy? And this is all that is called evil, i.e. sin, and the punishment of sin.” Therefore sorrow or pain is not man’s greatest evil.

I answer that, It is impossible for any sorrow or

pain to be man’s greatest evil. For all sorrow or pain is either for something that is truly evil, or for something that is apparently evil, but good in reality. Now pain or sorrow for that which is truly evil cannot be the greatest evil: for there is something worse, namely, either not to reckon as evil that which is really evil, or not to reject it. Again, sorrow or pain, for that which is apparently evil, but really good, cannot be the greatest evil, for it would be worse to be altogether separated from that which is truly good. Hence it is impossible for any sorrow or pain to be man’s greatest evil.

Reply to Objection 1. Pleasure and sorrow have two good points in common: namely, a true judgment concerning good and evil; and the right order of the will in approving of good and rejecting evil. Thus it is clear that in pain or sorrow there is a good, by the removal of which they become worse: and yet there is not an evil in every pleasure, by the removal of which the pleasure is better. Consequently, a pleasure can be man’s highest good, in the way above stated (q. 34, a. 3): whereas sorrow cannot be man’s greatest evil.

Reply to Objection 2. The very fact of the will being opposed to evil is a good. And for this reason, sorrow or pain cannot be the greatest evil; because it has an admixture of good.

Reply to Objection 3. That which harms the better thing is worse than that which harms the worse. Now a thing is called evil “because it harms,” as Augustine says (Enchiridion xii). Therefore that which is an evil to the soul is a greater evil than that which is an evil to the body. Therefore this argument does not prove: nor does Augustine give it as his own, but as taken from another*.

* Cornelius Celsus

Objection 1. It would seem that happiness is something uncreated. For Boethius says (De Consol. iii): “We must needs confess that God is happiness itself.”

Objection 2. Further, happiness is the supreme good. But it belongs to God to be the supreme good. Since, then, there are not several supreme goods, it seems that happiness is the same as God.

Objection 3. Further, happiness is the last end, to which man’s will tends naturally. But man’s will should tend to nothing else as an end, but to God, Who alone is to be enjoyed, as Augustine says (De Doctr. Christ. i, 5,22). Therefore happiness is the same as God.

On the contrary, Nothing made is uncreated. But man’s happiness is something made; because according to Augustine (De Doctr. Christ. i, 3): “Those things are to be enjoyed which make us happy.” Therefore happiness is not something uncreated.

I answer that, As stated above (q. 1, a. 8; q. 2, a. 7), our end is twofold. First, there is the thing itself which we desire to attain: thus for the miser, the end is money. Secondly there is the attainment or possession, the use or enjoyment of the thing desired; thus we may say that the end of the miser is the possession of money; and the end of the intemperate man is to enjoy something

pleasurable. In the first sense, then, man’s last end is the uncreated good, namely, God, Who alone by His infinite goodness can perfectly satisfy man’s will. But in the second way, man’s last end is something created, existing in him, and this is nothing else than the attainment or enjoyment of the last end. Now the last end is called happiness. If, therefore, we consider man’s happiness in its cause or object, then it is something uncreated; but if we consider it as to the very essence of happiness, then it is something created.

Reply to Objection 1. God is happiness by His Essence: for He is happy not by acquisition or participation of something else, but by His Essence. On the other hand, men are happy, as Boethius says (De Consol. iii), by participation; just as they are called “gods,” by participation. And this participation of happiness, in respect of which man is said to be happy, is something created.

Reply to Objection 2. Happiness is called man’s supreme good, because it is the attainment or enjoyment of the supreme good.

Reply to Objection 3. Happiness is said to be the last end, in the same way as the attainment of the end is called the end.

Objection 1. It would seem that happiness is not an operation. For the Apostle says (Rom. 6:22): “You have your fruit unto sanctification, and the end, life everlasting.” But life is not an operation, but the very being of living things. Therefore the last end, which is happiness, is not an operation.

Objection 2. Further, Boethius says (De Consol. iii) that happiness is “a state made perfect by the aggregate of all good things.” But state does not indicate operation. Therefore happiness is not an operation.

Objection 3. Further, happiness signifies something existing in the happy one: since it is man’s final perfection. But the meaning of operation does not imply anything existing in the operator, but rather something proceeding therefrom. Therefore happiness is not an operation.

Objection 4. Further, happiness remains in the happy one. Now operation does not remain, but passes. Therefore happiness is not an operation.

Objection 5. Further, to one man there is one happiness. But operations are many. Therefore happiness is not an operation.

Objection 6. Further, happiness is in the happy one uninterruptedly. But human operation is often interrupted; for instance, by sleep, or some other occupation, or by cessation. Therefore happiness is not an operation.

On the contrary, The Philosopher says (Ethic. i, 13) that “happiness is an operation according to perfect virtue.”

I answer that, In so far as man’s happiness is something created, existing in him, we must needs say that it is an operation. For happiness is man’s supreme perfection. Now each thing is perfect in so far as it is actual; since potentiality without act is imperfect. Consequently happiness must consist in man’s last act. But it is evident that operation is the last act of the operator, wherefore the Philosopher calls it “second act” (De Anima ii, 1): because that which has a form can be potentially operating, just as he who knows is potentially considering. And hence it is that in other things, too, each one is said to be “for its operation” (De Coel ii, 3). Therefore man’s happiness must of necessity consist in an operation.

Reply to Objection 1. Life is taken in two senses. First for the very being of the living. And thus happiness is not life: since it has been shown (q. 2, a. 5) that the being of a man, no matter in what it may consist, is not that man’s happiness; for of God alone is it true that His Being is His Happiness. Secondly, life means the operation of the living, by which operation the principle of life is made actual: thus we speak of active and contemplative life, or of a life of pleasure. And in this sense eternal life is said to be the last end, as is clear from Jn. 17:3: “This is eternal life, that they may know Thee, the only true God.”

Reply to Objection 2. Boethius, in defining happiness, considered happiness in general: for considered thus it is the perfect common good; and he signified this by saying that happiness is “a state made perfect by the aggregate of all good things,” thus implying that the state of a happy man consists in possessing the perfect good. But Aristotle expressed the very essence of happiness, showing by what man is established in this state, and that it is by some kind of operation. And so it is that he proves happiness to be “the perfect good” (Ethic. i, 7).

Reply to Objection 3. As stated in Metaph. ix, 7 action is twofold. One proceeds from the agent into outward matter, such as “to burn” and “to cut.” And such an operation cannot be happiness: for such an operation is an action and a perfection, not of the agent, but rather of the patient, as is stated in the same passage. The other is an action that remains in the agent, such as to feel, to understand, and to will: and such an action is a perfection and an act of the agent. And such an operation can be happiness.

Reply to Objection 4. Since happiness signifies some final perfection; according as various things capable of happiness can attain to various degrees of perfection, so must there be various meanings applied to happiness. For in God there is happiness essentially; since His very Being is His operation, whereby He enjoys no other than Himself. In the happy angels, the final perfection is in respect of some operation, by which they are united to the Uncreated Good: and this operation of theirs is one only and everlasting. But in men, according to their present state of life, the final perfection is in respect of an operation whereby man is united to God: but this operation neither can be continual, nor, consequently, is it one only, because operation is multiplied by being discontinued. And for this reason in the present state of life, perfect happiness cannot be attained by man. Wherefore the Philosopher, in placing man’s happiness in this life (Ethic. i, 10), says that it is imperfect, and after a long discussion, concludes: “We call men happy, but only as men.” But God has promised us perfect happiness, when we shall be “as the angels. . . in heaven” (Mat. 22:30).

Consequently in regard to this perfect happiness, the objection fails: because in that state of happiness, man’s mind will be united to God by one, continual, everlasting operation. But in the present life, in as far as we fall short of the unity and continuity of that operation so do we fall short of perfect happiness. Nevertheless it is a participation of happiness: and so much the greater, as the operation can be more continuous and more one. Consequently the active life, which is busy with many things, has less of happiness than the contemplative life, which is busied with one thing, i.e. the contemplation of truth. And if at any time man is not actually engaged in this operation, yet since he can always easily turn to

it, and since he ordains the very cessation, by sleeping or occupying himself otherwise, to the aforesaid occupation, the latter seems, as it were, continuous. From these remarks the replies to Objections 5 and 6 are evident.

Objection 1. It would seem that happiness consists in an operation of the senses also. For there is no more excellent operation in man than that of the senses, except the intellectual operation. But in us the intellectual operation depends on the sensitive: since “we cannot understand without a phantasm” (De Anima iii, 7). Therefore happiness consists in an operation of the senses also.

Objection 2. Further, Boethius says (De Consol. iii) that happiness is “a state made perfect by the aggregate of all good things.” But some goods are sensible, which we attain by the operation of the senses. Therefore it seems that the operation of the senses is needed for happiness.

Objection 3. Further, happiness is the perfect good, as we find proved in Ethic. i, 7: which would not be true, were not man perfected thereby in all his parts. But some parts of the soul are perfected by sensitive operations. Therefore sensitive operation is required for happiness.

On the contrary, Irrational animals have the sensitive operation in common with us: but they have not happiness in common with us. Therefore happiness does not consist in a sensitive operation.

I answer that, A thing may belong to happiness in three ways: (1) essentially, (2) antecedently, (3) consequently. Now the operation of sense cannot belong to happiness essentially. For man’s happiness consists essentially in his being united to the Uncreated Good, Which is his last end, as shown above (a. 1): to Which man cannot be united by an operation of his senses. Again, in like manner, because, as shown above (q. 2, a. 5), man’s happiness does not consist in goods of the

body, which goods alone, however, we attain through the operation of the senses.

Nevertheless the operations of the senses can belong to happiness, both antecedently and consequently: antecedently, in respect of imperfect happiness, such as can be had in this life, since the operation of the intellect demands a previous operation of the sense; consequently, in that perfect happiness which we await in heaven; because at the resurrection, “from the very happiness of the soul,” as Augustine says (Ep. ad Dioscor.) “the body and the bodily senses will receive a certain overflow, so as to be perfected in their operations”; a point which will be explained further on when we treat of the resurrection (Ia IIae, Qq. 82 -85). But then the operation whereby man’s mind is united to God will not depend on the senses.

Reply to Objection 1. This objection proves that the operation of the senses is required antecedently for imperfect happiness, such as can be had in this life.

Reply to Objection 2. Perfect happiness, such as the angels have, includes the aggregate of all good things, by being united to the universal source of all good; not that it requires each individual good. But in this imperfect happiness, we need the aggregate of those goods that suffice for the most perfect operation of this life.

Reply to Objection 3. In perfect happiness the entire man is perfected, in the lower part of his nature, by an overflow from the higher. But in the imperfect happiness of this life, it is otherwise; we advance from the perfection of the lower part to the perfection of the higher part.

Objection 1. It would seem that happiness consists in an act of the will. For Augustine says (*De Civ. Dei* xix, 10,11), that man's happiness consists in peace; wherefore it is written (Ps. 147:3): "Who hath placed peace in thy end [Douay: 'borders']". But peace pertains to the will. Therefore man's happiness is in the will.

Objection 2. Further, happiness is the supreme good. But good is the object of the will. Therefore happiness consists in an operation of the will.

Objection 3. Further, the last end corresponds to the first mover: thus the last end of the whole army is victory, which is the end of the general, who moves all the men. But the first mover in regard to operations is the will: because it moves the other powers, as we shall state further on (q. 9, Aa. 1,3). Therefore happiness regards the will.

Objection 4. Further, if happiness be an operation, it must needs be man's most excellent operation. But the love of God, which is an act of the will, is a more excellent operation than knowledge, which is an operation of the intellect, as the Apostle declares (1 Cor. 13). Therefore it seems that happiness consists in an act of the will.

Objection 5. Further, Augustine says (*De Trin.* xiii, 5) that "happy is he who has whatever he desires, and desires nothing amiss." And a little further on (6) he adds: "He is most happy who desires well, whatever he desires: for good things make a man happy, and such a man already possesses some good—i.e. a good will." Therefore happiness consists in an act of the will.

On the contrary, Our Lord said (*Jn.* 17:3): "This is eternal life: that they may know Thee, the only true God." Now eternal life is the last end, as stated above (a. 2, ad 1). Therefore man's happiness consists in the knowledge of God, which is an act of the intellect.

I answer that, As stated above (q. 2, a. 6) two things are needed for happiness: one, which is the essence of happiness: the other, that is, as it were, its proper accident, i.e. the delight connected with it. I say, then, that as to the very essence of happiness, it is impossible for it to consist in an act of the will. For it is evident from what has been said (Aa. 1,2; q. 2, a. 7) that happiness is the attainment of the last end. But the attainment of the end does not consist in the very act of the will. For the will is directed to the end, both absent, when it desires it; and present, when it is delighted by resting therein. Now it is evident that the desire itself of the end is not the attainment of the end, but is a movement towards the end: while delight comes to the will from the end being present; and not conversely, is a thing made present, by the fact that the will delights in it. Therefore, that the

end be present to him who desires it, must be due to something else than an act of the will.

This is evidently the case in regard to sensible ends. For if the acquisition of money were through an act of the will, the covetous man would have it from the very moment that he wished for it. But at the moment it is far from him; and he attains it, by grasping it in his hand, or in some like manner; and then he delights in the money got. And so it is with an intelligible end. For at first we desire to attain an intelligible end; we attain it, through its being made present to us by an act of the intellect; and then the delighted will rests in the end when attained.

So, therefore, the essence of happiness consists in an act of the intellect: but the delight that results from happiness pertains to the will. In this sense Augustine says (*Confess.* x, 23) that happiness is "joy in truth," because, to wit, joy itself is the consummation of happiness.

Reply to Objection 1. Peace pertains to man's last end, not as though it were the very essence of happiness; but because it is antecedent and consequent thereto: antecedent, in so far as all those things are removed which disturb and hinder man in attaining the last end: consequent inasmuch as when man has attained his last end, he remains at peace, his desire being at rest.

Reply to Objection 2. The will's first object is not its act: just as neither is the first object of the sight, vision, but a visible thing. Wherefore, from the very fact that happiness belongs to the will, as the will's first object, it follows that it does not belong to it as its act.

Reply to Objection 3. The intellect apprehends the end before the will does: yet motion towards the end begins in the will. And therefore to the will belongs that which last of all follows the attainment of the end, viz. delight or enjoyment.

Reply to Objection 4. Love ranks above knowledge in moving, but knowledge precedes love in attaining: for "naught is loved save what is known," as Augustine says (*De Trin.* x, 1). Consequently we first attain an intelligible end by an act of the intellect; just as we first attain a sensible end by an act of sense.

Reply to Objection 5. He who has whatever he desires, is happy, because he has what he desires: and this indeed is by something other than the act of his will. But to desire nothing amiss is needed for happiness, as a necessary disposition thereto. And a good will is reckoned among the good things which make a man happy, forasmuch as it is an inclination of the will: just as a movement is reduced to the genus of its terminus, for instance, "alteration" to the genus "quality."

Objection 1. It would seem that happiness is an operation of the practical intellect. For the end of every creature consists in becoming like God. But man is like God, by his practical intellect, which is the cause of things understood, rather than by his speculative intellect, which derives its knowledge from things. Therefore man's happiness consists in an operation of the practical intellect rather than of the speculative.

Objection 2. Further, happiness is man's perfect good. But the practical intellect is ordained to the good rather than the speculative intellect, which is ordained to the true. Hence we are said to be good, in reference to the perfection of the practical intellect, but not in reference to the perfection of the speculative intellect, according to which we are said to be knowing or understanding. Therefore man's happiness consists in an operation of the practical intellect rather than of the speculative.

Objection 3. Further, happiness is a good of man himself. But the speculative intellect is more concerned with things outside man; whereas the practical intellect is concerned with things belonging to man himself, viz. his operations and passions. Therefore man's happiness consists in an operation of the practical intellect rather than of the speculative.

On the contrary, Augustine says (De Trin. i, 8) that "contemplation is promised us, as being the goal of all our actions, and the everlasting perfection of our joys."

I answer that, Happiness consists in an operation of the speculative rather than of the practical intellect. This is evident for three reasons. First because if man's happiness is an operation, it must needs be man's highest operation. Now man's highest operation is that of his highest power in respect of its highest object: and his highest power is the intellect, whose highest object is the Divine Good, which is the object, not of the practical but of the speculative intellect. Consequently happiness consists principally in such an operation, viz. in the contemplation of Divine things. And since that "seems to be each man's self, which is best in him," according to Ethic. ix, 8, and x, 7, therefore such an operation is most proper to man and most delightful to him.

Secondly, it is evident from the fact that contempla-

tion is sought principally for its own sake. But the act of the practical intellect is not sought for its own sake but for the sake of action: and these very actions are ordained to some end. Consequently it is evident that the last end cannot consist in the active life, which pertains to the practical intellect.

Thirdly, it is again evident, from the fact that in the contemplative life man has something in common with things above him, viz. with God and the angels, to whom he is made like by happiness. But in things pertaining to the active life, other animals also have something in common with man, although imperfectly.

Therefore the last and perfect happiness, which we await in the life to come, consists entirely in contemplation. But imperfect happiness, such as can be had here, consists first and principally, in an operation of the practical intellect directing human actions and passions, as stated in Ethic. x, 7,8.

Reply to Objection 1. The asserted likeness of the practical intellect to God is one of proportion; that is to say, by reason of its standing in relation to what it knows, as God does to what He knows. But the likeness of the speculative intellect to God is one of union and "information"; which is a much greater likeness. And yet it may be answered that, in regard to the principal thing known, which is His Essence, God has not practical but merely speculative knowledge.

Reply to Objection 2. The practical intellect is ordained to good which is outside of it: but the speculative intellect has good within it, viz. the contemplation of truth. And if this good be perfect, the whole man is perfected and made good thereby: such a good the practical intellect has not; but it directs man thereto.

Reply to Objection 3. This argument would hold, if man himself were his own last end; for then the consideration and direction of his actions and passions would be his happiness. But since man's last end is something outside of him, to wit, God, to Whom we reach out by an operation of the speculative intellect; therefore, man's happiness consists in an operation of the speculative intellect rather than of the practical intellect.

Objection 1. It would seem that man's happiness consists in the consideration of speculative sciences. For the Philosopher says (*Ethic.* i, 13) that "happiness is an operation according to perfect virtue." And in distinguishing the virtues, he gives no more than three speculative virtues—"knowledge," "wisdom" and "understanding," which all belong to the consideration of speculative sciences. Therefore man's final happiness consists in the consideration of speculative sciences.

Objection 2. Further, that which all desire for its own sake, seems to be man's final happiness. Now such is the consideration of speculative sciences; because, as stated in *Metaph.* i, 1, "all men naturally desire to know"; and, a little farther on (2), it is stated that speculative sciences are sought for their own sakes. Therefore happiness consists in the consideration of speculative sciences.

Objection 3. Further, happiness is man's final perfection. Now everything is perfected, according as it is reduced from potentiality to act. But the human intellect is reduced to act by the consideration of speculative sciences. Therefore it seems that in the consideration of these sciences, man's final happiness consists.

On the contrary, It is written (*Jer.* 9:23): "Let not the wise man glory in his wisdom": and this is said in reference to speculative sciences. Therefore man's final happiness does not consist in the consideration of these.

I answer that, As stated above (a. 2, ad 4), man's happiness is twofold, one perfect, the other imperfect. And by perfect happiness we are to understand that which attains to the true notion of happiness; and by imperfect happiness that which does not attain thereto, but partakes of some particular likeness of happiness. Thus perfect prudence is in man, with whom is the idea of things to be done; while imperfect prudence is in certain irrational animals, who are possessed of certain particular instincts in respect of works similar to works of prudence.

Accordingly perfect happiness cannot consist essentially in the consideration of speculative sciences. To

prove this, we must observe that the consideration of a speculative science does not extend beyond the scope of the principles of that science: since the entire science is virtually contained in its principles. Now the first principles of speculative sciences are received through the senses, as the Philosopher clearly states at the beginning of the *Metaphysics* (i, 1), and at the end of the *Posterior Analytics* (ii, 15). Wherefore the entire consideration of speculative sciences cannot extend farther than knowledge of sensibles can lead. Now man's final happiness, which is his final perfection cannot consist in the knowledge of sensibles. For a thing is not perfected by something lower, except in so far as the lower partakes of something higher. Now it is evident that the form of a stone or of any sensible, is lower than man. Consequently the intellect is not perfected by the form of a stone, as such, but inasmuch as it partakes of a certain likeness to that which is above the human intellect, viz. the intelligible light, or something of the kind. Now whatever is by something else is reduced to that which is of itself. Therefore man's final perfection must needs be through knowledge of something above the human intellect. But it has been shown (*Ia*, q. 88, a. 2), that man cannot acquire through sensibles, the knowledge of separate substances, which are above the human intellect. Consequently it follows that man's happiness cannot consist in the consideration of speculative sciences. However, just as in sensible forms there is a participation of the higher substances, so the consideration of speculative sciences is a certain participation of true and perfect happiness.

Reply to Objection 1. In his book on *Ethics* the Philosopher treats of imperfect happiness, such as can be had in this life, as stated above (a. 2, ad 4).

Reply to Objection 2. Not only is perfect happiness naturally desired, but also any likeness or participation thereof.

Reply to Objection 3. Our intellect is reduced to act, in a fashion, by the consideration of speculative sciences, but not to its final and perfect act.

Objection 1. It would seem that man's happiness consists in the knowledge of separate substances, namely, angels. For Gregory says in a homily (xxvi in Evang.): "It avails nothing to take part in the feasts of men, if we fail to take part in the feasts of angels"; by which he means final happiness. But we can take part in the feasts of the angels by contemplating them. Therefore it seems that man's final happiness consists in contemplating the angels.

Objection 2. Further, the final perfection of each thing is for it to be united to its principle: wherefore a circle is said to be a perfect figure, because its beginning and end coincide. But the beginning of human knowledge is from the angels, by whom men are enlightened, as Dionysius says (Coel. Hier. iv). Therefore the perfection of the human intellect consists in contemplating the angels.

Objection 3. Further, each nature is perfect, when united to a higher nature; just as the final perfection of a body is to be united to the spiritual nature. But above the human intellect, in the natural order, are the angels. Therefore the final perfection of the human intellect is to be united to the angels by contemplation.

On the contrary, It is written (Jer. 9:24): "Let him that glorieth, glory in this, that he understandeth and knoweth Me." Therefore man's final glory or happiness consists only in the knowledge of God.

I answer that, As stated above (a. 6), man's perfect happiness consists not in that which perfects the intellect by some participation, but in that which is so by its essence. Now it is evident that whatever is the perfection of a power is so in so far as the proper formal object of that power belongs to it. Now the proper object of the intellect is the true. Therefore the contemplation of whatever has participated truth, does not per-

fect the intellect with its final perfection. Since, therefore, the order of things is the same in being and in truth (Metaph ii, 1); whatever are beings by participation, are true by participation. Now angels have being by participation: because in God alone is His Being His Essence, as shown in the Ia, q. 44, a. 1. It follows that contemplation of Him makes man perfectly happy. However, there is no reason why we should not admit a certain imperfect happiness in the contemplation of the angels; and higher indeed than in the consideration of speculative science.

Reply to Objection 1. We shall take part in the feasts of the angels, by contemplating not only the angels, but, together with them, also God Himself.

Reply to Objection 2. According to those that hold human souls to be created by the angels, it seems fitting enough, that man's happiness should consist in the contemplation of the angels, in the union, as it were, of man with his beginning. But this is erroneous, as stated in Ia, q. 90, a. 3. Wherefore the final perfection of the human intellect is by union with God, Who is the first principle both of the creation of the soul and of its enlightenment. Whereas the angel enlightens as a minister, as stated in the Ia, q. 111, a. 2, ad 2. Consequently, by his ministration he helps man to attain to happiness; but he is not the object of man's happiness.

Reply to Objection 3. The lower nature may reach the higher in two ways. First, according to a degree of the participating power: and thus man's final perfection will consist in his attaining to a contemplation such as that of the angels. Secondly, as the object is attained by the power: and thus the final perfection of each power is to attain that in which is found the fulness of its formal object.

Objection 1. It would seem that man's happiness does not consist in the vision of the Divine Essence. For Dionysius says (*Myst. Theol.* i) that by that which is highest in his intellect, man is united to God as to something altogether unknown. But that which is seen in its essence is not altogether unknown. Therefore the final perfection of the intellect, namely, happiness, does not consist in God being seen in His Essence.

Objection 2. Further, the higher the perfection belongs to the higher nature. But to see His own Essence is the perfection proper to the Divine intellect. Therefore the final perfection of the human intellect does not reach to this, but consists in something less.

On the contrary, It is written (1 Jn. 3:2): "When He shall appear, we shall be like to Him; and [Vulg.: 'because'] we shall see Him as He is."

I answer that, Final and perfect happiness can consist in nothing else than the vision of the Divine Essence. To make this clear, two points must be observed. First, that man is not perfectly happy, so long as something remains for him to desire and seek: secondly, that the perfection of any power is determined by the nature of its object. Now the object of the intellect is "what a thing is," i.e. the essence of a thing, according to *De Anima* iii, 6. Wherefore the intellect attains perfection, in so far as it knows the essence of a thing. If therefore an intellect knows the essence of some effect, whereby it is not possible to know the essence of the cause, i.e. to know of the cause "what it is"; that intellect cannot be said to reach that cause simply, although it may be able to gather from the effect the knowledge of that the cause is. Consequently, when man knows an effect, and knows that it has a cause, there naturally remains in the

man the desire to know about the cause, "what it is." And this desire is one of wonder, and causes inquiry, as is stated in the beginning of the *Metaphysics* (i, 2). For instance, if a man, knowing the eclipse of the sun, consider that it must be due to some cause, and know not what that cause is, he wonders about it, and from wondering proceeds to inquire. Nor does this inquiry cease until he arrive at a knowledge of the essence of the cause.

If therefore the human intellect, knowing the essence of some created effect, knows no more of God than "that He is"; the perfection of that intellect does not yet reach simply the First Cause, but there remains in it the natural desire to seek the cause. Wherefore it is not yet perfectly happy. Consequently, for perfect happiness the intellect needs to reach the very Essence of the First Cause. And thus it will have its perfection through union with God as with that object, in which alone man's happiness consists, as stated above (*Aa.* 1,7; q. 2, a. 8).

Reply to Objection 1. Dionysius speaks of the knowledge of wayfarers journeying towards happiness.

Reply to Objection 2. As stated above (q. 1, a. 8), the end has a twofold acceptance. First, as to the thing itself which is desired: and in this way, the same thing is the end of the higher and of the lower nature, and indeed of all things, as stated above (q. 1, a. 8). Secondly, as to the attainment of this thing; and thus the end of the higher nature is different from that of the lower, according to their respective habitudes to that thing. So then in the happiness of God, Who, in understanding his Essence, comprehends It, is higher than that of a man or angel who sees It indeed, but comprehends It not.

FIRST PART OF THE SECOND PART, QUESTION 4

Of Those Things That Are Required for Happiness

(In Eight Articles)

We have now to consider those things that are required for happiness: and concerning this there are eight points of inquiry:

- (1) Whether delight is required for happiness?
- (2) Which is of greater account in happiness, delight or vision?
- (3) Whether comprehension is required?
- (4) Whether rectitude of the will is required?
- (5) Whether the body is necessary for man's happiness?
- (6) Whether any perfection of the body is necessary?
- (7) Whether any external goods are necessary?
- (8) Whether the fellowship of friends is necessary?

Whether delight is required for happiness?

Ia IIae q. 4 a. 1

Objection 1. It would seem that delight is not required for happiness. For Augustine says (De Trin. i, 8) that "vision is the entire reward of faith." But the prize or reward of virtue is happiness, as the Philosopher clearly states (Ethic. i, 9). Therefore nothing besides vision is required for happiness.

Objection 2. Further, happiness is "the most self-sufficient of all goods," as the Philosopher declares (Ethic. i, 7). But that which needs something else is not self-sufficient. Since then the essence of happiness consists in seeing God, as stated above (q. 3, a. 8); it seems that delight is not necessary for happiness.

Objection 3. Further, the "operation of bliss or happiness should be unhindered" (Ethic. vii, 13). But delight hinders the operation of the intellect: since it destroys the estimate of prudence (Ethic. vi, 5). Therefore delight is not necessary for happiness.

On the contrary, Augustine says (Confess. x, 23) that happiness is "joy in truth."

I answer that, One thing may be necessary for another in four ways. First, as a preamble and preparation to it: thus instruction is necessary for science. Secondly, as perfecting it: thus the soul is necessary for the life of the body. Thirdly, as helping it from without: thus friends are necessary for some undertaking. Fourthly, as something attendant on it: thus we might say that heat is

necessary for fire. And in this way delight is necessary for happiness. For it is caused by the appetite being at rest in the good attained. Wherefore, since happiness is nothing else but the attainment of the Sovereign Good, it cannot be without concomitant delight.

Reply to Objection 1. From the very fact that a reward is given to anyone, the will of him who deserves it is at rest, and in this consists delight. Consequently, delight is included in the very notion of reward.

Reply to Objection 2. The very sight of God causes delight. Consequently, he who sees God cannot need delight.

Reply to Objection 3. Delight that is attendant upon the operation of the intellect does not hinder it, rather does it perfect it, as stated in Ethic. x, 4: since what we do with delight, we do with greater care and perseverance. On the other hand, delight which is extraneous to the operation is a hindrance thereto: sometimes by distracting the attention because, as already observed, we are more attentive to those things that delight us; and when we are very attentive to one thing, we must needs be less attentive to another: sometimes on account of opposition; thus a sensual delight that is contrary to reason, hinders the estimate of prudence more than it hinders the estimate of the speculative intellect.

Whether in happiness vision ranks before delight?

Ia IIae q. 4 a. 2

Objection 1. It would seem that in happiness, delight ranks before vision. For "delight is the perfection of operation" (Ethic. x, 4). But perfection ranks before the thing perfected. Therefore delight ranks before the operation of the intellect, i.e. vision.

Objection 2. Further, that by reason of which a thing is desirable, is yet more desirable. But operations are desired on account of the delight they afford: hence, too, nature has adjusted delight to those oper-

ations which are necessary for the preservation of the individual and of the species, lest animals should disregard such operations. Therefore, in happiness, delight ranks before the operation of the intellect, which is vision.

Objection 3. Further, vision corresponds to faith; while delight or enjoyment corresponds to charity. But charity ranks before faith, as the Apostle says (1 Cor. 13:13). Therefore delight or enjoyment ranks before vi-

sion.

On the contrary, The cause is greater than its effect. But vision is the cause of delight. Therefore vision ranks before delight.

I answer that, The Philosopher discusses this question (Ethic. x, 4), and leaves it unsolved. But if one consider the matter carefully, the operation of the intellect which is vision, must needs rank before delight. For delight consists in a certain repose of the will. Now that the will finds rest in anything, can only be on account of the goodness of that thing in which it reposes. If therefore the will reposes in an operation, the will's repose is caused by the goodness of the operation. Nor does the will seek good for the sake of repose; for thus the very act of the will would be the end, which has been disproved above (q. 1, a. 1, ad 2; q. 3, a. 4): but it seeks to be at rest in the operation, because that operation is its good. Consequently it is evident that the operation in which the will reposes ranks before the resting of the will therein.

Reply to Objection 1. As the Philosopher says (Ethic. x, 4) "delight perfects operation as vigor perfects youth," because it is a result of youth. Conse-

quently delight is a perfection attendant upon vision; but not a perfection whereby vision is made perfect in its own species.

Reply to Objection 2. The apprehension of the senses does not attain to the universal good, but to some particular good which is delightful. And consequently, according to the sensitive appetite which is in animals, operations are sought for the sake of delight. But the intellect apprehends the universal good, the attainment of which results in delight: wherefore its purpose is directed to good rather than to delight. Hence it is that the Divine intellect, which is the Author of nature, adjusted delights to operations on account of the operations. And we should form our estimate of things not simply according to the order of the sensitive appetite, but rather according to the order of the intellectual appetite.

Reply to Objection 3. Charity does not seem the beloved good for the sake of delight: it is for charity a consequence that it delights in the good gained which it loves. Thus delight does not answer to charity as its end, but vision does, whereby the end is first made present to charity.

Whether comprehension is necessary for happiness?

Ia IIae q. 4 a. 3

Objection 1. It would seem that comprehension is not necessary for happiness. For Augustine says (Ad Paulinam de Videndo Deum;*): "To reach God with the mind is happiness, to comprehend Him is impossible." Therefore happiness is without comprehension.

Objection 2. Further, happiness is the perfection of man as to his intellectual part, wherein there are no other powers than the intellect and will, as stated in the Ia, Qq. 79 and following. But the intellect is sufficiently perfected by seeing God, and the will by enjoying Him. Therefore there is no need for comprehension as a third.

Objection 3. Further, happiness consists in an operation. But operations are determined by their objects: and there are two universal objects, the true and the good: of which the true corresponds to vision, and good to delight. Therefore there is no need for comprehension as a third.

On the contrary, The Apostle says (1 Cor. 9:24): "So run that you may comprehend [Douay: 'obtain']". But happiness is the goal of the spiritual race: hence he says (2 Tim. 4:7,8): "I have fought a good fight, I have finished my course, I have kept the faith; as to the rest there is laid up for me a crown of justice." Therefore comprehension is necessary for Happiness.

I answer that, Since Happiness consists in gaining the last end, those things that are required for Happiness must be gathered from the way in which man is ordered to an end. Now man is ordered to an intelligible end partly through his intellect, and partly through his will: through his intellect, in so far as a certain im-

perfect knowledge of the end pre-exists in the intellect: through the will, first by love which is the will's first movement towards anything; secondly, by a real relation of the lover to the thing beloved, which relation may be threefold. For sometimes the thing beloved is present to the lover: and then it is no longer sought for. Sometimes it is not present, and it is impossible to attain it: and then, too, it is not sought for. But sometimes it is possible to attain it, yet it is raised above the capability of the attainer, so that he cannot have it forthwith; and this is the relation of one that hopes, to that which he hopes for, and this relation alone causes a search for the end. To these three, there are a corresponding three in Happiness itself. For perfect knowledge of the end corresponds to imperfect knowledge; presence of the end corresponds to the relation of hope; but delight in the end now present results from love, as already stated (a. 2, ad 3). And therefore these three must concur with Happiness; to wit, vision, which is perfect knowledge of the intelligible end; comprehension, which implies presence of the end; and delight or enjoyment, which implies repose of the lover in the object beloved.

Reply to Objection 1. Comprehension is twofold. First, inclusion of the comprehended in the comprehensor; and thus whatever is comprehended by the finite, is itself finite. Wherefore God cannot be thus comprehended by a created intellect. Secondly, comprehension means nothing but the holding of something already present and possessed: thus one who runs after another is said to comprehend[†] him when he lays hold

* Cf. Serm. xxxciii De Verb. Dom. † In English we should say 'catch.'

on him. And in this sense comprehension is necessary for Happiness.

Reply to Objection 2. Just as hope and love pertain to the will, because it is the same one that loves a thing, and that tends towards it while not possessed, so, too, comprehension and delight belong to the will, since it is

the same that possesses a thing and reposes therein.

Reply to Objection 3. Comprehension is not a distinct operation from vision; but a certain relation to the end already gained. Wherefore even vision itself, or the thing seen, inasmuch as it is present, is the object of comprehension.

Whether rectitude of the will is necessary for happiness?

Ia IIae q. 4 a. 4

Objection 1. It would seem that rectitude of the will is not necessary for Happiness. For Happiness consists essentially in an operation of the intellect, as stated above (q. 3, a. 4). But rectitude of the will, by reason of which men are said to be clean of heart, is not necessary for the perfect operation of the intellect: for Augustine says (Retract. i, 4) "I do not approve of what I said in a prayer: O God, Who didst will none but the clean of heart to know the truth. For it can be answered that many who are not clean of heart, know many truths." Therefore rectitude of the will is not necessary for Happiness.

Objection 2. Further, what precedes does not depend on what follows. But the operation of the intellect precedes the operation of the will. Therefore Happiness, which is the perfect operation of the intellect, does not depend on rectitude of the will.

Objection 3. Further, that which is ordained to another as its end, is not necessary, when the end is already gained; as a ship, for instance, after arrival in port. But rectitude of will, which is by reason of virtue, is ordained to Happiness as to its end. Therefore, Happiness once obtained, rectitude of the will is no longer necessary.

On the contrary, It is written (Mat. 5:8): "Blessed are the clean of heart; for they shall see God": and (Heb. 12:14): "Follow peace with all men, and holiness; without which no man shall see God."

I answer that, Rectitude of will is necessary for Happiness both antecedently and concomitantly. An-

tecedently, because rectitude of the will consists in being duly ordered to the last end. Now the end in comparison to what is ordained to the end is as form compared to matter. Wherefore, just as matter cannot receive a form, unless it be duly disposed thereto, so nothing gains an end, except it be duly ordained thereto. And therefore none can obtain Happiness, without rectitude of the will. Concomitantly, because as stated above (q. 3, a. 8), final Happiness consists in the vision of the Divine Essence, Which is the very essence of goodness. So that the will of him who sees the Essence of God, of necessity, loves, whatever he loves, in subordination to God; just as the will of him who sees not God's Essence, of necessity, loves whatever he loves, under the common notion of good which he knows. And this is precisely what makes the will right. Wherefore it is evident that Happiness cannot be without a right will.

Reply to Objection 2. Every act of the will is preceded by an act of the intellect: but a certain act of the will precedes a certain act of the intellect. For the will tends to the final act of the intellect which is happiness. And consequently right inclination of the will is required antecedently for happiness, just as the arrow must take a right course in order to strike the target.

Reply to Objection 3. Not everything that is ordained to the end, ceases with the getting of the end: but only that which involves imperfection, such as movement. Hence the instruments of movement are no longer necessary when the end has been gained: but the due order to the end is necessary.

Whether the body is necessary for man's happiness?

Ia IIae q. 4 a. 5

Objection 1. It would seem that the body is necessary for Happiness. For the perfection of virtue and grace presupposes the perfection of nature. But Happiness is the perfection of virtue and grace. Now the soul, without the body, has not the perfection of nature; since it is naturally a part of human nature, and every part is imperfect while separated from its whole. Therefore the soul cannot be happy without the body.

Objection 2. Further, Happiness is a perfect operation, as stated above (q. 3, Aa. 2,5). But perfect operation follows perfect being: since nothing operates except in so far as it is an actual being. Since, therefore, the soul has not perfect being, while it is separated from the body, just as neither has a part, while separate from

its whole; it seems that the soul cannot be happy without the body.

Objection 3. Further, Happiness is the perfection of man. But the soul, without the body, is not man. Therefore Happiness cannot be in the soul separated from the body.

Objection 4. Further, according to the Philosopher (Ethic. vii, 13) "the operation of bliss," in which operation happiness consists, is "not hindered." But the operation of the separate soul is hindered; because, as Augustine says (Gen. ad lit. xii, 35), the soul "has a natural desire to rule the body, the result of which is that it is held back, so to speak, from tending with all its might to the heavenward journey," i.e. to the vision of

the Divine Essence. Therefore the soul cannot be happy without the body.

Objection 5. Further, Happiness is the sufficient good and lulls desire. But this cannot be said of the separated soul; for it yet desires to be united to the body, as Augustine says (Gen. ad lit. xii, 35). Therefore the soul is not happy while separated from the body.

Objection 6. Further, in Happiness man is equal to the angels. But the soul without the body is not equal to the angels, as Augustine says (Gen. ad lit. xii, 35). Therefore it is not happy.

On the contrary, It is written (Apoc. 14:13): "Happy [Douay: 'blessed'] are the dead who die in the Lord."

I answer that, Happiness is twofold; the one is imperfect and is had in this life; the other is perfect, consisting in the vision of God. Now it is evident that the body is necessary for the happiness of this life. For the happiness of this life consists in an operation of the intellect, either speculative or practical. And the operation of the intellect in this life cannot be without a phantasm, which is only in a bodily organ, as was shown in the Ia, q. 84, Aa. 6,7. Consequently that happiness which can be had in this life, depends, in a way, on the body. But as to perfect Happiness, which consists in the vision of God, some have maintained that it is not possible to the soul separated from the body; and have said that the souls of saints, when separated from their bodies, do not attain to that Happiness until the Day of Judgment, when they will receive their bodies back again. And this is shown to be false, both by authority and by reason. By authority, since the Apostle says (2 Cor. 5:6): "While we are in the body, we are absent from the Lord"; and he points out the reason of this absence, saying: "For we walk by faith and not by sight." Now from this it is clear that so long as we walk by faith and not by sight, bereft of the vision of the Divine Essence, we are not present to the Lord. But the souls of the saints, separated from their bodies, are in God's presence; wherefore the text continues: "But we are confident and have a good will to be absent. . . from the body, and to be present with the Lord." Whence it is evident that the souls of the saints, separated from their bodies, "walk by sight," seeing the Essence of God, wherein is true Happiness.

Again this is made clear by reason. For the intellect needs not the body, for its operation, save on account of the phantasms, wherein it looks on the intelligible truth, as stated in the Ia, q. 84, a. 7. Now it is evident that the Divine Essence cannot be seen by means of phantasms, as stated in the Ia, q. 12, a. 3. Wherefore, since man's perfect Happiness consists in the vision of the Divine Essence, it does not depend on the body. Consequently, without the body the soul can be happy.

We must, however, notice that something may belong to a thing's perfection in two ways. First, as constituting the essence thereof; thus the soul is necessary for man's perfection. Secondly, as necessary for its well-

being: thus, beauty of body and keenness of perfection belong to man's perfection. Wherefore though the body does not belong in the first way to the perfection of human Happiness, yet it does in the second way. For since operation depends on a thing's nature, the more perfect is the soul in its nature, the more perfectly it has its proper operation, wherein its happiness consists. Hence, Augustine, after inquiring (Gen. ad lit. xii, 35) "whether that perfect Happiness can be ascribed to the souls of the dead separated from their bodies," answers "that they cannot see the Unchangeable Substance, as the blessed angels see It; either for some other more hidden reason, or because they have a natural desire to rule the body."

Reply to Objection 1. Happiness is the perfection of the soul on the part of the intellect, in respect of which the soul transcends the organs of the body; but not according as the soul is the natural form of the body. Wherefore the soul retains that natural perfection in respect of which happiness is due to it, though it does not retain that natural perfection in respect of which it is the form of the body.

Reply to Objection 2. The relation of the soul to being is not the same as that of other parts: for the being of the whole is not that of any individual part: wherefore, either the part ceases altogether to be, when the whole is destroyed, just as the parts of an animal, when the animal is destroyed; or, if they remain, they have another actual being, just as a part of a line has another being from that of the whole line. But the human soul retains the being of the composite after the destruction of the body: and this because the being of the form is the same as that of its matter, and this is the being of the composite. Now the soul subsists in its own being, as stated in the Ia, q. 75, a. 2. It follows, therefore, that after being separated from the body it has perfect being and that consequently it can have a perfect operation; although it has not the perfect specific nature.

Reply to Objection 3. Happiness belongs to man in respect of his intellect: and, therefore, since the intellect remains, it can have Happiness. Thus the teeth of an Ethiopian, in respect of which he is said to be white, can retain their whiteness, even after extraction.

Reply to Objection 4. One thing is hindered by another in two ways. First, by way of opposition; thus cold hinders the action of heat: and such a hindrance to operation is repugnant to Happiness. Secondly, by way of some kind of defect, because, to wit, that which is hindered has not all that is necessary to make it perfect in every way: and such a hindrance to operation is not incompatible with Happiness, but prevents it from being perfect in every way. And thus it is that separation from the body is said to hold the soul back from tending with all its might to the vision of the Divine Essence. For the soul desires to enjoy God in such a way that the enjoyment also may overflow into the body, as far as possible. And therefore, as long as it enjoys God, without the fellowship of the body, its appetite is at rest in

that which it has, in such a way, that it would still wish the body to attain to its share.

Reply to Objection 5. The desire of the separated soul is entirely at rest, as regards the thing desired; since, to wit, it has that which suffices its appetite. But it is not wholly at rest, as regards the desirer, since it does not possess that good in every way that it would wish to possess it. Consequently, after the body has been resumed, Happiness increases not in intensity, but in extent.

Reply to Objection 6. The statement made (Gen. ad lit. xii, 35) to the effect that “the souls of the departed see not God as the angels do,” is not to be understood as referring to inequality of quantity; because even now some souls of the Blessed are raised to the higher orders of the angels, thus seeing God more clearly than the lower angels. But it refers to inequality of proportion: because the angels, even the lowest, have every perfection of Happiness that they ever will have, whereas the separated souls of the saints have not.

Whether perfection of the body is necessary for happiness?

Ia IIae q. 4 a. 6

Objection 1. It would seem that perfection of the body is not necessary for man’s perfect Happiness. For perfection of the body is a bodily good. But it has been shown above (q. 2) that Happiness does not consist in bodily goods. Therefore no perfect disposition of the body is necessary for man’s Happiness.

Objection 2. Further, man’s Happiness consists in the vision of the Divine Essence, as shown above (q. 3, a. 8). But the body has not part in this operation, as shown above (a. 5). Therefore no disposition of the body is necessary for Happiness.

Objection 3. Further, the more the intellect is abstracted from the body, the more perfectly it understands. But Happiness consists in the most perfect operation of the intellect. Therefore the soul should be abstracted from the body in every way. Therefore, in no way is a disposition of the body necessary for Happiness.

On the contrary, Happiness is the reward of virtue; wherefore it is written (Jn. 13:17): “You shall be blessed, if you do them.” But the reward promised to the saints is not only that they shall see and enjoy God, but also that their bodies shall be well-disposed; for it is written (Is. 66:14): “You shall see and your heart shall rejoice, and your bones shall flourish like a herb.” Therefore good disposition of the body is necessary for Happiness.

I answer that, If we speak of that happiness which man can acquire in this life, it is evident that a well-disposed body is of necessity required for it. For this happiness consists, according to the Philosopher (Ethic. i, 13) in “an operation according to perfect virtue”; and it is clear that man can be hindered, by indisposition of the body, from every operation of virtue.

But speaking of perfect Happiness, some have maintained that no disposition of body is necessary for Happiness; indeed, that it is necessary for the soul to be entirely separated from the body. Hence Augustine (De

Civ. Dei xxii, 26) quotes the words of Porphyry who said that “for the soul to be happy, it must be severed from everything corporeal.” But this is unreasonable. For since it is natural to the soul to be united to the body; it is not possible for the perfection of the soul to exclude its natural perfection.

Consequently, we must say that perfect disposition of the body is necessary, both antecedently and consequently, for that Happiness which is in all ways perfect. Antecedently, because, as Augustine says (Gen. ad lit. xii, 35), “if body be such, that the governance thereof is difficult and burdensome, like unto flesh which is corruptible and weighs upon the soul, the mind is turned away from that vision of the highest heaven.” Whence he concludes that, “when this body will no longer be ‘natural,’ but ‘spiritual,’ then will it be equalled to the angels, and that will be its glory, which erstwhile was its burden.” Consequently, because from the Happiness of the soul there will be an overflow on to the body, so that this too will obtain its perfection. Hence Augustine says (Ep. ad Dioscor.) that “God gave the soul such a powerful nature that from its exceeding fulness of happiness the vigor of incorruption overflows into the lower nature.”

Reply to Objection 1. Happiness does not consist in bodily good as its object: but bodily good can add a certain charm and perfection to Happiness.

Reply to Objection 2. Although the body has not part in that operation of the intellect whereby the Essence of God is seen, yet it might prove a hindrance thereto. Consequently, perfection of the body is necessary, lest it hinder the mind from being lifted up.

Reply to Objection 3. The perfect operation of the intellect requires indeed that the intellect be abstracted from this corruptible body which weighs upon the soul; but not from the spiritual body, which will be wholly subject to the spirit. On this point we shall treat in the Third Part of this work (Ia IIae, q. 82, seqq.).

Objection 1. It would seem that external goods also are necessary for Happiness. For that which is promised the saints for reward, belongs to Happiness. But external goods are promised the saints; for instance, food and drink, wealth and a kingdom: for it is said (Lk. 22:30): “That you may eat and drink at My table in My kingdom”: and (Mat. 6:20): “Lay up to yourselves treasures in heaven”: and (Mat. 25:34): “Come, ye blessed of My Father, possess you the kingdom.” Therefore external goods are necessary for Happiness.

Objection 2. Further, according to Boethius (De Consol. iii): happiness is “a state made perfect by the aggregate of all good things.” But some of man’s goods are external, although they be of least account, as Augustine says (De Lib. Arb. ii, 19). Therefore they too are necessary for Happiness.

Objection 3. Further, Our Lord said (Mat. 5:12): “Your reward is very great in heaven.” But to be in heaven implies being in a place. Therefore at least external place is necessary for Happiness.

On the contrary, It is written (Ps. 72:25): “For what have I in heaven? and besides Thee what do I desire upon earth?” As though to say: “I desire nothing but this,”—“It is good for me to adhere to my God.” Therefore nothing further external is necessary for Happiness.

I answer that, For imperfect happiness, such as can be had in this life, external goods are necessary, not as belonging to the essence of happiness, but by serving as instruments to happiness, which consists in an operation of virtue, as stated in Ethic. i, 13. For man needs in this life, the necessaries of the body, both for the operation of contemplative virtue, and for the operation of active virtue, for which latter he needs also many other things by means of which to perform its operations.

On the other hand, such goods as these are nowise necessary for perfect Happiness, which consists in see-

ing God. The reason of this is that all suchlike external goods are requisite either for the support of the animal body; or for certain operations which belong to human life, which we perform by means of the animal body: whereas that perfect Happiness which consists in seeing God, will be either in the soul separated from the body, or in the soul united to the body then no longer animal but spiritual. Consequently these external goods are nowise necessary for that Happiness, since they are ordained to the animal life. And since, in this life, the felicity of contemplation, as being more Godlike, approaches nearer than that of action to the likeness of that perfect Happiness, therefore it stands in less need of these goods of the body as stated in Ethic. x, 8.

Reply to Objection 1. All those material promises contained in Holy Scripture, are to be understood metaphorically, inasmuch as Scripture is wont to express spiritual things under the form of things corporeal, in order “that from things we know, we may rise to the desire of things unknown,” as Gregory says (Hom. xi in Evang.). Thus food and drink signify the delight of Happiness; wealth, the sufficiency of God for man; the kingdom, the lifting up of man to union of God.

Reply to Objection 2. These goods that serve for the animal life, are incompatible with that spiritual life wherein perfect Happiness consists. Nevertheless in that Happiness there will be the aggregate of all good things, because whatever good there be in these things, we shall possess it all in the Supreme Fount of goodness.

Reply to Objection 3. According to Augustine (De Serm. Dom. in Monte i, 5), it is not material heaven that is described as the reward of the saints, but a heaven raised on the height of spiritual goods. Nevertheless a bodily place, viz. the empyrean heaven, will be appointed to the Blessed, not as a need of Happiness, but by reason of a certain fitness and adornment.

Objection 1. It would seem that friends are necessary for Happiness. For future Happiness is frequently designated by Scripture under the name of “glory.” But glory consists in man’s good being brought to the notice of many. Therefore the fellowship of friends is necessary for Happiness.

Objection 2. Further, Boethius* says that “there is no delight in possessing any good whatever, without someone to share it with us.” But delight is necessary for Happiness. Therefore fellowship of friends is also necessary.

Objection 3. Further, charity is perfected in Happiness. But charity includes the love of God and of our neighbor. Therefore it seems that fellowship of friends

is necessary for Happiness.

On the contrary, It is written (Wis. 7:11): “All good things came to me together with her,” i.e. with divine wisdom, which consists in contemplating God. Consequently nothing else is necessary for Happiness.

I answer that, If we speak of the happiness of this life, the happy man needs friends, as the Philosopher says (Ethic. ix, 9), not, indeed, to make use of them, since he suffices himself; nor to delight in them, since he possesses perfect delight in the operation of virtue; but for the purpose of a good operation, viz. that he may do good to them; that he may delight in seeing them do good; and again that he may be helped by them in his good work. For in order that man may do well, whether

* Seneca, Ep. 6

in the works of the active life, or in those of the contemplative life, he needs the fellowship of friends.

But if we speak of perfect Happiness which will be in our heavenly Fatherland, the fellowship of friends is not essential to Happiness; since man has the entire fullness of his perfection in God. But the fellowship of friends conduces to the well-being of Happiness. Hence Augustine says (Gen. ad lit. viii, 25) that “the spiritual creatures receive no other interior aid to happiness than the eternity, truth, and charity of the Creator. But if they can be said to be helped from without, perhaps it is only by this that they see one another and rejoice in God, at their fellowship.”

Reply to Objection 1. That glory which is essential to Happiness, is that which man has, not with man but

with God.

Reply to Objection 2. This saying is to be understood of the possession of good that does not fully satisfy. This does not apply to the question under consideration; because man possesses in God a sufficiency of every good.

Reply to Objection 3. Perfection of charity is essential to Happiness, as to the love of God, but not as to the love of our neighbor. Wherefore if there were but one soul enjoying God, it would be happy, though having no neighbor to love. But supposing one neighbor to be there, love of him results from perfect love of God. Consequently, friendship is, as it were, concomitant with perfect Happiness.

FIRST PART OF THE SECOND PART, QUESTION 40

Of the Irascible Passions, and First, of Hope and Despair

(In Eight Articles)

We must now consider the irascible passions: (1) Hope and despair; (2) Fear and daring; (3) Anger. Under first head there are eight points of inquiry:

- (1) Whether hope is the same as desire or cupidity?
- (2) Whether hope is in the apprehensive, or in the appetitive faculty?
- (3) Whether hope is in dumb animals?
- (4) Whether despair is contrary to hope?
- (5) Whether experience is a cause of hope?
- (6) Whether hope abounds in young men and drunkards?
- (7) Concerning the order of hope to love;
- (8) Whether love conduces to action?

Whether hope is the same as desire of cupidity?

Ia IIae q. 40 a. 1

Objection 1. It would seem that hope is the same as desire or cupidity. Because hope is reckoned as one of the four principal passions. But Augustine in setting down the four principal passions puts cupidity in the place of hope (De Civ. Dei xiv, 3,7). Therefore hope is the same as cupidity or desire.

Objection 2. Further, passions differ according to their objects. But the object of hope is the same as the object of cupidity or desire, viz. the future good. Therefore hope is the same as cupidity or desire.

Objection 3. If it be said that hope, in addition to desire, denotes the possibility of obtaining the future good; on the contrary, whatever is accidental to the object does not make a different species of passion. But possibility of acquisition is accidental to a future good, which is the object of cupidity or desire, and of hope. Therefore hope does not differ specifically from desire or cupidity.

On the contrary, To different powers belong different species of passions. But hope is in the irascible power; whereas desire or cupidity is in the concupiscible. Therefore hope differs specifically from desire or cupidity.

I answer that, The species of a passion is taken from the object. Now, in the object of hope, we may note four conditions. First, that it is something good; since, properly speaking, hope regards only the good; in this respect, hope differs from fear, which regards evil. Secondly, that it is future; for hope does not regard that which is present and already possessed: in this respect, hope differs from joy which regards a present good. Thirdly, that it must be something arduous and difficult to obtain, for we do not speak of any one hop-

ing for trifles, which are in one's power to have at any time: in this respect, hope differs from desire or cupidity, which regards the future good absolutely: wherefore it belongs to the concupiscible, while hope belongs to the irascible faculty. Fourthly, that this difficult thing is something possible to obtain: for one does not hope for that which one cannot get at all: and, in this respect, hope differs from despair. It is therefore evident that hope differs from desire, as the irascible passions differ from the concupiscible. For this reason, moreover, hope presupposes desire: just as all irascible passions presuppose the passions of the concupiscible faculty, as stated above (q. 25, a. 1).

Reply to Objection 1. Augustine mentions desire instead of hope, because each regards future good; and because the good which is not arduous is reckoned as nothing: thus implying that desire seems to tend chiefly to the arduous good, to which hope tends likewise.

Reply to Objection 2. The object of hope is the future good considered, not absolutely, but as arduous and difficult of attainment, as stated above.

Reply to Objection 3. The object of hope adds not only possibility to the object of desire, but also difficulty: and this makes hope belong to another power, viz. the irascible, which regards something difficult, as stated in the Ia, q. 81, a. 2. Moreover, possibility and impossibility are not altogether accidental to the object of the appetitive power: because the appetite is a principle of movement; and nothing is moved to anything except under the aspect of being possible; for no one is moved to that which he reckons impossible to get. Consequently hope differs from despair according to the difference of possible and impossible.

Objection 1. It would seem that hope belongs to the cognitive power. Because hope, seemingly, is a kind of awaiting; for the Apostle says (Rom. 8:25): “If we hope for that which we see not; we wait for it with patience.” But awaiting seems to belong to the cognitive power, which we exercise by “looking out.” Therefore hope belongs to the cognitive power.

Objection 2. Further, apparently hope is the same as confidence; hence when a man hopes he is said to be confident, as though to hope and to be confident were the same thing. But confidence, like faith, seems to belong to the cognitive power. Therefore hope does too.

Objection 3. Further, certainty is a property of the cognitive power. But certainty is ascribed to hope. Therefore hope belongs to the cognitive power.

On the contrary, Hope regards good, as stated above (a. 1). Now good, as such, is not the object of the cognitive, but of the appetitive power. Therefore hope belongs, not to the cognitive, but to the appetitive power.

I answer that, Since hope denotes a certain stretching out of the appetite towards good, it evidently belongs to the appetitive power; since movement towards things belongs properly to the appetite: whereas the action of the cognitive power is accomplished not by the movement of the knower towards things, but rather according as the things known are in the knower. But since the cognitive power moves the appetite, by presenting its object to it; there arise in the appetite various movements according to various aspects of the apprehended object. For the apprehension of good gives rise to one kind of movement in the appetite, while the apprehension of evil gives rise to another: in like manner various movements arise from the apprehension of something present and of something future; of something considered absolutely, and of something considered as arduous; of something possible, and of something impossi-

ble. And accordingly hope is a movement of the appetitive power ensuing from the apprehension of a future good, difficult but possible to obtain; namely, a stretching forth of the appetite to such a good.

Reply to Objection 1. Since hope regards a possible good, there arises in man a twofold movement of hope; for a thing may be possible to him in two ways, viz. by his own power, or by another’s. Accordingly when a man hopes to obtain something by his own power, he is not said to wait for it, but simply to hope for it. But, properly speaking, he is said to await that which he hopes to get by another’s help as though to await [exspectare] implied keeping one’s eyes on another [ex alio spectare], in so far as the apprehensive power, by going ahead, not only keeps its eye on the good which man intends to get, but also on the thing by whose power he hopes to get it; according to Eccclus. 51:10, “I looked for the succor of men.” Wherefore the movement of hope is sometimes called expectation, on account of the preceding inspection of the cognitive power.

Reply to Objection 2. When a man desires a thing and reckons that he can get it, he believes that he can get it, he believes that he will get it; and from this belief which precedes in the cognitive power, the ensuing movement in the appetite is called confidence. Because the movement of the appetite takes its name from the knowledge that precedes it, as an effect from a cause which is better known; for the apprehensive power knows its own act better than that of the appetite.

Reply to Objection 3. Certainty is ascribed to the movement, not only of the sensitive, but also of the natural appetite; thus we say that a stone is certain to tend downwards. This is owing to the inerrancy which the movement of the sensitive or even natural appetite derives from the certainty of the knowledge that precedes it.

Objection 1. It would seem that there is no hope in dumb animals. Because hope is for some future good, as Damascene says (De Fide Orth. ii, 12). But knowledge of the future is not in the competency of dumb animals, whose knowledge is confined to the senses and does not extend to the future. Therefore there is no hope in dumb animals.

Objection 2. Further, the object of hope is a future good, possible of attainment. But possible and impossible are differences of the true and the false, which are only in the mind, as the Philosopher states (Metaph. vi, 4). Therefore there is no hope in dumb animals, since they have no mind.

Objection 3. Further, Augustine says (Gen. ad lit. ix, 14) that “animals are moved by the things that they

see.” But hope is of things unseen: “for what a man seeth, why doth he hope for?” (Rom. 8:24). Therefore there is no hope in dumb animals.

On the contrary, Hope is an irascible passion. But the irascible faculty is in dumb animals. Therefore hope is also.

I answer that, The internal passions of animals can be gathered from their outward movements: from which it is clear that hope is in dumb animals. For if a dog see a hare, or a hawk see a bird, too far off, it makes no movement towards it, as having no hope to catch it: whereas, if it be near, it makes a movement towards it, as being in hopes of catching it. Because as stated above (q. 1, a. 2; q. 26, a. 1; q. 35, a. 1), the sensitive appetite of dumb animals, and likewise the natural appetite of insensible

things, result from the apprehension of an intellect, just as the appetite of the intellectual nature, which is called the will. But there is a difference, in that the will is moved by an apprehension of the intellect in the same subject; whereas the movement of the natural appetite results from the apprehension of the separate Intellect, Who is the Author of nature; as does also the sensitive appetite of dumb animals, who act from a certain natural instinct. Consequently, in the actions of irrational animals and of other natural things, we observe a procedure which is similar to that which we observe in the actions of art: and in this way hope and despair are in dumb animals.

Reply to Objection 1. Although dumb animals do

not know the future, yet an animal is moved by its natural instinct to something future, as though it foresaw the future. Because this instinct is planted in them by the Divine Intellect that foresees the future.

Reply to Objection 2. The object of hope is not the possible as differentiating the true, for thus the possible ensues from the relation of a predicate to a subject. The object of hope is the possible as compared to a power. For such is the division of the possible given in *Metaph.* v, 12, i.e. into the two kinds we have just mentioned.

Reply to Objection 3. Although the thing which is future does not come under the object of sight; nevertheless through seeing something present, an animal's appetite is moved to seek or avoid something future.

Whether despair is contrary to hope?

Ia IIae q. 40 a. 4

Objection 1. It would seem that despair is not contrary to hope. Because "to one thing there is one contrary" (*Metaph.* x, 5). But fear is contrary to hope. Therefore despair is not contrary to hope.

Objection 2. Further, contraries seem to bear on the same thing. But hope and despair do not bear on the same thing: since hope regards the good, whereas despair arises from some evil that is in the way of obtaining good. Therefore hope is not contrary to despair.

Objection 3. Further, movement is contrary to movement: while repose is in opposition to movement as a privation thereof. But despair seems to imply immobility rather than movement. Therefore it is not contrary to hope, which implies movement of stretching out towards the hoped-for good.

On the contrary, The very name of despair [desperatio] implies that it is contrary to hope [spes].

I answer that, As stated above (q. 23, a. 2), there is a twofold contrariety of movements. One is in respect of approach to contrary terms: and this contrariety alone is to be found in the concupiscible passions, for instance between love and hatred. The other is according to approach and withdrawal with regard to the same term; and is to be found in the irascible passions, as stated above (q. 23, a. 2). Now the object of hope, which is the arduous good, has the character of a principle of at-

traction, if it be considered in the light of something attainable; and thus hope tends thereto, for it denotes a kind of approach. But in so far as it is considered as unobtainable, it has the character of a principle of repulsion, because, as stated in *Ethic.* iii, 3, "when men come to an impossibility they disperse." And this is how despair stands in regard to this object, wherefore it implies a movement of withdrawal: and consequently it is contrary to hope, as withdrawal is to approach.

Reply to Objection 1. Fear is contrary to hope, because their objects, i.e. good and evil, are contrary: for this contrariety is found in the irascible passions, according as they ensue from the passions of the concupiscible. But despair is contrary to hope, only by contrariety of approach and withdrawal.

Reply to Objection 2. Despair does not regard evil as such; sometimes however it regards evil accidentally, as making the difficult good impossible to obtain. But it can arise from the mere excess of good.

Reply to Objection 3. Despair implies not only privation of hope, but also a recoil from the thing desired, by reason of its being esteemed impossible to get. Hence despair, like hope, presupposes desire; because we neither hope for nor despair of that which we do not desire to have. For this reason, too, each of them regards the good, which is the object of desire.

Whether experience is a cause of hope?

Ia IIae q. 40 a. 5

Objection 1. It would seem that experience is not a cause of hope. Because experience belongs to the cognitive power; wherefore the Philosopher says (*Ethic.* ii, 1) that "intellectual virtue needs experience and time." But hope is not in the cognitive power, but in the appetite, as stated above (a. 2). Therefore experience is not a cause of hope.

Objection 2. Further, the Philosopher says (*Rhet.* ii, 13) that "the old are slow to hope, on account of their experience"; whence it seems to follow that experience

causes want of hope. But the same cause is not productive of opposites. Therefore experience is not a cause of hope.

Objection 3. Further, the Philosopher says (*De Coel.* ii, 5) that "to have something to say about everything, without leaving anything out, is sometimes a proof of folly." But to attempt everything seems to point to great hopes; while folly arises from inexperience. Therefore inexperience, rather than experience, seems to be a cause of hope.

On the contrary, The Philosopher says (Ethic. iii, 8) “some are hopeful, through having been victorious often and over many opponents”: which seems to pertain to experience. Therefore experience is a cause of hope.

I answer that, As stated above (a. 1), the object of hope is a future good, difficult but possible to obtain. Consequently a thing may be a cause of hope, either because it makes something possible to a man: or because it makes him think something possible. In the first way hope is caused by everything that increases a man’s power; e.g. riches, strength, and, among others, experience: since by experience man acquires the faculty of doing something easily, and the result of this is hope. Wherefore Vegetius says (De Re Milit. i): “No one fears to do that which he is sure of having learned well.”

In the second way, hope is caused by everything that makes man think that he can obtain something: and thus both teaching and persuasion may be a cause of hope. And then again experience is a cause of hope, in so far as it makes him reckon something possible, which before his experience he looked upon as impossible. However, in this way, experience can cause a lack of hope:

because just as it makes a man think possible what he had previously thought impossible; so, conversely, experience makes a man consider as impossible that which hitherto he had thought possible. Accordingly experience causes hope in two ways, despair in one way: and for this reason we may say rather that it causes hope.

Reply to Objection 1. Experience in matters pertaining to action not only produces knowledge; it also causes a certain habit, by reason of custom, which renders the action easier. Moreover, the intellectual virtue itself adds to the power of acting with ease: because it shows something to be possible; and thus is a cause of hope.

Reply to Objection 2. The old are wanting in hope because of their experience, in so far as experience makes them think something impossible. Hence he adds (Rhet. ii, 13) that “many evils have befallen them.”

Reply to Objection 3. Folly and inexperience can be a cause of hope accidentally as it were, by removing the knowledge which would help one to judge truly a thing to be impossible. Wherefore inexperience is a cause of hope, for the same reason as experience causes lack of hope.

Whether hope abounds in young men and drunkards?

Ia IIae q. 40 a. 6

Objection 1. It would seem that youth and drunkenness are not causes of hope. Because hope implies certainty and steadiness; so much so that it is compared to an anchor (Heb. 6:19). But young men and drunkards are wanting in steadiness; since their minds are easily changed. Therefore youth and drunkenness are not causes of hope.

Objection 2. Further, as stated above (a. 5), the cause of hope is chiefly whatever increases one’s power. But youth and drunkenness are united to weakness. Therefore they are not causes of hope.

Objection 3. Further, experience is a cause of hope, as stated above (a. 5). But youth lacks experience. Therefore it is not a cause of hope.

On the contrary, The Philosopher says (Ethic. iii, 8) that “drunken men are hopeful”: and (Rhet. ii, 12) that “the young are full of hope.”

I answer that, Youth is a cause of hope for three reasons, as the Philosopher states in Rhet. ii, 12: and these three reasons may be gathered from the three conditions of the good which is the object of hope—namely, that it is future, arduous and possible, as stated above (a. 1). For youth has much of the future before it, and little of the past: and therefore since memory is of the past, and hope of the future, it has little to remember and lives very much in hope. Again, youths, on account

of the heat of their nature, are full of spirit; so that their heart expands: and it is owing to the heart being expanded that one tends to that which is arduous; wherefore youths are spirited and hopeful. Likewise they who have not suffered defeat, nor had experience of obstacles to their efforts, are prone to count a thing possible to them. Wherefore youths, through inexperience of obstacles and of their own shortcomings, easily count a thing possible; and consequently are of good hope. Two of these causes are also in those who are in drink—viz. heat and high spirits, on account of wine, and heedlessness of dangers and shortcomings. For the same reason all foolish and thoughtless persons attempt everything and are full of hope.

Reply to Objection 1. Although youths and men in drink lack steadiness in reality, yet they are steady in their own estimation, for they think that they will steadily obtain that which they hope for.

In like manner, in reply to the Second Objection, we must observe that young people and men in drink are indeed unsteady in reality: but, in their own estimation, they are capable, for they know not their shortcomings.

Reply to Objection 3. Not only experience, but also lack of experience, is, in some way, a cause of hope, as explained above (a. 5, ad 3).

Objection 1. It would seem that hope is not a cause of love. Because, according to Augustine (*De Civ. Dei* xiv, 7,9), love is the first of the soul's emotions. But hope is an emotion of the soul. Therefore love precedes hope, and consequently hope does not cause love.

Objection 2. Further, desire precedes hope. But desire is caused by love, as stated above (q. 25, a. 2). Therefore hope, too, follows love, and consequently is not its cause.

Objection 3. Further, hope causes pleasure, as stated above (q. 32, a. 3). But pleasure is only of the good that is loved. Therefore love precedes hope.

On the contrary, The gloss commenting on Mat. 1:2, "Abraham begot Isaac, and Isaac begot Jacob," says, i.e. "faith begets hope, and hope begets charity." But charity is love. Therefore love is caused by hope.

I answer that, Hope can regard two things. For it regards as its object, the good which one hopes for. But since the good we hope for is something difficult but

possible to obtain; and since it happens sometimes that what is difficult becomes possible to us, not through ourselves but through others; hence it is that hope regards also that by which something becomes possible to us.

In so far, then, as hope regards the good we hope to get, it is caused by love: since we do not hope save for that which we desire and love. But in so far as hope regards one through whom something becomes possible to us, love is caused by hope, and not vice versa. Because by the very fact that we hope that good will accrue to us through someone, we are moved towards him as to our own good; and thus we begin to love him. Whereas from the fact that we love someone we do not hope in him, except accidentally, that is, in so far as we think that he returns our love. Wherefore the fact of being loved by another makes us hope in him; but our love for him is caused by the hope we have in him.

Wherefore the Replies to the Objections are evident.

Objection 1. It would seem that hope is not a help but a hindrance to action. Because hope implies security. But security begets negligence which hinders action. Therefore hope is a hindrance to action.

Objection 2. Further, sorrow hinders action, as stated above (q. 37, a. 3). But hope sometimes causes sorrow: for it is written (*Prov.* 13:12): "Hope that is deferred afflicteth the soul." Therefore hope hinders action.

Objection 3. Further, despair is contrary to hope, as stated above (a. 4). But despair, especially in matters of war, conduces to action; for it is written (*2 Kings* 2:26), that "it is dangerous to drive people to despair." Therefore hope has a contrary effect, namely, by hindering action.

On the contrary, It is written (*1 Cor.* 9:10) that "he that plougheth should plough in hope... to receive fruit": and the same applies to all other actions.

I answer that, Hope of its very nature is a help to action by making it more intense: and this for two reasons. First, by reason of its object, which is a good, difficult but possible. For the thought of its being difficult arouses our attention; while the thought that it is

possible is no drag on our effort. Hence it follows that by reason of hope man is intent on his action. Secondly, on account of its effect. Because hope, as stated above (q. 32, a. 3), causes pleasure; which is a help to action, as stated above (q. 33, a. 4). Therefore hope is conducive to action.

Reply to Objection 1. Hope regards a good to be obtained; security regards an evil to be avoided. Wherefore security seems to be contrary to fear rather than to belong to hope. Yet security does not beget negligence, save in so far as it lessens the idea of difficulty: whereby it also lessens the character of hope: for the things in which a man fears no hindrance, are no longer looked upon as difficult.

Reply to Objection 2. Hope of itself causes pleasure; it is by accident that it causes sorrow, as stated above (q. 32, a. 3, ad 2).

Reply to Objection 3. Despair threatens danger in war, on account of a certain hope that attaches to it. For they who despair of flight, strive less to fly, but hope to avenge their death: and therefore in this hope they fight the more bravely, and consequently prove dangerous to the foe.

Objection 1. It would seem that hope is the same as desire or cupidity. Because hope is reckoned as one of the four principal passions. But Augustine in setting down the four principal passions puts cupidity in the place of hope (De Civ. Dei xiv, 3,7). Therefore hope is the same as cupidity or desire.

Objection 2. Further, passions differ according to their objects. But the object of hope is the same as the object of cupidity or desire, viz. the future good. Therefore hope is the same as cupidity or desire.

Objection 3. If it be said that hope, in addition to desire, denotes the possibility of obtaining the future good; on the contrary, whatever is accidental to the object does not make a different species of passion. But possibility of acquisition is accidental to a future good, which is the object of cupidity or desire, and of hope. Therefore hope does not differ specifically from desire or cupidity.

On the contrary, To different powers belong different species of passions. But hope is in the irascible power; whereas desire or cupidity is in the concupiscible. Therefore hope differs specifically from desire or cupidity.

I answer that, The species of a passion is taken from the object. Now, in the object of hope, we may note four conditions. First, that it is something good; since, properly speaking, hope regards only the good; in this respect, hope differs from fear, which regards evil. Secondly, that it is future; for hope does not regard that which is present and already possessed: in this respect, hope differs from joy which regards a present good. Thirdly, that it must be something arduous and difficult to obtain, for we do not speak of any one hop-

ing for trifles, which are in one's power to have at any time: in this respect, hope differs from desire or cupidity, which regards the future good absolutely: wherefore it belongs to the concupiscible, while hope belongs to the irascible faculty. Fourthly, that this difficult thing is something possible to obtain: for one does not hope for that which one cannot get at all: and, in this respect, hope differs from despair. It is therefore evident that hope differs from desire, as the irascible passions differ from the concupiscible. For this reason, moreover, hope presupposes desire: just as all irascible passions presuppose the passions of the concupiscible faculty, as stated above (q. 25, a. 1).

Reply to Objection 1. Augustine mentions desire instead of hope, because each regards future good; and because the good which is not arduous is reckoned as nothing: thus implying that desire seems to tend chiefly to the arduous good, to which hope tends likewise.

Reply to Objection 1. The object of hope is the future good considered, not absolutely, but as arduous and difficult of attainment, as stated above.

Reply to Objection 3. The object of hope adds not only possibility to the object of desire, but also difficulty: and this makes hope belong to another power, viz. the irascible, which regards something difficult, as stated in the Ia, q. 81, a. 2. Moreover, possibility and impossibility are not altogether accidental to the object of the appetitive power: because the appetite is a principle of movement; and nothing is moved to anything except under the aspect of being possible; for no one is moved to that which he reckons impossible to get. Consequently hope differs from despair according to the difference of possible and impossible.

Objection 1. It would seem that hope belongs to the cognitive power. Because hope, seemingly, is a kind of awaiting; for the Apostle says (Rom. 8:25): “If we hope for that which we see not; we wait for it with patience.” But awaiting seems to belong to the cognitive power, which we exercise by “looking out.” Therefore hope belongs to the cognitive power.

Objection 2. Further, apparently hope is the same as confidence; hence when a man hopes he is said to be confident, as though to hope and to be confident were the same thing. But confidence, like faith, seems to belong to the cognitive power. Therefore hope does too.

Objection 3. Further, certainty is a property of the cognitive power. But certainty is ascribed to hope. Therefore hope belongs to the cognitive power.

On the contrary, Hope regards good, as stated above (a. 1). Now good, as such, is not the object of the cognitive, but of the appetitive power. Therefore hope belongs, not to the cognitive, but to the appetitive power.

I answer that, Since hope denotes a certain stretching out of the appetite towards good, it evidently belongs to the appetitive power; since movement towards things belongs properly to the appetite: whereas the action of the cognitive power is accomplished not by the movement of the knower towards things, but rather according as the things known are in the knower. But since the cognitive power moves the appetite, by presenting its object to it; there arise in the appetite various movements according to various aspects of the apprehended object. For the apprehension of good gives rise to one kind of movement in the appetite, while the apprehension of evil gives rise to another: in like manner various movements arise from the apprehension of something present and of something future; of something considered absolutely, and of something considered as arduous; of something possible, and of something impossi-

ble. And accordingly hope is a movement of the appetitive power ensuing from the apprehension of a future good, difficult but possible to obtain; namely, a stretching forth of the appetite to such a good.

Reply to Objection 1. Since hope regards a possible good, there arises in man a twofold movement of hope; for a thing may be possible to him in two ways, viz. by his own power, or by another’s. Accordingly when a man hopes to obtain something by his own power, he is not said to wait for it, but simply to hope for it. But, properly speaking, he is said to await that which he hopes to get by another’s help as though to await [exspectare] implied keeping one’s eyes on another [ex alio spectare], in so far as the apprehensive power, by going ahead, not only keeps its eye on the good which man intends to get, but also on the thing by whose power he hopes to get it; according to Eccclus. 51:10, “I looked for the succor of men.” Wherefore the movement of hope is sometimes called expectation, on account of the preceding inspection of the cognitive power.

Reply to Objection 2. When a man desires a thing and reckons that he can get it, he believes that he can get it, he believes that he will get it; and from this belief which precedes in the cognitive power, the ensuing movement in the appetite is called confidence. Because the movement of the appetite takes its name from the knowledge that precedes it, as an effect from a cause which is better known; for the apprehensive power knows its own act better than that of the appetite.

Reply to Objection 3. Certainty is ascribed to the movement, not only of the sensitive, but also of the natural appetite; thus we say that a stone is certain to tend downwards. This is owing to the inerrancy which the movement of the sensitive or even natural appetite derives from the certainty of the knowledge that precedes it.

Objection 1. It would seem that there is no hope in dumb animals. Because hope is for some future good, as Damascene says (*De Fide Orth.* ii, 12). But knowledge of the future is not in the competency of dumb animals, whose knowledge is confined to the senses and does not extend to the future. Therefore there is no hope in dumb animals.

Objection 2. Further, the object of hope is a future good, possible of attainment. But possible and impossible are differences of the true and the false, which are only in the mind, as the Philosopher states (*Metaph.* vi, 4). Therefore there is no hope in dumb animals, since they have no mind.

Objection 3. Further, Augustine says (*Gen. ad lit.* ix, 14) that “animals are moved by the things that they see.” But hope is of things unseen: “for what a man seeth, why doth he hope for?” (*Rom.* 8:24). Therefore there is no hope in dumb animals.

On the contrary, Hope is an irascible passion. But the irascible faculty is in dumb animals. Therefore hope is also.

I answer that, The internal passions of animals can be gathered from their outward movements: from which it is clear that hope is in dumb animals. For if a dog see a hare, or a hawk see a bird, too far off, it makes no movement towards it, as having no hope to catch it: whereas, if it be near, it makes a movement towards it, as being in hopes of catching it. Because as stated above (q. 1, a. 2; q. 26, a. 1; q. 35, a. 1), the sensitive appetite of dumb

animals, and likewise the natural appetite of insensible things, result from the apprehension of an intellect, just as the appetite of the intellectual nature, which is called the will. But there is a difference, in that the will is moved by an apprehension of the intellect in the same subject; whereas the movement of the natural appetite results from the apprehension of the separate Intellect, Who is the Author of nature; as does also the sensitive appetite of dumb animals, who act from a certain natural instinct. Consequently, in the actions of irrational animals and of other natural things, we observe a procedure which is similar to that which we observe in the actions of art: and in this way hope and despair are in dumb animals.

Reply to Objection 1. Although dumb animals do not know the future, yet an animal is moved by its natural instinct to something future, as though it foresaw the future. Because this instinct is planted in them by the Divine Intellect that foresees the future.

Reply to Objection 2. The object of hope is not the possible as differentiating the true, for thus the possible ensues from the relation of a predicate to a subject. The object of hope is the possible as compared to a power. For such is the division of the possible given in *Metaph.* v, 12, i.e. into the two kinds we have just mentioned.

Reply to Objection 3. Although the thing which is future does not come under the object of sight; nevertheless through seeing something present, an animal's appetite is moved to seek or avoid something future.

Objection 1. It would seem that despair is not contrary to hope. Because “to one thing there is one contrary” (Metaph. x, 5). But fear is contrary to hope. Therefore despair is not contrary to hope.

Objection 2. Further, contraries seem to bear on the same thing. But hope and despair do not bear on the same thing: since hope regards the good, whereas despair arises from some evil that is in the way of obtaining good. Therefore hope is not contrary to despair.

Objection 3. Further, movement is contrary to movement: while repose is in opposition to movement as a privation thereof. But despair seems to imply immobility rather than movement. Therefore it is not contrary to hope, which implies movement of stretching out towards the hoped-for good.

On the contrary, The very name of despair [desperatio] implies that it is contrary to hope [spes].

I answer that, As stated above (q. 23, a. 2), there is a twofold contrariety of movements. One is in respect of approach to contrary terms: and this contrariety alone is to be found in the concupiscible passions, for instance between love and hatred. The other is according to approach and withdrawal with regard to the same term; and is to be found in the irascible passions, as stated above (q. 23, a. 2). Now the object of hope, which is the arduous good, has the character of a principle of at-

traction, if it be considered in the light of something attainable; and thus hope tends thereto, for it denotes a kind of approach. But in so far as it is considered as unobtainable, it has the character of a principle of repulsion, because, as stated in Ethic. iii, 3, “when men come to an impossibility they disperse.” And this is how despair stands in regard to this object, wherefore it implies a movement of withdrawal: and consequently it is contrary to hope, as withdrawal is to approach.

Reply to Objection 1. Fear is contrary to hope, because their objects, i.e. good and evil, are contrary: for this contrariety is found in the irascible passions, according as they ensue from the passions of the concupiscible. But despair is contrary to hope, only by contrariety of approach and withdrawal.

Reply to Objection 2. Despair does not regard evil as such; sometimes however it regards evil accidentally, as making the difficult good impossible to obtain. But it can arise from the mere excess of good.

Reply to Objection 3. Despair implies not only privation of hope, but also a recoil from the thing desired, by reason of its being esteemed impossible to get. Hence despair, like hope, presupposes desire; because we neither hope for nor despair of that which we do not desire to have. For this reason, too, each of them regards the good, which is the object of desire.

Objection 1. It would seem that experience is not a cause of hope. Because experience belongs to the cognitive power; wherefore the Philosopher says (*Ethic. ii, 1*) that “intellectual virtue needs experience and time.” But hope is not in the cognitive power, but in the appetite, as stated above (a. 2). Therefore experience is not a cause of hope.

Objection 2. Further, the Philosopher says (*Rhet. ii, 13*) that “the old are slow to hope, on account of their experience”; whence it seems to follow that experience causes want of hope. But the same cause is not productive of opposites. Therefore experience is not a cause of hope.

Objection 3. Further, the Philosopher says (*De Coel. ii, 5*) that “to have something to say about everything, without leaving anything out, is sometimes a proof of folly.” But to attempt everything seems to point to great hopes; while folly arises from inexperience. Therefore inexperience, rather than experience, seems to be a cause of hope.

On the contrary, The Philosopher says (*Ethic. iii, 8*) “some are hopeful, through having been victorious often and over many opponents”: which seems to pertain to experience. Therefore experience is a cause of hope.

I answer that, As stated above (a. 1), the object of hope is a future good, difficult but possible to obtain. Consequently a thing may be a cause of hope, either because it makes something possible to a man: or because it makes him think something possible. In the first way hope is caused by everything that increases a man’s power; e.g. riches, strength, and, among others, experience: since by experience man acquires the faculty of doing something easily, and the result of this is

hope. Wherefore Vegetius says (*De Re Milit. i*): “No one fears to do that which he is sure of having learned well.”

In the second way, hope is caused by everything that makes man think that he can obtain something: and thus both teaching and persuasion may be a cause of hope. And then again experience is a cause of hope, in so far as it makes him reckon something possible, which before his experience he looked upon as impossible. However, in this way, experience can cause a lack of hope: because just as it makes a man think possible what he had previously thought impossible; so, conversely, experience makes a man consider as impossible that which hitherto he had thought possible. Accordingly experience causes hope in two ways, despair in one way: and for this reason we may say rather that it causes hope.

Reply to Objection 1. Experience in matters pertaining to action not only produces knowledge; it also causes a certain habit, by reason of custom, which renders the action easier. Moreover, the intellectual virtue itself adds to the power of acting with ease: because it shows something to be possible; and thus is a cause of hope.

Reply to Objection 2. The old are wanting in hope because of their experience, in so far as experience makes them think something impossible. Hence he adds (*Rhet. ii, 13*) that “many evils have befallen them.”

Reply to Objection 3. Folly and inexperience can be a cause of hope accidentally as it were, by removing the knowledge which would help one to judge truly a thing to be impossible. Wherefore inexperience is a cause of hope, for the same reason as experience causes lack of hope.

Objection 1. It would seem that youth and drunkenness are not causes of hope. Because hope implies certainty and steadiness; so much so that it is compared to an anchor (Heb. 6:19). But young men and drunkards are wanting in steadiness; since their minds are easily changed. Therefore youth and drunkenness are not causes of hope.

Objection 2. Further, as stated above (a. 5), the cause of hope is chiefly whatever increases one's power. But youth and drunkenness are united to weakness. Therefore they are not causes of hope.

Objection 3. Further, experience is a cause of hope, as stated above (a. 5). But youth lacks experience. Therefore it is not a cause of hope.

On the contrary, The Philosopher says (Ethic. iii, 8) that "drunken men are hopeful": and (Rhet. ii, 12) that "the young are full of hope."

I answer that, Youth is a cause of hope for three reasons, as the Philosopher states in Rhet. ii, 12: and these three reasons may be gathered from the three conditions of the good which is the object of hope—namely, that it is future, arduous and possible, as stated above (a. 1). For youth has much of the future before it, and little of the past: and therefore since memory is of the past, and hope of the future, it has little to remember and lives very much in hope. Again, youths, on account

of the heat of their nature, are full of spirit; so that their heart expands: and it is owing to the heart being expanded that one tends to that which is arduous; wherefore youths are spirited and hopeful. Likewise they who have not suffered defeat, nor had experience of obstacles to their efforts, are prone to count a thing possible to them. Wherefore youths, through inexperience of obstacles and of their own shortcomings, easily count a thing possible; and consequently are of good hope. Two of these causes are also in those who are in drink—viz. heat and high spirits, on account of wine, and heedlessness of dangers and shortcomings. For the same reason all foolish and thoughtless persons attempt everything and are full of hope.

Reply to Objection 1. Although youths and men in drink lack steadiness in reality, yet they are steady in their own estimation, for they think that they will steadily obtain that which they hope for.

In like manner, in reply to the Second Objection, we must observe that young people and men in drink are indeed unsteady in reality: but, in their own estimation, they are capable, for they know not their shortcomings.

Reply to Objection 3. Not only experience, but also lack of experience, is, in some way, a cause of hope, as explained above (a. 5, ad 3).

Objection 1. It would seem that hope is not a cause of love. Because, according to Augustine (*De Civ. Dei* xiv, 7,9), love is the first of the soul's emotions. But hope is an emotion of the soul. Therefore love precedes hope, and consequently hope does not cause love.

Objection 2. Further, desire precedes hope. But desire is caused by love, as stated above (q. 25, a. 2). Therefore hope, too, follows love, and consequently is not its cause.

Objection 3. Further, hope causes pleasure, as stated above (q. 32, a. 3). But pleasure is only of the good that is loved. Therefore love precedes hope.

On the contrary, The gloss commenting on Mat. 1:2, "Abraham begot Isaac, and Isaac begot Jacob," says, i.e. "faith begets hope, and hope begets charity." But charity is love. Therefore love is caused by hope.

I answer that, Hope can regard two things. For it regards as its object, the good which one hopes for. But since the good we hope for is something difficult but

possible to obtain; and since it happens sometimes that what is difficult becomes possible to us, not through ourselves but through others; hence it is that hope regards also that by which something becomes possible to us.

In so far, then, as hope regards the good we hope to get, it is caused by love: since we do not hope save for that which we desire and love. But in so far as hope regards one through whom something becomes possible to us, love is caused by hope, and not vice versa. Because by the very fact that we hope that good will accrue to us through someone, we are moved towards him as to our own good; and thus we begin to love him. Whereas from the fact that we love someone we do not hope in him, except accidentally, that is, in so far as we think that he returns our love. Wherefore the fact of being loved by another makes us hope in him; but our love for him is caused by the hope we have in him.

Wherefore the Replies to the Objections are evident.

Objection 1. It would seem that hope is not a help but a hindrance to action. Because hope implies security. But security begets negligence which hinders action. Therefore hope is a hindrance to action.

Objection 2. Further, sorrow hinders action, as stated above (q. 37, a. 3). But hope sometimes causes sorrow: for it is written (Prov. 13:12): “Hope that is deferred afflicteth the soul.” Therefore hope hinders action.

Objection 3. Further, despair is contrary to hope, as stated above (a. 4). But despair, especially in matters of war, conduces to action; for it is written (2 Kings 2:26), that “it is dangerous to drive people to despair.” Therefore hope has a contrary effect, namely, by hindering action.

On the contrary, It is written (1 Cor. 9:10) that “he that plougheth should plough in hope. . . to receive fruit”: and the same applies to all other actions.

I answer that, Hope of its very nature is a help to action by making it more intense: and this for two reasons. First, by reason of its object, which is a good, difficult but possible. For the thought of its being difficult arouses our attention; while the thought that it is

possible is no drag on our effort. Hence it follows that by reason of hope man is intent on his action. Secondly, on account of its effect. Because hope, as stated above (q. 32, a. 3), causes pleasure; which is a help to action, as stated above (q. 33, a. 4). Therefore hope is conducive to action.

Reply to Objection 1. Hope regards a good to be obtained; security regards an evil to be avoided. Wherefore security seems to be contrary to fear rather than to belong to hope. Yet security does not beget negligence, save in so far as it lessens the idea of difficulty: whereby it also lessens the character of hope: for the things in which a man fears no hindrance, are no longer looked upon as difficult.

Reply to Objection 2. Hope of itself causes pleasure; it is by accident that it causes sorrow, as stated above (q. 32, a. 3, ad 2).

Reply to Objection 3. Despair threatens danger in war, on account of a certain hope that attaches to it. For they who despair of flight, strive less to fly, but hope to avenge their death: and therefore in this hope they fight the more bravely, and consequently prove dangerous to the foe.

FIRST PART OF THE SECOND PART, QUESTION 41

Of Fear, in Itself (In Four Articles)

We must now consider, in the first place, fear; and, secondly, daring. With regard to fear, four things must be considered: (1) Fear, in itself; (2) Its object; (3) Its cause; (4) Its effect. Under the first head there are four points of inquiry:

- (1) Whether fear is a passion of the soul?
- (2) Whether fear is a special passion?
- (3) Whether there is a natural fear?
- (4) Of the species of fear.

Whether fear is a passion of the soul?

Ia IIae q. 41 a. 1

Objection 1. It would seem that fear is not a passion of the soul. For Damascene says (De Fide Orth. iii, 23) that “fear is a power, by way of *systole*”—i.e. of contraction—“desirous of vindicating nature.” But no virtue is a passion, as is proved in Ethic. ii, 5. Therefore fear is not a passion.

Objection 2. Further, every passion is an effect due to the presence of an agent. But fear is not of something present, but of something future, as Damascene declares (De Fide Orth. ii, 12). Therefore fear is not a passion.

Objection 3. Further, every passion of the soul is a movement of the sensitive appetite, in consequence of an apprehension of the senses. But sense apprehends, not the future but the present. Since, then, fear is of future evil, it seems that it is not a passion of the soul.

On the contrary, Augustine (De Civ. Dei xiv, 5, seqq.) reckons fear among the other passions of the soul.

I answer that, Among the other passions of the soul, after sorrow, fear chiefly has the character of passion. For as we have stated above (q. 22), the notion of passion implies first of all a movement of a passive power—i.e. of a power whose object is compared to it as its active principle: since passion is the effect of an agent. In this way, both “to feel” and “to understand” are passions. Secondly, more properly speaking, passion is a movement of the appetitive power; and more properly still, it is a movement of an appetitive power that has a bodily organ, such movement being accompa-

nied by a bodily transmutation. And, again, most properly those movements are called passions, which imply some deterioration. Now it is evident that fear, since it regards evil, belongs to the appetitive power, which of itself regards good and evil. Moreover, it belongs to the sensitive appetite: for it is accompanied by a certain transmutation—i.e. contraction—as Damascene says (Cf. obj. 1). Again, it implies relation to evil as overcoming, so to speak, some particular good. Wherefore it has most properly the character of passion; less, however, than sorrow, which regards the present evil: because fear regards future evil, which is not so strong a motive as present evil.

Reply to Objection 1. Virtue denotes a principle of action: wherefore, in so far as the interior movements of the appetitive faculty are principles of external action, they are called virtues. But the Philosopher denies that passion is a virtue by way of habit.

Reply to Objection 2. Just as the passion of a natural body is due to the bodily presence of an agent, so is the passion of the soul due to the agent being present to the soul, although neither corporally nor really present: that is to say, in so far as the evil which is really future, is present in the apprehension of the soul.

Reply to Objection 3. The senses do not apprehend the future: but from apprehending the present, an animal is moved by natural instinct to hope for a future good, or to fear a future evil.

Whether fear is a special passion?

Ia IIae q. 41 a. 2

Objection 1. It would seem that fear is not a special passion. For Augustine says (QQ. 83, qu. 33) that “the man who is not distraught by fear, is neither harassed by desire, nor wounded by sickness”—i.e. sorrow—“nor tossed about in transports of empty joys.” Wherefore it seems that, if fear be set aside, all the other passions are removed. Therefore fear is not a special but a general passion.

Objection 2. Further, the Philosopher says (Ethic.

vi, 2) that “pursuit and avoidance in the appetite are what affirmation and denial are in the intellect.” But denial is nothing special in the intellect, as neither is affirmation, but something common to many. Therefore neither is avoidance anything special in the appetite. But fear is nothing but a kind of avoidance of evil. Therefore it is not a special passion.

Objection 3. Further, if fear were a special passion, it would be chiefly in the irascible part. But fear is also

in the concupiscible: since the Philosopher says (Rhet. ii, 5) that “fear is a kind of sorrow”; and Damascene says (De Fide Orth. iii, 23) that fear is “a power of desire”: and both sorrow and desire are in the concupiscible faculty, as stated above (q. 23, a. 4). Therefore fear is not a special passion, since it belongs to different powers.

On the contrary, Fear is convided with the other passions of the soul, as is clear from Damascene (De Fide Orth. ii, 12,15).

I answer that, The passions of the soul derive their species from their objects: hence that is a special passion, which has a special object. Now fear has a special object, as hope has. For just as the object of hope is a future good, difficult but possible to obtain; so the object of fear is a future evil, difficult and irresistible. Consequently fear is a special passion of the soul.

Reply to Objection 1. All the passions of the soul arise from one source, viz. love, wherein they are connected with one another. By reason of this connection, when fear is put aside, the other passions of the soul are dispersed; not, however, as though it were a general

passion.

Reply to Objection 2. Not every avoidance in the appetite is fear, but avoidance of a special object, as stated. Wherefore, though avoidance be something common, yet fear is a special passion.

Reply to Objection 3. Fear is nowise in the concupiscible: for it regards evil, not absolutely, but as difficult or arduous, so as to be almost unavoidable. But since the irascible passions arise from the passions of the concupiscible faculty, and terminate therein, as stated above (q. 25, a. 1); hence it is that what belongs to the concupiscible is ascribed to fear. For fear is called sorrow, in so far as the object of fear causes sorrow when present: wherefore the Philosopher says (Rhet. ii, 5) that fear arises “from the representation of a future evil which is either corruptive or painful.” In like manner desire is ascribed by Damascene to fear, because just as hope arises from the desire of good, so fear arises from avoidance of evil; while avoidance of evil arises from the desire of good, as is evident from what has been said above (q. 25, a. 2; q. 29, a. 2; q. 36, a. 2).

Whether there is a natural fear?

Ia IIae q. 41 a. 3

Objection 1. It would seem that there is a natural fear. For Damascene says (De Fide Orth. iii, 23) that “there is a natural fear, through the soul refusing to be severed from the body.”

Objection 2. Further, fear arises from love, as stated above (a. 2, ad 1). But there is a natural love, as Dionysius says (Div. Nom. iv). Therefore there is also a natural fear.

Objection 3. Further, fear is opposed to hope, as stated above (q. 40, a. 4, ad 1). But there is a hope of nature, as is evident from Rom. 4:18, where it is said of Abraham that “against hope” of nature, “he believed in hope” of grace. Therefore there is also a fear of nature.

On the contrary, That which is natural is common to things animate and inanimate. But fear is not in things inanimate. Therefore there is no natural fear.

I answer that, A movement is said to be natural, because nature inclines thereto. Now this happens in two ways. First, so that it is entirely accomplished by nature, without any operation of the apprehensive faculty: thus to have an upward movement is natural to fire, and to grow is the natural movement of animals and plants. Secondly, a movement is said to be natural, if nature inclines thereto, though it be accomplished by the apprehensive faculty alone: since, as stated above (q. 10, a. 1), the movements of the cognitive and appetitive faculties are reducible to nature as to their first principle. In this way, even the acts of the apprehensive power, such as understanding, feeling, and remembering, as well as the movements of the animal appetite, are sometimes said to be natural.

And in this sense we may say that there is a natural

fear; and it is distinguished from non-natural fear, by reason of the diversity of its object. For, as the Philosopher says (Rhet. ii, 5), there is a fear of “corruptive evil,” which nature shrinks from on account of its natural desire to exist; and such fear is said to be natural. Again, there is a fear of “painful evil,” which is repugnant not to nature, but to the desire of the appetite; and such fear is not natural. In this sense we have stated above (q. 26, a. 1; q. 30, a. 3; q. 31, a. 7) that love, desire, and pleasure are divisible into natural and non-natural.

But in the first sense of the word “natural,” we must observe that certain passions of the soul are sometimes said to be natural, as love, desire, and hope; whereas the others cannot be called natural. The reason of this is because love and hatred, desire and avoidance, imply a certain inclination to pursue what is good or to avoid what is evil; which inclination is to be found in the natural appetite also. Consequently there is a natural love; while we may also speak of desire and hope as being even in natural things devoid of knowledge. On the other hand the other passions of the soul denote certain movements, whereto the natural inclination is nowise sufficient. This is due either to the fact that perception or knowledge is essential to these passions (thus we have said, q. 31, Aa. 1,3; q. 35, a. 1, that apprehension is a necessary condition of pleasure and sorrow), wherefore things devoid of knowledge cannot be said to take pleasure or to be sorrowful: or else it is because such like movements are contrary to the very nature of natural inclination: for instance, despair flies from good on account of some difficulty; and fear shrinks from re-

PELLING a contrary evil; both of which are contrary to the inclination of nature. Wherefore such like passions are

in no way ascribed to inanimate beings.

Thus the Replies to the Objections are evident.

Whether the species of fear is suitably assigned?

Ia IIae q. 41 a. 4

Objection 1. It would seem that six species of fear are unsuitably assigned by Damascene (*De Fide Orth.* ii, 15); namely, “laziness, shamefacedness, shame, amazement, stupor, and anxiety.” Because, as the Philosopher says (*Rhet.* ii, 5), “fear regards a saddening evil.” Therefore the species of fear should correspond to the species of sorrow. Now there are four species of sorrow, as stated above (q. 35, a. 8). Therefore there should only be four species of fear corresponding to them.

Objection 2. Further, that which consists in an action of our own is in our power. But fear regards an evil that surpasses our power, as stated above (a. 2). Therefore laziness, shamefacedness, and shame, which regard our own actions, should not be reckoned as species of fear.

Objection 3. Further, fear is of the future, as stated above (Aa. 1, 2). But “shame regards a disgraceful deed already done,” as Gregory of Nyssa* says. Therefore shame is not a species of fear.

Objection 4. Further, fear is only of evil. But amazement and stupor regard great and unwonted things, whether good or evil. Therefore amazement and stupor are not species of fear.

Objection 5. Further, Philosophers have been led by amazement to seek the truth, as stated in the beginning of *Metaphysics*. But fear leads to flight rather than to search. Therefore amazement is not a species of fear.

On the contrary suffices the authority of Damascene and Gregory of Nyssa† (Cf. obj. 1,3).

I answer that, As stated above (a. 2), fear regards a future evil which surpasses the power of him that fears, so that it is irresistible. Now man’s evil, like his good, may be considered either in his action or in external things. In his action he has a twofold evil to fear. First, there is the toil that burdens his nature: and hence arises “laziness,” as when a man shrinks from work for fear of too much toil. Secondly, there is the disgrace which damages him in the opinion of others. And thus, if disgrace is feared in a deed that is yet to be done, there is “shamefacedness”; if, however, it be a deed already done, there is “shame.”

On the other hand, the evil that consists in external things may surpass man’s faculty of resistance in three

ways. First by reason of its magnitude; when, that is to say, a man considers some great evil the outcome of which he is unable to gauge: and then there is “amazement.” Secondly, by reason of its being unwonted; because, to wit, some unwonted evil arises before us, and on that account is great in our estimation: and then there is “stupor,” which is caused by the representation of something unwonted. Thirdly, by reason of its being unforeseen: thus future misfortunes are feared, and fear of this kind is called “anxiety.”

Reply to Objection 1. Those species of sorrow given above are not derived from the diversity of objects, but from the diversity of effects, and for certain special reasons. Consequently there is no need for those species of sorrow to correspond with these species of fear, which are derived from the proper division of the object of fear itself.

Reply to Objection 2. A deed considered as being actually done, is in the power of the doer. But it is possible to take into consideration something connected with the deed, and surpassing the faculty of the doer, for which reason he shrinks from the deed. It is in this sense that laziness, shamefacedness, and shame are reckoned as species of fear.

Reply to Objection 3. The past deed may be the occasion of fear of future reproach or disgrace: and in this sense shame is a species of fear.

Reply to Objection 4. Not every amazement and stupor are species of fear, but that amazement which is caused by a great evil, and that stupor which arises from an unwonted evil. Or else we may say that, just as laziness shrinks from the toil of external work, so amazement and stupor shrink from the difficulty of considering a great and unwonted thing, whether good or evil: so that amazement and stupor stand in relation to the act of the intellect, as laziness does to external work.

Reply to Objection 5. He who is amazed shrinks at present from forming a judgment of that which amazes him, fearing to fall short of the truth, but inquires afterwards: whereas he who is overcome by stupor fears both to judge at present, and to inquire afterwards. Wherefore amazement is a beginning of philosophical research: whereas stupor is a hindrance thereto.

* Nemesius, *De Nat. Hom.* xx. † Nemesius

Objection 1. It would seem that fear is not a passion of the soul. For Damascene says (De Fide Orth. iii, 23) that “fear is a power, by way of *systole*”—i.e. of contraction—“desirous of vindicating nature.” But no virtue is a passion, as is proved in Ethic. ii, 5. Therefore fear is not a passion.

Objection 2. Further, every passion is an effect due to the presence of an agent. But fear is not of something present, but of something future, as Damascene declares (De Fide Orth. ii, 12). Therefore fear is not a passion.

Objection 3. Further, every passion of the soul is a movement of the sensitive appetite, in consequence of an apprehension of the senses. But sense apprehends, not the future but the present. Since, then, fear is of future evil, it seems that it is not a passion of the soul.

On the contrary, Augustine (De Civ. Dei xiv, 5, seqq.) reckons fear among the other passions of the soul.

I answer that, Among the other passions of the soul, after sorrow, fear chiefly has the character of passion. For as we have stated above (q. 22), the notion of passion implies first of all a movement of a passive power—i.e. of a power whose object is compared to it as its active principle: since passion is the effect of an agent. In this way, both “to feel” and “to understand” are passions. Secondly, more properly speaking, passion is a movement of the appetitive power; and more properly still, it is a movement of an appetitive power that has a bodily organ, such movement being accompa-

nied by a bodily transmutation. And, again, most properly those movements are called passions, which imply some deterioration. Now it is evident that fear, since it regards evil, belongs to the appetitive power, which of itself regards good and evil. Moreover, it belongs to the sensitive appetite: for it is accompanied by a certain transmutation—i.e. contraction—as Damascene says (Cf. obj. 1). Again, it implies relation to evil as overcoming, so to speak, some particular good. Wherefore it has most properly the character of passion; less, however, than sorrow, which regards the present evil: because fear regards future evil, which is not so strong a motive as present evil.

Reply to Objection 1. Virtue denotes a principle of action: wherefore, in so far as the interior movements of the appetitive faculty are principles of external action, they are called virtues. But the Philosopher denies that passion is a virtue by way of habit.

Reply to Objection 2. Just as the passion of a natural body is due to the bodily presence of an agent, so is the passion of the soul due to the agent being present to the soul, although neither corporally nor really present: that is to say, in so far as the evil which is really future, is present in the apprehension of the soul.

Reply to Objection 3. The senses do not apprehend the future: but from apprehending the present, an animal is moved by natural instinct to hope for a future good, or to fear a future evil.

Objection 1. It would seem that fear is not a special passion. For Augustine says (QQ. 83, qu. 33) that “the man who is not distraught by fear, is neither harassed by desire, nor wounded by sickness”—i.e. sorrow—“nor tossed about in transports of empty joys.” Wherefore it seems that, if fear be set aside, all the other passions are removed. Therefore fear is not a special but a general passion.

Objection 2. Further, the Philosopher says (Ethic. vi, 2) that “pursuit and avoidance in the appetite are what affirmation and denial are in the intellect.” But denial is nothing special in the intellect, as neither is affirmation, but something common to many. Therefore neither is avoidance anything special in the appetite. But fear is nothing but a kind of avoidance of evil. Therefore it is not a special passion.

Objection 3. Further, if fear were a special passion, it would be chiefly in the irascible part. But fear is also in the concupiscible: since the Philosopher says (Rhet. ii, 5) that “fear is a kind of sorrow”; and Damascene says (De Fide Orth. iii, 23) that fear is “a power of desire”: and both sorrow and desire are in the concupiscible faculty, as stated above (q. 23, a. 4). Therefore fear is not a special passion, since it belongs to different powers.

On the contrary, Fear is condivided with the other passions of the soul, as is clear from Damascene (De Fide Orth. ii, 12,15).

I answer that, The passions of the soul derive their species from their objects: hence that is a special passion, which has a special object. Now fear has a special

object, as hope has. For just as the object of hope is a future good, difficult but possible to obtain; so the object of fear is a future evil, difficult and irresistible. Consequently fear is a special passion of the soul.

Reply to Objection 1. All the passions of the soul arise from one source, viz. love, wherein they are connected with one another. By reason of this connection, when fear is put aside, the other passions of the soul are dispersed; not, however, as though it were a general passion.

Reply to Objection 2. Not every avoidance in the appetite is fear, but avoidance of a special object, as stated. Wherefore, though avoidance be something common, yet fear is a special passion.

Reply to Objection 3. Fear is nowise in the concupiscible: for it regards evil, not absolutely, but as difficult or arduous, so as to be almost unavoidable. But since the irascible passions arise from the passions of the concupiscible faculty, and terminate therein, as stated above (q. 25, a. 1); hence it is that what belongs to the concupiscible is ascribed to fear. For fear is called sorrow, in so far as the object of fear causes sorrow when present: wherefore the Philosopher says (Rhet. ii, 5) that fear arises “from the representation of a future evil which is either corruptive or painful.” In like manner desire is ascribed by Damascene to fear, because just as hope arises from the desire of good, so fear arises from avoidance of evil; while avoidance of evil arises from the desire of good, as is evident from what has been said above (q. 25, a. 2; q. 29, a. 2; q. 36, a. 2).

Objection 1. It would seem that there is a natural fear. For Damascene says (*De Fide Orth.* iii, 23) that “there is a natural fear, through the soul refusing to be severed from the body.”

Objection 2. Further, fear arises from love, as stated above (a. 2, ad 1). But there is a natural love, as Dionysius says (*Div. Nom.* iv). Therefore there is also a natural fear.

Objection 3. Further, fear is opposed to hope, as stated above (q. 40, a. 4, ad 1). But there is a hope of nature, as is evident from *Rom.* 4:18, where it is said of Abraham that “against hope” of nature, “he believed in hope” of grace. Therefore there is also a fear of nature.

On the contrary, That which is natural is common to things animate and inanimate. But fear is not in things inanimate. Therefore there is no natural fear.

I answer that, A movement is said to be natural, because nature inclines thereto. Now this happens in two ways. First, so that it is entirely accomplished by nature, without any operation of the apprehensive faculty: thus to have an upward movement is natural to fire, and to grow is the natural movement of animals and plants. Secondly, a movement is said to be natural, if nature inclines thereto, though it be accomplished by the apprehensive faculty alone: since, as stated above (q. 10, a. 1), the movements of the cognitive and appetitive faculties are reducible to nature as to their first principle. In this way, even the acts of the apprehensive power, such as understanding, feeling, and remembering, as well as the movements of the animal appetite, are sometimes said to be natural.

And in this sense we may say that there is a natural fear; and it is distinguished from non-natural fear, by reason of the diversity of its object. For, as the Philoso-

pher says (*Rhet.* ii, 5), there is a fear of “corruptive evil,” which nature shrinks from on account of its natural desire to exist; and such fear is said to be natural. Again, there is a fear of “painful evil,” which is repugnant not to nature, but to the desire of the appetite; and such fear is not natural. In this sense we have stated above (q. 26, a. 1; q. 30, a. 3; q. 31, a. 7) that love, desire, and pleasure are divisible into natural and non-natural.

But in the first sense of the word “natural,” we must observe that certain passions of the soul are sometimes said to be natural, as love, desire, and hope; whereas the others cannot be called natural. The reason of this is because love and hatred, desire and avoidance, imply a certain inclination to pursue what is good or to avoid what is evil; which inclination is to be found in the natural appetite also. Consequently there is a natural love; while we may also speak of desire and hope as being even in natural things devoid of knowledge. On the other hand the other passions of the soul denote certain movements, whereto the natural inclination is nowise sufficient. This is due either to the fact that perception or knowledge is essential to these passions (thus we have said, q. 31, Aa. 1,3; q. 35, a. 1, that apprehension is a necessary condition of pleasure and sorrow), wherefore things devoid of knowledge cannot be said to take pleasure or to be sorrowful: or else it is because such like movements are contrary to the very nature of natural inclination: for instance, despair flies from good on account of some difficulty; and fear shrinks from repelling a contrary evil; both of which are contrary to the inclination of nature. Wherefore such like passions are in no way ascribed to inanimate beings.

Thus the Replies to the Objections are evident.

Objection 1. It would seem that six species of fear are unsuitably assigned by Damascene (*De Fide Orth.* ii, 15); namely, “laziness, shamefacedness, shame, amazement, stupor, and anxiety.” Because, as the Philosopher says (*Rhet.* ii, 5), “fear regards a saddening evil.” Therefore the species of fear should correspond to the species of sorrow. Now there are four species of sorrow, as stated above (q. 35, a. 8). Therefore there should only be four species of fear corresponding to them.

Objection 2. Further, that which consists in an action of our own is in our power. But fear regards an evil that surpasses our power, as stated above (a. 2). Therefore laziness, shamefacedness, and shame, which regard our own actions, should not be reckoned as species of fear.

Objection 3. Further, fear is of the future, as stated above (Aa. 1, 2). But “shame regards a disgraceful deed already done,” as Gregory of Nyssa* says. Therefore shame is not a species of fear.

Objection 4. Further, fear is only of evil. But amazement and stupor regard great and unwonted things, whether good or evil. Therefore amazement and stupor are not species of fear.

Objection 5. Further, Philosophers have been led by amazement to seek the truth, as stated in the beginning of *Metaphysics*. But fear leads to flight rather than to search. Therefore amazement is not a species of fear.

On the contrary suffices the authority of Damascene and Gregory of Nyssa† (Cf. obj. 1,3).

I answer that, As stated above (a. 2), fear regards a future evil which surpasses the power of him that fears, so that it is irresistible. Now man’s evil, like his good, may be considered either in his action or in external things. In his action he has a twofold evil to fear. First, there is the toil that burdens his nature: and hence arises “laziness,” as when a man shrinks from work for fear of too much toil. Secondly, there is the disgrace which damages him in the opinion of others. And thus, if disgrace is feared in a deed that is yet to be done, there is “shamefacedness”; if, however, it be a deed already done, there is “shame.”

On the other hand, the evil that consists in external things may surpass man’s faculty of resistance in three

ways. First by reason of its magnitude; when, that is to say, a man considers some great evil the outcome of which he is unable to gauge: and then there is “amazement.” Secondly, by reason of its being unwonted; because, to wit, some unwonted evil arises before us, and on that account is great in our estimation: and then there is “stupor,” which is caused by the representation of something unwonted. Thirdly, by reason of its being unforeseen: thus future misfortunes are feared, and fear of this kind is called “anxiety.”

Reply to Objection 1. Those species of sorrow given above are not derived from the diversity of objects, but from the diversity of effects, and for certain special reasons. Consequently there is no need for those species of sorrow to correspond with these species of fear, which are derived from the proper division of the object of fear itself.

Reply to Objection 2. A deed considered as being actually done, is in the power of the doer. But it is possible to take into consideration something connected with the deed, and surpassing the faculty of the doer, for which reason he shrinks from the deed. It is in this sense that laziness, shamefacedness, and shame are reckoned as species of fear.

Reply to Objection 3. The past deed may be the occasion of fear of future reproach or disgrace: and in this sense shame is a species of fear.

Reply to Objection 4. Not every amazement and stupor are species of fear, but that amazement which is caused by a great evil, and that stupor which arises from an unwonted evil. Or else we may say that, just as laziness shrinks from the toil of external work, so amazement and stupor shrink from the difficulty of considering a great and unwonted thing, whether good or evil: so that amazement and stupor stand in relation to the act of the intellect, as laziness does to external work.

Reply to Objection 5. He who is amazed shrinks at present from forming a judgment of that which amazes him, fearing to fall short of the truth, but inquires afterwards: whereas he who is overcome by stupor fears both to judge at present, and to inquire afterwards. Wherefore amazement is a beginning of philosophical research: whereas stupor is a hindrance thereto.

* Nemesius, *De Nat. Hom.* xx. † Nemesius

FIRST PART OF THE SECOND PART, QUESTION 42

Of the Object of Fear (In Six Articles)

We must now consider the object of fear: under which head there are six points of inquiry:

- (1) Whether good or evil is the object of fear?
- (2) Whether evil of nature is the object of fear?
- (3) Whether the evil of sin is an object of fear?
- (4) Whether fear itself can be feared?
- (5) Whether sudden things are especially feared?
- (6) Whether those things are more feared against which there is no remedy?

Whether the object of fear is good or evil?

Ia IIae q. 42 a. 1

Objection 1. It would seem that good is the object of fear. For Augustine says (QQ. 83, qu. 83) that “we fear nothing save to lose what we love and possess, or not to obtain that which we hope for.” But that which we love is good. Therefore fear regards good as its proper object.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “power and to be above another is a thing to be feared.” But this is a good thing. Therefore good is the object of fear.

Objection 3. Further, there can be no evil in God. But we are commanded to fear God, according to Ps. 33:10: “Fear the Lord, all ye saints.” Therefore even the good is an object of fear.

On the contrary, Damascene says (De Fide Orth. ii, 12) that fear is of future evil.

I answer that, Fear is a movement of the appetitive power. Now it belongs to the appetitive power to pursue and to avoid, as stated in Ethic. vi, 2: and pursuit is of good, while avoidance is of evil. Consequently whatever movement of the appetitive power implies pursuit, has some good for its object: and whatever movement implies avoidance, has an evil for its object. Wherefore, since fear implies an avoidance, in the first place and of its very nature it regards evil as its proper object.

It can, however, regard good also, in so far as refer-

able to evil. This can be in two ways. In one way, inasmuch as an evil causes privation of good. Now a thing is evil from the very fact that it is a privation of some good. Wherefore, since evil is shunned because it is evil, it follows that it is shunned because it deprives one of the good that one pursues through love thereof. And in this sense Augustine says that there is no cause for fear, save loss of the good we love.

In another way, good stands related to evil as its cause: in so far as some good can by its power bring harm to the good we love: and so, just as hope, as stated above (q. 40, a. 7), regards two things, namely, the good to which it tends, and the thing through which there is a hope of obtaining the desired good; so also does fear regard two things, namely, the evil from which it shrinks, and that good which, by its power, can inflict that evil. In this way God is feared by man, inasmuch as He can inflict punishment, spiritual or corporal. In this way, too, we fear the power of man; especially when it has been thwarted, or when it is unjust, because then it is more likely to do us a harm.

In like manner one fears “to be over another,” i.e. to lean on another, so that it is in his power to do us a harm: thus a man fears another, who knows him to be guilty of a crime lest he reveal it to others.

This suffices for the Replies to the Objections.

Whether evil of nature is an object of fear?

Ia IIae q. 42 a. 2

Objection 1. It would seem that evil of nature is not an object of fear. For the Philosopher says (Rhet. ii, 5) that “fear makes us take counsel.” But we do not take counsel about things which happen naturally, as stated in Ethic. iii, 3. Therefore evil of nature is not an object of fear.

Objection 2. Further, natural defects such as death and the like are always threatening man. If therefore such like evils were an object of fear, man would needs be always in fear.

Objection 3. Further, nature does not move to contraries. But evil of nature is an effect of nature. There-

fore if a man shrinks from such like evils through fear thereof, this is not an effect of nature. Therefore natural fear is not of the evil of nature; and yet it seems that it should be.

On the contrary, The Philosopher says (Ethic. iii, 6) that “the most terrible of all things is death,” which is an evil of nature.

I answer that, As the Philosopher says (Rhet. ii, 5), fear is caused by the “imagination of a future evil which is either corruptive or painful.” Now just as a painful evil is that which is contrary to the will, so a corruptive evil is that which is contrary to nature: and this is the

evil of nature. Consequently evil of nature can be the object of fear.

But it must be observed that evil of nature sometimes arises from a natural cause; and then it is called evil of nature, not merely from being a privation of the good of nature, but also from being an effect of nature; such are natural death and other like defects. But sometimes evil of nature arises from a non-natural cause; such as violent death inflicted by an assailant. In either case evil of nature is feared to a certain extent, and to a certain extent not. For since fear arises “from the imagination of future evil,” as the Philosopher says (Rhet. ii, 5), whatever removes the imagination of the future evil, removes fear also. Now it may happen in two ways that an evil may not appear as about to be. First, through being remote and far off: for, on account of the distance, such a thing is considered as though it were not to be. Hence we either do not fear it, or fear it but little; for, as the Philosopher says (Rhet. ii, 5), “we do not fear things that are very far off; since all know that they shall die, but as death is not near, they heed it not.” Secondly, a future evil is considered as though it were not to be, on account of its being inevitable, wherefore we look upon it as already present. Hence the Philosopher says (Rhet.

ii, 5) that “those who are already on the scaffold, are not afraid,” seeing that they are on the very point of a death from which there is no escape; “but in order that a man be afraid, there must be some hope of escape for him.”

Consequently evil of nature is not feared if it be not apprehended as future: but if evil of nature, that is corruptive, be apprehended as near at hand, and yet with some hope of escape, then it will be feared.

Reply to Objection 1. The evil of nature sometimes is not an effect of nature, as stated above. But in so far as it is an effect of nature, although it may be impossible to avoid it entirely, yet it may be possible to delay it. And with this hope one may take counsel about avoiding it.

Reply to Objection 2. Although evil of nature ever threatens, yet it does not always threaten from near at hand: and consequently it is not always feared.

Reply to Objection 3. Death and other defects of nature are the effects of the common nature; and yet the individual nature rebels against them as far as it can. Accordingly, from the inclination of the individual nature arise pain and sorrow for such like evils, when present; fear when threatening in the future.

Whether the evil of sin is an object of fear?

Ia IIae q. 42 a. 3

Objection 1. It would seem that the evil of sin can be an object of fear. For Augustine says on the canonical Epistle of John (Tract. ix), that “by chaste fear man fears to be severed from God.” Now nothing but sin severs us from God; according to Is. 59:2: “Your iniquities have divided between you and your God.” Therefore the evil of sin can be an object of fear.

Objection 2. Further, Cicero says (Quaest. Tusc. iv, 4,6) that “we fear when they are yet to come, those things which give us pain when they are present.” But it is possible for one to be pained or sorrowful on account of the evil of sin. Therefore one can also fear the evil of sin.

Objection 3. Further, hope is contrary to fear. But the good of virtue can be the object of hope, as the Philosopher declares (Ethic. ix, 4): and the Apostle says (Gal. 5:10): “I have confidence in you in the Lord, that you will not be of another mind.” Therefore fear can regard evil of sin.

Objection 4. Further, shame is a kind of fear, as stated above (q. 41, a. 4). But shame regards a disgraceful deed, which is an evil of sin. Therefore fear does so likewise.

On the contrary, The Philosopher says (Rhet. ii, 5) that “not all evils are feared, for instance that someone be unjust or slow.”

I answer that, As stated above (q. 40, a. 1; q. 41, a. 2), as the object of hope is a future good difficult but possible to obtain, so the object of fear is a future evil, arduous and not to be easily avoided. From this we may

gather that whatever is entirely subject to our power and will, is not an object of fear; and that nothing gives rise to fear save what is due to an external cause. Now human will is the proper cause of the evil of sin: and consequently evil of sin, properly speaking, is not an object of fear.

But since the human will may be inclined to sin by an extrinsic cause; if this cause have a strong power of inclination, in that respect a man may fear the evil of sin, in so far as it arises from that extrinsic cause: as when he fears to dwell in the company of wicked men, lest he be led by them to sin. But, properly speaking, a man thus disposed, fears the being led astray rather than the sin considered in its proper nature, i.e. as a voluntary act; for considered in this light it is not an object of fear to him.

Reply to Objection 1. Separation from God is a punishment resulting from sin: and every punishment is, in some way, due to an extrinsic cause.

Reply to Objection 2. Sorrow and fear agree in one point, since each regards evil: they differ, however, in two points. First, because sorrow is about present evil, whereas fear is future evil. Secondly, because sorrow, being in the concupiscible faculty, regards evil absolutely; wherefore it can be about any evil, great or small; whereas fear, being in the irascible part, regards evil with the addition of a certain arduousness or difficulty; which difficulty ceases in so far as a thing is subject to the will. Consequently not all things that give us pain when they are present, make us fear when they

are yet to come, but only some things, namely, those that are difficult.

Reply to Objection 3. Hope is of good that is obtainable. Now one may obtain a good either of oneself, or through another: and so, hope may be of an act of virtue, which lies within our own power. On the other hand, fear is of an evil that does not lie in our own power: and consequently the evil which is feared

is always from an extrinsic cause; while the good that is hoped for may be both from an intrinsic and from an extrinsic cause.

Reply to Objection 4. As stated above (q. 41, a. 4, ad 2,3), shame is not fear of the very act of sin, but of the disgrace or ignominy which arises therefrom, and which is due to an extrinsic cause.

Whether fear itself can be feared?

Ia IIae q. 42 a. 4

Objection 1. It would seem that fear cannot be feared. For whatever is feared, is prevented from being lost, through fear thereof: thus a man who fears to lose his health, keeps it, through fearing its loss. If therefore a man be afraid of fear, he will keep himself from fear by being afraid: which seems absurd.

Objection 2. Further, fear is a kind of flight. But nothing flies from itself. Therefore fear cannot be the object of fear.

Objection 3. Further, fear is about the future. But fear is present to him that fears. Therefore it cannot be the object of his fear.

On the contrary, A man can love his own love, and can grieve at his own sorrow. Therefore, in like manner, he can fear his own fear.

I answer that, As stated above (a. 3), nothing can be an object of fear, save what is due to an extrinsic cause; but not that which ensues from our own will. Now fear partly arises from an extrinsic cause, and is partly subject to the will. It is due to an extrinsic cause, in so far as it is a passion resulting from the imagination of an imminent evil. In this sense it is possible for fear to be

the object of fear, i.e. a man may fear lest he should be threatened by the necessity of fearing, through being assailed by some great evil. It is subject to the will, in so far as the lower appetite obeys reason; wherefore man is able to drive fear away. In this sense fear cannot be the object of fear, as Augustine says (QQ. 83, qu. 33). Lest, however, anyone make use of his arguments, in order to prove that fear cannot be at all be the object of fear, we must add a solution to the same.

Reply to Objection 1. Not every fear is identically the same; there are various fears according to the various objects of fear. Nothing, then, prevents a man from keeping himself from fearing one thing, by fearing another, so that the fear which he has preserves him from the fear which he has not.

Reply to Objection 2. Since fear of an imminent evil is not identical with the fear of the fear of imminent evil; it does not follow that a thing flies from itself, or that it is the same flight in both cases.

Reply to Objection 3. On account of the various kinds of fear already alluded to (ad 2) a man's present fear may have a future fear for its object.

Whether sudden things are especially feared?

Ia IIae q. 42 a. 5

Objection 1. It would seem that unwonted and sudden things are not especially feared. Because, as hope is about good things, so fear is about evil things. But experience conduces to the increase of hope in good things. Therefore it also adds to fear in evil things.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that "those are feared most, not who are quick-tempered, but who are gentle and cunning." Now it is clear that those who are quick-tempered are more subject to sudden emotions. Therefore sudden things are less to be feared.

Objection 3. Further, we think less about things that happen suddenly. But the more we think about a thing, the more we fear it; hence the Philosopher says (Ethic. iii, 8) that "some appear to be courageous through ignorance, but as soon as they discover that the case is different from what they expected, they run away." Therefore sudden things are feared less.

On the contrary, Augustine says (Confess. ii, 6): "Fear is startled at things unwonted and sudden, which endanger things beloved, and takes forethought for their

safety."

I answer that, As stated about (a. 3; q. 41, a. 2), the object of fear is an imminent evil, which can be repelled, but with difficulty. Now this is due to one of two causes: to the greatness of the evil, or to the weakness of him that fears; while unwontedness and suddenness conduce to both of these causes. First, it helps an imminent evil to seem greater. Because all material things, whether good or evil, the more we consider them, the smaller they seem. Consequently, just as sorrow for a present evil is mitigated in course of time, as Cicero states (De Quaest. Tusc. iii, 30); so, too, fear of a future evil is diminished by thinking about it beforehand. Secondly, unwontedness and suddenness increase the weakness of him that fears, in so far as they deprive him of the remedies with which he might otherwise provide himself to forestall the coming evil, were it not for the evil taking him by surprise.

Reply to Objection 1. The object of hope is a good that is possible to obtain. Consequently whatever increases a man's power, is of a nature to increase hope,

and, for the same reason, to diminish fear, since fear is about an evil which cannot be easily repelled. Since, therefore, experience increases a man's power of action, therefore, as it increases hope, so does it diminish fear.

Reply to Objection 2. Those who are quick-tempered do not hide their anger; wherefore the harm they do others is not so sudden, as not to be foreseen. On the other hand, those who are gentle or cunning hide their anger; wherefore the harm which may be impending from them, cannot be foreseen, but takes one by surprise. For this reason the Philosopher says that such men are feared more than others.

Reply to Objection 3. Bodily good or evil, consid-

ered in itself, seems greater at first. The reason for this is that a thing is more obvious when seen in juxtaposition with its contrary. Hence, when a man passes unexpectedly from penury to wealth, he thinks more of his wealth on account of his previous poverty: while, on the other hand, the rich man who suddenly becomes poor, finds poverty all the more disagreeable. For this reason sudden evil is feared more, because it seems more to be evil. However, it may happen through some accident that the greatness of some evil is hidden; for instance if the foe hides himself in ambush: and then it is true that evil inspires greater fear through being much thought about.

Whether those things are more feared, for which there is no remedy?

Ia IIae q. 42 a. 6

Objection 1. It would seem that those things are not more to be feared, for which there is no remedy. Because it is a condition of fear, that there be some hope of safety, as stated above (a. 2). But an evil that cannot be remedied leaves no hope of escape. Therefore such things are not feared at all.

Objection 2. Further, there is no remedy for the evil of death: since, in the natural course of things, there is no return from death to life. And yet death is not the most feared of all things, as the Philosopher says (Rhet. ii, 5). Therefore those things are not feared most, for which there is no remedy.

Objection 3. Further, the Philosopher says (Ethic. i, 6) that "a thing which lasts long is no better than that which lasts but one day: nor is that which lasts for ever any better than that which is not everlasting": and the same applies to evil. But things that cannot be remedied seem to differ from other things, merely in the point of their lasting long or for ever. Consequently they are not therefore any worse or more to be feared.

On the contrary, the Philosopher says (Rhet. ii, 5) that "those things are most to be feared which when done wrong cannot be put right... or for which there is no help, or which are not easy."

I answer that, The object of fear is evil: consequently whatever tends to increase evil, conduces to the increase of fear. Now evil is increased not only in its species of evil, but also in respect of circumstances, as stated above (q. 18, a. 3). And of all the circumstances,

longlastingness, or even everlastingness, seems to have the greatest bearing on the increase of evil. Because things that exist in time are measured, in a way, according to the duration of time: wherefore if it be an evil to suffer something for a certain length of time, we should reckon the evil doubled, if it be suffered for twice that length of time. And accordingly, to suffer the same thing for an infinite length of time, i.e. for ever, implies, so to speak, an infinite increase. Now those evils which, after they have come, cannot be remedied at all, or at least not easily, are considered as lasting for ever or for a long time: for which reason they inspire the greatest fear.

Reply to Objection 1. Remedy for an evil is twofold. One, by which a future evil is warded off from coming. If such a remedy be removed, there is an end to hope and consequently to fear; wherefore we do not speak now of remedies of that kind. The other remedy is one by which an already present evil is removed: and of such a remedy we speak now.

Reply to Objection 2. Although death be an evil without remedy, yet, since it threatens not from near, it is not feared, as stated above (a. 2).

Reply to Objection 3. The Philosopher is speaking there of things that are good in themselves, i.e. good specifically. And such like good is no better for lasting long or for ever: its goodness depends on its very nature.

Objection 1. It would seem that good is the object of fear. For Augustine says (QQ. 83, qu. 83) that “we fear nothing save to lose what we love and possess, or not to obtain that which we hope for.” But that which we love is good. Therefore fear regards good as its proper object.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “power and to be above another is a thing to be feared.” But this is a good thing. Therefore good is the object of fear.

Objection 3. Further, there can be no evil in God. But we are commanded to fear God, according to Ps. 33:10: “Fear the Lord, all ye saints.” Therefore even the good is an object of fear.

On the contrary, Damascene says (De Fide Orth. ii, 12) that fear is of future evil.

I answer that, Fear is a movement of the appetitive power. Now it belongs to the appetitive power to pursue and to avoid, as stated in Ethic. vi, 2: and pursuit is of good, while avoidance is of evil. Consequently whatever movement of the appetitive power implies pursuit, has some good for its object: and whatever movement implies avoidance, has an evil for its object. Wherefore, since fear implies an avoidance, in the first place and of its very nature it regards evil as its proper object.

It can, however, regard good also, in so far as refer-

able to evil. This can be in two ways. In one way, inasmuch as an evil causes privation of good. Now a thing is evil from the very fact that it is a privation of some good. Wherefore, since evil is shunned because it is evil, it follows that it is shunned because it deprives one of the good that one pursues through love thereof. And in this sense Augustine says that there is no cause for fear, save loss of the good we love.

In another way, good stands related to evil as its cause: in so far as some good can by its power bring harm to the good we love: and so, just as hope, as stated above (q. 40, a. 7), regards two things, namely, the good to which it tends, and the thing through which there is a hope of obtaining the desired good; so also does fear regard two things, namely, the evil from which it shrinks, and that good which, by its power, can inflict that evil. In this way God is feared by man, inasmuch as He can inflict punishment, spiritual or corporal. In this way, too, we fear the power of man; especially when it has been thwarted, or when it is unjust, because then it is more likely to do us a harm.

In like manner one fears “to be over another,” i.e. to lean on another, so that it is in his power to do us a harm: thus a man fears another, who knows him to be guilty of a crime lest he reveal it to others.

This suffices for the Replies to the Objections.

Objection 1. It would seem that evil of nature is not an object of fear. For the Philosopher says (Rhet. ii, 5) that “fear makes us take counsel.” But we do not take counsel about things which happen naturally, as stated in Ethic. iii, 3. Therefore evil of nature is not an object of fear.

Objection 2. Further, natural defects such as death and the like are always threatening man. If therefore such like evils were an object of fear, man would needs be always in fear.

Objection 3. Further, nature does not move to contraries. But evil of nature is an effect of nature. Therefore if a man shrinks from such like evils through fear thereof, this is not an effect of nature. Therefore natural fear is not of the evil of nature; and yet it seems that it should be.

On the contrary, The Philosopher says (Ethic. iii, 6) that “the most terrible of all things is death,” which is an evil of nature.

I answer that, As the Philosopher says (Rhet. ii, 5), fear is caused by the “imagination of a future evil which is either corruptive or painful.” Now just as a painful evil is that which is contrary to the will, so a corruptive evil is that which is contrary to nature: and this is the evil of nature. Consequently evil of nature can be the object of fear.

But it must be observed that evil of nature sometimes arises from a natural cause; and then it is called evil of nature, not merely from being a privation of the good of nature, but also from being an effect of nature; such are natural death and other like defects. But sometimes evil of nature arises from a non-natural cause; such as violent death inflicted by an assailant. In either case evil of nature is feared to a certain extent, and to a certain extent not. For since fear arises “from the imagination of future evil,” as the Philosopher says (Rhet. ii,

5), whatever removes the imagination of the future evil, removes fear also. Now it may happen in two ways that an evil may not appear as about to be. First, through being remote and far off: for, on account of the distance, such a thing is considered as though it were not to be. Hence we either do not fear it, or fear it but little; for, as the Philosopher says (Rhet. ii, 5), “we do not fear things that are very far off; since all know that they shall die, but as death is not near, they heed it not.” Secondly, a future evil is considered as though it were not to be, on account of its being inevitable, wherefore we look upon it as already present. Hence the Philosopher says (Rhet. ii, 5) that “those who are already on the scaffold, are not afraid,” seeing that they are on the very point of a death from which there is no escape; “but in order that a man be afraid, there must be some hope of escape for him.”

Consequently evil of nature is not feared if it be not apprehended as future: but if evil of nature, that is corruptive, be apprehended as near at hand, and yet with some hope of escape, then it will be feared.

Reply to Objection 1. The evil of nature sometimes is not an effect of nature, as stated above. But in so far as it is an effect of nature, although it may be impossible to avoid it entirely, yet it may be possible to delay it. And with this hope one may take counsel about avoiding it.

Reply to Objection 2. Although evil of nature ever threatens, yet it does not always threaten from near at hand: and consequently it is not always feared.

Reply to Objection 3. Death and other defects of nature are the effects of the common nature; and yet the individual nature rebels against them as far as it can. Accordingly, from the inclination of the individual nature arise pain and sorrow for such like evils, when present; fear when threatening in the future.

Objection 1. It would seem that the evil of sin can be an object of fear. For Augustine says on the canonical Epistle of John (Tract. ix), that “by chaste fear man fears to be severed from God.” Now nothing but sin severs us from God; according to Is. 59:2: “Your iniquities have divided between you and your God.” Therefore the evil of sin can be an object of fear.

Objection 2. Further, Cicero says (Quaest. Tusc. iv, 4,6) that “we fear when they are yet to come, those things which give us pain when they are present.” But it is possible for one to be pained or sorrowful on account of the evil of sin. Therefore one can also fear the evil of sin.

Objection 3. Further, hope is contrary to fear. But the good of virtue can be the object of hope, as the Philosopher declares (Ethic. ix, 4): and the Apostle says (Gal. 5:10): “I have confidence in you in the Lord, that you will not be of another mind.” Therefore fear can regard evil of sin.

Objection 4. Further, shame is a kind of fear, as stated above (q. 41, a. 4). But shame regards a disgraceful deed, which is an evil of sin. Therefore fear does so likewise.

On the contrary, The Philosopher says (Rhet. ii, 5) that “not all evils are feared, for instance that someone be unjust or slow.”

I answer that, As stated above (q. 40, a. 1; q. 41, a. 2), as the object of hope is a future good difficult but possible to obtain, so the object of fear is a future evil, arduous and not to be easily avoided. From this we may gather that whatever is entirely subject to our power and will, is not an object of fear; and that nothing gives rise to fear save what is due to an external cause. Now human will is the proper cause of the evil of sin: and consequently evil of sin, properly speaking, is not an object of fear.

But since the human will may be inclined to sin by an extrinsic cause; if this cause have a strong power of

inclination, in that respect a man may fear the evil of sin, in so far as it arises from that extrinsic cause: as when he fears to dwell in the company of wicked men, lest he be led by them to sin. But, properly speaking, a man thus disposed, fears the being led astray rather than the sin considered in its proper nature, i.e. as a voluntary act; for considered in this light it is not an object of fear to him.

Reply to Objection 1. Separation from God is a punishment resulting from sin: and every punishment is, in some way, due to an extrinsic cause.

Reply to Objection 2. Sorrow and fear agree in one point, since each regards evil: they differ, however, in two points. First, because sorrow is about present evil, whereas fear is future evil. Secondly, because sorrow, being in the concupiscible faculty, regards evil absolutely; wherefore it can be about any evil, great or small; whereas fear, being in the irascible part, regards evil with the addition of a certain arduousness or difficulty; which difficulty ceases in so far as a thing is subject to the will. Consequently not all things that give us pain when they are present, make us fear when they are yet to come, but only some things, namely, those that are difficult.

Reply to Objection 3. Hope is of good that is obtainable. Now one may obtain a good either of oneself, or through another: and so, hope may be of an act of virtue, which lies within our own power. On the other hand, fear is of an evil that does not lie in our own power: and consequently the evil which is feared is always from an extrinsic cause; while the good that is hoped for may be both from an intrinsic and from an extrinsic cause.

Reply to Objection 4. As stated above (q. 41, a. 4, ad 2,3), shame is not fear of the very act of sin, but of the disgrace or ignominy which arises therefrom, and which is due to an extrinsic cause.

Objection 1. It would seem that fear cannot be feared. For whatever is feared, is prevented from being lost, through fear thereof: thus a man who fears to lose his health, keeps it, through fearing its loss. If therefore a man be afraid of fear, he will keep himself from fear by being afraid: which seems absurd.

Objection 2. Further, fear is a kind of flight. But nothing flies from itself. Therefore fear cannot be the object of fear.

Objection 3. Further, fear is about the future. But fear is present to him that fears. Therefore it cannot be the object of his fear.

On the contrary, A man can love his own love, and can grieve at his own sorrow. Therefore, in like manner, he can fear his own fear.

I answer that, As stated above (a. 3), nothing can be an object of fear, save what is due to an extrinsic cause; but not that which ensues from our own will. Now fear partly arises from an extrinsic cause, and is partly subject to the will. It is due to an extrinsic cause, in so far as it is a passion resulting from the imagination of an imminent evil. In this sense it is possible for fear to be

the object of fear, i.e. a man may fear lest he should be threatened by the necessity of fearing, through being assailed by some great evil. It is subject to the will, in so far as the lower appetite obeys reason; wherefore man is able to drive fear away. In this sense fear cannot be the object of fear, as Augustine says (QQ. 83, qu. 33). Lest, however, anyone make use of his arguments, in order to prove that fear cannot be at all be the object of fear, we must add a solution to the same.

Reply to Objection 1. Not every fear is identically the same; there are various fears according to the various objects of fear. Nothing, then, prevents a man from keeping himself from fearing one thing, by fearing another, so that the fear which he has preserves him from the fear which he has not.

Reply to Objection 2. Since fear of an imminent evil is not identical with the fear of the fear of imminent evil; it does not follow that a thing flies from itself, or that it is the same flight in both cases.

Reply to Objection 3. On account of the various kinds of fear already alluded to (ad 2) a man's present fear may have a future fear for its object.

Objection 1. It would seem that unwonted and sudden things are not especially feared. Because, as hope is about good things, so fear is about evil things. But experience conduces to the increase of hope in good things. Therefore it also adds to fear in evil things.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “those are feared most, not who are quick-tempered, but who are gentle and cunning.” Now it is clear that those who are quick-tempered are more subject to sudden emotions. Therefore sudden things are less to be feared.

Objection 3. Further, we think less about things that happen suddenly. But the more we think about a thing, the more we fear it; hence the Philosopher says (Ethic. iii, 8) that “some appear to be courageous through ignorance, but as soon as they discover that the case is different from what they expected, they run away.” Therefore sudden things are feared less.

On the contrary, Augustine says (Confess. ii, 6): “Fear is startled at things unwonted and sudden, which endanger things beloved, and takes forethought for their safety.”

I answer that, As stated about (a. 3; q. 41, a. 2), the object of fear is an imminent evil, which can be repelled, but with difficulty. Now this is due to one of two causes: to the greatness of the evil, or to the weakness of him that fears; while unwontedness and suddenness conduce to both of these causes. First, it helps an imminent evil to seem greater. Because all material things, whether good or evil, the more we consider them, the smaller they seem. Consequently, just as sorrow for a present evil is mitigated in course of time, as Cicero states (De Quaest. Tusc. iii, 30); so, too, fear of a future evil is diminished by thinking about it beforehand.

Secondly, unwontedness and suddenness increase the weakness of him that fears, in so far as they deprive him of the remedies with which he might otherwise provide himself to forestall the coming evil, were it not for the evil taking him by surprise.

Reply to Objection 1. The object of hope is a good that is possible to obtain. Consequently whatever increases a man’s power, is of a nature to increase hope, and, for the same reason, to diminish fear, since fear is about an evil which cannot be easily repelled. Since, therefore, experience increases a man’s power of action, therefore, as it increases hope, so does it diminish fear.

Reply to Objection 2. Those who are quick-tempered do not hide their anger; wherefore the harm they do others is not so sudden, as not to be foreseen. On the other hand, those who are gentle or cunning hide their anger; wherefore the harm which may be impending from them, cannot be foreseen, but takes one by surprise. For this reason the Philosopher says that such men are feared more than others.

Reply to Objection 3. Bodily good or evil, considered in itself, seems greater at first. The reason for this is that a thing is more obvious when seen in juxtaposition with its contrary. Hence, when a man passes unexpectedly from penury to wealth, he thinks more of his wealth on account of his previous poverty: while, on the other hand, the rich man who suddenly becomes poor, finds poverty all the more disagreeable. For this reason sudden evil is feared more, because it seems more to be evil. However, it may happen through some accident that the greatness of some evil is hidden; for instance if the foe hides himself in ambush: and then it is true that evil inspires greater fear through being much thought about.

Objection 1. It would seem that those things are not more to be feared, for which there is no remedy. Because it is a condition of fear, that there be some hope of safety, as stated above (a. 2). But an evil that cannot be remedied leaves no hope of escape. Therefore such things are not feared at all.

Objection 2. Further, there is no remedy for the evil of death: since, in the natural course of things, there is no return from death to life. And yet death is not the most feared of all things, as the Philosopher says (Rhet. ii, 5). Therefore those things are not feared most, for which there is no remedy.

Objection 3. Further, the Philosopher says (Ethic. i, 6) that “a thing which lasts long is no better than that which lasts but one day: nor is that which lasts for ever any better than that which is not everlasting”: and the same applies to evil. But things that cannot be remedied seem to differ from other things, merely in the point of their lasting long or for ever. Consequently they are not therefore any worse or more to be feared.

On the contrary, the Philosopher says (Rhet. ii, 5) that “those things are most to be feared which when done wrong cannot be put right. . . or for which there is no help, or which are not easy.”

I answer that, The object of fear is evil: consequently whatever tends to increase evil, conduces to the increase of fear. Now evil is increased not only in its species of evil, but also in respect of circumstances, as stated above (q. 18, a. 3). And of all the circumstances,

longlastingness, or even everlastingness, seems to have the greatest bearing on the increase of evil. Because things that exist in time are measured, in a way, according to the duration of time: wherefore if it be an evil to suffer something for a certain length of time, we should reckon the evil doubled, if it be suffered for twice that length of time. And accordingly, to suffer the same thing for an infinite length of time, i.e. for ever, implies, so to speak, an infinite increase. Now those evils which, after they have come, cannot be remedied at all, or at least not easily, are considered as lasting for ever or for a long time: for which reason they inspire the greatest fear.

Reply to Objection 1. Remedy for an evil is twofold. One, by which a future evil is warded off from coming. If such a remedy be removed, there is an end to hope and consequently to fear; wherefore we do not speak now of remedies of that kind. The other remedy is one by which an already present evil is removed: and of such a remedy we speak now.

Reply to Objection 2. Although death be an evil without remedy, yet, since it threatens not from near, it is not feared, as stated above (a. 2).

Reply to Objection 3. The Philosopher is speaking there of things that are good in themselves, i.e. good specifically. And such like good is no better for lasting long or for ever: its goodness depends on its very nature.

FIRST PART OF THE SECOND PART, QUESTION 43

Of the Cause of Fear (In Two Articles)

We must now consider the cause of fear: under which head there are two points of inquiry:

- (1) Whether love is the cause of fear?
- (2) Whether defect is the cause of fear?

Whether love is the cause of fear?

Ia IIae q. 43 a. 1

Objection 1. It would seem that love is not the cause of fear. For that which leads to a thing is its cause. But “fear leads to the love of charity” as Augustine says on the canonical epistle of John (Tract. ix). Therefore fear is the cause of love, and not conversely.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “those are feared most from whom we dread the advent of some evil.” But the dread of evil being caused by someone, makes us hate rather than love him. Therefore fear is caused by hate rather than by love.

Objection 3. Further, it has been stated above (q. 42, a. 3) that those things which occur by our own doing are not fearful. But that which we do from love, is done from our inmost heart. Therefore fear is not caused by love.

On the contrary, Augustine says (QQ. 83, qu. 33): “There can be no doubt that there is no cause for fear save the loss of what we love, when we possess it, or the failure to obtain what we hope for.” Therefore all fear is caused by our loving something: and consequently love is the cause of fear.

I answer that, The objects of the soul’s passions stand in relation thereto as the forms to things natural or artificial: because the passions of the soul take their species from their objects, as the aforesaid things do from their forms. Therefore, just as whatever is a cause of the form, is a cause of the thing constituted by that form, so whatever is a cause, in any way whatever, of the object, is a cause of the passion. Now a thing may be a cause of the object, either by way of efficient cause, or by way of material disposition. Thus the object of pleasure is good apprehended as suitable and conjoined: and its efficient cause is that which causes the conjunction, or the suitability, or goodness, or apprehension

of that good thing; while its cause by way of material disposition, is a habit or any sort of disposition by reason of which this conjoined good becomes suitable or is apprehended as such.

Accordingly, as to the matter in question, the object of fear is something reckoned as an evil to come, near at hand and difficult to avoid. Therefore that which can inflict such an evil, is the efficient cause of the object of fear, and, consequently, of fear itself. While that which renders a man so disposed that thing is such an evil to him, is a cause of fear and of its object, by way of material disposition. And thus it is that love causes fear: since it is through his loving a certain good, that whatever deprives a man of that good is an evil to him, and that consequently he fears it as an evil.

Reply to Objection 1. As stated above (q. 42, a. 1), fear, of itself and in the first place, regards the evil from which it recoils as being contrary to some loved good: and thus fear, of itself, is born of love. But, in the second place, it regards the cause from which that evil ensues: so that sometimes, accidentally, fear gives rise to love; in so far as, for instance, through fear of God’s punishments, man keeps His commandments, and thus begins to hope, while hope leads to love, as stated above (q. 40, a. 7).

Reply to Objection 2. He, from whom evil is expected, is indeed hated at first; but afterwards, when once we begin to hope for good from him, we begin to love him. But the good, the contrary evil of which is feared, was loved from the beginning.

Reply to Objection 3. This argument is true of that which is the efficient cause of the evil to be feared: whereas love causes fear by way of material disposition, as stated above.

Whether defect is the cause of fear?

Ia IIae q. 43 a. 2

Objection 1. It would seem that defect is not a cause of fear. Because those who are in power are very much feared. But defect is contrary to power. Therefore defect is not a cause of fear.

Objection 2. Further, the defect of those who are already being executed is extreme. But such like do not fear as stated in Rhet. ii, 5. Therefore defect is not a cause of fear.

Objection 3. Further, contests arise from strength not from defect. But “those who contend fear those who contend with them” (Rhet. ii, 5). Therefore defect is not a cause of fear.

On the contrary, Contraries ensue from contrary causes. But “wealth, strength, a multitude of friends, and power drive fear away” (Rhet. ii, 5). Therefore fear is caused by lack of these.

I answer that, As stated above (a. 1), fear may be set down to a twofold cause: one is by way of a material disposition, on the part of him that fears; the other is by way of efficient cause, on the part of the person feared. As to the first then, some defect is, of itself, the cause of fear: for it is owing to some lack of power that one is unable easily to repulse a threatening evil. And yet, in order to cause fear, this defect must be according to a measure. For the defect which causes fear of a future evil, is less than the defect caused by evil present, which is the object of sorrow. And still greater would be the defect, if perception of the evil, or love of the good whose contrary is feared, were entirely absent.

But as to the second, power and strength are, of themselves, the cause of fear: because it is owing to the fact that the cause apprehended as harmful is pow-

erful, that its effect cannot be repulsed. It may happen, however, in this respect, that some defect causes fear accidentally, in so far as owing to some defect someone wishes to hurt another; for instance, by reason of injustice, either because that other has already done him a harm, or because he fears to be harmed by him.

Reply to Objection 1. This argument is true of the cause of fear, on the part of the efficient cause.

Reply to Objection 2. Those who are already being executed, are actually suffering from a present evil; wherefore their defect exceeds the measure of fear.

Reply to Objection 3. Those who contend with one another are afraid, not on account of the power which enables them to contend: but on account of the lack of power, owing to which they are not confident of victory.

Objection 1. It would seem that love is not the cause of fear. For that which leads to a thing is its cause. But “fear leads to the love of charity” as Augustine says on the canonical epistle of John (Tract. ix). Therefore fear is the cause of love, and not conversely.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “those are feared most from whom we dread the advent of some evil.” But the dread of evil being caused by someone, makes us hate rather than love him. Therefore fear is caused by hate rather than by love.

Objection 3. Further, it has been stated above (q. 42, a. 3) that those things which occur by our own doing are not fearful. But that which we do from love, is done from our inmost heart. Therefore fear is not caused by love.

On the contrary, Augustine says (QQ. 83, qu. 33): “There can be no doubt that there is no cause for fear save the loss of what we love, when we possess it, or the failure to obtain what we hope for.” Therefore all fear is caused by our loving something: and consequently love is the cause of fear.

I answer that, The objects of the soul’s passions stand in relation thereto as the forms to things natural or artificial: because the passions of the soul take their species from their objects, as the aforesaid things do from their forms. Therefore, just as whatever is a cause of the form, is a cause of the thing constituted by that form, so whatever is a cause, in any way whatever, of the object, is a cause of the passion. Now a thing may be a cause of the object, either by way of efficient cause, or by way of material disposition. Thus the object of pleasure is good apprehended as suitable and conjoined: and its efficient cause is that which causes the conjunction, or the suitability, or goodness, or apprehension

of that good thing; while its cause by way of material disposition, is a habit or any sort of disposition by reason of which this conjoined good becomes suitable or is apprehended as such.

Accordingly, as to the matter in question, the object of fear is something reckoned as an evil to come, near at hand and difficult to avoid. Therefore that which can inflict such an evil, is the efficient cause of the object of fear, and, consequently, of fear itself. While that which renders a man so disposed that thing is such an evil to him, is a cause of fear and of its object, by way of material disposition. And thus it is that love causes fear: since it is through his loving a certain good, that whatever deprives a man of that good is an evil to him, and that consequently he fears it as an evil.

Reply to Objection 1. As stated above (q. 42, a. 1), fear, of itself and in the first place, regards the evil from which it recoils as being contrary to some loved good: and thus fear, of itself, is born of love. But, in the second place, it regards the cause from which that evil ensues: so that sometimes, accidentally, fear gives rise to love; in so far as, for instance, through fear of God’s punishments, man keeps His commandments, and thus begins to hope, while hope leads to love, as stated above (q. 40, a. 7).

Reply to Objection 2. He, from whom evil is expected, is indeed hated at first; but afterwards, when once we begin to hope for good from him, we begin to love him. But the good, the contrary evil of which is feared, was loved from the beginning.

Reply to Objection 3. This argument is true of that which is the efficient cause of the evil to be feared: whereas love causes fear by way of material disposition, as stated above.

Objection 1. It would seem that defect is not a cause of fear. Because those who are in power are very much feared. But defect is contrary to power. Therefore defect is not a cause of fear.

Objection 2. Further, the defect of those who are already being executed is extreme. But such like do not fear as stated in Rhet. ii, 5. Therefore defect is not a cause of fear.

Objection 3. Further, contests arise from strength not from defect. But “those who contend fear those who contend with them” (Rhet. ii, 5). Therefore defect is not a cause of fear.

On the contrary, Contraries ensue from contrary causes. But “wealth, strength, a multitude of friends, and power drive fear away” (Rhet. ii, 5). Therefore fear is caused by lack of these.

I answer that, As stated above (a. 1), fear may be set down to a twofold cause: one is by way of a material disposition, on the part of him that fears; the other is by way of efficient cause, on the part of the person feared. As to the first then, some defect is, of itself, the cause of fear: for it is owing to some lack of power that one is unable easily to repulse a threatening evil. And yet, in order to cause fear, this defect must be according

to a measure. For the defect which causes fear of a future evil, is less than the defect caused by evil present, which is the object of sorrow. And still greater would be the defect, if perception of the evil, or love of the good whose contrary is feared, were entirely absent.

But as to the second, power and strength are, of themselves, the cause of fear: because it is owing to the fact that the cause apprehended as harmful is powerful, that its effect cannot be repulsed. It may happen, however, in this respect, that some defect causes fear accidentally, in so far as owing to some defect someone wishes to hurt another; for instance, by reason of injustice, either because that other has already done him a harm, or because he fears to be harmed by him.

Reply to Objection 1. This argument is true of the cause of fear, on the part of the efficient cause.

Reply to Objection 2. Those who are already being executed, are actually suffering from a present evil; wherefore their defect exceeds the measure of fear.

Reply to Objection 3. Those who contend with one another are afraid, not on account of the power which enables them to contend: but on account of the lack of power, owing to which they are not confident of victory.

FIRST PART OF THE SECOND PART, QUESTION 44

Of the Effects of Fear (In Four Articles)

We must now consider the effects of fear: under which head there are four points of inquiry:

- (1) Whether fear causes contraction?
- (2) Whether it makes men suitable for counsel?
- (3) Whether it makes one tremble?
- (4) Whether it hinders action?

Whether fear causes contraction?

Ia IIae q. 44 a. 1

Objection 1. It would seem that fear does not cause contraction. For when contraction takes place, the heat and vital spirits are withdrawn inwardly. But accumulation of heat and vital spirits in the interior parts of the body, dilates the heart unto endeavors of daring, as may be seen in those who are angered: while the contrary happens in those who are afraid. Therefore fear does not cause contraction.

Objection 2. Further, when, as a result of contraction, the vital spirits and heat are accumulated in the interior parts, man cries out, as may be seen in those who are in pain. But those who fear utter nothing: on the contrary they lose their speech. Therefore fear does not cause contraction.

Objection 3. Further, shame is a kind of fear, as stated above (q. 41, a. 4). But “those who are ashamed blush,” as Cicero (*De Quaest. Tusc.* iv, 8), and the Philosopher (*Ethic.* iv, 9) observe. But blushing is an indication, not of contraction, but of the reverse. Therefore contraction is not an effect of fear.

On the contrary, Damascene says (*De Fide Orth.* ii, 23) that “fear is a power according to *systole*,” i.e. contraction.

I answer that, As stated above (q. 28, a. 5), in the passions of the soul, the formal element is the movement of the appetitive power, while the bodily transmutation is the material element. Both of these are mutually proportionate; and consequently the bodily transmutation assumes a resemblance to and the very nature of the appetitive movement. Now, as to the appetitive movement of the soul, fear implies a certain contraction: the reason of which is that fear arises from the imagination of some threatening evil which is difficult to repel, as stated above (q. 41, a. 2). But that a thing be difficult to repel is due to lack of power, as stated above (q. 43, a. 2): and the weaker a power is, the fewer the things to which it extends. Wherefore from the very imagination that causes fear there ensues a certain contraction in the appetite. Thus we observe in one who is dying that nature withdraws inwardly, on account of the lack of power: and again we see the inhabitants of a city, when seized with fear, leave the outskirts, and, as far as possible, make for the inner quarters. It is in resemblance to this contraction, which pertains to the

appetite of the soul, that in fear a similar contraction of heat and vital spirits towards the inner parts takes place in regard to the body.

Reply to Objection 1. As the Philosopher says (*De Problem.* xxvii, 3), although in those who fear, the vital spirits recede from outer to the inner parts of the body, yet the movement of vital spirits is not the same in those who are angry and those who are afraid. For in those who are angry, by reason of the heat and subtlety of the vital spirits, which result from the craving for vengeance, the inward movement has an upward direction: wherefore the vital spirits and heat concentrate around the heart: the result being that an angry man is quick and brave in attacking. But in those who are afraid, on account of the condensation caused by cold, the vital spirits have a downward movement; the said cold being due to the imagined lack of power. Consequently the heat and vital spirits abandon the heart instead of concentrating around it: the result being that a man who is afraid is not quick to attack, but is more inclined to run away.

Reply to Objection 2. To everyone that is in pain, whether man or animal, it is natural to use all possible means of repelling the harmful thing that causes pain but its presence: thus we observe that animals, when in pain, attack with their jaws or with their horns. Now the greatest help for all purposes, in animals, is heat and vital spirits: wherefore when they are in pain, their nature stores up the heat and vital spirits within them, in order to make use thereof in repelling the harmful object. Hence the Philosopher says (*De Problem.* xxvii, 9) when the vital spirits and heat are concentrated together within, they require to find a vent in the voice: for which reason those who are in pain can scarcely refrain from crying aloud. On the other hand, in those who are afraid, the internal heat and vital spirits move from the heart downwards, as stated above (ad 1): wherefore fear hinders speech which ensues from the emission of the vital spirits in an upward direction through the mouth: the result being that fear makes its subject speechless. For this reason, too, fear “makes its subject tremble,” as the Philosopher says (*De Problem.* xxvii, 1,6,7).

Reply to Objection 3. Mortal perils are contrary not only to the appetite of the soul, but also to nature.

Consequently in such like fear, there is contraction not only in the appetite, but also in the corporeal nature: for when an animal is moved by the imagination of death, it experiences a contraction of heat towards the inner parts of the body, as though it were threatened by a natural death. Hence it is that “those who are in fear of death turn pale” (Ethic. iv, 9). But the evil that shame

fears, is contrary, not to nature, but only to the appetite of the soul. Consequently there results a contraction in this appetite, but not in the corporeal nature; in fact, the soul, as though contracted in itself, is free to set the vital spirits and heat in movement, so that they spread to the outward parts of the body: the result being that those who are ashamed blush.

Whether fear makes one suitable for counsel?

Ia IIae q. 44 a. 2

Objection 1. It would seem that fear does not make one suitable for counsel. For the same thing cannot be conducive to counsel, and a hindrance thereto. But fear hinders counsel: because every passion disturbs repose, which is requisite for the good use of reason. Therefore fear does not make a man suitable for counsel.

Objection 2. Further, counsel is an act of reason, in thinking and deliberating about the future. But a certain fear “drives away all thought, and dislocates the mind,” as Cicero observes (De Quaest. Tusc. iv, 8). Therefore fear does not conduce to counsel, but hinders it.

Objection 3. Further, just as we have recourse to counsel in order to avoid evil, so do we, in order to attain good things. But whereas fear is of evil to be avoided, so is hope of good things to be obtained. Therefore fear is not more conducive to counsel, than hope is.

On the contrary, The Philosopher says (Rhet. ii, 5) that “fear makes men of counsel.”

I answer that, A man of counsel may be taken in two ways. First, from his being willing or anxious to take counsel. And thus fear makes men of counsel. Because, as the Philosopher says (Ethic. iii, 3), “we take counsel on great matters, because therein we distrust ourselves.” Now things which make us afraid, are not simply evil, but have a certain magnitude, both because they seem difficult to repel, and because they are apprehended as near to us, as stated above (q. 42, a. 2). Wherefore men seek for counsel especially when they are afraid.

Secondly, a man of counsel means one who is apt

for giving good counsel: and in this sense, neither fear nor any passion makes men of counsel. Because when a man is affected by a passion, things seem to him greater or smaller than they really are: thus to a lover, what he loves seems better; to him that fears, what he fears seems more dreadful. Consequently owing to the want of right judgment, every passion, considered in itself, hinders the faculty of giving good counsel.

This suffices for the Reply to the First Objection.

Reply to Objection 2. The stronger a passion is, the greater the hindrance is it to the man who is swayed by it. Consequently, when fear is intense, man does indeed wish to take counsel, but his thoughts are so disturbed, that he can find no counsel. If, however, the fear be slight, so as to make a man wish to take counsel, without gravely disturbing the reason; it may even make it easier for him to take good counsel, by reason of his ensuing carefulness.

Reply to Objection 3. Hope also makes man a good counsellor: because, as the Philosopher says (Rhet. ii, 5), “no man takes counsel in matters he despairs of,” nor about impossible things, as he says in Ethic. iii, 3. But fear incites to counsel more than hope does. Because hope is of good things, as being possible of attainment; whereas fear is of evil things, as being difficult to repel, so that fear regards the aspect of difficulty more than hope does. And it is in matters of difficulty, especially when we distrust ourselves, that we take counsel, as stated above.

Whether fear makes one tremble?

Ia IIae q. 44 a. 3

Objection 1. It would seem that trembling is not an effect of fear. Because trembling is occasioned by cold; thus we observe that a cold person trembles. Now fear does not seem to make one cold, but rather to cause a parching heat: a sign whereof is that those who fear are thirsty, especially if their fear be very great, as in the case of those who are being led to execution. Therefore fear does not cause trembling.

Objection 2. Further, faecal evacuation is occasioned by heat; hence laxative medicines are generally warm. But these evacuations are often caused by fear. Therefore fear apparently causes heat; and consequently does not cause trembling.

Objection 3. Further, in fear, the heat is withdrawn

from the outer to the inner parts of the body. If, therefore, man trembles in his outward parts, through the heat being withdrawn thus; it seems that fear should cause this trembling in all the external members. But such is not the case. Therefore trembling of the body is not caused by fear.

On the contrary, Cicero says (De Quaest. Tusc. iv, 8) that “fear is followed by trembling, pallor and chattering of the teeth.”

I answer that, As stated above (a. 1), in fear there takes place a certain contraction from the outward to the inner parts of the body, the result being that the outer parts become cold; and for this reason trembling is occasioned in these parts, being caused by a lack of power

in controlling the members: which lack of power is due to the want of heat, which is the instrument whereby the soul moves those members, as stated in *De Anima* ii, 4.

Reply to Objection 1. When the heat withdraws from the outer to the inner parts, the inward heat increases, especially in the inferior or nutritive parts. Consequently the humid element being spent, thirst ensues; sometimes indeed the result is a loosening of the bowels, and urinary or even seminal evacuation. Or else such like evacuations are due to contraction of the abdomen and testicles, as the Philosopher says (*De Problem.* xxii, 11).

This suffices for the Reply to the Second Objection.

Reply to Objection 3. In fear, heat abandons the

heart, with a downward movement: hence in those who are afraid the heart especially trembles, as also those members which are connected with the breast where the heart resides. Hence those who fear tremble especially in their speech, on account of the tracheal artery being near the heart. The lower lip, too, and the lower jaw tremble, through their connection with the heart; which explains the chattering of the teeth. For the same reason the arms and hands tremble. Or else because the aforesaid members are more mobile. For which reason the knees tremble in those who are afraid, according to *Is.* 35:3: “Strengthen ye the feeble hands, and confirm the trembling [Vulg.: ‘weak’] knees.”

Whether fear hinders action?

Ia IIae q. 44 a. 4

Objection 1. It would seem that fear hinders action. For action is hindered chiefly by a disturbance in the reason, which directs action. But fear disturbs reason, as stated above (a. 2). Therefore fear hinders action.

Objection 2. Further, those who fear while doing anything, are more apt to fail: thus a man who walks on a plank placed aloft, easily falls through fear; whereas, if he were to walk on the same plank down below, he would not fall, through not being afraid. Therefore fear hinders action.

Objection 3. Further, laziness or sloth is a kind of fear. But laziness hinders action. Therefore fear does too.

On the contrary, The Apostle says (*Phil.* 2:12): “With fear and trembling work out your salvation”: and he would not say this if fear were a hindrance to a good work. Therefore fear does not hinder a good action.

I answer that, Man’s exterior actions are caused by the soul as first mover, but by the bodily members as instruments. Now action may be hindered both by defect of the instrument, and by defect of the principal mover. On the part of the bodily instruments, fear, considered

in itself, is always apt to hinder exterior action, on account of the outward members being deprived, through fear, of their heat. But on the part of the soul, if the fear be moderate, without much disturbance of the reason, it conduces to working well, in so far as it causes a certain solicitude, and makes a man take counsel and work with greater attention. If, however, fear increases so much as to disturb the reason, it hinders action even on the part of the soul. But of such a fear the Apostle does not speak.

This suffices for the Reply to the First Objection.

Reply to Objection 2. He that falls from a plank placed aloft, suffers a disturbance of his imagination, through fear of the fall that is pictured to his imagination.

Reply to Objection 3. Everyone in fear shuns that which he fears: and therefore, since laziness is a fear of work itself as being toilsome, it hinders work by withdrawing the will from it. But fear of other things conduces to action, in so far as it inclines the will to do that whereby a man escapes from what he fears.

Objection 1. It would seem that fear does not cause contraction. For when contraction takes place, the heat and vital spirits are withdrawn inwardly. But accumulation of heat and vital spirits in the interior parts of the body, dilates the heart unto endeavors of daring, as may be seen in those who are angered: while the contrary happens in those who are afraid. Therefore fear does not cause contraction.

Objection 2. Further, when, as a result of contraction, the vital spirits and heat are accumulated in the interior parts, man cries out, as may be seen in those who are in pain. But those who fear utter nothing: on the contrary they lose their speech. Therefore fear does not cause contraction.

Objection 3. Further, shame is a kind of fear, as stated above (q. 41, a. 4). But “those who are ashamed blush,” as Cicero (*De Quaest. Tusc.* iv, 8), and the Philosopher (*Ethic.* iv, 9) observe. But blushing is an indication, not of contraction, but of the reverse. Therefore contraction is not an effect of fear.

On the contrary, Damascene says (*De Fide Orth.* ii, 23) that “fear is a power according to *systole*,” i.e. contraction.

I answer that, As stated above (q. 28, a. 5), in the passions of the soul, the formal element is the movement of the appetitive power, while the bodily transmutation is the material element. Both of these are mutually proportionate; and consequently the bodily transmutation assumes a resemblance to and the very nature of the appetitive movement. Now, as to the appetitive movement of the soul, fear implies a certain contraction: the reason of which is that fear arises from the imagination of some threatening evil which is difficult to repel, as stated above (q. 41, a. 2). But that a thing be difficult to repel is due to lack of power, as stated above (q. 43, a. 2): and the weaker a power is, the fewer the things to which it extends. Wherefore from the very imagination that causes fear there ensues a certain contraction in the appetite. Thus we observe in one who is dying that nature withdraws inwardly, on account of the lack of power: and again we see the inhabitants of a city, when seized with fear, leave the outskirts, and, as far as possible, make for the inner quarters. It is in resemblance to this contraction, which pertains to the appetite of the soul, that in fear a similar contraction of heat and vital spirits towards the inner parts takes place in regard to the body.

Reply to Objection 1. As the Philosopher says (*De Problem.* xxvii, 3), although in those who fear, the vital spirits recede from outer to the inner parts of the body, yet the movement of vital spirits is not the same

in those who are angry and those who are afraid. For in those who are angry, by reason of the heat and subtlety of the vital spirits, which result from the craving for vengeance, the inward movement has an upward direction: wherefore the vital spirits and heat concentrate around the heart: the result being that an angry man is quick and brave in attacking. But in those who are afraid, on account of the condensation caused by cold, the vital spirits have a downward movement; the said cold being due to the imagined lack of power. Consequently the heat and vital spirits abandon the heart instead of concentrating around it: the result being that a man who is afraid is not quick to attack, but is more inclined to run away.

Reply to Objection 2. To everyone that is in pain, whether man or animal, it is natural to use all possible means of repelling the harmful thing that causes pain but its presence: thus we observe that animals, when in pain, attack with their jaws or with their horns. Now the greatest help for all purposes, in animals, is heat and vital spirits: wherefore when they are in pain, their nature stores up the heat and vital spirits within them, in order to make use thereof in repelling the harmful object. Hence the Philosopher says (*De Problem.* xxvii, 9) when the vital spirits and heat are concentrated together within, they require to find a vent in the voice: for which reason those who are in pain can scarcely refrain from crying aloud. On the other hand, in those who are afraid, the internal heat and vital spirits move from the heart downwards, as stated above (ad 1): wherefore fear hinders speech which ensues from the emission of the vital spirits in an upward direction through the mouth: the result being that fear makes its subject speechless. For this reason, too, fear “makes its subject tremble,” as the Philosopher says (*De Problem.* xxvii, 1,6,7).

Reply to Objection 3. Mortal perils are contrary not only to the appetite of the soul, but also to nature. Consequently in such like fear, there is contraction not only in the appetite, but also in the corporeal nature: for when an animal is moved by the imagination of death, it experiences a contraction of heat towards the inner parts of the body, as though it were threatened by a natural death. Hence it is that “those who are in fear of death turn pale” (*Ethic.* iv, 9). But the evil that shame fears, is contrary, not to nature, but only to the appetite of the soul. Consequently there results a contraction in this appetite, but not in the corporeal nature; in fact, the soul, as though contracted in itself, is free to set the vital spirits and heat in movement, so that they spread to the outward parts of the body: the result being that those who are ashamed blush.

Objection 1. It would seem that fear does not make one suitable for counsel. For the same thing cannot be conducive to counsel, and a hindrance thereto. But fear hinders counsel: because every passion disturbs repose, which is requisite for the good use of reason. Therefore fear does not make a man suitable for counsel.

Objection 2. Further, counsel is an act of reason, in thinking and deliberating about the future. But a certain fear “drives away all thought, and dislocates the mind,” as Cicero observes (*De Quaest. Tusc.* iv, 8). Therefore fear does not conduce to counsel, but hinders it.

Objection 3. Further, just as we have recourse to counsel in order to avoid evil, so do we, in order to attain good things. But whereas fear is of evil to be avoided, so is hope of good things to be obtained. Therefore fear is not more conducive to counsel, than hope is.

On the contrary, The Philosopher says (*Rhet.* ii, 5) that “fear makes men of counsel.”

I answer that, A man of counsel may be taken in two ways. First, from his being willing or anxious to take counsel. And thus fear makes men of counsel. Because, as the Philosopher says (*Ethic.* iii, 3), “we take counsel on great matters, because therein we distrust ourselves.” Now things which make us afraid, are not simply evil, but have a certain magnitude, both because they seem difficult to repel, and because they are apprehended as near to us, as stated above (q. 42, a. 2). Wherefore men seek for counsel especially when they are afraid.

Secondly, a man of counsel means one who is apt

for giving good counsel: and in this sense, neither fear nor any passion makes men of counsel. Because when a man is affected by a passion, things seem to him greater or smaller than they really are: thus to a lover, what he loves seems better; to him that fears, what he fears seems more dreadful. Consequently owing to the want of right judgment, every passion, considered in itself, hinders the faculty of giving good counsel.

This suffices for the Reply to the First Objection.

Reply to Objection 2. The stronger a passion is, the greater the hindrance is it to the man who is swayed by it. Consequently, when fear is intense, man does indeed wish to take counsel, but his thoughts are so disturbed, that he can find no counsel. If, however, the fear be slight, so as to make a man wish to take counsel, without gravely disturbing the reason; it may even make it easier for him to take good counsel, by reason of his ensuing carefulness.

Reply to Objection 3. Hope also makes man a good counsellor: because, as the Philosopher says (*Rhet.* ii, 5), “no man takes counsel in matters he despairs of,” nor about impossible things, as he says in *Ethic.* iii, 3. But fear incites to counsel more than hope does. Because hope is of good things, as being possible of attainment; whereas fear is of evil things, as being difficult to repel, so that fear regards the aspect of difficulty more than hope does. And it is in matters of difficulty, especially when we distrust ourselves, that we take counsel, as stated above.

Objection 1. It would seem that trembling is not an effect of fear. Because trembling is occasioned by cold; thus we observe that a cold person trembles. Now fear does not seem to make one cold, but rather to cause a parching heat: a sign whereof is that those who fear are thirsty, especially if their fear be very great, as in the case of those who are being led to execution. Therefore fear does not cause trembling.

Objection 2. Further, faecal evacuation is occasioned by heat; hence laxative medicines are generally warm. But these evacuations are often caused by fear. Therefore fear apparently causes heat; and consequently does not cause trembling.

Objection 3. Further, in fear, the heat is withdrawn from the outer to the inner parts of the body. If, therefore, man trembles in his outward parts, through the heat being withdrawn thus; it seems that fear should cause this trembling in all the external members. But such is not the case. Therefore trembling of the body is not caused by fear.

On the contrary, Cicero says (*De Quaest. Tusc. iv, 8*) that “fear is followed by trembling, pallor and chattering of the teeth.”

I answer that, As stated above (a. 1), in fear there takes place a certain contraction from the outward to the inner parts of the body, the result being that the outer parts become cold; and for this reason trembling is occasioned in these parts, being caused by a lack of power

in controlling the members: which lack of power is due to the want of heat, which is the instrument whereby the soul moves those members, as stated in *De Anima ii, 4*.

Reply to Objection 1. When the heat withdraws from the outer to the inner parts, the inward heat increases, especially in the inferior or nutritive parts. Consequently the humid element being spent, thirst ensues; sometimes indeed the result is a loosening of the bowels, and urinary or even seminal evacuation. Or else such like evacuations are due to contraction of the abdomen and testicles, as the Philosopher says (*De Problem. xxii, 11*).

This suffices for the Reply to the Second Objection.

Reply to Objection 3. In fear, heat abandons the heart, with a downward movement: hence in those who are afraid the heart especially trembles, as also those members which are connected with the breast where the heart resides. Hence those who fear tremble especially in their speech, on account of the tracheal artery being near the heart. The lower lip, too, and the lower jaw tremble, through their connection with the heart; which explains the chattering of the teeth. For the same reason the arms and hands tremble. Or else because the aforesaid members are more mobile. For which reason the knees tremble in those who are afraid, according to *Is. 35:3*: “Strengthen ye the feeble hands, and confirm the trembling [Vulg.: ‘weak’] knees.”

Objection 1. It would seem that fear hinders action. For action is hindered chiefly by a disturbance in the reason, which directs action. But fear disturbs reason, as stated above (a. 2). Therefore fear hinders action.

Objection 2. Further, those who fear while doing anything, are more apt to fail: thus a man who walks on a plank placed aloft, easily falls through fear; whereas, if he were to walk on the same plank down below, he would not fall, through not being afraid. Therefore fear hinders action.

Objection 3. Further, laziness or sloth is a kind of fear. But laziness hinders action. Therefore fear does too.

On the contrary, The Apostle says (Phil. 2:12): “With fear and trembling work out your salvation”: and he would not say this if fear were a hindrance to a good work. Therefore fear does not hinder a good action.

I answer that, Man’s exterior actions are caused by the soul as first mover, but by the bodily members as instruments. Now action may be hindered both by defect of the instrument, and by defect of the principal mover. On the part of the bodily instruments, fear, considered

in itself, is always apt to hinder exterior action, on account of the outward members being deprived, through fear, of their heat. But on the part of the soul, if the fear be moderate, without much disturbance of the reason, it conduces to working well, in so far as it causes a certain solicitude, and makes a man take counsel and work with greater attention. If, however, fear increases so much as to disturb the reason, it hinders action even on the part of the soul. But of such a fear the Apostle does not speak.

This suffices for the Reply to the First Objection.

Reply to Objection 2. He that falls from a plank placed aloft, suffers a disturbance of his imagination, through fear of the fall that is pictured to his imagination.

Reply to Objection 3. Everyone in fear shuns that which he fears: and therefore, since laziness is a fear of work itself as being toilsome, it hinders work by withdrawing the will from it. But fear of other things conduces to action, in so far as it inclines the will to do that whereby a man escapes from what he fears.

FIRST PART OF THE SECOND PART, QUESTION 45

Of Daring (In Four Articles)

We must now consider daring: under which head there are four points of inquiry:

- (1) Whether daring is contrary to fear?
- (2) How is daring related to hope?
- (3) Of the cause of daring;
- (4) Of its effect.

Whether daring is contrary to fear?

Ia IIae q. 45 a. 1

Objection 1. It would seem that daring is not contrary to fear. For Augustine says (QQ. 83, qu. 31) that “daring is a vice.” Now vice is contrary to virtue. Since, therefore, fear is not a virtue but a passion, it seems that daring is not contrary to fear.

Objection 2. Further, to one thing there is one contrary. But hope is contrary to fear. Therefore daring is not contrary to fear.

Objection 3. Further, every passion excludes its opposite. But fear excludes safety; for Augustine says (Confess. ii, 6) that “fear takes forethought for safety.” Therefore safety is contrary to fear. Therefore daring is not contrary to fear.

On the contrary, The Philosopher says (Rhet. ii, 5) that “daring is contrary to fear.”

I answer that, It is of the essence of contraries to be “farthest removed from one another,” as stated in *Metaph. x, 4*. Now that which is farthest removed from fear, is daring: since fear turns away from the future hurt, on account of its victory over him that fears it; whereas daring turns on threatened danger because of its own victory over that same danger. Consequently it is evident that daring is contrary to fear.

Reply to Objection 1. Anger, daring and all the

names of the passions can be taken in two ways. First, as denoting absolutely movements of the sensitive appetite in respect of some object, good or bad: and thus they are names of passions. Secondly, as denoting besides this movement, a straying from the order of reason: and thus they are names of vices. It is in this sense that Augustine speaks of daring: but we are speaking of it in the first sense.

Reply to Objection 2. To one thing, in the same respect, there are not several contraries; but in different respects nothing prevents one thing having several contraries. Accordingly it has been said above (q. 23, a. 2; q. 40, a. 4) that the irascible passions admit of a twofold contrariety: one, according to the opposition of good and evil, and thus fear is contrary to hope: the other, according to the opposition of approach and withdrawal, and thus daring is contrary to fear, and despair contrary to hope.

Reply to Objection 3. Safety does not denote something contrary to fear, but merely the exclusion of fear: for he is said to be safe, who fears not. Wherefore safety is opposed to fear, as a privation: while daring is opposed thereto as a contrary. And as contrariety implies privation, so daring implies safety.

Whether daring ensues from hope?

Ia IIae q. 45 a. 2

Objection 1. It would seem that daring does not ensue from hope. Because daring regards evil and fearful things, as stated in *Ethic. iii, 7*. But hope regards good things, as stated above (q. 40, a. 1). Therefore they have different objects and are not in the same order. Therefore daring does not ensue from hope.

Objection 2. Further, just as daring is contrary to fear, so is despair contrary to hope. But fear does not ensue from despair: in fact, despair excludes fear, as the Philosopher says (Rhet. ii, 5). Therefore daring does not result from hope.

Objection 3. Further, daring is intent on something good, viz. victory. But it belongs to hope to tend to that which is good and difficult. Therefore daring is the same as hope; and consequently does not result from it.

On the contrary, The Philosopher says (*Ethic. iii,*

8) that “those are hopeful are full of daring.” Therefore it seems that daring ensues from hope.

I answer that, As we have often stated (q. 22, a. 2; q. 35, a. 1; q. 41, a. 1), all these passions belong to the appetitive power. Now every movement of the appetitive power is reducible to one either of pursuit or of avoidance. Again, pursuit or avoidance is of something either by reason of itself or by reason of something else. By reason of itself, good is the object of pursuit, and evil, the object of avoidance: but by reason of something else, evil can be the object of pursuit, through some good attaching to it; and good can be the object of avoidance, through some evil attaching to it. Now that which is by reason of something else, follows that which is by reason of itself. Consequently pursuit of evil follows pursuit of good; and avoidance of good

follows avoidance of evil. Now these four things belong to four passions, since pursuit of good belongs to hope, avoidance of evil to fear, the pursuit of the fearful evil belongs to daring, and the avoidance of good to despair. It follows, therefore, that daring results from hope; since it is in the hope of overcoming the threatening object of fear, that one attacks it boldly. But despair results from fear: since the reason why a man despairs is because he fears the difficulty attaching to the good he should hope for.

Reply to Objection 1. This argument would hold, if good and evil were not co-ordinate objects. But because evil has a certain relation to good, since it comes after good, as privation comes after habit; consequently daring which pursues evil, comes after hope which pursues good.

Reply to Objection 2. Although good, absolutely

speaking, is prior to evil, yet avoidance of evil precedes avoidance of good; just as the pursuit of good precedes the pursuit of evil. Consequently just as hope precedes daring, so fear precedes despair. And just as fear does not always lead to despair, but only when it is intense; so hope does not always lead to daring, save only when it is strong.

Reply to Objection 3. Although the object of daring is an evil to which, in the estimation of the daring man, the good of victory is conjoined; yet daring regards the evil, and hope regards the conjoined good. In like manner despair regards directly the good which it turns away from, while fear regards the conjoined evil. Hence, properly speaking, daring is not a part of hope, but its effect: just as despair is an effect, not a part, of fear. For this reason, too, daring cannot be a principal passion.

Whether some defect is a cause of daring?

Ia IIae q. 45 a. 3

Objection 1. It would seem that some defect is a cause of daring. For the Philosopher says (De Problem. xxvii, 4) that “lovers of wine are strong and daring.” But from wine ensues the effect of drunkenness. Therefore daring is caused by a defect.

Objection 2. Further, the Philosopher says (Rhet. ii, 5) that “those who have no experience of danger are bold.” But want of experience is a defect. Therefore daring is caused by a defect.

Objection 3. Further, those who have suffered wrongs are wont to be daring; “like the beasts when beaten,” as stated in Ethic. iii, 5. But the suffering of wrongs pertains to defect. Therefore daring is caused by a defect.

On the contrary, The Philosopher says (Rhet. ii, 5) that the cause of daring “is the presence in the imagination of the hope that the means of safety are nigh, and that the things to be feared are either non-existent or far off.” But anything pertaining to defect implies either the removal of the means of safety, or the proximity of something to be feared. Therefore nothing pertaining to defect is a cause of daring.

I answer that, As stated above (Aa. 1,2) daring results from hope and is contrary to fear: wherefore whatever is naturally apt to cause hope or banish fear, is a cause of daring. Since, however, fear and hope, and also daring, being passions, consist in a movement of the appetite, and in a certain bodily transmutation; a thing may be considered as the cause of daring in two ways, whether by raising hope, or by banishing fear; in one way, in the part of the appetitive movement; in another way, on the part of the bodily transmutation.

On the part of the appetitive movement which follows apprehension, hope that leads to daring is roused by those things that make us reckon victory as possible. Such things regard either our own power, as bodily strength, experience of dangers, abundance of wealth,

and the like; or they regard the powers of others, such as having a great number of friends or any other means of help, especially if a man trust in the Divine assistance: wherefore “those are more daring, with whom it is well in regard to godlike things,” as the Philosopher says (Rhet. ii, 5). Fear is banished, in this way, by the removal of threatening causes of fear; for instance, by the fact that a man has not enemies, through having harmed nobody, so that he is not aware of any imminent danger; since those especially appear to be threatened by danger, who have harmed others.

On the part of the bodily transmutation, daring is caused through the incitement of hope and the banishment of fear, by those things which raise the temperature about the heart. Wherefore the Philosopher says (De Part. Animal. iii, 4) that “those whose heart is small in size, are more daring; while animals whose heart is large are timid; because the natural heat is unable to give the same degree of temperature to a large as to a small heart; just as a fire does not heat a large house as well as it does a small house.” He says also (De Problem. xxvii, 4), that “those whose lungs contain much blood, are more daring, through the heat in the heart that results therefrom.” He says also in the same passage that “lovers of wine are more daring, on account of the heat of the wine”: hence it has been said above (q. 40, a. 6) that drunkenness conduces to hope, since the heat in the heart banishes fear and raises hope, by reason of the dilatation and enlargement of the heart.

Reply to Objection 1. Drunkenness causes daring, not through being a defect, but through dilating the heart: and again through making a man think greatly of himself.

Reply to Objection 2. Those who have no experience of dangers are more daring, not on account of a defect, but accidentally, i.e. in so far as through being inexperienced they do not know their own failings, nor

the dangers that threaten. Hence it is that the removal of the cause of fear gives rise to daring.

Reply to Objection 3. As the Philosopher says (Rhet. ii, 5) “those who have been wronged are courageous, because they think that God comes to the assis-

tance of those who suffer unjustly.”

Hence it is evident that no defect causes daring except accidentally, i.e. in so far as some excellence attaches thereto, real or imaginary, either in oneself or in another.

Whether the brave are more eager at first than in the midst of danger?

Ia IIae q. 45 a. 4

Objection 1. It would seem that the daring are not more eager at first than in the midst of danger. Because trembling is caused by fear, which is contrary to daring, as stated above (a. 1; q. 44, a. 3). But the daring sometimes tremble at first, as the Philosopher says (De Problem. xxvii, 3). Therefore they are not more eager at first than in the midst of danger.

Objection 2. Further, passion is intensified by an increase in its object: thus since a good is lovable, what is better is yet more lovable. But the object of daring is something difficult. Therefore the greater the difficulty, the greater the daring. But danger is more arduous and difficult when present. It is then therefore that daring is greatest.

Objection 3. Further, anger is provoked by the infliction of wounds. But anger causes daring; for the Philosopher says (Rhet. ii, 5) that “anger makes man bold.” Therefore when man is in the midst of danger and when he is being beaten, then is he most daring.

On the contrary, It is said in Ethic. iii, 7 that “the daring are precipitate and full of eagerness before the danger, yet in the midst of dangers they stand aloof.”

I answer that, Daring, being a movement of the sensitive appetite, follows an apprehension of the sensitive faculty. But the sensitive faculty cannot make comparisons, nor can it inquire into circumstances; its judgment is instantaneous. Now it happens sometimes that it is impossible for a man to take note in an instant of all the difficulties of a certain situation: hence there arises the movement of daring to face the danger; so that when he comes to experience the danger, he feels the difficulty to be greater than he expected, and so gives way.

On the other hand, reason discusses all the difficulties of a situation. Consequently men of fortitude who

face danger according to the judgment of reason, at first seem slack, because they face the danger not from passion but with due deliberation. Yet when they are in the midst of danger, they experience nothing unforeseen, but sometimes the difficulty turns out to be less than they anticipated; wherefore they are more persevering. Moreover, it may be because they face the danger on account of the good of virtue which is the abiding object of their will, however great the danger may prove: whereas men of daring face the danger on account of a mere thought giving rise to hope and banishing fear, as stated above (a. 3).

Reply to Objection 1. Trembling does occur in men of daring, on account of the heat being withdrawn from the outer to the inner parts of the body, as occurs also in those who are afraid. But in men of daring the heat withdraws to the heart; whereas in those who are afraid, it withdraws to the inferior parts.

Reply to Objection 2. The object of love is good simply, wherefore if it be increased, love is increased simply. But the object of daring is a compound of good and evil; and the movement of daring towards evil presupposes the movement of hope towards good. If, therefore, so much difficulty be added to the danger that it overcomes hope, the movement of daring does not ensue, but fails. But if the movement of daring does ensue, the greater the danger, the greater is the daring considered to be.

Reply to Objection 3. Hurt does not give rise to anger unless there be some kind of hope, as we shall see later on (q. 46, a. 1). Consequently if the danger be so great as to banish all hope of victory, anger does not ensue. It is true, however, that if anger does ensue, there will be greater daring.

Objection 1. It would seem that daring is not contrary to fear. For Augustine says (QQ. 83, qu. 31) that “daring is a vice.” Now vice is contrary to virtue. Since, therefore, fear is not a virtue but a passion, it seems that daring is not contrary to fear.

Objection 2. Further, to one thing there is one contrary. But hope is contrary to fear. Therefore daring is not contrary to fear.

Objection 3. Further, every passion excludes its opposite. But fear excludes safety; for Augustine says (Confess. ii, 6) that “fear takes forethought for safety.” Therefore safety is contrary to fear. Therefore daring is not contrary to fear.

On the contrary, The Philosopher says (Rhet. ii, 5) that “daring is contrary to fear.”

I answer that, It is of the essence of contraries to be “farthest removed from one another,” as stated in *Metaph. x, 4*. Now that which is farthest removed from fear, is daring: since fear turns away from the future hurt, on account of its victory over him that fears it; whereas daring turns on threatened danger because of its own victory over that same danger. Consequently it is evident that daring is contrary to fear.

Reply to Objection 1. Anger, daring and all the

names of the passions can be taken in two ways. First, as denoting absolutely movements of the sensitive appetite in respect of some object, good or bad: and thus they are names of passions. Secondly, as denoting besides this movement, a straying from the order of reason: and thus they are names of vices. It is in this sense that Augustine speaks of daring: but we are speaking of it in the first sense.

Reply to Objection 2. To one thing, in the same respect, there are not several contraries; but in different respects nothing prevents one thing having several contraries. Accordingly it has been said above (q. 23, a. 2; q. 40, a. 4) that the irascible passions admit of a twofold contrariety: one, according to the opposition of good and evil, and thus fear is contrary to hope: the other, according to the opposition of approach and withdrawal, and thus daring is contrary to fear, and despair contrary to hope.

Reply to Objection 3. Safety does not denote something contrary to fear, but merely the exclusion of fear: for he is said to be safe, who fears not. Wherefore safety is opposed to fear, as a privation: while daring is opposed thereto as a contrary. And as contrariety implies privation, so daring implies safety.

Objection 1. It would seem that daring does not ensue from hope. Because daring regards evil and fearful things, as stated in *Ethic.* iii, 7. But hope regards good things, as stated above (q. 40, a. 1). Therefore they have different objects and are not in the same order. Therefore daring does not ensue from hope.

Objection 2. Further, just as daring is contrary to fear, so is despair contrary to hope. But fear does not ensue from despair: in fact, despair excludes fear, as the Philosopher says (*Rhet.* ii, 5). Therefore daring does not result from hope.

Objection 3. Further, daring is intent on something good, viz. victory. But it belongs to hope to tend to that which is good and difficult. Therefore daring is the same as hope; and consequently does not result from it.

On the contrary, The Philosopher says (*Ethic.* iii, 8) that “those are hopeful are full of daring.” Therefore it seems that daring ensues from hope.

I answer that, As we have often stated (q. 22, a. 2; q. 35, a. 1; q. 41, a. 1), all these passions belong to the appetitive power. Now every movement of the appetitive power is reducible to one either of pursuit or of avoidance. Again, pursuit or avoidance is of something either by reason of itself or by reason of something else. By reason of itself, good is the object of pursuit, and evil, the object of avoidance: but by reason of something else, evil can be the object of pursuit, through some good attaching to it; and good can be the object of avoidance, through some evil attaching to it. Now that which is by reason of something else, follows that which is by reason of itself. Consequently pursuit of evil follows pursuit of good; and avoidance of good follows avoidance of evil. Now these four things belong

to four passions, since pursuit of good belongs to hope, avoidance of evil to fear, the pursuit of the fearful evil belongs to daring, and the avoidance of good to despair. It follows, therefore, that daring results from hope; since it is in the hope of overcoming the threatening object of fear, that one attacks it boldly. But despair results from fear: since the reason why a man despairs is because he fears the difficulty attaching to the good he should hope for.

Reply to Objection 1. This argument would hold, if good and evil were not co-ordinate objects. But because evil has a certain relation to good, since it comes after good, as privation comes after habit; consequently daring which pursues evil, comes after hope which pursues good.

Reply to Objection 2. Although good, absolutely speaking, is prior to evil, yet avoidance of evil precedes avoidance of good; just as the pursuit of good precedes the pursuit of evil. Consequently just as hope precedes daring, so fear precedes despair. And just as fear does not always lead to despair, but only when it is intense; so hope does not always lead to daring, save only when it is strong.

Reply to Objection 3. Although the object of daring is an evil to which, in the estimation of the daring man, the good of victory is conjoined; yet daring regards the evil, and hope regards the conjoined good. In like manner despair regards directly the good which it turns away from, while fear regards the conjoined evil. Hence, properly speaking, daring is not a part of hope, but its effect: just as despair is an effect, not a part, of fear. For this reason, too, daring cannot be a principal passion.

Objection 1. It would seem that some defect is a cause of daring. For the Philosopher says (*De Problem.* xxvii, 4) that “lovers of wine are strong and daring.” But from wine ensues the effect of drunkenness. Therefore daring is caused by a defect.

Objection 2. Further, the Philosopher says (*Rhet.* ii, 5) that “those who have no experience of danger are bold.” But want of experience is a defect. Therefore daring is caused by a defect.

Objection 3. Further, those who have suffered wrongs are wont to be daring; “like the beasts when beaten,” as stated in *Ethic.* iii, 5. But the suffering of wrongs pertains to defect. Therefore daring is caused by a defect.

On the contrary, The Philosopher says (*Rhet.* ii, 5) that the cause of daring “is the presence in the imagination of the hope that the means of safety are nigh, and that the things to be feared are either non-existent or far off.” But anything pertaining to defect implies either the removal of the means of safety, or the proximity of something to be feared. Therefore nothing pertaining to defect is a cause of daring.

I answer that, As stated above (*Aa.* 1,2) daring results from hope and is contrary to fear: wherefore whatever is naturally apt to cause hope or banish fear, is a cause of daring. Since, however, fear and hope, and also daring, being passions, consist in a movement of the appetite, and in a certain bodily transmutation; a thing may be considered as the cause of daring in two ways, whether by raising hope, or by banishing fear; in one way, in the part of the appetitive movement; in another way, on the part of the bodily transmutation.

On the part of the appetitive movement which follows apprehension, hope that leads to daring is roused by those things that make us reckon victory as possible. Such things regard either our own power, as bodily strength, experience of dangers, abundance of wealth, and the like; or they regard the powers of others, such as having a great number of friends or any other means of help, especially if a man trust in the Divine assistance: wherefore “those are more daring, with whom it is well in regard to godlike things,” as the Philoso-

pher says (*Rhet.* ii, 5). Fear is banished, in this way, by the removal of threatening causes of fear; for instance, by the fact that a man has not enemies, through having harmed nobody, so that he is not aware of any imminent danger; since those especially appear to be threatened by danger, who have harmed others.

On the part of the bodily transmutation, daring is caused through the incitement of hope and the banishment of fear, by those things which raise the temperature about the heart. Wherefore the Philosopher says (*De Part. Animal.* iii, 4) that “those whose heart is small in size, are more daring; while animals whose heart is large are timid; because the natural heat is unable to give the same degree of temperature to a large as to a small heart; just as a fire does not heat a large house as well as it does a small house.” He says also (*De Problem.* xxvii, 4), that “those whose lungs contain much blood, are more daring, through the heat in the heart that results therefrom.” He says also in the same passage that “lovers of wine are more daring, on account of the heat of the wine”: hence it has been said above (q. 40, a. 6) that drunkenness conduces to hope, since the heat in the heart banishes fear and raises hope, by reason of the dilatation and enlargement of the heart.

Reply to Objection 1. Drunkenness causes daring, not through being a defect, but through dilating the heart: and again through making a man think greatly of himself.

Reply to Objection 2. Those who have no experience of dangers are more daring, not on account of a defect, but accidentally, i.e. in so far as through being inexperienced they do not know their own failings, nor the dangers that threaten. Hence it is that the removal of the cause of fear gives rise to daring.

Reply to Objection 3. As the Philosopher says (*Rhet.* ii, 5) “those who have been wronged are courageous, because they think that God comes to the assistance of those who suffer unjustly.”

Hence it is evident that no defect causes daring except accidentally, i.e. in so far as some excellence attaches thereto, real or imaginary, either in oneself or in another.

Objection 1. It would seem that the daring are not more eager at first than in the midst of danger. Because trembling is caused by fear, which is contrary to daring, as stated above (a. 1; q. 44, a. 3). But the daring sometimes tremble at first, as the Philosopher says (*De Problem.* xxvii, 3). Therefore they are not more eager at first than in the midst of danger.

Objection 2. Further, passion is intensified by an increase in its object: thus since a good is lovable, what is better is yet more lovable. But the object of daring is something difficult. Therefore the greater the difficulty, the greater the daring. But danger is more arduous and difficult when present. It is then therefore that daring is greatest.

Objection 3. Further, anger is provoked by the infliction of wounds. But anger causes daring; for the Philosopher says (*Rhet.* ii, 5) that “anger makes man bold.” Therefore when man is in the midst of danger and when he is being beaten, then is he most daring.

On the contrary, It is said in *Ethic.* iii, 7 that “the daring are precipitate and full of eagerness before the danger, yet in the midst of dangers they stand aloof.”

I answer that, Daring, being a movement of the sensitive appetite, follows an apprehension of the sensitive faculty. But the sensitive faculty cannot make comparisons, nor can it inquire into circumstances; its judgment is instantaneous. Now it happens sometimes that it is impossible for a man to take note in an instant of all the difficulties of a certain situation: hence there arises the movement of daring to face the danger; so that when he comes to experience the danger, he feels the difficulty to be greater than he expected, and so gives way.

On the other hand, reason discusses all the difficulties of a situation. Consequently men of fortitude who

face danger according to the judgment of reason, at first seem slack, because they face the danger not from passion but with due deliberation. Yet when they are in the midst of danger, they experience nothing unforeseen, but sometimes the difficulty turns out to be less than they anticipated; wherefore they are more persevering. Moreover, it may be because they face the danger on account of the good of virtue which is the abiding object of their will, however great the danger may prove: whereas men of daring face the danger on account of a mere thought giving rise to hope and banishing fear, as stated above (a. 3).

Reply to Objection 1. Trembling does occur in men of daring, on account of the heat being withdrawn from the outer to the inner parts of the body, as occurs also in those who are afraid. But in men of daring the heat withdraws to the heart; whereas in those who are afraid, it withdraws to the inferior parts.

Reply to Objection 2. The object of love is good simply, wherefore if it be increased, love is increased simply. But the object of daring is a compound of good and evil; and the movement of daring towards evil presupposes the movement of hope towards good. If, therefore, so much difficulty be added to the danger that it overcomes hope, the movement of daring does not ensue, but fails. But if the movement of daring does ensue, the greater the danger, the greater is the daring considered to be.

Reply to Objection 3. Hurt does not give rise to anger unless there be some kind of hope, as we shall see later on (q. 46, a. 1). Consequently if the danger be so great as to banish all hope of victory, anger does not ensue. It is true, however, that if anger does ensue, there will be greater daring.

FIRST PART OF THE SECOND PART, QUESTION 46

Of Anger, in Itself (In Eight Articles)

We must now consider anger: and (1) anger in itself; (2) the cause of anger and its remedy; (3) the effect of anger.

Under the first head there are eight points of inquiry:

- (1) Whether anger is a special passion?
- (2) Whether the object of anger is good or evil?
- (3) Whether anger is in the concupiscible faculty?
- (4) Whether anger is accompanied by an act of reason?
- (5) Whether anger is more natural than desire?
- (6) Whether anger is more grievous than hatred?
- (7) Whether anger is only towards those with whom we have a relation of justice?
- (8) Of the species of anger.

Whether anger is a special passion?

Ia IIae q. 46 a. 1

Objection 1. It would seem that anger is not a special passion. For the irascible power takes its name from anger [ira]. But there are several passions in this power, not only one. Therefore anger is not one special passion.

Objection 2. Further, to every special passion there is a contrary passion; as is evident by going through them one by one. But no passion is contrary to anger, as stated above (q. 23, a. 3). Therefore anger is not a special passion.

Objection 3. Further, one special passion does not include another. But anger includes several passions: since it accompanies sorrow, pleasure, and hope, as the Philosopher states (Rhet. ii, 2). Therefore anger is not a special passion.

On the contrary, Damascene (De Fide Orth. ii, 16) calls anger a special passion: and so does Cicero (De Quaest. Tusc. iv, 7).

I answer that, A thing is said to be general in two ways. First, by predication; thus “animal” is general in respect of all animals. Secondly, by causality; thus the sun is the general cause of all things generated here below, according to Dionysius (Div. Nom. iv). Because just as a genus contains potentially many differences, according to a likeness of matter; so an efficient cause contains many effects according to its active power. Now it happens that an effect is produced by the concurrence of various causes; and since every cause remains somewhat in its effect, we may say that, in yet a third way, an effect which is due to the concurrence of several causes, has a certain generality, inasmuch as several causes are, in a fashion, actually existing therein.

Accordingly in the first way, anger is not a general

passion but is condivided with the other passions, as stated above (q. 23, a. 4). In like manner, neither is it in the second way: since it is not a cause of the other passions. But in this way, love may be called a general passion, as Augustine declares (De Civ. Dei xiv, 7,9), because love is the primary root of all the other passions, as stated above (q. 27, a. 4). But, in a third way, anger may be called a general passion, inasmuch as it is caused by a concurrence of several passions. Because the movement of anger does not arise save on account of some pain inflicted, and unless there be desire and hope of revenge: for, as the Philosopher says (Rhet. ii, 2), “the angry man hopes to punish; since he craves for revenge as being possible.” Consequently if the person, who inflicted the injury, excel very much, anger does not ensue, but only sorrow, as Avicenna states (De Anima iv, 6).

Reply to Objection 1. The irascible power takes its name from “ira” [anger], not because every movement of that power is one of anger; but because all its movements terminate in anger; and because, of all these movements, anger is the most patent.

Reply to Objection 2. From the very fact that anger is caused by contrary passions, i.e. by hope, which is of good, and by sorrow, which is of evil, it includes in itself contrariety: and consequently it has no contrary outside itself. Thus also in mixed colors there is no contrariety, except that of the simple colors from which they are made.

Reply to Objection 3. Anger includes several passions, not indeed as a genus includes several species; but rather according to the inclusion of cause and effect.

Objection 1. It would seem that the object of anger is evil. For Gregory of Nyssa says* that anger is “the sword-bearer of desire,” inasmuch, to wit, as it assails whatever obstacle stands in the way of desire. But an obstacle has the character of evil. Therefore anger regards evil as its object.

Objection 2. Further, anger and hatred agree in their effect, since each seeks to inflict harm on another. But hatred regards evil as its object, as stated above (q. 29, a. 1). Therefore anger does also.

Objection 3. Further, anger arises from sorrow; wherefore the Philosopher says (Ethic. viii, 6) that “anger acts with sorrow.” But evil is the object of sorrow. Therefore it is also the object of anger.

On the contrary, Augustine says (Confess. ii, 6) that “anger craves for revenge.” But the desire for revenge is a desire for something good: since revenge belongs to justice. Therefore the object of anger is good.

Moreover, anger is always accompanied by hope, wherefore it causes pleasure, as the Philosopher says (Rhet. ii, 2). But the object of hope and of pleasure is good. Therefore good is also the object of anger.

I answer that, The movement of the appetitive power follows an act of the apprehensive power. Now the apprehensive power apprehends a thing in two ways. First, by way of an incomplex object, as when we understand what a man is; secondly, by way of a complex object, as when we understand that whiteness is in a man. Consequently in each of these ways the appetitive power can tend to both good and evil: by way of a simple and incomplex object, when the appetite simply follows and adheres to good, or recoils from evil: and such

movements are desire, hope, pleasure, sorrow, and so forth: by way of a complex object, as when the appetite is concerned with some good or evil being in, or being done to, another, either seeking this or recoiling from it. This is evident in the case of love and hatred: for we love someone, in so far as we wish some good to be in him; and we hate someone, in so far as we wish some evil to be in him. It is the same with anger; for when a man is angry, he wishes to be avenged on someone. Hence the movement of anger has a twofold tendency: viz. to vengeance itself, which it desires and hopes for as being a good, wherefore it takes pleasure in it; and to the person on whom it seeks vengeance, as to something contrary and hurtful, which bears the character of evil.

We must, however, observe a twofold difference in this respect, between anger on the one side, and hatred and love on the other. The first difference is that anger always regards two objects: whereas love and hatred sometimes regard but one object, as when a man is said to love wine or something of the kind, or to hate it. The second difference is, that both the objects of love are good: since the lover wishes good to someone, as to something agreeable to himself: while both the objects of hatred bear the character of evil: for the man who hates, wishes evil to someone, as to something disagreeable to him. Whereas anger regards one object under the aspect of evil, viz. the noxious person, on whom it seeks to be avenged. Consequently it is a passion somewhat made up of contrary passions.

This suffices for the Replies to the Objections.

Objection 1. It would seem that anger is in the concupiscible faculty. For Cicero says (De Quaest. Tusc. iv, 9) that anger is a kind of “desire.” But desire is in the concupiscible faculty. Therefore anger is too.

Objection 2. Further, Augustine says in his Rule, that “anger grows into hatred”: and Cicero says (De Quaest. Tusc. iv, 9) that “hatred is inveterate anger.” But hatred, like love, is a concupiscible passion. Therefore anger is in the concupiscible faculty.

Objection 3. Further, Damascene (De Fide Orth. ii, 16) and Gregory of Nyssa† say that “anger is made up of sorrow and desire.” Both of these are in the concupiscible faculty. Therefore anger is a concupiscible passion.

On the contrary, The concupiscible is distinct from the irascible faculty. If, therefore, anger were in the concupiscible power, the irascible would not take its name from it.

I answer that, As stated above (q. 23, a. 1), the pas-

sions of the irascible part differ from the passions of the concupiscible faculty, in that the objects of the concupiscible passions are good and evil absolutely considered, whereas the objects of the irascible passions are good and evil in a certain elevation or arduousness. Now it has been stated (a. 2) that anger regards two objects: viz. the vengeance that it seeks; and the person on whom it seeks vengeance; and in respect of both, anger requires a certain arduousness: for the movement of anger does not arise, unless there be some magnitude about both these objects; since “we make no ado about things that are naught or very minute,” as the Philosopher observes (Rhet. ii, 2). It is therefore evident that anger is not in the concupiscible, but in the irascible faculty.

Reply to Objection 1. Cicero gives the name of desire to any kind of craving for a future good, without discriminating between that which is arduous and that which is not. Accordingly he reckons anger as a kind of

* Nemesius, De Nat. Hom. xxi. † Nemesius, De Nat. Hom. xxi.

desire, inasmuch as it is a desire of vengeance. In this sense, however, desire is common to the irascible and concupiscible faculties.

Reply to Objection 2. Anger is said to grow into hatred, not as though the same passion which at first was anger, afterwards becomes hatred by becoming inveterate; but by a process of causality. For anger when

it lasts a long time engenders hatred.

Reply to Objection 3. Anger is said to be composed of sorrow and desire, not as though they were its parts, but because they are its causes: and it has been said above (q. 25, a. 2) that the concupiscible passions are the causes of the irascible passions.

Whether anger requires an act of reason?

Ia IIae q. 46 a. 4

Objection 1. It would seem that anger does not require an act of reason. For, since anger is a passion, it is in the sensitive appetite. But the sensitive appetite follows an apprehension, not of reason, but of the sensitive faculty. Therefore anger does not require an act of reason.

Objection 2. Further, dumb animals are devoid of reason: and yet they are seen to be angry. Therefore anger does not require an act of reason.

Objection 3. Further, drunkenness fetters the reason; whereas it is conducive to anger. Therefore anger does not require an act of reason.

On the contrary, The Philosopher says (Ethic. vii, 6) that “anger listens to reason somewhat.”

I answer that, As stated above (a. 2), anger is a desire for vengeance. Now vengeance implies a comparison between the punishment to be inflicted and the hurt done; wherefore the Philosopher says (Ethic. vii, 6) that “anger, as if it had drawn the inference that it ought to quarrel with such a person, is therefore immediately exasperated.” Now to compare and to draw an inference is an act of reason. Therefore anger, in a fashion, requires an act of reason.

Reply to Objection 1. The movement of the appetitive power may follow an act of reason in two ways. In the first way, it follows the reason in so far as the

reason commands: and thus the will follows reason, wherefore it is called the rational appetite. In another way, it follows reason in so far as the reason denounces, and thus anger follows reason. For the Philosopher says (De Problem. xxviii, 3) that “anger follows reason, not in obedience to reason’s command, but as a result of reason’s denouncing the injury.” Because the sensitive appetite is subject to the reason, not immediately but through the will.

Reply to Objection 2. Dumb animals have a natural instinct imparted to them by the Divine Reason, in virtue of which they are gifted with movements, both internal and external, like unto rational movements, as stated above (q. 40, a. 3).

Reply to Objection 3. As stated in Ethic. vii, 6, “anger listens somewhat to reason” in so far as reason denounces the injury inflicted, “but listens not perfectly,” because it does not observe the rule of reason as to the measure of vengeance. Anger, therefore, requires an act of reason; and yet proves a hindrance to reason. Wherefore the Philosopher says (De Problem. iii, 2,27) that those who are very drunk, so as to be incapable of the use of reason, do not get angry: but those who are slightly drunk, do get angry, through being still able, though hampered, to form a judgment of reason.

Whether anger is more natural than desire?

Ia IIae q. 46 a. 5

Objection 1. It would seem that anger is not more natural than desire. Because it is proper to man to be by nature a gentle animal. But “gentleness is contrary to anger,” as the Philosopher states (Rhet. ii, 3). Therefore anger is no more natural than desire, in fact it seems to be altogether unnatural to man.

Objection 2. Further, reason is contrasted with nature: since those things that act according to reason, are not said to act according to nature. Now “anger requires an act of reason, but desire does not,” as stated in Ethic. vii, 6. Therefore desire is more natural than anger.

Objection 3. Further, anger is a craving for vengeance: while desire is a craving for those things especially which are pleasant to the touch, viz. for pleasures of the table and for sexual pleasures. But these things are more natural to man than vengeance. Therefore desire is more natural than anger.

On the contrary, The Philosopher says (Ethic. vii,

6) that “anger is more natural than desire.”

I answer that, By “natural” we mean that which is caused by nature, as stated in Phys. ii, 1. Consequently the question as to whether a particular passion is more or less natural cannot be decided without reference to the cause of that passion. Now the cause of a passion, as stated above (q. 36, a. 2), may be considered in two ways: first, on the part of the object; secondly, on the part of the subject. If then we consider the cause of anger and of desire, on the part of the object, thus desire, especially of pleasures of the table, and of sexual pleasures, is more natural than anger; in so far as these pleasures are more natural to man than vengeance.

If, however, we consider the cause of anger on the part of the subject, thus anger, in a manner, is more natural; and, in a manner, desire is more natural. Because the nature of an individual man may be considered either as to the generic, or as to the specific nature, or

again as to the particular temperament of the individual. If then we consider the generic nature, i.e. the nature of this man considered as an animal; thus desire is more natural than anger; because it is from this very generic nature that man is inclined to desire those things which tend to preserve in him the life both of the species and of the individual. If, however, we consider the specific nature, i.e. the nature of this man as a rational being; then anger is more natural to man than desire, in so far as anger follows reason more than desire does. Wherefore the Philosopher says (*Ethic.* iv, 5) that “revenge” which pertains to anger “is more natural to man than meekness”: for it is natural to everything to rise up against things contrary and hurtful. And if we consider the nature of the individual, in respect of his particular temperament, thus anger is more natural than desire; for the reason that anger is prone to ensue from the natural tendency to anger, more than desire, or any other passion, is to ensue from a natural tendency to desire, which tendencies result from a man’s individual temperament. Because disposition to anger is due to a bilious temperament; and of all the humors, the bile moves quickest; for it is like fire. Consequently he that is temperamentally disposed to anger is sooner incensed with anger, than he that is temperamentally disposed to desire, is inflamed with desire: and for this reason

the Philosopher says (*Ethic.* vii, 6) that a disposition to anger is more liable to be transmitted from parent to child, than a disposition to desire.

Reply to Objection 1. We may consider in man both the natural temperament on the part of the body, and the reason. On the part of the bodily temperament, a man, considered specifically, does not naturally excel others either in anger or in any other passion, on account of the moderation of his temperament. But other animals, for as much as their temperament recedes from this moderation and approaches to an extreme disposition, are naturally disposed to some excess of passion, such as the lion in daring, the hound in anger, the hare in fear, and so forth. On the part of reason, however, it is natural to man, both to be angry and to be gentle: in so far as reason somewhat causes anger, by denouncing the injury which causes anger; and somewhat appeases anger, in so far as the angry man “does not listen perfectly to the command of reason,” as stated above (a. 4, ad 3).

Reply to Objection 2. Reason itself belongs to the nature of man: wherefore from the very fact that anger requires an act of reason, it follows that it is, in a manner, natural to man.

Reply to Objection 3. This argument regards anger and desire on the part of the object.

Whether anger is more grievous than hatred?

Ia IIae q. 46 a. 6

Objection 1. It would seem that anger is more grievous than hatred. For it is written (*Prov.* 27:4) that “anger hath no mercy, nor fury when it breaketh forth.” But hatred sometimes has mercy. Therefore anger is more grievous than hatred.

Objection 2. Further, it is worse to suffer evil and to grieve for it, than merely to suffer it. But when a man hates, he is contented if the object of his hatred suffer evil: whereas the angry man is not satisfied unless the object of his anger know it and be aggrieved thereby, as the Philosopher says (*Rhet.* ii, 4). Therefore, anger is more grievous than hatred.

Objection 3. Further, a thing seems to be so much the more firm according as more things concur to set it up: thus a habit is all the more settled through being caused by several acts. But anger is caused by the concurrence of several passions, as stated above (a. 1): whereas hatred is not. Therefore anger is more settled and more grievous than hatred.

On the contrary, Augustine, in his *Rule*, compares hatred to “a beam,” but anger to “a mote.”

I answer that, The species and nature of a passion are taken from its object. Now the object of anger is the same in substance as the object of hatred; since, just as the hater wishes evil to him whom he hates, so does the angry man wish evil to him with whom he is angry. But there is a difference of aspect: for the hater wishes evil to his enemy, as evil, whereas the angry man wishes evil

to him with whom he is angry, not as evil but in so far as it has an aspect of good, that is, in so far as he reckons it as just, since it is a means of vengeance. Wherefore also it has been said above (a. 2) that hatred implies application of evil to evil, whereas anger denotes application of good to evil. Now it is evident that to seek evil under the aspect of justice, is a lesser evil, than simply to seek evil to someone. Because to wish evil to someone under the aspect of justice, may be according to the virtue of justice, if it be in conformity with the order of reason; and anger fails only in this, that it does not obey the precept of reason in taking vengeance. Consequently it is evident that hatred is far worse and graver than anger.

Reply to Objection 1. In anger and hatred two points may be considered: namely, the thing desired, and the intensity of the desire. As to the thing desired, anger has more mercy than hatred has. For since hatred desires another’s evil for evil’s sake, it is satisfied with no particular measure of evil: because those things that are desired for their own sake, are desired without measure, as the Philosopher states (*Polit.* i, 3), instancing a miser with regard to riches. Hence it is written (*Ecclus.* 12:16): “An enemy...if he find an opportunity, will not be satisfied with blood.” Anger, on the other hand, seeks evil only under the aspect of a just means of vengeance. Consequently when the evil inflicted goes beyond the measure of justice according to the estimate of the angry man, then he has mercy. Wherefore the

Philosopher says (Rhet. ii, 4) that “the angry man is appeased if many evils befall, whereas the hater is never appeased.”

As to the intensity of the desire, anger excludes mercy more than hatred does; because the movement of anger is more impetuous, through the heating of the bile. Hence the passage quoted continues: “Who can bear the violence of one provoked?”

Reply to Objection 2. As stated above, an angry man wishes evil to someone, in so far as this evil is a means of just vengeance. Now vengeance is wrought by the infliction of a punishment: and the nature of punishment consists in being contrary to the will, painful, and inflicted for some fault. Consequently an angry man desires this, that the person whom he is hurting, may feel it and be in pain, and know that this has befallen him on account of the harm he has done the other. The hater, on the other hand, cares not for all this, since he desires an-

other’s evil as such. It is not true, however, that an evil is worse through giving pain: because “injustice and imprudence, although evil,” yet, being voluntary, “do not grieve those in whom they are,” as the Philosopher observes (Rhet. ii, 4).

Reply to Objection 3. That which proceeds from several causes, is more settled when these causes are of one kind: but it may be that one cause prevails over many others. Now hatred ensues from a more lasting cause than anger does. Because anger arises from an emotion of the soul due to the wrong inflicted; whereas hatred ensues from a disposition in a man, by reason of which he considers that which he hates to be contrary and hurtful to him. Consequently, as passion is more transitory than disposition or habit, so anger is less lasting than hatred; although hatred itself is a passion ensuing from this disposition. Hence the Philosopher says (Rhet. ii, 4) that “hatred is more incurable than anger.”

Whether anger is only towards those to whom one has an obligation of justice?

Ia IIae q. 46 a. 7

Objection 1. It would seem that anger is not only towards those to whom one has an obligation of justice. For there is no justice between man and irrational beings. And yet sometimes one is angry with irrational beings; thus, out of anger, a writer throws away his pen, or a rider strikes his horse. Therefore anger is not only towards those to whom one has an obligation of justice.

Objection 2. Further, “there is no justice towards oneself. . . nor is there justice towards one’s own” (Ethic. v, 6). But sometimes a man is angry with himself; for instance, a penitent, on account of his sin; hence it is written (Ps. 4:5): “Be ye angry and sin not.” Therefore anger is not only towards those with whom one has a relation of justice.

Objection 3. Further, justice and injustice can be of one man towards an entire class, or a whole community: for instance, when the state injures an individual. But anger is not towards a class but only towards an individual, as the Philosopher states (Rhet. ii, 4). Therefore properly speaking, anger is not towards those with whom one is in relation of justice or injustice.

The contrary, however, may be gathered from the Philosopher (Rhet. ii, 2,3).

I answer that, As stated above (a. 6), anger desires evil as being a means of just vengeance. Consequently, anger is towards those to whom we are just or unjust: since vengeance is an act of justice, and wrong-doing is an act of injustice. Therefore both on the part of the cause, viz. the harm done by another, and on the part of the vengeance sought by the angry man, it is evident that anger concerns those to whom one is just or unjust.

Reply to Objection 1. As stated above (a. 4, ad 2), anger, though it follows an act of reason, can nevertheless be in dumb animals that are devoid of reason, in so far as through their natural instinct they are moved

by their imagination to something like rational action. Since then in man there is both reason and imagination, the movement of anger can be aroused in man in two ways. First, when only his imagination denounces the injury: and, in this way, man is aroused to a movement of anger even against irrational and inanimate beings, which movement is like that which occurs in animals against anything that injures them. Secondly, by the reason denouncing the injury: and thus, according to the Philosopher (Rhet. ii, 3), “it is impossible to be angry with insensible things, or with the dead”: both because they feel no pain, which is, above all, what the angry man seeks in those with whom he is angry: and because there is no question of vengeance on them, since they can do us no harm.

Reply to Objection 2. As the Philosopher says (Ethic. v, 11), “metaphorically speaking there is a certain justice and injustice between a man and himself,” in so far as the reason rules the irascible and concupiscible parts of the soul. And in this sense a man is said to be avenged on himself, and consequently, to be angry with himself. But properly, and in accordance with the nature of things, a man is never angry with himself.

Reply to Objection 3. The Philosopher (Rhet. ii, 4) assigns as one difference between hatred and anger, that “hatred may be felt towards a class, as we hate the entire class of thieves; whereas anger is directed only towards an individual.” The reason is that hatred arises from our considering a quality as disagreeing with our disposition; and this may refer to a thing in general or in particular. Anger, on the other hand, ensues from someone having injured us by his action. Now all actions are the deeds of individuals: and consequently anger is always pointed at an individual. When the whole state hurts us, the whole state is reckoned as one individual*.

* Cf. q. 29, a. 6

Objection 1. It would seem that Damascene (De Fide Orth. ii, 16) unsuitably assigns three species of anger—“wrath,” “ill-will” and “rancor.” For no genus derives its specific differences from accidents. But these three are diversified in respect of an accident: because “the beginning of the movement of anger is called wrath *cholos*, if anger continue it is called ill-will *menis*; while rancor *kotos* is anger waiting for an opportunity of vengeance.” Therefore these are not different species of anger.

Objection 2. Further, Cicero says (De Quaest. Tusc. iv, 9) that “excandescencia [irascibility] is what the Greeks call *thymosis*, and is a kind of anger that arises and subsides intermittently”; while according to Damascene *thymosis*, is the same as the Greek *kotos* [rancor]. Therefore *kotos* does not bide its time for taking vengeance, but in course of time spends itself.

Objection 3. Further, Gregory (Moral. xxi, 4) gives three degrees of anger, namely, “anger without utterance, anger with utterance, and anger with perfection of speech,” corresponding to the three degrees mentioned by Our Lord (Mat. 5:22): “Whosoever is angry with his brother” [thus implying “anger without utterance”], and then, “whosoever shall say to his brother, ‘Raca’” [implying “anger with utterance yet without full expression”], and lastly, “whosoever shall say ‘Thou fool’” [where we have “perfection of speech”]. Therefore Damascene’s division is imperfect, since it takes no account of utterance.

On the contrary, stands the authority of Damascene (De Fide Orth. ii, 16) and Gregory of Nyssa*.

I answer that, The species of anger given by Dama-

scene and Gregory of Nyssa are taken from those things which give increase to anger. This happens in three ways. First from facility of the movement itself, and he calls this kind of anger *cholos* [bile] because it quickly aroused. Secondly, on the part of the grief that causes anger, and which dwells some time in the memory; this belongs to *menis* [ill-will] which is derived from *menein* [to dwell]. Thirdly, on the part of that which the angry man seeks, viz. vengeance; and this pertains to *kotos* [rancor] which never rests until it is avenged[†]. Hence the Philosopher (Ethic. iv, 5) calls some angry persons *akrocholoï* [choleric], because they are easily angered; some he calls *pikroï* [bitter], because they retain their anger for a long time; and some he calls *chalepoi* [ill-tempered], because they never rest until they have retaliated[‡].

Reply to Objection 1. All those things which give anger some kind of perfection are not altogether accidental to anger; and consequently nothing prevents them from causing a certain specific difference thereof.

Reply to Objection 2. Irascibility, which Cicero mentions, seems to pertain to the first species of anger, which consists in a certain quickness of temper, rather than to rancor [furor]. And there is no reason why the Greek *thymosis*, which is denoted by the Latin “furor,” should not signify both quickness to anger, and firmness of purpose in being avenged.

Reply to Objection 3. These degrees are distinguished according to various effects of anger; and not according to degrees of perfection in the very movement of anger.

* Nemesius, De Nat. Hom. xxi. † Eph. 4:31: “Let all bitterness and anger and indignation... be put away from you.” ‡ Cf. Ia Ilae, q. 158, a. 5

Objection 1. It would seem that anger is not a special passion. For the irascible power takes its name from anger [ira]. But there are several passions in this power, not only one. Therefore anger is not one special passion.

Objection 2. Further, to every special passion there is a contrary passion; as is evident by going through them one by one. But no passion is contrary to anger, as stated above (q. 23, a. 3). Therefore anger is not a special passion.

Objection 3. Further, one special passion does not include another. But anger includes several passions: since it accompanies sorrow, pleasure, and hope, as the Philosopher states (Rhet. ii, 2). Therefore anger is not a special passion.

On the contrary, Damascene (De Fide Orth. ii, 16) calls anger a special passion: and so does Cicero (De Quaest. Tusc. iv, 7).

I answer that, A thing is said to be general in two ways. First, by predication; thus “animal” is general in respect of all animals. Secondly, by causality; thus the sun is the general cause of all things generated here below, according to Dionysius (Div. Nom. iv). Because just as a genus contains potentially many differences, according to a likeness of matter; so an efficient cause contains many effects according to its active power. Now it happens that an effect is produced by the concurrence of various causes; and since every cause remains somewhat in its effect, we may say that, in yet a third way, an effect which is due to the concurrence of several causes, has a certain generality, inasmuch as several causes are, in a fashion, actually existing therein.

Accordingly in the first way, anger is not a general

passion but is convided with the other passions, as stated above (q. 23, a. 4). In like manner, neither is it in the second way: since it is not a cause of the other passions. But in this way, love may be called a general passion, as Augustine declares (De Civ. Dei xiv, 7,9), because love is the primary root of all the other passions, as stated above (q. 27, a. 4). But, in a third way, anger may be called a general passion, inasmuch as it is caused by a concurrence of several passions. Because the movement of anger does not arise save on account of some pain inflicted, and unless there be desire and hope of revenge: for, as the Philosopher says (Rhet. ii, 2), “the angry man hopes to punish; since he craves for revenge as being possible.” Consequently if the person, who inflicted the injury, excel very much, anger does not ensue, but only sorrow, as Avicenna states (De Anima iv, 6).

Reply to Objection 1. The irascible power takes its name from “ira” [anger], not because every movement of that power is one of anger; but because all its movements terminate in anger; and because, of all these movements, anger is the most patent.

Reply to Objection 2. From the very fact that anger is caused by contrary passions, i.e. by hope, which is of good, and by sorrow, which is of evil, it includes in itself contrariety: and consequently it has no contrary outside itself. Thus also in mixed colors there is no contrariety, except that of the simple colors from which they are made.

Reply to Objection 3. Anger includes several passions, not indeed as a genus includes several species; but rather according to the inclusion of cause and effect.

Objection 1. It would seem that the object of anger is evil. For Gregory of Nyssa says* that anger is “the sword-bearer of desire,” inasmuch, to wit, as it assails whatever obstacle stands in the way of desire. But an obstacle has the character of evil. Therefore anger regards evil as its object.

Objection 2. Further, anger and hatred agree in their effect, since each seeks to inflict harm on another. But hatred regards evil as its object, as stated above (q. 29, a. 1). Therefore anger does also.

Objection 3. Further, anger arises from sorrow; wherefore the Philosopher says (Ethic. viii, 6) that “anger acts with sorrow.” But evil is the object of sorrow. Therefore it is also the object of anger.

On the contrary, Augustine says (Confess. ii, 6) that “anger craves for revenge.” But the desire for revenge is a desire for something good: since revenge belongs to justice. Therefore the object of anger is good.

Moreover, anger is always accompanied by hope, wherefore it causes pleasure, as the Philosopher says (Rhet. ii, 2). But the object of hope and of pleasure is good. Therefore good is also the object of anger.

I answer that, The movement of the appetitive power follows an act of the apprehensive power. Now the apprehensive power apprehends a thing in two ways. First, by way of an incomplex object, as when we understand what a man is; secondly, by way of a complex object, as when we understand that whiteness is in a man. Consequently in each of these ways the appetitive power can tend to both good and evil: by way of a simple and incomplex object, when the appetite simply follows and adheres to good, or recoils from evil: and such

movements are desire, hope, pleasure, sorrow, and so forth: by way of a complex object, as when the appetite is concerned with some good or evil being in, or being done to, another, either seeking this or recoiling from it. This is evident in the case of love and hatred: for we love someone, in so far as we wish some good to be in him; and we hate someone, in so far as we wish some evil to be in him. It is the same with anger; for when a man is angry, he wishes to be avenged on someone. Hence the movement of anger has a twofold tendency: viz. to vengeance itself, which it desires and hopes for as being a good, wherefore it takes pleasure in it; and to the person on whom it seeks vengeance, as to something contrary and hurtful, which bears the character of evil.

We must, however, observe a twofold difference in this respect, between anger on the one side, and hatred and love on the other. The first difference is that anger always regards two objects: whereas love and hatred sometimes regard but one object, as when a man is said to love wine or something of the kind, or to hate it. The second difference is, that both the objects of love are good: since the lover wishes good to someone, as to something agreeable to himself: while both the objects of hatred bear the character of evil: for the man who hates, wishes evil to someone, as to something disagreeable to him. Whereas anger regards one object under the aspect of evil, viz. the noxious person, on whom it seeks to be avenged. Consequently it is a passion somewhat made up of contrary passions.

This suffices for the Replies to the Objections.

* Nemesius, De Nat. Hom. xxi.

Objection 1. It would seem that anger is in the concupiscible faculty. For Cicero says (*De Quaest. Tusc.* iv, 9) that anger is a kind of “desire.” But desire is in the concupiscible faculty. Therefore anger is too.

Objection 2. Further, Augustine says in his *Rule*, that “anger grows into hatred”: and Cicero says (*De Quaest. Tusc.* iv, 9) that “hatred is inveterate anger.” But hatred, like love, is a concupiscible passion. Therefore anger is in the concupiscible faculty.

Objection 3. Further, Damascene (*De Fide Orth.* ii, 16) and Gregory of Nyssa* say that “anger is made up of sorrow and desire.” Both of these are in the concupiscible faculty. Therefore anger is a concupiscible passion.

On the contrary, The concupiscible is distinct from the irascible faculty. If, therefore, anger were in the concupiscible power, the irascible would not take its name from it.

I answer that, As stated above (q. 23, a. 1), the passions of the irascible part differ from the passions of the concupiscible faculty, in that the objects of the concupiscible passions are good and evil absolutely considered, whereas the objects of the irascible passions are good and evil in a certain elevation or arduousness. Now it has been stated (a. 2) that anger regards two objects: viz. the vengeance that it seeks; and the person

on whom it seeks vengeance; and in respect of both, anger requires a certain arduousness: for the movement of anger does not arise, unless there be some magnitude about both these objects; since “we make no ado about things that are naught or very minute,” as the Philosopher observes (*Rhet.* ii, 2). It is therefore evident that anger is not in the concupiscible, but in the irascible faculty.

Reply to Objection 1. Cicero gives the name of desire to any kind of craving for a future good, without discriminating between that which is arduous and that which is not. Accordingly he reckons anger as a kind of desire, inasmuch as it is a desire of vengeance. In this sense, however, desire is common to the irascible and concupiscible faculties.

Reply to Objection 2. Anger is said to grow into hatred, not as though the same passion which at first was anger, afterwards becomes hatred by becoming inveterate; but by a process of causality. For anger when it lasts a long time engenders hatred.

Reply to Objection 3. Anger is said to be composed of sorrow and desire, not as though they were its parts, but because they are its causes: and it has been said above (q. 25, a. 2) that the concupiscible passions are the causes of the irascible passions.

* Nemesius, *De Nat. Hom.* xxi.

Objection 1. It would seem that anger does not require an act of reason. For, since anger is a passion, it is in the sensitive appetite. But the sensitive appetite follows an apprehension, not of reason, but of the sensitive faculty. Therefore anger does not require an act of reason.

Objection 2. Further, dumb animals are devoid of reason: and yet they are seen to be angry. Therefore anger does not require an act of reason.

Objection 3. Further, drunkenness fetters the reason; whereas it is conducive to anger. Therefore anger does not require an act of reason.

On the contrary, The Philosopher says (Ethic. vii, 6) that “anger listens to reason somewhat.”

I answer that, As stated above (a. 2), anger is a desire for vengeance. Now vengeance implies a comparison between the punishment to be inflicted and the hurt done; wherefore the Philosopher says (Ethic. vii, 6) that “anger, as if it had drawn the inference that it ought to quarrel with such a person, is therefore immediately exasperated.” Now to compare and to draw an inference is an act of reason. Therefore anger, in a fashion, requires an act of reason.

Reply to Objection 1. The movement of the appetitive power may follow an act of reason in two ways. In the first way, it follows the reason in so far as the

reason commands: and thus the will follows reason, wherefore it is called the rational appetite. In another way, it follows reason in so far as the reason denounces, and thus anger follows reason. For the Philosopher says (De Problem. xxviii, 3) that “anger follows reason, not in obedience to reason’s command, but as a result of reason’s denouncing the injury.” Because the sensitive appetite is subject to the reason, not immediately but through the will.

Reply to Objection 2. Dumb animals have a natural instinct imparted to them by the Divine Reason, in virtue of which they are gifted with movements, both internal and external, like unto rational movements, as stated above (q. 40, a. 3).

Reply to Objection 3. As stated in Ethic. vii, 6, “anger listens somewhat to reason” in so far as reason denounces the injury inflicted, “but listens not perfectly,” because it does not observe the rule of reason as to the measure of vengeance. Anger, therefore, requires an act of reason; and yet proves a hindrance to reason. Wherefore the Philosopher says (De Problem. iii, 2,27) that those who are very drunk, so as to be incapable of the use of reason, do not get angry: but those who are slightly drunk, do get angry, through being still able, though hampered, to form a judgment of reason.

Objection 1. It would seem that anger is not more natural than desire. Because it is proper to man to be by nature a gentle animal. But “gentleness is contrary to anger,” as the Philosopher states (Rhet. ii, 3). Therefore anger is no more natural than desire, in fact it seems to be altogether unnatural to man.

Objection 2. Further, reason is contrasted with nature: since those things that act according to reason, are not said to act according to nature. Now “anger requires an act of reason, but desire does not,” as stated in Ethic. vii, 6. Therefore desire is more natural than anger.

Objection 3. Further, anger is a craving for vengeance: while desire is a craving for those things especially which are pleasant to the touch, viz. for pleasures of the table and for sexual pleasures. But these things are more natural to man than vengeance. Therefore desire is more natural than anger.

On the contrary, The Philosopher says (Ethic. vii, 6) that “anger is more natural than desire.”

I answer that, By “natural” we mean that which is caused by nature, as stated in Phys. ii, 1. Consequently the question as to whether a particular passion is more or less natural cannot be decided without reference to the cause of that passion. Now the cause of a passion, as stated above (q. 36, a. 2), may be considered in two ways: first, on the part of the object; secondly, on the part of the subject. If then we consider the cause of anger and of desire, on the part of the object, thus desire, especially of pleasures of the table, and of sexual pleasures, is more natural than anger; in so far as these pleasures are more natural to man than vengeance.

If, however, we consider the cause of anger on the part of the subject, thus anger, in a manner, is more natural; and, in a manner, desire is more natural. Because the nature of an individual man may be considered either as to the generic, or as to the specific nature, or again as to the particular temperament of the individual. If then we consider the generic nature, i.e. the nature of this man considered as an animal; thus desire is more natural than anger; because it is from this very generic nature that man is inclined to desire those things which tend to preserve in him the life both of the species and of the individual. If, however, we consider the specific nature, i.e. the nature of this man as

a rational being; then anger is more natural to man than desire, in so far as anger follows reason more than desire does. Wherefore the Philosopher says (Ethic. iv, 5) that “revenge” which pertains to anger “is more natural to man than meekness”: for it is natural to everything to rise up against things contrary and hurtful. And if we consider the nature of the individual, in respect of his particular temperament, thus anger is more natural than desire; for the reason that anger is prone to ensue from the natural tendency to anger, more than desire, or any other passion, is to ensue from a natural tendency to desire, which tendencies result from a man’s individual temperament. Because disposition to anger is due to a bilious temperament; and of all the humors, the bile moves quickest; for it is like fire. Consequently he that is temperamentally disposed to anger is sooner incensed with anger, than he that is temperamentally disposed to desire, is inflamed with desire: and for this reason the Philosopher says (Ethic. vii, 6) that a disposition to anger is more liable to be transmitted from parent to child, than a disposition to desire.

Reply to Objection 1. We may consider in man both the natural temperament on the part of the body, and the reason. On the part of the bodily temperament, a man, considered specifically, does not naturally excel others either in anger or in any other passion, on account of the moderation of his temperament. But other animals, for as much as their temperament recedes from this moderation and approaches to an extreme disposition, are naturally disposed to some excess of passion, such as the lion in daring, the hound in anger, the hare in fear, and so forth. On the part of reason, however, it is natural to man, both to be angry and to be gentle: in so far as reason somewhat causes anger, by denouncing the injury which causes anger; and somewhat appeases anger, in so far as the angry man “does not listen perfectly to the command of reason,” as stated above (a. 4, ad 3).

Reply to Objection 2. Reason itself belongs to the nature of man: wherefore from the very fact that anger requires an act of reason, it follows that it is, in a manner, natural to man.

Reply to Objection 3. This argument regards anger and desire on the part of the object.

Objection 1. It would seem that anger is more grievous than hatred. For it is written (Prov. 27:4) that “anger hath no mercy, nor fury when it breaketh forth.” But hatred sometimes has mercy. Therefore anger is more grievous than hatred.

Objection 2. Further, it is worse to suffer evil and to grieve for it, than merely to suffer it. But when a man hates, he is contented if the object of his hatred suffer evil: whereas the angry man is not satisfied unless the object of his anger know it and be aggrieved thereby, as the Philosopher says (Rhet. ii, 4). Therefore, anger is more grievous than hatred.

Objection 3. Further, a thing seems to be so much the more firm according as more things concur to set it up: thus a habit is all the more settled through being caused by several acts. But anger is caused by the concurrence of several passions, as stated above (a. 1): whereas hatred is not. Therefore anger is more settled and more grievous than hatred.

On the contrary, Augustine, in his Rule, compares hatred to “a beam,” but anger to “a mote.”

I answer that, The species and nature of a passion are taken from its object. Now the object of anger is the same in substance as the object of hatred; since, just as the hater wishes evil to him whom he hates, so does the angry man wish evil to him with whom he is angry. But there is a difference of aspect: for the hater wishes evil to his enemy, as evil, whereas the angry man wishes evil to him with whom he is angry, not as evil but in so far as it has an aspect of good, that is, in so far as he reckons it as just, since it is a means of vengeance. Wherefore also it has been said above (a. 2) that hatred implies application of evil to evil, whereas anger denotes application of good to evil. Now it is evident that to seek evil under the aspect of justice, is a lesser evil, than simply to seek evil to someone. Because to wish evil to someone under the aspect of justice, may be according to the virtue of justice, if it be in conformity with the order of reason; and anger fails only in this, that it does not obey the precept of reason in taking vengeance. Consequently it is evident that hatred is far worse and graver than anger.

Reply to Objection 1. In anger and hatred two points may be considered: namely, the thing desired, and the intensity of the desire. As to the thing desired, anger has more mercy than hatred has. For since hatred desires another’s evil for evil’s sake, it is satisfied with

no particular measure of evil: because those things that are desired for their own sake, are desired without measure, as the Philosopher states (Polit. i, 3), instancing a miser with regard to riches. Hence it is written (Ecclus. 12:16): “An enemy... if he find an opportunity, will not be satisfied with blood.” Anger, on the other hand, seeks evil only under the aspect of a just means of vengeance. Consequently when the evil inflicted goes beyond the measure of justice according to the estimate of the angry man, then he has mercy. Wherefore the Philosopher says (Rhet. ii, 4) that “the angry man is appeased if many evils befall, whereas the hater is never appeased.”

As to the intensity of the desire, anger excludes mercy more than hatred does; because the movement of anger is more impetuous, through the heating of the bile. Hence the passage quoted continues: “Who can bear the violence of one provoked?”

Reply to Objection 2. As stated above, an angry man wishes evil to someone, in so far as this evil is a means of just vengeance. Now vengeance is wrought by the infliction of a punishment: and the nature of punishment consists in being contrary to the will, painful, and inflicted for some fault. Consequently an angry man desires this, that the person whom he is hurting, may feel it and be in pain, and know that this has befallen him on account of the harm he has done the other. The hater, on the other hand, cares not for all this, since he desires another’s evil as such. It is not true, however, that an evil is worse through giving pain: because “injustice and imprudence, although evil,” yet, being voluntary, “do not grieve those in whom they are,” as the Philosopher observes (Rhet. ii, 4).

Reply to Objection 3. That which proceeds from several causes, is more settled when these causes are of one kind: but it may be that one cause prevails over many others. Now hatred ensues from a more lasting cause than anger does. Because anger arises from an emotion of the soul due to the wrong inflicted; whereas hatred ensues from a disposition in a man, by reason of which he considers that which he hates to be contrary and hurtful to him. Consequently, as passion is more transitory than disposition or habit, so anger is less lasting than hatred; although hatred itself is a passion ensuing from this disposition. Hence the Philosopher says (Rhet. ii, 4) that “hatred is more incurable than anger.”

Objection 1. It would seem that anger is not only towards those to whom one has an obligation of justice. For there is no justice between man and irrational beings. And yet sometimes one is angry with irrational beings; thus, out of anger, a writer throws away his pen, or a rider strikes his horse. Therefore anger is not only towards those to whom one has an obligation of justice.

Objection 2. Further, “there is no justice towards oneself. . . nor is there justice towards one’s own” (Ethic. v, 6). But sometimes a man is angry with himself; for instance, a penitent, on account of his sin; hence it is written (Ps. 4:5): “Be ye angry and sin not.” Therefore anger is not only towards those with whom one has a relation of justice.

Objection 3. Further, justice and injustice can be of one man towards an entire class, or a whole community: for instance, when the state injures an individual. But anger is not towards a class but only towards an individual, as the Philosopher states (Rhet. ii, 4). Therefore properly speaking, anger is not towards those with whom one is in relation of justice or injustice.

The contrary, however, may be gathered from the Philosopher (Rhet. ii, 2,3).

I answer that, As stated above (a. 6), anger desires evil as being a means of just vengeance. Consequently, anger is towards those to whom we are just or unjust: since vengeance is an act of justice, and wrong-doing is an act of injustice. Therefore both on the part of the cause, viz. the harm done by another, and on the part of the vengeance sought by the angry man, it is evident that anger concerns those to whom one is just or unjust.

Reply to Objection 1. As stated above (a. 4, ad 2), anger, though it follows an act of reason, can nevertheless be in dumb animals that are devoid of reason, in so far as through their natural instinct they are moved

by their imagination to something like rational action. Since then in man there is both reason and imagination, the movement of anger can be aroused in man in two ways. First, when only his imagination denounces the injury: and, in this way, man is aroused to a movement of anger even against irrational and inanimate beings, which movement is like that which occurs in animals against anything that injures them. Secondly, by the reason denouncing the injury: and thus, according to the Philosopher (Rhet. ii, 3), “it is impossible to be angry with insensible things, or with the dead”: both because they feel no pain, which is, above all, what the angry man seeks in those with whom he is angry: and because there is no question of vengeance on them, since they can do us no harm.

Reply to Objection 2. As the Philosopher says (Ethic. v, 11), “metaphorically speaking there is a certain justice and injustice between a man and himself,” in so far as the reason rules the irascible and concupiscible parts of the soul. And in this sense a man is said to be avenged on himself, and consequently, to be angry with himself. But properly, and in accordance with the nature of things, a man is never angry with himself.

Reply to Objection 3. The Philosopher (Rhet. ii, 4) assigns as one difference between hatred and anger, that “hatred may be felt towards a class, as we hate the entire class of thieves; whereas anger is directed only towards an individual.” The reason is that hatred arises from our considering a quality as disagreeing with our disposition; and this may refer to a thing in general or in particular. Anger, on the other hand, ensues from someone having injured us by his action. Now all actions are the deeds of individuals: and consequently anger is always pointed at an individual. When the whole state hurts us, the whole state is reckoned as one individual*.

* Cf. q. 29, a. 6

Objection 1. It would seem that Damascene (De Fide Orth. ii, 16) unsuitably assigns three species of anger—“wrath,” “ill-will” and “rancor.” For no genus derives its specific differences from accidents. But these three are diversified in respect of an accident: because “the beginning of the movement of anger is called wrath *cholos*, if anger continue it is called ill-will *menis*; while rancor *kotos* is anger waiting for an opportunity of vengeance.” Therefore these are not different species of anger.

Objection 2. Further, Cicero says (De Quaest. Tusc. iv, 9) that “excandescencia [irascibility] is what the Greeks call *thymosis*, and is a kind of anger that arises and subsides intermittently”; while according to Damascene *thymosis*, is the same as the Greek *kotos* [rancor]. Therefore *kotos* does not bide its time for taking vengeance, but in course of time spends itself.

Objection 3. Further, Gregory (Moral. xxi, 4) gives three degrees of anger, namely, “anger without utterance, anger with utterance, and anger with perfection of speech,” corresponding to the three degrees mentioned by Our Lord (Mat. 5:22): “Whosoever is angry with his brother” [thus implying “anger without utterance”], and then, “whosoever shall say to his brother, ‘Raca’” [implying “anger with utterance yet without full expression”], and lastly, “whosoever shall say ‘Thou fool’” [where we have “perfection of speech”]. Therefore Damascene’s division is imperfect, since it takes no account of utterance.

On the contrary, stands the authority of Damascene (De Fide Orth. ii, 16) and Gregory of Nyssa*.

I answer that, The species of anger given by Dama-

scene and Gregory of Nyssa are taken from those things which give increase to anger. This happens in three ways. First from facility of the movement itself, and he calls this kind of anger *cholos* [bile] because it quickly aroused. Secondly, on the part of the grief that causes anger, and which dwells some time in the memory; this belongs to *menis* [ill-will] which is derived from *menein* [to dwell]. Thirdly, on the part of that which the angry man seeks, viz. vengeance; and this pertains to *kotos* [rancor] which never rests until it is avenged†. Hence the Philosopher (Ethic. iv, 5) calls some angry persons *akrocholoï* [choleric], because they are easily angered; some he calls *pikroï* [bitter], because they retain their anger for a long time; and some he calls *chalepoi* [ill-tempered], because they never rest until they have retaliated‡.

Reply to Objection 1. All those things which give anger some kind of perfection are not altogether accidental to anger; and consequently nothing prevents them from causing a certain specific difference thereof.

Reply to Objection 2. Irascibility, which Cicero mentions, seems to pertain to the first species of anger, which consists in a certain quickness of temper, rather than to rancor [furor]. And there is no reason why the Greek *thymosis*, which is denoted by the Latin “furor,” should not signify both quickness to anger, and firmness of purpose in being avenged.

Reply to Objection 3. These degrees are distinguished according to various effects of anger; and not according to degrees of perfection in the very movement of anger.

* Nemesius, De Nat. Hom. xxi. † Eph. 4:31: “Let all bitterness and anger and indignation... be put away from you.” ‡ Cf. Ia IIae, q. 158, a. 5

FIRST PART OF THE SECOND PART, QUESTION 47
Of the Cause That Provokes Anger, and of the Remedies of Anger*
(In Four Articles)

We must now consider the cause that provokes anger, and its remedies. Under this head there are four points of inquiry:

- (1) Whether the motive of anger is always something done against the one who is angry?
- (2) Whether slight or contempt is the sole motive of anger?
- (3) Of the cause of anger on the part of the angry person;
- (4) Of the cause of anger on the part of the person with whom one is angry.

Whether the motive of anger is always something done against the one who is angry? Ia IIae q. 47 a. 1

Objection 1. It would seem that the motive of anger is not always something done against the one who is angry. Because man, by sinning, can do nothing against God; since it is written (Job 35:6): “If thy iniquities be multiplied, what shalt thou do against Him?” And yet God is spoken of as being angry with man on account of sin, according to Ps. 105:40: “The Lord was exceedingly angry with His people.” Therefore it is not always on account of something done against him, that a man is angry.

Objection 2. Further, anger is a desire for vengeance. But one may desire vengeance for things done against others. Therefore we are not always angry on account of something done against us.

Objection 3. Further, as the Philosopher says (Rhet. ii, 2) man is angry especially with those “who despise what he takes a great interest in; thus men who study philosophy are angry with those who despise philosophy,” and so forth. But contempt of philosophy does not harm the philosopher. Therefore it is not always a harm done to us that makes us angry.

Objection 4. Further, he that holds his tongue when another insults him, provokes him to greater anger, as Chrysostom observes (Hom. xxii, in Ep. ad Rom.). But by holding his tongue he does the other no harm. Therefore a man is not always provoked to anger by something done against him.

On the contrary, The Philosopher says (Rhet. ii, 4) that “anger is always due to something done to oneself: whereas hatred may arise without anything being done to us, for we hate a man simply because we think him such.”

I answer that, As stated above (q. 46, a. 6), anger

is the desire to hurt another for the purpose of just vengeance. Now unless some injury has been done, there is no question of vengeance: nor does any injury provoke one to vengeance, but only that which is done to the person who seeks vengeance: for just as everything naturally seeks its own good, so does it naturally repel its own evil. But injury done by anyone does not affect a man unless in some way it be something done against him. Consequently the motive of a man’s anger is always something done against him.

Reply to Objection 1. We speak of anger in God, not as of a passion of the soul but as of judgment of justice, inasmuch as He wills to take vengeance on sin. Because the sinner, by sinning, cannot do God any actual harm: but so far as he himself is concerned, he acts against God in two ways. First, in so far as he despises God in His commandments. Secondly, in so far as he harms himself or another; which injury redounds to God, inasmuch as the person injured is an object of God’s providence and protection.

Reply to Objection 2. If we are angry with those who harm others, and seek to be avenged on them, it is because those who are injured belong in some way to us: either by some kinship or friendship, or at least because of the nature we have in common.

Reply to Objection 3. When we take a very great interest in a thing, we look upon it as our own good; so that if anyone despise it, it seems as though we ourselves were despised and injured.

Reply to Objection 4. Silence provokes the insulter to anger when he thinks it is due to contempt, as though his anger were slighted: and a slight is an action.

Whether the sole motive of anger is slight or contempt? Ia IIae q. 47 a. 2

Objection 1. It would seem that slight or contempt is not the sole motive of anger. For Damascene says (De Fide Orth. ii, 16) that we are angry “when we suffer, or think that we are suffering, an injury.” But one may suffer an injury without being despised or slighted.

Therefore a slight is not the only motive of anger.

Objection 2. Further, desire for honor and grief for a slight belong to the same subject. But dumb animals do not desire honor. Therefore they are not grieved by being slighted. And yet “they are roused to anger, when

* There Is No Further Mention of These Remedies in the Text, Except in A. 4.

wounded,” as the Philosopher says (Ethic. iii, 8). Therefore a slight is not the sole motive of anger.

Objection 3. Further, the Philosopher (Rhet. ii, 2) gives many other causes of anger, for instance, “being forgotten by others; that others should rejoice in our misfortunes; that they should make known our evils; being hindered from doing as we like.” Therefore being slighted is not the only motive for being angry.

On the contrary, The Philosopher says (Rhet. ii, 2) that anger is “a desire, with sorrow, for vengeance, on account of a seeming slight done unbecomingly.”

I answer that, All the causes of anger are reduced to slight. For slight is of three kinds, as stated in Rhet. ii, 2, viz. “contempt,” “despiteful treatment,” i.e. hindering one from doing one’s will, and “insolence”: and all motives of anger are reduced to these three. Two reasons may be assigned for this. First, because anger seeks another’s hurt as being a means of just vengeance: wherefore it seeks vengeance in so far as it seems just. Now just vengeance is taken only for that which is done unjustly; hence that which provokes anger is always something considered in the light of an injustice. Wherefore the Philosopher says (Rhet. ii, 3) that “men are not angry—if they think they have wronged some one and are suffering justly on that account; because there is no anger at what is just.” Now injury is done to another in three ways: namely, through ignorance, through passion, and through choice. Then, most of all, a man does an injustice, when he does an injury from choice, on purpose, or from deliberate malice, as stated in Ethic. v, 8. Wherefore we are most of all angry with those who, in our opinion, have hurt us on purpose. For if we think that some one has done us an injury through ignorance or through passion, either we are not angry with them at all, or very much less: since to do anything through ignorance or through passion takes away from the no-

tion of injury, and to a certain extent calls for mercy and forgiveness. Those, on the other hand, who do an injury on purpose, seem to sin from contempt; wherefore we are angry with them most of all. Hence the Philosopher says (Rhet. ii, 3) that “we are either not angry at all, or not very angry with those who have acted through anger, because they do not seem to have acted slightly.”

The second reason is because a slight is opposed to a man’s excellence: because “men think little of things that are not worth much ado” (Rhet. ii, 2). Now we seek for some kind of excellence from all our goods. Consequently whatever injury is inflicted on us, in so far as it is derogatory to our excellence, seems to savor of a slight.

Reply to Objection 1. Any other cause, besides contempt, through which a man suffers an injury, takes away from the notion of injury: contempt or slight alone adds to the motive of anger, and consequently is of itself the cause of anger.

Reply to Objection 2. Although a dumb animal does not seek honor as such, yet it naturally seeks a certain superiority, and is angry with anything derogatory thereto.

Reply to Objection 3. Each of those causes amounts to some kind of slight. Thus forgetfulness is a clear sign of slight esteem, for the more we think of a thing the more is it fixed in our memory. Again if a man does not hesitate by his remarks to give pain to another, this seems to show that he thinks little of him: and those too who show signs of hilarity when another is in misfortune, seem to care little about his good or evil. Again he that hinders another from carrying out his will, without deriving thereby any profit to himself, seems not to care much for his friendship. Consequently all those things, in so far as they are signs of contempt, provoke anger.

Whether a man’s excellence is the cause of his being angry?

Ia IIae q. 47 a. 3

Objection 1. It would seem that a man’s excellence is not the cause of his being more easily angry. For the Philosopher says (Rhet. ii, 2) that “some are angry especially when they are grieved, for instance, the sick, the poor, and those who are disappointed.” But these things seem to pertain to defect. Therefore defect rather than excellence makes one prone to anger.

Objection 2. Further, the Philosopher says (Rhet. ii, 2) that “some are very much inclined to be angry when they are despised for some failing or weakness of the existence of which there are grounds for suspicion; but if they think they excel in those points, they do not trouble.” But a suspicion of this kind is due to some defect. Therefore defect rather than excellence is a cause of a man being angry.

Objection 3. Further, whatever savors of excellence makes a man agreeable and hopeful. But the Philosopher says (Rhet. ii, 3) that “men are not angry when

they play, make jokes, or take part in a feast, nor when they are prosperous or successful, nor in moderate pleasures and well-founded hope.” Therefore excellence is not a cause of anger.

On the contrary, The Philosopher says (Rhet. ii, 9) that excellence makes men prone to anger.

I answer that, The cause of anger, in the man who is angry, may be taken in two ways. First in respect of the motive of anger: and thus excellence is the cause of a man being easily angered. Because the motive of anger is an unjust slight, as stated above (a. 2). Now it is evident that the more excellent a man is, the more unjust is a slight offered him in the matter in which he excels. Consequently those who excel in any matter, are most of all angry, if they be slighted in that matter; for instance, a wealthy man in his riches, or an orator in his eloquence, and so forth.

Secondly, the cause of anger, in the man who is an-

gry, may be considered on the part of the disposition produced in him by the motive aforesaid. Now it is evident that nothing moves a man to anger except a hurt that grieves him: while whatever savors of defect is above all a cause of grief; since men who suffer from some defect are more easily hurt. And this is why men who are weak, or subject to some other defect, are more easily angered, since they are more easily grieved.

This suffices for the Reply to the First Objection.

Reply to Objection 2. If a man be despised in a matter in which he evidently excels greatly, he does

not consider himself the loser thereby, and therefore is not grieved: and in this respect he is less angered. But in another respect, in so far as he is more undeservedly despised, he has more reason for being angry: unless perhaps he thinks that he is envied or insulted not through contempt but through ignorance, or some other like cause.

Reply to Objection 3. All these things hinder anger in so far as they hinder sorrow. But in another respect they are naturally apt to provoke anger, because they make it more unseemly to insult anyone.

Whether a person's defect is a reason for being more easily angry with him?

Ia IIae q. 47 a. 4

Objection 1. It would seem that a person's defect is not a reason for being more easily angry with him. For the Philosopher says (Rhet. ii, 3) that "we are not angry with those who confess and repent and humble themselves; on the contrary, we are gentle with them. Wherefore dogs bite not those who sit down." But these things savor of littleness and defect. Therefore littleness of a person is a reason for being less angry with him.

Objection 2. Further, there is no greater defect than death. But anger ceases at the sight of death. Therefore defect of a person does not provoke anger against him.

Objection 3. Further, no one thinks little of a man through his being friendly towards him. But we are more angry with friends, if they offend us or refuse to help us; hence it is written (Ps. 54:13): "If my enemy had reviled me I would verily have borne with it." Therefore a person's defect is not a reason for being more easily angry with him.

On the contrary, The Philosopher says (Rhet. ii, 2) that "the rich man is angry with the poor man, if the latter despise him; and in like manner the prince is angry with his subject."

I answer that, As stated above (Aa. 2,3) unmerited contempt more than anything else is a provocative of anger. Consequently deficiency or littleness in the person with whom we are angry, tends to increase our anger, in so far as it adds to the unmeritedness of being despised. For just as the higher a man's position is, the

more undeservedly he is despised; so the lower it is, the less reason he has for despising. Thus a nobleman is angry if he be insulted by a peasant; a wise man, if by a fool; a master, if by a servant.

If, however, the littleness or deficiency lessens the unmerited contempt, then it does not increase but lessens anger. In this way those who repent of their ill-deeds, and confess that they have done wrong, who humble themselves and ask pardon, mitigate anger, according to Prov. 15:1: "A mild answer breaketh wrath": because, to wit, they seem not to despise, but rather to think much of those before whom they humble themselves.

This suffices for the Reply to the First Objection.

Reply to Objection 2. There are two reasons why anger ceases at the sight of death. One is because the dead are incapable of sorrow and sensation; and this is chiefly what the angry seek in those with whom they are angered. Another reason is because the dead seem to have attained to the limit of evils. Hence anger ceases in regard to all who are grievously hurt, in so far as this hurt surpasses the measure of just retaliation.

Reply to Objection 3. To be despised by one's friends seems also a greater indignity. Consequently if they despise us by hurting or by failing to help, we are angry with them for the same reason for which we are angry with those who are beneath us.

Objection 1. It would seem that the motive of anger is not always something done against the one who is angry. Because man, by sinning, can do nothing against God; since it is written (Job 35:6): “If thy iniquities be multiplied, what shalt thou do against Him?” And yet God is spoken of as being angry with man on account of sin, according to Ps. 105:40: “The Lord was exceedingly angry with His people.” Therefore it is not always on account of something done against him, that a man is angry.

Objection 2. Further, anger is a desire for vengeance. But one may desire vengeance for things done against others. Therefore we are not always angry on account of something done against us.

Objection 3. Further, as the Philosopher says (Rhet. ii, 2) man is angry especially with those “who despise what he takes a great interest in; thus men who study philosophy are angry with those who despise philosophy,” and so forth. But contempt of philosophy does not harm the philosopher. Therefore it is not always a harm done to us that makes us angry.

Objection 4. Further, he that holds his tongue when another insults him, provokes him to greater anger, as Chrysostom observes (Hom. xxii, in Ep. ad Rom.). But by holding his tongue he does the other no harm. Therefore a man is not always provoked to anger by something done against him.

On the contrary, The Philosopher says (Rhet. ii, 4) that “anger is always due to something done to oneself: whereas hatred may arise without anything being done to us, for we hate a man simply because we think him such.”

I answer that, As stated above (q. 46, a. 6), anger

is the desire to hurt another for the purpose of just vengeance. Now unless some injury has been done, there is no question of vengeance: nor does any injury provoke one to vengeance, but only that which is done to the person who seeks vengeance: for just as everything naturally seeks its own good, so does it naturally repel its own evil. But injury done by anyone does not affect a man unless in some way it be something done against him. Consequently the motive of a man’s anger is always something done against him.

Reply to Objection 1. We speak of anger in God, not as of a passion of the soul but as of judgment of justice, inasmuch as He wills to take vengeance on sin. Because the sinner, by sinning, cannot do God any actual harm: but so far as he himself is concerned, he acts against God in two ways. First, in so far as he despises God in His commandments. Secondly, in so far as he harms himself or another; which injury redounds to God, inasmuch as the person injured is an object of God’s providence and protection.

Reply to Objection 2. If we are angry with those who harm others, and seek to be avenged on them, it is because those who are injured belong in some way to us: either by some kinship or friendship, or at least because of the nature we have in common.

Reply to Objection 3. When we take a very great interest in a thing, we look upon it as our own good; so that if anyone despise it, it seems as though we ourselves were despised and injured.

Reply to Objection 4. Silence provokes the insulter to anger when he thinks it is due to contempt, as though his anger were slighted: and a slight is an action.

Objection 1. It would seem that slight or contempt is not the sole motive of anger. For Damascene says (*De Fide Orth.* ii, 16) that we are angry “when we suffer, or think that we are suffering, an injury.” But one may suffer an injury without being despised or slighted. Therefore a slight is not the only motive of anger.

Objection 2. Further, desire for honor and grief for a slight belong to the same subject. But dumb animals do not desire honor. Therefore they are not grieved by being slighted. And yet “they are roused to anger, when wounded,” as the Philosopher says (*Ethic.* iii, 8). Therefore a slight is not the sole motive of anger.

Objection 3. Further, the Philosopher (*Rhet.* ii, 2) gives many other causes of anger, for instance, “being forgotten by others; that others should rejoice in our misfortunes; that they should make known our evils; being hindered from doing as we like.” Therefore being slighted is not the only motive for being angry.

On the contrary, The Philosopher says (*Rhet.* ii, 2) that anger is “a desire, with sorrow, for vengeance, on account of a seeming slight done unbecomingly.”

I answer that, All the causes of anger are reduced to slight. For slight is of three kinds, as stated in *Rhet.* ii, 2, viz. “contempt,” “despiteful treatment,” i.e. hindering one from doing one’s will, and “insolence”: and all motives of anger are reduced to these three. Two reasons may be assigned for this. First, because anger seeks another’s hurt as being a means of just vengeance: wherefore it seeks vengeance in so far as it seems just. Now just vengeance is taken only for that which is done unjustly; hence that which provokes anger is always something considered in the light of an injustice. Wherefore the Philosopher says (*Rhet.* ii, 3) that “men are not angry—if they think they have wronged some one and are suffering justly on that account; because there is no anger at what is just.” Now injury is done to another in three ways: namely, through ignorance, through passion, and through choice. Then, most of all, a man does an injustice, when he does an injury from choice, on purpose, or from deliberate malice, as stated in *Ethic.* v, 8. Wherefore we are most of all angry with those who,

in our opinion, have hurt us on purpose. For if we think that some one has done us an injury through ignorance or through passion, either we are not angry with them at all, or very much less: since to do anything through ignorance or through passion takes away from the notion of injury, and to a certain extent calls for mercy and forgiveness. Those, on the other hand, who do an injury on purpose, seem to sin from contempt; wherefore we are angry with them most of all. Hence the Philosopher says (*Rhet.* ii, 3) that “we are either not angry at all, or not very angry with those who have acted through anger, because they do not seem to have acted slightly.”

The second reason is because a slight is opposed to a man’s excellence: because “men think little of things that are not worth much ado” (*Rhet.* ii, 2). Now we seek for some kind of excellence from all our goods. Consequently whatever injury is inflicted on us, in so far as it is derogatory to our excellence, seems to savor of a slight.

Reply to Objection 1. Any other cause, besides contempt, through which a man suffers an injury, takes away from the notion of injury: contempt or slight alone adds to the motive of anger, and consequently is of itself the cause of anger.

Reply to Objection 2. Although a dumb animal does not seek honor as such, yet it naturally seeks a certain superiority, and is angry with anything derogatory thereto.

Reply to Objection 3. Each of those causes amounts to some kind of slight. Thus forgetfulness is a clear sign of slight esteem, for the more we think of a thing the more is it fixed in our memory. Again if a man does not hesitate by his remarks to give pain to another, this seems to show that he thinks little of him: and those too who show signs of hilarity when another is in misfortune, seem to care little about his good or evil. Again he that hinders another from carrying out his will, without deriving thereby any profit to himself, seems not to care much for his friendship. Consequently all those things, in so far as they are signs of contempt, provoke anger.

Objection 1. It would seem that a man's excellence is not the cause of his being more easily angry. For the Philosopher says (Rhet. ii, 2) that "some are angry especially when they are grieved, for instance, the sick, the poor, and those who are disappointed." But these things seem to pertain to defect. Therefore defect rather than excellence makes one prone to anger.

Objection 2. Further, the Philosopher says (Rhet. ii, 2) that "some are very much inclined to be angry when they are despised for some failing or weakness of the existence of which there are grounds for suspicion; but if they think they excel in those points, they do not trouble." But a suspicion of this kind is due to some defect. Therefore defect rather than excellence is a cause of a man being angry.

Objection 3. Further, whatever savors of excellence makes a man agreeable and hopeful. But the Philosopher says (Rhet. ii, 3) that "men are not angry when they play, make jokes, or take part in a feast, nor when they are prosperous or successful, nor in moderate pleasures and well-founded hope." Therefore excellence is not a cause of anger.

On the contrary, The Philosopher says (Rhet. ii, 9) that excellence makes men prone to anger.

I answer that, The cause of anger, in the man who is angry, may be taken in two ways. First in respect of the motive of anger: and thus excellence is the cause of a man being easily angered. Because the motive of anger is an unjust slight, as stated above (a. 2). Now

it is evident that the more excellent a man is, the more unjust is a slight offered him in the matter in which he excels. Consequently those who excel in any matter, are most of all angry, if they be slighted in that matter; for instance, a wealthy man in his riches, or an orator in his eloquence, and so forth.

Secondly, the cause of anger, in the man who is angry, may be considered on the part of the disposition produced in him by the motive aforesaid. Now it is evident that nothing moves a man to anger except a hurt that grieves him: while whatever savors of defect is above all a cause of grief; since men who suffer from some defect are more easily hurt. And this is why men who are weak, or subject to some other defect, are more easily angered, since they are more easily grieved.

This suffices for the Reply to the First Objection.

Reply to Objection 2. If a man be despised in a matter in which he evidently excels greatly, he does not consider himself the loser thereby, and therefore is not grieved: and in this respect he is less angered. But in another respect, in so far as he is more undeservedly despised, he has more reason for being angry: unless perhaps he thinks that he is envied or insulted not through contempt but through ignorance, or some other like cause.

Reply to Objection 3. All these things hinder anger in so far as they hinder sorrow. But in another respect they are naturally apt to provoke anger, because they make it more unseemly to insult anyone.

Objection 1. It would seem that a person's defect is not a reason for being more easily angry with him. For the Philosopher says (Rhet. ii, 3) that "we are not angry with those who confess and repent and humble themselves; on the contrary, we are gentle with them. Wherefore dogs bite not those who sit down." But these things savor of littleness and defect. Therefore littleness of a person is a reason for being less angry with him.

Objection 2. Further, there is no greater defect than death. But anger ceases at the sight of death. Therefore defect of a person does not provoke anger against him.

Objection 3. Further, no one thinks little of a man through his being friendly towards him. But we are more angry with friends, if they offend us or refuse to help us; hence it is written (Ps. 54:13): "If my enemy had reviled me I would verily have borne with it." Therefore a person's defect is not a reason for being more easily angry with him.

On the contrary, The Philosopher says (Rhet. ii, 2) that "the rich man is angry with the poor man, if the latter despise him; and in like manner the prince is angry with his subject."

I answer that, As stated above (Aa. 2,3) unmerited contempt more than anything else is a provocative of anger. Consequently deficiency or littleness in the person with whom we are angry, tends to increase our anger, in so far as it adds to the unmeritedness of being despised. For just as the higher a man's position is, the

more undeservedly he is despised; so the lower it is, the less reason he has for despising. Thus a nobleman is angry if he be insulted by a peasant; a wise man, if by a fool; a master, if by a servant.

If, however, the littleness or deficiency lessens the unmerited contempt, then it does not increase but lessens anger. In this way those who repent of their ill-deeds, and confess that they have done wrong, who humble themselves and ask pardon, mitigate anger, according to Prov. 15:1: "A mild answer breaketh wrath": because, to wit, they seem not to despise, but rather to think much of those before whom they humble themselves.

This suffices for the Reply to the First Objection.

Reply to Objection 2. There are two reasons why anger ceases at the sight of death. One is because the dead are incapable of sorrow and sensation; and this is chiefly what the angry seek in those with whom they are angered. Another reason is because the dead seem to have attained to the limit of evils. Hence anger ceases in regard to all who are grievously hurt, in so far as this hurt surpasses the measure of just retaliation.

Reply to Objection 3. To be despised by one's friends seems also a greater indignity. Consequently if they despise us by hurting or by failing to help, we are angry with them for the same reason for which we are angry with those who are beneath us.

FIRST PART OF THE SECOND PART, QUESTION 48

Of the Effects of Anger (In Four Articles)

We must now consider the effects of anger: under which head there are four points of inquiry:

- (1) Whether anger causes pleasure?
- (2) Whether above all it causes heat in the heart?
- (3) Whether above all it hinders the use of reason?
- (4) Whether it causes taciturnity?

Whether anger causes pleasure?

Ia IIae q. 48 a. 1

Objection 1. It would seem that anger does not cause pleasure. Because sorrow excludes pleasure. But anger is never without sorrow, since, as stated in Ethic. vii, 6, “everyone that acts from anger, acts with pain.” Therefore anger does not cause pleasure.

Objection 2. Further, the Philosopher says (Ethic. iv, 5) that “vengeance makes anger to cease, because it substitutes pleasure for pain”: whence we may gather that the angry man derives pleasure from vengeance, and that vengeance quells his anger. Therefore on the advent of pleasure, anger departs: and consequently anger is not an effect united with pleasure.

Objection 3. Further, no effect hinders its cause, since it is conformed to its cause. But pleasure hinders anger as stated in Rhet. ii, 3. Therefore pleasure is not an effect of anger.

On the contrary, The Philosopher (Ethic. iv, 5) quotes the saying that anger is “Sweet to the soul as honey to the taste” (Iliad, xviii, 109 [trl. Pope]).

I answer that, As the Philosopher says (Ethic. vii, 14), pleasures, chiefly sensible and bodily pleasures, are remedies against sorrow: and therefore the greater the sorrow or anxiety, the more sensible are we to the pleasure which heals it, as is evident in the case of thirst which increases the pleasure of drink. Now it is clear from what has been said (q. 47, Aa. 1,3), that the movement of anger arises from a wrong done that causes sorrow, for which sorrow vengeance is sought as a rem-

edy. Consequently as soon as vengeance is present, pleasure ensues, and so much the greater according as the sorrow was greater. Therefore if vengeance be really present, perfect pleasure ensues, entirely excluding sorrow, so that the movement of anger ceases. But before vengeance is really present, it becomes present to the angry man in two ways: in one way, by hope; because none is angry except he hopes for vengeance, as stated above (q. 46, a. 1); in another way, by thinking of it continually, for to everyone that desires a thing it is pleasant to dwell on the thought of what he desires; wherefore the imaginings of dreams are pleasant. Accordingly an angry man takes pleasure in thinking much about vengeance. This pleasure, however, is not perfect, so as to banish sorrow and consequently anger.

Reply to Objection 1. The angry man does not grieve and rejoice at the same thing; he grieves for the wrong done, while he takes pleasure in the thought and hope of vengeance. Consequently sorrow is to anger as its beginning; while pleasure is the effect or terminus of anger.

Reply to Objection 2. This argument holds in regard to pleasure caused by the real presence of vengeance, which banishes anger altogether.

Reply to Objection 3. Pleasure that precedes hinders sorrow from ensuing, and consequently is a hindrance to anger. But pleasure felt in taking vengeance follows from anger.

Whether anger above all causes fervor in the heart?

Ia IIae q. 48 a. 2

Objection 1. It would seem that heat is not above all the effect of anger. For fervor, as stated above (q. 28, a. 5; q. 37, a. 2), belongs to love. But love, as above stated, is the beginning and cause of all the passions. Since then the cause is more powerful than its effect, it seems that anger is not the chief cause of fervor.

Objection 2. Further, those things which, of themselves, arouse fervor, increase as time goes on; thus love grows stronger the longer it lasts. But in course of time anger grows weaker; for the Philosopher says (Rhet. ii, 3) that “time puts an end to anger.” Therefore fervor is not the proper effect of anger.

Objection 3. Further, fervor added to fervor produces greater fervor. But “the addition of a greater anger banishes already existing anger,” as the Philosopher says (Rhet. ii, 3). Therefore anger does not cause fervor.

On the contrary, Damascene says (De Fide Orth. ii, 16) that “anger is fervor of the blood around the heart, resulting from an exhalation of the bile.”

I answer that, As stated above (q. 44, a. 1), the bodily transmutation that occurs in the passions of the soul is proportionate to the movement of the appetite. Now it is evident that every appetite, even the natural

appetite, tends with greater force to repel that which is contrary to it, if it be present: hence we see that hot water freezes harder, as though the cold acted with greater force on the hot object. Since then the appetitive movement of anger is caused by some injury inflicted, as by a contrary that is present; it follows that the appetite tends with great force to repel the injury by the desire of vengeance; and hence ensues great vehemence and impetuosity in the movement of anger. And because the movement of anger is not one of recoil, which corresponds to the action of cold, but one of prosecution, which corresponds to the action of heat, the result is that the movement of anger produces fervor of the blood and vital spirits around the heart, which is the instrument of the soul's passions. And hence it is that, on account of the heart being so disturbed by anger, those chiefly who are angry betray signs thereof in their outer members. For, as Gregory says (Moral. v, 30) "the heart that is inflamed with the stings of its own anger beats quick, the body trembles, the tongue stammers, the countenance takes fire, the eyes grow fierce, they that are well known are not recognized. With the mouth indeed he shapes a sound, but the understanding knows not what it says."

Reply to Objection 1. "Love itself is not felt so keenly as in the absence of the beloved," as Augustine observes (De Trin. x, 12). Consequently when a man suffers from a hurt done to the excellence that he loves, he feels his love thereof the more: the result being that his heart is moved with greater heat to remove the hindrance to the object of his love; so that anger increases the fervor of love and makes it to be felt more.

Nevertheless, the fervor arising from heat differs according as it is to be referred to love or to anger. Because the fervor of love has a certain sweetness and gentleness; for it tends to the good that one loves: whence it is likened to the warmth of the air and of the blood. For this reason sanguine temperaments are more inclined to love; and hence the saying that "love springs from the

liver," because of the blood being formed there. On the other hand, the fervor of anger has a certain bitterness with a tendency to destroy, for it seeks to be avenged on the contrary evil: whence it is likened to the heat of fire and of the bile, and for this reason Damascene says (De Fide Orth. ii, 16) that it "results from an exhalation of the bile whence it takes its name *chole*."

Reply to Objection 2. Time, of necessity, weakens all those things, the causes of which are impaired by time. Now it is evident that memory is weakened by time; for things which happened long ago easily slip from our memory. But anger is caused by the memory of a wrong done. Consequently the cause of anger is impaired little by little as time goes on, until at length it vanishes altogether. Moreover a wrong seems greater when it is first felt; and our estimate thereof is gradually lessened the further the sense of present wrong recedes into the past. The same applies to love, so long as the cause of love is in the memory alone; wherefore the Philosopher says (Ethic. viii, 5) that "if a friend's absence lasts long, it seems to make men forget their friendship." But in the presence of a friend, the cause of friendship is continually being multiplied by time: wherefore the friendship increases: and the same would apply to anger, were its cause continually multiplied.

Nevertheless the very fact that anger soon spends itself proves the strength of its fervor: for as a great fire is soon spent having burnt up all the fuel; so too anger, by reason of its vehemence, soon dies away.

Reply to Objection 3. Every power that is divided in itself is weakened. Consequently if a man being already angry with one, becomes angry with another, by this very fact his anger with the former is weakened. Especially is this so if his anger in the second case be greater: because the wrong done which aroused his former anger, will, in comparison with the second wrong, which is reckoned greater, seem to be of little or no account.

Whether anger above all hinders the use of reason?

Ia IIae q. 48 a. 3

Objection 1. It would seem that anger does not hinder the use of reason. Because that which presupposes an act of reason, does not seem to hinder the use of reason. But "anger listens to reason," as stated in Ethic. vii, 6. Therefore anger does not hinder reason.

Objection 2. Further, the more the reason is hindered, the less does a man show his thoughts. But the Philosopher says (Ethic. vii, 6) that "an angry man is not cunning but is open." Therefore anger does not seem to hinder the use of reason, as desire does; for desire is cunning, as he also states (Ethic. vii, 6.).

Objection 3. Further, the judgment of reason becomes more evident by juxtaposition of the contrary: because contraries stand out more clearly when placed beside one another. But this also increases anger: for the Philosopher says (Rhet. ii, 2) that "men are more

angry if they receive unwonted treatment; for instance, honorable men, if they be dishonored": and so forth. Therefore the same cause increases anger, and facilitates the judgment of reason. Therefore anger does not hinder the judgment of reason.

On the contrary, Gregory says (Moral. v, 30) that anger "withdraws the light of understanding, while by agitating it troubles the mind."

I answer that, Although the mind or reason makes no use of a bodily organ in its proper act, yet, since it needs certain sensitive powers for the execution of its act, the acts of which powers are hindered when the body is disturbed, it follows of necessity that any disturbance in the body hinders even the judgment of reason; as is clear in the case of drunkenness or sleep. Now it has been stated (a. 2) that anger, above all, causes a bod-

ily disturbance in the region of the heart, so much as to effect even the outward members. Consequently, of all the passions, anger is the most manifest obstacle to the judgment of reason, according to Ps. 30:10: "My eye is troubled with wrath."

Reply to Objection 1. The beginning of anger is in the reason, as regards the appetitive movement, which is the formal element of anger. But the passion of anger forestalls the perfect judgment of reason, as though it listened but imperfectly to reason, on account of the commotion of the heat urging to instant action, which commotion is the material element of anger. In this respect it hinders the judgment of reason.

Reply to Objection 2. An angry man is said to be open, not because it is clear to him what he ought to do, but because he acts openly, without thought of hiding himself. This is due partly to the reason being hindered, so as not to discern what should be hidden and what done openly, nor to devise the means of hiding; and partly to the dilatation of the heart which pertains to magnanimity which is an effect of anger: wherefore the

Philosopher says of the magnanimous man (Ethic. iv, 3) that "he is open in his hatreds and his friendships. . . and speaks and acts openly." Desire, on the other hand, is said to lie low and to be cunning, because, in many cases, the pleasurable things that are desired, savor of shame and voluptuousness, wherein man wishes not to be seen. But in those things that savor of manliness and excellence, such as matters of vengeance, man seeks to be in the open.

Reply to Objection 3. As stated above (ad 1), the movement of anger begins in the reason, wherefore the juxtaposition of one contrary with another facilitates the judgment of reason, on the same grounds as it increases anger. For when a man who is possessed of honor or wealth, suffers a loss therein, the loss seems all the greater, both on account of the contrast, and because it was unforeseen. Consequently it causes greater grief: just as a great good, through being received unexpectedly, causes greater delight. And in proportion to the increase of the grief that precedes, anger is increased also.

Whether anger above all causes taciturnity?

Ia IIae q. 48 a. 4

Objection 1. It would seem that anger does not cause taciturnity. Because taciturnity is opposed to speech. But increase in anger conduces to speech; as is evident from the degrees of anger laid down by Our Lord (Mat. 5:22): where He says: "Whosoever is angry with his brother"; and "... whosoever shall say to his brother, 'Raca' "; and "... whosoever shall say to his brother, 'Thou fool.'" Therefore anger does not cause taciturnity.

Objection 2. Further, through failing to obey reason, man sometimes breaks out into unbecoming words: hence it is written (Prov. 25:28): "As a city that lieth open and is not compassed with walls, so is a man that cannot refrain his own spirit in speaking." But anger, above all, hinders the judgment of reason, as stated above (a. 3). Consequently above all it makes one break out into unbecoming words. Therefore it does not cause taciturnity.

Objection 3. Further, it is written (Mat. 12:34): "Out of the abundance of the heart the mouth speaketh." But anger, above all, causes a disturbance in the heart, as stated above (a. 2). Therefore above all it conduces to speech. Therefore it does not cause taciturnity.

On the contrary, Gregory says (Moral. v, 30) that "when anger does not vent itself outwardly by the lips, inwardly it burns the more fiercely."

I answer that, As stated above (a. 3; q. 46, a. 4), anger both follows an act of reason, and hinders the reason: and in both respects it may cause taciturnity.

On the part of the reason, when the judgment of reason prevails so far, that although it does not curb the appetite in its inordinate desire for vengeance, yet it curbs the tongue from unbridled speech. Wherefore Gregory says (Moral. v, 30): "Sometimes when the mind is disturbed, anger, as if in judgment, commands silence." On the part of the impediment to reason because, as stated above (a. 2), the disturbance of anger reaches to the outward members, and chiefly to those members which reflect more distinctly the emotions of the heart, such as the eyes, face and tongue; wherefore, as observed above (a. 2), "the tongue stammers, the countenance takes fire, the eyes grow fierce." Consequently anger may cause such a disturbance, that the tongue is altogether deprived of speech; and taciturnity is the result.

Reply to Objection 1. Anger sometimes goes so far as to hinder the reason from curbing the tongue: but sometimes it goes yet farther, so as to paralyze the tongue and other outward members.

And this suffices for the Reply to the Second Objection.

Reply to Objection 3. The disturbance of the heart may sometimes superabound to the extent that the movements of the outward members are hindered by the inordinate movement of the heart. Thence ensue taciturnity and immobility of the outward members; and sometimes even death. If, however, the disturbance be not so great, then "out of the abundance of the heart" thus disturbed, the mouth proceeds to speak.

Objection 1. It would seem that anger does not cause pleasure. Because sorrow excludes pleasure. But anger is never without sorrow, since, as stated in Ethic. vii, 6, “everyone that acts from anger, acts with pain.” Therefore anger does not cause pleasure.

Objection 2. Further, the Philosopher says (Ethic. iv, 5) that “vengeance makes anger to cease, because it substitutes pleasure for pain”: whence we may gather that the angry man derives pleasure from vengeance, and that vengeance quells his anger. Therefore on the advent of pleasure, anger departs: and consequently anger is not an effect united with pleasure.

Objection 3. Further, no effect hinders its cause, since it is conformed to its cause. But pleasure hinders anger as stated in Rhet. ii, 3. Therefore pleasure is not an effect of anger.

On the contrary, The Philosopher (Ethic. iv, 5) quotes the saying that anger is “Sweet to the soul as honey to the taste” (Iliad, xviii, 109 [trl. Pope]).

I answer that, As the Philosopher says (Ethic. vii, 14), pleasures, chiefly sensible and bodily pleasures, are remedies against sorrow: and therefore the greater the sorrow or anxiety, the more sensible are we to the pleasure which heals it, as is evident in the case of thirst which increases the pleasure of drink. Now it is clear from what has been said (q. 47, Aa. 1,3), that the movement of anger arises from a wrong done that causes sorrow, for which sorrow vengeance is sought as a rem-

edy. Consequently as soon as vengeance is present, pleasure ensues, and so much the greater according as the sorrow was greater. Therefore if vengeance be really present, perfect pleasure ensues, entirely excluding sorrow, so that the movement of anger ceases. But before vengeance is really present, it becomes present to the angry man in two ways: in one way, by hope; because none is angry except he hopes for vengeance, as stated above (q. 46, a. 1); in another way, by thinking of it continually, for to everyone that desires a thing it is pleasant to dwell on the thought of what he desires; wherefore the imaginings of dreams are pleasant. Accordingly an angry man takes pleasure in thinking much about vengeance. This pleasure, however, is not perfect, so as to banish sorrow and consequently anger.

Reply to Objection 1. The angry man does not grieve and rejoice at the same thing; he grieves for the wrong done, while he takes pleasure in the thought and hope of vengeance. Consequently sorrow is to anger as its beginning; while pleasure is the effect or terminus of anger.

Reply to Objection 2. This argument holds in regard to pleasure caused by the real presence of vengeance, which banishes anger altogether.

Reply to Objection 3. Pleasure that precedes hinders sorrow from ensuing, and consequently is a hindrance to anger. But pleasure felt in taking vengeance follows from anger.

Objection 1. It would seem that heat is not above all the effect of anger. For fervor, as stated above (q. 28, a. 5; q. 37, a. 2), belongs to love. But love, as above stated, is the beginning and cause of all the passions. Since then the cause is more powerful than its effect, it seems that anger is not the chief cause of fervor.

Objection 2. Further, those things which, of themselves, arouse fervor, increase as time goes on; thus love grows stronger the longer it lasts. But in course of time anger grows weaker; for the Philosopher says (Rhet. ii, 3) that “time puts an end to anger.” Therefore fervor is not the proper effect of anger.

Objection 3. Further, fervor added to fervor produces greater fervor. But “the addition of a greater anger banishes already existing anger,” as the Philosopher says (Rhet. ii, 3). Therefore anger does not cause fervor.

On the contrary, Damascene says (De Fide Orth. ii, 16) that “anger is fervor of the blood around the heart, resulting from an exhalation of the bile.”

I answer that, As stated above (q. 44, a. 1), the bodily transmutation that occurs in the passions of the soul is proportionate to the movement of the appetite. Now it is evident that every appetite, even the natural appetite, tends with greater force to repel that which is contrary to it, if it be present: hence we see that hot water freezes harder, as though the cold acted with greater force on the hot object. Since then the appetitive movement of anger is caused by some injury inflicted, as by a contrary that is present; it follows that the appetite tends with great force to repel the injury by the desire of vengeance; and hence ensues great vehemence and impetuosity in the movement of anger. And because the movement of anger is not one of recoil, which corresponds to the action of cold, but one of prosecution, which corresponds to the action of heat, the result is that the movement of anger produces fervor of the blood and vital spirits around the heart, which is the instrument of the soul’s passions. And hence it is that, on account of the heart being so disturbed by anger, those chiefly who are angry betray signs thereof in their outer members. For, as Gregory says (Moral. v, 30) “the heart that is inflamed with the stings of its own anger beats quick, the body trembles, the tongue stammers, the countenance takes fire, the eyes grow fierce, they that are well known are not recognized. With the mouth indeed he shapes a sound, but the understanding knows not what it says.”

Reply to Objection 1. “Love itself is not felt so keenly as in the absence of the beloved,” as Augustine observes (De Trin. x, 12). Consequently when a man

suffers from a hurt done to the excellence that he loves, he feels his love thereof the more: the result being that his heart is moved with greater heat to remove the hindrance to the object of his love; so that anger increases the fervor of love and makes it to be felt more.

Nevertheless, the fervor arising from heat differs according as it is to be referred to love or to anger. Because the fervor of love has a certain sweetness and gentleness; for it tends to the good that one loves: whence it is likened to the warmth of the air and of the blood. For this reason sanguine temperaments are more inclined to love; and hence the saying that “love springs from the liver,” because of the blood being formed there. On the other hand, the fervor of anger has a certain bitterness with a tendency to destroy, for it seeks to be avenged on the contrary evil: whence it is likened to the heat of fire and of the bile, and for this reason Damascene says (De Fide Orth. ii, 16) that it “results from an exhalation of the bile whence it takes its name *chole*.”

Reply to Objection 2. Time, of necessity, weakens all those things, the causes of which are impaired by time. Now it is evident that memory is weakened by time; for things which happened long ago easily slip from our memory. But anger is caused by the memory of a wrong done. Consequently the cause of anger is impaired little by little as time goes on, until at length it vanishes altogether. Moreover a wrong seems greater when it is first felt; and our estimate thereof is gradually lessened the further the sense of present wrong recedes into the past. The same applies to love, so long as the cause of love is in the memory alone; wherefore the Philosopher says (Ethic. viii, 5) that “if a friend’s absence lasts long, it seems to make men forget their friendship.” But in the presence of a friend, the cause of friendship is continually being multiplied by time: wherefore the friendship increases: and the same would apply to anger, were its cause continually multiplied.

Nevertheless the very fact that anger soon spends itself proves the strength of its fervor: for as a great fire is soon spent having burnt up all the fuel; so too anger, by reason of its vehemence, soon dies away.

Reply to Objection 3. Every power that is divided in itself is weakened. Consequently if a man being already angry with one, becomes angry with another, by this very fact his anger with the former is weakened. Especially is this so if his anger in the second case be greater: because the wrong done which aroused his former anger, will, in comparison with the second wrong, which is reckoned greater, seem to be of little or no account.

Objection 1. It would seem that anger does not hinder the use of reason. Because that which presupposes an act of reason, does not seem to hinder the use of reason. But “anger listens to reason,” as stated in *Ethic.* vii, 6. Therefore anger does not hinder reason.

Objection 2. Further, the more the reason is hindered, the less does a man show his thoughts. But the Philosopher says (*Ethic.* vii, 6) that “an angry man is not cunning but is open.” Therefore anger does not seem to hinder the use of reason, as desire does; for desire is cunning, as he also states (*Ethic.* vii, 6.).

Objection 3. Further, the judgment of reason becomes more evident by juxtaposition of the contrary: because contraries stand out more clearly when placed beside one another. But this also increases anger: for the Philosopher says (*Rhet.* ii, 2) that “men are more angry if they receive unwonted treatment; for instance, honorable men, if they be dishonored”: and so forth. Therefore the same cause increases anger, and facilitates the judgment of reason. Therefore anger does not hinder the judgment of reason.

On the contrary, Gregory says (*Moral.* v, 30) that anger “withdraws the light of understanding, while by agitating it troubles the mind.”

I answer that, Although the mind or reason makes no use of a bodily organ in its proper act, yet, since it needs certain sensitive powers for the execution of its act, the acts of which powers are hindered when the body is disturbed, it follows of necessity that any disturbance in the body hinders even the judgment of reason; as is clear in the case of drunkenness or sleep. Now it has been stated (a. 2) that anger, above all, causes a bodily disturbance in the region of the heart, so much as to effect even the outward members. Consequently, of all the passions, anger is the most manifest obstacle to the judgment of reason, according to *Ps.* 30:10: “My eye is troubled with wrath.”

Reply to Objection 1. The beginning of anger is in the reason, as regards the appetitive movement, which is the formal element of anger. But the passion of anger forestalls the perfect judgment of reason, as though it listened but imperfectly to reason, on account of the commotion of the heat urging to instant action, which commotion is the material element of anger. In this respect it hinders the judgment of reason.

Reply to Objection 2. An angry man is said to be open, not because it is clear to him what he ought to do, but because he acts openly, without thought of hiding himself. This is due partly to the reason being hindered, so as not to discern what should be hidden and what done openly, nor to devise the means of hiding; and partly to the dilatation of the heart which pertains to magnanimity which is an effect of anger: wherefore the Philosopher says of the magnanimous man (*Ethic.* iv, 3) that “he is open in his hatreds and his friendships. . . and speaks and acts openly.” Desire, on the other hand, is said to lie low and to be cunning, because, in many cases, the pleasurable things that are desired, savor of shame and voluptuousness, wherein man wishes not to be seen. But in those things that savor of manliness and excellence, such as matters of vengeance, man seeks to be in the open.

Reply to Objection 3. As stated above (ad 1), the movement of anger begins in the reason, wherefore the juxtaposition of one contrary with another facilitates the judgment of reason, on the same grounds as it increases anger. For when a man who is possessed of honor or wealth, suffers a loss therein, the loss seems all the greater, both on account of the contrast, and because it was unforeseen. Consequently it causes greater grief: just as a great good, through being received unexpectedly, causes greater delight. And in proportion to the increase of the grief that precedes, anger is increased also.

Objection 1. It would seem that anger does not cause taciturnity. Because taciturnity is opposed to speech. But increase in anger conduces to speech; as is evident from the degrees of anger laid down by Our Lord (Mat. 5:22): where He says: “Whosoever is angry with his brother”; and “. . . whosoever shall say to his brother, ‘Raca’”; and “. . . whosoever shall say to his brother, ‘Thou fool.’” Therefore anger does not cause taciturnity.

Objection 2. Further, through failing to obey reason, man sometimes breaks out into unbecoming words: hence it is written (Prov. 25:28): “As a city that lieth open and is not compassed with walls, so is a man that cannot refrain his own spirit in speaking.” But anger, above all, hinders the judgment of reason, as stated above (a. 3). Consequently above all it makes one break out into unbecoming words. Therefore it does not cause taciturnity.

Objection 3. Further, it is written (Mat. 12:34): “Out of the abundance of the heart the mouth speaketh.” But anger, above all, causes a disturbance in the heart, as stated above (a. 2). Therefore above all it conduces to speech. Therefore it does not cause taciturnity.

On the contrary, Gregory says (Moral. v, 30) that “when anger does not vent itself outwardly by the lips, inwardly it burns the more fiercely.”

I answer that, As stated above (a. 3; q. 46, a. 4), anger both follows an act of reason, and hinders the reason: and in both respects it may cause taciturnity.

On the part of the reason, when the judgment of reason prevails so far, that although it does not curb the appetite in its inordinate desire for vengeance, yet it curbs the tongue from unbridled speech. Wherefore Gregory says (Moral. v, 30): “Sometimes when the mind is disturbed, anger, as if in judgment, commands silence.” On the part of the impediment to reason because, as stated above (a. 2), the disturbance of anger reaches to the outward members, and chiefly to those members which reflect more distinctly the emotions of the heart, such as the eyes, face and tongue; wherefore, as observed above (a. 2), “the tongue stammers, the countenance takes fire, the eyes grow fierce.” Consequently anger may cause such a disturbance, that the tongue is altogether deprived of speech; and taciturnity is the result.

Reply to Objection 1. Anger sometimes goes so far as to hinder the reason from curbing the tongue: but sometimes it goes yet farther, so as to paralyze the tongue and other outward members.

And this suffices for the Reply to the Second Objection.

Reply to Objection 3. The disturbance of the heart may sometimes superabound to the extent that the movements of the outward members are hindered by the inordinate movement of the heart. Thence ensue taciturnity and immobility of the outward members; and sometimes even death. If, however, the disturbance be not so great, then “out of the abundance of the heart” thus disturbed, the mouth proceeds to speak.

FIRST PART OF THE SECOND PART, QUESTION 49

Of Habits in General, As to Their Substance (In Four Articles)

After treating of human acts and passions, we now pass on to the consideration of the principles of human acts, and firstly of intrinsic principles, secondly of extrinsic principles. The intrinsic principle is power and habit; but as we have treated of powers in the Ia, q. 77, seqq., it remains for us to consider them in general: in the second place we shall consider virtues and vices and other like habits, which are the principles of human acts.

Concerning habits in general there are four points to consider: First, the substance of habits; second, their subject; third, the cause of their generation, increase, and corruption; fourth, how they are distinguished from one another.

Under the first head, there are four points of inquiry:

- (1) Whether habit is a quality?
- (2) Whether it is a distinct species of quality?
- (3) Whether habit implies an order to an act?
- (4) Of the necessity of habit.

Whether habit is a quality?

Ia IIae q. 49 a. 1

Objection 1. It would seem that habit is not a quality. For Augustine says (QQ. lxxxiii, qu. 73): “this word ‘habit’ is derived from the verb ‘to have.’” But “to have” belongs not only to quality, but also to the other categories: for we speak of ourselves as “having” quantity and money and other like things. Therefore habit is not a quality.

Objection 2. Further, habit is reckoned as one of the predicaments; as may be clearly seen in the Book of the Predicaments (Categor. vi). But one predicament is not contained under another. Therefore habit is not a quality.

Objection 3. Further, “every habit is a disposition,” as is stated in the Book of the Predicaments (Categor. vi). Now disposition is “the order of that which has parts,” as stated in Metaph. v, text. 24. But this belongs to the predicament Position. Therefore habit is not a quality.

On the contrary, The Philosopher says in the Book of Predicaments (Categor. vi) that “habit is a quality which is difficult to change.”

I answer that, This word “habitus” [habit] is derived from “habere” [to have]. Now habit is taken from this word in two ways; in one way, inasmuch as man, or any other thing, is said to “have” something; in another way, inasmuch as a particular thing has a relation [se habet] either in regard to itself, or in regard to something else.

Concerning the first, we must observe that “to have,” as said in regard to anything that is “had,” is common to the various predicaments. And so the Philosopher puts “to have” among the “post-predicaments,” so called because they result from the various predicaments; as, for instance, opposition, priority, posterity, and such like. Now among things which are had, there seems to be this distinction, that there are some in which there is no medium between the “haver” and that which is had:

as, for instance, there is no medium between the subject and quality or quantity. Then there are some in which there is a medium, but only a relation: as, for instance, a man is said to have a companion or a friend. And, further, there are some in which there is a medium, not indeed an action or passion, but something after the manner of action or passion: thus, for instance, something adorns or covers, and something else is adorned or covered: wherefore the Philosopher says (Metaph. v, text. 25) that “a habit is said to be, as it were, an action or a passion of the haver and that which is had”; as is the case in those things which we have about ourselves. And therefore these constitute a special genus of things, which are comprised under the predicament of “habit”: of which the Philosopher says (Metaph. v, text. 25) that “there is a habit between clothing and the man who is clothed.”

But if “to have” be taken according as a thing has a relation in regard to itself or to something else; in that case habit is a quality; since this mode of having is in respect of some quality: and of this the Philosopher says (Metaph. v, text. 25) that “habit is a disposition whereby that which is disposed is disposed well or ill, and this, either in regard to itself or in regard to another: thus health is a habit.” And in this sense we speak of habit now. Wherefore we must say that habit is a quality.

Reply to Objection 1. This argument takes “to have” in the general sense: for thus it is common to many predicaments, as we have said.

Reply to Objection 2. This argument takes habit in the sense in which we understand it to be a medium between the haver, and that which is had: and in this sense it is a predicament, as we have said.

Reply to Objection 3. Disposition does always, indeed, imply an order of that which has parts: but this happens in three ways, as the Philosopher goes on at

once to says (Metaph. v, text. 25): namely, “either as to place, or as to power, or as to species.” “In saying this,” as Simplicius observes in his Commentary on the Predicaments, “he includes all dispositions: bodily dispositions, when he says ‘as to place,’” and this belongs to the predicament “Position,” which is the order

of parts in a place: “when he says ‘as to power,’ he includes all those dispositions which are in course of formation and not yet arrived at perfect usefulness,” such as inchoate science and virtue: “and when he says, ‘as to species,’ he includes perfect dispositions, which are called habits,” such as perfected science and virtue.

Whether habit is a distinct species of quality?

Ia IIae q. 49 a. 2

Objection 1. It would seem that habit is not a distinct species of quality. Because, as we have said (a. 1), habit, in so far as it is a quality, is “a disposition whereby that which is disposed is disposed well or ill.” But this happens in regard to any quality: for a thing happens to be well or ill disposed in regard also to shape, and in like manner, in regard to heat and cold, and in regard to all such things. Therefore habit is not a distinct species of quality.

Objection 2. Further, the Philosopher says in the Book of the Predicaments (Categor. vi), that heat and cold are dispositions or habits, just as sickness and health. Therefore habit or disposition is not distinct from the other species of quality.

Objection 3. Further, “difficult to change” is not a difference belonging to the predicament of quality, but rather to movement or passion. Now, no genus should be contracted to a species by a difference of another genus; but “differences should be proper to a genus,” as the Philosopher says in Metaph. vii, text. 42. Therefore, since habit is “a quality difficult to change,” it seems not to be a distinct species of quality.

On the contrary, The Philosopher says in the Book of the Predicaments (Categor. vi) that “one species of quality is habit and disposition.”

I answer that, The Philosopher in the Book of Predicaments (Categor. vi) reckons disposition and habit as the first species of quality. Now Simplicius, in his Commentary on the Predicaments, explains the difference of these species as follows. He says “that some qualities are natural, and are in their subject in virtue of its nature, and are always there: but some are adventitious, being caused from without, and these can be lost. Now the latter,” i.e. those which are adventitious, “are habits and dispositions, differing in the point of being easily or difficultly lost. As to natural qualities, some regard a thing in the point of its being in a state of potentiality; and thus we have the second species of quality: while others regard a thing which is in act; and this either deeply rooted therein or only on its surface. If deeply rooted, we have the third species of quality: if on the surface, we have the fourth species of quality, as shape, and form which is the shape of an animated being.” But this distinction of the species of quality seems unsuitable. For there are many shapes, and passion-like qualities, which are not natural but adventitious: and there are also many dispositions which are not adventitious but natural, as health, beauty, and the like. More-

over, it does not suit the order of the species, since that which is the more natural is always first.

Therefore we must explain otherwise the distinction of dispositions and habits from other qualities. For quality, properly speaking, implies a certain mode of substance. Now mode, as Augustine says (Gen. ad lit. iv, 3), “is that which a measure determines”: wherefore it implies a certain determination according to a certain measure. Therefore, just as that in accordance with which the material potentiality [potentia materiae] is determined to its substantial being, is called quality, which is a difference affecting the substance, so that, in accordance with the potentiality of the subject is determined to its accidental being, is called an accidental quality, which is also a kind of difference, as is clear from the Philosopher (Metaph. v, text. 19).

Now the mode of determination of the subject to accidental being may be taken in regard to the very nature of the subject, or in regard to action, and passion resulting from its natural principles, which are matter and form; or again in regard to quantity. If we take the mode or determination of the subject in regard to quantity, we shall then have the fourth species of quality. And because quantity, considered in itself, is devoid of movement, and does not imply the notion of good or evil, so it does not concern the fourth species of quality whether a thing be well or ill disposed, nor quickly or slowly transitory.

But the mode of determination of the subject, in regard to action or passion, is considered in the second and third species of quality. And therefore in both, we take into account whether a thing be done with ease or difficulty; whether it be transitory or lasting. But in them, we do not consider anything pertaining to the notion of good or evil: because movements and passions have not the aspect of an end, whereas good and evil are said in respect of an end.

On the other hand, the mode or determination of the subject, in regard to the nature of the thing, belongs to the first species of quality, which is habit and disposition: for the Philosopher says (Phys. vii, text. 17), when speaking of habits of the soul and of the body, that they are “dispositions of the perfect to the best; and by perfect I mean that which is disposed in accordance with its nature.” And since the form itself and the nature of a thing is the end and the cause why a thing is made (Phys. ii, text. 25), therefore in the first species we consider both evil and good, and also changeable-

ness, whether easy or difficult; inasmuch as a certain nature is the end of generation and movement. And so the Philosopher (Metaph. v, text. 25) defines habit, a “disposition whereby someone is disposed, well or ill”; and in Ethic. ii, 4, he says that by “habits we are directed well or ill in reference to the passions.” For when the mode is suitable to the thing’s nature, it has the aspect of good: and when it is unsuitable, it has the aspect of evil. And since nature is the first object of consideration in anything, for this reason habit is reckoned as the first species of quality.

Reply to Objection 1. Disposition implies a certain order, as stated above (a. 1, ad 3). Wherefore a man is not said to be disposed by some quality except in relation to something else. And if we add “well or ill,” which belongs to the essential notion of habit, we must consider the quality’s relation to the nature, which is the end. So in regard to shape, or heat, or cold, a man is not said to be well or ill disposed, except by reason of a relation to the nature of a thing, with regard to its suitability or unsuitability. Consequently even shapes and passion-like qualities, in so far as they are considered to be suitable or unsuitable to the nature of a thing, belong to habits or dispositions: for shape and color, according to their suitability to the nature of thing, concern beauty; while heat and cold, according to their suitability to the nature of a thing, concern health. And in this way heat and cold are put, by the Philosopher, in the first species of quality.

Wherefore it is clear how to answer the second objection: though some give another solution, as Simplicius says in his Commentary on the Predicaments.

Reply to Objection 3. This difference, “difficult to change,” does not distinguish habit from the other species of quality, but from disposition. Now disposition may be taken in two ways; in one way, as the genus of habit, for disposition is included in the definition of habit (Metaph. v, text. 25): in another way, according as it is divided against habit. Again, disposition, properly

so called, can be divided against habit in two ways: first, as perfect and imperfect within the same species; and thus we call it a disposition, retaining the name of the genus, when it is had imperfectly, so as to be easily lost: whereas we call it a habit, when it is had perfectly, so as not to be lost easily. And thus a disposition becomes a habit, just as a boy becomes a man. Secondly, they may be distinguished as diverse species of the one subaltern genus: so that we call dispositions, those qualities of the first species, which by reason of their very nature are easily lost, because they have changeable causes; e.g. sickness and health: whereas we call habits those qualities which, by reason of their very nature, are not easily changed, in that they have unchangeable causes, e.g. sciences and virtues. And in this sense, disposition does not become habit. The latter explanation seems more in keeping with the intention of Aristotle: for in order to confirm this distinction he adduces the common mode of speaking, according to which, when a quality is, by reason of its nature, easily changeable, and, through some accident, becomes difficultly changeable, then it is called a habit: while the contrary happens in regard to qualities, by reason of their nature, difficultly changeable: for supposing a man to have a science imperfectly, so as to be liable to lose it easily, we say that he is disposed to that science, rather than that he has the science. From this it is clear that the word “habit” implies a certain lastingness: while the word “disposition” does not.

Nor does it matter that thus to be easy and difficult to change are specific differences (of a quality), although they belong to passion and movement, and not the genus of quality. For these differences, though apparently accidental to quality, nevertheless designate differences which are proper and essential to quality. In the same way, in the genus of substance we often take accidental instead of substantial differences, in so far as by the former, essential principles are designated.

Whether habit implies order to an act?

Ia IIae q. 49 a. 3

Objection 1. It would seem that habit does not imply order to an act. For everything acts according as it is in act. But the Philosopher says (De Anima iii, text 8), that “when one is become knowing by habit, one is still in a state of potentiality, but otherwise than before learning.” Therefore habit does not imply the relation of a principle to an act.

Objection 2. Further, that which is put in the definition of a thing, belongs to it essentially. But to be a principle of action, is put in the definition of power, as we read in Metaph. v, text. 17. Therefore to be the principle of an act belongs to power essentially. Now that which is essential is first in every genus. If therefore, habit also is a principle of act, it follows that it is posterior to power. And so habit and disposition will not be

the first species of quality.

Objection 3. Further, health is sometimes a habit, and so are leanness and beauty. But these do not indicate relation to an act. Therefore it is not essential to habit to be a principle of act.

On the contrary, Augustine says (De Bono Conjug. xxi) that “habit is that whereby something is done when necessary.” And the Commentator says (De Anima iii) that “habit is that whereby we act when we will.”

I answer that, To have relation to an act may belong to habit, both in regard to the nature of habit, and in regard to the subject in which the habit is. In regard to the nature of habit, it belongs to every habit to have relation to an act. For it is essential to habit to imply some relation to a thing’s nature, in so far as it is suit-

able or unsuitable thereto. But a thing's nature, which is the end of generation, is further ordained to another end, which is either an operation, or the product of an operation, to which one attains by means of operation. Wherefore habit implies relation not only to the very nature of a thing, but also, consequently, to operation, inasmuch as this is the end of nature, or conducive to the end. Whence also it is stated (Metaph. v, text. 25) in the definition of habit, that it is a disposition whereby that which is disposed, is well or ill disposed either in regard to itself, that is to its nature, or in regard to something else, that is to the end.

But there are some habits, which even on the part of the subject in which they are, imply primarily and principally relation to an act. For, as we have said, habit primarily and of itself implies a relation to the thing's nature. If therefore the nature of a thing, in which the habit is, consists in this very relation to an act, it follows that the habit principally implies relation to an act. Now it is clear that the nature and the notion of power is that it should be a principle of act. Wherefore every habit is

subjected in a power, implies principally relation to an act.

Reply to Objection 1. Habit is an act, in so far as it is a quality: and in this respect it can be a principle of operation. It is, however, in a state of potentiality in respect to operation. Wherefore habit is called first act, and operation, second act; as it is explained in *De Anima* ii, text. 5.

Reply to Objection 2. It is not the essence of habit to be related to power, but to be related to nature. And as nature precedes action, to which power is related, therefore habit is put before power as a species of quality.

Reply to Objection 3. Health is said to be a habit, or a habitual disposition, in relation to nature, as stated above. But in so far as nature is a principle of act, it consequently implies a relation to act. Wherefore the Philosopher says (*De Hist. Animal.* x, 1), that man, or one of his members, is called healthy, "when he can perform the operation of a healthy man." And the same applies to other habits.

Whether habits are necessary?

Ia IIae q. 49 a. 4

Objection 1. It would seem that habits are not necessary. For by habits we are well or ill disposed in respect of something, as stated above. But a thing is well or ill disposed by its form: for in respect of its form a thing is good, even as it is a being. Therefore there is no necessity for habits.

Objection 2. Further, habit implies relation to an act. But power implies sufficiently a principle of act: for even the natural powers, without any habits, are principles of acts. Therefore there was no necessity for habits.

Objection 3. Further, as power is related to good and evil, so also is habit: and as power does not always act, so neither does habit. Given, therefore, the powers, habits become superfluous.

On the contrary, Habits are perfections (*Phys.* vii, text. 17). But perfection is of the greatest necessity to a thing: since it is in the nature of an end. Therefore it is necessary that there should be habits.

I answer that, As we have said above (*Aa.* 2,3), habit implies a disposition in relation to a thing's nature, and to its operation or end, by reason of which disposition a thing is well or ill disposed thereto. Now for a thing to need to be disposed to something else, three conditions are necessary. The first condition is that which is disposed should be distinct from that to which it is disposed; and so, that it should be related to it as potentiality is to act. Whence, if there is a being whose nature is not composed of potentiality and act, and whose substance is its own operation, which itself is for itself, there we can find no room for habit and disposition, as is clearly the case in God.

The second condition is, that that which is in a state of potentiality in regard to something else, be capable

of determination in several ways and to various things. Whence if something be in a state of potentiality in regard to something else, but in regard to that only, there we find no room for disposition and habit: for such a subject from its own nature has the due relation to such an act. Wherefore if a heavenly body be composed of matter and form, since that matter is not in a state of potentiality to another form, as we said in the *Ia*, q. 56, a. 2, there is no need for disposition or habit in respect of the form, or even in respect of operation, since the nature of the heavenly body is not in a state of potentiality to more than one fixed movement.

The third condition is that in disposing the subject to one of those things to which it is in potentiality, several things should occur, capable of being adjusted in various ways: so as to dispose the subject well or ill to its form or to its operation. Wherefore the simple qualities of the elements which suit the natures of the elements in one single fixed way, are not called dispositions or habits, but "simple qualities": but we call dispositions or habits, such things as health, beauty, and so forth, which imply the adjustment of several things which may vary in their relative adjustability. For this reason the Philosopher says (*Metaph.* v, text. 24,25) that "habit is a disposition": and disposition is "the order of that which has parts either as to place, or as to potentiality, or as to species," as we have said above (*a.* 1, ad 3). Wherefore, since there are many things for whose natures and operations several things must concur which may vary in their relative adjustability, it follows that habit is necessary.

Reply to Objection 1. By the form the nature of a thing is perfected: yet the subject needs to be disposed

in regard to the form by some disposition. But the form itself is further ordained to operation, which is either the end, or the means to the end. And if the form is limited to one fixed operation, no further disposition, besides the form itself, is needed for the operation. But if the form be such that it can operate in diverse ways, as the soul; it needs to be disposed to its operations by means of habits.

Reply to Objection 2. Power sometimes has a relation to many things: and then it needs to be determined by something else. But if a power has not a relation to

many things, it does not need a habit to determine it, as we have said. For this reason the natural forces do not perform their operations by means of habits: because they are of themselves determined to one mode of operation.

Reply to Objection 3. The same habit has not a relation to good and evil, as will be made clear further on (q. 54, a. 3): whereas the same power has a relation to good and evil. And, therefore, habits are necessary that the powers be determined to good.

Objection 1. It would seem that habit is not a quality. For Augustine says (QQ. lxxxiii, qu. 73): “this word ‘habit’ is derived from the verb ‘to have.’” But “to have” belongs not only to quality, but also to the other categories: for we speak of ourselves as “having” quantity and money and other like things. Therefore habit is not a quality.

Objection 2. Further, habit is reckoned as one of the predicaments; as may be clearly seen in the Book of the Predicaments (Categor. vi). But one predicament is not contained under another. Therefore habit is not a quality.

Objection 3. Further, “every habit is a disposition,” as is stated in the Book of the Predicaments (Categor. vi). Now disposition is “the order of that which has parts,” as stated in Metaph. v, text. 24. But this belongs to the predicament Position. Therefore habit is not a quality.

On the contrary, The Philosopher says in the Book of Predicaments (Categor. vi) that “habit is a quality which is difficult to change.”

I answer that, This word “habitus” [habit] is derived from “habere” [to have]. Now habit is taken from this word in two ways; in one way, inasmuch as man, or any other thing, is said to “have” something; in another way, inasmuch as a particular thing has a relation [se habet] either in regard to itself, or in regard to something else.

Concerning the first, we must observe that “to have,” as said in regard to anything that is “had,” is common to the various predicaments. And so the Philosopher puts “to have” among the “post-predicaments,” so called because they result from the various predicaments; as, for instance, opposition, priority, posterity, and such like. Now among things which are had, there seems to be this distinction, that there are some in which there is no medium between the “haver” and that which is had: as, for instance, there is no medium between the subject and quality or quantity. Then there are some in which there is a medium, but only a relation: as, for instance, a man is said to have a companion or a friend. And, further, there are some in which there is a medium, not indeed an action or passion, but something after the

manner of action or passion: thus, for instance, something adorns or covers, and something else is adorned or covered: wherefore the Philosopher says (Metaph. v, text. 25) that “a habit is said to be, as it were, an action or a passion of the haver and that which is had”; as is the case in those things which we have about ourselves. And therefore these constitute a special genus of things, which are comprised under the predicament of “habit”: of which the Philosopher says (Metaph. v, text. 25) that “there is a habit between clothing and the man who is clothed.”

But if “to have” be taken according as a thing has a relation in regard to itself or to something else; in that case habit is a quality; since this mode of having is in respect of some quality: and of this the Philosopher says (Metaph. v, text. 25) that “habit is a disposition whereby that which is disposed is disposed well or ill, and this, either in regard to itself or in regard to another: thus health is a habit.” And in this sense we speak of habit now. Wherefore we must say that habit is a quality.

Reply to Objection 1. This argument takes “to have” in the general sense: for thus it is common to many predicaments, as we have said.

Reply to Objection 2. This argument takes habit in the sense in which we understand it to be a medium between the haver, and that which is had: and in this sense it is a predicament, as we have said.

Reply to Objection 3. Disposition does always, indeed, imply an order of that which has parts: but this happens in three ways, as the Philosopher goes on at once to say (Metaph. v, text. 25): namely, “either as to place, or as to power, or as to species.” “In saying this,” as Simplicius observes in his Commentary on the Predicaments, “he includes all dispositions: bodily dispositions, when he says ‘as to place,’” and this belongs to the predicament “Position,” which is the order of parts in a place: “when he says ‘as to power,’ he includes all those dispositions which are in course of formation and not yet arrived at perfect usefulness,” such as inchoate science and virtue: “and when he says, ‘as to species,’ he includes perfect dispositions, which are called habits,” such as perfected science and virtue.

Objection 1. It would seem that habit is not a distinct species of quality. Because, as we have said (a. 1), habit, in so far as it is a quality, is “a disposition whereby that which is disposed is disposed well or ill.” But this happens in regard to any quality: for a thing happens to be well or ill disposed in regard also to shape, and in like manner, in regard to heat and cold, and in regard to all such things. Therefore habit is not a distinct species of quality.

Objection 2. Further, the Philosopher says in the Book of the Predicaments (Categor. vi), that heat and cold are dispositions or habits, just as sickness and health. Therefore habit or disposition is not distinct from the other species of quality.

Objection 3. Further, “difficult to change” is not a difference belonging to the predicament of quality, but rather to movement or passion. Now, no genus should be contracted to a species by a difference of another genus; but “differences should be proper to a genus,” as the Philosopher says in Metaph. vii, text. 42. Therefore, since habit is “a quality difficult to change,” it seems not to be a distinct species of quality.

On the contrary, The Philosopher says in the Book of the Predicaments (Categor. vi) that “one species of quality is habit and disposition.”

I answer that, The Philosopher in the Book of Predicaments (Categor. vi) reckons disposition and habit as the first species of quality. Now Simplicius, in his Commentary on the Predicaments, explains the difference of these species as follows. He says “that some qualities are natural, and are in their subject in virtue of its nature, and are always there: but some are adventitious, being caused from without, and these can be lost. Now the latter,” i.e. those which are adventitious, “are habits and dispositions, differing in the point of being easily or difficultly lost. As to natural qualities, some regard a thing in the point of its being in a state of potentiality; and thus we have the second species of quality: while others regard a thing which is in act; and this either deeply rooted therein or only on its surface. If deeply rooted, we have the third species of quality: if on the surface, we have the fourth species of quality, as shape, and form which is the shape of an animated being.” But this distinction of the species of quality seems unsuitable. For there are many shapes, and passion-like qualities, which are not natural but adventitious: and there are also many dispositions which are not adventitious but natural, as health, beauty, and the like. Moreover, it does not suit the order of the species, since that which is the more natural is always first.

Therefore we must explain otherwise the distinction of dispositions and habits from other qualities. For quality, properly speaking, implies a certain mode of substance. Now mode, as Augustine says (Gen. ad lit. iv, 3), “is that which a measure determines”: wherefore it implies a certain determination according to a

certain measure. Therefore, just as that in accordance with which the material potentiality [potentia materiae] is determined to its substantial being, is called quality, which is a difference affecting the substance, so that, in accordance with the potentiality of the subject is determined to its accidental being, is called an accidental quality, which is also a kind of difference, as is clear from the Philosopher (Metaph. v, text. 19).

Now the mode of determination of the subject to accidental being may be taken in regard to the very nature of the subject, or in regard to action, and passion resulting from its natural principles, which are matter and form; or again in regard to quantity. If we take the mode or determination of the subject in regard to quantity, we shall then have the fourth species of quality. And because quantity, considered in itself, is devoid of movement, and does not imply the notion of good or evil, so it does not concern the fourth species of quality whether a thing be well or ill disposed, nor quickly or slowly transitory.

But the mode of determination of the subject, in regard to action or passion, is considered in the second and third species of quality. And therefore in both, we take into account whether a thing be done with ease or difficulty; whether it be transitory or lasting. But in them, we do not consider anything pertaining to the notion of good or evil: because movements and passions have not the aspect of an end, whereas good and evil are said in respect of an end.

On the other hand, the mode or determination of the subject, in regard to the nature of the thing, belongs to the first species of quality, which is habit and disposition: for the Philosopher says (Phys. vii, text. 17), when speaking of habits of the soul and of the body, that they are “dispositions of the perfect to the best; and by perfect I mean that which is disposed in accordance with its nature.” And since the form itself and the nature of a thing is the end and the cause why a thing is made (Phys. ii, text. 25), therefore in the first species we consider both evil and good, and also changeableness, whether easy or difficult; inasmuch as a certain nature is the end of generation and movement. And so the Philosopher (Metaph. v, text. 25) defines habit, a “disposition whereby someone is disposed, well or ill”; and in Ethic. ii, 4, he says that by “habits we are directed well or ill in reference to the passions.” For when the mode is suitable to the thing’s nature, it has the aspect of good: and when it is unsuitable, it has the aspect of evil. And since nature is the first object of consideration in anything, for this reason habit is reckoned as the first species of quality.

Reply to Objection 1. Disposition implies a certain order, as stated above (a. 1, ad 3). Wherefore a man is not said to be disposed by some quality except in relation to something else. And if we add “well or ill,” which belongs to the essential notion of habit, we must

consider the quality's relation to the nature, which is the end. So in regard to shape, or heat, or cold, a man is not said to be well or ill disposed, except by reason of a relation to the nature of a thing, with regard to its suitability or unsuitability. Consequently even shapes and passion-like qualities, in so far as they are considered to be suitable or unsuitable to the nature of a thing, belong to habits or dispositions: for shape and color, according to their suitability to the nature of thing, concern beauty; while heat and cold, according to their suitability to the nature of a thing, concern health. And in this way heat and cold are put, by the Philosopher, in the first species of quality.

Wherefore it is clear how to answer the second objection: though some give another solution, as Simplificius says in his Commentary on the Predicaments.

Reply to Objection 3. This difference, "difficult to change," does not distinguish habit from the other species of quality, but from disposition. Now disposition may be taken in two ways; in one way, as the genus of habit, for disposition is included in the definition of habit (*Metaph.* v, text. 25): in another way, according as it is divided against habit. Again, disposition, properly so called, can be divided against habit in two ways: first, as perfect and imperfect within the same species; and thus we call it a disposition, retaining the name of the genus, when it is had imperfectly, so as to be easily lost: whereas we call it a habit, when it is had perfectly, so as not to be lost easily. And thus a disposition becomes a habit, just as a boy becomes a man. Secondly, they may be distinguished as diverse species of the one subaltern

genus: so that we call dispositions, those qualities of the first species, which by reason of their very nature are easily lost, because they have changeable causes; e.g. sickness and health: whereas we call habits those qualities which, by reason of their very nature, are not easily changed, in that they have unchangeable causes, e.g. sciences and virtues. And in this sense, disposition does not become habit. The latter explanation seems more in keeping with the intention of Aristotle: for in order to confirm this distinction he adduces the common mode of speaking, according to which, when a quality is, by reason of its nature, easily changeable, and, through some accident, becomes difficultly changeable, then it is called a habit: while the contrary happens in regard to qualities, by reason of their nature, difficultly changeable: for supposing a man to have a science imperfectly, so as to be liable to lose it easily, we say that he is disposed to that science, rather than that he has the science. From this it is clear that the word "habit" implies a certain lastingness: while the word "disposition" does not.

Nor does it matter that thus to be easy and difficult to change are specific differences (of a quality), although they belong to passion and movement, and not the genus of quality. For these differences, though apparently accidental to quality, nevertheless designate differences which are proper and essential to quality. In the same way, in the genus of substance we often take accidental instead of substantial differences, in so far as by the former, essential principles are designated.

Objection 1. It would seem that habit does not imply order to an act. For everything acts according as it is in act. But the Philosopher says (*De Anima* iii, text 8), that “when one is become knowing by habit, one is still in a state of potentiality, but otherwise than before learning.” Therefore habit does not imply the relation of a principle to an act.

Objection 2. Further, that which is put in the definition of a thing, belongs to it essentially. But to be a principle of action, is put in the definition of power, as we read in *Metaph.* v, text. 17. Therefore to be the principle of an act belongs to power essentially. Now that which is essential is first in every genus. If therefore, habit also is a principle of act, it follows that it is posterior to power. And so habit and disposition will not be the first species of quality.

Objection 3. Further, health is sometimes a habit, and so are leanness and beauty. But these do not indicate relation to an act. Therefore it is not essential to habit to be a principle of act.

On the contrary, Augustine says (*De Bono Conjug.* xxi) that “habit is that whereby something is done when necessary.” And the Commentator says (*De Anima* iii) that “habit is that whereby we act when we will.”

I answer that, To have relation to an act may belong to habit, both in regard to the nature of habit, and in regard to the subject in which the habit is. In regard to the nature of habit, it belongs to every habit to have relation to an act. For it is essential to habit to imply some relation to a thing’s nature, in so far as it is suitable or unsuitable thereto. But a thing’s nature, which is the end of generation, is further ordained to another end, which is either an operation, or the product of an operation, to which one attains by means of operation. Wherefore habit implies relation not only to the very nature of a thing, but also, consequently, to operation,

inasmuch as this is the end of nature, or conducive to the end. Whence also it is stated (*Metaph.* v, text. 25) in the definition of habit, that it is a disposition whereby that which is disposed, is well or ill disposed either in regard to itself, that is to its nature, or in regard to something else, that is to the end.

But there are some habits, which even on the part of the subject in which they are, imply primarily and principally relation to an act. For, as we have said, habit primarily and of itself implies a relation to the thing’s nature. If therefore the nature of a thing, in which the habit is, consists in this very relation to an act, it follows that the habit principally implies relation to an act. Now it is clear that the nature and the notion of power is that it should be a principle of act. Wherefore every habit is subjected in a power, implies principally relation to an act.

Reply to Objection 1. Habit is an act, in so far as it is a quality: and in this respect it can be a principle of operation. It is, however, in a state of potentiality in respect to operation. Wherefore habit is called first act, and operation, second act; as it is explained in *De Anima* ii, text. 5.

Reply to Objection 2. It is not the essence of habit to be related to power, but to be related to nature. And as nature precedes action, to which power is related, therefore habit is put before power as a species of quality.

Reply to Objection 3. Health is said to be a habit, or a habitual disposition, in relation to nature, as stated above. But in so far as nature is a principle of act, it consequently implies a relation to act. Wherefore the Philosopher says (*De Hist. Animal.* x, 1), that man, or one of his members, is called healthy, “when he can perform the operation of a healthy man.” And the same applies to other habits.

Objection 1. It would seem that habits are not necessary. For by habits we are well or ill disposed in respect of something, as stated above. But a thing is well or ill disposed by its form: for in respect of its form a thing is good, even as it is a being. Therefore there is no necessity for habits.

Objection 2. Further, habit implies relation to an act. But power implies sufficiently a principle of act: for even the natural powers, without any habits, are principles of acts. Therefore there was no necessity for habits.

Objection 3. Further, as power is related to good and evil, so also is habit: and as power does not always act, so neither does habit. Given, therefore, the powers, habits become superfluous.

On the contrary, Habits are perfections (Phys. vii, text. 17). But perfection is of the greatest necessity to a thing: since it is in the nature of an end. Therefore it is necessary that there should be habits.

I answer that, As we have said above (Aa. 2,3), habit implies a disposition in relation to a thing's nature, and to its operation or end, by reason of which disposition a thing is well or ill disposed thereto. Now for a thing to need to be disposed to something else, three conditions are necessary. The first condition is that which is disposed should be distinct from that to which it is disposed; and so, that it should be related to it as potentiality is to act. Whence, if there is a being whose nature is not composed of potentiality and act, and whose substance is its own operation, which itself is for itself, there we can find no room for habit and disposition, as is clearly the case in God.

The second condition is, that that which is in a state of potentiality in regard to something else, be capable of determination in several ways and to various things. Whence if something be in a state of potentiality in regard to something else, but in regard to that only, there we find no room for disposition and habit: for such a subject from its own nature has the due relation to such an act. Wherefore if a heavenly body be composed of matter and form, since that matter is not in a state of potentiality to another form, as we said in the Ia, q. 56, a. 2, there is no need for disposition or habit in respect of the form, or even in respect of operation, since the nature of the heavenly body is not in a state of potentiality

to more than one fixed movement.

The third condition is that in disposing the subject to one of those things to which it is in potentiality, several things should occur, capable of being adjusted in various ways: so as to dispose the subject well or ill to its form or to its operation. Wherefore the simple qualities of the elements which suit the natures of the elements in one single fixed way, are not called dispositions or habits, but "simple qualities": but we call dispositions or habits, such things as health, beauty, and so forth, which imply the adjustment of several things which may vary in their relative adjustability. For this reason the Philosopher says (Metaph. v, text. 24,25) that "habit is a disposition": and disposition is "the order of that which has parts either as to place, or as to potentiality, or as to species," as we have said above (a. 1, ad 3). Wherefore, since there are many things for whose natures and operations several things must concur which may vary in their relative adjustability, it follows that habit is necessary.

Reply to Objection 1. By the form the nature of a thing is perfected: yet the subject needs to be disposed in regard to the form by some disposition. But the form itself is further ordained to operation, which is either the end, or the means to the end. And if the form is limited to one fixed operation, no further disposition, besides the form itself, is needed for the operation. But if the form be such that it can operate in diverse ways, as the soul; it needs to be disposed to its operations by means of habits.

Reply to Objection 2. Power sometimes has a relation to many things: and then it needs to be determined by something else. But if a power has not a relation to many things, it does not need a habit to determine it, as we have said. For this reason the natural forces do not perform their operations by means of habits: because they are of themselves determined to one mode of operation.

Reply to Objection 3. The same habit has not a relation to good and evil, as will be made clear further on (q. 54, a. 3): whereas the same power has a relation to good and evil. And, therefore, habits are necessary that the powers be determined to good.

Objection 1. It would seem that delight is not required for happiness. For Augustine says (De Trin. i, 8) that “vision is the entire reward of faith.” But the prize or reward of virtue is happiness, as the Philosopher clearly states (Ethic. i, 9). Therefore nothing besides vision is required for happiness.

Objection 2. Further, happiness is “the most self-sufficient of all goods,” as the Philosopher declares (Ethic. i, 7). But that which needs something else is not self-sufficient. Since then the essence of happiness consists in seeing God, as stated above (q. 3, a. 8); it seems that delight is not necessary for happiness.

Objection 3. Further, the “operation of bliss or happiness should be unhindered” (Ethic. vii, 13). But delight hinders the operation of the intellect: since it destroys the estimate of prudence (Ethic. vi, 5). Therefore delight is not necessary for happiness.

On the contrary, Augustine says (Confess. x, 23) that happiness is “joy in truth.”

I answer that, One thing may be necessary for another in four ways. First, as a preamble and preparation to it: thus instruction is necessary for science. Secondly, as perfecting it: thus the soul is necessary for the life of the body. Thirdly, as helping it from without: thus friends are necessary for some undertaking. Fourthly, as something attendant on it: thus we might say that heat is

necessary for fire. And in this way delight is necessary for happiness. For it is caused by the appetite being at rest in the good attained. Wherefore, since happiness is nothing else but the attainment of the Sovereign Good, it cannot be without concomitant delight.

Reply to Objection 1. From the very fact that a reward is given to anyone, the will of him who deserves it is at rest, and in this consists delight. Consequently, delight is included in the very notion of reward.

Reply to Objection 2. The very sight of God causes delight. Consequently, he who sees God cannot need delight.

Reply to Objection 3. Delight that is attendant upon the operation of the intellect does not hinder it, rather does it perfect it, as stated in Ethic. x, 4: since what we do with delight, we do with greater care and perseverance. On the other hand, delight which is extraneous to the operation is a hindrance thereto: sometimes by distracting the attention because, as already observed, we are more attentive to those things that delight us; and when we are very attentive to one thing, we must needs be less attentive to another: sometimes on account of opposition; thus a sensual delight that is contrary to reason, hinders the estimate of prudence more than it hinders the estimate of the speculative intellect.

Objection 1. It would seem that in happiness, delight ranks before vision. For “delight is the perfection of operation” (Ethic. x, 4). But perfection ranks before the thing perfected. Therefore delight ranks before the operation of the intellect, i.e. vision.

Objection 2. Further, that by reason of which a thing is desirable, is yet more desirable. But operations are desired on account of the delight they afford: hence, too, nature has adjusted delight to those operations which are necessary for the preservation of the individual and of the species, lest animals should disregard such operations. Therefore, in happiness, delight ranks before the operation of the intellect, which is vision.

Objection 3. Further, vision corresponds to faith; while delight or enjoyment corresponds to charity. But charity ranks before faith, as the Apostle says (1 Cor. 13:13). Therefore delight or enjoyment ranks before vision.

On the contrary, The cause is greater than its effect. But vision is the cause of delight. Therefore vision ranks before delight.

I answer that, The Philosopher discusses this question (Ethic. x, 4), and leaves it unsolved. But if one consider the matter carefully, the operation of the intellect which is vision, must needs rank before delight. For delight consists in a certain repose of the will. Now that the will finds rest in anything, can only be on account of the goodness of that thing in which it reposes. If therefore the will reposes in an operation, the will’s repose is caused by the goodness of the operation. Nor does the will seek good for the sake of repose; for thus the

very act of the will would be the end, which has been disproved above (q. 1, a. 1, ad 2; q. 3, a. 4): but it seeks to be at rest in the operation, because that operation is its good. Consequently it is evident that the operation in which the will reposes ranks before the resting of the will therein.

Reply to Objection 1. As the Philosopher says (Ethic. x, 4) “delight perfects operation as vigor perfects youth,” because it is a result of youth. Consequently delight is a perfection attendant upon vision; but not a perfection whereby vision is made perfect in its own species.

Reply to Objection 2. The apprehension of the senses does not attain to the universal good, but to some particular good which is delightful. And consequently, according to the sensitive appetite which is in animals, operations are sought for the sake of delight. But the intellect apprehends the universal good, the attainment of which results in delight: wherefore its purpose is directed to good rather than to delight. Hence it is that the Divine intellect, which is the Author of nature, adjusted delights to operations on account of the operations. And we should form our estimate of things not simply according to the order of the sensitive appetite, but rather according to the order of the intellectual appetite.

Reply to Objection 3. Charity does not seem the beloved good for the sake of delight: it is for charity a consequence that it delights in the good gained which it loves. Thus delight does not answer to charity as its end, but vision does, whereby the end is first made present to charity.

Objection 1. It would seem that comprehension is not necessary for happiness. For Augustine says (*Ad Paulinam de Videndo Deum*;*) : “To reach God with the mind is happiness, to comprehend Him is impossible.” Therefore happiness is without comprehension.

Objection 2. Further, happiness is the perfection of man as to his intellective part, wherein there are no other powers than the intellect and will, as stated in the Ia, Qq. 79 and following. But the intellect is sufficiently perfected by seeing God, and the will by enjoying Him. Therefore there is no need for comprehension as a third.

Objection 3. Further, happiness consists in an operation. But operations are determined by their objects: and there are two universal objects, the true and the good: of which the true corresponds to vision, and good to delight. Therefore there is no need for comprehension as a third.

On the contrary, The Apostle says (1 Cor. 9:24): “So run that you may comprehend [Douay: ‘obtain’].” But happiness is the goal of the spiritual race: hence he says (2 Tim. 4:7,8): “I have fought a good fight, I have finished my course, I have kept the faith; as to the rest there is laid up for me a crown of justice.” Therefore comprehension is necessary for Happiness.

I answer that, Since Happiness consists in gaining the last end, those things that are required for Happiness must be gathered from the way in which man is ordered to an end. Now man is ordered to an intelligible end partly through his intellect, and partly through his will: through his intellect, in so far as a certain imperfect knowledge of the end pre-exists in the intellect: through the will, first by love which is the will’s first movement towards anything; secondly, by a real relation of the lover to the thing beloved, which relation may be threefold. For sometimes the thing beloved is present to the lover: and then it is no longer sought for.

Sometimes it is not present, and it is impossible to attain it: and then, too, it is not sought for. But sometimes it is possible to attain it, yet it is raised above the capability of the attainer, so that he cannot have it forthwith; and this is the relation of one that hopes, to that which he hopes for, and this relation alone causes a search for the end. To these three, there are a corresponding three in Happiness itself. For perfect knowledge of the end corresponds to imperfect knowledge; presence of the end corresponds to the relation of hope; but delight in the end now present results from love, as already stated (a. 2, ad 3). And therefore these three must concur with Happiness; to wit, vision, which is perfect knowledge of the intelligible end; comprehension, which implies presence of the end; and delight or enjoyment, which implies repose of the lover in the object beloved.

Reply to Objection 1. Comprehension is twofold. First, inclusion of the comprehended in the comprehensor; and thus whatever is comprehended by the finite, is itself finite. Wherefore God cannot be thus comprehended by a created intellect. Secondly, comprehension means nothing but the holding of something already present and possessed: thus one who runs after another is said to comprehend[†] him when he lays hold on him. And in this sense comprehension is necessary for Happiness.

Reply to Objection 2. Just as hope and love pertain to the will, because it is the same one that loves a thing, and that tends towards it while not possessed, so, too, comprehension and delight belong to the will, since it is the same that possesses a thing and reposes therein.

Reply to Objection 3. Comprehension is not a distinct operation from vision; but a certain relation to the end already gained. Wherefore even vision itself, or the thing seen, inasmuch as it is present, is the object of comprehension.

* Cf. *Serm. xxxciii De Verb. Dom.* † In English we should say ‘catch.’

Objection 1. It would seem that rectitude of the will is not necessary for Happiness. For Happiness consists essentially in an operation of the intellect, as stated above (q. 3, a. 4). But rectitude of the will, by reason of which men are said to be clean of heart, is not necessary for the perfect operation of the intellect: for Augustine says (*Retract.* i, 4) “I do not approve of what I said in a prayer: O God, Who didst will none but the clean of heart to know the truth. For it can be answered that many who are not clean of heart, know many truths.” Therefore rectitude of the will is not necessary for Happiness.

Objection 2. Further, what precedes does not depend on what follows. But the operation of the intellect precedes the operation of the will. Therefore Happiness, which is the perfect operation of the intellect, does not depend on rectitude of the will.

Objection 3. Further, that which is ordained to another as its end, is not necessary, when the end is already gained; as a ship, for instance, after arrival in port. But rectitude of will, which is by reason of virtue, is ordained to Happiness as to its end. Therefore, Happiness once obtained, rectitude of the will is no longer necessary.

On the contrary, It is written (*Mat.* 5:8): “Blessed are the clean of heart; for they shall see God”: and (*Heb.* 12:14): “Follow peace with all men, and holiness; without which no man shall see God.”

I answer that, Rectitude of will is necessary for Happiness both antecedently and concomitantly. An-

tecedently, because rectitude of the will consists in being duly ordered to the last end. Now the end in comparison to what is ordained to the end is as form compared to matter. Wherefore, just as matter cannot receive a form, unless it be duly disposed thereto, so nothing gains an end, except it be duly ordained thereto. And therefore none can obtain Happiness, without rectitude of the will. Concomitantly, because as stated above (q. 3, a. 8), final Happiness consists in the vision of the Divine Essence, Which is the very essence of goodness. So that the will of him who sees the Essence of God, of necessity, loves, whatever he loves, in subordination to God; just as the will of him who sees not God’s Essence, of necessity, loves whatever he loves, under the common notion of good which he knows. And this is precisely what makes the will right. Wherefore it is evident that Happiness cannot be without a right will.

Reply to Objection 2. Every act of the will is preceded by an act of the intellect: but a certain act of the will precedes a certain act of the intellect. For the will tends to the final act of the intellect which is happiness. And consequently right inclination of the will is required antecedently for happiness, just as the arrow must take a right course in order to strike the target.

Reply to Objection 3. Not everything that is ordained to the end, ceases with the getting of the end: but only that which involves imperfection, such as movement. Hence the instruments of movement are no longer necessary when the end has been gained: but the due order to the end is necessary.

Objection 1. It would seem that the body is necessary for Happiness. For the perfection of virtue and grace presupposes the perfection of nature. But Happiness is the perfection of virtue and grace. Now the soul, without the body, has not the perfection of nature; since it is naturally a part of human nature, and every part is imperfect while separated from its whole. Therefore the soul cannot be happy without the body.

Objection 2. Further, Happiness is a perfect operation, as stated above (q. 3, Aa. 2,5). But perfect operation follows perfect being: since nothing operates except in so far as it is an actual being. Since, therefore, the soul has not perfect being, while it is separated from the body, just as neither has a part, while separate from its whole; it seems that the soul cannot be happy without the body.

Objection 3. Further, Happiness is the perfection of man. But the soul, without the body, is not man. Therefore Happiness cannot be in the soul separated from the body.

Objection 4. Further, according to the Philosopher (Ethic. vii, 13) "the operation of bliss," in which operation happiness consists, is "not hindered." But the operation of the separate soul is hindered; because, as Augustine says (Gen. ad lit. xii, 35), the soul "has a natural desire to rule the body, the result of which is that it is held back, so to speak, from tending with all its might to the heavenward journey," i.e. to the vision of the Divine Essence. Therefore the soul cannot be happy without the body.

Objection 5. Further, Happiness is the sufficient good and lulls desire. But this cannot be said of the separated soul; for it yet desires to be united to the body, as Augustine says (Gen. ad lit. xii, 35). Therefore the soul is not happy while separated from the body.

Objection 6. Further, in Happiness man is equal to the angels. But the soul without the body is not equal to the angels, as Augustine says (Gen. ad lit. xii, 35). Therefore it is not happy.

On the contrary, It is written (Apoc. 14:13): "Happy [Douay: 'blessed'] are the dead who die in the Lord."

I answer that, Happiness is twofold; the one is imperfect and is had in this life; the other is perfect, consisting in the vision of God. Now it is evident that the body is necessary for the happiness of this life. For the happiness of this life consists in an operation of the intellect, either speculative or practical. And the operation of the intellect in this life cannot be without a phantasm, which is only in a bodily organ, as was shown in the Ia, q. 84, Aa. 6,7. Consequently that happiness which can be had in this life, depends, in a way, on the body. But as to perfect Happiness, which consists in the vision of God, some have maintained that it is not possible to the soul separated from the body; and have said that the souls of saints, when separated from their bodies,

do not attain to that Happiness until the Day of Judgment, when they will receive their bodies back again. And this is shown to be false, both by authority and by reason. By authority, since the Apostle says (2 Cor. 5:6): "While we are in the body, we are absent from the Lord"; and he points out the reason of this absence, saying: "For we walk by faith and not by sight." Now from this it is clear that so long as we walk by faith and not by sight, bereft of the vision of the Divine Essence, we are not present to the Lord. But the souls of the saints, separated from their bodies, are in God's presence; wherefore the text continues: "But we are confident and have a good will to be absent. . . from the body, and to be present with the Lord." Whence it is evident that the souls of the saints, separated from their bodies, "walk by sight," seeing the Essence of God, wherein is true Happiness.

Again this is made clear by reason. For the intellect needs not the body, for its operation, save on account of the phantasms, wherein it looks on the intelligible truth, as stated in the Ia, q. 84, a. 7. Now it is evident that the Divine Essence cannot be seen by means of phantasms, as stated in the Ia, q. 12, a. 3. Wherefore, since man's perfect Happiness consists in the vision of the Divine Essence, it does not depend on the body. Consequently, without the body the soul can be happy.

We must, however, notice that something may belong to a thing's perfection in two ways. First, as constituting the essence thereof; thus the soul is necessary for man's perfection. Secondly, as necessary for its well-being: thus, beauty of body and keenness of perfection belong to man's perfection. Wherefore though the body does not belong in the first way to the perfection of human Happiness, yet it does in the second way. For since operation depends on a thing's nature, the more perfect is the soul in its nature, the more perfectly it has its proper operation, wherein its happiness consists. Hence, Augustine, after inquiring (Gen. ad lit. xii, 35) "whether that perfect Happiness can be ascribed to the souls of the dead separated from their bodies," answers "that they cannot see the Unchangeable Substance, as the blessed angels see It; either for some other more hidden reason, or because they have a natural desire to rule the body."

Reply to Objection 1. Happiness is the perfection of the soul on the part of the intellect, in respect of which the soul transcends the organs of the body; but not according as the soul is the natural form of the body. Wherefore the soul retains that natural perfection in respect of which happiness is due to it, though it does not retain that natural perfection in respect of which it is the form of the body.

Reply to Objection 2. The relation of the soul to being is not the same as that of other parts: for the being of the whole is not that of any individual part: wherefore, either the part ceases altogether to be, when the

whole is destroyed, just as the parts of an animal, when the animal is destroyed; or, if they remain, they have another actual being, just as a part of a line has another being from that of the whole line. But the human soul retains the being of the composite after the destruction of the body: and this because the being of the form is the same as that of its matter, and this is the being of the composite. Now the soul subsists in its own being, as stated in the Ia, q. 75, a. 2. It follows, therefore, that after being separated from the body it has perfect being and that consequently it can have a perfect operation; although it has not the perfect specific nature.

Reply to Objection 3. Happiness belongs to man in respect of his intellect: and, therefore, since the intellect remains, it can have Happiness. Thus the teeth of an Ethiopian, in respect of which he is said to be white, can retain their whiteness, even after extraction.

Reply to Objection 4. One thing is hindered by another in two ways. First, by way of opposition; thus cold hinders the action of heat: and such a hindrance to operation is repugnant to Happiness. Secondly, by way of some kind of defect, because, to wit, that which is hindered has not all that is necessary to make it perfect in every way: and such a hindrance to operation is not incompatible with Happiness, but prevents it from being perfect in every way. And thus it is that separation

from the body is said to hold the soul back from tending with all its might to the vision of the Divine Essence. For the soul desires to enjoy God in such a way that the enjoyment also may overflow into the body, as far as possible. And therefore, as long as it enjoys God, without the fellowship of the body, its appetite is at rest in that which it has, in such a way, that it would still wish the body to attain to its share.

Reply to Objection 5. The desire of the separated soul is entirely at rest, as regards the thing desired; since, to wit, it has that which suffices its appetite. But it is not wholly at rest, as regards the desirer, since it does not possess that good in every way that it would wish to possess it. Consequently, after the body has been resumed, Happiness increases not in intensity, but in extent.

Reply to Objection 6. The statement made (Gen. ad lit. xii, 35) to the effect that “the souls of the departed see not God as the angels do,” is not to be understood as referring to inequality of quantity; because even now some souls of the Blessed are raised to the higher orders of the angels, thus seeing God more clearly than the lower angels. But it refers to inequality of proportion: because the angels, even the lowest, have every perfection of Happiness that they ever will have, whereas the separated souls of the saints have not.

Objection 1. It would seem that perfection of the body is not necessary for man's perfect Happiness. For perfection of the body is a bodily good. But it has been shown above (q. 2) that Happiness does not consist in bodily goods. Therefore no perfect disposition of the body is necessary for man's Happiness.

Objection 2. Further, man's Happiness consists in the vision of the Divine Essence, as shown above (q. 3, a. 8). But the body has not part in this operation, as shown above (a. 5). Therefore no disposition of the body is necessary for Happiness.

Objection 3. Further, the more the intellect is abstracted from the body, the more perfectly it understands. But Happiness consists in the most perfect operation of the intellect. Therefore the soul should be abstracted from the body in every way. Therefore, in no way is a disposition of the body necessary for Happiness.

On the contrary, Happiness is the reward of virtue; wherefore it is written (Jn. 13:17): "You shall be blessed, if you do them." But the reward promised to the saints is not only that they shall see and enjoy God, but also that their bodies shall be well-disposed; for it is written (Is. 66:14): "You shall see and your heart shall rejoice, and your bones shall flourish like a herb." Therefore good disposition of the body is necessary for Happiness.

I answer that, If we speak of that happiness which man can acquire in this life, it is evident that a well-disposed body is of necessity required for it. For this happiness consists, according to the Philosopher (Ethic. i, 13) in "an operation according to perfect virtue"; and it is clear that man can be hindered, by indisposition of the body, from every operation of virtue.

But speaking of perfect Happiness, some have maintained that no disposition of body is necessary for Happiness; indeed, that it is necessary for the soul to be entirely separated from the body. Hence Augustine (De

Civ. Dei xxii, 26) quotes the words of Porphyry who said that "for the soul to be happy, it must be severed from everything corporeal." But this is unreasonable. For since it is natural to the soul to be united to the body; it is not possible for the perfection of the soul to exclude its natural perfection.

Consequently, we must say that perfect disposition of the body is necessary, both antecedently and consequently, for that Happiness which is in all ways perfect. Antecedently, because, as Augustine says (Gen. ad lit. xii, 35), "if body be such, that the governance thereof is difficult and burdensome, like unto flesh which is corruptible and weighs upon the soul, the mind is turned away from that vision of the highest heaven." Whence he concludes that, "when this body will no longer be 'natural,' but 'spiritual,' then will it be equalled to the angels, and that will be its glory, which erstwhile was its burden." Consequently, because from the Happiness of the soul there will be an overflow on to the body, so that this too will obtain its perfection. Hence Augustine says (Ep. ad Dioscor.) that "God gave the soul such a powerful nature that from its exceeding fulness of happiness the vigor of incorruption overflows into the lower nature."

Reply to Objection 1. Happiness does not consist in bodily good as its object: but bodily good can add a certain charm and perfection to Happiness.

Reply to Objection 2. Although the body has not part in that operation of the intellect whereby the Essence of God is seen, yet it might prove a hindrance thereto. Consequently, perfection of the body is necessary, lest it hinder the mind from being lifted up.

Reply to Objection 3. The perfect operation of the intellect requires indeed that the intellect be abstracted from this corruptible body which weighs upon the soul; but not from the spiritual body, which will be wholly subject to the spirit. On this point we shall treat in the Third Part of this work (Ia IIae, q. 82, seqq.).

Objection 1. It would seem that external goods also are necessary for Happiness. For that which is promised the saints for reward, belongs to Happiness. But external goods are promised the saints; for instance, food and drink, wealth and a kingdom: for it is said (Lk. 22:30): “That you may eat and drink at My table in My kingdom”: and (Mat. 6:20): “Lay up to yourselves treasures in heaven”: and (Mat. 25:34): “Come, ye blessed of My Father, possess you the kingdom.” Therefore external goods are necessary for Happiness.

Objection 2. Further, according to Boethius (De Consol. iii): happiness is “a state made perfect by the aggregate of all good things.” But some of man’s goods are external, although they be of least account, as Augustine says (De Lib. Arb. ii, 19). Therefore they too are necessary for Happiness.

Objection 3. Further, Our Lord said (Mat. 5:12): “Your reward is very great in heaven.” But to be in heaven implies being in a place. Therefore at least external place is necessary for Happiness.

On the contrary, It is written (Ps. 72:25): “For what have I in heaven? and besides Thee what do I desire upon earth?” As though to say: “I desire nothing but this,”—“It is good for me to adhere to my God.” Therefore nothing further external is necessary for Happiness.

I answer that, For imperfect happiness, such as can be had in this life, external goods are necessary, not as belonging to the essence of happiness, but by serving as instruments to happiness, which consists in an operation of virtue, as stated in Ethic. i, 13. For man needs in this life, the necessaries of the body, both for the operation of contemplative virtue, and for the operation of active virtue, for which latter he needs also many other things by means of which to perform its operations.

On the other hand, such goods as these are nowise necessary for perfect Happiness, which consists in see-

ing God. The reason of this is that all suchlike external goods are requisite either for the support of the animal body; or for certain operations which belong to human life, which we perform by means of the animal body: whereas that perfect Happiness which consists in seeing God, will be either in the soul separated from the body, or in the soul united to the body then no longer animal but spiritual. Consequently these external goods are nowise necessary for that Happiness, since they are ordained to the animal life. And since, in this life, the felicity of contemplation, as being more Godlike, approaches nearer than that of action to the likeness of that perfect Happiness, therefore it stands in less need of these goods of the body as stated in Ethic. x, 8.

Reply to Objection 1. All those material promises contained in Holy Scripture, are to be understood metaphorically, inasmuch as Scripture is wont to express spiritual things under the form of things corporeal, in order “that from things we know, we may rise to the desire of things unknown,” as Gregory says (Hom. xi in Evang.). Thus food and drink signify the delight of Happiness; wealth, the sufficiency of God for man; the kingdom, the lifting up of man to union of God.

Reply to Objection 2. These goods that serve for the animal life, are incompatible with that spiritual life wherein perfect Happiness consists. Nevertheless in that Happiness there will be the aggregate of all good things, because whatever good there be in these things, we shall possess it all in the Supreme Fount of goodness.

Reply to Objection 3. According to Augustine (De Serm. Dom. in Monte i, 5), it is not material heaven that is described as the reward of the saints, but a heaven raised on the height of spiritual goods. Nevertheless a bodily place, viz. the empyrean heaven, will be appointed to the Blessed, not as a need of Happiness, but by reason of a certain fitness and adornment.

Objection 1. It would seem that friends are necessary for Happiness. For future Happiness is frequently designated by Scripture under the name of “glory.” But glory consists in man’s good being brought to the notice of many. Therefore the fellowship of friends is necessary for Happiness.

Objection 2. Further, Boethius* says that “there is no delight in possessing any good whatever, without someone to share it with us.” But delight is necessary for Happiness. Therefore fellowship of friends is also necessary.

Objection 3. Further, charity is perfected in Happiness. But charity includes the love of God and of our neighbor. Therefore it seems that fellowship of friends is necessary for Happiness.

On the contrary, It is written (Wis. 7:11): “All good things came to me together with her,” i.e. with divine wisdom, which consists in contemplating God. Consequently nothing else is necessary for Happiness.

I answer that, If we speak of the happiness of this life, the happy man needs friends, as the Philosopher says (Ethic. ix, 9), not, indeed, to make use of them, since he suffices himself; nor to delight in them, since he possesses perfect delight in the operation of virtue; but for the purpose of a good operation, viz. that he may do good to them; that he may delight in seeing them do good; and again that he may be helped by them in his good work. For in order that man may do well, whether in the works of the active life, or in those of the contem-

plative life, he needs the fellowship of friends.

But if we speak of perfect Happiness which will be in our heavenly Fatherland, the fellowship of friends is not essential to Happiness; since man has the entire fullness of his perfection in God. But the fellowship of friends conduces to the well-being of Happiness. Hence Augustine says (Gen. ad lit. viii, 25) that “the spiritual creatures receive no other interior aid to happiness than the eternity, truth, and charity of the Creator. But if they can be said to be helped from without, perhaps it is only by this that they see one another and rejoice in God, at their fellowship.”

Reply to Objection 1. That glory which is essential to Happiness, is that which man has, not with man but with God.

Reply to Objection 2. This saying is to be understood of the possession of good that does not fully satisfy. This does not apply to the question under consideration; because man possesses in God a sufficiency of every good.

Reply to Objection 3. Perfection of charity is essential to Happiness, as to the love of God, but not as to the love of our neighbor. Wherefore if there were but one soul enjoying God, it would be happy, though having no neighbor to love. But supposing one neighbor to be there, love of him results from perfect love of God. Consequently, friendship is, as it were, concomitant with perfect Happiness.

* Seneca, Ep. 6

FIRST PART OF THE SECOND PART, QUESTION 5

Of the Attainment of Happiness (In Eight Articles)

We must now consider the attainment of Happiness. Under this heading there are eight points of inquiry:

- (1) Whether man can attain Happiness?
- (2) Whether one man can be happier than another?
- (3) Whether any man can be happy in this life?
- (4) Whether Happiness once had can be lost?
- (5) Whether man can attain Happiness by means of his natural powers?
- (6) Whether man attains Happiness through the action of some higher creature?
- (7) Whether any actions of man are necessary in order that man may obtain Happiness of God?
- (8) Whether every man desires Happiness?

Whether man can attain happiness?

Ia IIae q. 5 a. 1

Objection 1. It would seem that man cannot attain happiness. For just as the rational is above the sensible nature, so the intellectual is above the rational, as Dionysius declares (Div. Nom. iv, vi, vii) in several passages. But irrational animals that have the sensitive nature only, cannot attain the end of the rational nature. Therefore neither can man, who is of rational nature, attain the end of the intellectual nature, which is Happiness.

Objection 2. Further, True Happiness consists in seeing God, Who is pure Truth. But from his very nature, man considers truth in material things: wherefore “he understands the intelligible species in the phantasm” (De Anima iii, 7). Therefore he cannot attain Happiness.

Objection 3. Further, Happiness consists in attaining the Sovereign Good. But we cannot arrive at the top without surmounting the middle. Since, therefore, the angelic nature through which man cannot mount is midway between God and human nature; it seems that he cannot attain Happiness.

On the contrary, It is written (Ps. 93:12): “Blessed is the man whom Thou shalt instruct, O Lord.”

I answer that, Happiness is the attainment of the Perfect Good. Whoever, therefore, is capable of the Perfect Good can attain Happiness. Now, that man is capable of the Perfect Good, is proved both because his intellect can apprehend the universal and perfect good, and because his will can desire it. And therefore man can attain Happiness. This can be proved again from the fact that man is capable of seeing God, as stated in

Ia, q. 12, a. 1: in which vision, as we stated above (q. 3, a. 8) man’s perfect Happiness consists.

Reply to Objection 1. The rational exceeds the sensitive nature, otherwise than the intellectual surpasses the rational. For the rational exceeds the sensitive nature in respect of the object of its knowledge: since the senses have no knowledge whatever of the universal, whereas the reason has knowledge thereof. But the intellectual surpasses the rational nature, as to the mode of knowing the same intelligible truth: for the intellectual nature grasps forthwith the truth which the rational nature reaches by the inquiry of reason, as was made clear in the Ia, q. 58, a. 3; Ia, q. 79, a. 8. Therefore reason arrives by a kind of movement at that which the intellect grasps. Consequently the rational nature can attain Happiness, which is the perfection of the intellectual nature: but otherwise than the angels. Because the angels attained it forthwith after the beginning of their creation: whereas man attains it after a time. But the sensitive nature can nowise attain this end.

Reply to Objection 2. To man in the present state of life the natural way of knowing intelligible truth is by means of phantasms. But after this state of life, he has another natural way, as was stated in the Ia, q. 84, a. 7; Ia, q. 89, a. 1.

Reply to Objection 3. Man cannot surmount the angels in the degree of nature so as to be above them naturally. But he can surmount them by an operation of the intellect, by understanding that there is above the angels something that makes men happy; and when he has attained it, he will be perfectly happy.

Whether one man can be happier than another?

Ia IIae q. 5 a. 2

Objection 1. It would seem that one man cannot be happier than another. For Happiness is “the reward of virtue,” as the Philosopher says (Ethic. i, 9). But equal reward is given for all the works of virtue; because it is written (Mat. 20:10) that all who labor in the

vineyard “received every man a penny”; for, as Gregory says (Hom. xix in Evang.), “each was equally rewarded with eternal life.” Therefore one man cannot be happier than another.

Objection 2. Further, Happiness is the supreme

good. But nothing can surpass the supreme. Therefore one man's Happiness cannot be surpassed by another's.

Objection 3. Further, since Happiness is "the perfect and sufficient good" (Ethic. i, 7) it brings rest to man's desire. But his desire is not at rest, if he yet lacks some good that can be got. And if he lack nothing that he can get, there can be no still greater good. Therefore either man is not happy; or, if he be happy, no other Happiness can be greater.

On the contrary, It is written (Jn. 14:2): "In My Father's house there are many mansions"; which, according to Augustine (Tract. lxxvii in Joan.) signify "the diverse dignities of merits in the one eternal life." But the dignity of eternal life which is given according to merit, is Happiness itself. Therefore there are diverse degrees of Happiness, and Happiness is not equally in all.

I answer that, As stated above (q. 1, a. 8; q. 2, a. 7), Happiness implies two things, to wit, the last end itself, i.e. the Sovereign Good; and the attainment or enjoyment of that same Good. As to that Good itself, Which is the object and cause of Happiness, one Happiness cannot be greater than another, since there is but one Sovereign Good, namely, God, by enjoying Whom,

men are made happy. But as to the attainment or enjoyment of this Good, one man can be happier than another; because the more a man enjoys this Good the happier he is. Now, that one man enjoys God more than another, happens through his being better disposed or ordered to the enjoyment of Him. And in this sense one man can be happier than another.

Reply to Objection 1. The one penny signifies that Happiness is one in its object. But the many mansions signify the manifold Happiness in the divers degrees of enjoyment.

Reply to Objection 2. Happiness is said to be the supreme good, inasmuch as it is the perfect possession or enjoyment of the Supreme Good.

Reply to Objection 3. None of the Blessed lacks any desirable good; since they have the Infinite Good Itself, Which is "the good of all good," as Augustine says (Enarr. in Ps. 134). But one is said to be happier than another, by reason of diverse participation of the same good. And the addition of other goods does not increase Happiness, since Augustine says (Confess. v, 4): "He who knows Thee, and others besides, is not the happier for knowing them, but is happy for knowing Thee alone."

Whether one can be happy in this life?

Ia IIae q. 5 a. 3

Objection 1. It would seem that Happiness can be had in this life. For it is written (Ps. 118:1): "Blessed are the undefiled in the way, who walk in the law of the Lord." But this happens in this life. Therefore one can be happy in this life.

Objection 2. Further, imperfect participation in the Sovereign Good does not destroy the nature of Happiness, otherwise one would not be happier than another. But men can participate in the Sovereign Good in this life, by knowing and loving God, albeit imperfectly. Therefore man can be happy in this life.

Objection 3. Further, what is said by many cannot be altogether false: since what is in many, comes, apparently, from nature; and nature does not fail altogether. Now many say that Happiness can be had in this life, as appears from Ps. 143:15: "They have called the people happy that hath these things," to wit, the good things in this life. Therefore one can be happy in this life.

On the contrary, It is written (Job 14:1): "Man born of a woman, living for a short time, is filled with many miseries." But Happiness excludes misery. Therefore man cannot be happy in this life.

I answer that, A certain participation of Happiness can be had in this life: but perfect and true Happiness cannot be had in this life. This may be seen from a twofold consideration.

First, from the general notion of happiness. For since happiness is a "perfect and sufficient good," it excludes every evil, and fulfils every desire. But in this

life every evil cannot be excluded. For this present life is subject to many unavoidable evils; to ignorance on the part of the intellect; to inordinate affection on the part of the appetite, and to many penalties on the part of the body; as Augustine sets forth in De Civ. Dei xix, 4. Likewise neither can the desire for good be satiated in this life. For man naturally desires the good, which he has, to be abiding. Now the goods of the present life pass away; since life itself passes away, which we naturally desire to have, and would wish to hold abidingly, for man naturally shrinks from death. Wherefore it is impossible to have true Happiness in this life.

Secondly, from a consideration of the specific nature of Happiness, viz. the vision of the Divine Essence, which man cannot obtain in this life, as was shown in the Ia, q. 12, a. 11. Hence it is evident that none can attain true and perfect Happiness in this life.

Reply to Objection 1. Some are said to be happy in this life, either on account of the hope of obtaining Happiness in the life to come, according to Rom. 8:24: "We are saved by hope"; or on account of a certain participation of Happiness, by reason of a kind of enjoyment of the Sovereign Good.

Reply to Objection 2. The imperfection of participated Happiness is due to one of two causes. First, on the part of the object of Happiness, which is not seen in Its Essence: and this imperfection destroys the nature of true Happiness. Secondly, the imperfection may be on the part of the participator, who indeed attains the object of Happiness, in itself, namely, God: imperfectly,

however, in comparison with the way in which God enjoys Himself. This imperfection does not destroy the true nature of Happiness; because, since Happiness is an operation, as stated above (q. 3, a. 2), the true nature of Happiness is taken from the object, which specifies

the act, and not from the subject.

Reply to Objection 3. Men esteem that there is some kind of happiness to be had in this life, on account of a certain likeness to true Happiness. And thus they do not fail altogether in their estimate.

Whether happiness once had can be lost?

Ia IIae q. 5 a. 4

Objection 1. It would seem that Happiness can be lost. For Happiness is a perfection. But every perfection is in the thing perfected according to the mode of the latter. Since then man is, by his nature, changeable, it seems that Happiness is participated by man in a changeable manner. And consequently it seems that man can lose Happiness.

Objection 2. Further, Happiness consists in an act of the intellect; and the intellect is subject to the will. But the will can be directed to opposites. Therefore it seems that it can desist from the operation whereby man is made happy: and thus man will cease to be happy.

Objection 3. Further, the end corresponds to the beginning. But man's Happiness has a beginning, since man was not always happy. Therefore it seems that it has an end.

On the contrary, It is written (Mat. 25:46) of the righteous that "they shall go . . . into life everlasting," which, as above stated (a. 2), is the Happiness of the saints. Now what is eternal ceases not. Therefore Happiness cannot be lost.

I answer that, If we speak of imperfect happiness, such as can be had in this life, in this sense it can be lost. This is clear of contemplative happiness, which is lost either by forgetfulness, for instance, when knowledge is lost through sickness; or again by certain occupations, whereby a man is altogether withdrawn from contemplation.

This is also clear of active happiness: since man's will can be changed so as to fall to vice from the virtue, in whose act that happiness principally consists. If, however, the virtue remain unimpaired, outward changes can indeed disturb such like happiness, in so far as they hinder many acts of virtue; but they cannot take it away altogether because there still remains an act of virtue, whereby man bears these trials in a praiseworthy manner. And since the happiness of this life can be lost, a circumstance that appears to be contrary to the nature of happiness, therefore did the Philosopher state (Ethic. i, 10) that some are happy in this life, not simply, but "as men," whose nature is subject to change.

But if we speak of that perfect Happiness which we await after this life, it must be observed that Origen (Peri Archon. ii, 3), following the error of certain Platonists, held that man can become unhappy after the final Happiness.

This, however, is evidently false, for two reasons. First, from the general notion of happiness. For since happiness is the "perfect and sufficient good," it must

needs set man's desire at rest and exclude every evil. Now man naturally desires to hold to the good that he has, and to have the surety of his holding: else he must of necessity be troubled with the fear of losing it, or with the sorrow of knowing that he will lose it. Therefore it is necessary for true Happiness that man have the assured opinion of never losing the good that he possesses. If this opinion be true, it follows that he never will lose happiness: but if it be false, it is in itself an evil that he should have a false opinion: because the false is the evil of the intellect, just as the true is its good, as stated in Ethic. vi, 2. Consequently he will no longer be truly happy, if evil be in him.

Secondly, it is again evident if we consider the specific nature of Happiness. For it has been shown above (q. 3, a. 8) that man's perfect Happiness consists in the vision of the Divine Essence. Now it is impossible for anyone seeing the Divine Essence, to wish not to see It. Because every good that one possesses and yet wishes to be without, is either insufficient, something more sufficient being desired in its stead; or else has some inconvenience attached to it, by reason of which it becomes wearisome. But the vision of the Divine Essence fills the soul with all good things, since it unites it to the source of all goodness; hence it is written (Ps. 16:15): "I shall be satisfied when Thy glory shall appear"; and (Wis. 7:11): "All good things came to me together with her," i.e. with the contemplation of wisdom. In like manner neither has it any inconvenience attached to it; because it is written of the contemplation of wisdom (Wis. 8:16): "Her conversation hath no bitterness, nor her company any tediousness." It is thus evident that the happy man cannot forsake Happiness of his own accord. Moreover, neither can he lose Happiness, through God taking it away from him. Because, since the withdrawal of Happiness is a punishment, it cannot be enforced by God, the just Judge, except for some fault; and he that sees God cannot fall into a fault, since rectitude of the will, of necessity, results from that vision as was shown above (q. 4, a. 4). Nor again can it be withdrawn by any other agent. Because the mind that is united to God is raised above all other things: and consequently no other agent can sever the mind from that union. Therefore it seems unreasonable that as time goes on, man should pass from happiness to misery, and vice versa; because such like vicissitudes of time can only be for such things as are subject to time and movement.

Reply to Objection 1. Happiness is consummate perfection, which excludes every defect from the happy.

And therefore whoever has happiness has it altogether unchangeably: this is done by the Divine power, which raises man to the participation of eternity which transcends all change.

Reply to Objection 2. The will can be directed to opposites, in things which are ordained to the end; but it is ordained, of natural necessity, to the last end. This is evident from the fact that man is unable not to wish

to be happy.

Reply to Objection 3. Happiness has a beginning owing to the condition of the participator: but it has no end by reason of the condition of the good, the participation of which makes man happy. Hence the beginning of happiness is from one cause, its endlessness is from another.

Whether man can attain happiness by his natural powers?

Ia IIae q. 5 a. 5

Objection 1. It would seem that man can attain Happiness by his natural powers. For nature does not fail in necessary things. But nothing is so necessary to man as that by which he attains the last end. Therefore this is not lacking to human nature. Therefore man can attain Happiness by his natural powers.

Objection 2. Further, since man is more noble than irrational creatures, it seems that he must be better equipped than they. But irrational creatures can attain their end by their natural powers. Much more therefore can man attain Happiness by his natural powers.

Objection 3. Further, Happiness is a “perfect operation,” according to the Philosopher (Ethic. vii, 13). Now the beginning of a thing belongs to the same principle as the perfecting thereof. Since, therefore, the imperfect operation, which is as the beginning in human operations, is subject to man’s natural power, whereby he is master of his own actions; it seems that he can attain to perfect operation, i.e. Happiness, by his natural powers.

On the contrary, Man is naturally the principle of his action, by his intellect and will. But final Happiness prepared for the saints, surpasses the intellect and will of man; for the Apostle says (1 Cor. 2:9) “Eye hath not seen, nor ear heard, neither hath it entered into the heart of man, what things God hath prepared for them that love Him.” Therefore man cannot attain Happiness by his natural powers.

I answer that, Imperfect happiness that can be had in this life, can be acquired by man by his natural powers, in the same way as virtue, in whose operation it consists: on this point we shall speak further on (q. 63). But man’s perfect Happiness, as stated above (q. 3, a. 8), consists in the vision of the Divine Essence. Now the vision of God’s Essence surpasses the nature not only of man, but also of every creature, as was shown in the Ia, q. 12, a. 4. For the natural knowledge of every creature is in keeping with the mode of his substance: thus it is said of the intelligence (De Causis; Prop. viii) that “it knows things that are above it, and things that are below it, according to the mode of its substance.” But every

knowledge that is according to the mode of created substance, falls short of the vision of the Divine Essence, which infinitely surpasses all created substance. Consequently neither man, nor any creature, can attain final Happiness by his natural powers.

Reply to Objection 1. Just as nature does not fail man in necessities, although it has not provided him with weapons and clothing, as it provided other animals, because it gave him reason and hands, with which he is able to get these things for himself; so neither did it fail man in things necessary, although it gave him not the wherewithal to attain Happiness: since this it could not do. But it did give him free-will, with which he can turn to God, that He may make him happy. “For what we do by means of our friends, is done, in a sense, by ourselves” (Ethic. iii, 3).

Reply to Objection 2. The nature that can attain perfect good, although it needs help from without in order to attain it, is of more noble condition than a nature which cannot attain perfect good, but attains some imperfect good, although it need no help from without in order to attain it, as the Philosopher says (De Coel. ii, 12). Thus he is better disposed to health who can attain perfect health, albeit by means of medicine, than he who can attain but imperfect health, without the help of medicine. And therefore the rational creature, which can attain the perfect good of happiness, but needs the Divine assistance for the purpose, is more perfect than the irrational creature, which is not capable of attaining this good, but attains some imperfect good by its natural powers.

Reply to Objection 3. When imperfect and perfect are of the same species, they can be caused by the same power. But this does not follow of necessity, if they be of different species: for not everything, that can cause the disposition of matter, can produce the final perfection. Now the imperfect operation, which is subject to man’s natural power, is not of the same species as that perfect operation which is man’s happiness: since operation takes its species from its object. Consequently the argument does not prove.

Objection 1. It would seem that man can be made happy through the action of some higher creature, viz. an angel. For since we observe a twofold order in things—one, of the parts of the universe to one another, the other, of the whole universe to a good which is outside the universe; the former order is ordained to the second as to its end (Metaph. xii, 10). Thus the mutual order of the parts of an army is dependent on the order of the parts of an army is dependent on the order of the whole army to the general. But the mutual order of the parts of the universe consists in the higher creatures acting on the lower, as stated in the Ia, q. 109, a. 2: while happiness consists in the order of man to a good which is outside the universe, i.e. God. Therefore man is made happy, through a higher creature, viz. an angel, acting on him.

Objection 2. Further, that which is such in potentiality, can be reduced to act, by that which is such actually: thus what is potentially hot, is made actually hot, by something that is actually hot. But man is potentially happy. Therefore he can be made actually happy by an angel who is actually happy.

Objection 3. Further, Happiness consists in an operation of the intellect as stated above (q. 3, a. 4). But an angel can enlighten man's intellect as shown in the Ia, q. 111, a. 1. Therefore an angel can make a man happy.

On the contrary, It is written (Ps. 83:12): "The Lord will give grace and glory."

I answer that, Since every creature is subject to the laws of nature, from the very fact that its power and action are limited: that which surpasses created nature, cannot be done by the power of any creature. Consequently if anything need to be done that is above nature, it is done by God immediately; such as raising the dead to life, restoring sight to the blind, and such like. Now it has been shown above (a. 5) that Happiness is a good surpassing created nature. Therefore it is impossible that it be bestowed through the action of any

creature: but by God alone is man made happy, if we speak of perfect Happiness. If, however, we speak of imperfect happiness, the same is to be said of it as of the virtue, in whose act it consists.

Reply to Objection 1. It often happens in the case of active powers ordained to one another, that it belongs to the highest power to reach the last end, while the lower powers contribute to the attainment of that last end, by causing a disposition thereto: thus to the art of sailing, which commands the art of shipbuilding, it belongs to use a ship for the end for which it was made. Thus, too, in the order of the universe, man is indeed helped by the angels in the attainment of his last end, in respect of certain preliminary dispositions thereto: whereas he attains the last end itself through the First Agent, which is God.

Reply to Objection 2. When a form exists perfectly and naturally in something, it can be the principle of action on something else: for instance a hot thing heats through heat. But if a form exist in something imperfectly, and not naturally, it cannot be the principle whereby it is communicated to something else: thus the "intention" of color which is in the pupil, cannot make a thing white; nor indeed can everything enlightened or heated give heat or light to something else; for if they could, enlightening and heating would go on to infinity. But the light of glory, whereby God is seen, is in God perfectly and naturally; whereas in any creature, it is imperfectly and by likeness or participation. Consequently no creature can communicate its Happiness to another.

Reply to Objection 3. A happy angel enlightens the intellect of a man or of a lower angel, as to certain notions of the Divine works: but not as to the vision of the Divine Essence, as was stated in the Ia, q. 106, a. 1: since in order to see this, all are immediately enlightened by God.

Objection 1. It would seem that no works of man are necessary that he may obtain Happiness from God. For since God is an agent of infinite power, He requires before acting, neither matter, nor disposition of matter, but can forthwith produce the whole effect. But man's works, since they are not required for Happiness, as the efficient cause thereof, as stated above (a. 6), can be required only as dispositions thereto. Therefore God who does not require dispositions before acting, bestows Happiness without any previous works.

Objection 2. Further, just as God is the immediate cause of Happiness, so is He the immediate cause of nature. But when God first established nature, He produced creatures without any previous disposition or

action on the part of the creature, but made each one perfect forthwith in its species. Therefore it seems that He bestows Happiness on man without any previous works.

Objection 3. Further, the Apostle says (Rom. 4:6) that Happiness is of the man "to whom God reputeth justice without works." Therefore no works of man are necessary for attaining Happiness.

On the contrary, It is written (Jn. 13:17): "If you know these things, you shall be blessed if you do them." Therefore Happiness is obtained through works.

I answer that, Rectitude of the will, as stated above (q. 4, a. 4), is necessary for Happiness; since it is nothing else than the right order of the will to the last end; and it is therefore necessary for obtaining the end, just

as the right disposition of matter, in order to receive the form. But this does not prove that any work of man need precede his Happiness: for God could make a will having a right tendency to the end, and at the same time attaining the end; just as sometimes He disposes matter and at the same time introduces the form. But the order of Divine wisdom demands that it should not be thus; for as is stated in *De Coel.* ii, 12, “of those things that have a natural capacity for the perfect good, one has it without movement, some by one movement, some by several.” Now to possess the perfect good without movement, belongs to that which has it naturally: and to have Happiness naturally belongs to God alone. Therefore it belongs to God alone not to be moved towards Happiness by any previous operation. Now since Happiness surpasses every created nature, no pure creature can becomingly gain Happiness, without the movement of operation, whereby it tends thereto. But the angel, who is above man in the natural order, obtained it, according to the order of Divine wisdom, by one movement of a meritorious work, as was explained in the Ia, q. 62, a. 5; whereas man obtains it by many movements of works which are called merits. Wherefore also according to the Philosopher (*Ethic.* i, 9), happiness is the reward of works of virtue.

Reply to Objection 1. Works are necessary to man in order to gain Happiness; not on account of the insufficiency of the Divine power which bestows Happiness, but that the order in things be observed.

Reply to Objection 2. God produced the first creatures so that they are perfect forthwith, without any previous disposition or operation of the creature; because He instituted the first individuals of the various species, that through them nature might be propagated to their progeny. In like manner, because Happiness was to be bestowed on others through Christ, who is God and Man, “Who,” according to *Heb.* 2:10, “had brought many children into glory”; therefore, from the very beginning of His conception, His soul was happy, without any previous meritorious operation. But this is peculiar to Him: for Christ’s merit avails baptized children for the gaining of Happiness, though they have no merits of their own; because by Baptism they are made members of Christ.

Reply to Objection 3. The Apostle is speaking of the Happiness of Hope, which is bestowed on us by sanctifying grace, which is not given on account of previous works. For grace is not a term of movement, as Happiness is; rather is it the principle of the movement that tends towards Happiness.

Whether every man desires happiness?

Ia IIae q. 5 a. 8

Objection 1. It would seem that not all desire Happiness. For no man can desire what he knows not; since the apprehended good is the object of the appetite (*De Anima* iii, 10). But many know not what Happiness is. This is evident from the fact that, as Augustine says (*De Trin.* xiii, 4), “some thought that Happiness consists in pleasures of the body; some, in a virtue of the soul; some in other things.” Therefore not all desire Happiness.

Objection 2. Further, the essence of Happiness is the vision of the Divine Essence, as stated above (q. 3, a. 8). But some consider it impossible for man to see the Divine Essence; wherefore they desire it not. Therefore all men do not desire Happiness.

Objection 3. Further, Augustine says (*De Trin.* xiii, 5) that “happy is he who has all he desires, and desires nothing amiss.” But all do not desire this; for some desire certain things amiss, and yet they wish to desire such things. Therefore all do not desire Happiness.

On the contrary, Augustine says (*De Trin.* xiii, 3): “If that actor had said: ‘You all wish to be happy; you do not wish to be unhappy,’ he would have said that which none would have failed to acknowledge in his will.” Therefore everyone desires to be happy.

I answer that, Happiness can be considered in two ways. First according to the general notion of happiness: and thus, of necessity, every man desires happiness. For the general notion of happiness consists in the perfect good, as stated above (Aa. 3,4). But since good

is the object of the will, the perfect good of a man is that which entirely satisfies his will. Consequently to desire happiness is nothing else than to desire that one’s will be satisfied. And this everyone desires. Secondly we may speak of Happiness according to its specific notion, as to that in which it consists. And thus all do not know Happiness; because they know not in what thing the general notion of happiness is found. And consequently, in this respect, not all desire it. Wherefore the reply to the first Objection is clear.

Reply to Objection 2. Since the will follows the apprehension of the intellect or reason; just as it happens that where there is no real distinction, there may be a distinction according to the consideration of reason; so does it happen that one and the same thing is desired in one way, and not desired in another. So that happiness may be considered as the final and perfect good, which is the general notion of happiness: and thus the will naturally and of necessity tends thereto, as stated above. Again it can be considered under other special aspects, either on the part of the operation itself, or on the part of the operating power, or on the part of the object; and thus the will does not tend thereto of necessity.

Reply to Objection 3. This definition of Happiness given by some—“Happy is the man that has all he desires,” or, “whose every wish is fulfilled” is a good and adequate definition; but an inadequate definition if understood in another. For if we understand it simply of all that man desires by his natural appetite, thus it is

true that he who has all that he desires, is happy: since nothing satisfies man's natural desire, except the perfect good which is Happiness. But if we understand it of those things that man desires according to the apprehension of the reason, thus it does not belong to Happiness, to have certain things that man desires; rather does it belong to unhappiness, in so far as the possession of such things hinders man from having all that he desires nat-

urally; thus it is that reason sometimes accepts as true things that are a hindrance to the knowledge of truth. And it was through taking this into consideration that Augustine added so as to include perfect Happiness—that he “desires nothing amiss”: although the first part suffices if rightly understood, to wit, that “happy is he who has all he desires.”

FIRST PART OF THE SECOND PART, QUESTION 50

Of the Subject of Habits (In Six Articles)

We consider next the subject of habits: and under this head there are six points of inquiry:

- (1) Whether there is a habit in the body?
- (2) Whether the soul is a subject of habit, in respect of its essence or in respect of its power?
- (3) Whether in the powers of the sensitive part there can be a habit?
- (4) Whether there is a habit in the intellect?
- (5) Whether there is a habit in the will?
- (6) Whether there is a habit in separate substances?

Whether there is a habit in the body?

Ia IIae q. 50 a. 1

Objection 1. It would seem that there is not a habit in the body. For, as the Commentator says (De Anima iii), “a habit is that whereby we act when we will.” But bodily actions are not subject to the will, since they are natural. Therefore there can be no habit in the body.

Objection 2. Further, all bodily dispositions are easy to change. But habit is a quality, difficult to change. Therefore no bodily disposition can be a habit.

Objection 3. Further, all bodily dispositions are subject to change. But change can only be in the third species of quality, which is divided against habit. Therefore there is no habit in the body.

On the contrary, The Philosopher says in the Book of Predicaments (De Categor. vi) that health of the body and incurable disease are called habits.

I answer that, As we have said above (q. 49, Aa. 2 seqq.), habit is a disposition of a subject which is in a state of potentiality either to form or to operation. Therefore in so far as habit implies disposition to operation, no habit is principally in the body as its subject. For every operation of the body proceeds either from a natural quality of the body or from the soul moving the body. Consequently, as to those operations which proceed from its nature, the body is not disposed by a habit: because the natural forces are determined to one mode of operation; and we have already said (q. 49, a. 4) that it is when the subject is in potentiality to many things that a habitual disposition is required. As to the operations which proceed from the soul through the body, they belong principally to the soul, and secondarily to the body. Now habits are in proportion to their operations: whence “by like acts like habits are formed” (Ethic. ii, 1,2). And therefore the dispositions to such operations are principally in the soul. But they can be secondarily in the body: to wit, in so far as the body is disposed and enabled with promptitude to help in the operations of the soul.

If, however, we speak of the disposition of the subject to form, thus a habitual disposition can be in the body, which is related to the soul as a subject is to its form. And in this way health and beauty and such like

are called habitual dispositions. Yet they have not the nature of habit perfectly: because their causes, of their very nature, are easily changeable.

On the other hand, as Simplicius reports in his Commentary on the Predicaments, Alexander denied absolutely that habits or dispositions of the first species are in the body: and held that the first species of quality belonged to the soul alone. And he held that Aristotle mentions health and sickness in the Book on the Predicaments not as though they belonged to the first species of quality, but by way of example: so that he would mean that just as health and sickness may be easy or difficult to change, so also are all the qualities of the first species, which are called habits and dispositions. But this is clearly contrary to the intention of Aristotle: both because he speaks in the same way of health and sickness as examples, as of virtue and science; and because in Phys. vii, text. 17, he expressly mentions beauty and health among habits.

Reply to Objection 1. This objection runs in the sense of habit as a disposition to operation, and of those actions of the body which are from nature: but not in the sense of those actions which proceed from the soul, and the principle of which is the will.

Reply to Objection 2. Bodily dispositions are not simply difficult to change on account of the changeableness of their bodily causes. But they may be difficult to change by comparison to such a subject, because, to wit, as long as such a subject endures, they cannot be removed; or because they are difficult to change, by comparison to other dispositions. But qualities of the soul are simply difficult to change, on account of the unchangeableness of the subject. And therefore he does not say that health which is difficult to change is a habit simply: but that it is “as a habit,” as we read in the Greek*. On the other hand, the qualities of the soul are called habits simply.

Reply to Objection 3. Bodily dispositions which are in the first species of quality, as some maintained, differ from qualities of the third species, in this, that the qualities of the third species consist in some “be-

* *isos hexin* (Categor. viii)

coming” and movement, as it were, wherefore they are called passions or passible qualities. But when they have attained to perfection (specific perfection, so to speak), they have then passed into the first species of quality. But Simplicius in his Commentary disapproves of this; for in this way heating would be in the third species, and heat in the first species of quality; whereas Aristotle puts heat in the third.

Wherefore Porphyrius, as Simplicius reports (Commentary), says that passion or passion-like quality, disposition and habit, differ in bodies by way of intensity and remissness. For when a thing receives heat in this only that it is being heated, and not so as to be able to give heat, then we have passion, if it is transitory; or passion-like quality if it is permanent. But when it has been brought to the point that it is able to heat something else, then it is a disposition; and if it goes so far

as to be firmly fixed and to become difficult to change, then it will be a habit: so that disposition would be a certain intensity of passion or passion-like quality, and habit an intensity or disposition. But Simplicius disapproves of this, for such intensity and remissness do not imply diversity on the part of the form itself, but on the part of the diverse participation thereof by the subject; so that there would be no diversity among the species of quality. And therefore we must say otherwise that, as was explained above (q. 49, a. 2, ad 1), the adjustment of the passion-like qualities themselves, according to their suitability to nature, implies the notion of disposition: and so, when a change takes place in these same passion-like qualities, which are heat and cold, moisture and dryness, there results a change as to sickness and health. But change does not occur in regard to like habits and dispositions, primarily and of themselves.

Whether the soul is the subject of habit in respect of its essence or in respect of its power? Ia IIae q. 50 a. 2

Objection 1. It would seem that habit is in the soul in respect of its essence rather than in respect of its powers. For we speak of dispositions and habits in relation to nature, as stated above (q. 49, a. 2). But nature regards the essence of the soul rather than the powers; because it is in respect of its essence that the soul is the nature of such a body and the form thereof. Therefore habits are in the soul in respect of its essence and not in respect of its powers.

Objection 2. Further, accident is not the subject of accident. Now habit is an accident. But the powers of the soul are in the genus of accident, as we have said in the Ia, q. 77, a. 1, ad 5. Therefore habit is not in the soul in respect of its powers.

Objection 3. Further, the subject is prior to that which is in the subject. But since habit belongs to the first species of quality, it is prior to power, which belongs to the second species. Therefore habit is not in a power of the soul as its subject.

On the contrary, The Philosopher (Ethic. i, 13) puts various habits in the various powers of the soul.

I answer that, As we have said above (q. 49, Aa. 2,3), habit implies a certain disposition in relation to nature or to operation. If therefore we take habit as having a relation to nature, it cannot be in the soul—that is, if we speak of human nature: for the soul itself is the form completing the human nature; so that, regarded in this way, habit or disposition is rather to be found in the body by reason of its relation to the soul, than in the soul by reason of its relation to the body. But if we speak of a higher nature, of which man may become a partaker, according to 2 Pet. 1, “that we may be partakers of the Divine Nature”: thus nothing hinders some

habit, namely, grace, from being in the soul in respect of its essence, as we shall state later on (q. 110, a. 4).

On the other hand, if we take habit in its relation to operation, it is chiefly thus that habits are found in the soul: in so far as the soul is not determined to one operation, but is indifferent to many, which is a condition for a habit, as we have said above (q. 49, a. 4). And since the soul is the principle of operation through its powers, therefore, regarded in this sense, habits are in the soul in respect of its powers.

Reply to Objection 1. The essence of the soul belongs to human nature, not as a subject requiring to be disposed to something further, but as a form and nature to which someone is disposed.

Reply to Objection 2. Accident is not of itself the subject of accident. But since among accidents themselves there is a certain order, the subject, according as it is under one accident, is conceived as the subject of a further accident. In this way we say that one accident is the subject of another; as superficies is the subject of color, in which sense power is the subject of habit.

Reply to Objection 3. Habit takes precedence of power, according as it implies a disposition to nature: whereas power always implies a relation to operation, which is posterior, since nature is the principle of operation. But the habit whose subject is a power, does not imply relation to nature, but to operation. Wherefore it is posterior to power. Or, we may say that habit takes precedence of power, as the complete takes precedence of the incomplete, and as act takes precedence of potentiality. For act is naturally prior to potentiality, though potentiality is prior in order of generation and time, as stated in Metaph. vii, text. 17; ix, text. 13.

Objection 1. It would seem that there cannot be any habits in the powers of the sensitive part. For as the nutritive power is an irrational part, so is the sensitive power. But there can be no habits in the powers of the nutritive part. Therefore we ought not to put any habit in the powers of the sensitive part.

Objection 2. Further, the sensitive parts are common to us and the brutes. But there are not any habits in brutes: for in them there is no will, which is put in the definition of habit, as we have said above (q. 49, a. 3). Therefore there are no habits in the sensitive powers.

Objection 3. Further, the habits of the soul are sciences and virtues: and just as science is related to the apprehensive power, so it virtue related to the appetitive power. But in the sensitive powers there are no sciences: since science is of universals, which the sensitive powers cannot apprehend. Therefore, neither can there be habits of virtue in the sensitive part.

On the contrary, The Philosopher says (*Ethic.* iii, 10) that “some virtues,” namely, temperance and fortitude, “belong to the irrational part.”

I answer that, The sensitive powers can be considered in two ways: first, according as they act from natural instinct: secondly, according as they act at the command of reason. According as they act from natural instinct, they are ordained to one thing, even as nature is; but according as they act at the command of reason, they can be ordained to various things. And thus there can be habits in them, by which they are well or ill disposed in regard to something.

Reply to Objection 1. The powers of the nutritive part have not an inborn aptitude to obey the command of reason, and therefore there are no habits in them. But the sensitive powers have an inborn aptitude to obey the command of reason; and therefore habits can be in them: for in so far as they obey reason, in a certain sense they are said to be rational, as stated in *Ethic.* i, 13.

Reply to Objection 2. The sensitive powers of dumb animals do not act at the command of reason; but

if they are left to themselves, such animals act from natural instinct: and so in them there are no habits ordained to operations. There are in them, however, certain dispositions in relation to nature, as health and beauty. But whereas by man’s reason brutes are disposed by a sort of custom to do things in this or that way, so in this sense, to a certain extent, we can admit the existence of habits in dumb animals: wherefore Augustine says (*QQ.* lxxxiii, qu. 36): “We find the most untamed beasts, deterred by fear of pain, from that wherein they took the keenest pleasure; and when this has become a custom in them, we say that they are tame and gentle.” But the habit is incomplete, as to the use of the will, for they have not that power of using or of refraining, which seems to belong to the notion of habit: and therefore, properly speaking, there can be no habits in them.

Reply to Objection 3. The sensitive appetite has an inborn aptitude to be moved by the rational appetite, as stated in *De Anima* iii, text. 57: but the rational powers of apprehension have an inborn aptitude to receive from the sensitive powers. And therefore it is more suitable that habits should be in the powers of sensitive appetite than in the powers of sensitive apprehension, since in the powers of sensitive appetite habits do not exist except according as they act at the command of the reason. And yet even in the interior powers of sensitive apprehension, we may admit of certain habits whereby man has a facility of memory, thought or imagination: wherefore also the Philosopher says (*De Memor. et Remin.* ii) that “custom conduces much to a good memory”: the reason of which is that these powers also are moved to act at the command of the reason.

On the other hand the exterior apprehensive powers, as sight, hearing and the like, are not susceptible of habits, but are ordained to their fixed acts, according to the disposition of their nature, just as the members of the body, for there are no habits in them, but rather in the powers which command their movements.

Objection 1. It would seem that there are no habits in the intellect. For habits are in conformity with operations, as stated above (a. 1). But the operations of man are common to soul and body, as stated in *De Anima* i, text. 64. Therefore also are habits. But the intellect is not an act of the body (*De Anima* iii, text. 6). Therefore the intellect is not the subject of a habit.

Objection 2. Further, whatever is in a thing, is there according to the mode of that in which it is. But that which is form without matter, is act only: whereas what is composed of form and matter, has potentiality and act at the same time. Therefore nothing at the same time potential and actual can be in that which is form

only, but only in that which is composed of matter and form. Now the intellect is form without matter. Therefore habit, which has potentiality at the same time as act, being a sort of medium between the two, cannot be in the intellect; but only in the “conjunction,” which is composed of soul and body.

Objection 3. Further, habit is a disposition whereby we are well or ill disposed in regard to something, as is said (*Metaph.* v, text. 25). But that anyone should be well or ill disposed to an act of the intellect is due to some disposition of the body: wherefore also it is stated (*De Anima* ii, text. 94) that “we observe men with soft flesh to be quick witted.” Therefore the habits

of knowledge are not in the intellect, which is separate, but in some power which is the act of some part of the body.

On the contrary, The Philosopher (Ethic. vi, 2,3,10) puts science, wisdom and understanding, which is the habit of first principles, in the intellective part of the soul.

I answer that, concerning intellective habits there have been various opinions. Some, supposing that there was only one “possible”^{*} intellect for all men, were bound to hold that habits of knowledge are not in the intellect itself, but in the interior sensitive powers. For it is manifest that men differ in habits; and so it was impossible to put the habits of knowledge directly in that, which, being only one, would be common to all men. Wherefore if there were but one single “possible” intellect of all men, the habits of science, in which men differ from one another, could not be in the “possible” intellect as their subject, but would be in the interior sensitive powers, which differ in various men.

Now, in the first place, this supposition is contrary to the mind of Aristotle. For it is manifest that the sensitive powers are rational, not by their essence, but only by participation (Ethic. i, 13). Now the Philosopher puts the intellectual virtues, which are wisdom, science and understanding, in that which is rational by its essence. Wherefore they are not in the sensitive powers, but in the intellect itself. Moreover he says expressly (De Anima iii, text. 8,18) that when the “possible” intellect “is thus identified with each thing,” that is, when it is reduced to act in respect of singulars by the intelligible species, “then it is said to be in act, as the knower is said to be in act; and this happens when the intellect can act of itself,” i.e. by considering: “and even then it is in potentiality in a sense; but not in the same way as before learning and discovering.” Therefore the “possible” intellect itself is the subject of the habit of science, by which the intellect, even though it be not actually considering, is able to consider. In the second place, this supposition is contrary to the truth. For as to whom belongs the operation, belongs also the power to operate, belongs also the habit. But to understand and

to consider is the proper act of the intellect. Therefore also the habit whereby one considers is properly in the intellect itself.

Reply to Objection 1. Some said, as Simplicius reports in his Commentary on the Predicaments, that, since every operation of man is to a certain extent an operation of the “conjunctum,” as the Philosopher says (De Anima i, text. 64); therefore no habit is in the soul only, but in the “conjunctum.” And from this it follows that no habit is in the intellect, for the intellect is separate, as ran the argument, given above. But the argument is no cogent. For habit is not a disposition of the object to the power, but rather a disposition of the power to the object: wherefore the habit needs to be in that power which is principle of the act, and not in that which is compared to the power as its object.

Now the act of understanding is not said to be common to soul and body, except in respect of the phantasm, as is stated in De Anima, text. 66. But it is clear that the phantasm is compared as object to the passive intellect (De Anima iii, text. 3,39). Whence it follows that the intellective habit is chiefly on the part of the intellect itself; and not on the part of the phantasm, which is common to soul and body. And therefore we must say that the “possible” intellect is the subject of habit, which is in potentiality to many: and this belongs, above all, to the “possible” intellect. Wherefore the “possible” intellect is the subject of intellectual habits.

Reply to Objection 2. As potentiality to sensible being belongs to corporeal matter, so potentiality to intellectual being belongs to the “possible” intellect. Wherefore nothing forbids habit to be in the “possible” intellect, for it is midway between pure potentiality and perfect act.

Reply to Objection 3. Because the apprehensive powers inwardly prepare their proper objects for the “possible intellect,” therefore it is by the good disposition of these powers, to which the good disposition of the body cooperates, that man is rendered apt to understand. And so in a secondary way the intellective habit can be in these powers. But principally it is in the “possible” intellect.

Whether any habit is in the will?

Ia IIae q. 50 a. 5

Objection 1. It would seem that there is not a habit in the will. For the habit which is in the intellect is the intelligible species, by means of which the intellect actually understands. But the will does not act by means of species. Therefore the will is not the subject of habit.

Objection 2. Further, no habit is allotted to the active intellect, as there is to the “possible” intellect, because the former is an active power. But the will is above all an active power, because it moves all the powers to their acts, as stated above (q. 9, a. 1). Therefore there is no habit in the will.

Objection 3. Further, in the natural powers there is no habit, because, by reason of their nature, they are determinate to one thing. But the will, by reason of its nature, is ordained to tend to the good which reason directs. Therefore there is no habit in the will.

On the contrary, Justice is a habit. But justice is in the will; for it is “a habit whereby men will and do that which is just” (Ethic. v, 1). Therefore the will is the subject of a habit.

I answer that, Every power which may be variously directed to act, needs a habit whereby it is well disposed

^{*} Ia, q. 79, a. 2, ad 2

to its act. Now since the will is a rational power, it may be variously directed to act. And therefore in the will we must admit the presence of a habit whereby it is well disposed to its act. Moreover, from the very nature of habit, it is clear that it is principally related to the will; inasmuch as habit “is that which one uses when one wills,” as stated above (a. 1).

Reply to Objection 1. Even as in the intellect there is a species which is the likeness of the object; so in the will, and in every appetitive power there must be something by which the power is inclined to its object; for the act of the appetitive power is nothing but a certain inclination, as we have said above (q. 6, a. 4; q. 22, a. 2). And therefore in respect of those things to which it is inclined sufficiently by the nature of the power itself, the power needs no quality to incline it. But since it is necessary, for the end of human life, that the appetitive power be inclined to something fixed, to which it is not

inclined by the nature of the power, which has a relation to many and various things, therefore it is necessary that, in the will and in the other appetitive powers, there be certain qualities to incline them, and these are called habits.

Reply to Objection 2. The active intellect is active only, and in no way passive. But the will, and every appetitive power, is both mover and moved (De Anima iii, text. 54). And therefore the comparison between them does not hold; for to be susceptible of habit belongs to that which is somehow in potentiality.

Reply to Objection 3. The will from the very nature of the power inclined to the good of the reason. But because this good is varied in many ways, the will needs to be inclined, by means of a habit, to some fixed good of the reason, in order that action may follow more promptly.

Whether there are habits in the angels?

Ia IIae q. 50 a. 6

Objection 1. It would seem that there are no habits in the angels. For Maximus, commentator of Dionysius (Coel. Hier. vii), says: “It is not proper to suppose that there are intellectual (i.e. spiritual) powers in the divine intelligences (i.e. in the angels) after the manner of accidents, as in us: as though one were in the other as in a subject: for accident of any kind is foreign to them.” But every habit is an accident. Therefore there are no habits in the angels.

Objection 2. Further, as Dionysius says (Coel. Hier. iv): “The holy dispositions of the heavenly essences participate, above all other things, in God’s goodness.” But that which is of itself [per se] is prior to and more power than that which is by another [per aliud]. Therefore the angelic essences are perfected of themselves unto conformity with God, and therefore not by means of habits. And this seems to have been the reasoning of Maximus, who in the same passage adds: “For if this were the case, surely their essence would not remain in itself, nor could it have been as far as possible deified of itself.”

Objection 3. Further, habit is a disposition (Metaph. v, text. 25). But disposition, as is said in the same book, is “the order of that which has parts.” Since, therefore, angels are simple substances, it seems that there are no dispositions and habits in them.

On the contrary, Dionysius says (Coel. Hier. vii) that the angels are of the first hierarchy are called: “Fire-bearers and Thrones and Outpouring of Wisdom, by which is indicated the godlike nature of their habits.”

I answer that, Some have thought that there are no habits in the angels, and that whatever is said of them, is said essentially. Whence Maximus, after the words which we have quoted, says: “Their dispositions, and the powers which are in them, are essential, through the absence of matter in them.” And Simplicius says the

same in his Commentary on the Predicaments: “Wisdom which is in the soul is its habit: but that which is in the intellect, is its substance. For everything divine is sufficient of itself, and exists in itself.”

Now this opinion contains some truth, and some error. For it is manifest from what we have said (q. 49, a. 4) that only a being in potentiality is the subject of habit. So the above-mentioned commentators considered that angels are immaterial substances, and that there is no material potentiality in them, and on that account, excluded from them habit and any kind of accident. Yet since though there is no material potentiality in angels, there is still some potentiality in them (for to be pure act belongs to God alone), therefore, as far as potentiality is found to be in them, so far may habits be found in them. But because the potentiality of matter and the potentiality of intellectual substance are not of the same kind. Whence, Simplicius says in his Commentary on the Predicaments that: “The habits of the intellectual substance are not like the habits here below, but rather are they like simple and immaterial images which it contains in itself.”

However, the angelic intellect and the human intellect differ with regard to this habit. For the human intellect, being the lowest in the intellectual order, is in potentiality as regards all intelligible things, just as primal matter is in respect of all sensible forms; and therefore for the understanding of all things, it needs some habit. But the angelic intellect is not as a pure potentiality in the order of intelligible things, but as an act; not indeed as pure act (for this belongs to God alone), but with an admixture of some potentiality: and the higher it is, the less potentiality it has. And therefore, as we said in the Ia, q. 55, a. 1, so far as it is in potentiality, so far is it in need of habitual perfection by means of intelligible species in regard to its proper operation: but so far as it

is in act, through its own essence it can understand some things, at least itself, and other things according to the mode of its substance, as stated in *De Causis*: and the more perfect it is, the more perfectly will it understand.

But since no angel attains to the perfection of God, but all are infinitely distant therefrom; for this reason, in order to attain to God Himself, through intellect and will, the angels need some habits, being as it were in potentiality in regard to that Pure Act. Wherefore Dionysius says (*Coel. Hier. vii*) that their habits are “godlike,” that is to say, that by them they are made like to God.

But those habits that are dispositions to the natural being are not in angels, since they are immaterial.

Reply to Objection 1. This saying of Maximus must be understood of material habits and accidents.

Reply to Objection 2. As to that which belongs to angels by their essence, they do not need a habit. But as they are not so far beings of themselves, as not to partake of Divine wisdom and goodness, therefore, so far as they need to partake of something from without, so far do they need to have habits.

Reply to Objection 3. In angels there are no essential parts: but there are potential parts, in so far as their intellect is perfected by several species, and in so far as their will has a relation to several things.

Objection 1. It would seem that there is not a habit in the body. For, as the Commentator says (*De Anima* iii), “a habit is that whereby we act when we will.” But bodily actions are not subject to the will, since they are natural. Therefore there can be no habit in the body.

Objection 2. Further, all bodily dispositions are easy to change. But habit is a quality, difficult to change. Therefore no bodily disposition can be a habit.

Objection 3. Further, all bodily dispositions are subject to change. But change can only be in the third species of quality, which is divided against habit. Therefore there is no habit in the body.

On the contrary, The Philosopher says in the Book of Predicaments (*De Categor.* vi) that health of the body and incurable disease are called habits.

I answer that, As we have said above (q. 49, Aa. 2 seqq.), habit is a disposition of a subject which is in a state of potentiality either to form or to operation. Therefore in so far as habit implies disposition to operation, no habit is principally in the body as its subject. For every operation of the body proceeds either from a natural quality of the body or from the soul moving the body. Consequently, as to those operations which proceed from its nature, the body is not disposed by a habit: because the natural forces are determined to one mode of operation; and we have already said (q. 49, a. 4) that it is when the subject is in potentiality to many things that a habitual disposition is required. As to the operations which proceed from the soul through the body, they belong principally to the soul, and secondarily to the body. Now habits are in proportion to their operations: whence “by like acts like habits are formed” (*Ethic.* ii, 1,2). And therefore the dispositions to such operations are principally in the soul. But they can be secondarily in the body: to wit, in so far as the body is disposed and enabled with promptitude to help in the operations of the soul.

If, however, we speak of the disposition of the subject to form, thus a habitual disposition can be in the body, which is related to the soul as a subject is to its form. And in this way health and beauty and such like are called habitual dispositions. Yet they have not the nature of habit perfectly: because their causes, of their very nature, are easily changeable.

On the other hand, as Simplicius reports in his Commentary on the Predicaments, Alexander denied absolutely that habits or dispositions of the first species are in the body: and held that the first species of quality belonged to the soul alone. And he held that Aristotle mentions health and sickness in the Book on the Predicaments not as though they belonged to the first species of quality, but by way of example: so that he would mean that just as health and sickness may be easy or difficult to change, so also are all the qualities of the first species, which are called habits and dispositions.

* *isos hexin* (*Categor.* viii)

But this is clearly contrary to the intention of Aristotle: both because he speaks in the same way of health and sickness as examples, as of virtue and science; and because in *Phys.* vii, text. 17, he expressly mentions beauty and health among habits.

Reply to Objection 1. This objection runs in the sense of habit as a disposition to operation, and of those actions of the body which are from nature: but not in the sense of those actions which proceed from the soul, and the principle of which is the will.

Reply to Objection 2. Bodily dispositions are not simply difficult to change on account of the changeableness of their bodily causes. But they may be difficult to change by comparison to such a subject, because, to wit, as long as such a subject endures, they cannot be removed; or because they are difficult to change, by comparison to other dispositions. But qualities of the soul are simply difficult to change, on account of the unchangeableness of the subject. And therefore he does not say that health which is difficult to change is a habit simply: but that it is “as a habit,” as we read in the Greek*. On the other hand, the qualities of the soul are called habits simply.

Reply to Objection 3. Bodily dispositions which are in the first species of quality, as some maintained, differ from qualities of the third species, in this, that the qualities of the third species consist in some “becoming” and movement, as it were, wherefore they are called passions or passible qualities. But when they have attained to perfection (specific perfection, so to speak), they have then passed into the first species of quality. But Simplicius in his Commentary disapproves of this; for in this way heating would be in the third species, and heat in the first species of quality; whereas Aristotle puts heat in the third.

Wherefore Porphyrius, as Simplicius reports (*Commentary*), says that passion or passion-like quality, disposition and habit, differ in bodies by way of intensity and remissness. For when a thing receives heat in this only that it is being heated, and not so as to be able to give heat, then we have passion, if it is transitory; or passion-like quality if it is permanent. But when it has been brought to the point that it is able to heat something else, then it is a disposition; and if it goes so far as to be firmly fixed and to become difficult to change, then it will be a habit: so that disposition would be a certain intensity of passion or passion-like quality, and habit an intensity or disposition. But Simplicius disapproves of this, for such intensity and remissness do not imply diversity on the part of the form itself, but on the part of the diverse participation thereof by the subject; so that there would be no diversity among the species of quality. And therefore we must say otherwise that, as was explained above (q. 49, a. 2, ad 1), the adjustment of the passion-like qualities themselves, according

to their suitability to nature, implies the notion of disposition: and so, when a change takes place in these same passion-like qualities, which are heat and cold, moisture and dryness, there results a change as to sickness and health. But change does not occur in regard to like habits and dispositions, primarily and of themselves.

Objection 1. It would seem that habit is in the soul in respect of its essence rather than in respect of its powers. For we speak of dispositions and habits in relation to nature, as stated above (q. 49, a. 2). But nature regards the essence of the soul rather than the powers; because it is in respect of its essence that the soul is the nature of such a body and the form thereof. Therefore habits are in the soul in respect of its essence and not in respect of its powers.

Objection 2. Further, accident is not the subject of accident. Now habit is an accident. But the powers of the soul are in the genus of accident, as we have said in the Ia, q. 77, a. 1, ad 5. Therefore habit is not in the soul in respect of its powers.

Objection 3. Further, the subject is prior to that which is in the subject. But since habit belongs to the first species of quality, it is prior to power, which belongs to the second species. Therefore habit is not in a power of the soul as its subject.

On the contrary, The Philosopher (*Ethic.* i, 13) puts various habits in the various powers of the soul.

I answer that, As we have said above (q. 49, Aa. 2,3), habit implies a certain disposition in relation to nature or to operation. If therefore we take habit as having a relation to nature, it cannot be in the soul—that is, if we speak of human nature: for the soul itself is the form completing the human nature; so that, regarded in this way, habit or disposition is rather to be found in the body by reason of its relation to the soul, than in the soul by reason of its relation to the body. But if we speak of a higher nature, of which man may become a partaker, according to 2 Pet. 1, “that we may be partakers of the Divine Nature”: thus nothing hinders some

habit, namely, grace, from being in the soul in respect of its essence, as we shall state later on (q. 110, a. 4).

On the other hand, if we take habit in its relation to operation, it is chiefly thus that habits are found in the soul: in so far as the soul is not determined to one operation, but is indifferent to many, which is a condition for a habit, as we have said above (q. 49, a. 4). And since the soul is the principle of operation through its powers, therefore, regarded in this sense, habits are in the soul in respect of its powers.

Reply to Objection 1. The essence of the soul belongs to human nature, not as a subject requiring to be disposed to something further, but as a form and nature to which someone is disposed.

Reply to Objection 2. Accident is not of itself the subject of accident. But since among accidents themselves there is a certain order, the subject, according as it is under one accident, is conceived as the subject of a further accident. In this way we say that one accident is the subject of another; as superficies is the subject of color, in which sense power is the subject of habit.

Reply to Objection 3. Habit takes precedence of power, according as it implies a disposition to nature: whereas power always implies a relation to operation, which is posterior, since nature is the principle of operation. But the habit whose subject is a power, does not imply relation to nature, but to operation. Wherefore it is posterior to power. Or, we may say that habit takes precedence of power, as the complete takes precedence of the incomplete, and as act takes precedence of potentiality. For act is naturally prior to potentiality, though potentiality is prior in order of generation and time, as stated in *Metaph.* vii, text. 17; ix, text. 13.

Objection 1. It would seem that there cannot be any habits in the powers of the sensitive part. For as the nutritive power is an irrational part, so is the sensitive power. But there can be no habits in the powers of the nutritive part. Therefore we ought not to put any habit in the powers of the sensitive part.

Objection 2. Further, the sensitive parts are common to us and the brutes. But there are not any habits in brutes: for in them there is no will, which is put in the definition of habit, as we have said above (q. 49, a. 3). Therefore there are no habits in the sensitive powers.

Objection 3. Further, the habits of the soul are sciences and virtues: and just as science is related to the apprehensive power, so it virtue related to the appetitive power. But in the sensitive powers there are no sciences: since science is of universals, which the sensitive powers cannot apprehend. Therefore, neither can there be habits of virtue in the sensitive part.

On the contrary, The Philosopher says (*Ethic.* iii, 10) that “some virtues,” namely, temperance and fortitude, “belong to the irrational part.”

I answer that, The sensitive powers can be considered in two ways: first, according as they act from natural instinct: secondly, according as they act at the command of reason. According as they act from natural instinct, they are ordained to one thing, even as nature is; but according as they act at the command of reason, they can be ordained to various things. And thus there can be habits in them, by which they are well or ill disposed in regard to something.

Reply to Objection 1. The powers of the nutritive part have not an inborn aptitude to obey the command of reason, and therefore there are no habits in them. But the sensitive powers have an inborn aptitude to obey the command of reason; and therefore habits can be in them: for in so far as they obey reason, in a certain sense they are said to be rational, as stated in *Ethic.* i, 13.

Reply to Objection 2. The sensitive powers of dumb animals do not act at the command of reason; but

if they are left to themselves, such animals act from natural instinct: and so in them there are no habits ordained to operations. There are in them, however, certain dispositions in relation to nature, as health and beauty. But whereas by man’s reason brutes are disposed by a sort of custom to do things in this or that way, so in this sense, to a certain extent, we can admit the existence of habits in dumb animals: wherefore Augustine says (*QQ.* lxxxiii, qu. 36): “We find the most untamed beasts, deterred by fear of pain, from that wherein they took the keenest pleasure; and when this has become a custom in them, we say that they are tame and gentle.” But the habit is incomplete, as to the use of the will, for they have not that power of using or of refraining, which seems to belong to the notion of habit: and therefore, properly speaking, there can be no habits in them.

Reply to Objection 3. The sensitive appetite has an inborn aptitude to be moved by the rational appetite, as stated in *De Anima* iii, text. 57: but the rational powers of apprehension have an inborn aptitude to receive from the sensitive powers. And therefore it is more suitable that habits should be in the powers of sensitive appetite than in the powers of sensitive apprehension, since in the powers of sensitive appetite habits do not exist except according as they act at the command of the reason. And yet even in the interior powers of sensitive apprehension, we may admit of certain habits whereby man has a facility of memory, thought or imagination: wherefore also the Philosopher says (*De Memor. et Remin.* ii) that “custom conduces much to a good memory”: the reason of which is that these powers also are moved to act at the command of the reason.

On the other hand the exterior apprehensive powers, as sight, hearing and the like, are not susceptible of habits, but are ordained to their fixed acts, according to the disposition of their nature, just as the members of the body, for there are no habits in them, but rather in the powers which command their movements.

Objection 1. It would seem that there are no habits in the intellect. For habits are in conformity with operations, as stated above (a. 1). But the operations of man are common to soul and body, as stated in *De Anima* i, text. 64. Therefore also are habits. But the intellect is not an act of the body (*De Anima* iii, text. 6). Therefore the intellect is not the subject of a habit.

Objection 2. Further, whatever is in a thing, is there according to the mode of that in which it is. But that which is form without matter, is act only: whereas what is composed of form and matter, has potentiality and act at the same time. Therefore nothing at the same time potential and actual can be in that which is form only, but only in that which is composed of matter and form. Now the intellect is form without matter. Therefore habit, which has potentiality at the same time as act, being a sort of medium between the two, cannot be in the intellect; but only in the “conjunction,” which is composed of soul and body.

Objection 3. Further, habit is a disposition whereby we are well or ill disposed in regard to something, as is said (*Metaph.* v, text. 25). But that anyone should be well or ill disposed to an act of the intellect is due to some disposition of the body: wherefore also it is stated (*De Anima* ii, text. 94) that “we observe men with soft flesh to be quick witted.” Therefore the habits of knowledge are not in the intellect, which is separate, but in some power which is the act of some part of the body.

On the contrary, The Philosopher (*Ethic.* vi, 2,3,10) puts science, wisdom and understanding, which is the habit of first principles, in the intellective part of the soul.

I answer that, concerning intellective habits there have been various opinions. Some, supposing that there was only one “possible”^{*} intellect for all men, were bound to hold that habits of knowledge are not in the intellect itself, but in the interior sensitive powers. For it is manifest that men differ in habits; and so it was impossible to put the habits of knowledge directly in that, which, being only one, would be common to all men. Wherefore if there were but one single “possible” intellect of all men, the habits of science, in which men differ from one another, could not be in the “possible” intellect as their subject, but would be in the interior sensitive powers, which differ in various men.

Now, in the first place, this supposition is contrary to the mind of Aristotle. For it is manifest that the sensitive powers are rational, not by their essence, but only by participation (*Ethic.* i, 13). Now the Philosopher puts the intellectual virtues, which are wisdom, science and understanding, in that which is rational by its essence. Wherefore they are not in the sensitive powers, but in the intellect itself. Moreover he says expressly (*De Anima* iii, text. 8,18) that when the “possible” intellect

“is thus identified with each thing,” that is, when it is reduced to act in respect of singulars by the intelligible species, “then it is said to be in act, as the knower is said to be in act; and this happens when the intellect can act of itself,” i.e. by considering: “and even then it is in potentiality in a sense; but not in the same way as before learning and discovering.” Therefore the “possible” intellect itself is the subject of the habit of science, by which the intellect, even though it be not actually considering, is able to consider. In the second place, this supposition is contrary to the truth. For as to whom belongs the operation, belongs also the power to operate, belongs also the habit. But to understand and to consider is the proper act of the intellect. Therefore also the habit whereby one considers is properly in the intellect itself.

Reply to Objection 1. Some said, as Simplicius reports in his Commentary on the Predicaments, that, since every operation of man is to a certain extent an operation of the “conjunctum,” as the Philosopher says (*De Anima* i, text. 64); therefore no habit is in the soul only, but in the “conjunctum.” And from this it follows that no habit is in the intellect, for the intellect is separate, as ran the argument, given above. But the argument is no cogent. For habit is not a disposition of the object to the power, but rather a disposition of the power to the object: wherefore the habit needs to be in that power which is principle of the act, and not in that which is compared to the power as its object.

Now the act of understanding is not said to be common to soul and body, except in respect of the phantasm, as is stated in *De Anima*, text. 66. But it is clear that the phantasm is compared as object to the passive intellect (*De Anima* iii, text. 3,39). Whence it follows that the intellective habit is chiefly on the part of the intellect itself; and not on the part of the phantasm, which is common to soul and body. And therefore we must say that the “possible” intellect is the subject of habit, which is in potentiality to many: and this belongs, above all, to the “possible” intellect. Wherefore the “possible” intellect is the subject of intellectual habits.

Reply to Objection 2. As potentiality to sensible being belongs to corporeal matter, so potentiality to intellectual being belongs to the “possible” intellect. Wherefore nothing forbids habit to be in the “possible” intellect, for it is midway between pure potentiality and perfect act.

Reply to Objection 3. Because the apprehensive powers inwardly prepare their proper objects for the “possible intellect,” therefore it is by the good disposition of these powers, to which the good disposition of the body cooperates, that man is rendered apt to understand. And so in a secondary way the intellective habit can be in these powers. But principally it is in the “possible” intellect.

* Ia, q. 79, a. 2, ad 2

Objection 1. It would seem that there is not a habit in the will. For the habit which is in the intellect is the intelligible species, by means of which the intellect actually understands. But the will does not act by means of species. Therefore the will is not the subject of habit.

Objection 2. Further, no habit is allotted to the active intellect, as there is to the “possible” intellect, because the former is an active power. But the will is above all an active power, because it moves all the powers to their acts, as stated above (q. 9, a. 1). Therefore there is no habit in the will.

Objection 3. Further, in the natural powers there is no habit, because, by reason of their nature, they are determinate to one thing. But the will, by reason of its nature, is ordained to tend to the good which reason directs. Therefore there is no habit in the will.

On the contrary, Justice is a habit. But justice is in the will; for it is “a habit whereby men will and do that which is just” (Ethic. v, 1). Therefore the will is the subject of a habit.

I answer that, Every power which may be variously directed to act, needs a habit whereby it is well disposed to its act. Now since the will is a rational power, it may be variously directed to act. And therefore in the will we must admit the presence of a habit whereby it is well disposed to its act. Moreover, from the very nature of habit, it is clear that it is principally related to the will; inasmuch as habit “is that which one uses when one wills,” as stated above (a. 1).

Reply to Objection 1. Even as in the intellect there is a species which is the likeness of the object; so in the will, and in every appetitive power there must be something by which the power is inclined to its object; for the act of the appetitive power is nothing but a certain inclination, as we have said above (q. 6, a. 4; q. 22, a. 2). And therefore in respect of those things to which it is inclined sufficiently by the nature of the power itself, the power needs no quality to incline it. But since it is necessary, for the end of human life, that the appetitive power be inclined to something fixed, to which it is not inclined by the nature of the power, which has a relation to many and various things, therefore it is necessary that, in the will and in the other appetitive powers, there be certain qualities to incline them, and these are called habits.

Reply to Objection 2. The active intellect is active only, and in no way passive. But the will, and every appetitive power, is both mover and moved (De Anima iii, text. 54). And therefore the comparison between them does not hold; for to be susceptible of habit belongs to that which is somehow in potentiality.

Reply to Objection 3. The will from the very nature of the power inclined to the good of the reason. But because this good is varied in many ways, the will needs to be inclined, by means of a habit, to some fixed good of the reason, in order that action may follow more promptly.

Objection 1. It would seem that there are no habits in the angels. For Maximus, commentator of Dionysius (Coel. Hier. vii), says: “It is not proper to suppose that there are intellectual (i.e. spiritual) powers in the divine intelligences (i.e. in the angels) after the manner of accidents, as in us: as though one were in the other as in a subject: for accident of any kind is foreign to them.” But every habit is an accident. Therefore there are no habits in the angels.

Objection 2. Further, as Dionysius says (Coel. Hier. iv): “The holy dispositions of the heavenly essences participate, above all other things, in God’s goodness.” But that which is of itself [per se] is prior to and more power than that which is by another [per aliud]. Therefore the angelic essences are perfected of themselves unto conformity with God, and therefore not by means of habits. And this seems to have been the reasoning of Maximus, who in the same passage adds: “For if this were the case, surely their essence would not remain in itself, nor could it have been as far as possible deified of itself.”

Objection 3. Further, habit is a disposition (Metaph. v, text. 25). But disposition, as is said in the same book, is “the order of that which has parts.” Since, therefore, angels are simple substances, it seems that there are no dispositions and habits in them.

On the contrary, Dionysius says (Coel. Hier. vii) that the angels are of the first hierarchy are called: “Fire-bearers and Thrones and Outpouring of Wisdom, by which is indicated the godlike nature of their habits.”

I answer that, Some have thought that there are no habits in the angels, and that whatever is said of them, is said essentially. Whence Maximus, after the words which we have quoted, says: “Their dispositions, and the powers which are in them, are essential, through the absence of matter in them.” And Simplicius says the same in his Commentary on the Predicaments: “Wisdom which is in the soul is its habit: but that which is in the intellect, is its substance. For everything divine is sufficient of itself, and exists in itself.”

Now this opinion contains some truth, and some error. For it is manifest from what we have said (q. 49, a. 4) that only a being in potentiality is the subject of habit. So the above-mentioned commentators considered that angels are immaterial substances, and that there is no material potentiality in them, and on that account, excluded from them habit and any kind of accident. Yet since though there is no material potentiality in angels, there is still some potentiality in them (for to

be pure act belongs to God alone), therefore, as far as potentiality is found to be in them, so far may habits be found in them. But because the potentiality of matter and the potentiality of intellectual substance are not of the same kind. Whence, Simplicius says in his Commentary on the Predicaments that: “The habits of the intellectual substance are not like the habits here below, but rather are they like simple and immaterial images which it contains in itself.”

However, the angelic intellect and the human intellect differ with regard to this habit. For the human intellect, being the lowest in the intellectual order, is in potentiality as regards all intelligible things, just as primal matter is in respect of all sensible forms; and therefore for the understanding of all things, it needs some habit. But the angelic intellect is not as a pure potentiality in the order of intelligible things, but as an act; not indeed as pure act (for this belongs to God alone), but with an admixture of some potentiality: and the higher it is, the less potentiality it has. And therefore, as we said in the Ia, q. 55, a. 1, so far as it is in potentiality, so far is it in need of habitual perfection by means of intelligible species in regard to its proper operation: but so far as it is in act, through its own essence it can understand some things, at least itself, and other things according to the mode of its substance, as stated in De Causis: and the more perfect it is, the more perfectly will it understand.

But since no angel attains to the perfection of God, but all are infinitely distant therefrom; for this reason, in order to attain to God Himself, through intellect and will, the angels need some habits, being as it were in potentiality in regard to that Pure Act. Wherefore Dionysius says (Coel. Hier. vii) that their habits are “godlike,” that is to say, that by them they are made like to God.

But those habits that are dispositions to the natural being are not in angels, since they are immaterial.

Reply to Objection 1. This saying of Maximus must be understood of material habits and accidents.

Reply to Objection 2. As to that which belongs to angels by their essence, they do not need a habit. But as they are not so far beings of themselves, as not to partake of Divine wisdom and goodness, therefore, so far as they need to partake of something from without, so far do they need to have habits.

Reply to Objection 3. In angels there are no essential parts: but there are potential parts, in so far as their intellect is perfected by several species, and in so far as their will has a relation to several things.

FIRST PART OF THE SECOND PART, QUESTION 51

Of the Cause of Habits, As to Their Formation

(In Four Articles)

We must next consider the cause of habits: and firstly, as to their formation; secondly, as to their increase; thirdly, as to their diminution and corruption. Under the first head there are four points of inquiry:

- (1) Whether any habit is from nature?
- (2) Whether any habit is caused by acts?
- (3) Whether any habit can be caused by one act?
- (4) Whether any habits are infused in man by God?

Whether any habit is from nature?

Ia IIae q. 51 a. 1

Objection 1. It would seem that no habit is from nature. For the use of those things which are from nature does not depend on the will. But habit “is that which we use when we will,” as the Commentator says on *De Anima* iii. Therefore habit is not from nature.

Objection 2. Further, nature does not employ two where one is sufficient. But the powers of the soul are from nature. If therefore the habits of the powers were from nature, habit and power would be one.

Objection 3. Further, nature does not fail in necessities. But habits are necessary in order to act well, as we have stated above (q. 49, a. 4). If therefore any habits were from nature, it seems that nature would not fail to cause all necessary habits: but this is clearly false. Therefore habits are not from nature.

On the contrary, In *Ethic.* vi, 6, among other habits, place is given to understanding of first principles, which habit is from nature: wherefore also first principles are said to be known naturally.

I answer that, One thing can be natural to another in two ways. First in respect of the specific nature, as the faculty of laughing is natural to man, and it is natural to fire to have an upward tendency. Secondly, in respect of the individual nature, as it is natural to Socrates or Plato to be prone to sickness or inclined to health, in accordance with their respective temperaments. Again, in respect of both natures, something may be called natural in two ways: first, because it entirely is from the nature; secondly, because it is partly from nature, and partly from an extrinsic principle. For instance, when a man is healed by himself, his health is entirely from nature; but when a man is healed by means of medicine, health is partly from nature, partly from an extrinsic principle.

Thus, then, if we speak of habit as a disposition of the subject in relation to form or nature, it may be natural in either of the foregoing ways. For there is a certain natural disposition demanded by the human species, so that no man can be without it. And this disposition is natural in respect of the specific nature. But since such a disposition has a certain latitude, it happens that different grades of this disposition are becoming to different men in respect of the individual nature. And this disposition may be either entirely from nature, or partly

from nature, and partly from an extrinsic principle, as we have said of those who are healed by means of art.

But the habit which is a disposition to operation, and whose subject is a power of the soul, as stated above (q. 50, a. 2), may be natural whether in respect of the specific nature or in respect of the individual nature: in respect of the specific nature, on the part of the soul itself, which, since it is the form of the body, is the specific principle; but in respect of the individual nature, on the part of the body, which is the material principle. Yet in neither way does it happen that there are natural habits in man, so that they be entirely from nature. In the angels, indeed, this does happen, since they have intelligible species naturally impressed on them, which cannot be said of the human soul, as we have said in the *Ia*, q. 55, a. 2; *Ia*, q. 84, a. 3.

There are, therefore, in man certain natural habits, owing their existence, partly to nature, and partly to some extrinsic principle: in one way, indeed, in the apprehensive powers; in another way, in the appetitive powers. For in the apprehensive powers there may be a natural habit by way of a beginning, both in respect of the specific nature, and in respect of the individual nature. This happens with regard to the specific nature, on the part of the soul itself: thus the understanding of first principles is called a natural habit. For it is owing to the very nature of the intellectual soul that man, having once grasped what is a whole and what is a part, should at once perceive that every whole is larger than its part: and in like manner with regard to other such principles. Yet what is a whole, and what is a part—this he cannot know except through the intelligible species which he has received from phantasms: and for this reason, the Philosopher at the end of the *Posterior Analytics* shows that knowledge of principles comes to us from the senses.

But in respect of the individual nature, a habit of knowledge is natural as to its beginning, in so far as one man, from the disposition of his organs of sense, is more apt than another to understand well, since we need the sensitive powers for the operation of the intellect.

In the appetitive powers, however, no habit is natural in its beginning, on the part of the soul itself, as to the

substance of the habit; but only as to certain principles thereof, as, for instance, the principles of common law are called the “nurseries of virtue.” The reason of this is because the inclination to its proper objects, which seems to be the beginning of a habit, does not belong to the habit, but rather to the very nature of the powers.

But on the part of the body, in respect of the individual nature, there are some appetitive habits by way of natural beginnings. For some are disposed from their own bodily temperament to chastity or meekness or such like.

Reply to Objection 1. This objection takes nature as divided against reason and will; whereas reason itself and will belong to the nature of man.

Reply to Objection 2. Something may be added even naturally to the nature of a power, while it cannot belong to the power itself. For instance, with regard to the angels, it cannot belong to the intellectual power itself capable of knowing all things: for thus it

would have to be the act of all things, which belongs to God alone. Because that by which something is known, must needs be the actual likeness of the thing known: whence it would follow, if the power of the angel knew all things by itself, that it was the likeness and act of all things. Wherefore there must needs be added to the angels’ intellectual power, some intelligible species, which are likenesses of things understood: for it is by participation of the Divine wisdom and not by their own essence, that their intellect can be actually those things which they understand. And so it is clear that not everything belonging to a natural habit can belong to the power.

Reply to Objection 3. Nature is not equally inclined to cause all the various kinds of habits: since some can be caused by nature, and some not, as we have said above. And so it does not follow that because some habits are natural, therefore all are natural.

Whether any habit is caused by acts?

Ia IIae q. 51 a. 2

Objection 1. It would seem that no habit is caused by acts. For habit is a quality, as we have said above (q. 49, a. 1). Now every quality is caused in a subject, according to the latter’s receptivity. Since then the agent, inasmuch as it acts, does not receive but rather gives: it seems impossible for a habit to be caused in an agent by its own acts.

Objection 2. Further, the thing wherein a quality is caused is moved to that quality, as may be clearly seen in that which is heated or cooled: whereas that which produces the act that causes the quality, moves, as may be seen in that which heats or cools. If therefore habits were caused in anything by its own act, it would follow that the same would be mover and moved, active and passive: which is impossible, as stated in Physics iii, 8.

Objection 3. Further, the effect cannot be more noble than its cause. But habit is more noble than the act which precedes the habit; as is clear from the fact that the latter produces more noble acts. Therefore habit cannot be caused by an act which precedes the habit.

On the contrary, The Philosopher (Ethic. ii, 1,2) teaches that habits of virtue and vice are caused by acts.

I answer that, In the agent there is sometimes only the active principle of its act: for instance in fire there is only the active principle of heating. And in such an agent a habit cannot be caused by its own act: for which reason natural things cannot become accustomed or unaccustomed, as is stated in Ethic. ii, 1. But a certain agent is to be found, in which there is both the active and the passive principle of its act, as we see in human acts. For the acts of the appetitive power proceed from that same power according as it is moved by the appre-

hensive power presenting the object: and further, the intellectual power, according as it reasons about conclusions, has, as it were, an active principle in a self-evident proposition. Wherefore by such acts habits can be caused in their agents; not indeed with regard to the first active principle, but with regard to that principle of the act, which principle is a mover moved. For everything that is passive and moved by another, is disposed by the action of the agent; wherefore if the acts be multiplied a certain quality is formed in the power which is passive and moved, which quality is called a habit: just as the habits of moral virtue are caused in the appetitive powers, according as they are moved by the reason, and as the habits of science are caused in the intellect, according as it is moved by first propositions.

Reply to Objection 1. The agent, as agent, does not receive anything. But in so far as it moves through being moved by another, it receives something from that which moves it: and thus is a habit caused.

Reply to Objection 2. The same thing, and in the same respect, cannot be mover and moved; but nothing prevents a thing from being moved by itself as to different respects, as is proved in Physics viii, text. 28,29.

Reply to Objection 3. The act which precedes the habit, in so far as it comes from an active principle, proceeds from a more excellent principle than is the habit caused thereby: just as the reason is a more excellent principle than the habit of moral virtue produced in the appetitive power by repeated acts, and as the understanding of first principles is a more excellent principle than the science of conclusions.

Objection 1. It would seem that a habit can be caused by one act. For demonstration is an act of reason. But science, which is the habit of one conclusion, is caused by one demonstration. Therefore habit can be caused by one act.

Objection 2. Further, as acts happen to increase by multiplication so do they happen to increase by intensity. But a habit is caused by multiplication of acts. Therefore also if an act be very intense, it can be the generating cause of a habit.

Objection 3. Further, health and sickness are habits. But it happens that a man is healed or becomes ill, by one act. Therefore one act can cause a habit.

On the contrary, The Philosopher (*Ethic.* i, 7): “As neither does one swallow nor one day make spring; so neither does one day nor a short time make a man blessed and happy.” But “happiness is an operation in respect of a habit of perfect virtue” (*Ethic.* i, 7,10,13). Therefore a habit of virtue, and for the same reason, other habits, is not caused by one act.

I answer that, As we have said already (a. 2), habit is caused by act, because a passive power is moved by an active principle. But in order that some quality be caused in that which is passive the active principle must entirely overcome the passive. Whence we see that because fire cannot at once overcome the combustible, it does not enkindle at once; but it gradually expels contrary dispositions, so that by overcoming it entirely, it may impress its likeness on it. Now it is clear that the active principle which is reason, cannot entirely overcome the appetitive power in one act: because the appetitive power is inclined variously, and to many things;

while the reason judges in a single act, what should be willed in regard to various aspects and circumstances. Wherefore the appetitive power is not thereby entirely overcome, so as to be inclined like nature to the same thing, in the majority of cases; which inclination belongs to the habit of virtue. Therefore a habit of virtue cannot be caused by one act, but only by many.

But in the apprehensive powers, we must observe that there are two passive principles: one is the “possible”^{*} intellect itself; the other is the intellect which Aristotle (*De Anima* iii, text. 20) calls “passive,” and is the “particular reason,” that is the cogitative power, with memory and imagination. With regard then to the former passive principle, it is possible for a certain active principle to entirely overcome, by one act, the power of its passive principle: thus one self-evident proposition convinces the intellect, so that it gives a firm assent to the conclusion, but a probable proposition cannot do this. Wherefore a habit of opinion needs to be caused by many acts of the reason, even on the part of the “possible” intellect: whereas a habit of science can be caused by a single act of the reason, so far as the “possible” intellect is concerned. But with regard to the lower apprehensive powers, the same acts need to be repeated many times for anything to be firmly impressed on the memory. And so the Philosopher says (*De Memor. et Remin.* 1) that “meditation strengthens memory.” Bodily habits, however, can be caused by one act, if the active principle is of great power: sometimes, for instance, a strong dose of medicine restores health at once.

Hence the solutions to the objections are clear.

Objection 1. It would seem that no habit is infused in man by God. For God treats all equally. If therefore He infuses habits into some, He would infuse them into all: which is clearly untrue.

Objection 2. Further, God works in all things according to the mode which is suitable to their nature: for “it belongs to Divine providence to preserve nature,” as Dionysius says (*Div. Nom.* iv). But habits are naturally caused in man by acts, as we have said above (a. 2). Therefore God does not cause habits to be in man except by acts.

Objection 3. Further, if any habit be infused into man by God, man can by that habit perform many acts. But “from those acts a like habit is caused” (*Ethic.* ii, 1,2). Consequently there will be two habits of the same species in the same man, one acquired, the other infused. Now this seems impossible: for the two forms of the same species cannot be in the same subject. Therefore a habit is not infused into man by God.

On the contrary, it is written (*Ecclus.* 15:5): “God filled him with the spirit of wisdom and understanding.” Now wisdom and understanding are habits. Therefore some habits are infused into man by God.

I answer that, Some habits are infused by God into man, for two reasons.

The first reason is because there are some habits by which man is disposed to an end which exceeds the proportion of human nature, namely, the ultimate and perfect happiness of man, as stated above (q. 5, a. 5). And since habits need to be in proportion with that to which man is disposed by them, therefore is it necessary that those habits, which dispose to this end, exceed the proportion of human nature. Wherefore such habits can never be in man except by Divine infusion, as is the case with all gratuitous virtues.

The other reason is, because God can produce the effects of second causes, without these second causes, as we have said in the Ia, q. 105, a. 6. Just as, there-

* See Ia, q. 79, a. 2 ad 2

fore, sometimes, in order to show His power, He causes health, without its natural cause, but which nature could have caused, so also, at times, for the manifestation of His power, He infuses into man even those habits which can be caused by a natural power. Thus He gave to the apostles the science of the Scriptures and of all tongues, which men can acquire by study or by custom, but not so perfectly.

Reply to Objection 1. God, in respect of His Nature, is the same to all, but in respect of the order of His Wisdom, for some fixed motive, gives certain things to

some, which He does not give to others.

Reply to Objection 2. That God works in all according to their mode, does not hinder God from doing what nature cannot do: but it follows from this that He does nothing contrary to that which is suitable to nature.

Reply to Objection 3. Acts produced by an infused habit, do not cause a habit, but strengthen the already existing habit; just as the remedies of medicine given to a man who is naturally health, do not cause a kind of health, but give new strength to the health he had before.

Objection 1. It would seem that no habit is from nature. For the use of those things which are from nature does not depend on the will. But habit “is that which we use when we will,” as the Commentator says on *De Anima* iii. Therefore habit is not from nature.

Objection 2. Further, nature does not employ two where one is sufficient. But the powers of the soul are from nature. If therefore the habits of the powers were from nature, habit and power would be one.

Objection 3. Further, nature does not fail in necessities. But habits are necessary in order to act well, as we have stated above (q. 49, a. 4). If therefore any habits were from nature, it seems that nature would not fail to cause all necessary habits: but this is clearly false. Therefore habits are not from nature.

On the contrary, In *Ethic.* vi, 6, among other habits, place is given to understanding of first principles, which habit is from nature: wherefore also first principles are said to be known naturally.

I answer that, One thing can be natural to another in two ways. First in respect of the specific nature, as the faculty of laughing is natural to man, and it is natural to fire to have an upward tendency. Secondly, in respect of the individual nature, as it is natural to Socrates or Plato to be prone to sickness or inclined to health, in accordance with their respective temperaments. Again, in respect of both natures, something may be called natural in two ways: first, because it entirely is from the nature; secondly, because it is partly from nature, and partly from an extrinsic principle. For instance, when a man is healed by himself, his health is entirely from nature; but when a man is healed by means of medicine, health is partly from nature, partly from an extrinsic principle.

Thus, then, if we speak of habit as a disposition of the subject in relation to form or nature, it may be natural in either of the foregoing ways. For there is a certain natural disposition demanded by the human species, so that no man can be without it. And this disposition is natural in respect of the specific nature. But since such a disposition has a certain latitude, it happens that different grades of this disposition are becoming to different men in respect of the individual nature. And this disposition may be either entirely from nature, or partly from nature, and partly from an extrinsic principle, as we have said of those who are healed by means of art.

But the habit which is a disposition to operation, and whose subject is a power of the soul, as stated above (q. 50, a. 2), may be natural whether in respect of the specific nature or in respect of the individual nature: in respect of the specific nature, on the part of the soul itself, which, since it is the form of the body, is the specific principle; but in respect of the individual nature, on the part of the body, which is the material principle. Yet in neither way does it happen that there are natural habits in man, so that they be entirely from nature. In the angels, indeed, this does happen, since they have

intelligible species naturally impressed on them, which cannot be said of the human soul, as we have said in the Ia, q. 55, a. 2; Ia, q. 84, a. 3.

There are, therefore, in man certain natural habits, owing their existence, partly to nature, and partly to some extrinsic principle: in one way, indeed, in the apprehensive powers; in another way, in the appetitive powers. For in the apprehensive powers there may be a natural habit by way of a beginning, both in respect of the specific nature, and in respect of the individual nature. This happens with regard to the specific nature, on the part of the soul itself: thus the understanding of first principles is called a natural habit. For it is owing to the very nature of the intellectual soul that man, having once grasped what is a whole and what is a part, should at once perceive that every whole is larger than its part: and in like manner with regard to other such principles. Yet what is a whole, and what is a part—this he cannot know except through the intelligible species which he has received from phantasms: and for this reason, the Philosopher at the end of the *Posterior Analytics* shows that knowledge of principles comes to us from the senses.

But in respect of the individual nature, a habit of knowledge is natural as to its beginning, in so far as one man, from the disposition of his organs of sense, is more apt than another to understand well, since we need the sensitive powers for the operation of the intellect.

In the appetitive powers, however, no habit is natural in its beginning, on the part of the soul itself, as to the substance of the habit; but only as to certain principles thereof, as, for instance, the principles of common law are called the “nurseries of virtue.” The reason of this is because the inclination to its proper objects, which seems to be the beginning of a habit, does not belong to the habit, but rather to the very nature of the powers.

But on the part of the body, in respect of the individual nature, there are some appetitive habits by way of natural beginnings. For some are disposed from their own bodily temperament to chastity or meekness or such like.

Reply to Objection 1. This objection takes nature as divided against reason and will; whereas reason itself and will belong to the nature of man.

Reply to Objection 2. Something may be added even naturally to the nature of a power, while it cannot belong to the power itself. For instance, with regard to the angels, it cannot belong to the intellective power itself capable of knowing all things: for thus it would have to be the act of all things, which belongs to God alone. Because that by which something is known, must needs be the actual likeness of the thing known: whence it would follow, if the power of the angel knew all things by itself, that it was the likeness and act of all things. Wherefore there must needs be added to the angels’ intellective power, some intelligible species,

which are likenesses of things understood: for it is by participation of the Divine wisdom and not by their own essence, that their intellect can be actually those things which they understand. And so it is clear that not everything belonging to a natural habit can belong to the power.

Reply to Objection 3. Nature is not equally inclined to cause all the various kinds of habits: since some can be caused by nature, and some not, as we have said above. And so it does not follow that because some habits are natural, therefore all are natural.

Objection 1. It would seem that no habit is caused by acts. For habit is a quality, as we have said above (q. 49, a. 1). Now every quality is caused in a subject, according to the latter's receptivity. Since then the agent, inasmuch as it acts, does not receive but rather gives: it seems impossible for a habit to be caused in an agent by its own acts.

Objection 2. Further, the thing wherein a quality is caused is moved to that quality, as may be clearly seen in that which is heated or cooled: whereas that which produces the act that causes the quality, moves, as may be seen in that which heats or cools. If therefore habits were caused in anything by its own act, it would follow that the same would be mover and moved, active and passive: which is impossible, as stated in *Physics* iii, 8.

Objection 3. Further, the effect cannot be more noble than its cause. But habit is more noble than the act which precedes the habit; as is clear from the fact that the latter produces more noble acts. Therefore habit cannot be caused by an act which precedes the habit.

On the contrary, The Philosopher (*Ethic.* ii, 1,2) teaches that habits of virtue and vice are caused by acts.

I answer that, In the agent there is sometimes only the active principle of its act: for instance in fire there is only the active principle of heating. And in such an agent a habit cannot be caused by its own act: for which reason natural things cannot become accustomed or unaccustomed, as is stated in *Ethic.* ii, 1. But a certain agent is to be found, in which there is both the active and the passive principle of its act, as we see in human acts. For the acts of the appetitive power proceed from that same power according as it is moved by the appre-

hensive power presenting the object: and further, the intellective power, according as it reasons about conclusions, has, as it were, an active principle in a self-evident proposition. Wherefore by such acts habits can be caused in their agents; not indeed with regard to the first active principle, but with regard to that principle of the act, which principle is a mover moved. For everything that is passive and moved by another, is disposed by the action of the agent; wherefore if the acts be multiplied a certain quality is formed in the power which is passive and moved, which quality is called a habit: just as the habits of moral virtue are caused in the appetitive powers, according as they are moved by the reason, and as the habits of science are caused in the intellect, according as it is moved by first propositions.

Reply to Objection 1. The agent, as agent, does not receive anything. But in so far as it moves through being moved by another, it receives something from that which moves it: and thus is a habit caused.

Reply to Objection 2. The same thing, and in the same respect, cannot be mover and moved; but nothing prevents a thing from being moved by itself as to different respects, as is proved in *Physics* viii, text. 28,29.

Reply to Objection 3. The act which precedes the habit, in so far as it comes from an active principle, proceeds from a more excellent principle than is the habit caused thereby: just as the reason is a more excellent principle than the habit of moral virtue produced in the appetitive power by repeated acts, and as the understanding of first principles is a more excellent principle than the science of conclusions.

Objection 1. It would seem that a habit can be caused by one act. For demonstration is an act of reason. But science, which is the habit of one conclusion, is caused by one demonstration. Therefore habit can be caused by one act.

Objection 2. Further, as acts happen to increase by multiplication so do they happen to increase by intensity. But a habit is caused by multiplication of acts. Therefore also if an act be very intense, it can be the generating cause of a habit.

Objection 3. Further, health and sickness are habits. But it happens that a man is healed or becomes ill, by one act. Therefore one act can cause a habit.

On the contrary, The Philosopher (*Ethic.* i, 7): “As neither does one swallow nor one day make spring; so neither does one day nor a short time make a man blessed and happy.” But “happiness is an operation in respect of a habit of perfect virtue” (*Ethic.* i, 7,10,13). Therefore a habit of virtue, and for the same reason, other habits, is not caused by one act.

I answer that, As we have said already (a. 2), habit is caused by act, because a passive power is moved by an active principle. But in order that some quality be caused in that which is passive the active principle must entirely overcome the passive. Whence we see that because fire cannot at once overcome the combustible, it does not enkindle at once; but it gradually expels contrary dispositions, so that by overcoming it entirely, it may impress its likeness on it. Now it is clear that the active principle which is reason, cannot entirely overcome the appetitive power in one act: because the appetitive power is inclined variously, and to many things;

while the reason judges in a single act, what should be willed in regard to various aspects and circumstances. Wherefore the appetitive power is not thereby entirely overcome, so as to be inclined like nature to the same thing, in the majority of cases; which inclination belongs to the habit of virtue. Therefore a habit of virtue cannot be caused by one act, but only by many.

But in the apprehensive powers, we must observe that there are two passive principles: one is the “possible”^{*} intellect itself; the other is the intellect which Aristotle (*De Anima* iii, text. 20) calls “passive,” and is the “particular reason,” that is the cogitative power, with memory and imagination. With regard then to the former passive principle, it is possible for a certain active principle to entirely overcome, by one act, the power of its passive principle: thus one self-evident proposition convinces the intellect, so that it gives a firm assent to the conclusion, but a probable proposition cannot do this. Wherefore a habit of opinion needs to be caused by many acts of the reason, even on the part of the “possible” intellect: whereas a habit of science can be caused by a single act of the reason, so far as the “possible” intellect is concerned. But with regard to the lower apprehensive powers, the same acts need to be repeated many times for anything to be firmly impressed on the memory. And so the Philosopher says (*De Memor. et Remin.* 1) that “meditation strengthens memory.” Bodily habits, however, can be caused by one act, if the active principle is of great power: sometimes, for instance, a strong dose of medicine restores health at once.

Hence the solutions to the objections are clear.

* See Ia, q. 79, a. 2 ad 2

Objection 1. It would seem that no habit is infused in man by God. For God treats all equally. If therefore He infuses habits into some, He would infuse them into all: which is clearly untrue.

Objection 2. Further, God works in all things according to the mode which is suitable to their nature: for “it belongs to Divine providence to preserve nature,” as Dionysius says (Div. Nom. iv). But habits are naturally caused in man by acts, as we have said above (a. 2). Therefore God does not cause habits to be in man except by acts.

Objection 3. Further, if any habit be infused into man by God, man can by that habit perform many acts. But “from those acts a like habit is caused” (Ethic. ii, 1,2). Consequently there will be two habits of the same species in the same man, one acquired, the other infused. Now this seems impossible: for the two forms of the same species cannot be in the same subject. Therefore a habit is not infused into man by God.

On the contrary, it is written (Ecclus. 15:5): “God filled him with the spirit of wisdom and understanding.” Now wisdom and understanding are habits. Therefore some habits are infused into man by God.

I answer that, Some habits are infused by God into man, for two reasons.

The first reason is because there are some habits by which man is disposed to an end which exceeds the proportion of human nature, namely, the ultimate and perfect happiness of man, as stated above (q. 5, a. 5). And since habits need to be in proportion with that to which

man is disposed by them, therefore is it necessary that those habits, which dispose to this end, exceed the proportion of human nature. Wherefore such habits can never be in man except by Divine infusion, as is the case with all gratuitous virtues.

The other reason is, because God can produce the effects of second causes, without these second causes, as we have said in the Ia, q. 105, a. 6. Just as, therefore, sometimes, in order to show His power, He causes health, without its natural cause, but which nature could have caused, so also, at times, for the manifestation of His power, He infuses into man even those habits which can be caused by a natural power. Thus He gave to the apostles the science of the Scriptures and of all tongues, which men can acquire by study or by custom, but not so perfectly.

Reply to Objection 1. God, in respect of His Nature, is the same to all, but in respect of the order of His Wisdom, for some fixed motive, gives certain things to some, which He does not give to others.

Reply to Objection 2. That God works in all according to their mode, does not hinder God from doing what nature cannot do: but it follows from this that He does nothing contrary to that which is suitable to nature.

Reply to Objection 3. Acts produced by an infused habit, do not cause a habit, but strengthen the already existing habit; just as the remedies of medicine given to a man who is naturally healthy, do not cause a kind of health, but give new strength to the health he had before.

FIRST PART OF THE SECOND PART, QUESTION 52

Of the Increase of Habits (In Three Articles)

We have now to consider the increase of habits; under which head there are three points of inquiry:

- (1) Whether habits increase?
- (2) Whether they increase by addition?
- (3) Whether each act increases the habit?

Whether habits increase?

Ia IIae q. 52 a. 1

Objection 1. It would seem that habits cannot increase. For increase concerns quantity (Phys. v, text. 18). But habits are not in the genus quantity, but in that of quality. Therefore there can be no increase of habits.

Objection 2. Further, habit is a perfection (Phys. vii, text. 17,18). But since perfection conveys a notion of end and term, it seems that it cannot be more or less. Therefore a habit cannot increase.

Objection 3. Further, those things which can be more or less are subject to alteration: for that which from being less hot becomes more hot, is said to be altered. But in habits there is no alteration, as is proved in Phys. vii, text. 15,17. Therefore habits cannot increase.

On the contrary, Faith is a habit, and yet it increases: wherefore the disciples said to our Lord (Lk. 17:5): "Lord, increase our faith." Therefore habits increase.

I answer that, Increase, like other things pertaining to quantity, is transferred from bodily quantities to intelligible spiritual things, on account of the natural connection of the intellect with corporeal things, which come under the imagination. Now in corporeal quantities, a thing is said to be great, according as it reaches the perfection of quantity due to it; wherefore a certain quantity is reputed great in man, which is not reputed great in an elephant. And so also in forms, we say a thing is great because it is perfect. And since good has the nature of perfection, therefore "in things which are great, but not in quantity, to be greater is the same as to be better," as Augustine says (De Trin. vi, 8).

Now the perfection of a form may be considered in two ways: first, in respect of the form itself: secondly, in respect of the participation of the form by its subject. In so far as we consider the perfections of a form in respect of the form itself, thus the form is said to be "little" or "great": for instance great or little health or science. But in so far as we consider the perfection of a form in respect of the participation thereof by the subject, it is said to be "more" or "less": for instance more or less white or healthy. Now this distinction is not to be understood as implying that the form has a being outside its matter or subject, but that it is one thing to consider the form according to its specific nature, and another to consider it in respect of its participation by a subject.

In this way, then, there were four opinions among philosophers concerning intensity and remission of habits and forms, as Simplicius relates in his Commentary on the Predicaments. For Plotinus and the other Platonists held that qualities and habits themselves were susceptible of more or less, for the reason that they were material and so had a certain want of definiteness, on account of the infinity of matter. Others, on the contrary, held that qualities and habits of themselves were not susceptible of more or less; but that the things affected by them [qualia] are said to be more or less, in respect of the participation of the subject: that, for instance, justice is not more or less, but the just thing. Aristotle alludes to this opinion in the Predicaments (Categor. vi). The third opinion was that of the Stoics, and lies between the two preceding opinions. For they held that some habits are of themselves susceptible of more and less, for instance, the arts; and that some are not, as the virtues. The fourth opinion was held by some who said that qualities and immaterial forms are not susceptible of more or less, but that material forms are.

In order that the truth in this matter be made clear, we must observe that, in respect of which a thing receives its species, must be something fixed and stationary, and as it were indivisible: for whatever attains to that thing, is contained under the species, and whatever recedes from it more or less, belongs to another species, more or less perfect. Wherefore, the Philosopher says (Metaph. viii, text. 10) that species of things are like numbers, in which addition or subtraction changes the species. If, therefore, a form, or anything at all, receives its specific nature in respect of itself, or in respect of something belonging to it, it is necessary that, considered in itself, it be something of a definite nature, which can be neither more nor less. Such are heat, whiteness or other like qualities which are not denominated from a relation to something else: and much more so, substance, which is "per se" being. But those things which receive their species from something to which they are related, can be diversified, in respect of themselves, according to more or less: and nonetheless they remain in the same species, on account of the oneness of that to which they are related, and from which they receive their species. For example, movement is in itself more intense or more remiss: and yet it remains in the same

species, on account of the oneness of the term by which it is specified. We may observe the same thing in health; for a body attains to the nature of health, according as it has a disposition suitable to an animal's nature, to which various dispositions may be suitable; which disposition is therefore variable as regards more or less, and withal the nature of health remains. Whence the Philosopher says (*Ethic. x, 2,3*): "Health itself may be more or less: for the measure is not the same in all, nor is it always the same in one individual; but down to a certain point it may decrease and still remain health."

Now these various dispositions and measures of health are by way of excess and defect: wherefore if the name of health were given to the most perfect measure, then we should not speak of health as greater or less. Thus therefore it is clear how a quality or form may increase or decrease of itself, and how it cannot.

But if we consider a quality or form in respect of its participation by the subject, thus again we find that some qualities and forms are susceptible of more or less, and some not. Now Simplicius assigns the cause of this diversity to the fact that substance in itself cannot be susceptible of more or less, because it is "per se" being. And therefore every form which is participated substantially by its subject, cannot vary in intensity and remission: wherefore in the genus of substance nothing is said to be more or less. And because quantity is nigh to substance, and because shape follows on quantity, therefore is it that neither in these can there be such a thing as more or less. Whence the Philosopher says (*Phys. vii, text. 15*) that when a thing receives form and shape, it is not said to be altered, but to be made. But other qualities which are further removed from quantity, and are connected with passions and actions, are susceptible of more or less, in respect of their participation by the subject.

Now it is possible to explain yet further the reason of this diversity. For, as we have said, that from which a thing receives its species must remain indivisibly fixed and constant in something indivisible. Wherefore in two ways it may happen that a form cannot be participated more or less. First because the participator has its species in respect of that form. And for this reason no substantial form is participated more or less. Wherefore the Philosopher says (*Metaph. viii, text. 10*) that, "as a number cannot be more or less, so neither can that which is in the species of substance," that is, in respect of its participation of the specific form: "but in so far as substance may be with matter," i.e. in respect of material dispositions, "more or less are found in substance."

Secondly this may happen from the fact that the form is essentially indivisible: wherefore if anything

participate that form, it must needs participate it in respect of its indivisibility. For this reason we do not speak of the species of number as varying in respect of more or less; because each species thereof is constituted by an indivisible unity. The same is to be said of the species of continuous quantity, which are denominated from numbers, as two-cubits-long, three-cubits-long, and of relations of quantity, as double and treble, and of figures of quantity, as triangle and tetragon.

This same explanation is given by Aristotle in the *Predicaments* (*Categor. vi*), where in explaining why figures are not susceptible of more or less, he says: "Things which are given the nature of a triangle or a circle, are accordingly triangles and circles": to wit, because indivisibility is essential to the motion of such, wherefore whatever participates their nature must participate it in its indivisibility.

It is clear, therefore, since we speak of habits and dispositions in respect of a relation to something (*Phys. vii, text. 17*), that in two ways intensity and remission may be observed in habits and dispositions. First, in respect of the habit itself: thus, for instance, we speak of greater or less health; greater or less science, which extends to more or fewer things. Secondly, in respect of participation by the subject: in so far as equal science or health is participated more in one than in another, according to a diverse aptitude arising either from nature, or from custom. For habit and disposition do not give species to the subject: nor again do they essentially imply indivisibility.

We shall say further on (*q. 66, a. 1*) how it is with the virtues.

Reply to Objection 1. As the word "great" is taken from corporeal quantities and applied to the intelligible perfections of forms; so also is the word "growth," the term of which is something great.

Reply to Objection 2. Habit is indeed a perfection, but not a perfection which is the term of its subject; for instance, a term giving the subject its specific being. Nor again does the nature of a habit include the notion of term, as do the species of numbers. Wherefore there is nothing to hinder it from being susceptible of more or less.

Reply to Objection 3. Alteration is primarily indeed in the qualities of the third species; but secondarily it may be in the qualities of the first species: for, supposing an alteration as to hot and cold, there follows in an animal an alteration as to health and sickness. In like manner, if an alteration take place in the passions of the sensitive appetite, or the sensitive powers of apprehension, an alteration follows as to science and virtue (*Phys. viii, text. 20*).

Objection 1. It would seem that the increase of habits is by way of addition. For the word “increase,” as we have said, is transferred to forms, from corporeal quantities. But in corporeal quantities there is no increase without addition: wherefore (De Gener. i, text. 31) it is said that “increase is an addition to a magnitude already existing.” Therefore in habits also there is no increase without addition.

Objection 2. Further, habit is not increased except by means of some agent. But every agent does something in the passive subject: for instance, that which heats, causes heat in that which is heated. Therefore there is no increase without addition.

Objection 3. Further, as that which is not white, is in potentiality to be white: so that which is less white, is in potentiality to be more white. But that which is not white, is not made white except by the addition of whiteness. Therefore that which is less white, is not made more white, except by an added whiteness.

On the contrary, The Philosopher says (Phys. iv, text. 84): “That which is hot is made hotter, without making, in the matter, something hot, that was not hot, when the thing was less hot.” Therefore, in like manner, neither is any addition made in other forms when they increase.

Answer that, The solution of this question depends on what we have said above (a. 1). For we said that increase and decrease in forms which are capable of intensity and remissness, happen in one way not on the part of the very form considered in itself, through the diverse participation thereof by the subject. Wherefore such increase of habits and other forms, is not caused by an addition of form to form; but by the subject participating more or less perfectly, one and the same form. And just as, by an agent which is in act, something is made actually hot, beginning, as it were, to participate a form, not as though the form itself were made, as is proved in Metaph. vii, text. 32, so, by an intense action of the agent, something is made more hot, as it were participating the form more perfectly, not as though something were added to the form.

For if this increase in forms were understood to be by way of addition, this could only be either in the form itself or in the subject. If it be understood of the form itself, it has already been stated (a. 1) that such an addition or subtraction would change the species; even as the species of color is changed when a thing from being pale becomes white. If, on the other hand, this addition be understood as applying to the subject, this could only be either because one part of the subject receives a form which it had not previously (thus we may say cold in-

creases in a man who, after being cold in one part of his body, is cold in several parts), or because some other subject is added sharing in the same form (as when a hot thing is added to another, or one white thing to another). But in either of these two ways we have not a more white or a more hot thing, but a greater white or hot thing.

Since, however, as stated above (a. 1), certain accidents are of themselves susceptible of more or less, in some of these we may find increase by addition. For movement increases by an addition either to the time it lasts, or to the course it follows: and yet the species remains the same on account of the oneness of the term. Yet movement increases the intensity as to participation in its subject: i.e. in so far as the same movement can be executed more or less speedily or readily. In like manner, science can increase in itself by addition; thus when anyone learns several conclusions of geometry, the same specific habit of science increases in that man. Yet a man’s science increases, as to the subject’s participation thereof, in intensity, in so far as one man is quicker and readier than another in considering the same conclusions.

As to bodily habits, it does not seem very probable that they receive increase by way of addition. For an animal is not said to be simply healthy or beautiful, unless it be such in all its parts. And if it be brought to a more perfect measure, this is the result of a change in the simple qualities, which are not susceptible of increase save in intensity on the part of the subject partaking of them.

How this question affects virtues we shall state further on (q. 66, a. 1).

Reply to Objection 1. Even in bodily bulk increase is twofold. First, by addition of one subject to another; such is the increase of living things. Secondly, by mere intensity, without any addition at all; such is the case with things subject to rarefaction, as is stated in Phys. iv, text. 63.

Reply to Objection 2. The cause that increases a habit, always effects something in the subject, but not a new form. But it causes the subject to partake more perfectly of a pre-existing form, or it makes the form to extend further.

Reply to Objection 3. What is not already white, is potentially white, as not yet possessing the form of whiteness: hence the agent causes a new form in the subject. But that which is less hot or white, is not in potentiality to those forms, since it has them already actually: but it is in potentiality to a perfect mode of participation; and this it receives through the agent’s action.

Objection 1. It would seem that every act increases its habit. For when the cause is increased the effect is increased. Now acts are causes of habits, as stated above (q. 51, a. 2). Therefore a habit increases when its acts are multiplied.

Objection 2. Further, of like things a like judgment should be formed. But all the acts proceeding from one and the same habit are alike (Ethic. ii, 1,2). Therefore if some acts increase a habit, every act should increase it.

Objection 3. Further, like is increased by like. But any act is like the habit whence it proceeds. Therefore every act increases the habit.

On the contrary, Opposite effects do not result from the same cause. But according to Ethic. ii, 2, some acts lessen the habit whence they proceed, for instance if they be done carelessly. Therefore it is not every act that increases a habit.

I answer that, "Like acts cause like habits" (Ethic. ii, 1,2). Now things are like or unlike not only in respect of their qualities being the same or various, but also in respect of the same or a different mode of par-

ticipation. For it is not only black that is unlike white, but also less white is unlike more white, since there is movement from less white to more white, even as from one opposite to another, as stated in Phys. v, text. 52.

But since use of habits depends on the will, as was shown above (q. 50, a. 5); just as one who has a habit may fail to use it or may act contrary to it; so may he happen to use the habit by performing an act that is not in proportion to the intensity of the habit. Accordingly, if the intensity of the act correspond in proportion to the intensity of the habit, or even surpass it, every such act either increases the habit or disposes to an increase thereof, if we may speak of the increase of habits as we do of the increase of an animal. For not every morsel of food actually increases the animal's size as neither does every drop of water hollow out the stone: but the multiplication of food results at last in an increase of the body. So, too, repeated acts cause a habit to grow. If, however, the act falls short of the intensity of the habit, such an act does not dispose to an increase of that habit, but rather to a lessening thereof.

From this it is clear how to solve the objections.

Objection 1. It would seem that habits cannot increase. For increase concerns quantity (Phys. v, text. 18). But habits are not in the genus quantity, but in that of quality. Therefore there can be no increase of habits.

Objection 2. Further, habit is a perfection (Phys. vii, text. 17,18). But since perfection conveys a notion of end and term, it seems that it cannot be more or less. Therefore a habit cannot increase.

Objection 3. Further, those things which can be more or less are subject to alteration: for that which from being less hot becomes more hot, is said to be altered. But in habits there is no alteration, as is proved in Phys. vii, text. 15,17. Therefore habits cannot increase.

On the contrary, Faith is a habit, and yet it increases: wherefore the disciples said to our Lord (Lk. 17:5): "Lord, increase our faith." Therefore habits increase.

I answer that, Increase, like other things pertaining to quantity, is transferred from bodily quantities to intelligible spiritual things, on account of the natural connection of the intellect with corporeal things, which come under the imagination. Now in corporeal quantities, a thing is said to be great, according as it reaches the perfection of quantity due to it; wherefore a certain quantity is reputed great in man, which is not reputed great in an elephant. And so also in forms, we say a thing is great because it is perfect. And since good has the nature of perfection, therefore "in things which are great, but not in quantity, to be greater is the same as to be better," as Augustine says (De Trin. vi, 8).

Now the perfection of a form may be considered in two ways: first, in respect of the form itself: secondly, in respect of the participation of the form by its subject. In so far as we consider the perfections of a form in respect of the form itself, thus the form is said to be "little" or "great": for instance great or little health or science. But in so far as we consider the perfection of a form in respect of the participation thereof by the subject, it is said to be "more" or "less": for instance more or less white or healthy. Now this distinction is not to be understood as implying that the form has a being outside its matter or subject, but that it is one thing to consider the form according to its specific nature, and another to consider it in respect of its participation by a subject.

In this way, then, there were four opinions among philosophers concerning intensity and remission of habits and forms, as Simplicius relates in his Commentary on the Predicaments. For Plotinus and the other Platonists held that qualities and habits themselves were susceptible of more or less, for the reason that they were material and so had a certain want of definiteness, on account of the infinity of matter. Others, on the contrary, held that qualities and habits of themselves were not susceptible of more or less; but that the things affected by them [qualia] are said to be more or less, in respect

of the participation of the subject: that, for instance, justice is not more or less, but the just thing. Aristotle alludes to this opinion in the Predicaments (Categor. vi). The third opinion was that of the Stoics, and lies between the two preceding opinions. For they held that some habits are of themselves susceptible of more and less, for instance, the arts; and that some are not, as the virtues. The fourth opinion was held by some who said that qualities and immaterial forms are not susceptible of more or less, but that material forms are.

In order that the truth in this matter be made clear, we must observe that, in respect of which a thing receives its species, must be something fixed and stationary, and as it were indivisible: for whatever attains to that thing, is contained under the species, and whatever recedes from it more or less, belongs to another species, more or less perfect. Wherefore, the Philosopher says (Metaph. viii, text. 10) that species of things are like numbers, in which addition or subtraction changes the species. If, therefore, a form, or anything at all, receives its specific nature in respect of itself, or in respect of something belonging to it, it is necessary that, considered in itself, it be something of a definite nature, which can be neither more nor less. Such are heat, whiteness or other like qualities which are not denominated from a relation to something else: and much more so, substance, which is "per se" being. But those things which receive their species from something to which they are related, can be diversified, in respect of themselves, according to more or less: and nonetheless they remain in the same species, on account of the oneness of that to which they are related, and from which they receive their species. For example, movement is in itself more intense or more remiss: and yet it remains in the same species, on account of the oneness of the term by which it is specified. We may observe the same thing in health; for a body attains to the nature of health, according as it has a disposition suitable to an animal's nature, to which various dispositions may be suitable; which disposition is therefore variable as regards more or less, and withal the nature of health remains. Whence the Philosopher says (Ethic. x, 2,3): "Health itself may be more or less: for the measure is not the same in all, nor is it always the same in one individual; but down to a certain point it may decrease and still remain health."

Now these various dispositions and measures of health are by way of excess and defect: wherefore if the name of health were given to the most perfect measure, then we should not speak of health as greater or less. Thus therefore it is clear how a quality or form may increase or decrease of itself, and how it cannot.

But if we consider a quality or form in respect of its participation by the subject, thus again we find that some qualities and forms are susceptible of more or less, and some not. Now Simplicius assigns the cause of this diversity to the fact that substance in itself cannot be

susceptible of more or less, because it is “per se” being. And therefore every form which is participated substantially by its subject, cannot vary in intensity and remission: wherefore in the genus of substance nothing is said to be more or less. And because quantity is nigh to substance, and because shape follows on quantity, therefore is it that neither in these can there be such a thing as more or less. Whence the Philosopher says (Phys. vii, text. 15) that when a thing receives form and shape, it is not said to be altered, but to be made. But other qualities which are further removed from quantity, and are connected with passions and actions, are susceptible of more or less, in respect of their participation by the subject.

Now it is possible to explain yet further the reason of this diversity. For, as we have said, that from which a thing receives its species must remain indivisibly fixed and constant in something indivisible. Wherefore in two ways it may happen that a form cannot be participated more or less. First because the participator has its species in respect of that form. And for this reason no substantial form is participated more or less. Wherefore the Philosopher says (Metaph. viii, text. 10) that, “as a number cannot be more or less, so neither can that which is in the species of substance,” that is, in respect of its participation of the specific form: “but in so far as substance may be with matter,” i.e. in respect of material dispositions, “more or less are found in substance.”

Secondly this may happen from the fact that the form is essentially indivisible: wherefore if anything participate that form, it must needs participate it in respect of its indivisibility. For this reason we do not speak of the species of number as varying in respect of more or less; because each species thereof is constituted by an indivisible unity. The same is to be said of the species of continuous quantity, which are denominated from numbers, as two-cubits-long, three-cubits-long, and of relations of quantity, as double and treble, and of figures of quantity, as triangle and tetragon.

This same explanation is given by Aristotle in the Predicaments (Categor. vi), where in explaining why

figures are not susceptible of more or less, he says: “Things which are given the nature of a triangle or a circle, are accordingly triangles and circles”: to wit, because indivisibility is essential to the motion of such, wherefore whatever participates their nature must participate it in its indivisibility.

It is clear, therefore, since we speak of habits and dispositions in respect of a relation to something (Phys. vii, text. 17), that in two ways intensity and remission may be observed in habits and dispositions. First, in respect of the habit itself: thus, for instance, we speak of greater or less health; greater or less science, which extends to more or fewer things. Secondly, in respect of participation by the subject: in so far as equal science or health is participated more in one than in another, according to a diverse aptitude arising either from nature, or from custom. For habit and disposition do not give species to the subject: nor again do they essentially imply indivisibility.

We shall say further on (q. 66, a. 1) how it is with the virtues.

Reply to Objection 1. As the word “great” is taken from corporeal quantities and applied to the intelligible perfections of forms; so also is the word “growth,” the term of which is something great.

Reply to Objection 2. Habit is indeed a perfection, but not a perfection which is the term of its subject; for instance, a term giving the subject its specific being. Nor again does the nature of a habit include the notion of term, as do the species of numbers. Wherefore there is nothing to hinder it from being susceptible of more or less.

Reply to Objection 3. Alteration is primarily indeed in the qualities of the third species; but secondarily it may be in the qualities of the first species: for, supposing an alteration as to hot and cold, there follows in an animal an alteration as to health and sickness. In like manner, if an alteration take place in the passions of the sensitive appetite, or the sensitive powers of apprehension, an alteration follows as to science and virtue (Phys. viii, text. 20).

Objection 1. It would seem that the increase of habits is by way of addition. For the word “increase,” as we have said, is transferred to forms, from corporeal quantities. But in corporeal quantities there is no increase without addition: wherefore (De Gener. i, text. 31) it is said that “increase is an addition to a magnitude already existing.” Therefore in habits also there is no increase without addition.

Objection 2. Further, habit is not increased except by means of some agent. But every agent does something in the passive subject: for instance, that which heats, causes heat in that which is heated. Therefore there is no increase without addition.

Objection 3. Further, as that which is not white, is in potentiality to be white: so that which is less white, is in potentiality to be more white. But that which is not white, is not made white except by the addition of whiteness. Therefore that which is less white, is not made more white, except by an added whiteness.

On the contrary, The Philosopher says (Phys. iv, text. 84): “That which is hot is made hotter, without making, in the matter, something hot, that was not hot, when the thing was less hot.” Therefore, in like manner, neither is any addition made in other forms when they increase.

Answer that, The solution of this question depends on what we have said above (a. 1). For we said that increase and decrease in forms which are capable of intensity and remissness, happen in one way not on the part of the very form considered in itself, through the diverse participation thereof by the subject. Wherefore such increase of habits and other forms, is not caused by an addition of form to form; but by the subject participating more or less perfectly, one and the same form. And just as, by an agent which is in act, something is made actually hot, beginning, as it were, to participate a form, not as though the form itself were made, as is proved in Metaph. vii, text. 32, so, by an intense action of the agent, something is made more hot, as it were participating the form more perfectly, not as though something were added to the form.

For if this increase in forms were understood to be by way of addition, this could only be either in the form itself or in the subject. If it be understood of the form itself, it has already been stated (a. 1) that such an addition or subtraction would change the species; even as the species of color is changed when a thing from being pale becomes white. If, on the other hand, this addition be understood as applying to the subject, this could only be either because one part of the subject receives a form which it had not previously (thus we may say cold in-

creases in a man who, after being cold in one part of his body, is cold in several parts), or because some other subject is added sharing in the same form (as when a hot thing is added to another, or one white thing to another). But in either of these two ways we have not a more white or a more hot thing, but a greater white or hot thing.

Since, however, as stated above (a. 1), certain accidents are of themselves susceptible of more or less, in some of these we may find increase by addition. For movement increases by an addition either to the time it lasts, or to the course it follows: and yet the species remains the same on account of the oneness of the term. Yet movement increases the intensity as to participation in its subject: i.e. in so far as the same movement can be executed more or less speedily or readily. In like manner, science can increase in itself by addition; thus when anyone learns several conclusions of geometry, the same specific habit of science increases in that man. Yet a man’s science increases, as to the subject’s participation thereof, in intensity, in so far as one man is quicker and readier than another in considering the same conclusions.

As to bodily habits, it does not seem very probable that they receive increase by way of addition. For an animal is not said to be simply healthy or beautiful, unless it be such in all its parts. And if it be brought to a more perfect measure, this is the result of a change in the simple qualities, which are not susceptible of increase save in intensity on the part of the subject partaking of them.

How this question affects virtues we shall state further on (q. 66, a. 1).

Reply to Objection 1. Even in bodily bulk increase is twofold. First, by addition of one subject to another; such is the increase of living things. Secondly, by mere intensity, without any addition at all; such is the case with things subject to rarefaction, as is stated in Phys. iv, text. 63.

Reply to Objection 2. The cause that increases a habit, always effects something in the subject, but not a new form. But it causes the subject to partake more perfectly of a pre-existing form, or it makes the form to extend further.

Reply to Objection 3. What is not already white, is potentially white, as not yet possessing the form of whiteness: hence the agent causes a new form in the subject. But that which is less hot or white, is not in potentiality to those forms, since it has them already actually: but it is in potentiality to a perfect mode of participation; and this it receives through the agent’s action.

Objection 1. It would seem that every act increases its habit. For when the cause is increased the effect is increased. Now acts are causes of habits, as stated above (q. 51, a. 2). Therefore a habit increases when its acts are multiplied.

Objection 2. Further, of like things a like judgment should be formed. But all the acts proceeding from one and the same habit are alike (Ethic. ii, 1,2). Therefore if some acts increase a habit, every act should increase it.

Objection 3. Further, like is increased by like. But any act is like the habit whence it proceeds. Therefore every act increases the habit.

On the contrary, Opposite effects do not result from the same cause. But according to Ethic. ii, 2, some acts lessen the habit whence they proceed, for instance if they be done carelessly. Therefore it is not every act that increases a habit.

I answer that, "Like acts cause like habits" (Ethic. ii, 1,2). Now things are like or unlike not only in respect of their qualities being the same or various, but also in respect of the same or a different mode of par-

ticipation. For it is not only black that is unlike white, but also less white is unlike more white, since there is movement from less white to more white, even as from one opposite to another, as stated in Phys. v, text. 52.

But since use of habits depends on the will, as was shown above (q. 50, a. 5); just as one who has a habit may fail to use it or may act contrary to it; so may he happen to use the habit by performing an act that is not in proportion to the intensity of the habit. Accordingly, if the intensity of the act correspond in proportion to the intensity of the habit, or even surpass it, every such act either increases the habit or disposes to an increase thereof, if we may speak of the increase of habits as we do of the increase of an animal. For not every morsel of food actually increases the animal's size as neither does every drop of water hollow out the stone: but the multiplication of food results at last in an increase of the body. So, too, repeated acts cause a habit to grow. If, however, the act falls short of the intensity of the habit, such an act does not dispose to an increase of that habit, but rather to a lessening thereof.

From this it is clear how to solve the objections.

FIRST PART OF THE SECOND PART, QUESTION 53

How Habits Are Corrupted or Diminished (In Three Articles)

We must now consider how habits are lost or weakened; and under this head there are three points of inquiry:

- (1) Whether a habit can be corrupted?
- (2) Whether it can be diminished?
- (3) How are habits corrupted or diminished?

Whether a habit can be corrupted?

Ia IIae q. 53 a. 1

Objection 1. It would seem that a habit cannot be corrupted. For habit is within its subject like a second nature; wherefore it is pleasant to act from habit. Now so long as a thing is, its nature is not corrupted. Therefore neither can a habit be corrupted so long as its subject remains.

Objection 2. Further, whenever a form is corrupted, this is due either to corruption of its subject, or to its contrary: thus sickness ceases through corruption of the animal, or through the advent of health. Now science, which is a habit, cannot be lost through corruption of its subject: since “the intellect,” which is its subject, “is a substance that is incorruptible” (De Anima i, text. 65). In like manner, neither can it be lost through the action of its contrary: since intelligible species are not contrary to one another (Metaph. vii, text. 52). Therefore the habit of science can nowise be lost.

Objection 3. Further, all corruption results from some movement. But the habit of science, which is in the soul, cannot be corrupted by a direct movement of the soul itself, since the soul is not moved directly. It is, however, moved indirectly through the movement of the body: and yet no bodily change seems capable of corrupting the intelligible species residing in the intellect: since the intellect independently of the body is the proper abode of the species; for which reason it is held that habits are not lost either through old age or through death. Therefore science cannot be corrupted. For the same reason neither can habits of virtue be corrupted, since they also are in the rational soul, and, as the Philosopher declares (Ethic. i, 10), “virtue is more lasting than learning.”

On the contrary, The Philosopher says (De Long. et Brev. Vitae ii) that “forgetfulness and deception are the corruption of science.” Moreover, by sinning a man loses a habit of virtue: and again, virtues are engendered and corrupted by contrary acts (Ethic. ii, 2).

I answer that, A form is said to be corrupted directly by its contrary; indirectly, through its subject being corrupted. When therefore a habit has a corruptible subject, and a cause that has a contrary, it can be corrupted both ways. This is clearly the case with bodily habits—for instance, health and sickness. But those habits that have an incorruptible subject, cannot be corrupted indirectly. There are, however, some

habits which, while residing chiefly in an incorruptible subject, reside nevertheless secondarily in a corruptible subject; such is the habit of science which is chiefly indeed in the “possible” intellect, but secondarily in the sensitive powers of apprehension, as stated above (q. 50, a. 3, ad 3). Consequently the habit of science cannot be corrupted indirectly, on the part of the “possible” intellect, but only on the part of the lower sensitive powers.

We must therefore inquire whether habits of this kind can be corrupted directly. If then there be a habit having a contrary, either on the part of itself or on the part of its cause, it can be corrupted directly: but if it has no contrary, it cannot be corrupted directly. Now it is evident that an intelligible species residing in the “possible” intellect, has no contrary; nor can the active intellect, which is the cause of that species, have a contrary. Wherefore if in the “possible” intellect there be a habit caused immediately by the active intellect, such a habit is incorruptible both directly and indirectly. Such are the habits of the first principles, both speculative and practical, which cannot be corrupted by any forgetfulness or deception whatever: even as the Philosopher says about prudence (Ethic. vi, 5) that “it cannot be lost by being forgotten.” There is, however, in the “possible” intellect a habit caused by the reason, to wit, the habit of conclusions, which is called science, to the cause of which something may be contrary in two ways. First, on the part of those very propositions which are the starting point of the reason: for the assertion “Good is not good” is contrary to the assertion “Good is good” (Peri Herm. ii). Secondly, on the part of the process of reasoning; forasmuch as a sophistical syllogism is contrary to a dialectic or demonstrative syllogism. Wherefore it is clear that a false reason can corrupt the habit of a true opinion or even of science. Hence the Philosopher, as stated above, says that “deception is the corruption of science.” As to virtues, some of them are intellectual, residing in reason itself, as stated in Ethic. vi, 1: and to these applies what we have said of science and opinion. Some, however, viz. the moral virtues, are in the appetitive part of the soul; and the same may be said of the contrary vices. Now the habits of the appetitive part are caused therein because it is natural to it to be moved by the reason. Therefore a habit either of virtue or of vice, may be corrupted by a judgment of reason, whenever

its motion is contrary to such vice or virtue, whether through ignorance, passion or deliberate choice.

Reply to Objection 1. As stated in *Ethic.* vii, 10, a habit is like a second nature, and yet it falls short of it. And so it is that while the nature of a thing cannot in any way be taken away from a thing, a habit is removed, though with difficulty.

Reply to Objection 2. Although there is no contrary to intelligible species, yet there can be a contrary to assertions and to the process of reason, as stated above.

Reply to Objection 3. Science is not taken away by movement of the body, if we consider the root it-

self of the habit, but only as it may prove an obstacle to the act of science; in so far as the intellect, in its act, has need of the sensitive powers, which are impeded by corporal transmutation. But the intellectual movement of the reason can corrupt the habit of science, even as regards the very root of the habit. In like manner a habit of virtue can be corrupted. Nevertheless when it is said that "virtue is more lasting than learning," this must be understood in respect, not of the subject or cause, but of the act: because the use of virtue continues through the whole of life, whereas the use of learning does not.

Whether a habit can diminish?

Ia IIae q. 53 a. 2

Objection 1. It would seem that a habit cannot diminish. Because a habit is a simple quality and form. Now a simple thing is possessed either wholly or not at all. Therefore although a habit can be lost it cannot diminish.

Objection 2. Further, if a thing is befitting an accident, this is by reason either of the accident or of its subject. Now a habit does not become more or less intense by reason of itself; else it would follow that a species might be predicated of its individuals more or less. And if it can become less intense as to its participation by its subject, it would follow that something is accidental to a habit, proper thereto and not common to the habit and its subject. Now whenever a form has something proper to it besides its subject, that form can be separate, as stated in *De Anima* i, text. 13. Hence it follows that a habit is a separable form; which is impossible.

Objection 3. Further, the very notion and nature of a habit as of any accident, is inherence in a subject: wherefore any accident is defined with reference to its subject. Therefore if a habit does not become more or less intense in itself, neither can it in its inherence in its subject: and consequently it will be nowise less intense.

On the contrary, It is natural for contraries to be applicable to the same thing. Now increase and decrease are contraries. Since therefore a habit can increase, it seems that it can also diminish.

I answer that, Habits diminish, just as they increase, in two ways, as we have already explained (q. 52, a. 1). And since they increase through the same cause as that which engenders them, so too they diminish by the same cause as that which corrupts them: since the diminishing of a habit is the road which leads to its corruption, even as, on the other hand, the engendering of a habit is a foundation of its increase.

Reply to Objection 1. A habit, considered in itself, is a simple form. It is not thus that it is subject to decrease; but according to the different ways in which its

subject participates in it. This is due to the fact that the subject's potentiality is indeterminate, through its being able to participate a form in various ways, or to extend to a greater or a smaller number of things.

Reply to Objection 2. This argument would hold, if the essence itself of a habit were nowise subject to decrease. This we do not say; but that a certain decrease in the essence of a habit has its origin, not in the habit, but in its subject.

Reply to Objection 3. No matter how we take an accident, its very notion implies dependence on a subject, but in different ways. For if we take an accident in the abstract, it implies relation to a subject, which relation begins in the accident and terminates in the subject: for "whiteness is that whereby a thing is white." Accordingly in defining an accident in the abstract, we do not put the subject as though it were the first part of the definition, viz. the genus; but we give it the second place, which is that of the difference; thus we say that "simitas" is "a curvature of the nose." But if we take accidents in the concrete, the relation begins in the subject and terminates in the concrete, the relation begins in the subject and terminates at the accident: for "a white thing" is "something that has whiteness." Accordingly in defining this kind of accident, we place the subject as the genus, which is the first part of a definition; for we say that a "simum" is a "snub-nose." Accordingly whatever is befitting an accident on the part of the subject, but is not of the very essence of the accident, is ascribed to that accident, not in the abstract, but in the concrete. Such are increase and decrease in certain accidents: wherefore to be more or less white is not ascribed to whiteness but to a white thing. The same applies to habits and other qualities; save that certain habits and other qualities; save that certain habits increase or diminish by a kind of addition, as we have already clearly explained (q. 52, a. 2).

Objection 1. It would seem that a habit is not corrupted or diminished through mere cessation from act. For habits are more lasting than passion-like qualities, as we have explained above (q. 49, a. 2, ad 3; q. 50, a. 1). But passion-like qualities are neither corrupted nor diminished by cessation from act: for whiteness is not lessened through not affecting the sight, nor heat through ceasing to make something hot. Therefore neither are habits diminished or corrupted through cessation from act.

Objection 2. Further, corruption and diminution are changes. Now nothing is changed without a moving cause. Since therefore cessation from act does not imply a moving cause, it does not appear how a habit can be diminished or corrupted through cessation from act.

Objection 3. Further, the habits of science and virtue are in the intellectual soul which is above time. Now those things that are above time are neither destroyed nor diminished by length of time. Neither, therefore, are such habits destroyed or diminished through length of time, if one fails for long to exercise them.

On the contrary, The Philosopher says (De Long. et Brev. Vitae ii) that not only “deception,” but also “forgetfulness, is the corruption of science.” Moreover he says (Ethic. viii, 5) that “want of intercourse has dissolved many a friendship.” In like manner other habits of virtue are diminished or destroyed through cessation from act.

I answer that, As stated in Phys. vii, text. 27, a thing is a cause of movement in two ways. First, directly; and such a thing causes movement by reason of its proper form; thus fire causes heat. Secondly, indirectly; for instance, that which removes an obstacle. It is in this latter way that the destruction or diminution of a habit results through cessation from act, in so far, to wit, as we cease from exercising an act which overcame the causes that destroyed or weakened that habit. For it has been stated (a. 1) that habits are destroyed

or diminished directly through some contrary agency. Consequently all habits that are gradually undermined by contrary agencies which need to be counteracted by acts proceeding from those habits, are diminished or even destroyed altogether by long cessation from act, as is clearly seen in the case both of science and of virtue. For it is evident that a habit of moral virtue makes a man ready to choose the mean in deeds and passions. And when a man fails to make use of his virtuous habit in order to moderate his own passions or deeds, the necessary result is that many passions and deeds fail to observe the mode of virtue, by reason of the inclination of the sensitive appetite and of other external agencies. Wherefore virtue is destroyed or lessened through cessation from act. The same applies to the intellectual habits, which render man ready to judge aright of those things that are pictured by his imagination. Hence when man ceases to make use of his intellectual habits, strange fancies, sometimes in opposition to them, arise in his imagination; so that unless those fancies be, as it were, cut off or kept back by frequent use of his intellectual habits, man becomes less fit to judge aright, and sometimes is even wholly disposed to the contrary, and thus the intellectual habit is diminished or even wholly destroyed by cessation from act.

Reply to Objection 1. Even heat would be destroyed through ceasing to give heat, if, for this same reason, cold which is destructive of heat were to increase.

Reply to Objection 2. Cessation from act is a moving cause, conducive of corruption or diminution, by removing the obstacles, thereto, as explained above.

Reply to Objection 3. The intellectual part of the soul, considered in itself, is above time, but the sensitive part is subject to time, and therefore in course of time it undergoes change as to the passions of the sensitive part, and also as to the powers of apprehension. Hence the Philosopher says (Phys. iv. text. 117) that time makes us forget.

Objection 1. It would seem that a habit cannot be corrupted. For habit is within its subject like a second nature; wherefore it is pleasant to act from habit. Now so long as a thing is, its nature is not corrupted. Therefore neither can a habit be corrupted so long as its subject remains.

Objection 2. Further, whenever a form is corrupted, this is due either to corruption of its subject, or to its contrary: thus sickness ceases through corruption of the animal, or through the advent of health. Now science, which is a habit, cannot be lost through corruption of its subject: since “the intellect,” which is its subject, “is a substance that is incorruptible” (De Anima i, text. 65). In like manner, neither can it be lost through the action of its contrary: since intelligible species are not contrary to one another (Metaph. vii, text. 52). Therefore the habit of science can nowise be lost.

Objection 3. Further, all corruption results from some movement. But the habit of science, which is in the soul, cannot be corrupted by a direct movement of the soul itself, since the soul is not moved directly. It is, however, moved indirectly through the movement of the body: and yet no bodily change seems capable of corrupting the intelligible species residing in the intellect: since the intellect independently of the body is the proper abode of the species; for which reason it is held that habits are not lost either through old age or through death. Therefore science cannot be corrupted. For the same reason neither can habits of virtue be corrupted, since they also are in the rational soul, and, as the Philosopher declares (Ethic. i, 10), “virtue is more lasting than learning.”

On the contrary, The Philosopher says (De Long. et Brev. Vitae ii) that “forgetfulness and deception are the corruption of science.” Moreover, by sinning a man loses a habit of virtue: and again, virtues are engendered and corrupted by contrary acts (Ethic. ii, 2).

I answer that, A form is said to be corrupted directly by its contrary; indirectly, through its subject being corrupted. When therefore a habit has a corruptible subject, and a cause that has a contrary, it can be corrupted both ways. This is clearly the case with bodily habits—for instance, health and sickness. But those habits that have an incorruptible subject, cannot be corrupted indirectly. There are, however, some habits which, while residing chiefly in an incorruptible subject, reside nevertheless secondarily in a corruptible subject; such is the habit of science which is chiefly indeed in the “possible” intellect, but secondarily in the sensitive powers of apprehension, as stated above (q. 50, a. 3, ad 3). Consequently the habit of science cannot be corrupted indirectly, on the part of the “possible” intellect, but only on the part of the lower sensitive powers.

We must therefore inquire whether habits of this kind can be corrupted directly. If then there be a habit having a contrary, either on the part of itself or on the

part of its cause, it can be corrupted directly: but if it has no contrary, it cannot be corrupted directly. Now it is evident that an intelligible species residing in the “possible” intellect, has no contrary; nor can the active intellect, which is the cause of that species, have a contrary. Wherefore if in the “possible” intellect there be a habit caused immediately by the active intellect, such a habit is incorruptible both directly and indirectly. Such are the habits of the first principles, both speculative and practical, which cannot be corrupted by any forgetfulness or deception whatever: even as the Philosopher says about prudence (Ethic. vi, 5) that “it cannot be lost by being forgotten.” There is, however, in the “possible” intellect a habit caused by the reason, to wit, the habit of conclusions, which is called science, to the cause of which something may be contrary in two ways. First, on the part of those very propositions which are the starting point of the reason: for the assertion “Good is not good” is contrary to the assertion “Good is good” (Peri Herm. ii). Secondly, on the part of the process of reasoning; forasmuch as a sophistical syllogism is contrary to a dialectic or demonstrative syllogism. Wherefore it is clear that a false reason can corrupt the habit of a true opinion or even of science. Hence the Philosopher, as stated above, says that “deception is the corruption of science.” As to virtues, some of them are intellectual, residing in reason itself, as stated in Ethic. vi, 1: and to these applies what we have said of science and opinion. Some, however, viz. the moral virtues, are in the appetitive part of the soul; and the same may be said of the contrary vices. Now the habits of the appetitive part are caused therein because it is natural to it to be moved by the reason. Therefore a habit either of virtue or of vice, may be corrupted by a judgment of reason, whenever its motion is contrary to such vice or virtue, whether through ignorance, passion or deliberate choice.

Reply to Objection 1. As stated in Ethic. vii, 10, a habit is like a second nature, and yet it falls short of it. And so it is that while the nature of a thing cannot in any way be taken away from a thing, a habit is removed, though with difficulty.

Reply to Objection 2. Although there is no contrary to intelligible species, yet there can be a contrary to assertions and to the process of reason, as stated above.

Reply to Objection 3. Science is not taken away by movement of the body, if we consider the root itself of the habit, but only as it may prove an obstacle to the act of science; in so far as the intellect, in its act, has need of the sensitive powers, which are impeded by corporal transmutation. But the intellectual movement of the reason can corrupt the habit of science, even as regards the very root of the habit. In like manner a habit of virtue can be corrupted. Nevertheless when it is said that “virtue is more lasting than learning,” this must be understood in respect, not of the subject or cause, but of the act: because the use of virtue continues through the

whole of life, whereas the use of learning does not.

Objection 1. It would seem that a habit cannot diminish. Because a habit is a simple quality and form. Now a simple thing is possessed either wholly or not at all. Therefore although a habit can be lost it cannot diminish.

Objection 2. Further, if a thing is befitting an accident, this is by reason either of the accident or of its subject. Now a habit does not become more or less intense by reason of itself; else it would follow that a species might be predicated of its individuals more or less. And if it can become less intense as to its participation by its subject, it would follow that something is accidental to a habit, proper thereto and not common to the habit and its subject. Now whenever a form has something proper to it besides its subject, that form can be separate, as stated in *De Anima* i, text. 13. Hence it follows that a habit is a separable form; which is impossible.

Objection 3. Further, the very notion and nature of a habit as of any accident, is inherence in a subject: wherefore any accident is defined with reference to its subject. Therefore if a habit does not become more or less intense in itself, neither can it in its inherence in its subject: and consequently it will be nowise less intense.

On the contrary, It is natural for contraries to be applicable to the same thing. Now increase and decrease are contraries. Since therefore a habit can increase, it seems that it can also diminish.

I answer that, Habits diminish, just as they increase, in two ways, as we have already explained (q. 52, a. 1). And since they increase through the same cause as that which engenders them, so too they diminish by the same cause as that which corrupts them: since the diminishing of a habit is the road which leads to its corruption, even as, on the other hand, the engendering of a habit is a foundation of its increase.

Reply to Objection 1. A habit, considered in itself, is a simple form. It is not thus that it is subject to decrease; but according to the different ways in which its

subject participates in it. This is due to the fact that the subject's potentiality is indeterminate, through its being able to participate a form in various ways, or to extend to a greater or a smaller number of things.

Reply to Objection 2. This argument would hold, if the essence itself of a habit were nowise subject to decrease. This we do not say; but that a certain decrease in the essence of a habit has its origin, not in the habit, but in its subject.

Reply to Objection 3. No matter how we take an accident, its very notion implies dependence on a subject, but in different ways. For if we take an accident in the abstract, it implies relation to a subject, which relation begins in the accident and terminates in the subject: for "whiteness is that whereby a thing is white." Accordingly in defining an accident in the abstract, we do not put the subject as though it were the first part of the definition, viz. the genus; but we give it the second place, which is that of the difference; thus we say that "simitas" is "a curvature of the nose." But if we take accidents in the concrete, the relation begins in the subject and terminates in the concrete, the relation begins in the subject and terminates at the accident: for "a white thing" is "something that has whiteness." Accordingly in defining this kind of accident, we place the subject as the genus, which is the first part of a definition; for we say that a "simum" is a "snub-nose." Accordingly whatever is befitting an accident on the part of the subject, but is not of the very essence of the accident, is ascribed to that accident, not in the abstract, but in the concrete. Such are increase and decrease in certain accidents: wherefore to be more or less white is not ascribed to whiteness but to a white thing. The same applies to habits and other qualities; save that certain habits increase or diminish by a kind of addition, as we have already clearly explained (q. 52, a. 2).

Objection 1. It would seem that a habit is not corrupted or diminished through mere cessation from act. For habits are more lasting than passion-like qualities, as we have explained above (q. 49, a. 2, ad 3; q. 50, a. 1). But passion-like qualities are neither corrupted nor diminished by cessation from act: for whiteness is not lessened through not affecting the sight, nor heat through ceasing to make something hot. Therefore neither are habits diminished or corrupted through cessation from act.

Objection 2. Further, corruption and diminution are changes. Now nothing is changed without a moving cause. Since therefore cessation from act does not imply a moving cause, it does not appear how a habit can be diminished or corrupted through cessation from act.

Objection 3. Further, the habits of science and virtue are in the intellectual soul which is above time. Now those things that are above time are neither destroyed nor diminished by length of time. Neither, therefore, are such habits destroyed or diminished through length of time, if one fails for long to exercise them.

On the contrary, The Philosopher says (De Long. et Brev. Vitae ii) that not only “deception,” but also “forgetfulness, is the corruption of science.” Moreover he says (Ethic. viii, 5) that “want of intercourse has dissolved many a friendship.” In like manner other habits of virtue are diminished or destroyed through cessation from act.

I answer that, As stated in Phys. vii, text. 27, a thing is a cause of movement in two ways. First, directly; and such a thing causes movement by reason of its proper form; thus fire causes heat. Secondly, indirectly; for instance, that which removes an obstacle. It is in this latter way that the destruction or diminution of a habit results through cessation from act, in so far, to wit, as we cease from exercising an act which overcame the causes that destroyed or weakened that habit. For it has been stated (a. 1) that habits are destroyed

or diminished directly through some contrary agency. Consequently all habits that are gradually undermined by contrary agencies which need to be counteracted by acts proceeding from those habits, are diminished or even destroyed altogether by long cessation from act, as is clearly seen in the case both of science and of virtue. For it is evident that a habit of moral virtue makes a man ready to choose the mean in deeds and passions. And when a man fails to make use of his virtuous habit in order to moderate his own passions or deeds, the necessary result is that many passions and deeds fail to observe the mode of virtue, by reason of the inclination of the sensitive appetite and of other external agencies. Wherefore virtue is destroyed or lessened through cessation from act. The same applies to the intellectual habits, which render man ready to judge aright of those things that are pictured by his imagination. Hence when man ceases to make use of his intellectual habits, strange fancies, sometimes in opposition to them, arise in his imagination; so that unless those fancies be, as it were, cut off or kept back by frequent use of his intellectual habits, man becomes less fit to judge aright, and sometimes is even wholly disposed to the contrary, and thus the intellectual habit is diminished or even wholly destroyed by cessation from act.

Reply to Objection 1. Even heat would be destroyed through ceasing to give heat, if, for this same reason, cold which is destructive of heat were to increase.

Reply to Objection 2. Cessation from act is a moving cause, conducive of corruption or diminution, by removing the obstacles, thereto, as explained above.

Reply to Objection 3. The intellectual part of the soul, considered in itself, is above time, but the sensitive part is subject to time, and therefore in course of time it undergoes change as to the passions of the sensitive part, and also as to the powers of apprehension. Hence the Philosopher says (Phys. iv. text. 117) that time makes us forget.

FIRST PART OF THE SECOND PART, QUESTION 54

Of the Distinction of Habits (In Four Articles)

We have now to consider the distinction of habits; and under this head there are four points of inquiry:

- (1) Whether many habits can be in one power?
- (2) Whether habits are distinguished by their objects?
- (3) Whether habits are divided into good and bad?
- (4) Whether one habit may be made up of many habits?

Whether many habits can be in one power?

Ia IIae q. 54 a. 1

Objection 1. It would seem that there cannot be many habits in one power. For when several things are distinguished in respect of the same thing, if one of them be multiplied, the others are too. Now habits and powers are distinguished in respect of the same thing, viz. their acts and objects. Therefore they are multiplied in like manner. Therefore there cannot be many habits in one power.

Objection 2. Further, a power is a simple force. Now in one simple subject there cannot be diversity of accidents; for the subject is the cause of its accidents; and it does not appear how diverse effects can proceed from one simple cause. Therefore there cannot be many habits in one power.

Objection 3. Further, just as the body is informed by its shape, so is a power informed by a habit. But one body cannot be informed at the same time by various shapes. Therefore neither can a power be informed at the same time by many habits. Therefore several habits cannot be at the same time in one power.

On the contrary, The intellect is one power; wherein, nevertheless, are the habits of various sciences.

I answer that, As stated above (q. 49, a. 4), habits are dispositions of a thing that is in potentiality to something, either to nature, or to operation, which is the end of nature. As to those habits which are dispositions to nature, it is clear that several can be in one same subject: since in one subject we may take parts in various ways, according to the various dispositions of which parts there are various habits. Thus, if we take the humors as being parts of the human body, according to their disposition in respect of human nature, we have the habit or disposition of health: while, if we take like parts, such as nerves, bones, and flesh, the disposition of these in respect of nature is strength or weakness; whereas, if we take the limbs, i.e. the hands, feet, and so on, the disposition of these in proportion to nature, is beauty: and thus there are several habits or dispositions in the same subject.

If, however, we speak of those habits that are dispositions to operation, and belong properly to the powers; thus, again, there may be several habits in one power. The reason for this is that the subject of a habit is a passive power, as stated above (q. 51, a. 2): for it is only an

active power that cannot be the subject of a habit, as was clearly shown above (q. 51, a. 2). Now a passive power is compared to the determinate act of any species, as matter to form: because, just as matter is determinate to one form by one agent, so, too, is a passive power determined by the nature of one active object to an act specifically one. Wherefore, just as several objects can move one passive power, so can one passive power be the subject of several acts or perfections specifically diverse. Now habits are qualities or forms adhering to a power, and inclining that power to acts of a determinate species. Consequently several habits, even as several specifically different acts, can belong to one power.

Reply to Objection 1. Even as in natural things, diversity of species is according to the form, and diversity of genus, according to matter, as stated in *Metaph.* v, text. 33 (since things that differ in matter belong to different genera): so, too, generic diversity of objects entails a difference of powers (wherefore the Philosopher says in *Ethic.* vi, 1, that “those objects that differ generically belong to different departments of the soul”); while specific difference of objects entails a specific difference of acts, and consequently of habits also. Now things that differ in genus differ in species, but not vice versa. Wherefore the acts and habits of different powers differ in species: but it does not follow that different habits are in different powers, for several can be in one power. And even as several genera may be included in one genus, and several species be contained in one species; so does it happen that there are several species of habits and powers.

Reply to Objection 2. Although a power is simple as to its essence, it is multiple virtually, inasmuch as it extends to many specifically different acts. Consequently there is nothing to prevent many superficially different habits from being in one power.

Reply to Objection 3. A body is informed by its shape as by its own terminal boundaries: whereas a habit is not the terminal boundary of a power, but the disposition of a power to an act as to its ultimate term. Consequently one same power cannot have several acts at the same time, except in so far as perchance one act is comprised in another; just as neither can a body have several shapes, save in so far as one shape enters into

another, as a three-sided in a four-sided figure. For the intellect cannot understand several things at the same

time “actually”; and yet it can know several things at the same time “habitually.”

Whether habits are distinguished by their objects?

Ia IIae q. 54 a. 2

Objection 1. It would seem that habits are not distinguished by their objects. For contraries differ in species. Now the same habit of science regards contraries: thus medicine regards the healthy and the unhealthy. Therefore habits are not distinguished by objects specifically distinct.

Objection 2. Further, different sciences are different habits. But the same scientific truth belongs to different sciences: thus both the physicist and the astronomer prove the earth to be round, as stated in Phys. ii, text. 17. Therefore habits are not distinguished by their objects.

Objection 3. Further, wherever the act is the same, the object is the same. But the same act can belong to different habits of virtue, if it be directed to different ends; thus to give money to anyone, if it be done for God’s sake, is an act of charity; while, if it be done in order to pay a debt, it is an act of justice. Therefore the same object can also belong to different habits. Therefore diversity of habits does not follow diversity of objects.

On the contrary, Acts differ in species according to the diversity of their objects, as stated above (q. 18, a. 5). But habits are dispositions to acts. Therefore habits also are distinguished according to the diversity of objects.

I answer that, A habit is both a form and a habit. Hence the specific distinction of habits may be taken in the ordinary way in which forms differ specifically; or according to that mode of distinction which is proper to habits. Accordingly forms are distinguished from one another in reference to the diversity of their active principles, since every agent produces its like in species. Habits, however, imply order to something; and all things that imply order to something, are distinguished according to the distinction of the things to which they are ordained. Now a habit is a disposition

implying a twofold order: viz. to nature and to an operation consequent to nature.

Accordingly habits are specifically distinct in respect of three things. First, in respect of the active principles of such dispositions; secondly, in respect of nature; thirdly, in respect of specifically different objects, as will appear from what follows.

Reply to Objection 1. In distinguishing powers, or also habits, we must consider the object not in its material but in its formal aspect, which may differ in species or even in genus. And though the distinction between specific contraries is a real distinction yet they are both known under one aspect, since one is known through the other. And consequently in so far as they concur in the one aspect of cognoscibility, they belong to one cognitive habit.

Reply to Objection 2. The physicist proves the earth to be round by one means, the astronomer by another: for the latter proves this by means of mathematics, e.g. by the shapes of eclipses, or something of the sort; while the former proves it by means of physics, e.g. by the movement of heavy bodies towards the center, and so forth. Now the whole force of a demonstration, which is “a syllogism producing science,” as stated in Poster. i, text. 5, depends on the mean. And consequently various means are as so many active principles, in respect of which the habits of science are distinguished.

Reply to Objection 3. As the Philosopher says (Phys. ii, text. 89; Ethic. vii, 8), the end is, in practical matters, what the principle is in speculative matters. Consequently diversity of ends demands a diversity of virtues, even as diversity of active principles does. Moreover the ends are objects of the internal acts, with which, above all, the virtues are concerned, as is evident from what has been said (q. 18, a. 6; q. 19, a. 2, ad 1; q. 34, a. 4).

Whether habits are divided into good and bad?

Ia IIae q. 54 a. 3

Objection 1. It would seem that habits are not divided into good and bad. For good and bad are contraries. Now the same habit regards contraries, as was stated above (a. 2, obj. 1). Therefore habits are not divided into good and bad.

Objection 2. Further, good is convertible with being; so that, since it is common to all, it cannot be accounted a specific difference, as the Philosopher declares (Topic. iv). Again, evil, since it is a privation and a non-being, cannot differentiate any being. Therefore habits cannot be specifically divided into good and evil.

Objection 3. Further, there can be different evil habits about one same object; for instance, intemperance and insensibility about matters of concupiscence: and in like manner there can be several good habits; for instance, human virtue and heroic or godlike virtue, as the Philosopher clearly states (Ethic. vii, 1). Therefore, habits are not divided into good and bad.

On the contrary, A good habit is contrary to a bad habit, as virtue to vice. Now contraries are divided specifically into good and bad habits.

I answer that, As stated above (a. 2), habits are

specifically distinct not only in respect of their objects and active principles, but also in their relation to nature. Now, this happens in two ways. First, by reason of their suitability or unsuitability to nature. In this way a good habit is specifically distinct from a bad habit: since a good habit is one which disposes to an act suitable to the agent's nature, while an evil habit is one which disposes to an act unsuitable to nature. Thus, acts of virtue are suitable to human nature, since they are according to reason, whereas acts of vice are discordant from human nature, since they are against reason. Hence it is clear that habits are distinguished specifically by the difference of good and bad.

Secondly, habits are distinguished in relation to nature, from the fact that one habit disposes to an act that is suitable to a lower nature, while another habit disposes to an act befitting a higher nature. And thus human virtue, which disposes to an act befitting human nature, is distinct from godlike or heroic virtue, which disposes to an act befitting some higher nature.

Reply to Objection 1. The same habit may be about contraries in so far as contraries agree in one common

aspect. Never, however, does it happen that contrary habits are in one species: since contrariety of habits follows contrariety of aspect. Accordingly habits are divided into good and bad, namely, inasmuch as one habit is good, and another bad; but not by reason of one habit being something good, and another about something bad.

Reply to Objection 2. It is not the good which is common to every being, that is a difference constituting the species of a habit; but some determinate good by reason of suitability to some determinate, viz. the human, nature. In like manner the evil that constitutes a difference of habits is not a pure privation, but something determinate repugnant to a determinate nature.

Reply to Objection 3. Several good habits about one same specific thing are distinct in reference to their suitability to various natures, as stated above. But several bad habits in respect of one action are distinct in reference to their diverse repugnance to that which is in keeping with nature: thus, various vices about one same matter are contrary to one virtue.

Whether one habit is made up of many habits?

Ia IIae q. 54 a. 4

Objection 1. It would seem that one habit is made up of many habits. For whatever is engendered, not at once, but little by little, seems to be made up of several parts. But a habit is engendered, not at once, but little by little out of several acts, as stated above (q. 51, a. 3). Therefore one habit is made up of several.

Objection 2. Further, a whole is made up of its parts. Now many parts are assigned to one habit: thus Tully assigns many parts of fortitude, temperance, and other virtues. Therefore one habit is made up of many.

Objection 3. Further, one conclusion suffices both for an act and for a habit of scientific knowledge. But many conclusions belong to but one science, to geometry, for instance, or to arithmetic. Therefore one habit is made up of many.

On the contrary, A habit, since it is a quality, is a simple form. But nothing simple is made up of many. Therefore one habit is not made up of many.

I answer that, A habit directed to operation, such as we are chiefly concerned with at present, is a perfection of a power. Now every perfection should be in proportion with that which it perfects. Hence, just as a power, while it is one, extends to many things, in so far as they have something in common, i.e. some general objective aspect, so also a habit extends to many things, in so far as they are related to one, for instance, to some specific objective aspect, or to one nature, or to one principle, as was clearly stated above (Aa. 2,3).

If then we consider a habit as to the extent of its

object, we shall find a certain multiplicity therein. But since this multiplicity is directed to one thing, on which the habit is chiefly intent, hence it is that a habit is a simple quality, not composed to several habits, even though it extend to many things. For a habit does not extend to many things save in relation to one, whence it derives its unity.

Reply to Objection 1. That a habit is engendered little by little, is due, not to one part being engendered after another, but to the fact that the subject does not acquire all at once a firm and difficultly changeable disposition; and also to the fact that it begins by being imperfectly in the subject, and is gradually perfected. The same applies to other qualities.

Reply to Objection 2. The parts which are assigned to each cardinal virtue, are not integral parts that combine to form a whole; but subjective or potential parts, as we shall explain further on (q. 57, a. 6, ad 4; IIa IIae, q. 48).

Reply to Objection 3. In any science, he who acquires, by demonstration, scientific knowledge of one conclusion, has the habit indeed, yet imperfectly. And when he obtains, by demonstration, the scientific knowledge of another conclusion, no additional habit is engendered in him: but the habit which was in him previously is perfected, forasmuch as it has increased in extent; because the conclusions and demonstrations of one science are coordinate, and one flows from another.

Objection 1. It would seem that there cannot be many habits in one power. For when several things are distinguished in respect of the same thing, if one of them be multiplied, the others are too. Now habits and powers are distinguished in respect of the same thing, viz. their acts and objects. Therefore they are multiplied in like manner. Therefore there cannot be many habits in one power.

Objection 2. Further, a power is a simple force. Now in one simple subject there cannot be diversity of accidents; for the subject is the cause of its accidents; and it does not appear how diverse effects can proceed from one simple cause. Therefore there cannot be many habits in one power.

Objection 3. Further, just as the body is informed by its shape, so is a power informed by a habit. But one body cannot be informed at the same time by various shapes. Therefore neither can a power be informed at the same time by many habits. Therefore several habits cannot be at the same time in one power.

On the contrary, The intellect is one power; wherein, nevertheless, are the habits of various sciences.

I answer that, As stated above (q. 49, a. 4), habits are dispositions of a thing that is in potentiality to something, either to nature, or to operation, which is the end of nature. As to those habits which are dispositions to nature, it is clear that several can be in one same subject: since in one subject we may take parts in various ways, according to the various dispositions of which parts there are various habits. Thus, if we take the humors as being parts of the human body, according to their disposition in respect of human nature, we have the habit or disposition of health: while, if we take like parts, such as nerves, bones, and flesh, the disposition of these in respect of nature is strength or weakness; whereas, if we take the limbs, i.e. the hands, feet, and so on, the disposition of these in proportion to nature, is beauty: and thus there are several habits or dispositions in the same subject.

If, however, we speak of those habits that are dispositions to operation, and belong properly to the powers; thus, again, there may be several habits in one power. The reason for this is that the subject of a habit is a passive power, as stated above (q. 51, a. 2): for it is only an active power that cannot be the subject of a habit, as was clearly shown above (q. 51, a. 2). Now a passive power

is compared to the determinate act of any species, as matter to form: because, just as matter is determinate to one form by one agent, so, too, is a passive power determined by the nature of one active object to an act specifically one. Wherefore, just as several objects can move one passive power, so can one passive power be the subject of several acts or perfections specifically diverse. Now habits are qualities or forms adhering to a power, and inclining that power to acts of a determinate species. Consequently several habits, even as several specifically different acts, can belong to one power.

Reply to Objection 1. Even as in natural things, diversity of species is according to the form, and diversity of genus, according to matter, as stated in *Metaph.* v, text. 33 (since things that differ in matter belong to different genera): so, too, generic diversity of objects entails a difference of powers (wherefore the Philosopher says in *Ethic.* vi, 1, that “those objects that differ generically belong to different departments of the soul”); while specific difference of objects entails a specific difference of acts, and consequently of habits also. Now things that differ in genus differ in species, but not vice versa. Wherefore the acts and habits of different powers differ in species: but it does not follow that different habits are in different powers, for several can be in one power. And even as several genera may be included in one genus, and several species be contained in one species; so does it happen that there are several species of habits and powers.

Reply to Objection 2. Although a power is simple as to its essence, it is multiple virtually, inasmuch as it extends to many specifically different acts. Consequently there is nothing to prevent many superficially different habits from being in one power.

Reply to Objection 3. A body is informed by its shape as by its own terminal boundaries: whereas a habit is not the terminal boundary of a power, but the disposition of a power to an act as to its ultimate term. Consequently one same power cannot have several acts at the same time, except in so far as perchance one act is comprised in another; just as neither can a body have several shapes, save in so far as one shape enters into another, as a three-sided in a four-sided figure. For the intellect cannot understand several things at the same time “actually”; and yet it can know several things at the same time “habitually.”

Objection 1. It would seem that habits are not distinguished by their objects. For contraries differ in species. Now the same habit of science regards contraries: thus medicine regards the healthy and the unhealthy. Therefore habits are not distinguished by objects specifically distinct.

Objection 2. Further, different sciences are different habits. But the same scientific truth belongs to different sciences: thus both the physicist and the astronomer prove the earth to be round, as stated in Phys. ii, text. 17. Therefore habits are not distinguished by their objects.

Objection 3. Further, wherever the act is the same, the object is the same. But the same act can belong to different habits of virtue, if it be directed to different ends; thus to give money to anyone, if it be done for God's sake, is an act of charity; while, if it be done in order to pay a debt, it is an act of justice. Therefore the same object can also belong to different habits. Therefore diversity of habits does not follow diversity of objects.

On the contrary, Acts differ in species according to the diversity of their objects, as stated above (q. 18, a. 5). But habits are dispositions to acts. Therefore habits also are distinguished according to the diversity of objects.

I answer that, A habit is both a form and a habit. Hence the specific distinction of habits may be taken in the ordinary way in which forms differ specifically; or according to that mode of distinction which is proper to habits. Accordingly forms are distinguished from one another in reference to the diversity of their active principles, since every agent produces its like in species. Habits, however, imply order to something; and all things that imply order to something, are distinguished according to the distinction of the things to which they are ordained. Now a habit is a disposition

implying a twofold order: viz. to nature and to an operation consequent to nature.

Accordingly habits are specifically distinct in respect of three things. First, in respect of the active principles of such dispositions; secondly, in respect of nature; thirdly, in respect of specifically different objects, as will appear from what follows.

Reply to Objection 1. In distinguishing powers, or also habits, we must consider the object not in its material but in its formal aspect, which may differ in species or even in genus. And though the distinction between specific contraries is a real distinction yet they are both known under one aspect, since one is known through the other. And consequently in so far as they concur in the one aspect of cognoscibility, they belong to one cognitive habit.

Reply to Objection 2. The physicist proves the earth to be round by one means, the astronomer by another: for the latter proves this by means of mathematics, e.g. by the shapes of eclipses, or something of the sort; while the former proves it by means of physics, e.g. by the movement of heavy bodies towards the center, and so forth. Now the whole force of a demonstration, which is "a syllogism producing science," as stated in Poster. i, text. 5, depends on the mean. And consequently various means are as so many active principles, in respect of which the habits of science are distinguished.

Reply to Objection 3. As the Philosopher says (Phys. ii, text. 89; Ethic. vii, 8), the end is, in practical matters, what the principle is in speculative matters. Consequently diversity of ends demands a diversity of virtues, even as diversity of active principles does. Moreover the ends are objects of the internal acts, with which, above all, the virtues are concerned, as is evident from what has been said (q. 18, a. 6; q. 19, a. 2, ad 1; q. 34, a. 4).

Objection 1. It would seem that habits are not divided into good and bad. For good and bad are contraries. Now the same habit regards contraries, as was stated above (a. 2, obj. 1). Therefore habits are not divided into good and bad.

Objection 2. Further, good is convertible with being; so that, since it is common to all, it cannot be accounted a specific difference, as the Philosopher declares (Topic. iv). Again, evil, since it is a privation and a non-being, cannot differentiate any being. Therefore habits cannot be specifically divided into good and evil.

Objection 3. Further, there can be different evil habits about one same object; for instance, intemperance and insensibility about matters of concupiscence; and in like manner there can be several good habits; for instance, human virtue and heroic or godlike virtue, as the Philosopher clearly states (Ethic. vii, 1). Therefore, habits are not divided into good and bad.

On the contrary, A good habit is contrary to a bad habit, as virtue to vice. Now contraries are divided specifically into good and bad habits.

I answer that, As stated above (a. 2), habits are specifically distinct not only in respect of their objects and active principles, but also in their relation to nature. Now, this happens in two ways. First, by reason of their suitability or unsuitability to nature. In this way a good habit is specifically distinct from a bad habit: since a good habit is one which disposes to an act suitable to the agent's nature, while an evil habit is one which disposes to an act unsuitable to nature. Thus, acts of virtue are suitable to human nature, since they are according to reason, whereas acts of vice are discordant from human nature, since they are against reason. Hence it is clear

that habits are distinguished specifically by the difference of good and bad.

Secondly, habits are distinguished in relation to nature, from the fact that one habit disposes to an act that is suitable to a lower nature, while another habit disposes to an act befitting a higher nature. And thus human virtue, which disposes to an act befitting human nature, is distinct from godlike or heroic virtue, which disposes to an act befitting some higher nature.

Reply to Objection 1. The same habit may be about contraries in so far as contraries agree in one common aspect. Never, however, does it happen that contrary habits are in one species: since contrariety of habits follows contrariety of aspect. Accordingly habits are divided into good and bad, namely, inasmuch as one habit is good, and another bad; but not by reason of one habit being something good, and another about something bad.

Reply to Objection 2. It is not the good which is common to every being, that is a difference constituting the species of a habit; but some determinate good by reason of suitability to some determinate, viz. the human, nature. In like manner the evil that constitutes a difference of habits is not a pure privation, but something determinate repugnant to a determinate nature.

Reply to Objection 3. Several good habits about one same specific thing are distinct in reference to their suitability to various natures, as stated above. But several bad habits in respect of one action are distinct in reference to their diverse repugnance to that which is in keeping with nature: thus, various vices about one same matter are contrary to one virtue.

Objection 1. It would seem that one habit is made up of many habits. For whatever is engendered, not at once, but little by little, seems to be made up of several parts. But a habit is engendered, not at once, but little by little out of several acts, as stated above (q. 51, a. 3). Therefore one habit is made up of several.

Objection 2. Further, a whole is made up of its parts. Now many parts are assigned to one habit: thus Tully assigns many parts of fortitude, temperance, and other virtues. Therefore one habit is made up of many.

Objection 3. Further, one conclusion suffices both for an act and for a habit of scientific knowledge. But many conclusions belong to but one science, to geometry, for instance, or to arithmetic. Therefore one habit is made up of many.

On the contrary, A habit, since it is a quality, is a simple form. But nothing simple is made up of many. Therefore one habit is not made up of many.

I answer that, A habit directed to operation, such as we are chiefly concerned with at present, is a perfection of a power. Now every perfection should be in proportion with that which it perfects. Hence, just as a power, while it is one, extends to many things, in so far as they have something in common, i.e. some general objective aspect, so also a habit extends to many things, in so far as they are related to one, for instance, to some specific objective aspect, or to one nature, or to one principle, as was clearly stated above (Aa. 2,3).

If then we consider a habit as to the extent of its

object, we shall find a certain multiplicity therein. But since this multiplicity is directed to one thing, on which the habit is chiefly intent, hence it is that a habit is a simple quality, not composed of several habits, even though it extend to many things. For a habit does not extend to many things save in relation to one, whence it derives its unity.

Reply to Objection 1. That a habit is engendered little by little, is due, not to one part being engendered after another, but to the fact that the subject does not acquire all at once a firm and difficultly changeable disposition; and also to the fact that it begins by being imperfectly in the subject, and is gradually perfected. The same applies to other qualities.

Reply to Objection 2. The parts which are assigned to each cardinal virtue, are not integral parts that combine to form a whole; but subjective or potential parts, as we shall explain further on (q. 57, a. 6, ad 4; IIa IIae, q. 48).

Reply to Objection 3. In any science, he who acquires, by demonstration, scientific knowledge of one conclusion, has the habit indeed, yet imperfectly. And when he obtains, by demonstration, the scientific knowledge of another conclusion, no additional habit is engendered in him: but the habit which was in him previously is perfected, forasmuch as it has increased in extent; because the conclusions and demonstrations of one science are coordinate, and one flows from another.

FIRST PART OF THE SECOND PART, QUESTION 55

Of the Virtues, As to Their Essence (In Four Articles)

We come now to the consideration of habits specifically. And since habits, as we have said (q. 54, a. 3), are divided into good and bad, we must speak in the first place of good habits, which are virtues, and of other matters connected with them, namely the Gifts, Beatitudes and Fruits; in the second place, of bad habits, namely of vices and sins. Now five things must be considered about virtues: (1) the essence of virtue; (2) its subject; (3) the division of virtue; (4) the cause of virtue; (5) certain properties of virtue.

Under the first head, there are four points of inquiry:

- (1) Whether human virtue is a habit?
- (2) Whether it is an operative habit?
- (3) Whether it is a good habit?
- (4) Of the definition of virtue.

Whether human virtue is a habit?

Ia IIae q. 55 a. 1

Objection 1. It would seem that human virtue is not a habit: For virtue is “the limit of power” (De Coelo i, text. 116). But the limit of anything is reducible to the genus of that of which it is the limit; as a point is reducible to the genus of line. Therefore virtue is reducible to the genus of power, and not to the genus of habit.

Objection 2. Further, Augustine says (De Lib. Arb. ii)* that “virtue is good use of free-will.” But use of free-will is an act. Therefore virtue is not a habit, but an act.

Objection 3. Further, we do not merit by our habits, but by our actions: otherwise a man would merit continually, even while asleep. But we do merit by our virtues. Therefore virtues are not habits, but acts.

Objection 4. Further, Augustine says (De Moribus Eccl. xv) that “virtue is the order of love,” and (QQ. lxxxiii, qu. 30) that “the ordering which is called virtue consists in enjoying what we ought to enjoy, and using what we ought to use.” Now order, or ordering, denominates either an action or a relation. Therefore virtue is not a habit, but an action or a relation.

Objection 5. Further, just as there are human virtues, so are there natural virtues. But natural virtues are not habits, but powers. Neither therefore are human virtues habits.

On the contrary, The Philosopher says (Categor. vi) that science and virtue are habits.

I answer that, Virtue denotes a certain perfection of a power. Now a thing’s perfection is considered chiefly in regard to its end. But the end of power is act. Wherefore power is said to be perfect, according as it is determinate to its act.

Now there are some powers which of themselves are determinate to their acts; for instance, the active natural powers. And therefore these natural powers are in themselves called virtues. But the rational powers, which are

proper to man, are not determinate to one particular action, but are inclined indifferently to many: and they are determinate to acts by means of habits, as is clear from what we have said above (q. 49, a. 4). Therefore human virtues are habits.

Reply to Objection 1. Sometimes we give the name of a virtue to that to which the virtue is directed, namely, either to its object, or to its act: for instance, we give the name Faith, to that which we believe, or to the act of believing, as also to the habit by which we believe. When therefore we say that “virtue is the limit of power,” virtue is taken for the object of virtue. For the furthest point to which a power can reach, is said to be its virtue; for instance, if a man can carry a hundredweight and not more, his virtue[†] is put at a hundredweight, and not at sixty. But the objection takes virtue as being essentially the limit of power.

Reply to Objection 2. Good use of free-will is said to be a virtue, in the same sense as above (ad 1); that is to say, because it is that to which virtue is directed as to its proper act. For the act of virtue is nothing else than the good use of free-will.

Reply to Objection 3. We are said to merit by something in two ways. First, as by merit itself, just as we are said to run by running; and thus we merit by acts. Secondly, we are said to merit by something as by the principle whereby we merit, as we are said to run by the motive power; and thus are we said to merit by virtues and habits.

Reply to Objection 4. When we say that virtue is the order or ordering of love, we refer to the end to which virtue is ordered: because in us love is set in order by virtue.

Reply to Objection 5. Natural powers are of themselves determinate to one act: not so the rational powers. And so there is no comparison, as we have said.

* *Retract. ix*; cf. *De Lib. Arb. ii*, 19 † In English we should say ‘strength,’ which is the original signification of the Latin ‘virtus’: thus we speak of an engine being so many horse-power, to indicate its ‘strength’

Objection 1. It would seem that it is not essential to human virtue to be an operative habit. For Tully says (Tuscul. iv) that as health and beauty belong to the body, so virtue belongs to the soul. But health and beauty are not operative habits. Therefore neither is virtue.

Objection 2. Further, in natural things we find virtue not only in reference to act, but also in reference to being: as is clear from the Philosopher (De Coelo i), since some have a virtue to be always, while some have a virtue to be not always, but at some definite time. Now as natural virtue is in natural things, so is human virtue in rational beings. Therefore also human virtue is referred not only to act, but also to being.

Objection 3. Further, the Philosopher says (Phys. vii, text. 17) that virtue “is the disposition of a perfect thing to that which is best.” Now the best thing to which man needs to be disposed by virtue is God Himself, as Augustine proves (De Moribus Eccl. 3,6, 14) to Whom the soul is disposed by being made like to Him. Therefore it seems that virtue is a quality of the soul in reference to God, likening it, as it were, to Him; and not in reference to operation. It is not, therefore, an operative habit.

On the contrary, The Philosopher (Ethic. ii, 6) says that “virtue of a thing is that which makes its work good.”

I answer that, Virtue, from the very nature of the word, implies some perfection of power, as we have said above (a. 1). Wherefore, since power* is of two kinds, namely, power in reference to being, and power in reference to act; the perfection of each of these is called virtue. But power in reference to being is on the part of matter, which is potential being, whereas power in reference to act, is on the part of the form, which is the principle of action, since everything acts in so far as it

is in act.

Now man is so constituted that the body holds the place of matter, the soul that of form. The body, indeed, man has in common with other animals; and the same is to be said of the forces which are common to the soul and body: and only those forces which are proper to the soul, namely, the rational forces, belong to man alone. And therefore, human virtue, of which we are speaking now, cannot belong to the body, but belongs only to that which is proper to the soul. Wherefore human virtue does not imply reference to being, but rather to act. Consequently it is essential to human virtue to be an operative habit.

Reply to Objection 1. Mode of action follows on the disposition of the agent: for such as a thing is, such is its act. And therefore, since virtue is the principle of some kind of operation, there must needs pre-exist in the operator in respect of virtue some corresponding disposition. Now virtue causes an ordered operation. Therefore virtue itself is an ordered disposition of the soul, in so far as, to wit, the powers of the soul are in some way ordered to one another, and to that which is outside. Hence virtue, inasmuch as it is a suitable disposition of the soul, is like health and beauty, which are suitable dispositions of the body. But this does not hinder virtue from being a principle of operation.

Reply to Objection 2. Virtue which is referred to being is not proper to man; but only that virtue which is referred to works of reason, which are proper to man.

Reply to Objection 3. As God’s substance is His act, the highest likeness of man to God is in respect of some operation. Wherefore, as we have said above (q. 3, a. 2), happiness or bliss by which man is made most perfectly conformed to God, and which is the end of human life, consists in an operation.

Objection 1. It would seem that it is not essential to virtue that it should be a good habit. For sin is always taken in a bad sense. But there is a virtue even of sin; according to 1 Cor. 15:56: “The virtue [Douay: ‘strength’] of sin is the Law.” Therefore virtue is not always a good habit.

Objection 2. Further, Virtue corresponds to power. But power is not only referred to good, but also to evil: according to Is. 5: “Woe to you that are mighty to drink wine, and stout men at drunkenness.” Therefore virtue also is referred to good and evil.

Objection 3. Further, according to the Apostle (2 Cor. 12:9): “Virtue [Douay: ‘power’] is made perfect in infirmity.” But infirmity is an evil. Therefore virtue is referred not only to good, but also to evil.

On the contrary, Augustine says (De Moribus Eccl. vi): “No one can doubt that virtue makes the soul exceeding good”: and the Philosopher says (Ethic. ii, 6): “Virtue is that which makes its possessor good, and his work good likewise.”

I answer that, As we have said above (a. 1), virtue implies a perfection of power: wherefore the virtue of a thing is fixed by the limit of its power (De Coelo i). Now the limit of any power must needs be good: for all evil implies defect; wherefore Dionysius says (Div. Hom. ii) that every evil is a weakness. And for this reason the virtue of a thing must be regarded in reference to good. Therefore human virtue which is an operative habit, is a good habit, productive of good works.

Reply to Objection 1. Just as bad things are said

* The one Latin word ‘potentia’ is rendered ‘potentiality’ in the first case, and ‘power’ in the second

metaphorically to be perfect, so are they said to be good: for we speak of a perfect thief or robber; and of a good thief or robber, as the Philosopher explains (Metaph. v, text. 21). In this way therefore virtue is applied to evil things: so that the “virtue” of sin is said to be law, in so far as occasionally sin is aggravated through the law, so as to attain to the limit of its possibility.

Reply to Objection 2. The evil of drunkenness and excessive drink, consists in a falling away from the order of reason. Now it happens that, together with this falling away from reason, some lower power is perfect in reference to that which belongs to its own kind, even

in direct opposition to reason, or with some falling away therefrom. But the perfection of that power, since it is compatible with a falling away from reason, cannot be called a human virtue.

Reply to Objection 3. Reason is shown to be so much the more perfect, according as it is able to overcome or endure more easily the weakness of the body and of the lower powers. And therefore human virtue, which is attributed to reason, is said to be “made perfect in infirmity;” not of the reason indeed, but of the body and of the lower powers.

Whether virtue is suitably defined?

Ia IIae q. 55 a. 4

Objection 1. It would seem that the definition, usually given, of virtue, is not suitable, to wit: “Virtue is a good quality of the mind, by which we live righteously, of which no one can make bad use, which God works in us, without us.” For virtue is man’s goodness, since virtue it is that makes its subject good. But goodness does not seem to be good, as neither is whiteness white. It is therefore unsuitable to describe virtue as a “good quality.”

Objection 2. Further, no difference is more common than its genus; since it is that which divides the genus. But good is more common than quality, since it is convertible with being. Therefore “good” should not be put in the definition of virtue, as a difference of quality.

Objection 3. Further, as Augustine says (De Trin. xii, 3): “When we come across anything that is not common to us and the beasts of the field, it is something appertaining to the mind.” But there are virtues even of the irrational parts; as the Philosopher says (Ethic. iii, 10). Every virtue, therefore, is not a good quality “of the mind.”

Objection 4. Further, righteousness seems to belong to justice; whence the righteous are called just. But justice is a species of virtue. It is therefore unsuitable to put “righteous” in the definition of virtue, when we say that virtue is that “by which we live righteously.”

Objection 5. Further, whoever is proud of a thing, makes bad use of it. But many are proud of virtue, for Augustine says in his Rule, that “pride lies in wait for good works in order to slay them.” It is untrue, therefore, “that no one can make bad use of virtue.”

Objection 6. Further, man is justified by virtue. But Augustine commenting on Jn. 15:11: “He shall do greater things than these,” says*: “He who created thee without thee, will not justify thee without thee.” It is therefore unsuitable to say that “God works virtue in us, without us.”

On the contrary, We have the authority of Augustine from whose words this definition is gathered, and principally in De Libero Arbitrio ii, 19.

I answer that, This definition comprises perfectly the whole essential notion of virtue. For the perfect essential notion of anything is gathered from all its causes. Now the above definition comprises all the causes of virtue. For the formal cause of virtue, as of everything, is gathered from its genus and difference, when it is defined as “a good quality”: for “quality” is the genus of virtue, and the difference, “good.” But the definition would be more suitable if for “quality” we substitute “habit,” which is the proximate genus.

Now virtue has no matter “out of which” it is formed, as neither has any other accident; but it has matter “about which” it is concerned, and matter “in which” it exists, namely, the subject. The matter about which virtue is concerned is its object, and this could not be included in the above definition, because the object fixes the virtue to a certain species, and here we are giving the definition of virtue in general. And so for material cause we have the subject, which is mentioned when we say that virtue is a good quality “of the mind.”

The end of virtue, since it is an operative habit, is operation. But it must be observed that some operative habits are always referred to evil, as vicious habits: others are sometimes referred to good, sometimes to evil; for instance, opinion is referred both to the true and to the untrue: whereas virtue is a habit which is always referred to good: and so the distinction of virtue from those habits which are always referred to evil, is expressed in the words “by which we live righteously”: and its distinction from those habits which are sometimes directed unto good, sometimes unto evil, in the words, “of which no one makes bad use.”

Lastly, God is the efficient cause of infused virtue, to which this definition applies; and this is expressed in the words “which God works in us without us.” If we omit this phrase, the remainder of the definition will apply to all virtues in general, whether acquired or infused.

Reply to Objection 1. That which is first seized by the intellect is being: wherefore everything that we apprehend we consider as being, and consequently as gone, and as good, which are convertible with being.

* Tract. xxvii in Joan.: Serm. xv de Verb. Ap. 11

Wherefore we say that essence is being and is one and is good; and that oneness is being and one and good: and in like manner goodness. But this is not the case with specific forms, as whiteness and health; for everything that we apprehend, is not apprehended with the notion of white and healthy. We must, however, observe that, as accidents and non-subsistent forms are called beings, not as if they themselves had being, but because things are by them; so also are they called good or one, not by some distinct goodness or oneness, but because by them something is good or one. So also is virtue called good, because by it something is good.

Reply to Objection 2. Good, which is put in the definition of virtue, is not good in general which is convertible with being, and which extends further than quality, but the good as fixed by reason, with regard to which Dionysius says (Div. Nom. iv) “that the good of the soul is to be in accord with reason.”

Reply to Objection 3. Virtue cannot be in the irrational part of the soul, except in so far as this participates in the reason (Ethic. i, 13). And therefore reason,

or the mind, is the proper subject of virtue.

Reply to Objection 4. Justice has a righteousness of its own by which it puts those outward things right which come into human use, and are the proper matter of justice, as we shall show further on (q. 60, a. 2; *Ia* *Iae*, q. 58, a. 8). But the righteousness which denotes order to a due end and to the Divine law, which is the rule of the human will, as stated above (q. 19, a. 4), is common to all virtues.

Reply to Objection 5. One can make bad use of a virtue objectively, for instance by having evil thoughts about a virtue, e.g. by hating it, or by being proud of it: but one cannot make bad use of virtue as principle of action, so that an act of virtue be evil.

Reply to Objection 6. Infused virtue is caused in us by God without any action on our part, but not without our consent. This is the sense of the words, “which God works in us without us.” As to those things which are done by us, God causes them in us, yet not without action on our part, for He works in every will and in every nature.

Objection 1. It would seem that human virtue is not a habit: For virtue is “the limit of power” (De Coelo i, text. 116). But the limit of anything is reducible to the genus of that of which it is the limit; as a point is reducible to the genus of line. Therefore virtue is reducible to the genus of power, and not to the genus of habit.

Objection 2. Further, Augustine says (De Lib. Arb. ii)* that “virtue is good use of free-will.” But use of free-will is an act. Therefore virtue is not a habit, but an act.

Objection 3. Further, we do not merit by our habits, but by our actions: otherwise a man would merit continually, even while asleep. But we do merit by our virtues. Therefore virtues are not habits, but acts.

Objection 4. Further, Augustine says (De Moribus Eccl. xv) that “virtue is the order of love,” and (QQ. lxxxiii, qu. 30) that “the ordering which is called virtue consists in enjoying what we ought to enjoy, and using what we ought to use.” Now order, or ordering, denominates either an action or a relation. Therefore virtue is not a habit, but an action or a relation.

Objection 5. Further, just as there are human virtues, so are there natural virtues. But natural virtues are not habits, but powers. Neither therefore are human virtues habits.

On the contrary, The Philosopher says (Categor. vi) that science and virtue are habits.

I answer that, Virtue denotes a certain perfection of a power. Now a thing’s perfection is considered chiefly in regard to its end. But the end of power is act. Wherefore power is said to be perfect, according as it is determinate to its act.

Now there are some powers which of themselves are determinate to their acts; for instance, the active natural powers. And therefore these natural powers are in themselves called virtues. But the rational powers, which are

proper to man, are not determinate to one particular action, but are inclined indifferently to many: and they are determinate to acts by means of habits, as is clear from what we have said above (q. 49, a. 4). Therefore human virtues are habits.

Reply to Objection 1. Sometimes we give the name of a virtue to that to which the virtue is directed, namely, either to its object, or to its act: for instance, we give the name Faith, to that which we believe, or to the act of believing, as also to the habit by which we believe. When therefore we say that “virtue is the limit of power,” virtue is taken for the object of virtue. For the furthest point to which a power can reach, is said to be its virtue; for instance, if a man can carry a hundredweight and not more, his virtue[†] is put at a hundredweight, and not at sixty. But the objection takes virtue as being essentially the limit of power.

Reply to Objection 2. Good use of free-will is said to be a virtue, in the same sense as above (ad 1); that is to say, because it is that to which virtue is directed as to its proper act. For the act of virtue is nothing else than the good use of free-will.

Reply to Objection 3. We are said to merit by something in two ways. First, as by merit itself, just as we are said to run by running; and thus we merit by acts. Secondly, we are said to merit by something as by the principle whereby we merit, as we are said to run by the motive power; and thus are we said to merit by virtues and habits.

Reply to Objection 4. When we say that virtue is the order or ordering of love, we refer to the end to which virtue is ordered: because in us love is set in order by virtue.

Reply to Objection 5. Natural powers are of themselves determinate to one act: not so the rational powers. And so there is no comparison, as we have said.

* *Retract.* ix; cf. *De Lib. Arb.* ii, 19 † In English we should say ‘strength,’ which is the original signification of the Latin ‘virtus’: thus we speak of an engine being so many horse-power, to indicate its ‘strength’

Objection 1. It would seem that it is not essential to human virtue to be an operative habit. For Tully says (*Tuscul. iv*) that as health and beauty belong to the body, so virtue belongs to the soul. But health and beauty are not operative habits. Therefore neither is virtue.

Objection 2. Further, in natural things we find virtue not only in reference to act, but also in reference to being: as is clear from the Philosopher (*De Coelo i*), since some have a virtue to be always, while some have a virtue to be not always, but at some definite time. Now as natural virtue is in natural things, so is human virtue in rational beings. Therefore also human virtue is referred not only to act, but also to being.

Objection 3. Further, the Philosopher says (*Phys. vii, text. 17*) that virtue “is the disposition of a perfect thing to that which is best.” Now the best thing to which man needs to be disposed by virtue is God Himself, as Augustine proves (*De Moribus Eccl. 3,6, 14*) to Whom the soul is disposed by being made like to Him. Therefore it seems that virtue is a quality of the soul in reference to God, likening it, as it were, to Him; and not in reference to operation. It is not, therefore, an operative habit.

On the contrary, The Philosopher (*Ethic. ii, 6*) says that “virtue of a thing is that which makes its work good.”

I answer that, Virtue, from the very nature of the word, implies some perfection of power, as we have said above (a. 1). Wherefore, since power* is of two kinds, namely, power in reference to being, and power in reference to act; the perfection of each of these is called virtue. But power in reference to being is on the part of matter, which is potential being, whereas power in reference to act, is on the part of the form, which is the principle of action, since everything acts in so far as it

is in act.

Now man is so constituted that the body holds the place of matter, the soul that of form. The body, indeed, man has in common with other animals; and the same is to be said of the forces which are common to the soul and body: and only those forces which are proper to the soul, namely, the rational forces, belong to man alone. And therefore, human virtue, of which we are speaking now, cannot belong to the body, but belongs only to that which is proper to the soul. Wherefore human virtue does not imply reference to being, but rather to act. Consequently it is essential to human virtue to be an operative habit.

Reply to Objection 1. Mode of action follows on the disposition of the agent: for such as a thing is, such is its act. And therefore, since virtue is the principle of some kind of operation, there must needs pre-exist in the operator in respect of virtue some corresponding disposition. Now virtue causes an ordered operation. Therefore virtue itself is an ordered disposition of the soul, in so far as, to wit, the powers of the soul are in some way ordered to one another, and to that which is outside. Hence virtue, inasmuch as it is a suitable disposition of the soul, is like health and beauty, which are suitable dispositions of the body. But this does not hinder virtue from being a principle of operation.

Reply to Objection 2. Virtue which is referred to being is not proper to man; but only that virtue which is referred to works of reason, which are proper to man.

Reply to Objection 3. As God’s substance is His act, the highest likeness of man to God is in respect of some operation. Wherefore, as we have said above (q. 3, a. 2), happiness or bliss by which man is made most perfectly conformed to God, and which is the end of human life, consists in an operation.

* The one Latin word ‘potentia’ is rendered ‘potentiality’ in the first case, and ‘power’ in the second

Objection 1. It would seem that it is not essential to virtue that it should be a good habit. For sin is always taken in a bad sense. But there is a virtue even of sin; according to 1 Cor. 15:56: “The virtue [Douay: ‘strength’] of sin is the Law.” Therefore virtue is not always a good habit.

Objection 2. Further, Virtue corresponds to power. But power is not only referred to good, but also to evil: according to Is. 5: “Woe to you that are mighty to drink wine, and stout men at drunkenness.” Therefore virtue also is referred to good and evil.

Objection 3. Further, according to the Apostle (2 Cor. 12:9): “Virtue [Douay: ‘power’] is made perfect in infirmity.” But infirmity is an evil. Therefore virtue is referred not only to good, but also to evil.

On the contrary, Augustine says (De Moribus Eccl. vi): “No one can doubt that virtue makes the soul exceeding good”: and the Philosopher says (Ethic. ii, 6): “Virtue is that which makes its possessor good, and his work good likewise.”

I answer that, As we have said above (a. 1), virtue implies a perfection of power: wherefore the virtue of a thing is fixed by the limit of its power (De Coelo i). Now the limit of any power must needs be good: for all evil implies defect; wherefore Dionysius says (Div. Hom. ii) that every evil is a weakness. And for this reason the virtue of a thing must be regarded in reference

to good. Therefore human virtue which is an operative habit, is a good habit, productive of good works.

Reply to Objection 1. Just as bad things are said metaphorically to be perfect, so are they said to be good: for we speak of a perfect thief or robber; and of a good thief or robber, as the Philosopher explains (Metaph. v, text. 21). In this way therefore virtue is applied to evil things: so that the “virtue” of sin is said to be law, in so far as occasionally sin is aggravated through the law, so as to attain to the limit of its possibility.

Reply to Objection 2. The evil of drunkenness and excessive drink, consists in a falling away from the order of reason. Now it happens that, together with this falling away from reason, some lower power is perfect in reference to that which belongs to its own kind, even in direct opposition to reason, or with some falling away therefrom. But the perfection of that power, since it is compatible with a falling away from reason, cannot be called a human virtue.

Reply to Objection 3. Reason is shown to be so much the more perfect, according as it is able to overcome or endure more easily the weakness of the body and of the lower powers. And therefore human virtue, which is attributed to reason, is said to be “made perfect in infirmity,” not of the reason indeed, but of the body and of the lower powers.

Objection 1. It would seem that the definition, usually given, of virtue, is not suitable, to wit: "Virtue is a good quality of the mind, by which we live righteously, of which no one can make bad use, which God works in us, without us." For virtue is man's goodness, since virtue it is that makes its subject good. But goodness does not seem to be good, as neither is whiteness white. It is therefore unsuitable to describe virtue as a "good quality."

Objection 2. Further, no difference is more common than its genus; since it is that which divides the genus. But good is more common than quality, since it is convertible with being. Therefore "good" should not be put in the definition of virtue, as a difference of quality.

Objection 3. Further, as Augustine says (*De Trin.* xii, 3): "When we come across anything that is not common to us and the beasts of the field, it is something appertaining to the mind." But there are virtues even of the irrational parts; as the Philosopher says (*Ethic.* iii, 10). Every virtue, therefore, is not a good quality "of the mind."

Objection 4. Further, righteousness seems to belong to justice; whence the righteous are called just. But justice is a species of virtue. It is therefore unsuitable to put "righteous" in the definition of virtue, when we say that virtue is that "by which we live righteously."

Objection 5. Further, whoever is proud of a thing, makes bad use of it. But many are proud of virtue, for Augustine says in his *Rule*, that "pride lies in wait for good works in order to slay them." It is untrue, therefore, "that no one can make bad use of virtue."

Objection 6. Further, man is justified by virtue. But Augustine commenting on *Jn.* 15:11: "He shall do greater things than these," says*: "He who created thee without thee, will not justify thee without thee." It is therefore unsuitable to say that "God works virtue in us, without us."

On the contrary, We have the authority of Augustine from whose words this definition is gathered, and principally in *De Libero Arbitrio* ii, 19.

I answer that, This definition comprises perfectly the whole essential notion of virtue. For the perfect essential notion of anything is gathered from all its causes. Now the above definition comprises all the causes of virtue. For the formal cause of virtue, as of everything, is gathered from its genus and difference, when it is defined as "a good quality": for "quality" is the genus of virtue, and the difference, "good." But the definition would be more suitable if for "quality" we substitute "habit," which is the proximate genus.

Now virtue has no matter "out of which" it is formed, as neither has any other accident; but it has matter "about which" it is concerned, and matter "in which" it exists, namely, the subject. The matter about

which virtue is concerned is its object, and this could not be included in the above definition, because the object fixes the virtue to a certain species, and here we are giving the definition of virtue in general. And so for material cause we have the subject, which is mentioned when we say that virtue is a good quality "of the mind."

The end of virtue, since it is an operative habit, is operation. But it must be observed that some operative habits are always referred to evil, as vicious habits: others are sometimes referred to good, sometimes to evil; for instance, opinion is referred both to the true and to the untrue: whereas virtue is a habit which is always referred to good: and so the distinction of virtue from those habits which are always referred to evil, is expressed in the words "by which we live righteously": and its distinction from those habits which are sometimes directed unto good, sometimes unto evil, in the words, "of which no one makes bad use."

Lastly, God is the efficient cause of infused virtue, to which this definition applies; and this is expressed in the words "which God works in us without us." If we omit this phrase, the remainder of the definition will apply to all virtues in general, whether acquired or infused.

Reply to Objection 1. That which is first seized by the intellect is being: wherefore everything that we apprehend we consider as being, and consequently as good, and as good, which are convertible with being. Wherefore we say that essence is being and is one and is good; and that oneness is being and one and good: and in like manner goodness. But this is not the case with specific forms, as whiteness and health; for everything that we apprehend, is not apprehended with the notion of white and healthy. We must, however, observe that, as accidents and non-subsistent forms are called beings, not as if they themselves had being, but because things are by them; so also are they called good or one, not by some distinct goodness or oneness, but because by them something is good or one. So also is virtue called good, because by it something is good.

Reply to Objection 2. Good, which is put in the definition of virtue, is not good in general which is convertible with being, and which extends further than quality, but the good as fixed by reason, with regard to which Dionysius says (*Div. Nom.* iv) "that the good of the soul is to be in accord with reason."

Reply to Objection 3. Virtue cannot be in the irrational part of the soul, except in so far as this participates in the reason (*Ethic.* i, 13). And therefore reason, or the mind, is the proper subject of virtue.

Reply to Objection 4. Justice has a righteousness of its own by which it puts those outward things right which come into human use, and are the proper matter of justice, as we shall show further on (q. 60, a. 2; *Ia IIae*, q. 58, a. 8). But the righteousness which denotes order to a due end and to the Divine law, which is the

* *Tract.* xxvii in *Joan.*: *Serm.* xv de *Verb.* Ap. 11

rule of the human will, as stated above (q. 19, a. 4), is common to all virtues.

Reply to Objection 5. One can make bad use of a virtue objectively, for instance by having evil thoughts about a virtue, e.g. by hating it, or by being proud of it: but one cannot make bad use of virtue as principle of action, so that an act of virtue be evil.

Reply to Objection 6. Infused virtue is caused in us by God without any action on our part, but not without our consent. This is the sense of the words, “which God works in us without us.” As to those things which are done by us, God causes them in us, yet not without action on our part, for He works in every will and in every nature.

FIRST PART OF THE SECOND PART, QUESTION 56

Of the Subject of Virtue (In Six Articles)

We now have to consider the subject of virtue, about which there are six points of inquiry:

- (1) Whether the subject of virtue is a power of the soul?
- (2) Whether one virtue can be in several powers?
- (3) Whether the intellect can be the subject of virtue?
- (4) Whether the irascible and concupiscible faculties can be the subject of virtue?
- (5) Whether the sensitive powers of apprehension can be the subject of virtue?
- (6) Whether the will can be the subject of virtue?

Whether the subject of virtue is a power of the soul?

Ia IIae q. 56 a. 1

Objection 1. It would seem that the subject of virtue is not a power of the soul. For Augustine says (De Lib. Arb. ii, 19) that “virtue is that by which we live righteously.” But we live by the essence of the soul, and not by a power of the soul. Therefore virtue is not a power, but in the essence of the soul.

Objection 2. Further, the Philosopher says (Ethic. ii, 6) that “virtue is that which makes its possessor good, and his work good likewise.” But as work is set up by power, so he that has a virtue is set up by the essence of the soul. Therefore virtue does not belong to the power, any more than to the essence of the soul.

Objection 3. Further, power is in the second species of quality. But virtue is a quality, as we have said above (q. 55, a. 4): and quality is not the subject of quality. Therefore a power of the soul is not the subject of virtue.

On the contrary, “Virtue is the limit of power” (De Coelo ii). But the limit is in that of which it is the limit. Therefore virtue is in a power of the soul.

I answer that, It can be proved in three ways that virtue belongs to a power of the soul. First, from the notion of the very essence of virtue, which implies perfection of a power; for perfection is in that which it perfects. Secondly, from the fact that virtue is an operative habit, as we have said above (q. 55, a. 2): for all operation proceeds from the soul through a power. Thirdly,

from the fact that virtue disposes to that which is best: for the best is the end, which is either a thing’s operation, or something acquired by an operation proceeding from the thing’s power. Therefore a power of the soul is the subject of virtue.

Reply to Objection 1. “To live” may be taken in two ways. Sometimes it is taken for the very existence of the living thing: in this way it belongs to the essence of the soul, which is the principle of existence in the living thing. But sometimes “to live” is taken for the operation of the living thing: in this sense, by virtue we live righteously, inasmuch as by virtue we perform righteous actions.

Reply to Objection 2. Good is either the end, or something referred to the end. And therefore, since the good of the worker consists in the work, this fact also, that virtue makes the worker good, is referred to the work, and consequently, to the power.

Reply to Objection 3. One accident is said to be the subject of another, not as though one accident could uphold another; but because one accident inheres to substance by means of another, as color to the body by means of the surface; so that surface is said to be the subject of color. In this way a power of the soul is said to be the subject of virtue.

Whether one virtue can be in several powers?

Ia IIae q. 56 a. 2

Objection 1. It would seem that one virtue can be in several powers. For habits are known by their acts. But one act proceeds in various way from several powers: thus walking proceeds from the reason as directing, from the will as moving, and from the motive power as executing. Therefore also one habit can be in several powers.

Objection 2. Further, the Philosopher says (Ethic. ii, 4) that three things are required for virtue, namely: “to know, to will, and to work steadfastly.” But “to know” belongs to the intellect, and “to will” belongs to the will. Therefore virtue can be in several powers.

Objection 3. Further, prudence is in the reason since it is “the right reason of things to be done” (Ethic. vi, 5). And it is also in the will: for it cannot exist together with a perverse will (Ethic. vi, 12). Therefore one virtue can be in two powers.

On the contrary, The subject of virtue is a power of the soul. But the same accident cannot be in several subjects. Therefore one virtue cannot be in several powers of the soul.

I answer that, It happens in two ways that one thing is subjected in two. First, so that it is in both on an equal footing. In this way it is impossible for one virtue

to be in two powers: since diversity of powers follows the generic conditions of the objects, while diversity of habits follows the specific conditions thereof: and so wherever there is diversity of powers, there is diversity of habits; but not vice versa. In another way one thing can be subjected in two or more, not on an equal footing, but in a certain order. And thus one virtue can belong to several powers, so that it is in one chiefly, while it extends to others by a kind of diffusion, or by way of a disposition, in so far as one power is moved by another, and one power receives from another.

Reply to Objection 1. One act cannot belong to several powers equally, and in the same degree; but only from different points of view, and in various degrees.

Reply to Objection 2. “To know” is a condition required for moral virtue, inasmuch as moral virtue works according to right reason. But moral virtue is essentially in the appetite.

Reply to Objection 3. Prudence is really subjected in reason: but it presupposes as its principle the rectitude of the will, as we shall see further on (a. 3; q. 57, a. 4).

Whether the intellect can be the subject of virtue?

Ia IIae q. 56 a. 3

Objection 1. It would seem that the intellect is not the subject of virtue. For Augustine says (De Moribus Eccl. xv) that all virtue is love. But the subject of love is not the intellect, but the appetitive power alone. Therefore no virtue is in the intellect.

Objection 2. Further, virtue is referred to good, as is clear from what has been said above (q. 55, a. 3). Now good is not the object of the intellect, but of the appetitive power. Therefore the subject of virtue is not the intellect, but the appetitive power.

Objection 3. Further, virtue is that “which makes its possessor good,” as the Philosopher says (Ethic. ii, 6). But the habit which perfects the intellect does not make its possessor good: since a man is not said to be a good man on account of his science or his art. Therefore the intellect is not the subject of virtue.

On the contrary, The mind is chiefly called the intellect. But the subject of virtue is the mind, as is clear from the definition, above given, of virtue (q. 55, a. 4). Therefore the intellect is the subject of virtue.

I answer that, As we have said above (q. 55, a. 3), a virtue is a habit by which we work well. Now a habit may be directed to a good act in two ways. First, in so far as by the habit a man acquires an aptness to a good act; for instance, by the habit of grammar man has the aptness to speak correctly. But grammar does not make a man always speak correctly: for a grammarian may be guilty of a barbarism or make a solecism: and the case is the same with other sciences and arts. Secondly, a habit may confer not only aptness to act, but also the right use of that aptness: for instance, justice not only gives man the prompt will to do just actions, but also makes him act justly.

And since good, and, in like manner, being, is said of a thing simply, in respect, not of what it is potentially, but of what it is actually: therefore from having habits of the latter sort, man is said simply to do good, and to be good; for instance, because he is just, or temperate; and in like manner as regards other such virtues. And since virtue is that “which makes its possessor good, and his work good likewise,” these latter habits are called virtuous simply: because they make

the work to be actually good, and the subject good simply. But the first kind of habits are not called virtues simply: because they do not make the work good except in regard to a certain aptness, nor do they make their possessor good simply. For through being gifted in science or art, a man is said to be good, not simply, but relatively; for instance, a good grammarian or a good smith. And for this reason science and art are often divided against virtue; while at other times they are called virtues (Ethic. vi, 2).

Hence the subject of a habit which is called a virtue in a relative sense, can be the intellect, and not only the practical intellect, but also the speculative, without any reference to the will: for thus the Philosopher (Ethic. vi, 3) holds that science, wisdom and understanding, and also art, are intellectual virtues. But the subject of a habit which is called a virtue simply, can only be the will, or some power in so far as it is moved by the will. And the reason of this is, that the will moves to their acts all those other powers that are in some way rational, as we have said above (q. 9, a. 1; q. 17, Aa. 1,5; Ia, q. 82, a. 4): and therefore if man do well actually, this is because he has a good will. Therefore the virtue which makes a man to do well actually, and not merely to have the aptness to do well, must be either in the will itself; or in some power as moved by the will.

Now it happens that the intellect is moved by the will, just as are the other powers: for a man considers something actually, because he wills to do so. And therefore the intellect, in so far as it is subordinate to the will, can be the subject of virtue absolutely so called. And in this way the speculative intellect, or the reason, is the subject of Faith: for the intellect is moved by the command of the will to assent to what is of faith: for “no man believeth, unless he will”*. But the practical intellect is the subject of prudence. For since prudence is the right reason of things to be done, it is a condition thereof that man be rightly disposed in regard to the principles of this reason of things to be done, that is in regard to their ends, to which man is rightly disposed by the rectitude of the will, just as to the principles of speculative truth he is rightly disposed by the natural

* Augustine: Tract. xxvi in Joan.

light of the active intellect. And therefore as the subject of science, which is the right reason of speculative truths, is the speculative intellect in its relation to the active intellect, so the subject of prudence is the practical intellect in its relation to the right will.

Reply to Objection 1. The saying of Augustine is to be understood of virtue simply so called: not that every virtue is love simply: but that it depends in some way on love, in so far as it depends on the will, whose first movement consists in love, as we have said above

(q. 25, Aa. 1,2,3; q. 27, a. 4; Ia, q. 20, a. 1).

Reply to Objection 2. The good of each thing is its end: and therefore, as truth is the end of the intellect, so to know truth is the good act of the intellect. Whence the habit, which perfects the intellect in regard to the knowledge of truth, whether speculative or practical, is a virtue.

Reply to Objection 3. This objection considers virtue simply so called.

Whether the irascible and concupiscible powers are the subject of virtue?

Ia IIae q. 56 a. 4

Objection 1. It would seem that the irascible and concupiscible powers cannot be the subject of virtue. For these powers are common to us and dumb animals. But we are now speaking of virtue as proper to man, since for this reason it is called human virtue. It is therefore impossible for human virtue to be in the irascible and concupiscible powers which are parts of the sensitive appetite, as we have said in the Ia, q. 81, a. 2.

Objection 2. Further, the sensitive appetite is a power which makes use of a corporeal organ. But the good of virtue cannot be in man's body: for the Apostle says (Rom. 7): "I know that good does not dwell in my flesh." Therefore the sensitive appetite cannot be the subject of virtue.

Objection 3. Further, Augustine proves (De Moribus Eccl. v) that virtue is not in the body but in the soul, for the reason that the body is ruled by the soul: wherefore it is entirely due to his soul that a man make good use of his body: "For instance, if my coachman, through obedience to my orders, guides well the horses which he is driving; this is all due to me." But just as the soul rules the body, so also does the reason rule the sensitive appetite. Therefore that the irascible and concupiscible powers are rightly ruled, is entirely due to the rational powers. Now "virtue is that by which we live rightly," as we have said above (q. 55, a. 4). Therefore virtue is not in the irascible and concupiscible powers, but only in the rational powers.

Objection 4. Further, "the principal act of moral virtue is choice" (Ethic. viii, 13). Now choice is not an act of the irascible and concupiscible powers, but of the rational power, as we have said above (q. 13, a. 2). Therefore moral virtue is not in the irascible and concupiscible powers, but in the reason.

On the contrary, Fortitude is assigned to the irascible power, and temperance to the concupiscible power. Whence the Philosopher (Ethic. iii, 10) says that "these virtues belong to the irrational part of the soul."

I answer that, The irascible and concupiscible powers can be considered in two ways. First, in themselves, in so far as they are parts of the sensitive appetite: and in this way they are not competent to be the subject of virtue. Secondly, they can be considered as participating in the reason, from the fact that they have a natural

aptitude to obey reason. And thus the irascible or concupiscible power can be the subject of human virtue: for, in so far as it participates in the reason, it is the principle of a human act. And to these powers we must needs assign virtues.

For it is clear that there are some virtues in the irascible and concupiscible powers. Because an act, which proceeds from one power according as it is moved by another power, cannot be perfect, unless both powers be well disposed to the act: for instance, the act of a craftsman cannot be successful unless both the craftsman and his instrument be well disposed to act. Therefore in the matter of the operations of the irascible and concupiscible powers, according as they are moved by reason, there must needs be some habit perfecting in respect of acting well, not only the reason, but also the irascible and concupiscible powers. And since the good disposition of the power which moves through being moved, depends on its conformity with the power that moves it: therefore the virtue which is in the irascible and concupiscible powers is nothing else but a certain habitual conformity of these powers to reason.

Reply to Objection 1. The irascible and concupiscible powers considered in themselves, as parts of the sensitive appetite, are common to us and dumb animals. But in so far as they are rational by participation, and are obedient to the reason, they are proper to man. And in this way they can be the subject of human virtue.

Reply to Objection 2. Just as human flesh has not of itself the good of virtue, but is made the instrument of a virtuous act, inasmuch as being moved by reason, we "yield our members to serve justice"; so also, the irascible and concupiscible powers, of themselves indeed, have not the good of virtue, but rather the infection of the "fomes": whereas, inasmuch as they are in conformity with reason, the good of reason is begotten in them.

Reply to Objection 3. The body is ruled by the soul, and the irascible and concupiscible powers by the reason, but in different ways. For the body obeys the soul blindly without any contradiction, in those things in which it has a natural aptitude to be moved by the soul: whence the Philosopher says (Polit. i, 3) that the "soul rules the body with a despotic command" as the

master rules his slave: wherefore the entire movement of the body is referred to the soul. For this reason virtue is not in the body, but in the soul. But the irascible and concupiscible powers do not obey the reason blindly; on the contrary, they have their own proper movements, by which, at times, they go against reason, whence the Philosopher says (Polit. i, 3) that the “reason rules the irascible and concupiscible powers by a political command” such as that by which free men are ruled, who have in some respects a will of their own. And for this reason also must there be some virtues in the irascible and concupiscible powers, by which these powers are

well disposed to act.

Reply to Objection 4. In choice there are two things, namely, the intention of the end, and this belongs to the moral virtue; and the preferential choice of that which is unto the end, and this belongs to prudence (Ethic. vi, 2,5). But that the irascible and concupiscible powers have a right intention of the end in regard to the passions of the soul, is due to the good disposition of these powers. And therefore those moral virtues which are concerned with the passions are in the irascible and concupiscible powers, but prudence is in the reason.

Whether the sensitive powers of apprehension are the subject of virtue?

Ia IIae q. 56 a. 5

Objection 1. It would seem that it is possible for virtue to be in the interior sensitive powers of apprehension. For the sensitive appetite can be the subject of virtue, in so far as it obeys reason. But the interior sensitive powers of apprehension obey reason: for the powers of imagination, of cogitation, and of memory* act at the command of reason. Therefore in these powers there can be virtue.

Objection 2. Further, as the rational appetite, which is the will, can be hindered or helped in its act, by the sensitive appetite, so also can the intellect or reason be hindered or helped by the powers mentioned above. As, therefore, there can be virtue in the interior powers of appetite, so also can there be virtue in the interior powers of apprehension.

Objection 3. Further, prudence is a virtue, of which Cicero (De Invent. Rhetor. ii) says that memory is a part. Therefore also in the power of memory there can be a virtue: and in like manner, in the other interior sensitive powers of apprehension.

On the contrary, All virtues are either intellectual or moral (Ethic. ii, 1). Now all the moral virtues are in the appetite; while the intellectual virtues are in the intellect or reason, as is clear from Ethic. vi, 1. Therefore there is no virtue in the interior sensitive powers of apprehension.

I answer that, In the interior sensitive powers of apprehension there are some habits. And this is made clear principally from what the Philosopher says (De Memoria ii), that “in remembering one thing after another, we become used to it; and use is a second nature.” Now a habit of use is nothing else than a habit acquired by use, which is like unto nature. Wherefore Tully says of virtue in his Rhetoric that “it is a habit like a second na-

ture in accord with reason.” Yet, in man, that which he acquires by use, in his memory and other sensitive powers of apprehension, is not a habit properly so called, but something annexed to the habits of the intellectual faculty, as we have said above (q. 50, a. 4, ad 3).

Nevertheless even if there be habits in such powers, they cannot be virtues. For virtue is a perfect habit, by which it never happens that anything but good is done: and so virtue must needs be in that power which consummates the good act. But the knowledge of truth is not consummated in the sensitive powers of apprehension: for such powers prepare the way to the intellectual knowledge. And therefore in these powers there are none of the virtues, by which we know truth: these are rather in the intellect or reason.

Reply to Objection 1. The sensitive appetite is related to the will, which is the rational appetite, through being moved by it. And therefore the act of the appetitive power is consummated in the sensitive appetite: and for this reason the sensitive appetite is the subject of virtue. Whereas the sensitive powers of apprehension are related to the intellect rather through moving it; for the reason that the phantasms are related to the intellectual soul, as colors to sight (De Anima iii, text. 18). And therefore the act of knowledge is terminated in the intellect; and for this reason the cognitive virtues are in the intellect itself, or the reason.

And thus is made clear the Reply to the Second Objection.

Reply to Objection 3. Memory is not a part of prudence, as species is of a genus, as though memory were a virtue properly so called: but one of the conditions required for prudence is a good memory; so that, in a fashion, it is after the manner of an integral part.

Whether the will can be the subject of virtue?

Ia IIae q. 56 a. 6

Objection 1. It would seem that the will is not the subject of virtue. Because no habit is required for that which belongs to a power by reason of its very nature. But since the will is in the reason, it is of the very

essence of the will, according to the Philosopher (De Anima iii, text. 42), to tend to that which is good, according to reason. And to this good every virtue is ordered, since everything naturally desires its own proper

* Cf. Ia, q. 78, a. 4

good; for virtue, as Tully says in his Rhetoric, is a “habit like a second nature in accord with reason.” Therefore the will is not the subject of virtue.

Objection 2. Further, every virtue is either intellectual or moral (Ethic. i, 13; ii, 1). But intellectual virtue is subjected in the intellect and reason, and not in the will: while moral virtue is subjected in the irascible and concupiscible powers which are rational by participation. Therefore no virtue is subjected in the will.

Objection 3. Further, all human acts, to which virtues are ordained, are voluntary. If therefore there be a virtue in the will in respect of some human acts, in like manner there will be a virtue in the will in respect of all human acts. Either, therefore, there will be no virtue in any other power, or there will be two virtues ordained to the same act, which seems unreasonable. Therefore the will cannot be the subject of virtue.

On the contrary, Greater perfection is required in the mover than in the moved. But the will moves the irascible and concupiscible powers. Much more therefore should there be virtue in the will than in the irascible and concupiscible powers.

I answer that, Since the habit perfects the power in reference to act, then does the power need a habit perfecting it unto doing well, which habit is a virtue, when the power’s own proper nature does not suffice for the purpose.

Now the proper nature of a power is seen in its relation to its object. Since, therefore, as we have said above (q. 19, a. 3), the object of the will is the good of

reason proportionate to the will, in respect of this the will does not need a virtue perfecting it. But if man’s will is confronted with a good that exceeds its capacity, whether as regards the whole human species, such as Divine good, which transcends the limits of human nature, or as regards the individual, such as the good of one’s neighbor, then does the will need virtue. And therefore such virtues as those which direct man’s affections to God or to his neighbor are subjected in the will, as charity, justice, and such like.

Reply to Objection 1. This objection is true of those virtues which are ordained to the willer’s own good; such as temperance and fortitude, which are concerned with the human passions, and the like, as is clear from what we have said (q. 35, a. 6).

Reply to Objection 2. Not only the irascible and concupiscible powers are rational by participation but “the appetitive power altogether,” i.e. in its entirety (Ethic. i, 13). Now the will is included in the appetitive power. And therefore whatever virtue is in the will must be a moral virtue, unless it be theological, as we shall see later on (q. 62, a. 3).

Reply to Objection 3. Some virtues are directed to the good of moderated passion, which is the proper good of this or that man: and in these cases there is no need for virtue in the will, for the nature of the power suffices for the purpose, as we have said. This need exists only in the case of virtues which are directed to some extrinsic good.

Objection 1. It would seem that the subject of virtue is not a power of the soul. For Augustine says (*De Lib. Arb.* ii, 19) that “virtue is that by which we live righteously.” But we live by the essence of the soul, and not by a power of the soul. Therefore virtue is not a power, but in the essence of the soul.

Objection 2. Further, the Philosopher says (*Ethic.* ii, 6) that “virtue is that which makes its possessor good, and his work good likewise.” But as work is set up by power, so he that has a virtue is set up by the essence of the soul. Therefore virtue does not belong to the power, any more than to the essence of the soul.

Objection 3. Further, power is in the second species of quality. But virtue is a quality, as we have said above (q. 55, a. 4): and quality is not the subject of quality. Therefore a power of the soul is not the subject of virtue.

On the contrary, “Virtue is the limit of power” (*De Coelo* ii). But the limit is in that of which it is the limit. Therefore virtue is in a power of the soul.

I answer that, It can be proved in three ways that virtue belongs to a power of the soul. First, from the notion of the very essence of virtue, which implies perfection of a power; for perfection is in that which it perfects. Secondly, from the fact that virtue is an operative habit, as we have said above (q. 55, a. 2): for all operation proceeds from the soul through a power. Thirdly,

from the fact that virtue disposes to that which is best: for the best is the end, which is either a thing’s operation, or something acquired by an operation proceeding from the thing’s power. Therefore a power of the soul is the subject of virtue.

Reply to Objection 1. “To live” may be taken in two ways. Sometimes it is taken for the very existence of the living thing: in this way it belongs to the essence of the soul, which is the principle of existence in the living thing. But sometimes “to live” is taken for the operation of the living thing: in this sense, by virtue we live righteously, inasmuch as by virtue we perform righteous actions.

Reply to Objection 2. Good is either the end, or something referred to the end. And therefore, since the good of the worker consists in the work, this fact also, that virtue makes the worker good, is referred to the work, and consequently, to the power.

Reply to Objection 3. One accident is said to be the subject of another, not as though one accident could uphold another; but because one accident inheres to substance by means of another, as color to the body by means of the surface; so that surface is said to be the subject of color. In this way a power of the soul is said to be the subject of virtue.

Objection 1. It would seem that one virtue can be in several powers. For habits are known by their acts. But one act proceeds in various way from several powers: thus walking proceeds from the reason as directing, from the will as moving, and from the motive power as executing. Therefore also one habit can be in several powers.

Objection 2. Further, the Philosopher says (Ethic. ii, 4) that three things are required for virtue, namely: “to know, to will, and to work steadfastly.” But “to know” belongs to the intellect, and “to will” belongs to the will. Therefore virtue can be in several powers.

Objection 3. Further, prudence is in the reason since it is “the right reason of things to be done” (Ethic. vi, 5). And it is also in the will: for it cannot exist together with a perverse will (Ethic. vi, 12). Therefore one virtue can be in two powers.

On the contrary, The subject of virtue is a power of the soul. But the same accident cannot be in several subjects. Therefore one virtue cannot be in several powers of the soul.

I answer that, It happens in two ways that one thing is subjected in two. First, so that it is in both on an

equal footing. In this way it is impossible for one virtue to be in two powers: since diversity of powers follows the generic conditions of the objects, while diversity of habits follows the specific conditions thereof: and so wherever there is diversity of powers, there is diversity of habits; but not vice versa. In another way one thing can be subjected in two or more, not on an equal footing, but in a certain order. And thus one virtue can belong to several powers, so that it is in one chiefly, while it extends to others by a kind of diffusion, or by way of a disposition, in so far as one power is moved by another, and one power receives from another.

Reply to Objection 1. One act cannot belong to several powers equally, and in the same degree; but only from different points of view, and in various degrees.

Reply to Objection 2. “To know” is a condition required for moral virtue, inasmuch as moral virtue works according to right reason. But moral virtue is essentially in the appetite.

Reply to Objection 3. Prudence is really subjected in reason: but it presupposes as its principle the rectitude of the will, as we shall see further on (a. 3; q. 57, a. 4).

Objection 1. It would seem that the intellect is not the subject of virtue. For Augustine says (*De Moribus Eccl.* xv) that all virtue is love. But the subject of love is not the intellect, but the appetitive power alone. Therefore no virtue is in the intellect.

Objection 2. Further, virtue is referred to good, as is clear from what has been said above (q. 55, a. 3). Now good is not the object of the intellect, but of the appetitive power. Therefore the subject of virtue is not the intellect, but the appetitive power.

Objection 3. Further, virtue is that “which makes its possessor good,” as the Philosopher says (*Ethic.* ii, 6). But the habit which perfects the intellect does not make its possessor good: since a man is not said to be a good man on account of his science or his art. Therefore the intellect is not the subject of virtue.

On the contrary, The mind is chiefly called the intellect. But the subject of virtue is the mind, as is clear from the definition, above given, of virtue (q. 55, a. 4). Therefore the intellect is the subject of virtue.

I answer that, As we have said above (q. 55, a. 3), a virtue is a habit by which we work well. Now a habit may be directed to a good act in two ways. First, in so far as by the habit a man acquires an aptness to a good act; for instance, by the habit of grammar man has the aptness to speak correctly. But grammar does not make a man always speak correctly: for a grammarian may be guilty of a barbarism or make a solecism: and the case is the same with other sciences and arts. Secondly, a habit may confer not only aptness to act, but also the right use of that aptness: for instance, justice not only gives man the prompt will to do just actions, but also makes him act justly.

And since good, and, in like manner, being, is said of a thing simply, in respect, not of what it is potentially, but of what it is actually: therefore from having habits of the latter sort, man is said simply to do good, and to be good; for instance, because he is just, or temperate; and in like manner as regards other such virtues. And since virtue is that “which makes its possessor good, and his work good likewise,” these latter habits are called virtuous simply: because they make the work to be actually good, and the subject good simply. But the first kind of habits are not called virtues simply: because they do not make the work good except in regard to a certain aptness, nor do they make their possessor good simply. For through being gifted in science or art, a man is said to be good, not simply, but relatively; for instance, a good grammarian or a good smith. And for this reason science and art are often divided against virtue; while at other times they are called virtues (*Ethic.* vi, 2).

Hence the subject of a habit which is called a virtue in a relative sense, can be the intellect, and not only the practical intellect, but also the speculative, without any reference to the will: for thus the Philosopher (*Ethic.* vi, 3) holds that science, wisdom and understanding, and also art, are intellectual virtues. But the subject of a habit which is called a virtue simply, can only be the will, or some power in so far as it is moved by the will. And the reason of this is, that the will moves to their acts all those other powers that are in some way rational, as we have said above (q. 9, a. 1; q. 17, Aa. 1,5; Ia, q. 82, a. 4): and therefore if man do well actually, this is because he has a good will. Therefore the virtue which makes a man to do well actually, and not merely to have the aptness to do well, must be either in the will itself; or in some power as moved by the will.

Now it happens that the intellect is moved by the will, just as are the other powers: for a man considers something actually, because he wills to do so. And therefore the intellect, in so far as it is subordinate to the will, can be the subject of virtue absolutely so called. And in this way the speculative intellect, or the reason, is the subject of Faith: for the intellect is moved by the command of the will to assent to what is of faith: for “no man believeth, unless he will”*. But the practical intellect is the subject of prudence. For since prudence is the right reason of things to be done, it is a condition thereof that man be rightly disposed in regard to the principles of this reason of things to be done, that is in regard to their ends, to which man is rightly disposed by the rectitude of the will, just as to the principles of speculative truth he is rightly disposed by the natural light of the active intellect. And therefore as the subject of science, which is the right reason of speculative truths, is the speculative intellect in its relation to the active intellect, so the subject of prudence is the practical intellect in its relation to the right will.

Reply to Objection 1. The saying of Augustine is to be understood of virtue simply so called: not that every virtue is love simply: but that it depends in some way on love, in so far as it depends on the will, whose first movement consists in love, as we have said above (q. 25, Aa. 1,2,3; q. 27, a. 4; Ia, q. 20, a. 1).

Reply to Objection 2. The good of each thing is its end: and therefore, as truth is the end of the intellect, so to know truth is the good act of the intellect. Whence the habit, which perfects the intellect in regard to the knowledge of truth, whether speculative or practical, is a virtue.

Reply to Objection 3. This objection considers virtue simply so called.

* Augustine: *Tract.* xxvi in Joan.

Objection 1. It would seem that the irascible and concupiscible powers cannot be the subject of virtue. For these powers are common to us and dumb animals. But we are now speaking of virtue as proper to man, since for this reason it is called human virtue. It is therefore impossible for human virtue to be in the irascible and concupiscible powers which are parts of the sensitive appetite, as we have said in the Ia, q. 81, a. 2.

Objection 2. Further, the sensitive appetite is a power which makes use of a corporeal organ. But the good of virtue cannot be in man's body: for the Apostle says (Rom. 7): "I know that good does not dwell in my flesh." Therefore the sensitive appetite cannot be the subject of virtue.

Objection 3. Further, Augustine proves (De Moribus Eccl. v) that virtue is not in the body but in the soul, for the reason that the body is ruled by the soul: wherefore it is entirely due to his soul that a man make good use of his body: "For instance, if my coachman, through obedience to my orders, guides well the horses which he is driving; this is all due to me." But just as the soul rules the body, so also does the reason rule the sensitive appetite. Therefore that the irascible and concupiscible powers are rightly ruled, is entirely due to the rational powers. Now "virtue is that by which we live rightly," as we have said above (q. 55, a. 4). Therefore virtue is not in the irascible and concupiscible powers, but only in the rational powers.

Objection 4. Further, "the principal act of moral virtue is choice" (Ethic. viii, 13). Now choice is not an act of the irascible and concupiscible powers, but of the rational power, as we have said above (q. 13, a. 2). Therefore moral virtue is not in the irascible and concupiscible powers, but in the reason.

On the contrary, Fortitude is assigned to the irascible power, and temperance to the concupiscible power. Whence the Philosopher (Ethic. iii, 10) says that "these virtues belong to the irrational part of the soul."

I answer that, The irascible and concupiscible powers can be considered in two ways. First, in themselves, in so far as they are parts of the sensitive appetite: and in this way they are not competent to be the subject of virtue. Secondly, they can be considered as participating in the reason, from the fact that they have a natural aptitude to obey reason. And thus the irascible or concupiscible power can be the subject of human virtue: for, in so far as it participates in the reason, it is the principle of a human act. And to these powers we must needs assign virtues.

For it is clear that there are some virtues in the irascible and concupiscible powers. Because an act, which proceeds from one power according as it is moved by another power, cannot be perfect, unless both powers be well disposed to the act: for instance, the act of a craftsman cannot be successful unless both the craftsman and his instrument be well disposed to act. Therefore in the

matter of the operations of the irascible and concupiscible powers, according as they are moved by reason, there must needs be some habit perfecting in respect of acting well, not only the reason, but also the irascible and concupiscible powers. And since the good disposition of the power which moves through being moved, depends on its conformity with the power that moves it: therefore the virtue which is in the irascible and concupiscible powers is nothing else but a certain habitual conformity of these powers to reason.

Reply to Objection 1. The irascible and concupiscible powers considered in themselves, as parts of the sensitive appetite, are common to us and dumb animals. But in so far as they are rational by participation, and are obedient to the reason, they are proper to man. And in this way they can be the subject of human virtue.

Reply to Objection 2. Just as human flesh has not of itself the good of virtue, but is made the instrument of a virtuous act, inasmuch as being moved by reason, we "yield our members to serve justice"; so also, the irascible and concupiscible powers, of themselves indeed, have not the good of virtue, but rather the infection of the "fomes": whereas, inasmuch as they are in conformity with reason, the good of reason is begotten in them.

Reply to Objection 3. The body is ruled by the soul, and the irascible and concupiscible powers by the reason, but in different ways. For the body obeys the soul blindly without any contradiction, in those things in which it has a natural aptitude to be moved by the soul: whence the Philosopher says (Polit. i, 3) that the "soul rules the body with a despotic command" as the master rules his slave: wherefore the entire movement of the body is referred to the soul. For this reason virtue is not in the body, but in the soul. But the irascible and concupiscible powers do not obey the reason blindly; on the contrary, they have their own proper movements, by which, at times, they go against reason, whence the Philosopher says (Polit. i, 3) that the "reason rules the irascible and concupiscible powers by a political command" such as that by which free men are ruled, who have in some respects a will of their own. And for this reason also must there be some virtues in the irascible and concupiscible powers, by which these powers are well disposed to act.

Reply to Objection 4. In choice there are two things, namely, the intention of the end, and this belongs to the moral virtue; and the preferential choice of that which is unto the end, and this belongs to prudence (Ethic. vi, 2,5). But that the irascible and concupiscible powers have a right intention of the end in regard to the passions of the soul, is due to the good disposition of these powers. And therefore those moral virtues which are concerned with the passions are in the irascible and concupiscible powers, but prudence is in the reason.

Objection 1. It would seem that it is possible for virtue to be in the interior sensitive powers of apprehension. For the sensitive appetite can be the subject of virtue, in so far as it obeys reason. But the interior sensitive powers of apprehension obey reason: for the powers of imagination, of cogitation, and of memory* act at the command of reason. Therefore in these powers there can be virtue.

Objection 2. Further, as the rational appetite, which is the will, can be hindered or helped in its act, by the sensitive appetite, so also can the intellect or reason be hindered or helped by the powers mentioned above. As, therefore, there can be virtue in the interior powers of appetite, so also can there be virtue in the interior powers of apprehension.

Objection 3. Further, prudence is a virtue, of which Cicero (*De Invent. Rhetor.* ii) says that memory is a part. Therefore also in the power of memory there can be a virtue: and in like manner, in the other interior sensitive powers of apprehension.

On the contrary, All virtues are either intellectual or moral (*Ethic.* ii, 1). Now all the moral virtues are in the appetite; while the intellectual virtues are in the intellect or reason, as is clear from *Ethic.* vi, 1. Therefore there is no virtue in the interior sensitive powers of apprehension.

I answer that, In the interior sensitive powers of apprehension there are some habits. And this is made clear principally from what the Philosopher says (*De Memoria* ii), that “in remembering one thing after another, we become used to it; and use is a second nature.” Now a habit of use is nothing else than a habit acquired by use, which is like unto nature. Wherefore Tully says of virtue in his *Rhetoric* that “it is a habit like a second na-

ture in accord with reason.” Yet, in man, that which he acquires by use, in his memory and other sensitive powers of apprehension, is not a habit properly so called, but something annexed to the habits of the intellectual faculty, as we have said above (q. 50, a. 4, ad 3).

Nevertheless even if there be habits in such powers, they cannot be virtues. For virtue is a perfect habit, by which it never happens that anything but good is done: and so virtue must needs be in that power which consummates the good act. But the knowledge of truth is not consummated in the sensitive powers of apprehension: for such powers prepare the way to the intellectual knowledge. And therefore in these powers there are none of the virtues, by which we know truth: these are rather in the intellect or reason.

Reply to Objection 1. The sensitive appetite is related to the will, which is the rational appetite, through being moved by it. And therefore the act of the appetitive power is consummated in the sensitive appetite: and for this reason the sensitive appetite is the subject of virtue. Whereas the sensitive powers of apprehension are related to the intellect rather through moving it; for the reason that the phantasms are related to the intellectual soul, as colors to sight (*De Anima* iii, text. 18). And therefore the act of knowledge is terminated in the intellect; and for this reason the cognoscitive virtues are in the intellect itself, or the reason.

And thus is made clear the Reply to the Second Objection.

Reply to Objection 3. Memory is not a part of prudence, as species is of a genus, as though memory were a virtue properly so called: but one of the conditions required for prudence is a good memory; so that, in a fashion, it is after the manner of an integral part.

* Cf. Ia, q. 78, a. 4

Objection 1. It would seem that the will is not the subject of virtue. Because no habit is required for that which belongs to a power by reason of its very nature. But since the will is in the reason, it is of the very essence of the will, according to the Philosopher (*De Anima* iii, text. 42), to tend to that which is good, according to reason. And to this good every virtue is ordered, since everything naturally desires its own proper good; for virtue, as Tully says in his *Rhetoric*, is a “habit like a second nature in accord with reason.” Therefore the will is not the subject of virtue.

Objection 2. Further, every virtue is either intellectual or moral (*Ethic.* i, 13; ii, 1). But intellectual virtue is subjected in the intellect and reason, and not in the will: while moral virtue is subjected in the irascible and concupiscible powers which are rational by participation. Therefore no virtue is subjected in the will.

Objection 3. Further, all human acts, to which virtues are ordained, are voluntary. If therefore there be a virtue in the will in respect of some human acts, in like manner there will be a virtue in the will in respect of all human acts. Either, therefore, there will be no virtue in any other power, or there will be two virtues ordained to the same act, which seems unreasonable. Therefore the will cannot be the subject of virtue.

On the contrary, Greater perfection is required in the mover than in the moved. But the will moves the irascible and concupiscible powers. Much more therefore should there be virtue in the will than in the irascible and concupiscible powers.

I answer that, Since the habit perfects the power in reference to act, then does the power need a habit perfecting it unto doing well, which habit is a virtue, when the power’s own proper nature does not suffice for the

purpose.

Now the proper nature of a power is seen in its relation to its object. Since, therefore, as we have said above (q. 19, a. 3), the object of the will is the good of reason proportionate to the will, in respect of this the will does not need a virtue perfecting it. But if man’s will is confronted with a good that exceeds its capacity, whether as regards the whole human species, such as Divine good, which transcends the limits of human nature, or as regards the individual, such as the good of one’s neighbor, then does the will need virtue. And therefore such virtues as those which direct man’s affections to God or to his neighbor are subjected in the will, as charity, justice, and such like.

Reply to Objection 1. This objection is true of those virtues which are ordained to the willer’s own good; such as temperance and fortitude, which are concerned with the human passions, and the like, as is clear from what we have said (q. 35, a. 6).

Reply to Objection 2. Not only the irascible and concupiscible powers are rational by participation but “the appetitive power altogether,” i.e. in its entirety (*Ethic.* i, 13). Now the will is included in the appetitive power. And therefore whatever virtue is in the will must be a moral virtue, unless it be theological, as we shall see later on (q. 62, a. 3).

Reply to Objection 3. Some virtues are directed to the good of moderated passion, which is the proper good of this or that man: and in these cases there is no need for virtue in the will, for the nature of the power suffices for the purpose, as we have said. This need exists only in the case of virtues which are directed to some extrinsic good.

FIRST PART OF THE SECOND PART, QUESTION 57

Of the Intellectual Virtues (In Six Articles)

We now have to consider the various kinds of virtue: and (1) the intellectual virtues; (2) the moral virtues; (3) the theological virtues. Concerning the first there are six points of inquiry:

- (1) Whether habits of the speculative intellect are virtues?
- (2) Whether they are three, namely, wisdom, science and understanding?
- (3) Whether the intellectual habit, which is art, is a virtue?
- (4) Whether prudence is a virtue distinct from art?
- (5) Whether prudence is a virtue necessary to man?
- (6) Whether “eubulia,” “synesis” and “gnome” are virtues annexed to prudence?

Whether the habits of the speculative intellect are virtues?

Ia IIae q. 57 a. 1

Objection 1. It would seem that the habits of the speculative intellect are not virtues. For virtue is an operative habit, as we have said above (q. 55, a. 2). But speculative habits are not operative: for speculative matter is distinct from practical, i.e. operative matter. Therefore the habits of the speculative intellect are not virtues.

Objection 2. Further, virtue is about those things by which man is made happy or blessed: for “happiness is the reward of virtue” (Ethic. i, 9). Now intellectual habits do not consider human acts or other human goods, by which man acquires happiness, but rather things pertaining to nature or to God. Therefore such like habits cannot be called virtues.

Objection 3. Further, science is a speculative habit. But science and virtue are distinct from one another as genera which are not subalternate, as the Philosopher proves in Topic. iv. Therefore speculative habits are not virtues.

On the contrary, The speculative habits alone consider necessary things which cannot be otherwise than they are. Now the Philosopher (Ethic. vi, 1) places certain intellectual virtues in that part of the soul which considers necessary things that cannot be otherwise than they are. Therefore the habits of the speculative intellect are virtues.

I answer that, Since every virtue is ordained to some good, as stated above (q. 55, a. 3), a habit, as we have already observed (q. 56, a. 3), may be called a virtue for two reasons: first, because it confers aptness in doing good; secondly, because besides aptness, it confers the right use of it. The latter condition, as above stated (q. 55, a. 3), belongs to those habits alone which affect the appetitive part of the soul: since it is the soul’s appetitive power that puts all the powers and habits to their respective uses.

Since, then, the habits of the speculative intellect do not perfect the appetitive part, nor affect it in any way, but only the intellective part; they may indeed be called virtues in so far as they confer aptness for a good work,

viz. the consideration of truth (since this is the good work of the intellect): yet they are not called virtues in the second way, as though they conferred the right use of a power or habit. For if a man possess a habit of speculative science, it does not follow that he is inclined to make use of it, but he is made able to consider the truth in those matters of which he has scientific knowledge: that he make use of the knowledge which he has, is due to the motion of his will. Consequently a virtue which perfects the will, as charity or justice, confers the right use of these speculative habits. And in this way too there can be merit in the acts of these habits, if they be done out of charity: thus Gregory says (Moral. vi) that the “contemplative life has greater merit than the active life.”

Reply to Objection 1. Work is of two kinds, exterior and interior. Accordingly the practical or active faculty which is contrasted with the speculative faculty, is concerned with exterior work, to which the speculative habit is not ordained. Yet it is ordained to the interior act of the intellect which is to consider the truth. And in this way it is an operative habit.

Reply to Objection 2. Virtue is about certain things in two ways. In the first place a virtue is about its object. And thus these speculative virtues are not about those things whereby man is made happy; except perhaps, in so far as the word “whereby” indicates the efficient cause or object of complete happiness, i.e. God, Who is the supreme object of contemplation. Secondly, a virtue is said to be about its acts: and in this sense the intellectual virtues are about those things whereby a man is made happy; both because the acts of these virtues can be meritorious, as stated above, and because they are a kind of beginning of perfect bliss, which consists in the contemplation of truth, as we have already stated (q. 3, a. 7).

Reply to Objection 3. Science is contrasted with virtue taken in the second sense, wherein it belongs to the appetitive faculty.

Objection 1. It would seem unfitting to distinguish three virtues of the speculative intellect, viz. wisdom, science and understanding. Because a species is a kind of science, as stated in *Ethic.* vi, 7. Therefore wisdom should not be convided with science among the intellectual virtues.

Objection 2. Further, in differentiating powers, habits and acts in respect of their objects, we consider chiefly the formal aspect of these objects, as we have already explained (Ia, q. 77, a. 3). Therefore diversity of habits is taken, not from their material objects, but from the formal aspect of those objects. Now the principle of a demonstration is the formal aspect under which the conclusion is known. Therefore the understanding of principles should not be set down as a habit or virtue distinct from the knowledge of conclusions.

Objection 3. Further, an intellectual virtue is one which resides in the essentially rational faculty. Now even the speculative reason employs the dialectic syllogism for the sake of argument, just as it employs the demonstrative syllogism. Therefore as science, which is the result of a demonstrative syllogism, is set down as an intellectual virtue, so also should opinion be.

On the contrary, The Philosopher (*Ethic.* vi, 1) reckons these three alone as being intellectual virtues, viz. wisdom, science and understanding.

I answer that, As already stated (a. 1), the virtues of the speculative intellect are those which perfect the speculative intellect for the consideration of truth: for this is its good work. Now a truth is subject to a twofold consideration—as known in itself, and as known through another. What is known in itself, is as a “principle,” and is at once understood by the intellect: wherefore the habit that perfects the intellect for the consideration of such truth is called “understanding,” which is the habit of principles.

On the other hand, a truth which is known through another, is understood by the intellect, not at once, but by means of the reason’s inquiry, and is as a “term.” This may happen in two ways: first, so that it is the last in some particular genus; secondly, so that it is the ultimate term of all human knowledge. And, since “things that are knowable last from our standpoint, are knowable first and chiefly in their nature” (*Phys.* i, text. 2, 3); hence that which is last with respect to all human knowledge, is that which is knowable first and chiefly in its nature. And about these is “wisdom,” which considers the highest causes, as stated in *Metaph.* i, 1,2. Wherefore it rightly judges all things and sets them in order, because there can be no perfect and univer-

sal judgment that is not based on the first causes. But in regard to that which is last in this or that genus of knowable matter, it is “science” which perfects the intellect. Wherefore according to the different kinds of knowable matter, there are different habits of scientific knowledge; whereas there is but one wisdom.

Reply to Objection 1. Wisdom is a kind of science, in so far as it has that which is common to all the sciences; viz. to demonstrate conclusions from principles. But since it has something proper to itself above the other sciences, inasmuch as it judges of them all, not only as to their conclusions, but also as to their first principles, therefore it is a more perfect virtue than science.

Reply to Objection 2. When the formal aspect of the object is referred to a power or habit by one same act, there is no distinction of habit or power in respect of the formal aspect and of the material object: thus it belongs to the same power of sight to see both color, and light, which is the formal aspect under which color is seen, and is seen at the same time as the color. On the other hand, the principles of a demonstration can be considered apart, without the conclusion being considered at all. Again they can be considered together with the conclusions, since the conclusions can be deduced from them. Accordingly, to consider the principles in this second way, belongs to science, which considers the conclusions also: while to consider the principles in themselves belongs to understanding.

Consequently, if we consider the point aright, these three virtues are distinct, not as being on a par with one another, but in a certain order. The same is to be observed in potential wholes, wherein one part is more perfect than another; for instance, the rational soul is more perfect than the sensitive soul; and the sensitive, than the vegetal. For it is thus that science depends on understanding as on a virtue of higher degree: and both of these depend on wisdom, as obtaining the highest place, and containing beneath itself both understanding and science, by judging both of the conclusions of science, and of the principles on which they are based.

Reply to Objection 3. As stated above (q. 55, Aa. 3,4), a virtuous habit has a fixed relation to good, and is nowise referable to evil. Now the good of the intellect is truth, and falsehood is its evil. Wherefore those habits alone are called intellectual virtues, whereby we tell the truth and never tell a falsehood. But opinion and suspicion can be about both truth and falsehood: and so, as stated in *Ethic.* vi, 3, they are not intellectual virtues.

Objection 1. It would seem that art is not an intellectual virtue. For Augustine says (De Lib. Arb. ii, 18,19) that “no one makes bad use of virtue.” But one may make bad use of art: for a craftsman can work badly according to the knowledge of his art. Therefore art is not a virtue.

Objection 2. Further, there is no virtue of a virtue. But “there is a virtue of art,” according to the Philosopher (Ethic. vi, 5). Therefore art is not a virtue.

Objection 3. Further, the liberal arts excel the mechanical arts. But just as the mechanical arts are practical, so the liberal arts are speculative. Therefore, if art were an intellectual virtue, it would have to be reckoned among the speculative virtues.

On the contrary, The Philosopher (Ethic. vi, 3,4) says that art is a virtue; and yet he does not reckon it among the speculative virtues, which, according to him, reside in the scientific part of the soul.

I answer that, Art is nothing else but “the right reason about certain works to be made.” And yet the good of these things depends, not on man’s appetitive faculty being affected in this or that way, but on the goodness of the work done. For a craftsman, as such, is commendable, not for the will with which he does a work, but for the quality of the work. Art, therefore, properly speaking, is an operative habit. And yet it has something in common with the speculative habits: since the quality of the object considered by the latter is a matter of concern to them also, but not how the human appetite may be affected towards that object. For as long as the geometrician demonstrates the truth, it matters not how his appetitive faculty may be affected, whether he be joyful or angry: even as neither does this matter in a craftsman, as we have observed. And so art has the nature of a virtue in the same way as the speculative habits, in so far, to wit, as neither art nor speculative habit makes a good work as regards the use of the habit, which is the

property of a virtue that perfects the appetite, but only as regards the aptness to work well.

Reply to Objection 1. When anyone endowed with an art produces bad workmanship, this is not the work of that art, in fact it is contrary to the art: even as when a man lies, while knowing the truth, his words are not in accord with his knowledge, but contrary thereto. Wherefore, just as science has always a relation to good, as stated above (a. 2, ad 3), so it is with art: and it is for this reason that it is called a virtue. And yet it falls short of being a perfect virtue, because it does not make its possessor to use it well; for which purpose something further is requisite: although there cannot be a good use without the art.

Reply to Objection 2. In order that man may make good use of the art he has, he needs a good will, which is perfected by moral virtue; and for this reason the Philosopher says that there is a virtue of art; namely, a moral virtue, in so far as the good use of art requires a moral virtue. For it is evident that a craftsman is inclined by justice, which rectifies his will, to do his work faithfully.

Reply to Objection 3. Even in speculative matters there is something by way of work: e.g. the making of a syllogism or of a fitting speech, or the work of counting or measuring. Hence whatever habits are ordained to such like works of the speculative reason, are, by a kind of comparison, called arts indeed, but “liberal” arts, in order to distinguish them from those arts that are ordained to works done by the body, which arts are, in a fashion, servile, inasmuch as the body is in servile subjection to the soul, and man, as regards his soul, is free [liber]. On the other hand, those sciences which are not ordained to any such like work, are called sciences simply, and not arts. Nor, if the liberal arts be more excellent, does it follow that the notion of art is more applicable to them.

Objection 1. It would seem that prudence is not a distinct virtue from art. For art is the right reason about certain works. But diversity of works does not make a habit cease to be an art; since there are various arts about works widely different. Since therefore prudence is also right reason about works, it seems that it too should be reckoned a virtue.

Objection 2. Further, prudence has more in common with art than the speculative habits have; for they are both “about contingent matters that may be otherwise than they are” (Ethic. vi, 4,5). Now some speculative habits are called arts. Much more, therefore, should prudence be called an art.

Objection 3. Further, it belongs to prudence, “to be of good counsel” (Ethic. vi, 5). But counselling takes

place in certain arts also, as stated in Ethic. iii, 3, e.g. in the arts of warfare, of seamanship, and of medicine. Therefore prudence is not distinct from art.

On the contrary, The Philosopher distinguishes prudence from art (Ethic. vi, 5).

I answer that, Where the nature of virtue differs, there is a different kind of virtue. Now it has been stated above (a. 1; q. 56, a. 3) that some habits have the nature of virtue, through merely conferring aptness for a good work: while some habits are virtues, not only through conferring aptness for a good work, but also through conferring the use. But art confers the mere aptness for good work; since it does not regard the appetite; whereas prudence confers not only aptness for a good work, but also the use: for it regards the appetite, since

it presupposes the rectitude thereof.

The reason for this difference is that art is the “right reason of things to be made”; whereas prudence is the “right reason of things to be done.” Now “making” and “doing” differ, as stated in *Metaph. ix, text. 16*, in that “making” is an action passing into outward matter, e.g. “to build,” “to saw,” and so forth; whereas “doing” is an action abiding in the agent, e.g. “to see,” “to will,” and the like. Accordingly prudence stands in the same relation to such like human actions, consisting in the use of powers and habits, as art does to outward making: since each is the perfect reason about the things with which it is concerned. But perfection and rectitude of reason in speculative matters, depend on the principles from which reason argues; just as we have said above (a. 2, ad 2) that science depends on and presupposes understanding, which is the habit of principles. Now in human acts the end is what the principles are in speculative matters, as stated in *Ethic. vii, 8*. Consequently, it is requisite for prudence, which is right reason about things to be done, that man be well disposed with regard to the ends: and this depends on the rectitude of his appetite. Wherefore, for prudence there is need of a moral virtue, which rectifies the appetite. On the other hand the good things made by art is not the good of man’s appetite, but the good of those things themselves: wherefore art does not presuppose rectitude of the ap-

petite. The consequence is that more praise is given to a craftsman who is at fault willingly, than to one who is unwillingly; whereas it is more contrary to prudence to sin willingly than unwillingly, since rectitude of the will is essential to prudence, but not to art. Accordingly it is evident that prudence is a virtue distinct from art.

Reply to Objection 1. The various kinds of things made by art are all external to man: hence they do not cause a different kind of virtue. But prudence is right reason about human acts themselves: hence it is a distinct kind of virtue, as stated above.

Reply to Objection 2. Prudence has more in common with art than a speculative habit has, if we consider their subject and matter: for they are both in the thinking part of the soul, and about things that may be otherwise than they are. But if we consider them as virtues, then art has more in common with the speculative habits, as is clear from what has been said.

Reply to Objection 3. Prudence is of good counsel about matters regarding man’s entire life, and the end of human life. But in some arts there is counsel about matters concerning the ends proper to those arts. Hence some men, in so far as they are good counselors in matters of warfare, or seamanship, are said to be prudent officers or pilots, but not simply prudent: only those are simply prudent who give good counsel about all the concerns of life.

Whether prudence is a virtue necessary to man?

Ia IIae q. 57 a. 5

Objection 1. It would seem that prudence is not a virtue necessary to lead a good life. For as art is to things that are made, of which it is the right reason, so is prudence to things that are done, in respect of which we judge of a man’s life: for prudence is the right reason about these things, as stated in *Ethic. vi, 5*. Now art is not necessary in things that are made, save in order that they be made, but not after they have been made. Neither, therefore is prudence necessary to man in order to lead a good life, after he has become virtuous; but perhaps only in order that he may become virtuous.

Objection 2. Further, “It is by prudence that we are of good counsel,” as stated in *Ethic. vi, 5*. But man can act not only from his own, but also from another’s good counsel. Therefore man does not need prudence in order to lead a good life, but it is enough that he follow the counsels of prudent men.

Objection 3. Further, an intellectual virtue is one by which one always tells the truth, and never a falsehood. But this does not seem to be the case with prudence: for it is not human never to err in taking counsel about what is to be done; since human actions are about things that may be otherwise than they are. Hence it is written (*Wis. 9:14*): “The thoughts of mortal men are fearful, and our counsels uncertain.” Therefore it seems that prudence should not be reckoned an intellectual virtue.

On the contrary, It is reckoned with other virtues

necessary for human life, when it is written (*Wis. 8:7*) of Divine Wisdom: “She teacheth temperance and prudence and justice and fortitude, which are such things as men can have nothing more profitable in life.”

I answer that, Prudence is a virtue most necessary for human life. For a good life consists in good deeds. Now in order to do good deeds, it matters not only what a man does, but also how he does it; to wit, that he do it from right choice and not merely from impulse or passion. And, since choice is about things in reference to the end, rectitude of choice requires two things: namely, the due end, and something suitably ordained to that due end. Now man is suitably directed to his due end by a virtue which perfects the soul in the appetitive part, the object of which is the good and the end. And to that which is suitably ordained to the due end man needs to be rightly disposed by a habit in his reason, because counsel and choice, which are about things ordained to the end, are acts of the reason. Consequently an intellectual virtue is needed in the reason, to perfect the reason, and make it suitably affected towards things ordained to the end; and this virtue is prudence. Consequently prudence is a virtue necessary to lead a good life.

Reply to Objection 1. The good of an art is to be found, not in the craftsman, but in the product of the art, since art is right reason about things to be made: for

since the making of a thing passes into external matter, it is a perfection not of the maker, but of the thing made, even as movement is the act of the thing moved: and art is concerned with the making of things. On the other hand, the good of prudence is in the active principle, whose activity is its perfection: for prudence is right reason about things to be done, as stated above (a. 4). Consequently art does not require of the craftsman that his act be a good act, but that his work be good. Rather would it be necessary for the thing made to act well (e.g. that a knife should carve well, or that a saw should cut well), if it were proper to such things to act, rather than to be acted on, because they have not dominion over their actions. Wherefore the craftsman needs art, not that he may live well, but that he may produce a good work of art, and have it in good keeping: whereas prudence is necessary to man, that he may lead a good life, and not merely that he may be a good man.

Reply to Objection 2. When a man does a good deed, not of his own counsel, but moved by that of another, his deed is not yet quite perfect, as regards his reason in directing him and his appetite in moving him.

Wherefore, if he do a good deed, he does not do well simply; and yet this is required in order that he may lead a good life.

Reply to Objection 3. As stated in Ethic. vi, 2, truth is not the same for the practical as for the speculative intellect. Because the truth of the speculative intellect depends on conformity between the intellect and the thing. And since the intellect cannot be infallibly in conformity with things in contingent matters, but only in necessary matters, therefore no speculative habit about contingent things is an intellectual virtue, but only such as is about necessary things. On the other hand, the truth of the practical intellect depends on conformity with right appetite. This conformity has no place in necessary matters, which are not affected by the human will; but only in contingent matters which can be effected by us, whether they be matters of interior action, or the products of external work. Hence it is only about contingent matters that an intellectual virtue is assigned to the practical intellect, viz. art, as regards things to be made, and prudence, as regards things to be done.

Whether “euboulia, synesis, and gnome” are virtues annexed to prudence?*

Ia IIae q. 57 a. 6

Objection 1. It would seem that “*euboulia*, *synesis*, and *gnome*” are unfittingly assigned as virtues annexed to prudence. For “*euboulia*” is “a habit whereby we take good counsel” (Ethic. vi, 9). Now it “belongs to prudence to take good counsel,” as stated (Ethic. vi, 9). Therefore “*euboulia*” is not a virtue annexed to prudence, but rather is prudence itself.

Objection 2. Further, it belongs to the higher to judge the lower. The highest virtue would therefore seem to be the one whose act is judgment. Now “*synesis*” enables us to judge well. Therefore “*synesis*” is not a virtue annexed to prudence, but rather is a principal virtue.

Objection 3. Further, just as there are various matters to pass judgment on, so are there different points on which one has to take counsel. But there is one virtue referring to all matters of counsel. Therefore, in order to judge well of what has to be done, there is no need, besides “*synesis*” of the virtue of “*gnome*.”

Objection 4. Further, Cicero (De Invent. Rhet. iii) mentions three other parts of prudence; viz. “memory of the past, understanding of the present, and foresight of the future.” Moreover, Macrobius (Super Somn. Scip. 1) mentions yet others: viz. “caution, docility,” and the like. Therefore it seems that the above are not the only virtues annexed to prudence.

On the contrary, stands the authority of the Philosopher (Ethic. vi, 9,10,11), who assigns these three virtues as being annexed to prudence.

I answer that, Wherever several powers are subordinate to one another, that power is the highest which is

ordained to the highest act. Now there are three acts of reason in respect of anything done by man: the first of these is counsel; the second, judgment; the third, command. The first two correspond to those acts of the speculative intellect, which are inquiry and judgment, for counsel is a kind of inquiry: but the third is proper to the practical intellect, in so far as this is ordained to operation; for reason does not have to command in things that man cannot do. Now it is evident that in things done by man, the chief act is that of command, to which all the rest are subordinate. Consequently, that virtue which perfects the command, viz. prudence, as obtaining the highest place, has other secondary virtues annexed to it, viz. “*eustochia*,” which perfects counsel; and “*synesis*” and “*gnome*,” which are parts of prudence in relation to judgment, and of whose distinction we shall speak further on (ad 3).

Reply to Objection 1. Prudence makes us be of good counsel, not as though its immediate act consisted in being of good counsel, but because it perfects the latter act by means of a subordinate virtue, viz. “*euboulia*.”

Reply to Objection 2. Judgment about what is to be done is directed to something further: for it may happen in some matter of action that a man’s judgment is sound, while his execution is wrong. The matter does not attain to its final complement until the reason has commanded aright in the point of what has to be done.

Reply to Objection 3. Judgment of anything should be based on that thing’s proper principles. But inquiry does not reach to the proper principles: because, if we

* euboulia, synesis, gnome

were in possession of these, we should need no more to inquire, the truth would be already discovered. Hence only one virtue is directed to being of good counsel, whereas there are two virtues for good judgment: because difference is based not on common but on proper principles. Consequently, even in speculative matters, there is one science of dialectics, which inquires about all matters; whereas demonstrative sciences, which pronounce judgment, differ according to their different objects. "*Synesis*" and "*gnome*" differ in respect of the different rules on which judgment is based: for "*synesis*" judges of actions according to the common law; while "*gnome*" bases its judgment on the natural law, in those

cases where the common law fails to apply, as we shall explain further on (IIa IIae, q. 51, a. 4).

Reply to Objection 4. Memory, understanding and foresight, as also caution and docility and the like, are not virtues distinct from prudence: but are, as it were, integral parts thereof, in so far as they are all requisite for perfect prudence. There are, moreover, subjective parts or species of prudence, e.g. domestic and political economy, and the like. But the three first names are, in a fashion, potential parts of prudence; because they are subordinate thereto, as secondary virtues to a principal virtue: and we shall speak of them later (IIa IIae, q. 48, seqq.).

Objection 1. It would seem that the habits of the speculative intellect are not virtues. For virtue is an operative habit, as we have said above (q. 55, a. 2). But speculative habits are not operative: for speculative matter is distinct from practical, i.e. operative matter. Therefore the habits of the speculative intellect are not virtues.

Objection 2. Further, virtue is about those things by which man is made happy or blessed: for “happiness is the reward of virtue” (Ethic. i, 9). Now intellectual habits do not consider human acts or other human goods, by which man acquires happiness, but rather things pertaining to nature or to God. Therefore such like habits cannot be called virtues.

Objection 3. Further, science is a speculative habit. But science and virtue are distinct from one another as genera which are not subalternate, as the Philosopher proves in Topic. iv. Therefore speculative habits are not virtues.

On the contrary, The speculative habits alone consider necessary things which cannot be otherwise than they are. Now the Philosopher (Ethic. vi, 1) places certain intellectual virtues in that part of the soul which considers necessary things that cannot be otherwise than they are. Therefore the habits of the speculative intellect are virtues.

I answer that, Since every virtue is ordained to some good, as stated above (q. 55, a. 3), a habit, as we have already observed (q. 56, a. 3), may be called a virtue for two reasons: first, because it confers aptness in doing good; secondly, because besides aptness, it confers the right use of it. The latter condition, as above stated (q. 55, a. 3), belongs to those habits alone which affect the appetitive part of the soul: since it is the soul’s appetitive power that puts all the powers and habits to their respective uses.

Since, then, the habits of the speculative intellect do not perfect the appetitive part, nor affect it in any way, but only the intellective part; they may indeed be called virtues in so far as they confer aptness for a good work,

viz. the consideration of truth (since this is the good work of the intellect): yet they are not called virtues in the second way, as though they conferred the right use of a power or habit. For if a man possess a habit of speculative science, it does not follow that he is inclined to make use of it, but he is made able to consider the truth in those matters of which he has scientific knowledge: that he make use of the knowledge which he has, is due to the motion of his will. Consequently a virtue which perfects the will, as charity or justice, confers the right use of these speculative habits. And in this way too there can be merit in the acts of these habits, if they be done out of charity: thus Gregory says (Moral. vi) that the “contemplative life has greater merit than the active life.”

Reply to Objection 1. Work is of two kinds, exterior and interior. Accordingly the practical or active faculty which is contrasted with the speculative faculty, is concerned with exterior work, to which the speculative habit is not ordained. Yet it is ordained to the interior act of the intellect which is to consider the truth. And in this way it is an operative habit.

Reply to Objection 2. Virtue is about certain things in two ways. In the first place a virtue is about its object. And thus these speculative virtues are not about those things whereby man is made happy; except perhaps, in so far as the word “whereby” indicates the efficient cause or object of complete happiness, i.e. God, Who is the supreme object of contemplation. Secondly, a virtue is said to be about its acts: and in this sense the intellectual virtues are about those things whereby a man is made happy; both because the acts of these virtues can be meritorious, as stated above, and because they are a kind of beginning of perfect bliss, which consists in the contemplation of truth, as we have already stated (q. 3, a. 7).

Reply to Objection 3. Science is contrasted with virtue taken in the second sense, wherein it belongs to the appetitive faculty.

Objection 1. It would seem unfitting to distinguish three virtues of the speculative intellect, viz. wisdom, science and understanding. Because a species is a kind of science, as stated in *Ethic.* vi, 7. Therefore wisdom should not be convided with science among the intellectual virtues.

Objection 2. Further, in differentiating powers, habits and acts in respect of their objects, we consider chiefly the formal aspect of these objects, as we have already explained (Ia, q. 77, a. 3). Therefore diversity of habits is taken, not from their material objects, but from the formal aspect of those objects. Now the principle of a demonstration is the formal aspect under which the conclusion is known. Therefore the understanding of principles should not be set down as a habit or virtue distinct from the knowledge of conclusions.

Objection 3. Further, an intellectual virtue is one which resides in the essentially rational faculty. Now even the speculative reason employs the dialectic syllogism for the sake of argument, just as it employs the demonstrative syllogism. Therefore as science, which is the result of a demonstrative syllogism, is set down as an intellectual virtue, so also should opinion be.

On the contrary, The Philosopher (*Ethic.* vi, 1) reckons these three alone as being intellectual virtues, viz. wisdom, science and understanding.

I answer that, As already stated (a. 1), the virtues of the speculative intellect are those which perfect the speculative intellect for the consideration of truth: for this is its good work. Now a truth is subject to a twofold consideration—as known in itself, and as known through another. What is known in itself, is as a “principle,” and is at once understood by the intellect: wherefore the habit that perfects the intellect for the consideration of such truth is called “understanding,” which is the habit of principles.

On the other hand, a truth which is known through another, is understood by the intellect, not at once, but by means of the reason’s inquiry, and is as a “term.” This may happen in two ways: first, so that it is the last in some particular genus; secondly, so that it is the ultimate term of all human knowledge. And, since “things that are knowable last from our standpoint, are knowable first and chiefly in their nature” (*Phys.* i, text. 2, 3); hence that which is last with respect to all human knowledge, is that which is knowable first and chiefly in its nature. And about these is “wisdom,” which considers the highest causes, as stated in *Metaph.* i, 1,2. Wherefore it rightly judges all things and sets them in order, because there can be no perfect and univer-

sal judgment that is not based on the first causes. But in regard to that which is last in this or that genus of knowable matter, it is “science” which perfects the intellect. Wherefore according to the different kinds of knowable matter, there are different habits of scientific knowledge; whereas there is but one wisdom.

Reply to Objection 1. Wisdom is a kind of science, in so far as it has that which is common to all the sciences; viz. to demonstrate conclusions from principles. But since it has something proper to itself above the other sciences, inasmuch as it judges of them all, not only as to their conclusions, but also as to their first principles, therefore it is a more perfect virtue than science.

Reply to Objection 2. When the formal aspect of the object is referred to a power or habit by one same act, there is no distinction of habit or power in respect of the formal aspect and of the material object: thus it belongs to the same power of sight to see both color, and light, which is the formal aspect under which color is seen, and is seen at the same time as the color. On the other hand, the principles of a demonstration can be considered apart, without the conclusion being considered at all. Again they can be considered together with the conclusions, since the conclusions can be deduced from them. Accordingly, to consider the principles in this second way, belongs to science, which considers the conclusions also: while to consider the principles in themselves belongs to understanding.

Consequently, if we consider the point aright, these three virtues are distinct, not as being on a par with one another, but in a certain order. The same is to be observed in potential wholes, wherein one part is more perfect than another; for instance, the rational soul is more perfect than the sensitive soul; and the sensitive, than the vegetal. For it is thus that science depends on understanding as on a virtue of higher degree: and both of these depend on wisdom, as obtaining the highest place, and containing beneath itself both understanding and science, by judging both of the conclusions of science, and of the principles on which they are based.

Reply to Objection 3. As stated above (q. 55, Aa. 3,4), a virtuous habit has a fixed relation to good, and is nowise referable to evil. Now the good of the intellect is truth, and falsehood is its evil. Wherefore those habits alone are called intellectual virtues, whereby we tell the truth and never tell a falsehood. But opinion and suspicion can be about both truth and falsehood: and so, as stated in *Ethic.* vi, 3, they are not intellectual virtues.

Objection 1. It would seem that art is not an intellectual virtue. For Augustine says (*De Lib. Arb.* ii, 18,19) that “no one makes bad use of virtue.” But one may make bad use of art: for a craftsman can work badly according to the knowledge of his art. Therefore art is not a virtue.

Objection 2. Further, there is no virtue of a virtue. But “there is a virtue of art,” according to the Philosopher (*Ethic.* vi, 5). Therefore art is not a virtue.

Objection 3. Further, the liberal arts excel the mechanical arts. But just as the mechanical arts are practical, so the liberal arts are speculative. Therefore, if art were an intellectual virtue, it would have to be reckoned among the speculative virtues.

On the contrary, The Philosopher (*Ethic.* vi, 3,4) says that art is a virtue; and yet he does not reckon it among the speculative virtues, which, according to him, reside in the scientific part of the soul.

I answer that, Art is nothing else but “the right reason about certain works to be made.” And yet the good of these things depends, not on man’s appetitive faculty being affected in this or that way, but on the goodness of the work done. For a craftsman, as such, is commendable, not for the will with which he does a work, but for the quality of the work. Art, therefore, properly speaking, is an operative habit. And yet it has something in common with the speculative habits: since the quality of the object considered by the latter is a matter of concern to them also, but not how the human appetite may be affected towards that object. For as long as the geometrician demonstrates the truth, it matters not how his appetitive faculty may be affected, whether he be joyful or angry: even as neither does this matter in a craftsman, as we have observed. And so art has the nature of a virtue in the same way as the speculative habits, in so far, to wit, as neither art nor speculative habit makes a good work as regards the use of the habit, which is the

property of a virtue that perfects the appetite, but only as regards the aptness to work well.

Reply to Objection 1. When anyone endowed with an art produces bad workmanship, this is not the work of that art, in fact it is contrary to the art: even as when a man lies, while knowing the truth, his words are not in accord with his knowledge, but contrary thereto. Wherefore, just as science has always a relation to good, as stated above (a. 2, ad 3), so it is with art: and it is for this reason that it is called a virtue. And yet it falls short of being a perfect virtue, because it does not make its possessor to use it well; for which purpose something further is requisite: although there cannot be a good use without the art.

Reply to Objection 2. In order that man may make good use of the art he has, he needs a good will, which is perfected by moral virtue; and for this reason the Philosopher says that there is a virtue of art; namely, a moral virtue, in so far as the good use of art requires a moral virtue. For it is evident that a craftsman is inclined by justice, which rectifies his will, to do his work faithfully.

Reply to Objection 3. Even in speculative matters there is something by way of work: e.g. the making of a syllogism or of a fitting speech, or the work of counting or measuring. Hence whatever habits are ordained to such like works of the speculative reason, are, by a kind of comparison, called arts indeed, but “liberal” arts, in order to distinguish them from those arts that are ordained to works done by the body, which arts are, in a fashion, servile, inasmuch as the body is in servile subjection to the soul, and man, as regards his soul, is free [liber]. On the other hand, those sciences which are not ordained to any such like work, are called sciences simply, and not arts. Nor, if the liberal arts be more excellent, does it follow that the notion of art is more applicable to them.

Objection 1. It would seem that prudence is not a distinct virtue from art. For art is the right reason about certain works. But diversity of works does not make a habit cease to be an art; since there are various arts about works widely different. Since therefore prudence is also right reason about works, it seems that it too should be reckoned a virtue.

Objection 2. Further, prudence has more in common with art than the speculative habits have; for they are both “about contingent matters that may be otherwise than they are” (Ethic. vi, 4,5). Now some speculative habits are called arts. Much more, therefore, should prudence be called an art.

Objection 3. Further, it belongs to prudence, “to be of good counsel” (Ethic. vi, 5). But counselling takes place in certain arts also, as stated in Ethic. iii, 3, e.g. in the arts of warfare, of seamanship, and of medicine. Therefore prudence is not distinct from art.

On the contrary, The Philosopher distinguishes prudence from art (Ethic. vi, 5).

I answer that, Where the nature of virtue differs, there is a different kind of virtue. Now it has been stated above (a. 1; q. 56, a. 3) that some habits have the nature of virtue, through merely conferring aptness for a good work: while some habits are virtues, not only through conferring aptness for a good work, but also through conferring the use. But art confers the mere aptness for good work; since it does not regard the appetite; whereas prudence confers not only aptness for a good work, but also the use: for it regards the appetite, since it presupposes the rectitude thereof.

The reason for this difference is that art is the “right reason of things to be made”; whereas prudence is the “right reason of things to be done.” Now “making” and “doing” differ, as stated in Metaph. ix, text. 16, in that “making” is an action passing into outward matter, e.g. “to build,” “to saw,” and so forth; whereas “doing” is an action abiding in the agent, e.g. “to see,” “to will,” and the like. Accordingly prudence stands in the same relation to such like human actions, consisting in the use of powers and habits, as art does to outward making: since each is the perfect reason about the things with

which it is concerned. But perfection and rectitude of reason in speculative matters, depend on the principles from which reason argues; just as we have said above (a. 2, ad 2) that science depends on and presupposes understanding, which is the habit of principles. Now in human acts the end is what the principles are in speculative matters, as stated in Ethic. vii, 8. Consequently, it is requisite for prudence, which is right reason about things to be done, that man be well disposed with regard to the ends: and this depends on the rectitude of his appetite. Wherefore, for prudence there is need of a moral virtue, which rectifies the appetite. On the other hand the good things made by art is not the good of man’s appetite, but the good of those things themselves: wherefore art does not presuppose rectitude of the appetite. The consequence is that more praise is given to a craftsman who is at fault willingly, than to one who is unwillingly; whereas it is more contrary to prudence to sin willingly than unwillingly, since rectitude of the will is essential to prudence, but not to art. Accordingly it is evident that prudence is a virtue distinct from art.

Reply to Objection 1. The various kinds of things made by art are all external to man: hence they do not cause a different kind of virtue. But prudence is right reason about human acts themselves: hence it is a distinct kind of virtue, as stated above.

Reply to Objection 2. Prudence has more in common with art than a speculative habit has, if we consider their subject and matter: for they are both in the thinking part of the soul, and about things that may be otherwise than they are. But if we consider them as virtues, then art has more in common with the speculative habits, as is clear from what has been said.

Reply to Objection 3. Prudence is of good counsel about matters regarding man’s entire life, and the end of human life. But in some arts there is counsel about matters concerning the ends proper to those arts. Hence some men, in so far as they are good counselors in matters of warfare, or seamanship, are said to be prudent officers or pilots, but not simply prudent: only those are simply prudent who give good counsel about all the concerns of life.

Objection 1. It would seem that prudence is not a virtue necessary to lead a good life. For as art is to things that are made, of which it is the right reason, so is prudence to things that are done, in respect of which we judge of a man's life: for prudence is the right reason about these things, as stated in *Ethic.* vi, 5. Now art is not necessary in things that are made, save in order that they be made, but not after they have been made. Neither, therefore is prudence necessary to man in order to lead a good life, after he has become virtuous; but perhaps only in order that he may become virtuous.

Objection 2. Further, "It is by prudence that we are of good counsel," as stated in *Ethic.* vi, 5. But man can act not only from his own, but also from another's good counsel. Therefore man does not need prudence in order to lead a good life, but it is enough that he follow the counsels of prudent men.

Objection 3. Further, an intellectual virtue is one by which one always tells the truth, and never a falsehood. But this does not seem to be the case with prudence: for it is not human never to err in taking counsel about what is to be done; since human actions are about things that may be otherwise than they are. Hence it is written (*Wis.* 9:14): "The thoughts of mortal men are fearful, and our counsels uncertain." Therefore it seems that prudence should not be reckoned an intellectual virtue.

On the contrary, It is reckoned with other virtues necessary for human life, when it is written (*Wis.* 8:7) of Divine Wisdom: "She teacheth temperance and prudence and justice and fortitude, which are such things as men can have nothing more profitable in life."

I answer that, Prudence is a virtue most necessary for human life. For a good life consists in good deeds. Now in order to do good deeds, it matters not only what a man does, but also how he does it; to wit, that he do it from right choice and not merely from impulse or passion. And, since choice is about things in reference to the end, rectitude of choice requires two things: namely, the due end, and something suitably ordained to that due end. Now man is suitably directed to his due end by a virtue which perfects the soul in the appetitive part, the object of which is the good and the end. And to that which is suitably ordained to the due end man needs to be rightly disposed by a habit in his reason, because counsel and choice, which are about things ordained to the end, are acts of the reason. Consequently an intellectual virtue is needed in the reason, to perfect the reason, and make it suitably affected towards things ordained to the end; and this virtue is prudence. Con-

sequently prudence is a virtue necessary to lead a good life.

Reply to Objection 1. The good of an art is to be found, not in the craftsman, but in the product of the art, since art is right reason about things to be made: for since the making of a thing passes into external matter, it is a perfection not of the maker, but of the thing made, even as movement is the act of the thing moved: and art is concerned with the making of things. On the other hand, the good of prudence is in the active principle, whose activity is its perfection: for prudence is right reason about things to be done, as stated above (a. 4). Consequently art does not require of the craftsman that his act be a good act, but that his work be good. Rather would it be necessary for the thing made to act well (e.g. that a knife should carve well, or that a saw should cut well), if it were proper to such things to act, rather than to be acted on, because they have not dominion over their actions. Wherefore the craftsman needs art, not that he may live well, but that he may produce a good work of art, and have it in good keeping: whereas prudence is necessary to man, that he may lead a good life, and not merely that he may be a good man.

Reply to Objection 2. When a man does a good deed, not of his own counsel, but moved by that of another, his deed is not yet quite perfect, as regards his reason in directing him and his appetite in moving him. Wherefore, if he do a good deed, he does not do well simply; and yet this is required in order that he may lead a good life.

Reply to Objection 3. As stated in *Ethic.* vi, 2, truth is not the same for the practical as for the speculative intellect. Because the truth of the speculative intellect depends on conformity between the intellect and the thing. And since the intellect cannot be infallibly in conformity with things in contingent matters, but only in necessary matters, therefore no speculative habit about contingent things is an intellectual virtue, but only such as is about necessary things. On the other hand, the truth of the practical intellect depends on conformity with right appetite. This conformity has no place in necessary matters, which are not affected by the human will; but only in contingent matters which can be effected by us, whether they be matters of interior action, or the products of external work. Hence it is only about contingent matters that an intellectual virtue is assigned to the practical intellect, viz. art, as regards things to be made, and prudence, as regards things to be done.

Objection 1. It would seem that “*euboulia*, *synesis*, and *gnome*” are unfittingly assigned as virtues annexed to prudence. For “*euboulia*” is “a habit whereby we take good counsel” (Ethic. vi, 9). Now it “belongs to prudence to take good counsel,” as stated (Ethic. vi, 9). Therefore “*euboulia*” is not a virtue annexed to prudence, but rather is prudence itself.

Objection 2. Further, it belongs to the higher to judge the lower. The highest virtue would therefore seem to be the one whose act is judgment. Now “*synesis*” enables us to judge well. Therefore “*synesis*” is not a virtue annexed to prudence, but rather is a principal virtue.

Objection 3. Further, just as there are various matters to pass judgment on, so are there different points on which one has to take counsel. But there is one virtue referring to all matters of counsel. Therefore, in order to judge well of what has to be done, there is no need, besides “*synesis*” of the virtue of “*gnome*.”

Objection 4. Further, Cicero (De Invent. Rhet. iii) mentions three other parts of prudence; viz. “memory of the past, understanding of the present, and foresight of the future.” Moreover, Macrobius (Super Somn. Scip. 1) mentions yet others: viz. “caution, docility,” and the like. Therefore it seems that the above are not the only virtues annexed to prudence.

On the contrary, stands the authority of the Philosopher (Ethic. vi, 9,10,11), who assigns these three virtues as being annexed to prudence.

I answer that, Wherever several powers are subordinate to one another, that power is the highest which is ordained to the highest act. Now there are three acts of reason in respect of anything done by man: the first of these is counsel; the second, judgment; the third, command. The first two correspond to those acts of the speculative intellect, which are inquiry and judgment, for counsel is a kind of inquiry: but the third is proper to the practical intellect, in so far as this is ordained to operation; for reason does not have to command in things that man cannot do. Now it is evident that in things done by man, the chief act is that of command, to which all the rest are subordinate. Consequently, that virtue which perfects the command, viz. prudence, as obtaining the highest place, has other secondary virtues annexed to it,

viz. “*eustochia*,” which perfects counsel; and “*synesis*” and “*gnome*,” which are parts of prudence in relation to judgment, and of whose distinction we shall speak further on (ad 3).

Reply to Objection 1. Prudence makes us be of good counsel, not as though its immediate act consisted in being of good counsel, but because it perfects the latter act by means of a subordinate virtue, viz. “*euboulia*.”

Reply to Objection 2. Judgment about what is to be done is directed to something further: for it may happen in some matter of action that a man’s judgment is sound, while his execution is wrong. The matter does not attain to its final complement until the reason has commanded aright in the point of what has to be done.

Reply to Objection 3. Judgment of anything should be based on that thing’s proper principles. But inquiry does not reach to the proper principles: because, if we were in possession of these, we should need no more to inquire, the truth would be already discovered. Hence only one virtue is directed to being of good counsel, whereas there are two virtues for good judgment: because difference is based not on common but on proper principles. Consequently, even in speculative matters, there is one science of dialectics, which inquires about all matters; whereas demonstrative sciences, which pronounce judgment, differ according to their different objects. “*Synesis*” and “*gnome*” differ in respect of the different rules on which judgment is based: for “*synesis*” judges of actions according to the common law; while “*gnome*” bases its judgment on the natural law, in those cases where the common law fails to apply, as we shall explain further on (Ia IIae, q. 51, a. 4).

Reply to Objection 4. Memory, understanding and foresight, as also caution and docility and the like, are not virtues distinct from prudence: but are, as it were, integral parts thereof, in so far as they are all requisite for perfect prudence. There are, moreover, subjective parts or species of prudence, e.g. domestic and political economy, and the like. But the three first names are, in a fashion, potential parts of prudence; because they are subordinate thereto, as secondary virtues to a principal virtue: and we shall speak of them later (Ia IIae, q. 48, seqq.).

* *euboulia*, *synesis*, *gnome*

FIRST PART OF THE SECOND PART, QUESTION 58

Of the Difference Between Moral and Intellectual Virtues

(In Five Articles)

We must now consider moral virtues. We shall speak (1) of the difference between them and intellectual virtues; (2) of their distinction, one from another, in respect of their proper matter; (3) of the difference between the chief or cardinal virtues and the others.

Under the first head there are five points of inquiry:

- (1) Whether every virtue is a moral virtue?
- (2) Whether moral virtue differs from intellectual virtue?
- (3) Whether virtue is adequately divided into moral and intellectual virtue?
- (4) Whether there can be moral without intellectual virtue?
- (5) Whether, on the other hand, there can be intellectual without moral virtue?

Whether every virtue is a moral virtue?

Ia IIae q. 58 a. 1

Objection 1. It would seem that every virtue is a moral virtue. Because moral virtue is so called from the Latin “mos,” i.e. custom. Now, we can accustom ourselves to the acts of all the virtues. Therefore every virtue is a moral virtue.

Objection 2. Further, the Philosopher says (Ethic. ii, 6) that moral virtue is “a habit of choosing the rational mean.” But every virtue is a habit of choosing: since the acts of any virtue can be done from choice. And, moreover, every virtue consists in following the rational mean in some way, as we shall explain further on (q. 64, Aa. 1,2,3). Therefore every virtue is a moral virtue.

Objection 3. Further, Cicero says (De Invent. Rhet. ii) that “virtue is a habit like a second nature, in accord with reason.” But since every human virtue is directed to man’s good, it must be in accord with reason: since man’s good “consists in that which agrees with his reason,” as Dionysius states (Div. Nom. iv). Therefore every virtue is a moral virtue.

On the contrary, The Philosopher (Ethic. i, 13): “When we speak of a man’s morals, we do not say that he is wise or intelligent, but that he is gentle or sober.” Accordingly, then, wisdom and understanding are not moral virtues: and yet they are virtues, as stated above (q. 57, a. 2). Therefore not every virtue is a moral virtue.

I answer that, In order to answer this question clearly, we must consider the meaning of the Latin word “mos”; for thus we shall be able to discover what a “moral” virtue is. Now “mos” has a twofold meaning. For sometimes it means custom, in which sense we read (Acts 15:1): “Except you be circumcised after the manner (morem) of Moses, you cannot be saved.” Sometimes it means a natural or quasi-natural inclination to do some particular action, in which sense the word is applied to dumb animals. Thus we read (2 Macc. 1:2)

that “rushing violently upon the enemy, like lions*, they slew them”: and the word is used in the same sense in Ps. 67:7, where we read: “Who maketh men of one manner [moris] to dwell in a house.” For both these significations there is but one word in Latin; but in the Greek there is a distinct word for each, for the word “ethos” is written sometimes with a long, and sometimes a short “e”.

Now “moral” virtue is so called from “mos” in the sense of a natural or quasi-natural inclination to do some particular action. And the other meaning of “mos,” i.e. “custom,” is akin to this: because custom becomes a second nature, and produces an inclination similar to a natural one. But it is evident that inclination to an action belongs properly to the appetitive power, whose function it is to move all the powers to their acts, as explained above (q. 9, a. 1). Therefore not every virtue is a moral virtue, but only those that are in the appetitive faculty.

Reply to Objection 1. This argument takes “mos” in the sense of “custom.”

Reply to Objection 2. Every act of virtue can be done from choice: but no virtue makes us choose aright, save that which is in the appetitive part of the soul: for it has been stated above that choice is an act of the appetitive faculty (q. 13, a. 1). Wherefore a habit of choosing, i.e. a habit which is the principle whereby we choose, is that habit alone which perfects the appetitive faculty: although the acts of other habits also may be a matter of choice.

Reply to Objection 3. “Nature is the principle of movement” (Phys. ii, text. 3). Now to move the faculties to act is the proper function of the appetitive power. Consequently to become as a second nature by consenting to the reason, is proper to those virtues which are in the appetitive faculty.

* Leonum more, i.e. as lions are in the habit of doing

Objection 1. It would seem that moral virtue does not differ from intellectual virtue. For Augustine says (De Civ. Dei iv, 21) “that virtue is the art of right conduct.” But art is an intellectual virtue. Therefore moral and intellectual virtue do not differ.

Objection 2. Further, some authors put science in the definition of virtues: thus some define perseverance as a “science or habit regarding those things to which we should hold or not hold”; and holiness as “a science which makes man to be faithful and to do his duty to God.” Now science is an intellectual virtue. Therefore moral virtue should not be distinguished from intellectual virtue.

Objection 3. Further, Augustine says (Soliloq. i, 6) that “virtue is the rectitude and perfection of reason.” But this belongs to the intellectual virtues, as stated in Ethic. vi, 13. Therefore moral virtue does not differ from intellectual.

Objection 4. Further, a thing does not differ from that which is included in its definition. But intellectual virtue is included in the definition of moral virtue: for the Philosopher says (Ethic. ii, 6) that “moral virtue is a habit of choosing the mean appointed by reason as a prudent man would appoint it.” Now this right reason that fixes the mean of moral virtue, belongs to an intellectual virtue, as stated in Ethic. vi, 13. Therefore moral virtue does not differ from intellectual.

On the contrary, It is stated in Ethic. i, 13 that “there are two kinds of virtue: some we call intellectual; some moral.”

I answer that, Reason is the first principle of all human acts; and whatever other principles of human acts may be found, they obey reason somewhat, but in various ways. For some obey reason blindly and without any contradiction whatever: such are the limbs of the body, provided they be in a healthy condition, for as soon as reason commands, the hand or the foot proceeds to action. Hence the Philosopher says (Polit. i, 3) that “the soul rules the body like a despot,” i.e. as a master rules his slave, who has no right to rebel. Accordingly some held that all the active principles in man are subordinate to reason in this way. If this were true, for man to act well it would suffice that his reason be perfect. Consequently, since virtue is a habit perfecting man in view of his doing good actions, it would follow that it is only in the reason, so that there would be none but intellectual virtues. This was the opinion of Socrates,

who said “every virtue is a kind of prudence,” as stated in Ethic. vi, 13. Hence he maintained that as long as man is in possession of knowledge, he cannot sin; and that every one who sins, does so through ignorance.

Now this is based on a false supposition. Because the appetitive faculty obeys the reason, not blindly, but with a certain power of opposition; wherefore the Philosopher says (Polit. i, 3) that “reason commands the appetitive faculty by a politic power,” whereby a man rules over subjects that are free, having a certain right of opposition. Hence Augustine says on Ps. 118 (Serm. 8) that “sometimes we understand [what is right] while desire is slow, or follows not at all,” in so far as the habits or passions of the appetitive faculty cause the use of reason to be impeded in some particular action. And in this way, there is some truth in the saying of Socrates that so long as a man is in possession of knowledge he does not sin: provided, however, that this knowledge is made to include the use of reason in this individual act of choice.

Accordingly for a man to do a good deed, it is requisite not only that his reason be well disposed by means of a habit of intellectual virtue; but also that his appetite be well disposed by means of a habit of moral virtue. And so moral differs from intellectual virtue, even as the appetite differs from the reason. Hence just as the appetite is the principle of human acts, in so far as it partakes of reason, so are moral habits to be considered virtues in so far as they are in conformity with reason.

Reply to Objection 1. Augustine usually applies the term “art” to any form of right reason; in which sense art includes prudence which is the right reason about things to be done, even as art is the right reason about things to be made. Accordingly, when he says that “virtue is the art of right conduct,” this applies to prudence essentially; but to other virtues, by participation, for as much as they are directed by prudence.

Reply to Objection 2. All such definitions, by whomsoever given, were based on the Socratic theory, and should be explained according to what we have said about art (ad 1).

The same applies to the Third Objection.

Reply to Objection 4. Right reason which is in accord with prudence is included in the definition of moral virtue, not as part of its essence, but as something belonging by way of participation to all the moral virtues, in so far as they are all under the direction of prudence.

Objection 1. It would seem that virtue is not adequately divided into moral and intellectual. For prudence seems to be a mean between moral and intellectual virtue, since it is reckoned among the intellectual virtues (Ethic. vi, 3,5); and again is placed by all among

the four cardinal virtues, which are moral virtues, as we shall show further on (q. 61, a. 1). Therefore virtue is not adequately divided into intellectual and moral, as though there were no mean between them.

Objection 2. Further, contingency, perseverance,

and patience are not reckoned to be intellectual virtues. Yet neither are they moral virtues; since they do not reduce the passions to a mean, and are consistent with an abundance of passion. Therefore virtue is not adequately divided into intellectual and moral.

Objection 3. Further, faith, hope, and charity are virtues. Yet they are not intellectual virtues: for there are only five of these, viz. science, wisdom, understanding, prudence, and art, as stated above (q. 57, Aa. 2, 3, 5). Neither are they moral virtues; since they are not about the passions, which are the chief concern of moral virtue. Therefore virtue is not adequately divided into intellectual and moral.

On the contrary, The Philosopher says (Ethic. ii, 1) that “virtue is twofold, intellectual and moral.”

I answer that, Human virtue is a habit perfecting man in view of his doing good deeds. Now, in man there are but two principles of human actions, viz. the intellect or reason and the appetite: for these are the two principles of movement in man as stated in De Anima iii, text. 48. Consequently every human virtue must needs be a perfection of one of these principles. Accordingly if it perfects man’s speculative or practical intellect in order that his deed may be good, it will be an intellectual virtue: whereas if it perfects his appetite, it will be a moral virtue. It follows therefore that every human virtue is either intellectual or moral.

Reply to Objection 1. Prudence is essentially an intellectual virtue. But considered on the part of its matter, it has something in common with the moral virtues: for it is right reason about things to be done, as stated above (q. 57, a. 4). It is in this sense that it is reckoned

with the moral virtues.

Reply to Objection 2. Contingency and perseverance are not perfections of the sensitive appetite. This is clear from the fact that passions abound in the continent and persevering man, which would not be the case if his sensitive appetite were perfected by a habit making it conformable to reason. Contingency and perseverance are, however, perfections of the rational faculty, and withstand the passions lest reason be led astray. But they fall short of being virtues: since intellectual virtue, which makes reason to hold itself well in respect of moral matters, presupposes a right appetite of the end, so that it may hold itself aright in respect of principles, i.e. the ends, on which it builds its argument: and this is wanting in the continent and persevering man. Nor again can an action proceeding from two principles be perfect, unless each principle be perfected by the habit corresponding to that operation: thus, however perfect be the principal agent employing an instrument, it will produce an imperfect effect, if the instrument be not well disposed also. Hence if the sensitive faculty, which is moved by the rational faculty, is not perfect; however perfect the rational faculty may be, the resulting action will be imperfect: and consequently the principle of that action will not be a virtue. And for this reason, contingency, desisting from pleasures, and perseverance in the midst of pains, are not virtues, but something less than a virtue, as the Philosopher maintains (Ethic. vii, 1, 9).

Reply to Objection 3. Faith, hope, and charity are superhuman virtues: for they are virtues of man as sharing in the grace of God.

Whether there can be moral without intellectual virtue?

Ia IIae q. 58 a. 4

Objection 1. It would seem that moral can be without intellectual virtue. Because moral virtue, as Cicero says (De Invent. Rhet. ii) is “a habit like a second nature in accord with reason.” Now though nature may be in accord with some sovereign reason that moves it, there is no need for that reason to be united to nature in the same subject, as is evident of natural things devoid of knowledge. Therefore in a man there may be a moral virtue like a second nature, inclining him to consent to his reason, without his reason being perfected by an intellectual virtue.

Objection 2. Further, by means of intellectual virtue man obtains perfect use of reason. But it happens at times that men are virtuous and acceptable to God, without being vigorous in the use of reason. Therefore it seems that moral virtue can be without intellectual.

Objection 3. Further moral virtue makes us inclined to do good works. But some, without depending on the judgment of reason, have a natural inclination to do good works. Therefore moral virtues can be without intellectual virtues.

On the contrary, Gregory says (Moral. xxii) that

“the other virtues, unless we do prudently what we desire to do, cannot be real virtues.” But prudence is an intellectual virtue, as stated above (q. 57, a. 5). Therefore moral virtues cannot be without intellectual virtues.

I answer that, Moral virtue can be without some of the intellectual virtues, viz. wisdom, science, and art; but not without understanding and prudence. Moral virtue cannot be without prudence, because it is a habit of choosing, i.e. making us choose well. Now in order that a choice be good, two things are required. First, that the intention be directed to a due end; and this is done by moral virtue, which inclines the appetitive faculty to the good that is in accord with reason, which is a due end. Secondly, that man take rightly those things which have reference to the end: and this he cannot do unless his reason counsel, judge and command aright, which is the function of prudence and the virtues annexed to it, as stated above (q. 57, Aa. 5, 6). Wherefore there can be no moral virtue without prudence: and consequently neither can there be without understanding. For it is by the virtue of understanding that we know self-evident principles both in speculative and in

practical matters. Consequently just as right reason in speculative matters, in so far as it proceeds from naturally known principles, presupposes the understanding of those principles, so also does prudence, which is the right reason about things to be done.

Reply to Objection 1. The inclination of nature in things devoid of reason is without choice: wherefore such an inclination does not of necessity require reason. But the inclination of moral virtue is with choice: and consequently in order that it may be perfect it requires that reason be perfected by intellectual virtue.

Reply to Objection 2. A man may be virtuous without having full use of reason as to everything, provided he have it with regard to those things which have to be done virtuously. In this way all virtuous men have full use of reason. Hence those who seem to be simple, through lack of worldly cunning, may possibly be pru-

dent, according to Mat. 10:16: "Be ye therefore prudent [Douay: 'wise'] as serpents, and simple as doves."

Reply to Objection 3. The natural inclination to a good of virtue is a kind of beginning of virtue, but is not perfect virtue. For the stronger this inclination is, the more perilous may it prove to be, unless it be accompanied by right reason, which rectifies the choice of fitting means towards the due end. Thus if a running horse be blind, the faster it runs the more heavily will it fall, and the more grievously will it be hurt. And consequently, although moral virtue be not right reason, as Socrates held, yet not only is it "according to right reason," in so far as it inclines man to that which is, according to right reason, as the Platonists maintained*; but also it needs to be "joined with right reason," as Aristotle declares (Ethic. vi, 13).

Whether there can be intellectual without moral virtue?

Ia IIae q. 58 a. 5

Objection 1. It would seem that there can be intellectual without moral virtue. Because perfection of what precedes does not depend on the perfection of what follows. Now reason precedes and moves the sensitive appetite. Therefore intellectual virtue, which is a perfection of the reason, does not depend on moral virtue, which is a perfection of the appetitive faculty; and can be without it.

Objection 2. Further, morals are the matter of prudence, even as things makeable are the matter of art. Now art can be without its proper matter, as a smith without iron. Therefore prudence can be without the moral virtue, although of all the intellectual virtues, it seems most akin to the moral virtues.

Objection 3. Further, prudence is "a virtue whereby we are of good counsel" (Ethic. vi, 9). Now many are of good counsel without having the moral virtues. Therefore prudence can be without a moral virtue.

On the contrary, To wish to do evil is directly opposed to moral virtue; and yet it is not opposed to anything that can be without moral virtue. Now it is contrary to prudence "to sin willingly" (Ethic. vi, 5). Therefore prudence cannot be without moral virtue.

I answer that, Other intellectual virtues can, but prudence cannot, be without moral virtue. The reason for this is that prudence is the right reason about things to be done (and this, not merely in general, but also in particular); about which things actions are. Now right reason demands principles from which reason proceeds to argue. And when reason argues about particular cases, it needs not only universal but also particular principles. As to universal principles of action, man is rightly disposed by the natural understanding of principles, whereby he understands that he should do no evil; or again by some practical science. But this is not enough in order that man may reason aright about particular cases. For it happens sometimes that

the aforesaid universal principle, known by means of understanding or science, is destroyed in a particular case by a passion: thus to one who is swayed by concupiscence, when he is overcome thereby, the object of his desire seems good, although it is opposed to the universal judgment of his reason. Consequently, as by the habit of natural understanding or of science, man is made to be rightly disposed in regard to the universal principles of action; so, in order that he be rightly disposed with regard to the particular principles of action, viz. the ends, he needs to be perfected by certain habits, whereby it becomes connatural, as it were, to man to judge aright to the end. This is done by moral virtue: for the virtuous man judges aright of the end of virtue, because "such a man is, such does the end seem to him" (Ethic. iii, 5). Consequently the right reason about things to be done, viz. prudence, requires man to have moral virtue.

Reply to Objection 1. Reason, as apprehending the end, precedes the appetite for the end: but appetite for the end precedes the reason, as arguing about the choice of the means, which is the concern of prudence. Even so, in speculative matters the understanding of principles is the foundation on which the syllogism of the reason is based.

Reply to Objection 2. It does not depend on the disposition of our appetite whether we judge well or ill of the principles of art, as it does, when we judge of the end which is the principle in moral matters: in the former case our judgment depends on reason alone. Hence art does not require a virtue perfecting the appetite, as prudence does.

Reply to Objection 3. Prudence not only helps us to be of good counsel, but also to judge and command well. This is not possible unless the impediment of the passions, destroying the judgment and command of prudence, be removed; and this is done by moral virtue.

* Cf. Plato, Meno xli.

Objection 1. It would seem that every virtue is a moral virtue. Because moral virtue is so called from the Latin “mos,” i.e. custom. Now, we can accustom ourselves to the acts of all the virtues. Therefore every virtue is a moral virtue.

Objection 2. Further, the Philosopher says (*Ethic.* ii, 6) that moral virtue is “a habit of choosing the rational mean.” But every virtue is a habit of choosing: since the acts of any virtue can be done from choice. And, moreover, every virtue consists in following the rational mean in some way, as we shall explain further on (q. 64, Aa. 1,2,3). Therefore every virtue is a moral virtue.

Objection 3. Further, Cicero says (*De Invent. Rhet.* ii) that “virtue is a habit like a second nature, in accord with reason.” But since every human virtue is directed to man’s good, it must be in accord with reason: since man’s good “consists in that which agrees with his reason,” as Dionysius states (*Div. Nom.* iv). Therefore every virtue is a moral virtue.

On the contrary, The Philosopher (*Ethic.* i, 13): “When we speak of a man’s morals, we do not say that he is wise or intelligent, but that he is gentle or sober.” Accordingly, then, wisdom and understanding are not moral virtues: and yet they are virtues, as stated above (q. 57, a. 2). Therefore not every virtue is a moral virtue.

I answer that, In order to answer this question clearly, we must consider the meaning of the Latin word “mos”; for thus we shall be able to discover what a “moral” virtue is. Now “mos” has a twofold meaning. For sometimes it means custom, in which sense we read (*Acts* 15:1): “Except you be circumcised after the manner (morem) of Moses, you cannot be saved.” Sometimes it means a natural or quasi-natural inclination to do some particular action, in which sense the word is applied to dumb animals. Thus we read (*2 Macc.* 1:2)

that “rushing violently upon the enemy, like lions*, they slew them”: and the word is used in the same sense in *Ps.* 67:7, where we read: “Who maketh men of one manner [moris] to dwell in a house.” For both these significations there is but one word in Latin; but in the Greek there is a distinct word for each, for the word “ethos” is written sometimes with a long, and sometimes a short “e”.

Now “moral” virtue is so called from “mos” in the sense of a natural or quasi-natural inclination to do some particular action. And the other meaning of “mos,” i.e. “custom,” is akin to this: because custom becomes a second nature, and produces an inclination similar to a natural one. But it is evident that inclination to an action belongs properly to the appetitive power, whose function it is to move all the powers to their acts, as explained above (q. 9, a. 1). Therefore not every virtue is a moral virtue, but only those that are in the appetitive faculty.

Reply to Objection 1. This argument takes “mos” in the sense of “custom.”

Reply to Objection 2. Every act of virtue can be done from choice: but no virtue makes us choose aright, save that which is in the appetitive part of the soul: for it has been stated above that choice is an act of the appetitive faculty (q. 13, a. 1). Wherefore a habit of choosing, i.e. a habit which is the principle whereby we choose, is that habit alone which perfects the appetitive faculty: although the acts of other habits also may be a matter of choice.

Reply to Objection 3. “Nature is the principle of movement” (*Phys.* ii, text. 3). Now to move the faculties to act is the proper function of the appetitive power. Consequently to become as a second nature by consenting to the reason, is proper to those virtues which are in the appetitive faculty.

* Leonum more, i.e. as lions are in the habit of doing

Objection 1. It would seem that moral virtue does not differ from intellectual virtue. For Augustine says (De Civ. Dei iv, 21) “that virtue is the art of right conduct.” But art is an intellectual virtue. Therefore moral and intellectual virtue do not differ.

Objection 2. Further, some authors put science in the definition of virtues: thus some define perseverance as a “science or habit regarding those things to which we should hold or not hold”; and holiness as “a science which makes man to be faithful and to do his duty to God.” Now science is an intellectual virtue. Therefore moral virtue should not be distinguished from intellectual virtue.

Objection 3. Further, Augustine says (Soliloq. i, 6) that “virtue is the rectitude and perfection of reason.” But this belongs to the intellectual virtues, as stated in Ethic. vi, 13. Therefore moral virtue does not differ from intellectual.

Objection 4. Further, a thing does not differ from that which is included in its definition. But intellectual virtue is included in the definition of moral virtue: for the Philosopher says (Ethic. ii, 6) that “moral virtue is a habit of choosing the mean appointed by reason as a prudent man would appoint it.” Now this right reason that fixes the mean of moral virtue, belongs to an intellectual virtue, as stated in Ethic. vi, 13. Therefore moral virtue does not differ from intellectual.

On the contrary, It is stated in Ethic. i, 13 that “there are two kinds of virtue: some we call intellectual; some moral.”

I answer that, Reason is the first principle of all human acts; and whatever other principles of human acts may be found, they obey reason somewhat, but in various ways. For some obey reason blindly and without any contradiction whatever: such are the limbs of the body, provided they be in a healthy condition, for as soon as reason commands, the hand or the foot proceeds to action. Hence the Philosopher says (Polit. i, 3) that “the soul rules the body like a despot,” i.e. as a master rules his slave, who has no right to rebel. Accordingly some held that all the active principles in man are subordinate to reason in this way. If this were true, for man to act well it would suffice that his reason be perfect. Consequently, since virtue is a habit perfecting man in view of his doing good actions, it would follow that it is only in the reason, so that there would be none but intellectual virtues. This was the opinion of Socrates,

who said “every virtue is a kind of prudence,” as stated in Ethic. vi, 13. Hence he maintained that as long as man is in possession of knowledge, he cannot sin; and that every one who sins, does so through ignorance.

Now this is based on a false supposition. Because the appetitive faculty obeys the reason, not blindly, but with a certain power of opposition; wherefore the Philosopher says (Polit. i, 3) that “reason commands the appetitive faculty by a politic power,” whereby a man rules over subjects that are free, having a certain right of opposition. Hence Augustine says on Ps. 118 (Serm. 8) that “sometimes we understand [what is right] while desire is slow, or follows not at all,” in so far as the habits or passions of the appetitive faculty cause the use of reason to be impeded in some particular action. And in this way, there is some truth in the saying of Socrates that so long as a man is in possession of knowledge he does not sin: provided, however, that this knowledge is made to include the use of reason in this individual act of choice.

Accordingly for a man to do a good deed, it is requisite not only that his reason be well disposed by means of a habit of intellectual virtue; but also that his appetite be well disposed by means of a habit of moral virtue. And so moral differs from intellectual virtue, even as the appetite differs from the reason. Hence just as the appetite is the principle of human acts, in so far as it partakes of reason, so are moral habits to be considered virtues in so far as they are in conformity with reason.

Reply to Objection 1. Augustine usually applies the term “art” to any form of right reason; in which sense art includes prudence which is the right reason about things to be done, even as art is the right reason about things to be made. Accordingly, when he says that “virtue is the art of right conduct,” this applies to prudence essentially; but to other virtues, by participation, for as much as they are directed by prudence.

Reply to Objection 2. All such definitions, by whomsoever given, were based on the Socratic theory, and should be explained according to what we have said about art (ad 1).

The same applies to the Third Objection.

Reply to Objection 4. Right reason which is in accord with prudence is included in the definition of moral virtue, not as part of its essence, but as something belonging by way of participation to all the moral virtues, in so far as they are all under the direction of prudence.

Objection 1. It would seem that virtue is not adequately divided into moral and intellectual. For prudence seems to be a mean between moral and intellectual virtue, since it is reckoned among the intellectual virtues (Ethic. vi, 3,5); and again is placed by all among the four cardinal virtues, which are moral virtues, as we shall show further on (q. 61, a. 1). Therefore virtue is not adequately divided into intellectual and moral, as though there were no mean between them.

Objection 2. Further, contingency, perseverance, and patience are not reckoned to be intellectual virtues. Yet neither are they moral virtues; since they do not reduce the passions to a mean, and are consistent with an abundance of passion. Therefore virtue is not adequately divided into intellectual and moral.

Objection 3. Further, faith, hope, and charity are virtues. Yet they are not intellectual virtues: for there are only five of these, viz. science, wisdom, understanding, prudence, and art, as stated above (q. 57, Aa. 2,3,5). Neither are they moral virtues; since they are not about the passions, which are the chief concern of moral virtue. Therefore virtue is not adequately divided into intellectual and moral.

On the contrary, The Philosopher says (Ethic. ii, 1) that “virtue is twofold, intellectual and moral.”

I answer that, Human virtue is a habit perfecting man in view of his doing good deeds. Now, in man there are but two principles of human actions, viz. the intellect or reason and the appetite: for these are the two principles of movement in man as stated in De Anima iii, text. 48. Consequently every human virtue must needs be a perfection of one of these principles. Accordingly if it perfects man’s speculative or practical intellect in order that his deed may be good, it will be an intellectual virtue: whereas if it perfects his appetite, it will be a moral virtue. It follows therefore that every human virtue is either intellectual or moral.

Reply to Objection 1. Prudence is essentially an intellectual virtue. But considered on the part of its matter, it has something in common with the moral virtues: for it is right reason about things to be done, as stated above (q. 57, a. 4). It is in this sense that it is reckoned with the moral virtues.

Reply to Objection 2. Contingency and perseverance are not perfections of the sensitive appetite. This is clear from the fact that passions abound in the continent and persevering man, which would not be the case if his sensitive appetite were perfected by a habit making it conformable to reason. Contingency and perseverance are, however, perfections of the rational faculty, and withstand the passions lest reason be led astray. But they fall short of being virtues: since intellectual virtue, which makes reason to hold itself well in respect of moral matters, presupposes a right appetite of the end, so that it may hold itself aright in respect of principles, i.e. the ends, on which it builds its argument: and this is wanting in the continent and persevering man. Nor again can an action proceeding from two principles be perfect, unless each principle be perfected by the habit corresponding to that operation: thus, however perfect be the principal agent employing an instrument, it will produce an imperfect effect, if the instrument be not well disposed also. Hence if the sensitive faculty, which is moved by the rational faculty, is not perfect; however perfect the rational faculty may be, the resulting action will be imperfect: and consequently the principle of that action will not be a virtue. And for this reason, contingency, desisting from pleasures, and perseverance in the midst of pains, are not virtues, but something less than a virtue, as the Philosopher maintains (Ethic. vii, 1,9).

Reply to Objection 3. Faith, hope, and charity are superhuman virtues: for they are virtues of man as sharing in the grace of God.

Objection 1. It would seem that moral can be without intellectual virtue. Because moral virtue, as Cicero says (*De Invent. Rhet. ii*) is “a habit like a second nature in accord with reason.” Now though nature may be in accord with some sovereign reason that moves it, there is no need for that reason to be united to nature in the same subject, as is evident of natural things devoid of knowledge. Therefore in a man there may be a moral virtue like a second nature, inclining him to consent to his reason, without his reason being perfected by an intellectual virtue.

Objection 2. Further, by means of intellectual virtue man obtains perfect use of reason. But it happens at times that men are virtuous and acceptable to God, without being vigorous in the use of reason. Therefore it seems that moral virtue can be without intellectual.

Objection 3. Further moral virtue makes us inclined to do good works. But some, without depending on the judgment of reason, have a natural inclination to do good works. Therefore moral virtues can be without intellectual virtues.

On the contrary, Gregory says (*Moral. xxii*) that “the other virtues, unless we do prudently what we desire to do, cannot be real virtues.” But prudence is an intellectual virtue, as stated above (q. 57, a. 5). Therefore moral virtues cannot be without intellectual virtues.

I answer that, Moral virtue can be without some of the intellectual virtues, viz. wisdom, science, and art; but not without understanding and prudence. Moral virtue cannot be without prudence, because it is a habit of choosing, i.e. making us choose well. Now in order that a choice be good, two things are required. First, that the intention be directed to a due end; and this is done by moral virtue, which inclines the appetitive faculty to the good that is in accord with reason, which is a due end. Secondly, that man take rightly those things which have reference to the end: and this he cannot do unless his reason counsel, judge and command aright, which is the function of prudence and the virtues an-

nexed to it, as stated above (q. 57, Aa. 5,6). Wherefore there can be no moral virtue without prudence: and consequently neither can there be without understanding. For it is by the virtue of understanding that we know self-evident principles both in speculative and in practical matters. Consequently just as right reason in speculative matters, in so far as it proceeds from naturally known principles, presupposes the understanding of those principles, so also does prudence, which is the right reason about things to be done.

Reply to Objection 1. The inclination of nature in things devoid of reason is without choice: wherefore such an inclination does not of necessity require reason. But the inclination of moral virtue is with choice: and consequently in order that it may be perfect it requires that reason be perfected by intellectual virtue.

Reply to Objection 2. A man may be virtuous without having full use of reason as to everything, provided he have it with regard to those things which have to be done virtuously. In this way all virtuous men have full use of reason. Hence those who seem to be simple, through lack of worldly cunning, may possibly be prudent, according to *Mat. 10:16*: “Be ye therefore prudent [Douay: ‘wise’] as serpents, and simple as doves.”

Reply to Objection 3. The natural inclination to a good of virtue is a kind of beginning of virtue, but is not perfect virtue. For the stronger this inclination is, the more perilous may it prove to be, unless it be accompanied by right reason, which rectifies the choice of fitting means towards the due end. Thus if a running horse be blind, the faster it runs the more heavily will it fall, and the more grievously will it be hurt. And consequently, although moral virtue be not right reason, as Socrates held, yet not only is it “according to right reason,” in so far as it inclines man to that which is, according to right reason, as the Platonists maintained*; but also it needs to be “joined with right reason,” as Aristotle declares (*Ethic. vi, 13*).

* Cf. Plato, *Meno xli*.

Objection 1. It would seem that there can be intellectual without moral virtue. Because perfection of what precedes does not depend on the perfection of what follows. Now reason precedes and moves the sensitive appetite. Therefore intellectual virtue, which is a perfection of the reason, does not depend on moral virtue, which is a perfection of the appetitive faculty; and can be without it.

Objection 2. Further, morals are the matter of prudence, even as things makeable are the matter of art. Now art can be without its proper matter, as a smith without iron. Therefore prudence can be without the moral virtue, although of all the intellectual virtues, it seems most akin to the moral virtues.

Objection 3. Further, prudence is “a virtue whereby we are of good counsel” (Ethic. vi, 9). Now many are of good counsel without having the moral virtues. Therefore prudence can be without a moral virtue.

On the contrary, To wish to do evil is directly opposed to moral virtue; and yet it is not opposed to anything that can be without moral virtue. Now it is contrary to prudence “to sin willingly” (Ethic. vi, 5). Therefore prudence cannot be without moral virtue.

I answer that, Other intellectual virtues can, but prudence cannot, be without moral virtue. The reason for this is that prudence is the right reason about things to be done (and this, not merely in general, but also in particular); about which things actions are. Now right reason demands principles from which reason proceeds to argue. And when reason argues about particular cases, it needs not only universal but also particular principles. As to universal principles of action, man is rightly disposed by the natural understanding of principles, whereby he understands that he should do no evil; or again by some practical science. But this is not enough in order that man may reason aright about particular cases. For it happens sometimes that

the aforesaid universal principle, known by means of understanding or science, is destroyed in a particular case by a passion: thus to one who is swayed by concupiscence, when he is overcome thereby, the object of his desire seems good, although it is opposed to the universal judgment of his reason. Consequently, as by the habit of natural understanding or of science, man is made to be rightly disposed in regard to the universal principles of action; so, in order that he be rightly disposed with regard to the particular principles of action, viz. the ends, he needs to be perfected by certain habits, whereby it becomes connatural, as it were, to man to judge aright to the end. This is done by moral virtue: for the virtuous man judges aright of the end of virtue, because “such a man is, such does the end seem to him” (Ethic. iii, 5). Consequently the right reason about things to be done, viz. prudence, requires man to have moral virtue.

Reply to Objection 1. Reason, as apprehending the end, precedes the appetite for the end: but appetite for the end precedes the reason, as arguing about the choice of the means, which is the concern of prudence. Even so, in speculative matters the understanding of principles is the foundation on which the syllogism of the reason is based.

Reply to Objection 2. It does not depend on the disposition of our appetite whether we judge well or ill of the principles of art, as it does, when we judge of the end which is the principle in moral matters: in the former case our judgment depends on reason alone. Hence art does not require a virtue perfecting the appetite, as prudence does.

Reply to Objection 3. Prudence not only helps us to be of good counsel, but also to judge and command well. This is not possible unless the impediment of the passions, destroying the judgment and command of prudence, be removed; and this is done by moral virtue.

FIRST PART OF THE SECOND PART, QUESTION 59

Of Moral Virtue in Relation to the Passions (In Five Articles)

We must now consider the difference of one moral virtue from another. And since those moral virtues which are about the passions, differ accordingly to the difference of passions, we must consider (1) the relation of virtue to passion; (2) the different kinds of moral virtue in relation to the passions. Under the first head there are five points of inquiry:

- (1) Whether moral virtue is a passion?
- (2) Whether there can be moral virtue with passion?
- (3) Whether sorrow is compatible with moral virtue?
- (4) Whether every moral virtue is about a passion?
- (5) Whether there can be moral virtue without passion?

Whether moral virtue is a passion?

Ia IIae q. 59 a. 1

Objection 1. It would seem that moral virtue is a passion. Because the mean is of the same genus as the extremes. But moral virtue is a mean between two passions. Therefore moral virtue is a passion.

Objection 2. Further, virtue and vice, being contrary to one another, are in the same genus. But some passions are reckoned to be vices, such as envy and anger. Therefore some passions are virtues.

Objection 3. Further, pity is a passion, since it is sorrow for another's ills, as stated above (q. 35, a. 8). Now "Cicero the renowned orator did not hesitate to call pity a virtue," as Augustine states in *De Civ. Dei* ix, 5. Therefore a passion may be a moral virtue.

On the contrary, It is stated in *Ethic.* ii, 5 that "passions are neither virtues nor vices."

I answer that, Moral virtue cannot be a passion. This is clear for three reasons. First, because a passion is a movement of the sensitive appetite, as stated above (q. 22, a. 3): whereas moral virtue is not a movement, but rather a principle of the movement of the appetite, being a kind of habit. Secondly, because passions are not in themselves good or evil. For man's good or evil is something in reference to reason: wherefore the passions, considered in themselves, are referable both to good and evil, for as much as they may accord or discord with reason. Now nothing of this sort can be a virtue: since virtue is referable to good alone, as stated above (q. 55, a. 3). Thirdly, because, granted that some passions are, in some way, referable to good only, or

to evil only; even then the movement of passion, as passion, begins in the appetite, and ends in the reason, since the appetite tends to conformity with reason. On the other hand, the movement of virtue is the reverse, for it begins in the reason and ends in the appetite, inasmuch as the latter is moved by reason. Hence the definition of moral virtue (*Ethic.* ii, 6) states that it is "a habit of choosing the mean appointed by reason as a prudent man would appoint it."

Reply to Objection 1. Virtue is a mean between passions, not by reason of its essence, but on account of its effect; because, to wit, it establishes the mean between passions.

Reply to Objection 2. If by vice we understand a habit of doing evil deeds, it is evident that no passion is a vice. But if vice is taken to mean sin which is a vicious act, nothing hinders a passion from being a vice, or, on the other hand, from concurring in an act of virtue; in so far as a passion is either opposed to reason or in accordance with reason.

Reply to Objection 3. Pity is said to be a virtue, i.e. an act of virtue, in so far as "that movement of the soul is obedient to reason"; viz. "when pity is bestowed without violating right, as when the poor are relieved, or the penitent forgiven," as Augustine says (*De Civ. Dei* ix, 5). But if by pity we understand a habit perfecting man so that he bestows pity reasonably, nothing hinders pity, in this sense, from being a virtue. The same applies to similar passions.

Whether there can be moral virtue with passion?

Ia IIae q. 59 a. 2

Objection 1. It would seem that moral virtue cannot be with passion. For the Philosopher says (*Topic.* iv) that "a gentle man is one who is not passionate; but a patient man is one who is passionate but does not give way." The same applies to all the moral virtues. Therefore all moral virtues are without passion.

Objection 2. Further, virtue is a right affection of

the soul, as health is to the body, as stated *Phys.* vii, text. 17: wherefore "virtue is a kind of health of the soul," as Cicero says (*Quaest. Tusc.* iv). But the soul's passions are "the soul's diseases," as he says in the same book. Now health is incompatible with disease. Therefore neither is passion compatible with virtue.

Objection 3. Further, moral virtue requires perfect

use of reason even in particular matters. But the passions are an obstacle to this: for the Philosopher says (Ethic. vi, 5) that “pleasures destroy the judgment of prudence”: and Sallust says (Catilin.) that “when they,” i.e. the soul’s passions, “interfere, it is not easy for the mind to grasp the truth.” Therefore passion is incompatible with moral virtue.

On the contrary, Augustine says (De Civ. Dei xiv, 6): “If the will is perverse, these movements,” viz. the passions, “are perverse also: but if it is upright, they are not only blameless, but even praiseworthy.” But nothing praiseworthy is incompatible with moral virtue. Therefore moral virtue does not exclude the passions, but is consistent with them.

I answer that, The Stoics and Peripatetics disagreed on this point, as Augustine relates (De Civ. Dei ix, 4). For the Stoics held that the soul’s passions cannot be in a wise or virtuous man: whereas the Peripatetics, who were founded by Aristotle, as Augustine says (De Civ. Dei ix, 4), maintained that the passions are compatible with moral virtue, if they be reduced to the mean.

This difference, as Augustine observes (De Civ. Dei ix, 4), was one of words rather than of opinions. Because the Stoics, through not discriminating between the intellective appetite, i.e. the will, and the sensitive appetite, which is divided into irascible and concupiscible, did not, as the Peripatetics did, distinguish the passions from the other affections of the human soul, in the point of their being movements of the sensitive appetite, whereas the other emotions of the soul, which are not passions, are movements of the intellective appetite or will; but only in the point of the passions being, as they maintained, any emotions in disaccord with reason. These emotions could not be in a wise or virtuous man if they arose deliberately: while it would be possible for them to be in a wise man, if they arose suddenly: because, in the words of Aulus Gellius*, quoted by Augustine (De Civ. Dei ix, 4), “it is not in our power to

call up the visions of the soul, known as its fancies; and when they arise from awesome things, they must needs disturb the mind of a wise man, so that he is slightly startled by fear, or depressed with sorrow,” in so far as “these passions forestall the use of reason without his approving of such things or consenting thereto.”

Accordingly, if the passions be taken for inordinate emotions, they cannot be in a virtuous man, so that he consent to them deliberately; as the Stoics maintained. But if the passions be taken for any movements of the sensitive appetite, they can be in a virtuous man, in so far as they are subordinate to reason. Hence Aristotle says (Ethic. ii, 3) that “some describe virtue as being a kind of freedom from passion and disturbance; this is incorrect, because the assertion should be qualified”: they should have said virtue is freedom from those passions “that are not as they should be as to manner and time.”

Reply to Objection 1. The Philosopher quotes this, as well as many other examples in his books on Logic, in order to illustrate, not his own mind, but that of others. It was the opinion of the Stoics that the passions of the soul were incompatible with virtue: and the Philosopher rejects this opinion (Ethic. ii, 3), when he says that virtue is not freedom from passion. It may be said, however, that when he says “a gentle man is not passionate,” we are to understand this of inordinate passion.

Reply to Objection 2. This and all similar arguments which Tully brings forward in De Tusc. Quaest. iv take the passions in the execution of reason’s command.

Reply to Objection 3. When a passion forestalls the judgment of reason, so as to prevail on the mind to give its consent, it hinders counsel and the judgment of reason. But when it follows that judgment, as through being commanded by reason, it helps towards the execution of reason’s command.

Whether sorrow is compatible with moral virtue?

Ia IIae q. 59 a. 3

Objection 1. It would seem that sorrow is incompatible with virtue. Because the virtues are effects of wisdom, according to Wis. 8:7: “She,” i.e. Divine wisdom, “teacheth temperance, and prudence, and justice, and fortitude.” Now the “conversation” of wisdom “hath no bitterness,” as we read further on (verse 16). Therefore sorrow is incompatible with virtue also.

Objection 2. Further, sorrow is a hindrance to work, as the Philosopher states (Ethic. vii, 13; x, 5). But a hindrance to good works is incompatible with virtue. Therefore sorrow is incompatible with virtue.

Objection 3. Further, Tully calls sorrow a disease of the mind (De Tusc. Quaest. iv). But disease of the mind is incompatible with virtue, which is a good condition of the mind. Therefore sorrow is opposed to virtue and

is incompatible with it.

On the contrary, Christ was perfect in virtue. But there was sorrow in Him, for He said (Mat. 26:38): “My soul is sorrowful even unto death.” Therefore sorrow is compatible with virtue.

I answer that, As Augustine says (De Civ. Dei xiv, 8), the Stoics held that in the mind of the wise man there are three *eupatheiai*, i.e. “three good passions,” in place of the three disturbances: viz. instead of covetousness, “desire”; instead of mirth, “joy”; instead of fear, “caution.” But they denied that anything corresponding to sorrow could be in the mind of a wise man, for two reasons.

First, because sorrow is for an evil that is already present. Now they held that no evil can happen to a wise

* Noct. Attic. xix, 1

man: for they thought that, just as man's only good is virtue, and bodily goods are no good to man; so man's only evil is vice, which cannot be in a virtuous man. But this is unreasonable. For, since man is composed of soul and body, whatever conduces to preserve the life of the body, is some good to man; yet not his supreme good, because he can abuse it. Consequently the evil which is contrary to this good can be in a wise man, and can cause him moderate sorrow. Again, although a virtuous man can be without grave sin, yet no man is to be found to live without committing slight sins, according to 1 Jn. 1:8: "If we say that we have no sin, we deceive ourselves." A third reason is because a virtuous man, though not actually in a state of sin, may have been so in the past. And he is to be commended if he sorrow for that sin, according to 2 Cor. 7:10: "The sorrow that is according to God worketh penance steadfast unto salvation." Fourthly, because he may praiseworthy sorrow for another's sin. Therefore sorrow is compatible with moral virtue in the same way as the other passions are when moderated by reason.

Their second reason for holding this opinion was that sorrow is about evil present, whereas fear is for evil to come: even as pleasure is about a present good, while desire is for a future good. Now the enjoyment of a good possessed, or the desire to have good that one possesses not, may be consistent with virtue: but depression of the mind resulting from sorrow for a present evil, is altogether contrary to reason: wherefore it is incompatible with virtue. But this is unreasonable. For there is an evil

which can be present to the virtuous man, as we have just stated; which evil is rejected by reason. Wherefore the sensitive appetite follows reason's rejection by sorrowing for that evil; yet moderately, according as reason dictates. Now it pertains to virtue that the sensitive appetite be conformed to reason, as stated above (a. 1, ad 2). Wherefore moderated sorrow for an object which ought to make us sorrowful, is a mark of virtue; as also the Philosopher says (*Ethic.* ii, 6,7). Moreover, this proves useful for avoiding evil: since, just as good is more readily sought for the sake of pleasure, so is evil more undauntedly shunned on account of sorrow.

Accordingly we must allow that sorrow for things pertaining to virtue is incompatible with virtue: since virtue rejoices in its own. On the other hand, virtue sorrows moderately for all that thwarts virtue, no matter how.

Reply to Objection 1. The passage quoted proves that the wise man is not made sorrowful by wisdom. Yet he sorrows for anything that hinders wisdom. Consequently there is no room for sorrow in the blessed, in whom there can be no hindrance to wisdom.

Reply to Objection 2. Sorrow hinders the work that makes us sorrowful: but it helps us to do more readily whatever banishes sorrow.

Reply to Objection 3. Immoderate sorrow is a disease of the mind: but moderate sorrow is the mark of a well-conditioned mind, according to the present state of life.

Whether all the moral virtues are about the passions?

Ia IIae q. 59 a. 4

Objection 1. It would seem that all the moral virtues are about the passions. For the Philosopher says (*Ethic.* ii, 3) that "moral virtue is about objects of pleasure and sorrow." But pleasure and sorrow are passions, as stated above (q. 23, a. 4; q. 31, a. 1; q. 35, Aa. 1, 2). Therefore all the moral virtues are about the passions.

Objection 2. Further, the subject of the moral virtues is a faculty which is rational by participation, as the Philosopher states (*Ethic.* i, 13). But the passions are in this part of the soul, as stated above (q. 22, a. 3). Therefore every moral virtue is about the passions.

Objection 3. Further, some passion is to be found in every moral virtue: and so either all are about the passions, or none are. But some are about the passions, as fortitude and temperance, as stated in *Ethic.* iii, 6,10. Therefore all the moral virtues are about the passions.

On the contrary, Justice, which is a moral virtue, is not about the passions; as stated in *Ethic.* v, 1, seqq.

I answer that, Moral virtue perfects the appetitive part of the soul by directing it to good as defined by reason. Now good as defined by reason is that which is moderated or directed by reason. Consequently there are moral virtues about all matters that are subject to reason's direction and moderation. Now reason di-

rects, not only the passions of the sensitive appetite, but also the operations of the intellective appetite, i.e. the will, which is not the subject of a passion, as stated above (q. 22, a. 3). Therefore not all the moral virtues are about passions, but some are about passions, some about operations.

Reply to Objection 1. The moral virtues are not all about pleasures and sorrows, as being their proper matter; but as being something resulting from their proper acts. For every virtuous man rejoices in acts of virtue, and sorrows for the contrary. Hence the Philosopher, after the words quoted, adds, "if virtues are about actions and passions; now every action and passion is followed by pleasure or sorrow, so that in this way virtue is about pleasures and sorrows," viz. as about something that results from virtue.

Reply to Objection 2. Not only the sensitive appetite which is the subject of the passions, is rational by participation, but also the will, where there are no passions, as stated above.

Reply to Objection 3. Some virtues have passions as their proper matter, but some virtues not. Hence the comparison does not hold for all cases.

Objection 1. It would seem that moral virtue can be without passion. For the more perfect moral virtue is, the more does it overcome the passions. Therefore at its highest point of perfection it is altogether without passion.

Objection 2. Further, then is a thing perfect, when it is removed from its contrary and from whatever inclines to its contrary. Now the passions incline us to sin which is contrary to virtue: hence (Rom. 7:5) they are called “passions of sins.” Therefore perfect virtue is altogether without passion.

Objection 3. Further, it is by virtue that we are conformed to God, as Augustine declares (*De Moribus Eccl.* vi, xi, xiii). But God does all things without passion at all. Therefore the most perfect virtue is without any passion.

On the contrary, “No man is just who rejoices not in his deeds,” as stated in *Ethic.* i, 8. But joy is a passion. Therefore justice cannot be without passion; and still less can the other virtues be.

I answer that, If we take the passions as being inordinate emotions, as the Stoics did, it is evident that in this sense perfect virtue is without the passions. But if by passions we understand any movement of the sensitive appetite, it is plain that moral virtues, which are about the passions as about their proper matter, cannot be without passions. The reason for this is that otherwise it would follow that moral virtue makes the sensitive appetite altogether idle: whereas it is not the func-

tion of virtue to deprive the powers subordinate to reason of their proper activities, but to make them execute the commands of reason, by exercising their proper acts. Wherefore just as virtue directs the bodily limbs to their due external acts, so does it direct the sensitive appetite to its proper regulated movements.

Those moral virtues, however, which are not about the passions, but about operations, can be without passions. Such a virtue is justice: because it applies the will to its proper act, which is not a passion. Nevertheless, joy results from the act of justice; at least in the will, in which case it is not a passion. And if this joy be increased through the perfection of justice, it will overflow into the sensitive appetite; in so far as the lower powers follow the movement of the higher, as stated above (q. 17, a. 7; q. 24, a. 3). Wherefore by reason of this kind of overflow, the more perfect a virtue is, the more does it cause passion.

Reply to Objection 1. Virtue overcomes inordinate passion; it produces ordinate passion.

Reply to Objection 2. It is inordinate, not ordinate, passion that leads to sin.

Reply to Objection 3. The good of anything depends on the condition of its nature. Now there is no sensitive appetite in God and the angels, as there is in man. Consequently good operation in God and the angels is altogether without passion, as it is without a body: whereas the good operation of man is with passion, even as it is produced with the body’s help.

Objection 1. It would seem that moral virtue is a passion. Because the mean is of the same genus as the extremes. But moral virtue is a mean between two passions. Therefore moral virtue is a passion.

Objection 2. Further, virtue and vice, being contrary to one another, are in the same genus. But some passions are reckoned to be vices, such as envy and anger. Therefore some passions are virtues.

Objection 3. Further, pity is a passion, since it is sorrow for another's ills, as stated above (q. 35, a. 8). Now "Cicero the renowned orator did not hesitate to call pity a virtue," as Augustine states in *De Civ. Dei* ix, 5. Therefore a passion may be a moral virtue.

On the contrary, It is stated in *Ethic.* ii, 5 that "passions are neither virtues nor vices."

I answer that, Moral virtue cannot be a passion. This is clear for three reasons. First, because a passion is a movement of the sensitive appetite, as stated above (q. 22, a. 3): whereas moral virtue is not a movement, but rather a principle of the movement of the appetite, being a kind of habit. Secondly, because passions are not in themselves good or evil. For man's good or evil is something in reference to reason: wherefore the passions, considered in themselves, are referable both to good and evil, for as much as they may accord or discord with reason. Now nothing of this sort can be a virtue: since virtue is referable to good alone, as stated above (q. 55, a. 3). Thirdly, because, granted that some passions are, in some way, referable to good only, or

to evil only; even then the movement of passion, as passion, begins in the appetite, and ends in the reason, since the appetite tends to conformity with reason. On the other hand, the movement of virtue is the reverse, for it begins in the reason and ends in the appetite, inasmuch as the latter is moved by reason. Hence the definition of moral virtue (*Ethic.* ii, 6) states that it is "a habit of choosing the mean appointed by reason as a prudent man would appoint it."

Reply to Objection 1. Virtue is a mean between passions, not by reason of its essence, but on account of its effect; because, to wit, it establishes the mean between passions.

Reply to Objection 2. If by vice we understand a habit of doing evil deeds, it is evident that no passion is a vice. But if vice is taken to mean sin which is a vicious act, nothing hinders a passion from being a vice, or, on the other hand, from concurring in an act of virtue; in so far as a passion is either opposed to reason or in accordance with reason.

Reply to Objection 3. Pity is said to be a virtue, i.e. an act of virtue, in so far as "that movement of the soul is obedient to reason"; viz. "when pity is bestowed without violating right, as when the poor are relieved, or the penitent forgiven," as Augustine says (*De Civ. Dei* ix, 5). But if by pity we understand a habit perfecting man so that he bestows pity reasonably, nothing hinders pity, in this sense, from being a virtue. The same applies to similar passions.

Objection 1. It would seem that moral virtue cannot be with passion. For the Philosopher says (Topic. iv) that “a gentle man is one who is not passionate; but a patient man is one who is passionate but does not give way.” The same applies to all the moral virtues. Therefore all moral virtues are without passion.

Objection 2. Further, virtue is a right affection of the soul, as health is to the body, as stated Phys. vii, text. 17: wherefore “virtue is a kind of health of the soul,” as Cicero says (Quaest. Tusc. iv). But the soul’s passions are “the soul’s diseases,” as he says in the same book. Now health is incompatible with disease. Therefore neither is passion compatible with virtue.

Objection 3. Further, moral virtue requires perfect use of reason even in particular matters. But the passions are an obstacle to this: for the Philosopher says (Ethic. vi, 5) that “pleasures destroy the judgment of prudence”: and Sallust says (Catilin.) that “when they,” i.e. the soul’s passions, “interfere, it is not easy for the mind to grasp the truth.” Therefore passion is incompatible with moral virtue.

On the contrary, Augustine says (De Civ. Dei xiv, 6): “If the will is perverse, these movements,” viz. the passions, “are perverse also: but if it is upright, they are not only blameless, but even praiseworthy.” But nothing praiseworthy is incompatible with moral virtue. Therefore moral virtue does not exclude the passions, but is consistent with them.

I answer that, The Stoics and Peripatetics disagreed on this point, as Augustine relates (De Civ. Dei ix, 4). For the Stoics held that the soul’s passions cannot be in a wise or virtuous man: whereas the Peripatetics, who were founded by Aristotle, as Augustine says (De Civ. Dei ix, 4), maintained that the passions are compatible with moral virtue, if they be reduced to the mean.

This difference, as Augustine observes (De Civ. Dei ix, 4), was one of words rather than of opinions. Because the Stoics, through not discriminating between the intellectual appetite, i.e. the will, and the sensitive appetite, which is divided into irascible and concupiscible, did not, as the Peripatetics did, distinguish the passions from the other affections of the human soul, in the point of their being movements of the sensitive appetite, whereas the other emotions of the soul, which are not passions, are movements of the intellectual ap-

petite or will; but only in the point of the passions being, as they maintained, any emotions in disaccord with reason. These emotions could not be in a wise or virtuous man if they arose deliberately: while it would be possible for them to be in a wise man, if they arose suddenly: because, in the words of Aulus Gellius*, quoted by Augustine (De Civ. Dei ix, 4), “it is not in our power to call up the visions of the soul, known as its fancies; and when they arise from awesome things, they must needs disturb the mind of a wise man, so that he is slightly startled by fear, or depressed with sorrow,” in so far as “these passions forestall the use of reason without his approving of such things or consenting thereto.”

Accordingly, if the passions be taken for inordinate emotions, they cannot be in a virtuous man, so that he consent to them deliberately; as the Stoics maintained. But if the passions be taken for any movements of the sensitive appetite, they can be in a virtuous man, in so far as they are subordinate to reason. Hence Aristotle says (Ethic. ii, 3) that “some describe virtue as being a kind of freedom from passion and disturbance; this is incorrect, because the assertion should be qualified”: they should have said virtue is freedom from those passions “that are not as they should be as to manner and time.”

Reply to Objection 1. The Philosopher quotes this, as well as many other examples in his books on Logic, in order to illustrate, not his own mind, but that of others. It was the opinion of the Stoics that the passions of the soul were incompatible with virtue: and the Philosopher rejects this opinion (Ethic. ii, 3), when he says that virtue is not freedom from passion. It may be said, however, that when he says “a gentle man is not passionate,” we are to understand this of inordinate passion.

Reply to Objection 2. This and all similar arguments which Tully brings forward in De Tusc. Quaest. iv take the passions in the execution of reason’s command.

Reply to Objection 3. When a passion forestalls the judgment of reason, so as to prevail on the mind to give its consent, it hinders counsel and the judgment of reason. But when it follows that judgment, as through being commanded by reason, it helps towards the execution of reason’s command.

* Noct. Attic. xix, 1

Objection 1. It would seem that sorrow is incompatible with virtue. Because the virtues are effects of wisdom, according to Wis. 8:7: “She,” i.e. Divine wisdom, “teacheth temperance, and prudence, and justice, and fortitude.” Now the “conversation” of wisdom “hath no bitterness,” as we read further on (verse 16). Therefore sorrow is incompatible with virtue also.

Objection 2. Further, sorrow is a hindrance to work, as the Philosopher states (Ethic. vii, 13; x, 5). But a hindrance to good works is incompatible with virtue. Therefore sorrow is incompatible with virtue.

Objection 3. Further, Tully calls sorrow a disease of the mind (De Tusc. Quaest. iv). But disease of the mind is incompatible with virtue, which is a good condition of the mind. Therefore sorrow is opposed to virtue and is incompatible with it.

On the contrary, Christ was perfect in virtue. But there was sorrow in Him, for He said (Mat. 26:38): “My soul is sorrowful even unto death.” Therefore sorrow is compatible with virtue.

I answer that, As Augustine says (De Civ. Dei xiv, 8), the Stoics held that in the mind of the wise man there are three *eupatheiai*, i.e. “three good passions,” in place of the three disturbances: viz. instead of covetousness, “desire”; instead of mirth, “joy”; instead of fear, “caution.” But they denied that anything corresponding to sorrow could be in the mind of a wise man, for two reasons.

First, because sorrow is for an evil that is already present. Now they held that no evil can happen to a wise man: for they thought that, just as man’s only good is virtue, and bodily goods are no good to man; so man’s only evil is vice, which cannot be in a virtuous man. But this is unreasonable. For, since man is composed of soul and body, whatever conduces to preserve the life of the body, is some good to man; yet not his supreme good, because he can abuse it. Consequently the evil which is contrary to this good can be in a wise man, and can cause him moderate sorrow. Again, although a virtuous man can be without grave sin, yet no man is to be found to live without committing slight sins, according to 1 Jn. 1:8: “If we say that we have no sin, we deceive ourselves.” A third reason is because a virtuous man, though not actually in a state of sin, may have been so in the past. And he is to be commended if he sorrow for

that sin, according to 2 Cor. 7:10: “The sorrow that is according to God worketh penance steadfast unto salvation.” Fourthly, because he may praiseworthy sorrow for another’s sin. Therefore sorrow is compatible with moral virtue in the same way as the other passions are when moderated by reason.

Their second reason for holding this opinion was that sorrow is about evil present, whereas fear is for evil to come: even as pleasure is about a present good, while desire is for a future good. Now the enjoyment of a good possessed, or the desire to have good that one possesses not, may be consistent with virtue: but depression of the mind resulting from sorrow for a present evil, is altogether contrary to reason: wherefore it is incompatible with virtue. But this is unreasonable. For there is an evil which can be present to the virtuous man, as we have just stated; which evil is rejected by reason. Wherefore the sensitive appetite follows reason’s rejection by sorrowing for that evil; yet moderately, according as reason dictates. Now it pertains to virtue that the sensitive appetite be conformed to reason, as stated above (a. 1, ad 2). Wherefore moderated sorrow for an object which ought to make us sorrowful, is a mark of virtue; as also the Philosopher says (Ethic. ii, 6,7). Moreover, this proves useful for avoiding evil: since, just as good is more readily sought for the sake of pleasure, so is evil more undauntedly shunned on account of sorrow.

Accordingly we must allow that sorrow for things pertaining to virtue is incompatible with virtue: since virtue rejoices in its own. On the other hand, virtue sorrows moderately for all that thwarts virtue, no matter how.

Reply to Objection 1. The passage quoted proves that the wise man is not made sorrowful by wisdom. Yet he sorrows for anything that hinders wisdom. Consequently there is no room for sorrow in the blessed, in whom there can be no hindrance to wisdom.

Reply to Objection 2. Sorrow hinders the work that makes us sorrowful: but it helps us to do more readily whatever banishes sorrow.

Reply to Objection 3. Immoderate sorrow is a disease of the mind: but moderate sorrow is the mark of a well-conditioned mind, according to the present state of life.

Objection 1. It would seem that all the moral virtues are about the passions. For the Philosopher says (Ethic. ii, 3) that “moral virtue is about objects of pleasure and sorrow.” But pleasure and sorrow are passions, as stated above (q. 23, a. 4; q. 31, a. 1; q. 35, Aa. 1, 2). Therefore all the moral virtues are about the passions.

Objection 2. Further, the subject of the moral virtues is a faculty which is rational by participation, as the Philosopher states (Ethic. i, 13). But the passions are in this part of the soul, as stated above (q. 22, a. 3). Therefore every moral virtue is about the passions.

Objection 3. Further, some passion is to be found in every moral virtue: and so either all are about the passions, or none are. But some are about the passions, as fortitude and temperance, as stated in Ethic. iii, 6, 10. Therefore all the moral virtues are about the passions.

On the contrary, Justice, which is a moral virtue, is not about the passions; as stated in Ethic. v, 1, seqq.

I answer that, Moral virtue perfects the appetitive part of the soul by directing it to good as defined by reason. Now good as defined by reason is that which is moderated or directed by reason. Consequently there are moral virtues about all matters that are subject to reason’s direction and moderation. Now reason di-

rects, not only the passions of the sensitive appetite, but also the operations of the intellective appetite, i.e. the will, which is not the subject of a passion, as stated above (q. 22, a. 3). Therefore not all the moral virtues are about passions, but some are about passions, some about operations.

Reply to Objection 1. The moral virtues are not all about pleasures and sorrows, as being their proper matter; but as being something resulting from their proper acts. For every virtuous man rejoices in acts of virtue, and sorrows for the contrary. Hence the Philosopher, after the words quoted, adds, “if virtues are about actions and passions; now every action and passion is followed by pleasure or sorrow, so that in this way virtue is about pleasures and sorrows,” viz. as about something that results from virtue.

Reply to Objection 2. Not only the sensitive appetite which is the subject of the passions, is rational by participation, but also the will, where there are no passions, as stated above.

Reply to Objection 3. Some virtues have passions as their proper matter, but some virtues not. Hence the comparison does not hold for all cases.

Objection 1. It would seem that moral virtue can be without passion. For the more perfect moral virtue is, the more does it overcome the passions. Therefore at its highest point of perfection it is altogether without passion.

Objection 2. Further, then is a thing perfect, when it is removed from its contrary and from whatever inclines to its contrary. Now the passions incline us to sin which is contrary to virtue: hence (Rom. 7:5) they are called “passions of sins.” Therefore perfect virtue is altogether without passion.

Objection 3. Further, it is by virtue that we are conformed to God, as Augustine declares (*De Moribus Eccl.* vi, xi, xiii). But God does all things without passion at all. Therefore the most perfect virtue is without any passion.

On the contrary, “No man is just who rejoices not in his deeds,” as stated in *Ethic.* i, 8. But joy is a passion. Therefore justice cannot be without passion; and still less can the other virtues be.

I answer that, If we take the passions as being inordinate emotions, as the Stoics did, it is evident that in this sense perfect virtue is without the passions. But if by passions we understand any movement of the sensitive appetite, it is plain that moral virtues, which are about the passions as about their proper matter, cannot be without passions. The reason for this is that otherwise it would follow that moral virtue makes the sensitive appetite altogether idle: whereas it is not the func-

tion of virtue to deprive the powers subordinate to reason of their proper activities, but to make them execute the commands of reason, by exercising their proper acts. Wherefore just as virtue directs the bodily limbs to their due external acts, so does it direct the sensitive appetite to its proper regulated movements.

Those moral virtues, however, which are not about the passions, but about operations, can be without passions. Such a virtue is justice: because it applies the will to its proper act, which is not a passion. Nevertheless, joy results from the act of justice; at least in the will, in which case it is not a passion. And if this joy be increased through the perfection of justice, it will overflow into the sensitive appetite; in so far as the lower powers follow the movement of the higher, as stated above (q. 17, a. 7; q. 24, a. 3). Wherefore by reason of this kind of overflow, the more perfect a virtue is, the more does it cause passion.

Reply to Objection 1. Virtue overcomes inordinate passion; it produces ordinate passion.

Reply to Objection 2. It is inordinate, not ordinate, passion that leads to sin.

Reply to Objection 3. The good of anything depends on the condition of its nature. Now there is no sensitive appetite in God and the angels, as there is in man. Consequently good operation in God and the angels is altogether without passion, as it is without a body: whereas the good operation of man is with passion, even as it is produced with the body’s help.

Objection 1. It would seem that man cannot attain happiness. For just as the rational is above the sensitive nature, so the intellectual is above the rational, as Dionysius declares (*Div. Nom.* iv, vi, vii) in several passages. But irrational animals that have the sensitive nature only, cannot attain the end of the rational nature. Therefore neither can man, who is of rational nature, attain the end of the intellectual nature, which is Happiness.

Objection 2. Further, True Happiness consists in seeing God, Who is pure Truth. But from his very nature, man considers truth in material things: wherefore “he understands the intelligible species in the phantasm” (*De Anima* iii, 7). Therefore he cannot attain Happiness.

Objection 3. Further, Happiness consists in attaining the Sovereign Good. But we cannot arrive at the top without surmounting the middle. Since, therefore, the angelic nature through which man cannot mount is midway between God and human nature; it seems that he cannot attain Happiness.

On the contrary, It is written (*Ps.* 93:12): “Blessed is the man whom Thou shalt instruct, O Lord.”

I answer that, Happiness is the attainment of the Perfect Good. Whoever, therefore, is capable of the Perfect Good can attain Happiness. Now, that man is capable of the Perfect Good, is proved both because his intellect can apprehend the universal and perfect good, and because his will can desire it. And therefore man can attain Happiness. This can be proved again from the fact that man is capable of seeing God, as stated in

Ia, q. 12, a. 1: in which vision, as we stated above (q. 3, a. 8) man’s perfect Happiness consists.

Reply to Objection 1. The rational exceeds the sensitive nature, otherwise than the intellectual surpasses the rational. For the rational exceeds the sensitive nature in respect of the object of its knowledge: since the senses have no knowledge whatever of the universal, whereas the reason has knowledge thereof. But the intellectual surpasses the rational nature, as to the mode of knowing the same intelligible truth: for the intellectual nature grasps forthwith the truth which the rational nature reaches by the inquiry of reason, as was made clear in the Ia, q. 58, a. 3; Ia, q. 79, a. 8. Therefore reason arrives by a kind of movement at that which the intellect grasps. Consequently the rational nature can attain Happiness, which is the perfection of the intellectual nature: but otherwise than the angels. Because the angels attained it forthwith after the beginning of their creation: whereas man attains it after a time. But the sensitive nature can nowise attain this end.

Reply to Objection 2. To man in the present state of life the natural way of knowing intelligible truth is by means of phantasms. But after this state of life, he has another natural way, as was stated in the Ia, q. 84, a. 7; Ia, q. 89, a. 1.

Reply to Objection 3. Man cannot surmount the angels in the degree of nature so as to be above them naturally. But he can surmount them by an operation of the intellect, by understanding that there is above the angels something that makes men happy; and when he has attained it, he will be perfectly happy.

Objection 1. It would seem that one man cannot be happier than another. For Happiness is “the reward of virtue,” as the Philosopher says (*Ethic.* i, 9). But equal reward is given for all the works of virtue; because it is written (*Mat.* 20:10) that all who labor in the vineyard “received every man a penny”; for, as Gregory says (*Hom.* xix in *Evang.*), “each was equally rewarded with eternal life.” Therefore one man cannot be happier than another.

Objection 2. Further, Happiness is the supreme good. But nothing can surpass the supreme. Therefore one man’s Happiness cannot be surpassed by another’s.

Objection 3. Further, since Happiness is “the perfect and sufficient good” (*Ethic.* i, 7) it brings rest to man’s desire. But his desire is not at rest, if he yet lacks some good that can be got. And if he lack nothing that he can get, there can be no still greater good. Therefore either man is not happy; or, if he be happy, no other Happiness can be greater.

On the contrary, It is written (*Jn.* 14:2): “In My Father’s house there are many mansions”; which, according to Augustine (*Tract.* lxxvii in *Joan.*) signify “the diverse dignities of merits in the one eternal life.” But the dignity of eternal life which is given according to merit, is Happiness itself. Therefore there are diverse degrees of Happiness, and Happiness is not equally in all.

I answer that, As stated above (q. 1, a. 8; q. 2, a. 7), Happiness implies two things, to wit, the last end it-

self, i.e. the Sovereign Good; and the attainment or enjoyment of that same Good. As to that Good itself, Which is the object and cause of Happiness, one Happiness cannot be greater than another, since there is but one Sovereign Good, namely, God, by enjoying Whom, men are made happy. But as to the attainment or enjoyment of this Good, one man can be happier than another; because the more a man enjoys this Good the happier he is. Now, that one man enjoys God more than another, happens through his being better disposed or ordered to the enjoyment of Him. And in this sense one man can be happier than another.

Reply to Objection 1. The one penny signifies that Happiness is one in its object. But the many mansions signify the manifold Happiness in the divers degrees of enjoyment.

Reply to Objection 2. Happiness is said to be the supreme good, inasmuch as it is the perfect possession or enjoyment of the Supreme Good.

Reply to Objection 3. None of the Blessed lacks any desirable good; since they have the Infinite Good Itself, Which is “the good of all good,” as Augustine says (*Enarr.* in *Ps.* 134). But one is said to be happier than another, by reason of diverse participation of the same good. And the addition of other goods does not increase Happiness, since Augustine says (*Confess.* v, 4): “He who knows Thee, and others besides, is not the happier for knowing them, but is happy for knowing Thee alone.”

Objection 1. It would seem that Happiness can be had in this life. For it is written (Ps. 118:1): “Blessed are the undefiled in the way, who walk in the law of the Lord.” But this happens in this life. Therefore one can be happy in this life.

Objection 2. Further, imperfect participation in the Sovereign Good does not destroy the nature of Happiness, otherwise one would not be happier than another. But men can participate in the Sovereign Good in this life, by knowing and loving God, albeit imperfectly. Therefore man can be happy in this life.

Objection 3. Further, what is said by many cannot be altogether false: since what is in many, comes, apparently, from nature; and nature does not fail altogether. Now many say that Happiness can be had in this life, as appears from Ps. 143:15: “They have called the people happy that hath these things,” to wit, the good things in this life. Therefore one can be happy in this life.

On the contrary, It is written (Job 14:1): “Man born of a woman, living for a short time, is filled with many miseries.” But Happiness excludes misery. Therefore man cannot be happy in this life.

I answer that, A certain participation of Happiness can be had in this life: but perfect and true Happiness cannot be had in this life. This may be seen from a twofold consideration.

First, from the general notion of happiness. For since happiness is a “perfect and sufficient good,” it excludes every evil, and fulfils every desire. But in this life every evil cannot be excluded. For this present life is subject to many unavoidable evils; to ignorance on the part of the intellect; to inordinate affection on the part of the appetite, and to many penalties on the part of the body; as Augustine sets forth in *De Civ. Dei* xix,

4. Likewise neither can the desire for good be satiated in this life. For man naturally desires the good, which he has, to be abiding. Now the goods of the present life pass away; since life itself passes away, which we naturally desire to have, and would wish to hold abidingly, for man naturally shrinks from death. Wherefore it is impossible to have true Happiness in this life.

Secondly, from a consideration of the specific nature of Happiness, viz. the vision of the Divine Essence, which man cannot obtain in this life, as was shown in the Ia, q. 12, a. 11. Hence it is evident that none can attain true and perfect Happiness in this life.

Reply to Objection 1. Some are said to be happy in this life, either on account of the hope of obtaining Happiness in the life to come, according to Rom. 8:24: “We are saved by hope”; or on account of a certain participation of Happiness, by reason of a kind of enjoyment of the Sovereign Good.

Reply to Objection 2. The imperfection of participated Happiness is due to one of two causes. First, on the part of the object of Happiness, which is not seen in Its Essence: and this imperfection destroys the nature of true Happiness. Secondly, the imperfection may be on the part of the participator, who indeed attains the object of Happiness, in itself, namely, God: imperfectly, however, in comparison with the way in which God enjoys Himself. This imperfection does not destroy the true nature of Happiness; because, since Happiness is an operation, as stated above (q. 3, a. 2), the true nature of Happiness is taken from the object, which specifies the act, and not from the subject.

Reply to Objection 3. Men esteem that there is some kind of happiness to be had in this life, on account of a certain likeness to true Happiness. And thus they do not fail altogether in their estimate.

Objection 1. It would seem that Happiness can be lost. For Happiness is a perfection. But every perfection is in the thing perfected according to the mode of the latter. Since then man is, by his nature, changeable, it seems that Happiness is participated by man in a changeable manner. And consequently it seems that man can lose Happiness.

Objection 2. Further, Happiness consists in an act of the intellect; and the intellect is subject to the will. But the will can be directed to opposites. Therefore it seems that it can desist from the operation whereby man is made happy: and thus man will cease to be happy.

Objection 3. Further, the end corresponds to the beginning. But man's Happiness has a beginning, since man was not always happy. Therefore it seems that it has an end.

On the contrary, It is written (Mat. 25:46) of the righteous that "they shall go . . . into life everlasting," which, as above stated (a. 2), is the Happiness of the saints. Now what is eternal ceases not. Therefore Happiness cannot be lost.

I answer that, If we speak of imperfect happiness, such as can be had in this life, in this sense it can be lost. This is clear of contemplative happiness, which is lost either by forgetfulness, for instance, when knowledge is lost through sickness; or again by certain occupations, whereby a man is altogether withdrawn from contemplation.

This is also clear of active happiness: since man's will can be changed so as to fall to vice from the virtue, in whose act that happiness principally consists. If, however, the virtue remain unimpaired, outward changes can indeed disturb such like happiness, in so far as they hinder many acts of virtue; but they cannot take it away altogether because there still remains an act of virtue, whereby man bears these trials in a praiseworthy manner. And since the happiness of this life can be lost, a circumstance that appears to be contrary to the nature of happiness, therefore did the Philosopher state (Ethic. i, 10) that some are happy in this life, not simply, but "as men," whose nature is subject to change.

But if we speak of that perfect Happiness which we await after this life, it must be observed that Origen (Peri Archon. ii, 3), following the error of certain Platonists, held that man can become unhappy after the final Happiness.

This, however, is evidently false, for two reasons. First, from the general notion of happiness. For since happiness is the "perfect and sufficient good," it must needs set man's desire at rest and exclude every evil. Now man naturally desires to hold to the good that he has, and to have the surety of his holding: else he must of necessity be troubled with the fear of losing it, or with the sorrow of knowing that he will lose it. Therefore it is necessary for true Happiness that man have the assured opinion of never losing the good that he pos-

sesses. If this opinion be true, it follows that he never will lose happiness: but if it be false, it is in itself an evil that he should have a false opinion: because the false is the evil of the intellect, just as the true is its good, as stated in Ethic. vi, 2. Consequently he will no longer be truly happy, if evil be in him.

Secondly, it is again evident if we consider the specific nature of Happiness. For it has been shown above (q. 3, a. 8) that man's perfect Happiness consists in the vision of the Divine Essence. Now it is impossible for anyone seeing the Divine Essence, to wish not to see It. Because every good that one possesses and yet wishes to be without, is either insufficient, something more sufficient being desired in its stead; or else has some inconvenience attached to it, by reason of which it becomes wearisome. But the vision of the Divine Essence fills the soul with all good things, since it unites it to the source of all goodness; hence it is written (Ps. 16:15): "I shall be satisfied when Thy glory shall appear"; and (Wis. 7:11): "All good things came to me together with her," i.e. with the contemplation of wisdom. In like manner neither has it any inconvenience attached to it; because it is written of the contemplation of wisdom (Wis. 8:16): "Her conversation hath no bitterness, nor her company any tediousness." It is thus evident that the happy man cannot forsake Happiness of his own accord. Moreover, neither can he lose Happiness, through God taking it away from him. Because, since the withdrawal of Happiness is a punishment, it cannot be enforced by God, the just Judge, except for some fault; and he that sees God cannot fall into a fault, since rectitude of the will, of necessity, results from that vision as was shown above (q. 4, a. 4). Nor again can it be withdrawn by any other agent. Because the mind that is united to God is raised above all other things: and consequently no other agent can sever the mind from that union. Therefore it seems unreasonable that as time goes on, man should pass from happiness to misery, and vice versa; because such like vicissitudes of time can only be for such things as are subject to time and movement.

Reply to Objection 1. Happiness is consummate perfection, which excludes every defect from the happy. And therefore whoever has happiness has it altogether unchangeably: this is done by the Divine power, which raises man to the participation of eternity which transcends all change.

Reply to Objection 2. The will can be directed to opposites, in things which are ordained to the end; but it is ordained, of natural necessity, to the last end. This is evident from the fact that man is unable not to wish to be happy.

Reply to Objection 3. Happiness has a beginning owing to the condition of the participator: but it has no end by reason of the condition of the good, the participation of which makes man happy. Hence the beginning of happiness is from one cause, its endlessness is from

another.

Objection 1. It would seem that man can attain Happiness by his natural powers. For nature does not fail in necessary things. But nothing is so necessary to man as that by which he attains the last end. Therefore this is not lacking to human nature. Therefore man can attain Happiness by his natural powers.

Objection 2. Further, since man is more noble than irrational creatures, it seems that he must be better equipped than they. But irrational creatures can attain their end by their natural powers. Much more therefore can man attain Happiness by his natural powers.

Objection 3. Further, Happiness is a “perfect operation,” according to the Philosopher (*Ethic.* vii, 13). Now the beginning of a thing belongs to the same principle as the perfecting thereof. Since, therefore, the imperfect operation, which is as the beginning in human operations, is subject to man’s natural power, whereby he is master of his own actions; it seems that he can attain to perfect operation, i.e. Happiness, by his natural powers.

On the contrary, Man is naturally the principle of his action, by his intellect and will. But final Happiness prepared for the saints, surpasses the intellect and will of man; for the Apostle says (1 Cor. 2:9) “Eye hath not seen, nor ear heard, neither hath it entered into the heart of man, what things God hath prepared for them that love Him.” Therefore man cannot attain Happiness by his natural powers.

I answer that, Imperfect happiness that can be had in this life, can be acquired by man by his natural powers, in the same way as virtue, in whose operation it consists: on this point we shall speak further on (q. 63). But man’s perfect Happiness, as stated above (q. 3, a. 8), consists in the vision of the Divine Essence. Now the vision of God’s Essence surpasses the nature not only of man, but also of every creature, as was shown in the Ia, q. 12, a. 4. For the natural knowledge of every creature is in keeping with the mode of his substance: thus it is said of the intelligence (*De Causis; Prop.* viii) that “it knows things that are above it, and things that are below it, according to the mode of its substance.” But every

knowledge that is according to the mode of created substance, falls short of the vision of the Divine Essence, which infinitely surpasses all created substance. Consequently neither man, nor any creature, can attain final Happiness by his natural powers.

Reply to Objection 1. Just as nature does not fail man in necessities, although it has not provided him with weapons and clothing, as it provided other animals, because it gave him reason and hands, with which he is able to get these things for himself; so neither did it fail man in things necessary, although it gave him not the wherewithal to attain Happiness: since this it could not do. But it did give him free-will, with which he can turn to God, that He may make him happy. “For what we do by means of our friends, is done, in a sense, by ourselves” (*Ethic.* iii, 3).

Reply to Objection 2. The nature that can attain perfect good, although it needs help from without in order to attain it, is of more noble condition than a nature which cannot attain perfect good, but attains some imperfect good, although it need no help from without in order to attain it, as the Philosopher says (*De Coel.* ii, 12). Thus he is better disposed to health who can attain perfect health, albeit by means of medicine, than he who can attain but imperfect health, without the help of medicine. And therefore the rational creature, which can attain the perfect good of happiness, but needs the Divine assistance for the purpose, is more perfect than the irrational creature, which is not capable of attaining this good, but attains some imperfect good by its natural powers.

Reply to Objection 3. When imperfect and perfect are of the same species, they can be caused by the same power. But this does not follow of necessity, if they be of different species: for not everything, that can cause the disposition of matter, can produce the final perfection. Now the imperfect operation, which is subject to man’s natural power, is not of the same species as that perfect operation which is man’s happiness: since operation takes its species from its object. Consequently the argument does not prove.

Objection 1. It would seem that man can be made happy through the action of some higher creature, viz. an angel. For since we observe a twofold order in things—one, of the parts of the universe to one another, the other, of the whole universe to a good which is outside the universe; the former order is ordained to the second as to its end (Metaph. xii, 10). Thus the mutual order of the parts of an army is dependent on the order of the parts of an army is dependent on the order of the whole army to the general. But the mutual order of the parts of the universe consists in the higher creatures acting on the lower, as stated in the Ia, q. 109, a. 2: while happiness consists in the order of man to a good which is outside the universe, i.e. God. Therefore man is made happy, through a higher creature, viz. an angel, acting on him.

Objection 2. Further, that which is such in potentiality, can be reduced to act, by that which is such actually: thus what is potentially hot, is made actually hot, by something that is actually hot. But man is potentially happy. Therefore he can be made actually happy by an angel who is actually happy.

Objection 3. Further, Happiness consists in an operation of the intellect as stated above (q. 3, a. 4). But an angel can enlighten man's intellect as shown in the Ia, q. 111, a. 1. Therefore an angel can make a man happy.

On the contrary, It is written (Ps. 83:12): "The Lord will give grace and glory."

I answer that, Since every creature is subject to the laws of nature, from the very fact that its power and action are limited: that which surpasses created nature, cannot be done by the power of any creature. Consequently if anything need to be done that is above nature, it is done by God immediately; such as raising the dead to life, restoring sight to the blind, and such like. Now it has been shown above (a. 5) that Happiness is a good surpassing created nature. Therefore it is impossible that it be bestowed through the action of any

creature: but by God alone is man made happy, if we speak of perfect Happiness. If, however, we speak of imperfect happiness, the same is to be said of it as of the virtue, in whose act it consists.

Reply to Objection 1. It often happens in the case of active powers ordained to one another, that it belongs to the highest power to reach the last end, while the lower powers contribute to the attainment of that last end, by causing a disposition thereto: thus to the art of sailing, which commands the art of shipbuilding, it belongs to use a ship for the end for which it was made. Thus, too, in the order of the universe, man is indeed helped by the angels in the attainment of his last end, in respect of certain preliminary dispositions thereto: whereas he attains the last end itself through the First Agent, which is God.

Reply to Objection 2. When a form exists perfectly and naturally in something, it can be the principle of action on something else: for instance a hot thing heats through heat. But if a form exist in something imperfectly, and not naturally, it cannot be the principle whereby it is communicated to something else: thus the "intention" of color which is in the pupil, cannot make a thing white; nor indeed can everything enlightened or heated give heat or light to something else; for if they could, enlightening and heating would go on to infinity. But the light of glory, whereby God is seen, is in God perfectly and naturally; whereas in any creature, it is imperfectly and by likeness or participation. Consequently no creature can communicate its Happiness to another.

Reply to Objection 3. A happy angel enlightens the intellect of a man or of a lower angel, as to certain notions of the Divine works: but not as to the vision of the Divine Essence, as was stated in the Ia, q. 106, a. 1: since in order to see this, all are immediately enlightened by God.

Objection 1. It would seem that no works of man are necessary that he may obtain Happiness from God. For since God is an agent of infinite power, He requires before acting, neither matter, nor disposition of matter, but can forthwith produce the whole effect. But man's works, since they are not required for Happiness, as the efficient cause thereof, as stated above (a. 6), can be required only as dispositions thereto. Therefore God who does not require dispositions before acting, bestows Happiness without any previous works.

Objection 2. Further, just as God is the immediate cause of Happiness, so is He the immediate cause of nature. But when God first established nature, He produced creatures without any previous disposition or action on the part of the creature, but made each one perfect forthwith in its species. Therefore it seems that He bestows Happiness on man without any previous works.

Objection 3. Further, the Apostle says (Rom. 4:6) that Happiness is of the man "to whom God reputeth justice without works." Therefore no works of man are necessary for attaining Happiness.

On the contrary, It is written (Jn. 13:17): "If you know these things, you shall be blessed if you do them." Therefore Happiness is obtained through works.

I answer that, Rectitude of the will, as stated above (q. 4, a. 4), is necessary for Happiness; since it is nothing else than the right order of the will to the last end; and it is therefore necessary for obtaining the end, just as the right disposition of matter, in order to receive the form. But this does not prove that any work of man need precede his Happiness: for God could make a will having a right tendency to the end, and at the same time attaining the end; just as sometimes He disposes matter and at the same time introduces the form. But the order of Divine wisdom demands that it should not be thus; for as is stated in De Coel. ii, 12, "of those things that have a natural capacity for the perfect good, one has it without movement, some by one movement, some by several." Now to possess the perfect good without

movement, belongs to that which has it naturally: and to have Happiness naturally belongs to God alone. Therefore it belongs to God alone not to be moved towards Happiness by any previous operation. Now since Happiness surpasses every created nature, no pure creature can becomingly gain Happiness, without the movement of operation, whereby it tends thereto. But the angel, who is above man in the natural order, obtained it, according to the order of Divine wisdom, by one movement of a meritorious work, as was explained in the Ia, q. 62, a. 5; whereas man obtains it by many movements of works which are called merits. Wherefore also according to the Philosopher (Ethic. i, 9), happiness is the reward of works of virtue.

Reply to Objection 1. Works are necessary to man in order to gain Happiness; not on account of the insufficiency of the Divine power which bestows Happiness, but that the order in things be observed.

Reply to Objection 2. God produced the first creatures so that they are perfect forthwith, without any previous disposition or operation of the creature; because He instituted the first individuals of the various species, that through them nature might be propagated to their progeny. In like manner, because Happiness was to be bestowed on others through Christ, who is God and Man, "Who," according to Heb. 2:10, "had brought many children into glory"; therefore, from the very beginning of His conception, His soul was happy, without any previous meritorious operation. But this is peculiar to Him: for Christ's merit avails baptized children for the gaining of Happiness, though they have no merits of their own; because by Baptism they are made members of Christ.

Reply to Objection 3. The Apostle is speaking of the Happiness of Hope, which is bestowed on us by sanctifying grace, which is not given on account of previous works. For grace is not a term of movement, as Happiness is; rather is it the principle of the movement that tends towards Happiness.

Objection 1. It would seem that not all desire Happiness. For no man can desire what he knows not; since the apprehended good is the object of the appetite (De Anima iii, 10). But many know not what Happiness is. This is evident from the fact that, as Augustine says (De Trin. xiii, 4), “some thought that Happiness consists in pleasures of the body; some, in a virtue of the soul; some in other things.” Therefore not all desire Happiness.

Objection 2. Further, the essence of Happiness is the vision of the Divine Essence, as stated above (q. 3, a. 8). But some consider it impossible for man to see the Divine Essence; wherefore they desire it not. Therefore all men do not desire Happiness.

Objection 3. Further, Augustine says (De Trin. xiii, 5) that “happy is he who has all he desires, and desires nothing amiss.” But all do not desire this; for some desire certain things amiss, and yet they wish to desire such things. Therefore all do not desire Happiness.

On the contrary, Augustine says (De Trin. xiii, 3): “If that actor had said: ‘You all wish to be happy; you do not wish to be unhappy,’ he would have said that which none would have failed to acknowledge in his will.” Therefore everyone desires to be happy.

I answer that, Happiness can be considered in two ways. First according to the general notion of happiness: and thus, of necessity, every man desires happiness. For the general notion of happiness consists in the perfect good, as stated above (Aa. 3,4). But since good is the object of the will, the perfect good of a man is that which entirely satisfies his will. Consequently to desire happiness is nothing else than to desire that one’s will be satisfied. And this everyone desires. Secondly we may speak of Happiness according to its specific notion, as to that in which it consists. And thus all do not know Happiness; because they know not in what thing the general notion of happiness is found. And conse-

quently, in this respect, not all desire it. Wherefore the reply to the first Objection is clear.

Reply to Objection 2. Since the will follows the apprehension of the intellect or reason; just as it happens that where there is no real distinction, there may be a distinction according to the consideration of reason; so does it happen that one and the same thing is desired in one way, and not desired in another. So that happiness may be considered as the final and perfect good, which is the general notion of happiness: and thus the will naturally and of necessity tends thereto, as stated above. Again it can be considered under other special aspects, either on the part of the operation itself, or on the part of the operating power, or on the part of the object; and thus the will does not tend thereto of necessity.

Reply to Objection 3. This definition of Happiness given by some—“Happy is the man that has all he desires,” or, “whose every wish is fulfilled” is a good and adequate definition; but an inadequate definition if understood in another. For if we understand it simply of all that man desires by his natural appetite, thus it is true that he who has all that he desires, is happy: since nothing satisfies man’s natural desire, except the perfect good which is Happiness. But if we understand it of those things that man desires according to the apprehension of the reason, thus it does not belong to Happiness, to have certain things that man desires; rather does it belong to unhappiness, in so far as the possession of such things hinders man from having all that he desires naturally; thus it is that reason sometimes accepts as true things that are a hindrance to the knowledge of truth. And it was through taking this into consideration that Augustine added so as to include perfect Happiness—that he “desires nothing amiss”: although the first part suffices if rightly understood, to wit, that “happy is he who has all he desires.”

FIRST PART OF THE SECOND PART, QUESTION 6

Of the Voluntary and the Involuntary (In Eight Articles)

Since therefore Happiness is to be gained by means of certain acts, we must in due sequence consider human acts, in order to know by what acts we may obtain Happiness, and by what acts we are prevented from obtaining it. But because operations and acts are concerned with things singular, consequently all practical knowledge is incomplete unless it take account of things in detail. The study of Morals, therefore, since it treats of human acts, should consider first the general principles; and secondly matters of detail.

In treating of the general principles, the points that offer themselves for our consideration are (1) human acts themselves; (2) their principles. Now of human acts some are proper to man; others are common to man and animals. And since Happiness is man's proper good, those acts which are proper to man have a closer connection with Happiness than have those which are common to man and the other animals. First, then, we must consider those acts which are proper to man; secondly, those acts which are common to man and the other animals, and are called Passions. The first of these points offers a twofold consideration: (1) What makes a human act? (2) What distinguishes human acts?

And since those acts are properly called human which are voluntary, because the will is the rational appetite, which is proper to man; we must consider acts in so far as they are voluntary.

First, then, we must consider the voluntary and involuntary in general; secondly, those acts which are voluntary, as being elicited by the will, and as issuing from the will immediately; thirdly, those acts which are voluntary, as being commanded by the will, which issue from the will through the medium of the other powers.

And because voluntary acts have certain circumstances, according to which we form our judgment concerning them, we must first consider the voluntary and the involuntary, and afterwards, the circumstances of those acts which are found to be voluntary or involuntary. Under the first head there are eight points of inquiry:

- (1) Whether there is anything voluntary in human acts?
- (2) Whether in irrational animals?
- (3) Whether there can be voluntariness without any action?
- (4) Whether violence can be done to the will?
- (5) Whether violence causes involuntariness?
- (6) Whether fear causes involuntariness?
- (7) Whether concupiscence causes involuntariness?
- (8) Whether ignorance causes involuntariness?

Whether there is anything voluntary in human acts?

Ia IIae q. 6 a. 1

Objection 1. It would seem that there is nothing voluntary in human acts. For that is voluntary "which has its principle within itself," as Gregory of Nyssa*, Damascene (*De Fide Orth.* ii, 24), and Aristotle (*Ethic.* iii, 1) declare. But the principle of human acts is not in man himself, but outside him: since man's appetite is moved to act, by the appetible object which is outside him, and is as a "mover unmoved" (*De Anima* iii, 10). Therefore there is nothing voluntary in human acts.

Objection 2. Further, the Philosopher (*Phys.* viii, 2) proves that in animals no new movement arises that is not preceded by a motion from without. But all human acts are new, since none is eternal. Consequently, the principle of all human acts is from without: and therefore there is nothing voluntary in them.

Objection 3. Further, he that acts voluntarily, can act of himself. But this is not true of man; for it is written (*Jn.* 15:5): "Without Me you can do nothing." Therefore there is nothing voluntary in human acts.

On the contrary, Damascene says (*De Fide Orth.*

ii) that "the voluntary is an act consisting in a rational operation." Now such are human acts. Therefore there is something voluntary in human acts.

I answer that, There must needs be something voluntary in human acts. In order to make this clear, we must take note that the principle of some acts or movements is within the agent, or that which is moved; whereas the principle of some movements or acts is outside. For when a stone is moved upwards, the principle of this movement is outside the stone: whereas when it is moved downwards, the principle of this movement is in the stone. Now of those things that are moved by an intrinsic principle, some move themselves, some not. For since every agent or thing moved, acts or is moved for an end, as stated above (q. 1, a. 2); those are perfectly moved by an intrinsic principle, whose intrinsic principle is one not only of movement but of movement for an end. Now in order for a thing to be done for an end, some knowledge of the end is necessary. Therefore, whatever so acts or is moved by an intrinsic prin-

* Nemesius, *De Natura Hom.* xxxii.

ciple, that it has some knowledge of the end, has within itself the principle of its act, so that it not only acts, but acts for an end. On the other hand, if a thing has no knowledge of the end, even though it have an intrinsic principle of action or movement, nevertheless the principle of acting or being moved for an end is not in that thing, but in something else, by which the principle of its action towards an end is not in that thing, but in something else, by which the principle of its action towards an end is imprinted on it. Wherefore such like things are not said to move themselves, but to be moved by others. But those things which have a knowledge of the end are said to move themselves because there is in them a principle by which they not only act but also act for an end. And consequently, since both are from an intrinsic principle, to wit, that they act and that they act for an end, the movements of such things are said to be voluntary: for the word “voluntary” implies that their movements and acts are from their own inclination. Hence it is that, according to the definitions of Aristotle, Gregory of Nyssa, and Damascene[†], the voluntary is defined not only as having “a principle within” the agent, but also as implying “knowledge.” Therefore, since man especially knows the end of his work, and moves himself, in his acts especially is the voluntary to be found.

Reply to Objection 1. Not every principle is a first principle. Therefore, although it is essential to the voluntary act that its principle be within the agent, nevertheless it is not contrary to the nature of the voluntary act that this intrinsic principle be caused or moved by an extrinsic principle: because it is not essential to the voluntary act that its intrinsic principle be a first principle. Yet again it must be observed that a principle of movement may happen to be first in a genus, but not first simply: thus in the genus of things subject to alteration, the first principle of alteration is a heavenly body,

which is nevertheless, is not the first mover simply, but is moved locally by a higher mover. And so the intrinsic principle of the voluntary act, i.e. the cognitive and appetitive power, is the first principle in the genus of appetitive movement, although it is moved by an extrinsic principle according to other species of movement.

Reply to Objection 2. New movements in animals are indeed preceded by a motion from without; and this in two respects. First, in so far as by means of an extrinsic motion an animal’s senses are confronted with something sensible, which, on being apprehended, moves the appetite. Thus a lion, on seeing a stag in movement and coming towards him, begins to be moved towards the stag. Secondly, in so far as some extrinsic motion produces a physical change in an animal’s body, as in the case of cold or heat; and through the body being affected by the motion of an outward body, the sensitive appetite which is the power of a bodily organ, is also moved indirectly; thus it happens that through some alteration in the body the appetite is roused to the desire of something. But this is not contrary to the nature of voluntariness, as stated above (ad 1), for such movements caused by an extrinsic principle are of another genus of movement.

Reply to Objection 3. God moves man to act, not only by proposing the appetible to the senses, or by effecting a change in his body, but also by moving the will itself; because every movement either of the will or of nature, proceeds from God as the First Mover. And just as it is not incompatible with nature that the natural movement be from God as the First Mover, inasmuch as nature is an instrument of God moving it: so it is not contrary to the essence of a voluntary act, that it proceed from God, inasmuch as the will is moved by God. Nevertheless both natural and voluntary movements have this in common, that it is essential that they should proceed from a principle within the agent.

Whether there is anything voluntary in irrational animals?

Ia IIae q. 6 a. 2

Objection 1. It would seem that there is nothing voluntary in irrational animals. For a thing is called “voluntary” from “voluntas” [will]. Now since the will is in the reason (De Anima iii, 9), it cannot be in irrational animals. Therefore neither is there anything voluntary in them.

Objection 2. Further, according as human acts are voluntary, man is said to be master of his actions. But irrational animals are not masters of their actions; for “they act not; rather are they acted upon,” as Damascene says (De Fide Orth. ii, 27). Therefore there is no such thing as a voluntary act in irrational animals.

Objection 3. Further, Damascene says (De Fide Orth. 24) that “voluntary acts lead to praise and blame.” But neither praise nor blame is due to the acts of irrational minds. Therefore such acts are not voluntary.

On the contrary, The Philosopher says (Ethic. iii, 2) that “both children and irrational animals participate in the voluntary.” The same is said by Damascene (De Fide Orth. 24) and Gregory of Nyssa*.

I answer that, As stated above (a. 1), it is essential to the voluntary act that its principle be within the agent, together with some knowledge of the end. Now knowledge of the end is twofold; perfect and imperfect. Perfect knowledge of the end consists in not only apprehending the thing which is the end, but also in knowing it under the aspect of end, and the relationship of the means to that end. And such knowledge belongs to none but the rational nature. But imperfect knowledge of the end consists in mere apprehension of the end, without knowing it under the aspect of end, or the relationship of an act to the end. Such knowledge of the end is ex-

[†] See Objection 1 * Nemesius, De Nat. Hom. xxxii.

exercised by irrational animals, through their senses and their natural estimative power.

Consequently perfect knowledge of the end leads to the perfect voluntary; inasmuch as, having apprehended the end, a man can, from deliberating about the end and the means thereto, be moved, or not, to gain that end. But imperfect knowledge of the end leads to the imperfect voluntary; inasmuch as the agent apprehends the end, but does not deliberate, and is moved to the end at once. Wherefore the voluntary in its perfection belongs to none but the rational nature: whereas the imperfect voluntary is within the competency of even irrational animals.

Reply to Objection 1. The will is the name of the rational appetite; and consequently it cannot be in

things devoid of reason. But the word “voluntary” is derived from “voluntas” [will], and can be extended to those things in which there is some participation of will, by way of likeness thereto. It is thus that voluntary action is attributed to irrational animals, in so far as they are moved to an end, through some kind of knowledge.

Reply to Objection 2. The fact that man is master of his actions, is due to his being able to deliberate about them: for since the deliberating reason is indifferently disposed to opposite things, the will can be inclined to either. But it is not thus that voluntariness is in irrational animals, as stated above.

Reply to Objection 3. Praise and blame are the result of the voluntary act, wherein is the perfect voluntary; such as is not to be found in irrational animals.

Whether there can be voluntariness without any act?

Ia IIae q. 6 a. 3

Objection 1. It would seem that voluntariness cannot be without any act. For that is voluntary which proceeds from the will. But nothing can proceed from the will, except through some act, at least an act of the will. Therefore there cannot be voluntariness without act.

Objection 2. Further, just as one is said to wish by an act of the will, so when the act of the will ceases, one is said not to wish. But not to wish implies involuntariness, which is contrary to voluntariness. Therefore there can be nothing voluntary when the act of the will ceases.

Objection 3. Further, knowledge is essential to the voluntary, as stated above (Aa. 1,2). But knowledge involves an act. Therefore voluntariness cannot be without some act.

On the contrary, The word “voluntary” is applied to that of which we are masters. Now we are masters in respect of to act and not to act, to will and not to will. Therefore just as to act and to will are voluntary, so also are not to act and not to will.

I answer that, Voluntary is what proceeds from the will. Now one thing proceeds from another in two ways. First, directly; in which sense something proceeds from another inasmuch as this other acts; for instance, heating from heat. Secondly, indirectly; in which sense something proceeds from another through this other not acting; thus the sinking of a ship is set down to the helmsman, from his having ceased to steer. But we must take note that the cause of what follows from want of action is not always the agent as not acting; but only then when the agent can and ought to act. For if the helms-

man were unable to steer the ship or if the ship’s helm be not entrusted to him, the sinking of the ship would not be set down to him, although it might be due to his absence from the helm.

Since, then, the will by willing and acting, is able, and sometimes ought, to hinder not-willing and not-acting; this not-willing and not-acting is imputed to, as though proceeding from, the will. And thus it is that we can have the voluntary without an act; sometimes without outward act, but with an interior act; for instance, when one wills not to act; and sometimes without even an interior act, as when one does not will to act.

Reply to Objection 1. We apply the word “voluntary” not only to that which proceeds from the will directly, as from its action; but also to that which proceeds from it indirectly as from its inaction.

Reply to Objection 2. “Not to wish” is said in two senses. First, as though it were one word, and the infinitive of “I-do-not-wish.” Consequently just as when I say “I do not wish to read,” the sense is, “I wish not to read”; so “not to wish to read” is the same as “to wish not to read,” and in this sense “not to wish” implies involuntariness. Secondly it is taken as a sentence: and then no act of the will is affirmed. And in this sense “not to wish” does not imply involuntariness.

Reply to Objection 3. Voluntariness requires an act of knowledge in the same way as it requires an act of will; namely, in order that it be in one’s power to consider, to wish and to act. And then, just as not to wish, and not to act, when it is time to wish and to act, is voluntary, so is it voluntary not to consider.

Whether violence can be done to the will?

Ia IIae q. 6 a. 4

Objection 1. It would seem that violence can be done to the will. For everything can be compelled by that which is more powerful. But there is something, namely, God, that is more powerful than the human will.

Therefore it can be compelled, at least by Him.

Objection 2. Further, every passive subject is compelled by its active principle, when it is changed by it. But the will is a passive force: for it is a “mover moved”

(De Anima iii, 10). Therefore, since it is sometimes moved by its active principle, it seems that sometimes it is compelled.

Objection 3. Further, violent movement is that which is contrary to nature. But the movement of the will is sometimes contrary to nature; as is clear of the will's movement to sin, which is contrary to nature, as Damascene says (De Fide Orth. iv, 20). Therefore the movement of the will can be compelled.

On the contrary, Augustine says (De Civ. Dei v, 10) that what is done by the will is not done of necessity. Now, whatever is done under compulsion is done of necessity: consequently what is done by the will, cannot be compelled. Therefore the will cannot be compelled to act.

I answer that, The act of the will is twofold: one is its immediate act, as it were, elicited by it, namely, "to wish"; the other is an act of the will commanded by it, and put into execution by means of some other power, such as "to walk" and "to speak," which are commanded by the will to be executed by means of the motive power.

As regards the commanded acts of the will, then, the will can suffer violence, in so far as violence can prevent the exterior members from executing the will's command. But as to the will's own proper act, violence cannot be done to the will.

The reason of this is that the act of the will is nothing else than an inclination proceeding from the interior principle of knowledge: just as the natural appetite is an inclination proceeding from an interior principle without knowledge. Now what is compelled or violent is from an exterior principle. Consequently it is contrary

to the nature of the will's own act, that it should be subject to compulsion and violence: just as it is also contrary to the nature of a natural inclination or movement. For a stone may have an upward movement from violence, but that this violent movement be from its natural inclination is impossible. In like manner a man may be dragged by force: but it is contrary to the very notion of violence, that he be dragged of his own will.

Reply to Objection 1. God Who is more powerful than the human will, can move the will of man, according to Prov. 21:1: "The heart of the king is in the hand of the Lord; whithersoever He will He shall turn it." But if this were by compulsion, it would no longer be by an act of the will, nor would the will itself be moved, but something else against the will.

Reply to Objection 2. It is not always a violent movement, when a passive subject is moved by its active principle; but only when this is done against the interior inclination of the passive subject. Otherwise every alteration and generation of simply bodies would be unnatural and violent: whereas they are natural by reason of the natural interior aptitude of the matter or subject to such a disposition. In like manner when the will is moved, according to its own inclination, by the appetible object, this movement is not violent but voluntary.

Reply to Objection 3. That to which the will tends by sinning, although in reality it is evil and contrary to the rational nature, nevertheless is apprehended as something good and suitable to nature, in so far as it is suitable to man by reason of some pleasurable sensation or some vicious habit.

Whether violence causes involuntariness?

Ia IIae q. 6 a. 5

Objection 1. It would seem that violence does not cause involuntariness. For we speak of voluntariness and involuntariness in respect of the will. But violence cannot be done to the will, as shown above (a. 4). Therefore violence cannot cause involuntariness.

Objection 2. Further, that which is done involuntarily is done with grief, as Damascene (De Fide Orth. ii, 24) and the Philosopher (Ethic. iii, 5) say. But sometimes a man suffers compulsion without being grieved thereby. Therefore violence does not cause involuntariness.

Objection 3. Further, what is from the will cannot be involuntary. But some violent actions proceed from the will: for instance, when a man with a heavy body goes upwards; or when a man contorts his limbs in a way contrary to their natural flexibility. Therefore violence does not cause involuntariness.

On the contrary, The Philosopher (Ethic. iii, 1) and Damascene (De Fide Orth. ii, 24) say that "things done under compulsion are involuntary."

I answer that, Violence is directly opposed to the voluntary, as likewise to the natural. For the volun-

tary and the natural have this in common, that both are from an intrinsic principle; whereas violence is from an extrinsic principle. And for this reason, just as in things devoid of knowledge, violence effects something against nature: so in things endowed with knowledge, it effects something against the will. Now that which is against nature is said to be "unnatural"; and in like manner that which is against the will is said to be "involuntary." Therefore violence causes involuntariness.

Reply to Objection 1. The involuntary is opposed to the voluntary. Now it has been said (a. 4) that not only the act, which proceeds immediately from the will, is called voluntary, but also the act commanded by the will. Consequently, as to the act which proceeds immediately from the will, violence cannot be done to the will, as stated above (a. 4): wherefore violence cannot make that act involuntary. But as to the commanded act, the will can suffer violence: and consequently in this respect violence causes involuntariness.

Reply to Objection 2. As that is said to be natural, which is according to the inclination of nature; so that is said to be voluntary, which is according to the inclina-

tion of the will. Now a thing is said to be natural in two ways. First, because it is from nature as from an active principle: thus it is natural for fire to produce heat. Secondly, according to a passive principle; because, to wit, there is in nature an inclination to receive an action from an extrinsic principle: thus the movement of the heavens is said to be natural, by reason of the natural aptitude in a heavenly body to receive such movement; although the cause of that movement is a voluntary agent. In like manner an act is said to be voluntary in two ways. First, in regard to action, for instance, when one wishes to be passive to another. Hence when action is brought to bear on something, by an extrinsic agent, as long as the will to suffer that action remains in the passive subject, there is not violence simply: for although the pa-

tient does nothing by way of action, he does something by being willing to suffer. Consequently this cannot be called involuntary.

Reply to Objection 3. As the Philosopher says (Phys. viii, 4) the movement of an animal, whereby at times an animal is moved against the natural inclination of the body, although it is not natural to the body, is nevertheless somewhat natural to the animal, to which it is natural to be moved according to its appetite. Accordingly this is violent, not simply but in a certain respect. The same remark applies in the case of one who contorts his limbs in a way that is contrary to their natural disposition. For this is violent in a certain respect, i.e. as to that particular limb; but not simply, i.e. as to the man himself.

Whether fear causes involuntariness simply?

Ia IIae q. 6 a. 6

Objection 1. It would seem that fear causes involuntariness simply. For just as violence regards that which is contrary to the will at the time, so fear regards a future evil which is repugnant to the will. But violence causes involuntariness simply. Therefore fear too causes involuntariness simply.

Objection 2. Further, that which is such of itself, remains such, whatever be added to it: thus what is hot of itself, as long as it remains, is still hot, whatever be added to it. But that which is done through fear, is involuntary in itself. Therefore, even with the addition of fear, it is involuntary.

Objection 3. Further, that which is such, subject to a condition, is such in a certain respect; whereas what is such, without any condition, is such simply: thus what is necessary, subject to a condition, is necessary in some respect: but what is necessary absolutely, is necessary simply. But that which is done through fear, is absolutely involuntary; and is not voluntary, save under a condition, namely, in order that the evil feared may be avoided. Therefore that which is done through fear, is involuntary simply.

On the contrary, Gregory of Nyssa* and the Philosopher (Ethic. iii, 1) say that such things as are done through fear are “voluntary rather than involuntary.”

I answer that, As the Philosopher says (Ethic. iii) and likewise Gregory of Nyssa in his book on Man (Nemesius, De Nat. Hom. xxx), such things are done through fear “are of a mixed character,” being partly voluntary and partly involuntary. For that which is done through fear, considered in itself, is not voluntary; but it becomes voluntary in this particular case, in order, namely, to avoid the evil feared.

But if the matter be considered aright, such things are voluntary rather than involuntary; for they are voluntary simply, but involuntary in a certain respect. For a thing is said to be simply, according as it is in act; but

according as it is only in apprehension, it is not simply, but in a certain respect. Now that which is done through fear, is in act in so far as it is done. For, since acts are concerned with singulars; and the singular, as such, is here and now; that which is done is in act, in so far as it is here and now and under other individuating circumstances. And that which is done through fear is voluntary, inasmuch as it is here and now, that is to say, in so far as, under the circumstances, it hinders a greater evil which was feared; thus the throwing of the cargo into the sea becomes voluntary during the storm, through fear of the danger: wherefore it is clear that it is voluntary simply. And hence it is that what is done out of fear is essentially voluntary, because its principle is within. But if we consider what is done through fear, as outside this particular case, and inasmuch as it is repugnant to the will, this is merely a consideration of the mind. And consequently what is done through fear is involuntary, considered in that respect, that is to say, outside the actual circumstances of the case.

Reply to Objection 1. Things done through fear and compulsion differ not only according to present and future time, but also in this, that the will does not consent, but is moved entirely counter to that which is done through compulsion: whereas what is done through fear, becomes voluntary, because the will is moved towards it, albeit not for its own sake, but on account of something else, that is, in order to avoid an evil which is feared. For the conditions of a voluntary act are satisfied, if it be done on account of something else voluntary: since the voluntary is not only what we wish, for its own sake, as an end, but also what we wish for the sake of something else, as an end. It is clear therefore that in what is done from compulsion, the will does nothing inwardly; whereas in what is done through fear, the will does something. Accordingly, as Gregory of Nyssa† says, in order to exclude things done through fear, a violent action is defined as not only one, “the

* Nemesius, De Nat. Hom. xxx. † Nemesius, De Nat. Hom. xxx.

principal whereof is from without,” but with the addition, “in which he that suffers violence concurs not at all”; because the will of him that is in fear, does concur somewhat in that which he does through fear.

Reply to Objection 2. Things that are such absolutely, remain such, whatever be added to them; for instance, a cold thing, or a white thing: but things that are such relatively, vary according as they are compared with different things. For what is big in comparison with one thing, is small in comparison with another. Now a thing is said to be voluntary, not only for its

own sake, as it were absolutely; but also for the sake of something else, as it were relatively. Accordingly, nothing prevents a thing which was not voluntary in comparison with one thing, from becoming voluntary when compared with another.

Reply to Objection 3. That which is done through fear, is voluntary without any condition, that is to say, according as it is actually done: but it is involuntary, under a certain condition, that is to say, if such a fear were not threatening. Consequently, this argument proves rather the opposite.

Whether concupiscence causes involuntariness?

Ia IIae q. 6 a. 7

Objection 1. It would seem that concupiscence causes involuntariness. For just as fear is a passion, so is concupiscence. But fear causes involuntariness to a certain extent. Therefore concupiscence does so too.

Objection 2. Further, just as the timid man through fear acts counter to that which he proposed, so does the incontinent, through concupiscence. But fear causes involuntariness to a certain extent. Therefore concupiscence does so also.

Objection 3. Further, knowledge is necessary for voluntariness. But concupiscence impairs knowledge; for the Philosopher says (*Ethic. vi, 5*) that “delight,” or the lust of pleasure, “destroys the judgment of prudence.” Therefore concupiscence causes involuntariness.

On the contrary, Damascene says (*De Fide Orth. ii, 24*): “The involuntary act deserves mercy or indulgence, and is done with regret.” But neither of these can be said of that which is done out of concupiscence. Therefore concupiscence does not cause involuntariness.

I answer that, Concupiscence does not cause involuntariness, but on the contrary makes something to be voluntary. For a thing is said to be voluntary, from the fact that the will is moved to it. Now concupiscence inclines the will to desire the object of concupiscence. Therefore the effect of concupiscence is to make something to be voluntary rather than involuntary.

Reply to Objection 1. Fear regards evil, but concupiscence regards good. Now evil of itself is counter to the will, whereas good harmonizes with the will. Therefore fear has a greater tendency than concupiscence to

cause involuntariness.

Reply to Objection 2. He who acts from fear retains the repugnance of the will to that which he does, considered in itself. But he that acts from concupiscence, e.g. an incontinent man, does not retain his former will whereby he repudiated the object of his concupiscence; for his will is changed so that he desires that which previously he repudiated. Accordingly, that which is done out of fear is involuntary, to a certain extent, but that which is done from concupiscence is no-wise involuntary. For the man who yields to concupiscence acts counter to that which he purposed at first, but not counter to that which he desires now; whereas the timid man acts counter to that which in itself he desires now.

Reply to Objection 3. If concupiscence were to destroy knowledge altogether, as happens with those whom concupiscence has rendered mad, it would follow that concupiscence would take away voluntariness. And yet properly speaking it would not result in the act being involuntary, because in things bereft of reason, there is neither voluntary nor involuntary. But sometimes in those actions which are done from concupiscence, knowledge is not completely destroyed, because the power of knowing is not taken away entirely, but only the actual consideration in some particular possible act. Nevertheless, this itself is voluntary, according as by voluntary we mean that which is in the power of the will, for example “not to act” or “not to will,” and in like manner “not to consider”; for the will can resist the passion, as we shall state later on (*q. 10, a. 3; q. 77, a. 7*).

Whether ignorance causes involuntariness?

Ia IIae q. 6 a. 8

Objection 1. It would seem that ignorance does not cause involuntariness. For “the involuntary act deserves pardon,” as Damascene says (*De Fide Orth. ii, 24*). But sometimes that which is done through ignorance does not deserve pardon, according to *1 Cor. 14:38*: “If any man know not, he shall not be known.” Therefore ignorance does not cause involuntariness.

Objection 2. Further, every sin implies ignorance; according to *Prov. 14: 22*: “They err, that work evil.” If, therefore, ignorance causes involuntariness, it would follow that every sin is involuntary: which is opposed to the saying of Augustine, that “every sin is voluntary” (*De Vera Relig. xiv*).

Objection 3. Further, “involuntariness is not with-

out sadness,” as Damascene says (De Fide Orth. ii, 24). But some things are done out of ignorance, but without sadness: for instance, a man may kill a foe, whom he wishes to kill, thinking at the time that he is killing a stag. Therefore ignorance does not cause involuntariness.

On the contrary, Damascene (De Fide Orth. ii, 24) and the Philosopher (Ethic. iii, 1) say that “what is done through ignorance is involuntary.”

I answer that, If ignorance causes involuntariness, it is in so far as it deprives one of knowledge, which is a necessary condition of voluntariness, as was declared above (a. 1). But it is not every ignorance that deprives one of this knowledge. Accordingly, we must take note that ignorance has a threefold relationship to the act of the will: in one way, “concomitantly”; in another, “consequently”; in a third way, “antecedently.” “Concomitantly,” when there is ignorance of what is done; but, so that even if it were known, it would be done. For then, ignorance does not induce one to wish this to be done, but it just happens that a thing is at the same time done, and not known: thus in the example given (obj. 3) a man did indeed wish to kill his foe, but killed him in ignorance, thinking to kill a stag. And ignorance of this kind, as the Philosopher states (Ethic. iii, 1), does not cause involuntariness, since it is not the cause of anything that is repugnant to the will: but it causes “non-voluntariness,” since that which is unknown cannot be actually willed. Ignorance is “consequent” to the act of the will, in so far as ignorance itself is voluntary: and this happens in two ways, in accordance with the two aforesaid modes of voluntary (a. 3). First, because the act of the will is brought to bear on the ignorance: as when a man wishes not to know, that he may have an excuse for sin, or that he may not be withheld from sin;

according to Job 21:14: “We desire not the knowledge of Thy ways.” And this is called “affected ignorance.” Secondly, ignorance is said to be voluntary, when it regards that which one can and ought to know: for in this sense “not to act” and “not to will” are said to be voluntary, as stated above (a. 3). And ignorance of this kind happens, either when one does not actually consider what one can and ought to consider; this is called “ignorance of evil choice,” and arises from some passion or habit: or when one does not take the trouble to acquire the knowledge which one ought to have; in which sense, ignorance of the general principles of law, which one ought to know, is voluntary, as being due to negligence. Accordingly, if in either of these ways, ignorance is voluntary, it cannot cause involuntariness simply. Nevertheless it causes involuntariness in a certain respect, inasmuch as it precedes the movement of the will towards the act, which movement would not be, if there were knowledge. Ignorance is “antecedent” to the act of the will, when it is not voluntary, and yet is the cause of man’s willing what he would not will otherwise. Thus a man may be ignorant of some circumstance of his act, which he was not bound to know, the result being that he does that which he would not do, if he knew of that circumstance; for instance, a man, after taking proper precaution, may not know that someone is coming along the road, so that he shoots an arrow and slays a passer-by. Such ignorance causes involuntariness simply.

From this may be gathered the solution of the objections. For the first objection deals with ignorance of what a man is bound to know. The second, with ignorance of choice, which is voluntary to a certain extent, as stated above. The third, with that ignorance which is concomitant with the act of the will.

FIRST PART OF THE SECOND PART, QUESTION 60

How the Moral Virtues Differ From One Another (In Five Articles)

We must now consider how the moral virtues differ from one another: under which head there are five points of inquiry:

- (1) Whether there is only one moral virtue?
- (2) Whether those moral virtues which are about operations, are distinct from those which are about passions?
- (3) Whether there is but one moral virtue about operations?
- (4) Whether there are different moral virtues about different passions?
- (5) Whether the moral virtues differ in point of the various objects of the passions?

Whether there is only one moral virtue?

Ia IIae q. 60 a. 1

Objection 1. It would seem that there is only one moral virtue. Because just as the direction of moral actions belongs to reason which is the subject of the intellectual virtues; so does their inclination belong to the appetite which is the subject of moral virtues. But there is only one intellectual virtue to direct all moral acts, viz. prudence. Therefore there is also but one moral virtue to give all moral acts their respective inclinations.

Objection 2. Further, habits differ, not in respect of their material objects, but according to the formal aspect of their objects. Now the formal aspect of the good to which moral virtue is directed, is one thing, viz. the mean defined by reason. Therefore, seemingly, there is but one moral virtue.

Objection 3. Further, things pertaining to morals are specified by their end, as stated above (q. 1, a. 3). Now there is but one common end of all moral virtues, viz. happiness, while the proper and proximate ends are infinite in number. But the moral virtues themselves are not infinite in number. Therefore it seems that there is but one.

On the contrary, One habit cannot be in several powers, as stated above (q. 56, a. 2). But the subject of the moral virtues is the appetitive part of the soul, which is divided into several powers, as stated in the Ia, q. 80, a. 2; Ia, q. 81, a. 2. Therefore there cannot be only one moral virtue.

I answer that, As stated above (q. 58, Aa. 1,2,3), the moral virtues are habits of the appetitive faculty. Now habits differ specifically according to the specific differences of their objects, as stated above (q. 54, a. 2). Again, the species of the object of appetite, as of any thing, depends on its specific form which it receives from the agent. But we must observe that the matter of the passive subject bears a twofold relation to the agent. For sometimes it receives the form of the agent, in the same kind specifically as the agent has that form, as happens with all univocal agents, so that if the agent be one specifically, the matter must of necessity receive

a form specifically one: thus the univocal effect of fire is of necessity something in the species of fire. Sometimes, however, the matter receives the form from the agent, but not in the same kind specifically as the agent, as is the case with non-univocal causes of generation: thus an animal is generated by the sun. In this case the forms received into matter are not of one species, but vary according to the adaptability of the matter to receive the influx of the agent: for instance, we see that owing to the one action of the sun, animals of various species are produced by putrefaction according to the various adaptability of matter.

Now it is evident that in moral matters the reason holds the place of commander and mover, while the appetitive power is commanded and moved. But the appetite does not receive the direction of reason univocally so to say; because it is rational, not essentially, but by participation (Ethic. i, 13). Consequently objects made appetible by the direction of reason belong to various species, according to their various relations to reason: so that it follows that moral virtues are of various species and are not one only.

Reply to Objection 1. The object of the reason is truth. Now in all moral matters, which are contingent matters of action, there is but one kind of truth. Consequently, there is but one virtue to direct all such matters, viz. prudence. On the other hand, the object of the appetitive power is the appetible good, which varies in kind according to its various relations to reason, the directing power.

Reply to Objection 2. This formal element is one generically, on account of the unity of the agent: but it varies in species, on account of the various relations of the receiving matter, as explained above.

Reply to Objection 3. Moral matters do not receive their species from the last end, but from their proximate ends: and these, although they be infinite in number, are not infinite in species.

Objection 1. It would seem that moral virtues are not divided into those which are about operations and those which are about passions. For the Philosopher says (*Ethic.* ii, 3) that moral virtue is “an operative habit whereby we do what is best in matters of pleasure or sorrow.” Now pleasure and sorrow are passions, as stated above (q. 31, a. 1; q. 35, a. 1). Therefore the same virtue which is about passions is also about operations, since it is an operative habit.

Objection 2. Further, the passions are principles of external action. If therefore some virtues regulate the passions, they must, as a consequence, regulate operations also. Therefore the same moral virtues are about both passions and operations.

Objection 3. Further, the sensitive appetite is moved well or ill towards every external operation. Now movements of the sensitive appetite are passions. Therefore the same virtues that are about operations are also about passions.

On the contrary, The Philosopher reckons justice to be about operations; and temperance, fortitude and gentleness, about passions (*Ethic.* ii, 3,7; v, 1, seqq.).

I answer that, Operation and passion stand in a twofold relation to virtue. First, as its effects; and in this way every moral virtue has some good operations as its product; and a certain pleasure or sorrow which are passions, as stated above (q. 59, a. 4, ad 1).

Secondly, operation may be compared to moral virtue as the matter about which virtue is concerned: and in this sense those moral virtues which are about operations must needs differ from those which are about passions. The reason for this is that good and evil, in certain operations, are taken from the very nature of

those operations, no matter how man may be affected towards them: viz. in so far as good and evil in them depend on their being commensurate with someone else. In operations of this kind there needs to be some power to regulate the operations in themselves: such are buying and selling, and all such operations in which there is an element of something due or undue to another. For this reason justice and its parts are properly about operations as their proper matter. On the other hand, in some operations, good and evil depend only on commensuration with the agent. Consequently good and evil in these operations depend on the way in which man is affected to them. And for this reason in such like operations virtue must needs be chiefly about internal emotions which are called the passions of the soul, as is evidently the case with temperance, fortitude and the like.

It happens, however, in operations which are directed to another, that the good of virtue is overlooked by reason of some inordinate passion of the soul. In such cases justice is destroyed in so far as the due measure of the external act is destroyed: while some other virtue is destroyed in so far as the internal passions exceed their due measure. Thus when through anger, one man strikes another, justice is destroyed in the undue blow; while gentleness is destroyed by the immoderate anger. The same may be clearly applied to other virtues.

This suffices for the Replies to the Objections. For the first considers operations as the effect of virtue, while the other two consider operation and passion as concurring in the same effect. But in some cases virtue is chiefly about operations, in others, about passions, for the reason given above.

Objection 1. It would seem that there is but one moral virtue about operations. Because the rectitude of all external operations seems to belong to justice. Now justice is but one virtue. Therefore there is but one virtue about operations.

Objection 2. Further, those operations seem to differ most, which are directed on the one side to the good of the individual, and on the other to the good of the many. But this diversity does not cause diversity among the moral virtues: for the Philosopher says (*Ethic.* v, 1) that legal justice, which directs human acts to the common good, does not differ, save logically, from the virtue which directs a man’s actions to one man only. Therefore diversity of operations does not cause a diversity of moral virtues.

Objection 3. Further, if there are various moral virtues about various operations, diversity of moral virtues would needs follow diversity of operations. But

this is clearly untrue: for it is the function of justice to establish rectitude in various kinds of commutations, and again in distributions, as is set down in *Ethic.* v, 2. Therefore there are not different virtues about different operations.

On the contrary, Religion is a moral virtue distinct from piety, both of which are about operations.

I answer that, All the moral virtues that are about operations agree in one general notion of justice, which is in respect of something due to another: but they differ in respect of various special notions. The reason for this is that in external operations, the order of reason is established, as we have stated (a. 2), not according as how man is affected towards such operations, but according to the becomingness of the thing itself; from which becomingness we derive the notion of something due which is the formal aspect of justice: for, seemingly, it pertains to justice that a man give another his

due. Wherefore all such virtues as are about operations, bear, in some way, the character of justice. But the thing due is not of the same kind in all these virtues: for something is due to an equal in one way, to a superior, in another way, to an inferior, in yet another; and the nature of a debt differs according as it arises from a contract, a promise, or a favor already conferred. And corresponding to these various kinds of debt there are various virtues: e.g. "Religion" whereby we pay our debt to God; "Piety," whereby we pay our debt to our parents or to our country; "Gratitude," whereby we pay our debt to our benefactors, and so forth.

Reply to Objection 1. Justice properly so called is one special virtue, whose object is the perfect due, which can be paid in the equivalent. But the name of justice is extended also to all cases in which something due is rendered: in this sense it is not as a special virtue.

Reply to Objection 2. That justice which seeks the common good is another virtue from that which is directed to the private good of an individual: wherefore

common right differs from private right; and Tully (*De Inv.* ii) reckons as a special virtue, piety which directs man to the good of his country. But that justice which directs man to the common good is a general virtue through its act of command: since it directs all the acts of the virtues to its own end, viz. the common good. And the virtues, in so far as they are commanded by that justice, receive the name of justice: so that virtue does not differ, save logically, from legal justice; just as there is only a logical difference between a virtue that is active of itself, and a virtue that is active through the command of another virtue.

Reply to Objection 3. There is the same kind of due in all the operations belonging to special justice. Consequently, there is the same virtue of justice, especially in regard to commutations. For it may be that distributive justice is of another species from commutative justice; but about this we shall inquire later on (*Ia IIae*, q. 61, a. 1).

Whether there are different moral virtues about different passions?

Ia IIae q. 60 a. 4

Objection 1. It would seem that there are not different moral virtues about different passions. For there is but one habit about things that concur in their source and end: as is evident especially in the case of sciences. But the passions all concur in one source, viz. love; and they all terminate in the same end, viz. joy or sorrow, as we stated above (q. 25, *Aa*. 1,2,4; q. 27, a. 4). Therefore there is but one moral virtue about all the passions.

Objection 2. Further, if there were different moral virtues about different passions, it would follow that there are as many moral virtues as passions. But this clearly is not the case: since there is one moral virtue about contrary passions; namely, fortitude, about fear and daring; temperance, about pleasure and sorrow. Therefore there is no need for different moral virtues about different passions.

Objection 3. Further, love, desire, and pleasure are passions of different species, as stated above (q. 23, a. 4). Now there is but one virtue about all these three, viz. temperance. Therefore there are not different moral virtues about different passions.

On the contrary, Fortitude is about fear and daring; temperance about desire; meekness about anger; as stated in *Ethic.* iii, 6,10; iv, 5.

I answer that, It cannot be said that there is only one moral virtue about all the passions: since some passions are not in the same power as other passions; for some belong to the irascible, others to the concupiscible faculty, as stated above (q. 23, a. 1).

On the other hand, neither does every diversity of passions necessarily suffice for a diversity of moral virtues. First, because some passions are in contrary opposition to one another, such as joy and sorrow, fear and daring, and so on. About such passions as are thus

in opposition to one another there must needs be one same virtue. Because, since moral virtue consists in a kind of mean, the mean in contrary passions stands in the same ratio to both, even as in the natural order there is but one mean between contraries, e.g. between black and white. Secondly, because there are different passions contradicting reason in the same manner, e.g. by impelling to that which is contrary to reason, or by withdrawing from that which is in accord with reason. Wherefore the different passions of the concupiscible faculty do not require different moral virtues, because their movements follow one another in a certain order, as being directed to the one same thing, viz. the attainment of some good or the avoidance of some evil: thus from love proceeds desire, and from desire we arrive at pleasure; and it is the same with the opposite passions, for hatred leads to avoidance or dislike, and this leads to sorrow. On the other hand, the irascible passions are not all of one order, but are directed to different things: for daring and fear are about some great danger; hope and despair are about some difficult good; while anger seeks to overcome something contrary which has wrought harm. Consequently there are different virtues about such like passions: e.g. temperance, about the concupiscible passions; fortitude, about fear and daring; magnanimity, about hope and despair; meekness, about anger.

Reply to Objection 1. All the passions concur in one common principle and end; but not in one proper principle or end: and so this does not suffice for the unity of moral virtue.

Reply to Objection 2. Just as in the natural order the same principle causes movement from one extreme and movement towards the other; and as in the intel-

lectual order contraries have one common ratio; so too between contrary passions there is but one moral virtue, which, like a second nature, consents to reason's dictates.

Reply to Objection 3. Those three passions are directed to the same object in a certain order, as stated above: and so they belong to the same virtue.

Whether the moral virtues differ in point of the various objects of the passions?

Ia IIae q. 60 a. 5

Objection 1. It would seem that the moral virtues do not differ according to the objects of the passions. For just as there are objects of passions, so are there objects of operations. Now those moral virtues that are about operations, do not differ according to the objects of those operations: for the buying and selling either of a house or of a horse belong to the one same virtue of justice. Therefore neither do those moral virtues that are about passions differ according to the objects of those passions.

Objection 2. Further, the passions are acts or movements of the sensitive appetite. Now it needs a greater difference to differentiate habits than acts. Hence diverse objects which do not diversify the species of passions, do not diversify the species of moral virtue: so that there is but one moral virtue about all objects of pleasure, and the same applies to the other passions.

Objection 3. Further, more or less do not change a species. Now various objects of pleasure differ only by reason of being more or less pleasurable. Therefore all objects of pleasure belong to one species of virtue: and for the same reason so do all fearful objects, and the same applies to others. Therefore moral virtue is not diversified according to the objects of the passions.

Objection 4. Further, virtue hinders evil, even as it produces good. But there are various virtues about the desires for good things: thus temperance is about desires for the pleasure of touch, and "eutrapelia"* about pleasures in games. Therefore there should be different virtues about fears of evils.

On the contrary, Chastity is about sexual pleasures, abstinence about pleasures of the table, and "eutrapelia" about pleasures in games.

I answer that, The perfection of a virtue depends on the reason; whereas the perfection of a passion depends on the sensitive appetite. Consequently virtues must needs be differentiated according to their relation to reason, but the passions according to their relation to the appetite. Hence the objects of the passions, according as they are variously related to the sensitive appetite, cause the different species of passions: while, according as they are related to reason, they cause the different species of virtues. Now the movement of reason is not the same as that of the sensitive appetite. Wherefore nothing hinders a difference of objects from causing diversity of passions, without causing diversity of virtues, as when one virtue is about several passions, as stated above (a. 4); and again, a difference of objects from causing different virtues, without causing a difference

of passions, since several virtues are directed about one passion, e.g. pleasure.

And because diverse passions belonging to diverse powers, always belong to diverse virtues, as stated above (a. 4); therefore a difference of objects that corresponds to a difference of powers always causes a specific difference of virtues—for instance the difference between that which is good absolutely speaking, and that which is good and difficult to obtain. Moreover since the reason rules man's lower powers in a certain order, and even extends to outward things; hence, one single object of the passions, according as it is apprehended by sense, imagination, or reason, and again, according as it belongs to the soul, body, or external things, has various relations to reason, and consequently is of a nature to cause a difference of virtues. Consequently man's good which is the object of love, desire and pleasure, may be taken as referred either to a bodily sense, or to the inner apprehension of the mind: and this same good may be directed to man's good in himself, either in his body or in his soul, or to man's good in relation to other men. And every such difference, being differently related to reason, differentiates virtues.

Accordingly, if we take a good, and it be something discerned by the sense of touch, and something pertaining to the upkeep of human life either in the individual or in the species, such as the pleasures of the table or of sexual intercourse, it will belong to the virtue of "temperance." As regards the pleasures of the other senses, they are not intense, and so do not present much difficulty to the reason: hence there is no virtue corresponding to them; for virtue, "like art, is about difficult things" (Ethic. ii, 3).

On the other hand, good discerned not by the senses, but by an inner power, and belonging to man in himself, is like money and honor; the former, by its very nature, being employable for the good of the body, while the latter is based on the apprehension of the mind. These goods again may be considered either absolutely, in which way they concern the concupiscible faculty, or as being difficult to obtain, in which way they belong to the irascible part: which distinction, however, has no place in pleasurable objects of touch; since such are of base condition, and are becoming to man in so far as he has something in common with irrational animals. Accordingly in reference to money considered as a good absolutely, as an object of desire, pleasure, or love, there is "liberality": but if we consider this good as difficult to get, and as being the object of our hope, there

* eutrapelia † megaloprepeia

is “magnificence”[†]. With regard to that good which we call honor, taken absolutely, as the object of love, we have a virtue called “philotimia”[‡], i.e. “love of honor”: while if we consider it as hard to attain, and as an object of hope, then we have “magnanimity.” Wherefore liberality and “philotimia” seem to be in the concupiscible part, while magnificence and magnanimity are in the irascible.

As regards man’s good in relation to other men, it does not seem hard to obtain, but is considered absolutely, as the object of the concupiscible passions. This good may be pleasurable to a man in his behavior towards another either in some serious matter, in actions, to wit, that are directed by reason to a due end, or in playful actions, viz. that are done for mere pleasure, and which do not stand in the same relation to reason as the former. Now one man behaves towards another in serious matters, in two ways. First, as being pleasant in his regard, by becoming speech and deeds: and this belongs to a virtue which Aristotle (*Ethic.* ii, 7) calls “friendship”^{*}, and may be rendered “affability.” Secondly, one man behaves towards another by being frank with him, in words and deeds: this belongs to another virtue which (*Ethic.* iv, 7) he calls “truthfulness”[†]. For frankness is more akin to the reason than pleasure, and serious matters than play. Hence there is another virtue about the pleasures of games, which the Philosopher “eutrapelia”[‡] (*Ethic.* iv, 8).

It is therefore evident that, according to Aristotle,

there are ten moral virtues about the passions, viz. fortitude, temperance, liberality, magnificence, magnanimity, “philotimia,” gentleness, friendship, truthfulness, and “eutrapelia,” all of which differ in respect of their diverse matter, passions, or objects: so that if we add “justice,” which is about operations, there will be eleven in all.

Reply to Objection 1. All objects of the same specific operation have the same relation to reason: not so all the objects of the same specific passion; because operations do not thwart reason as the passions do.

Reply to Objection 2. Passions are not differentiated by the same rule as virtues are, as stated above.

Reply to Objection 3. More and less do not cause a difference of species, unless they bear different relations to reason.

Reply to Objection 4. Good is a more potent mover than evil: because evil does not cause movement save in virtue of good, as Dionysius states (*Div. Nom.* iv). Hence an evil does not prove an obstacle to reason, so as to require virtues unless that evil be great; there being, seemingly, one such evil corresponding to each kind of passion. Hence there is but one virtue, meekness, for every form of anger; and, again, but one virtue, fortitude, for all forms of daring. On the other hand, good involves difficulty, which requires virtue, even if it be not a great good in that particular kind of passion. Consequently there are various moral virtues about desires, as stated above.

[‡] *philotimia* * *philia* † *aletheia* ‡ *eutrapelia*

Objection 1. It would seem that there is only one moral virtue. Because just as the direction of moral actions belongs to reason which is the subject of the intellectual virtues; so does their inclination belong to the appetite which is the subject of moral virtues. But there is only one intellectual virtue to direct all moral acts, viz. prudence. Therefore there is also but one moral virtue to give all moral acts their respective inclinations.

Objection 2. Further, habits differ, not in respect of their material objects, but according to the formal aspect of their objects. Now the formal aspect of the good to which moral virtue is directed, is one thing, viz. the mean defined by reason. Therefore, seemingly, there is but one moral virtue.

Objection 3. Further, things pertaining to morals are specified by their end, as stated above (q. 1, a. 3). Now there is but one common end of all moral virtues, viz. happiness, while the proper and proximate ends are infinite in number. But the moral virtues themselves are not infinite in number. Therefore it seems that there is but one.

On the contrary, One habit cannot be in several powers, as stated above (q. 56, a. 2). But the subject of the moral virtues is the appetitive part of the soul, which is divided into several powers, as stated in the Ia, q. 80, a. 2; Ia, q. 81, a. 2. Therefore there cannot be only one moral virtue.

I answer that, As stated above (q. 58, Aa. 1,2,3), the moral virtues are habits of the appetitive faculty. Now habits differ specifically according to the specific differences of their objects, as stated above (q. 54, a. 2). Again, the species of the object of appetite, as of any thing, depends on its specific form which it receives from the agent. But we must observe that the matter of the passive subject bears a twofold relation to the agent. For sometimes it receives the form of the agent, in the same kind specifically as the agent has that form, as happens with all univocal agents, so that if the agent be one specifically, the matter must of necessity receive

a form specifically one: thus the univocal effect of fire is of necessity something in the species of fire. Sometimes, however, the matter receives the form from the agent, but not in the same kind specifically as the agent, as is the case with non-univocal causes of generation: thus an animal is generated by the sun. In this case the forms received into matter are not of one species, but vary according to the adaptability of the matter to receive the influx of the agent: for instance, we see that owing to the one action of the sun, animals of various species are produced by putrefaction according to the various adaptability of matter.

Now it is evident that in moral matters the reason holds the place of commander and mover, while the appetitive power is commanded and moved. But the appetite does not receive the direction of reason univocally so to say; because it is rational, not essentially, but by participation (Ethic. i, 13). Consequently objects made appetible by the direction of reason belong to various species, according to their various relations to reason: so that it follows that moral virtues are of various species and are not one only.

Reply to Objection 1. The object of the reason is truth. Now in all moral matters, which are contingent matters of action, there is but one kind of truth. Consequently, there is but one virtue to direct all such matters, viz. prudence. On the other hand, the object of the appetitive power is the appetible good, which varies in kind according to its various relations to reason, the directing power.

Reply to Objection 2. This formal element is one generically, on account of the unity of the agent: but it varies in species, on account of the various relations of the receiving matter, as explained above.

Reply to Objection 3. Moral matters do not receive their species from the last end, but from their proximate ends: and these, although they be infinite in number, are not infinite in species.

Objection 1. It would seem that moral virtues are not divided into those which are about operations and those which are about passions. For the Philosopher says (*Ethic.* ii, 3) that moral virtue is “an operative habit whereby we do what is best in matters of pleasure or sorrow.” Now pleasure and sorrow are passions, as stated above (q. 31, a. 1; q. 35, a. 1). Therefore the same virtue which is about passions is also about operations, since it is an operative habit.

Objection 2. Further, the passions are principles of external action. If therefore some virtues regulate the passions, they must, as a consequence, regulate operations also. Therefore the same moral virtues are about both passions and operations.

Objection 3. Further, the sensitive appetite is moved well or ill towards every external operation. Now movements of the sensitive appetite are passions. Therefore the same virtues that are about operations are also about passions.

On the contrary, The Philosopher reckons justice to be about operations; and temperance, fortitude and gentleness, about passions (*Ethic.* ii, 3,7; v, 1, seqq.).

I answer that, Operation and passion stand in a twofold relation to virtue. First, as its effects; and in this way every moral virtue has some good operations as its product; and a certain pleasure or sorrow which are passions, as stated above (q. 59, a. 4, ad 1).

Secondly, operation may be compared to moral virtue as the matter about which virtue is concerned: and in this sense those moral virtues which are about operations must needs differ from those which are about passions. The reason for this is that good and evil, in certain operations, are taken from the very nature of

those operations, no matter how man may be affected towards them: viz. in so far as good and evil in them depend on their being commensurate with someone else. In operations of this kind there needs to be some power to regulate the operations in themselves: such are buying and selling, and all such operations in which there is an element of something due or undue to another. For this reason justice and its parts are properly about operations as their proper matter. On the other hand, in some operations, good and evil depend only on commensuration with the agent. Consequently good and evil in these operations depend on the way in which man is affected to them. And for this reason in such like operations virtue must needs be chiefly about internal emotions which are called the passions of the soul, as is evidently the case with temperance, fortitude and the like.

It happens, however, in operations which are directed to another, that the good of virtue is overlooked by reason of some inordinate passion of the soul. In such cases justice is destroyed in so far as the due measure of the external act is destroyed: while some other virtue is destroyed in so far as the internal passions exceed their due measure. Thus when through anger, one man strikes another, justice is destroyed in the undue blow; while gentleness is destroyed by the immoderate anger. The same may be clearly applied to other virtues.

This suffices for the Replies to the Objections. For the first considers operations as the effect of virtue, while the other two consider operation and passion as concurring in the same effect. But in some cases virtue is chiefly about operations, in others, about passions, for the reason given above.

Objection 1. It would seem that there is but one moral virtue about operations. Because the rectitude of all external operations seems to belong to justice. Now justice is but one virtue. Therefore there is but one virtue about operations.

Objection 2. Further, those operations seem to differ most, which are directed on the one side to the good of the individual, and on the other to the good of the many. But this diversity does not cause diversity among the moral virtues: for the Philosopher says (*Ethic.* v, 1) that legal justice, which directs human acts to the common good, does not differ, save logically, from the virtue which directs a man's actions to one man only. Therefore diversity of operations does not cause a diversity of moral virtues.

Objection 3. Further, if there are various moral virtues about various operations, diversity of moral virtues would needs follow diversity of operations. But this is clearly untrue: for it is the function of justice to establish rectitude in various kinds of commutations, and again in distributions, as is set down in *Ethic.* v, 2. Therefore there are not different virtues about different operations.

On the contrary, Religion is a moral virtue distinct from piety, both of which are about operations.

I answer that, All the moral virtues that are about operations agree in one general notion of justice, which is in respect of something due to another: but they differ in respect of various special notions. The reason for this is that in external operations, the order of reason is established, as we have stated (a. 2), not according as how man is affected towards such operations, but according to the becomingness of the thing itself; from which becomingness we derive the notion of something due which is the formal aspect of justice: for, seemingly, it pertains to justice that a man give another his due. Wherefore all such virtues as are about operations, bear, in some way, the character of justice. But

the thing due is not of the same kind in all these virtues: for something is due to an equal in one way, to a superior, in another way, to an inferior, in yet another; and the nature of a debt differs according as it arises from a contract, a promise, or a favor already conferred. And corresponding to these various kinds of debt there are various virtues: e.g. "Religion" whereby we pay our debt to God; "Piety," whereby we pay our debt to our parents or to our country; "Gratitude," whereby we pay our debt to our benefactors, and so forth.

Reply to Objection 1. Justice properly so called is one special virtue, whose object is the perfect due, which can be paid in the equivalent. But the name of justice is extended also to all cases in which something due is rendered: in this sense it is not as a special virtue.

Reply to Objection 2. That justice which seeks the common good is another virtue from that which is directed to the private good of an individual: wherefore common right differs from private right; and Tully (*De Inv.* ii) reckons as a special virtue, piety which directs man to the good of his country. But that justice which directs man to the common good is a general virtue through its act of command: since it directs all the acts of the virtues to its own end, viz. the common good. And the virtues, in so far as they are commanded by that justice, receive the name of justice: so that virtue does not differ, save logically, from legal justice; just as there is only a logical difference between a virtue that is active of itself, and a virtue that is active through the command of another virtue.

Reply to Objection 3. There is the same kind of due in all the operations belonging to special justice. Consequently, there is the same virtue of justice, especially in regard to commutations. For it may be that distributive justice is of another species from commutative justice; but about this we shall inquire later on (*Ia IIae*, q. 61, a. 1).

Objection 1. It would seem that there are not different moral virtues about different passions. For there is but one habit about things that concur in their source and end: as is evident especially in the case of sciences. But the passions all concur in one source, viz. love; and they all terminate in the same end, viz. joy or sorrow, as we stated above (q. 25, Aa. 1,2,4; q. 27, a. 4). Therefore there is but one moral virtue about all the passions.

Objection 2. Further, if there were different moral virtues about different passions, it would follow that there are as many moral virtues as passions. But this clearly is not the case: since there is one moral virtue about contrary passions; namely, fortitude, about fear and daring; temperance, about pleasure and sorrow. Therefore there is no need for different moral virtues about different passions.

Objection 3. Further, love, desire, and pleasure are passions of different species, as stated above (q. 23, a. 4). Now there is but one virtue about all these three, viz. temperance. Therefore there are not different moral virtues about different passions.

On the contrary, Fortitude is about fear and daring; temperance about desire; meekness about anger; as stated in Ethic. iii, 6,10; iv, 5.

I answer that, It cannot be said that there is only one moral virtue about all the passions: since some passions are not in the same power as other passions; for some belong to the irascible, others to the concupiscible faculty, as stated above (q. 23, a. 1).

On the other hand, neither does every diversity of passions necessarily suffice for a diversity of moral virtues. First, because some passions are in contrary opposition to one another, such as joy and sorrow, fear and daring, and so on. About such passions as are thus in opposition to one another there must needs be one same virtue. Because, since moral virtue consists in a kind of mean, the mean in contrary passions stands in the same ratio to both, even as in the natural order

there is but one mean between contraries, e.g. between black and white. Secondly, because there are different passions contradicting reason in the same manner, e.g. by impelling to that which is contrary to reason, or by withdrawing from that which is in accord with reason. Wherefore the different passions of the concupiscible faculty do not require different moral virtues, because their movements follow one another in a certain order, as being directed to the one same thing, viz. the attainment of some good or the avoidance of some evil: thus from love proceeds desire, and from desire we arrive at pleasure; and it is the same with the opposite passions, for hatred leads to avoidance or dislike, and this leads to sorrow. On the other hand, the irascible passions are not all of one order, but are directed to different things: for daring and fear are about some great danger; hope and despair are about some difficult good; while anger seeks to overcome something contrary which has wrought harm. Consequently there are different virtues about such like passions: e.g. temperance, about the concupiscible passions; fortitude, about fear and daring; magnanimity, about hope and despair; meekness, about anger.

Reply to Objection 1. All the passions concur in one common principle and end; but not in one proper principle or end: and so this does not suffice for the unity of moral virtue.

Reply to Objection 2. Just as in the natural order the same principle causes movement from one extreme and movement towards the other; and as in the intellectual order contraries have one common ratio; so too between contrary passions there is but one moral virtue, which, like a second nature, consents to reason's dictates.

Reply to Objection 3. Those three passions are directed to the same object in a certain order, as stated above: and so they belong to the same virtue.

Objection 1. It would seem that the moral virtues do not differ according to the objects of the passions. For just as there are objects of passions, so are there objects of operations. Now those moral virtues that are about operations, do not differ according to the objects of those operations: for the buying and selling either of a house or of a horse belong to the one same virtue of justice. Therefore neither do those moral virtues that are about passions differ according to the objects of those passions.

Objection 2. Further, the passions are acts or movements of the sensitive appetite. Now it needs a greater difference to differentiate habits than acts. Hence diverse objects which do not diversify the species of passions, do not diversify the species of moral virtue: so that there is but one moral virtue about all objects of pleasure, and the same applies to the other passions.

Objection 3. Further, more or less do not change a species. Now various objects of pleasure differ only by reason of being more or less pleasurable. Therefore all objects of pleasure belong to one species of virtue: and for the same reason so do all fearful objects, and the same applies to others. Therefore moral virtue is not diversified according to the objects of the passions.

Objection 4. Further, virtue hinders evil, even as it produces good. But there are various virtues about the desires for good things: thus temperance is about desires for the pleasure of touch, and “eutrapelia”^{*} about pleasures in games. Therefore there should be different virtues about fears of evils.

On the contrary, Chastity is about sexual pleasures, abstinence about pleasures of the table, and “eutrapelia” about pleasures in games.

I answer that, The perfection of a virtue depends on the reason; whereas the perfection of a passion depends on the sensitive appetite. Consequently virtues must needs be differentiated according to their relation to reason, but the passions according to their relation to the appetite. Hence the objects of the passions, according as they are variously related to the sensitive appetite, cause the different species of passions: while, according as they are related to reason, they cause the different species of virtues. Now the movement of reason is not the same as that of the sensitive appetite. Wherefore nothing hinders a difference of objects from causing diversity of passions, without causing diversity of virtues, as when one virtue is about several passions, as stated above (a. 4); and again, a difference of objects from causing different virtues, without causing a difference of passions, since several virtues are directed about one passion, e.g. pleasure.

And because diverse passions belonging to diverse powers, always belong to diverse virtues, as stated above (a. 4); therefore a difference of objects that corresponds to a difference of powers always causes a spe-

cific difference of virtues—for instance the difference between that which is good absolutely speaking, and that which is good and difficult to obtain. Moreover since the reason rules man’s lower powers in a certain order, and even extends to outward things; hence, one single object of the passions, according as it is apprehended by sense, imagination, or reason, and again, according as it belongs to the soul, body, or external things, has various relations to reason, and consequently is of a nature to cause a difference of virtues. Consequently man’s good which is the object of love, desire and pleasure, may be taken as referred either to a bodily sense, or to the inner apprehension of the mind: and this same good may be directed to man’s good in himself, either in his body or in his soul, or to man’s good in relation to other men. And every such difference, being differently related to reason, differentiates virtues.

Accordingly, if we take a good, and it be something discerned by the sense of touch, and something pertaining to the upkeep of human life either in the individual or in the species, such as the pleasures of the table or of sexual intercourse, it will belong to the virtue of “temperance.” As regards the pleasures of the other senses, they are not intense, and so do not present much difficulty to the reason: hence there is no virtue corresponding to them; for virtue, “like art, is about difficult things” (Ethic. ii, 3).

On the other hand, good discerned not by the senses, but by an inner power, and belonging to man in himself, is like money and honor; the former, by its very nature, being employable for the good of the body, while the latter is based on the apprehension of the mind. These goods again may be considered either absolutely, in which way they concern the concupiscible faculty, or as being difficult to obtain, in which way they belong to the irascible part: which distinction, however, has no place in pleasurable objects of touch; since such are of base condition, and are becoming to man in so far as he has something in common with irrational animals. Accordingly in reference to money considered as a good absolutely, as an object of desire, pleasure, or love, there is “liberality”: but if we consider this good as difficult to get, and as being the object of our hope, there is “magnificence”[†]. With regard to that good which we call honor, taken absolutely, as the object of love, we have a virtue called “philotimia”[‡], i.e. “love of honor”: while if we consider it as hard to attain, and as an object of hope, then we have “magnanimity.” Wherefore liberality and “philotimia” seem to be in the concupiscible part, while magnificence and magnanimity are in the irascible.

As regards man’s good in relation to other men, it does not seem hard to obtain, but is considered absolutely, as the object of the concupiscible passions. This good may be pleasurable to a man in his behavior to-

^{*} eutrapelia [†] megaloprepeia [‡] philotimia

wards another either in some serious matter, in actions, to wit, that are directed by reason to a due end, or in playful actions, viz. that are done for mere pleasure, and which do not stand in the same relation to reason as the former. Now one man behaves towards another in serious matters, in two ways. First, as being pleasant in his regard, by becoming speech and deeds: and this belongs to a virtue which Aristotle (*Ethic. ii, 7*) calls “friendship”[§], and may be rendered “affability.” Secondly, one man behaves towards another by being frank with him, in words and deeds: this belongs to another virtue which (*Ethic. iv, 7*) he calls “truthfulness”[¶]. For frankness is more akin to the reason than pleasure, and serious matters than play. Hence there is another virtue about the pleasures of games, which the Philosopher “eutrapelia”^{||} (*Ethic. iv, 8*).

It is therefore evident that, according to Aristotle, there are ten moral virtues about the passions, viz. fortitude, temperance, liberality, magnificence, magnanimity, “philotimia,” gentleness, friendship, truthfulness, and “eutrapelia,” all of which differ in respect of their diverse matter, passions, or objects: so that if we add “justice,” which is about operations, there will be eleven

in all.

Reply to Objection 1. All objects of the same specific operation have the same relation to reason: not so all the objects of the same specific passion; because operations do not thwart reason as the passions do.

Reply to Objection 2. Passions are not differentiated by the same rule as virtues are, as stated above.

Reply to Objection 3. More and less do not cause a difference of species, unless they bear different relations to reason.

Reply to Objection 4. Good is a more potent mover than evil: because evil does not cause movement save in virtue of good, as Dionysius states (*Div. Nom. iv*). Hence an evil does not prove an obstacle to reason, so as to require virtues unless that evil be great; there being, seemingly, one such evil corresponding to each kind of passion. Hence there is but one virtue, meekness, for every form of anger; and, again, but one virtue, fortitude, for all forms of daring. On the other hand, good involves difficulty, which requires virtue, even if it be not a great good in that particular kind of passion. Consequently there are various moral virtues about desires, as stated above.

§ *philia* ¶ *aletheia* || *eutrapelia*

FIRST PART OF THE SECOND PART, QUESTION 61

Of the Cardinal Virtues (In Five Articles)

We must now consider the cardinal virtues: under which head there are five points of inquiry:

- (1) Whether the moral virtues should be called cardinal or principal virtues?
- (2) Of their number;
- (3) Which are they?
- (4) Whether they differ from one another?
- (5) Whether they are fittingly divided into social, perfecting, perfect, and exemplar virtues?

Whether the moral virtues should be called cardinal or principal virtues?

Ia IIae q. 61 a. 1

Objection 1. It would seem that moral virtues should not be called cardinal or principal virtues. For “the opposite members of a division are by nature simultaneous” (Categor. x), so that one is not principal rather than another. Now all the virtues are opposite members of the division of the genus “virtue.” Therefore none of them should be called principal.

Objection 2. Further, the end is principal as compared to the means. But the theological virtues are about the end; while the moral virtues are about the means. Therefore the theological virtues, rather than the moral virtues, should be called principal or cardinal.

Objection 3. Further, that which is essentially so is principal in comparison with that which is so by participation. But the intellectual virtues belong to that which is essentially rational: whereas the moral virtues belong to that which is rational by participation, as stated above (q. 58, a. 3). Therefore the intellectual virtues are principal, rather than the moral virtues.

On the contrary, Ambrose in explaining the words, “Blessed are the poor in spirit” (Lk. 6:20) says: “We know that there are four cardinal virtues, viz. temperance, justice, prudence, and fortitude.” But these are moral virtues. Therefore the moral virtues are cardinal virtues.

I answer that, When we speak of virtue simply, we are understood to speak of human virtue. Now human virtue, as stated above (q. 56, a. 3), is one that answers to the perfect idea of virtue, which requires rectitude of the appetite: for such like virtue not only confers the faculty of doing well, but also causes the good deed done. On the other hand, the name virtue is applied to one that answers imperfectly to the idea of virtue, and does not re-

quire rectitude of the appetite: because it merely confers the faculty of doing well without causing the good deed to be done. Now it is evident that the perfect is principal as compared to the imperfect: and so those virtues which imply rectitude of the appetite are called principal virtues. Such are the moral virtues, and prudence alone, of the intellectual virtues, for it is also something of a moral virtue, as was clearly shown above (q. 57, a. 4). Consequently, those virtues which are called principal or cardinal are fittingly placed among the moral virtues.

Reply to Objection 1. When a univocal genus is divided into its species, the members of the division are on a par in the point of the generic idea; although considered in their nature as things, one species may surpass another in rank and perfection, as man in respect of other animals. But when we divide an analogous term, which is applied to several things, but to one before it is applied to another, nothing hinders one from ranking before another, even in the point of the generic idea; as the notion of being is applied to substance principally in relation to accident. Such is the division of virtue into various kinds of virtue: since the good defined by reason is not found in the same way in all things.

Reply to Objection 2. The theological virtues are above man, as stated above (q. 58, a. 3, ad 3). Hence they should properly be called not human, but “super-human” or godlike virtues.

Reply to Objection 3. Although the intellectual virtues, except in prudence, rank before the moral virtues, in the point of their subject, they do not rank before them as virtues; for a virtue, as such, regards good, which is the object of the appetite.

Whether there are four cardinal virtues?

Ia IIae q. 61 a. 2

Objection 1. It would seem that there are not four cardinal virtues. For prudence is the directing principle of the other moral virtues, as is clear from what has been said above (q. 58, a. 4). But that which directs other things ranks before them. Therefore prudence alone is a principal virtue.

Objection 2. Further, the principal virtues are, in a way, moral virtues. Now we are directed to moral works both by the practical reason, and by a right appetite, as stated in Ethic. vi, 2. Therefore there are only two cardinal virtues.

Objection 3. Further, even among the other virtues

one ranks higher than another. But in order that a virtue be principal, it needs not to rank above all the others, but above some. Therefore it seems that there are many more principal virtues.

On the contrary, Gregory says (Moral. ii): “The entire structure of good works is built on four virtues.”

I answer that, Things may be numbered either in respect of their formal principles, or according to the subjects in which they are: and either way we find that there are four cardinal virtues.

For the formal principle of the virtue of which we speak now is good as defined by reason; which good is considered in two ways. First, as existing in the very act of reason: and thus we have one principal virtue, called “Prudence.” Secondly, according as the reason puts its order into something else; either into operations, and then we have “Justice”; or into passions, and then we need two virtues. For the need of putting the order of reason into the passions is due to their thwarting reason: and this occurs in two ways. First, by the passions inciting to something against reason, and then the passions need a curb, which we call “Temperance.” Sec-

ondly, by the passions withdrawing us from following the dictate of reason, e.g. through fear of danger or toil: and then man needs to be strengthened for that which reason dictates, lest he turn back; and to this end there is “Fortitude.”

In like manner, we find the same number if we consider the subjects of virtue. For there are four subjects of the virtue we speak of now: viz. the power which is rational in its essence, and this is perfected by “Prudence”; and that which is rational by participation, and is threefold, the will, subject of “Justice,” the concupiscible faculty, subject of “Temperance,” and the irascible faculty, subject of “Fortitude.”

Reply to Objection 1. Prudence is the principal of all the virtues simply. The others are principal, each in its own genus.

Reply to Objection 2. That part of the soul which is rational by participation is threefold, as stated above.

Reply to Objection 3. All the other virtues among which one ranks before another, are reducible to the above four, both as to the subject and as to the formal principle.

Whether any other virtues should be called principal rather than these?

Ia IIae q. 61 a. 3

Objection 1. It would seem that other virtues should be called principal rather than these. For, seemingly, the greatest is the principal in any genus. Now “magnanimity has a great influence on all the virtues” (Ethic. iv, 3). Therefore magnanimity should more than any be called a principal virtue.

Objection 2. Further, that which strengthens the other virtues should above all be called a principal virtue. But such is humility: for Gregory says (Hom. iv in Ev.) that “he who gathers the other virtues without humility is as one who carries straw against the wind.” Therefore humility seems above all to be a principal virtue.

Objection 3. Further, that which is most perfect seems to be principal. But this applies to patience, according to James 1:4: “Patience hath a perfect work.” Therefore patience should be reckoned a principal virtue.

On the contrary, Cicero reduces all other virtues to these four (De Invent. Rhet. ii).

I answer that, As stated above (a. 2), these four are reckoned as cardinal virtues, in respect of the four formal principles of virtue as we understand it now. These principles are found chiefly in certain acts and passions. Thus the good which exists in the act of reason, is found chiefly in reason’s command, but not in its counsel or its judgment, as stated above (q. 57, a. 6). Again, good as defined by reason and put into our operations as something right and due, is found chiefly in commutations and distributions in respect of another person, and on a basis of equality. The good of curbing the passions is found chiefly in those passions which are most diffi-

cult to curb, viz. in the pleasures of touch. The good of being firm in holding to the good defined by reason, against the impulse of passion, is found chiefly in perils of death, which are most difficult to withstand.

Accordingly the above four virtues may be considered in two ways. First, in respect of their common formal principles. In this way they are called principal, being general, as it were, in comparison with all the virtues: so that, for instance, any virtue that causes good in reason’s act of consideration, may be called prudence; every virtue that causes the good of right and due in operation, be called justice; every virtue that curbs and represses the passions, be called temperance; and every virtue that strengthens the mind against any passions whatever, be called fortitude. Many, both holy doctors, as also philosophers, speak about these virtues in this sense: and in this way the other virtues are contained under them. Wherefore all the objections fail.

Secondly, they may be considered in point of their being denominated, each one from that which is foremost in its respective matter, and thus they are specific virtues, condivided with the others. Yet they are called principal in comparison with the other virtues, on account of the importance of their matter: so that prudence is the virtue which commands; justice, the virtue which is about due actions between equals; temperance, the virtue which suppresses desires for the pleasures of touch; and fortitude, the virtue which strengthens against dangers of death. Thus again do the objections fail: because the other virtues may be principal in some other way, but these are called principal by reason of their matter, as stated above.

Objection 1. It would seem that the above four virtues are not diverse and distinct from one another. For Gregory says (*Moral.* xxii, 1): “There is no true prudence, unless it be just, temperate and brave; no perfect temperance, that is not brave, just and prudent; no sound fortitude, that is not prudent, temperate and just; no real justice, without prudence, fortitude and temperance.” But this would not be so, if the above virtues were distinct from one another: since the different species of one genus do not qualify one another. Therefore the aforesaid virtues are not distinct from one another.

Objection 2. Further, among things distinct from one another the function of one is not attributed to another. But the function of temperance is attributed to fortitude: for Ambrose says (*De Offic.* xxxvi): “Rightly do we call it fortitude, when a man conquers himself, and is not weakened and bent by any enticement.” And of temperance he says (*De Offic.* xliii, xlv) that it “safeguards the manner and order in all things that we decide to do and say.” Therefore it seems that these virtues are not distinct from one another.

Objection 3. Further, the Philosopher says (*Ethic.* ii, 4) that the necessary conditions of virtue are first of all “that a man should have knowledge; secondly, that he should exercise choice for a particular end; thirdly, that he should possess the habit and act with firmness and steadfastness.” But the first of these seems to belong to prudence which is rectitude of reason in things to be done; the second, i.e. choice, belongs to temperance, whereby a man, holding his passions on the curb, acts, not from passion but from choice; the third, that a man should act for the sake of a due end, implies a certain rectitude, which seemingly belongs to justice; while the last, viz. firmness and steadfastness, belongs to fortitude. Therefore each of these virtues is general in comparison to other virtues. Therefore they are not distinct from one another.

On the contrary, Augustine says (*De Moribus Eccl.* xi) that “there are four virtues, corresponding to the various emotions of love,” and he applies this to the four virtues mentioned above. Therefore the same four virtues are distinct from one another.

I answer that, As stated above (a. 3), these four virtues are understood differently by various writers. For some take them as signifying certain general conditions of the human mind, to be found in all the virtues: so that, to wit, prudence is merely a certain rectitude of discretion in any actions or matters whatever; justice, a certain rectitude of the mind, whereby a man does what he ought in any matters; temperance, a disposition of the mind, moderating any passions or operations, so as to keep them within bounds; and fortitude, a disposition whereby the soul is strengthened for that which is in accord with reason, against any assaults of the passions, or the toil involved by any operations. To distinguish these four virtues in this way does not imply

that justice, temperance and fortitude are distinct virtuous habits: because it is fitting that every moral virtue, from the fact that it is a “habit,” should be accompanied by a certain firmness so as not to be moved by its contrary: and this, we have said, belongs to fortitude. Moreover, inasmuch as it is a “virtue,” it is directed to good which involves the notion of right and due; and this, we have said, belongs to justice. Again, owing to the fact that it is a “moral virtue” partaking of reason, it observes the mode of reason in all things, and does not exceed its bounds, which has been stated to belong to temperance. It is only in the point of having discretion, which we ascribed to prudence, that there seems to be a distinction from the other three, inasmuch as discretion belongs essentially to reason; whereas the other three imply a certain share of reason by way of a kind of application (of reason) to passions or operations. According to the above explanation, then, prudence would be distinct from the other three virtues: but these would not be distinct from one another; for it is evident that one and the same virtue is both habit, and virtue, and moral virtue.

Others, however, with better reason, take these four virtues, according as they have their special determinate matter; each of its own matter, in which special commendation is given to that general condition from which the virtue’s name is taken as stated above (a. 3). In this way it is clear that the aforesaid virtues are distinct habits, differentiated in respect of their diverse objects.

Reply to Objection 1. Gregory is speaking of these four virtues in the first sense given above. It may also be said that these four virtues qualify one another by a kind of overflow. For the qualities of prudence overflow on to the other virtues in so far as they are directed by prudence. And each of the others overflows on to the rest, for the reason that whoever can do what is harder, can do what is less difficult. Wherefore whoever can curb his desires for the pleasures of touch, so that they keep within bounds, which is a very hard thing to do, for this very reason is more able to check his daring in dangers of death, so as not to go too far, which is much easier; and in this sense fortitude is said to be temperate. Again, temperance is said to be brave, by reason of fortitude overflowing into temperance: in so far, to wit, as he whose mind is strengthened by fortitude against dangers of death, which is a matter of very great difficulty, is more able to remain firm against the onslaught of pleasures; for as Cicero says (*De Offic.* i), “it would be inconsistent for a man to be unbroken by fear, and yet vanquished by cupidity; or that he should be conquered by lust, after showing himself to be unconquered by toil.”

From this the Reply to the Second Objection is clear. For temperance observes the mean in all things, and fortitude keeps the mind unbent by the enticements of plea-

tures, either in so far as these virtues are taken to denote certain general conditions of virtue, or in the sense that they overflow on to one another, as explained above.

Reply to Objection 3. These four general condi-

tions of virtue set down by the Philosopher, are not proper to the aforesaid virtues. They may, however, be appropriated to them, in the way above stated.

Whether the cardinal virtues are fittingly divided into social virtues, perfecting, perfect, and exemplar virtues?

Ia IIae q. 61 a. 5

Objection 1. It would seem that these four virtues are unfittingly divided into exemplar virtues, perfecting virtues, perfect virtues, and social virtues. For as Macrobius says (Super Somn. Scip. 1), the “exemplar virtues are such as exist in the mind of God.” Now the Philosopher says (Ethic. x, 8) that “it is absurd to ascribe justice, fortitude, temperance, and prudence to God.” Therefore these virtues cannot be exemplar.

Objection 2. Further, the “perfect” virtues are those which are without any passion: for Macrobius says (Super Somn. Scip. 1) that “in a soul that is cleansed, temperance has not to check worldly desires, for it has forgotten all about them: fortitude knows nothing about the passions; it does not have to conquer them.” Now it was stated above (q. 59, a. 5) that the aforesaid virtues cannot be without passions. Therefore there is no such thing as “perfect” virtue.

Objection 3. Further, he says (Macrobius: Super Somn. Scip. 1) that the “perfecting” virtues are those of the man “who flies from human affairs and devotes himself exclusively to the things of God.” But it seems wrong to do this, for Cicero says (De Offic. i): “I reckon that it is not only unworthy of praise, but wicked for a man to say that he despises what most men admire, viz. power and office.” Therefore there are no “perfecting” virtues.

Objection 4. Further, he says (Macrobius: Super Somn. Scip. 1) that the “social” virtues are those “whereby good men work for the good of their country and for the safety of the city.” But it is only legal justice that is directed to the common weal, as the Philosopher states (Ethic. v, 1). Therefore other virtues should not be called “social.”

On the contrary, Macrobius says (Super Somn. Scip. 1): “Plotinus, together with Plato foremost among teachers of philosophy, says: ‘The four kinds of virtue are fourfold: In the first place there are social* virtues; secondly, there are perfecting virtues; thirdly, there are perfect† virtues; and fourthly, there are exemplar virtues.’”‡

I answer that, As Augustine says (De Moribus Eccl. vi), “the soul needs to follow something in order to give birth to virtue: this something is God: if we follow Him we shall live aright.” Consequently the exemplar of human virtue must needs pre-exist in God, just as in Him pre-exist the types of all things. Accord-

ingly virtue may be considered as existing originally in God, and thus we speak of “exemplar” virtues: so that in God the Divine Mind itself may be called prudence; while temperance is the turning of God’s gaze on Himself, even as in us it is that which conforms the appetite to reason. God’s fortitude is His unchangeableness; His justice is the observance of the Eternal Law in His works, as Plotinus states (Cf. Macrobius, Super Somn. Scip. 1).

Again, since man by his nature is a social§ animal, these virtues, in so far as they are in him according to the condition of his nature, are called “social” virtues; since it is by reason of them that man behaves himself well in the conduct of human affairs. It is in this sense that we have been speaking of these virtues until now.

But since it behooves a man to do his utmost to strive onward even to Divine things, as even the Philosopher declares in Ethic. x, 7, and as Scripture often admonishes us—for instance: “Be ye . . . perfect, as your heavenly Father is perfect” (Mat. 5:48), we must needs place some virtues between the social or human virtues, and the exemplar virtues which are Divine. Now these virtues differ by reason of a difference of movement and term: so that some are virtues of men who are on their way and tending towards the Divine similitude; and these are called “perfecting” virtues. Thus prudence, by contemplating the things of God, counts as nothing all things of the world, and directs all the thoughts of the soul to God alone: temperance, so far as nature allows, neglects the needs of the body; fortitude prevents the soul from being afraid of neglecting the body and rising to heavenly things; and justice consists in the soul giving a whole-hearted consent to follow the way thus proposed. Besides these there are the virtues of those who have already attained to the Divine similitude: these are called the “perfect virtues.” Thus prudence sees nought else but the things of God; temperance knows no earthly desires; fortitude has no knowledge of passion; and justice, by imitating the Divine Mind, is united thereto by an everlasting covenant. Such as the virtues attributed to the Blessed, or, in this life, to some who are at the summit of perfection.

Reply to Objection 1. The Philosopher is speaking of these virtues according as they relate to human affairs; for instance, justice, about buying and selling; fortitude, about fear; temperance, about desires; for in

* Virtutes purgatoriae: literally meaning, cleansing virtues † Virtutes purgati animi: literally, virtues of the clean soul ‡ Cf. Chrysostom’s fifteenth homily on St. Matthew, where he says: “The gentle, the modest, the merciful, the just man does not shut up his good deeds within himself. . . He that is clean of heart and peaceful, and suffers persecution for the sake of the truth, lives for the common weal.” § See above note on Chrysostom

this sense it is absurd to attribute them to God.

Reply to Objection 2. Human virtues, that is to say, virtues of men living together in this world, are about the passions. But the virtues of those who have attained to perfect bliss are without passions. Hence Plotinus says (Cf. Macrobius, *Super Somn. Scip.* 1) that “the social virtues check the passions,” i.e. they bring them to the relative mean; “the second kind,” viz. the perfecting virtues, “uproot them”; “the third kind,” viz. the perfect virtues, “forget them; while it is impious to mention them in connection with virtues of the fourth kind,” viz. the exemplar virtues. It may also be said that here he is speaking of passions as denoting inordinate emotions.

Reply to Objection 3. To neglect human affairs when necessity forbids is wicked; otherwise it is virtuous. Hence Cicero says a little earlier: “Perhaps one should make allowances for those who by reason of their exceptional talents have devoted themselves to

learning; as also to those who have retired from public life on account of failing health, or for some other yet weightier motive; when such men yielded to others the power and renown of authority.” This agrees with what Augustine says (*De Civ. Dei* xix, 19): “The love of truth demands a hollowed leisure; charity necessitates good works. If no one lays this burden on us we may devote ourselves to the study and contemplation of truth; but if the burden is laid on us it is to be taken up under the pressure of charity.”

Reply to Objection 4. Legal justice alone regards the common weal directly: but by commanding the other virtues it draws them all into the service of the common weal, as the Philosopher declares (*Ethic.* v, 1). For we must take note that it concerns the human virtues, as we understand them here, to do well not only towards the community, but also towards the parts of the community, viz. towards the household, or even towards one individual.

Objection 1. It would seem that moral virtues should not be called cardinal or principal virtues. For “the opposite members of a division are by nature simultaneous” (Categor. x), so that one is not principal rather than another. Now all the virtues are opposite members of the division of the genus “virtue.” Therefore none of them should be called principal.

Objection 2. Further, the end is principal as compared to the means. But the theological virtues are about the end; while the moral virtues are about the means. Therefore the theological virtues, rather than the moral virtues, should be called principal or cardinal.

Objection 3. Further, that which is essentially so is principal in comparison with that which is so by participation. But the intellectual virtues belong to that which is essentially rational: whereas the moral virtues belong to that which is rational by participation, as stated above (q. 58, a. 3). Therefore the intellectual virtues are principal, rather than the moral virtues.

On the contrary, Ambrose in explaining the words, “Blessed are the poor in spirit” (Lk. 6:20) says: “We know that there are four cardinal virtues, viz. temperance, justice, prudence, and fortitude.” But these are moral virtues. Therefore the moral virtues are cardinal virtues.

I answer that, When we speak of virtue simply, we are understood to speak of human virtue. Now human virtue, as stated above (q. 56, a. 3), is one that answers to the perfect idea of virtue, which requires rectitude of the appetite: for such like virtue not only confers the faculty of doing well, but also causes the good deed done. On the other hand, the name virtue is applied to one that answers imperfectly to the idea of virtue, and does not re-

quire rectitude of the appetite: because it merely confers the faculty of doing well without causing the good deed to be done. Now it is evident that the perfect is principal as compared to the imperfect: and so those virtues which imply rectitude of the appetite are called principal virtues. Such are the moral virtues, and prudence alone, of the intellectual virtues, for it is also something of a moral virtue, as was clearly shown above (q. 57, a. 4). Consequently, those virtues which are called principal or cardinal are fittingly placed among the moral virtues.

Reply to Objection 1. When a univocal genus is divided into its species, the members of the division are on a par in the point of the generic idea; although considered in their nature as things, one species may surpass another in rank and perfection, as man in respect of other animals. But when we divide an analogous term, which is applied to several things, but to one before it is applied to another, nothing hinders one from ranking before another, even in the point of the generic idea; as the notion of being is applied to substance principally in relation to accident. Such is the division of virtue into various kinds of virtue: since the good defined by reason is not found in the same way in all things.

Reply to Objection 2. The theological virtues are above man, as stated above (q. 58, a. 3, ad 3). Hence they should properly be called not human, but “super-human” or godlike virtues.

Reply to Objection 3. Although the intellectual virtues, except in prudence, rank before the moral virtues, in the point of their subject, they do not rank before them as virtues; for a virtue, as such, regards good, which is the object of the appetite.

Objection 1. It would seem that there are not four cardinal virtues. For prudence is the directing principle of the other moral virtues, as is clear from what has been said above (q. 58, a. 4). But that which directs other things ranks before them. Therefore prudence alone is a principal virtue.

Objection 2. Further, the principal virtues are, in a way, moral virtues. Now we are directed to moral works both by the practical reason, and by a right appetite, as stated in *Ethic.* vi, 2. Therefore there are only two cardinal virtues.

Objection 3. Further, even among the other virtues one ranks higher than another. But in order that a virtue be principal, it needs not to rank above all the others, but above some. Therefore it seems that there are many more principal virtues.

On the contrary, Gregory says (*Moral.* ii): “The entire structure of good works is built on four virtues.”

I answer that, Things may be numbered either in respect of their formal principles, or according to the subjects in which they are: and either way we find that there are four cardinal virtues.

For the formal principle of the virtue of which we speak now is good as defined by reason; which good is considered in two ways. First, as existing in the very act of reason: and thus we have one principal virtue, called “Prudence.” Secondly, according as the reason puts its order into something else; either into operations, and

then we have “Justice”; or into passions, and then we need two virtues. For the need of putting the order of reason into the passions is due to their thwarting reason: and this occurs in two ways. First, by the passions inciting to something against reason, and then the passions need a curb, which we call “Temperance.” Secondly, by the passions withdrawing us from following the dictate of reason, e.g. through fear of danger or toil: and then man needs to be strengthened for that which reason dictates, lest he turn back; and to this end there is “Fortitude.”

In like manner, we find the same number if we consider the subjects of virtue. For there are four subjects of the virtue we speak of now: viz. the power which is rational in its essence, and this is perfected by “Prudence”; and that which is rational by participation, and is threefold, the will, subject of “Justice,” the concupiscible faculty, subject of “Temperance,” and the irascible faculty, subject of “Fortitude.”

Reply to Objection 1. Prudence is the principal of all the virtues simply. The others are principal, each in its own genus.

Reply to Objection 2. That part of the soul which is rational by participation is threefold, as stated above.

Reply to Objection 3. All the other virtues among which one ranks before another, are reducible to the above four, both as to the subject and as to the formal principle.

Objection 1. It would seem that other virtues should be called principal rather than these. For, seemingly, the greatest is the principal in any genus. Now “magnanimity has a great influence on all the virtues” (Ethic. iv, 3). Therefore magnanimity should more than any be called a principal virtue.

Objection 2. Further, that which strengthens the other virtues should above all be called a principal virtue. But such is humility: for Gregory says (Hom. iv in Ev.) that “he who gathers the other virtues without humility is as one who carries straw against the wind.” Therefore humility seems above all to be a principal virtue.

Objection 3. Further, that which is most perfect seems to be principal. But this applies to patience, according to James 1:4: “Patience hath a perfect work.” Therefore patience should be reckoned a principal virtue.

On the contrary, Cicero reduces all other virtues to these four (De Invent. Rhet. ii).

I answer that, As stated above (a. 2), these four are reckoned as cardinal virtues, in respect of the four formal principles of virtue as we understand it now. These principles are found chiefly in certain acts and passions. Thus the good which exists in the act of reason, is found chiefly in reason’s command, but not in its counsel or its judgment, as stated above (q. 57, a. 6). Again, good as defined by reason and put into our operations as something right and due, is found chiefly in commutations and distributions in respect of another person, and on a basis of equality. The good of curbing the passions is found chiefly in those passions which are most diffi-

cult to curb, viz. in the pleasures of touch. The good of being firm in holding to the good defined by reason, against the impulse of passion, is found chiefly in perils of death, which are most difficult to withstand.

Accordingly the above four virtues may be considered in two ways. First, in respect of their common formal principles. In this way they are called principal, being general, as it were, in comparison with all the virtues: so that, for instance, any virtue that causes good in reason’s act of consideration, may be called prudence; every virtue that causes the good of right and due in operation, be called justice; every virtue that curbs and represses the passions, be called temperance; and every virtue that strengthens the mind against any passions whatever, be called fortitude. Many, both holy doctors, as also philosophers, speak about these virtues in this sense: and in this way the other virtues are contained under them. Wherefore all the objections fail.

Secondly, they may be considered in point of their being denominated, each one from that which is foremost in its respective matter, and thus they are specific virtues, condivided with the others. Yet they are called principal in comparison with the other virtues, on account of the importance of their matter: so that prudence is the virtue which commands; justice, the virtue which is about due actions between equals; temperance, the virtue which suppresses desires for the pleasures of touch; and fortitude, the virtue which strengthens against dangers of death. Thus again do the objections fail: because the other virtues may be principal in some other way, but these are called principal by reason of their matter, as stated above.

Objection 1. It would seem that the above four virtues are not diverse and distinct from one another. For Gregory says (*Moral.* xxii, 1): “There is no true prudence, unless it be just, temperate and brave; no perfect temperance, that is not brave, just and prudent; no sound fortitude, that is not prudent, temperate and just; no real justice, without prudence, fortitude and temperance.” But this would not be so, if the above virtues were distinct from one another: since the different species of one genus do not qualify one another. Therefore the aforesaid virtues are not distinct from one another.

Objection 2. Further, among things distinct from one another the function of one is not attributed to another. But the function of temperance is attributed to fortitude: for Ambrose says (*De Offic.* xxxvi): “Rightly do we call it fortitude, when a man conquers himself, and is not weakened and bent by any enticement.” And of temperance he says (*De Offic.* xliii, xlv) that it “safeguards the manner and order in all things that we decide to do and say.” Therefore it seems that these virtues are not distinct from one another.

Objection 3. Further, the Philosopher says (*Ethic.* ii, 4) that the necessary conditions of virtue are first of all “that a man should have knowledge; secondly, that he should exercise choice for a particular end; thirdly, that he should possess the habit and act with firmness and steadfastness.” But the first of these seems to belong to prudence which is rectitude of reason in things to be done; the second, i.e. choice, belongs to temperance, whereby a man, holding his passions on the curb, acts, not from passion but from choice; the third, that a man should act for the sake of a due end, implies a certain rectitude, which seemingly belongs to justice; while the last, viz. firmness and steadfastness, belongs to fortitude. Therefore each of these virtues is general in comparison to other virtues. Therefore they are not distinct from one another.

On the contrary, Augustine says (*De Moribus Eccl.* xi) that “there are four virtues, corresponding to the various emotions of love,” and he applies this to the four virtues mentioned above. Therefore the same four virtues are distinct from one another.

I answer that, As stated above (a. 3), these four virtues are understood differently by various writers. For some take them as signifying certain general conditions of the human mind, to be found in all the virtues: so that, to wit, prudence is merely a certain rectitude of discretion in any actions or matters whatever; justice, a certain rectitude of the mind, whereby a man does what he ought in any matters; temperance, a disposition of the mind, moderating any passions or operations, so as to keep them within bounds; and fortitude, a disposition whereby the soul is strengthened for that which is in accord with reason, against any assaults of the passions, or the toil involved by any operations. To distinguish these four virtues in this way does not imply

that justice, temperance and fortitude are distinct virtuous habits: because it is fitting that every moral virtue, from the fact that it is a “habit,” should be accompanied by a certain firmness so as not to be moved by its contrary: and this, we have said, belongs to fortitude. Moreover, inasmuch as it is a “virtue,” it is directed to good which involves the notion of right and due; and this, we have said, belongs to justice. Again, owing to the fact that it is a “moral virtue” partaking of reason, it observes the mode of reason in all things, and does not exceed its bounds, which has been stated to belong to temperance. It is only in the point of having discretion, which we ascribed to prudence, that there seems to be a distinction from the other three, inasmuch as discretion belongs essentially to reason; whereas the other three imply a certain share of reason by way of a kind of application (of reason) to passions or operations. According to the above explanation, then, prudence would be distinct from the other three virtues: but these would not be distinct from one another; for it is evident that one and the same virtue is both habit, and virtue, and moral virtue.

Others, however, with better reason, take these four virtues, according as they have their special determinate matter; each of its own matter, in which special commendation is given to that general condition from which the virtue’s name is taken as stated above (a. 3). In this way it is clear that the aforesaid virtues are distinct habits, differentiated in respect of their diverse objects.

Reply to Objection 1. Gregory is speaking of these four virtues in the first sense given above. It may also be said that these four virtues qualify one another by a kind of overflow. For the qualities of prudence overflow on to the other virtues in so far as they are directed by prudence. And each of the others overflows on to the rest, for the reason that whoever can do what is harder, can do what is less difficult. Wherefore whoever can curb his desires for the pleasures of touch, so that they keep within bounds, which is a very hard thing to do, for this very reason is more able to check his daring in dangers of death, so as not to go too far, which is much easier; and in this sense fortitude is said to be temperate. Again, temperance is said to be brave, by reason of fortitude overflowing into temperance: in so far, to wit, as he whose mind is strengthened by fortitude against dangers of death, which is a matter of very great difficulty, is more able to remain firm against the onslaught of pleasures; for as Cicero says (*De Offic.* i), “it would be inconsistent for a man to be unbroken by fear, and yet vanquished by cupidity; or that he should be conquered by lust, after showing himself to be unconquered by toil.”

From this the Reply to the Second Objection is clear. For temperance observes the mean in all things, and fortitude keeps the mind unbent by the enticements of plea-

sure, either in so far as these virtues are taken to denote certain general conditions of virtue, or in the sense that they overflow on to one another, as explained above.

Reply to Objection 3. These four general condi-

tions of virtue set down by the Philosopher, are not proper to the aforesaid virtues. They may, however, be appropriated to them, in the way above stated.

Objection 1. It would seem that these four virtues are unfittingly divided into exemplar virtues, perfecting virtues, perfect virtues, and social virtues. For as Macrobius says (Super Somn. Scip. 1), the “exemplar virtues are such as exist in the mind of God.” Now the Philosopher says (Ethic. x, 8) that “it is absurd to ascribe justice, fortitude, temperance, and prudence to God.” Therefore these virtues cannot be exemplar.

Objection 2. Further, the “perfect” virtues are those which are without any passion: for Macrobius says (Super Somn. Scip. 1) that “in a soul that is cleansed, temperance has not to check worldly desires, for it has forgotten all about them: fortitude knows nothing about the passions; it does not have to conquer them.” Now it was stated above (q. 59, a. 5) that the aforesaid virtues cannot be without passions. Therefore there is no such thing as “perfect” virtue.

Objection 3. Further, he says (Macrobius: Super Somn. Scip. 1) that the “perfecting” virtues are those of the man “who flies from human affairs and devotes himself exclusively to the things of God.” But it seems wrong to do this, for Cicero says (De Offic. i): “I reckon that it is not only unworthy of praise, but wicked for a man to say that he despises what most men admire, viz. power and office.” Therefore there are no “perfecting” virtues.

Objection 4. Further, he says (Macrobius: Super Somn. Scip. 1) that the “social” virtues are those “whereby good men work for the good of their country and for the safety of the city.” But it is only legal justice that is directed to the common weal, as the Philosopher states (Ethic. v, 1). Therefore other virtues should not be called “social.”

On the contrary, Macrobius says (Super Somn. Scip. 1): “Plotinus, together with Plato foremost among teachers of philosophy, says: ‘The four kinds of virtue are fourfold: In the first place there are social* virtues; secondly, there are perfecting virtues; thirdly, there are perfect† virtues; and fourthly, there are exemplar virtues.’”‡

I answer that, As Augustine says (De Moribus Eccl. vi), “the soul needs to follow something in order to give birth to virtue: this something is God: if we follow Him we shall live aright.” Consequently the exemplar of human virtue must needs pre-exist in God, just as in Him pre-exist the types of all things. Accordingly virtue may be considered as existing originally in God, and thus we speak of “exemplar” virtues: so that in God the Divine Mind itself may be called prudence; while temperance is the turning of God’s gaze on Himself, even as in us it is that which conforms the

appetite to reason. God’s fortitude is His unchangeableness; His justice is the observance of the Eternal Law in His works, as Plotinus states (Cf. Macrobius, Super Somn. Scip. 1).

Again, since man by his nature is a social§ animal, these virtues, in so far as they are in him according to the condition of his nature, are called “social” virtues; since it is by reason of them that man behaves himself well in the conduct of human affairs. It is in this sense that we have been speaking of these virtues until now.

But since it behooves a man to do his utmost to strive onward even to Divine things, as even the Philosopher declares in Ethic. x, 7, and as Scripture often admonishes us—for instance: “Be ye . . . perfect, as your heavenly Father is perfect” (Mat. 5:48), we must needs place some virtues between the social or human virtues, and the exemplar virtues which are Divine. Now these virtues differ by reason of a difference of movement and term: so that some are virtues of men who are on their way and tending towards the Divine similitude; and these are called “perfecting” virtues. Thus prudence, by contemplating the things of God, counts as nothing all things of the world, and directs all the thoughts of the soul to God alone: temperance, so far as nature allows, neglects the needs of the body; fortitude prevents the soul from being afraid of neglecting the body and rising to heavenly things; and justice consists in the soul giving a whole-hearted consent to follow the way thus proposed. Besides these there are the virtues of those who have already attained to the Divine similitude: these are called the “perfect virtues.” Thus prudence sees nought else but the things of God; temperance knows no earthly desires; fortitude has no knowledge of passion; and justice, by imitating the Divine Mind, is united thereto by an everlasting covenant. Such as the virtues attributed to the Blessed, or, in this life, to some who are at the summit of perfection.

Reply to Objection 1. The Philosopher is speaking of these virtues according as they relate to human affairs; for instance, justice, about buying and selling; fortitude, about fear; temperance, about desires; for in this sense it is absurd to attribute them to God.

Reply to Objection 2. Human virtues, that is to say, virtues of men living together in this world, are about the passions. But the virtues of those who have attained to perfect bliss are without passions. Hence Plotinus says (Cf. Macrobius, Super Somn. Scip. 1) that “the social virtues check the passions,” i.e. they bring them to the relative mean; “the second kind,” viz. the perfecting virtues, “uproot them”; “the third kind,” viz. the perfect virtues, “forget them; while it is impious to men-

* Virtutes purgatoriae: literally meaning, cleansing virtues † Virtutes purgati animi: literally, virtues of the clean soul ‡ Cf. Chrysostom’s fifteenth homily on St. Matthew, where he says: “The gentle, the modest, the merciful, the just man does not shut up his good deeds within himself. . . He that is clean of heart and peaceful, and suffers persecution for the sake of the truth, lives for the common

tion them in connection with virtues of the fourth kind,” viz. the exemplar virtues. It may also be said that here he is speaking of passions as denoting inordinate emotions.

Reply to Objection 3. To neglect human affairs when necessity forbids is wicked; otherwise it is virtuous. Hence Cicero says a little earlier: “Perhaps one should make allowances for those who by reason of their exceptional talents have devoted themselves to learning; as also to those who have retired from public life on account of failing health, or for some other yet weightier motive; when such men yielded to others the power and renown of authority.” This agrees with what Augustine says (*De Civ. Dei* xix, 19): “The love of truth

demands a hallowed leisure; charity necessitates good works. If no one lays this burden on us we may devote ourselves to the study and contemplation of truth; but if the burden is laid on us it is to be taken up under the pressure of charity.”

Reply to Objection 4. Legal justice alone regards the common weal directly: but by commanding the other virtues it draws them all into the service of the common weal, as the Philosopher declares (*Ethic.* v, 1). For we must take note that it concerns the human virtues, as we understand them here, to do well not only towards the community, but also towards the parts of the community, viz. towards the household, or even towards one individual.

FIRST PART OF THE SECOND PART, QUESTION 62

Of the Theological Virtues (In Four Articles)

We must now consider the Theological Virtues: under which head there are four points of inquiry:

- (1) Whether there are any theological virtues?
- (2) Whether the theological virtues are distinct from the intellectual and moral virtues?
- (3) How many, and which are they?
- (4) Of their order.

Whether there are any theological virtues?

Ia IIae q. 62 a. 1

Objection 1. It would seem that there are not any theological virtues. For according to Phys. vii, text. 17, “virtue is the disposition of a perfect thing to that which is best: and by perfect, I mean that which is disposed according to nature.” But that which is Divine is above man’s nature. Therefore the theological virtues are not virtues of a man.

Objection 2. Further, theological virtues are quasi-Divine virtues. But the Divine virtues are exemplars, as stated above (q. 61, a. 5), which are not in us but in God. Therefore the theological virtues are not virtues of man.

Objection 3. Further, the theological virtues are so called because they direct us to God, Who is the first beginning and last end of all things. But by the very nature of his reason and will, man is directed to his first beginning and last end. Therefore there is no need for any habits of theological virtue, to direct the reason and will to God.

On the contrary, The precepts of the Law are about acts of virtue. Now the Divine Law contains precepts about the acts of faith, hope, and charity: for it is written (Ecclus. 2:8, seqq.): “Ye that fear the Lord believe Him,” and again, “hope in Him,” and again, “love Him.” Therefore faith, hope, and charity are virtues directing us to God. Therefore they are theological virtues.

I answer that, Man is perfected by virtue, for those actions whereby he is directed to happiness, as was explained above (q. 5, a. 7). Now man’s happiness is twofold, as was also stated above (q. 5, a. 5). One is proportionate to human nature, a happiness, to wit, which man can obtain by means of his natural principles. The other is a happiness surpassing man’s nature, and which man can obtain by the power of God alone, by a kind of participation of the Godhead, about which it is writ-

ten (2 Pet. 1:4) that by Christ we are made “partakers of the Divine nature.” And because such happiness surpasses the capacity of human nature, man’s natural principles which enable him to act well according to his capacity, do not suffice to direct man to this same happiness. Hence it is necessary for man to receive from God some additional principles, whereby he may be directed to supernatural happiness, even as he is directed to his connatural end, by means of his natural principles, albeit not without Divine assistance. Such like principles are called “theological virtues”: first, because their object is God, inasmuch as they direct us aright to God: secondly, because they are infused in us by God alone: thirdly, because these virtues are not made known to us, save by Divine revelation, contained in Holy Writ.

Reply to Objection 1. A certain nature may be ascribed to a certain thing in two ways. First, essentially: and thus these theological virtues surpass the nature of man. Secondly, by participation, as kindled wood partakes of the nature of fire: and thus, after a fashion, man becomes a partaker of the Divine Nature, as stated above: so that these virtues are proportionate to man in respect of the Nature of which he is made a partaker.

Reply to Objection 2. These virtues are called Divine, not as though God were virtuous by reason of them, but because of them God makes us virtuous, and directs us to Himself. Hence they are not exemplar but exemplate virtues.

Reply to Objection 3. The reason and will are naturally directed to God, inasmuch as He is the beginning and end of nature, but in proportion to nature. But the reason and will, according to their nature, are not sufficiently directed to Him in so far as He is the object of supernatural happiness.

Whether the theological virtues are distinct from the intellectual and moral virtues?

Ia IIae q. 62 a. 2

Objection 1. It would seem that the theological virtues are not distinct from the moral and intellectual virtues. For the theological virtues, if they be in a human soul, must needs perfect it, either as to the intellectual, or as to the appetitive part. Now the virtues which perfect the intellectual part are called intellectual; and

the virtues which perfect the appetitive part, are called moral. Therefore, the theological virtues are not distinct from the moral and intellectual virtues.

Objection 2. Further, the theological virtues are those which direct us to God. Now, among the intellectual virtues there is one which directs us to God: this

is wisdom, which is about Divine things, since it considers the highest cause. Therefore the theological virtues are not distinct from the intellectual virtues.

Objection 3. Further, Augustine (*De Moribus Eccl.* xv) shows how the four cardinal virtues are the “order of love.” Now love is charity, which is a theological virtue. Therefore the moral virtues are not distinct from the theological.

On the contrary, That which is above man’s nature is distinct from that which is according to his nature. But the theological virtues are above man’s nature; while the intellectual and moral virtues are in proportion to his nature, as clearly shown above (q. 58, a. 3). Therefore they are distinct from one another.

I answer that, As stated above (q. 54, a. 2, ad 1), habits are specifically distinct from one another in respect of the formal difference of their objects. Now the object of the theological virtues is God Himself, Who is the last end of all, as surpassing the knowledge of our reason. On the other hand, the object of the intellectual and moral virtues is something comprehensible to human reason. Wherefore the theological virtues are specifically distinct from the moral and intellectual virtues.

Reply to Objection 1. The intellectual and moral virtues perfect man’s intellect and appetite according to the capacity of human nature; the theological virtues, supernaturally.

Reply to Objection 2. The wisdom which the Philosopher (*Ethic.* vi, 3,7) reckons as an intellectual virtue, considers Divine things so far as they are open to the research of human reason. Theological virtue, on the other hand, is about those same things so far as they surpass human reason.

Reply to Objection 3. Though charity is love, yet love is not always charity. When, then, it is stated that every virtue is the order of love, this can be understood either of love in the general sense, or of the love of charity. If it be understood of love, commonly so called, then each virtue is stated to be the order of love, in so far as each cardinal virtue requires ordinate emotions; and love is the root and cause of every emotion, as stated above (q. 27, a. 4; q. 28, a. 6, ad 2; q. 41, a. 2, ad 1). If, however, it be understood of the love of charity, it does not mean that every other virtue is charity essentially: but that all other virtues depend on charity in some way, as we shall show further on (q. 65, Aa. 2,5; IIa IIae, q. 23, a. 7).

Whether faith, hope, and charity are fittingly reckoned as theological virtues?

Ia IIae q. 62 a. 3

Objection 1. It would seem that faith, hope, and charity are not fittingly reckoned as three theological virtues. For the theological virtues are in relation to Divine happiness, what the natural inclination is in relation to the connatural end. Now among the virtues directed to the connatural end there is but one natural virtue, viz. the understanding of principles. Therefore there should be but one theological virtue.

Objection 2. Further, the theological virtues are more perfect than the intellectual and moral virtues. Now faith is not reckoned among the intellectual virtues, but is something less than a virtue, since it is imperfect knowledge. Likewise hope is not reckoned among the moral virtues, but is something less than a virtue, since it is a passion. Much less therefore should they be reckoned as theological virtues.

Objection 3. Further, the theological virtues direct man’s soul to God. Now man’s soul cannot be directed to God, save through the intellective part, wherein are the intellect and will. Therefore there should be only two theological virtues, one perfecting the intellect, the other, the will.

On the contrary, The Apostle says (1 Cor. 13:13): “Now there remain faith, hope, charity, these three.”

I answer that, As stated above (a. 1), the theological virtues direct man to supernatural happiness in the same way as by the natural inclination man is directed to his connatural end. Now the latter happens in respect of two things. First, in respect of the reason or intellect, in so far as it contains the first universal prin-

ciples which are known to us by the natural light of the intellect, and which are reason’s starting-point, both in speculative and in practical matters. Secondly, through the rectitude of the will which tends naturally to good as defined by reason.

But these two fall short of the order of supernatural happiness, according to 1 Cor. 2:9: “The eye hath not seen, nor ear heard, neither hath it entered into the heart of man, what things God hath prepared for them that love Him.” Consequently in respect of both the above things man needed to receive in addition something supernatural to direct him to a supernatural end. First, as regards the intellect, man receives certain supernatural principles, which are held by means of a Divine light: these are the articles of faith, about which is faith. Secondly, the will is directed to this end, both as to that end as something attainable—and this pertains to hope—and as to a certain spiritual union, whereby the will is, so to speak, transformed into that end—and this belongs to charity. For the appetite of a thing is moved and tends towards its connatural end naturally; and this movement is due to a certain conformity of the thing with its end.

Reply to Objection 1. The intellect requires intelligible species whereby to understand: consequently there is need of a natural habit in addition to the power. But the very nature of the will suffices for it to be directed naturally to the end, both as to the intention of the end and as to its conformity with the end. But the nature of the power is insufficient in either of these respects,

for the will to be directed to things that are above its nature. Consequently there was need for an additional supernatural habit in both respects.

Reply to Objection 2. Faith and hope imply a certain imperfection: since faith is of things unseen, and hope, of things not possessed. Hence faith and hope, in things that are subject to human power, fall short of the notion of virtue. But faith and hope in things which are

above the capacity of human nature surpass all virtue that is in proportion to man, according to 1 Cor. 1:25: "The weakness of God is stronger than men."

Reply to Objection 3. Two things pertain to the appetite, viz. movement to the end, and conformity with the end by means of love. Hence there must needs be two theological virtues in the human appetite, namely, hope and charity.

Whether faith precedes hope, and hope charity?

Ia IIae q. 62 a. 4

Objection 1. It would seem that the order of the theological virtues is not that faith precedes hope, and hope charity. For the root precedes that which grows from it. Now charity is the root of all the virtues, according to Eph. 3:17: "Being rooted and founded in charity." Therefore charity precedes the others.

Objection 2. Further, Augustine says (De Doctr. Christ. i): "A man cannot love what he does not believe to exist. But if he believes and loves, by doing good works he ends in hoping." Therefore it seems that faith precedes charity, and charity hope.

Objection 3. Further, love is the principle of all our emotions, as stated above (a. 2, ad 3). Now hope is a kind of emotion, since it is a passion, as stated above (q. 25, a. 2). Therefore charity, which is love, precedes hope.

On the contrary, The Apostle enumerates them thus (1 Cor. 13:13): "Now there remain faith, hope, charity."

I answer that, Order is twofold: order of generation, and order of perfection. By order of generation, in respect of which matter precedes form, and the imperfect precedes the perfect, in one same subject faith precedes hope, and hope charity, as to their acts: because habits are all infused together. For the movement of the appetite cannot tend to anything, either by hoping or loving, unless that thing be apprehended by the sense or by the intellect. Now it is by faith that the intellect apprehends the object of hope and love. Hence in the order of generation, faith precedes hope and charity. In like manner a man loves a thing because he apprehends it as his good. Now from the very fact that a man

hopes to be able to obtain some good through someone, he looks on the man in whom he hopes as a good of his own. Hence for the very reason that a man hopes in someone, he proceeds to love him: so that in the order of generation, hope precedes charity as regards their respective acts.

But in the order of perfection, charity precedes faith and hope: because both faith and hope are quickened by charity, and receive from charity their full complement as virtues. For thus charity is the mother and the root of all the virtues, inasmuch as it is the form of them all, as we shall state further on (IIa IIae, q. 23, a. 8).

This suffices for the Reply to the First Objection.

Reply to Objection 2. Augustine is speaking of that hope whereby a man hopes to obtain bliss through the merits which he has already: this belongs to hope quickened by and following charity. But it is possible for a man before having charity, to hope through merits not already possessed, but which he hopes to possess.

Reply to Objection 3. As stated above (q. 40, a. 7), in treating of the passions, hope regards two things. One as its principal object, viz. the good hoped for. With regard to this, love always precedes hope: for good is never hoped for unless it be desired and loved. Hope also regards the person from whom a man hopes to be able to obtain some good. With regard to this, hope precedes love at first; though afterwards hope is increased by love. Because from the fact that a man thinks that he can obtain a good through someone, he begins to love him: and from the fact that he loves him, he then hopes all the more in him.

Objection 1. It would seem that there are not any theological virtues. For according to Phys. vii, text. 17, “virtue is the disposition of a perfect thing to that which is best: and by perfect, I mean that which is disposed according to nature.” But that which is Divine is above man’s nature. Therefore the theological virtues are not virtues of a man.

Objection 2. Further, theological virtues are quasi-Divine virtues. But the Divine virtues are exemplars, as stated above (q. 61, a. 5), which are not in us but in God. Therefore the theological virtues are not virtues of man.

Objection 3. Further, the theological virtues are so called because they direct us to God, Who is the first beginning and last end of all things. But by the very nature of his reason and will, man is directed to his first beginning and last end. Therefore there is no need for any habits of theological virtue, to direct the reason and will to God.

On the contrary, The precepts of the Law are about acts of virtue. Now the Divine Law contains precepts about the acts of faith, hope, and charity: for it is written (Ecclus. 2:8, seqq.): “Ye that fear the Lord believe Him,” and again, “hope in Him,” and again, “love Him.” Therefore faith, hope, and charity are virtues directing us to God. Therefore they are theological virtues.

I answer that, Man is perfected by virtue, for those actions whereby he is directed to happiness, as was explained above (q. 5, a. 7). Now man’s happiness is twofold, as was also stated above (q. 5, a. 5). One is proportionate to human nature, a happiness, to wit, which man can obtain by means of his natural principles. The other is a happiness surpassing man’s nature, and which man can obtain by the power of God alone, by a kind of participation of the Godhead, about which it is writ-

ten (2 Pet. 1:4) that by Christ we are made “partakers of the Divine nature.” And because such happiness surpasses the capacity of human nature, man’s natural principles which enable him to act well according to his capacity, do not suffice to direct man to this same happiness. Hence it is necessary for man to receive from God some additional principles, whereby he may be directed to supernatural happiness, even as he is directed to his connatural end, by means of his natural principles, albeit not without Divine assistance. Such like principles are called “theological virtues”: first, because their object is God, inasmuch as they direct us aright to God: secondly, because they are infused in us by God alone: thirdly, because these virtues are not made known to us, save by Divine revelation, contained in Holy Writ.

Reply to Objection 1. A certain nature may be ascribed to a certain thing in two ways. First, essentially: and thus these theological virtues surpass the nature of man. Secondly, by participation, as kindled wood partakes of the nature of fire: and thus, after a fashion, man becomes a partaker of the Divine Nature, as stated above: so that these virtues are proportionate to man in respect of the Nature of which he is made a partaker.

Reply to Objection 2. These virtues are called Divine, not as though God were virtuous by reason of them, but because of them God makes us virtuous, and directs us to Himself. Hence they are not exemplar but exemplate virtues.

Reply to Objection 3. The reason and will are naturally directed to God, inasmuch as He is the beginning and end of nature, but in proportion to nature. But the reason and will, according to their nature, are not sufficiently directed to Him in so far as He is the object of supernatural happiness.

Objection 1. It would seem that the theological virtues are not distinct from the moral and intellectual virtues. For the theological virtues, if they be in a human soul, must needs perfect it, either as to the intellectual, or as to the appetitive part. Now the virtues which perfect the intellectual part are called intellectual; and the virtues which perfect the appetitive part, are called moral. Therefore, the theological virtues are not distinct from the moral and intellectual virtues.

Objection 2. Further, the theological virtues are those which direct us to God. Now, among the intellectual virtues there is one which directs us to God: this is wisdom, which is about Divine things, since it considers the highest cause. Therefore the theological virtues are not distinct from the intellectual virtues.

Objection 3. Further, Augustine (*De Moribus Eccl.* xv) shows how the four cardinal virtues are the “order of love.” Now love is charity, which is a theological virtue. Therefore the moral virtues are not distinct from the theological.

On the contrary, That which is above man’s nature is distinct from that which is according to his nature. But the theological virtues are above man’s nature; while the intellectual and moral virtues are in proportion to his nature, as clearly shown above (q. 58, a. 3). Therefore they are distinct from one another.

I answer that, As stated above (q. 54, a. 2, ad 1), habits are specifically distinct from one another in respect of the formal difference of their objects. Now the object of the theological virtues is God Himself, Who

is the last end of all, as surpassing the knowledge of our reason. On the other hand, the object of the intellectual and moral virtues is something comprehensible to human reason. Wherefore the theological virtues are specifically distinct from the moral and intellectual virtues.

Reply to Objection 1. The intellectual and moral virtues perfect man’s intellect and appetite according to the capacity of human nature; the theological virtues, supernaturally.

Reply to Objection 2. The wisdom which the Philosopher (*Ethic.* vi, 3,7) reckons as an intellectual virtue, considers Divine things so far as they are open to the research of human reason. Theological virtue, on the other hand, is about those same things so far as they surpass human reason.

Reply to Objection 3. Though charity is love, yet love is not always charity. When, then, it is stated that every virtue is the order of love, this can be understood either of love in the general sense, or of the love of charity. If it be understood of love, commonly so called, then each virtue is stated to be the order of love, in so far as each cardinal virtue requires ordinate emotions; and love is the root and cause of every emotion, as stated above (q. 27, a. 4; q. 28, a. 6, ad 2; q. 41, a. 2, ad 1). If, however, it be understood of the love of charity, it does not mean that every other virtue is charity essentially: but that all other virtues depend on charity in some way, as we shall show further on (q. 65, Aa. 2,5; IIa IIae, q. 23, a. 7).

Objection 1. It would seem that faith, hope, and charity are not fittingly reckoned as three theological virtues. For the theological virtues are in relation to Divine happiness, what the natural inclination is in relation to the connatural end. Now among the virtues directed to the connatural end there is but one natural virtue, viz. the understanding of principles. Therefore there should be but one theological virtue.

Objection 2. Further, the theological virtues are more perfect than the intellectual and moral virtues. Now faith is not reckoned among the intellectual virtues, but is something less than a virtue, since it is imperfect knowledge. Likewise hope is not reckoned among the moral virtues, but is something less than a virtue, since it is a passion. Much less therefore should they be reckoned as theological virtues.

Objection 3. Further, the theological virtues direct man's soul to God. Now man's soul cannot be directed to God, save through the intellective part, wherein are the intellect and will. Therefore there should be only two theological virtues, one perfecting the intellect, the other, the will.

On the contrary, The Apostle says (1 Cor. 13:13): "Now there remain faith, hope, charity, these three."

I answer that, As stated above (a. 1), the theological virtues direct man to supernatural happiness in the same way as by the natural inclination man is directed to his connatural end. Now the latter happens in respect of two things. First, in respect of the reason or intellect, in so far as it contains the first universal principles which are known to us by the natural light of the intellect, and which are reason's starting-point, both in speculative and in practical matters. Secondly, through the rectitude of the will which tends naturally to good as defined by reason.

But these two fall short of the order of supernatural happiness, according to 1 Cor. 2:9: "The eye hath not seen, nor ear heard, neither hath it entered into the

heart of man, what things God hath prepared for them that love Him." Consequently in respect of both the above things man needed to receive in addition something supernatural to direct him to a supernatural end. First, as regards the intellect, man receives certain supernatural principles, which are held by means of a Divine light: these are the articles of faith, about which is faith. Secondly, the will is directed to this end, both as to that end as something attainable—and this pertains to hope—and as to a certain spiritual union, whereby the will is, so to speak, transformed into that end—and this belongs to charity. For the appetite of a thing is moved and tends towards its connatural end naturally; and this movement is due to a certain conformity of the thing with its end.

Reply to Objection 1. The intellect requires intelligible species whereby to understand: consequently there is need of a natural habit in addition to the power. But the very nature of the will suffices for it to be directed naturally to the end, both as to the intention of the end and as to its conformity with the end. But the nature of the power is insufficient in either of these respects, for the will to be directed to things that are above its nature. Consequently there was need for an additional supernatural habit in both respects.

Reply to Objection 2. Faith and hope imply a certain imperfection: since faith is of things unseen, and hope, of things not possessed. Hence faith and hope, in things that are subject to human power, fall short of the notion of virtue. But faith and hope in things which are above the capacity of human nature surpass all virtue that is in proportion to man, according to 1 Cor. 1:25: "The weakness of God is stronger than men."

Reply to Objection 3. Two things pertain to the appetite, viz. movement to the end, and conformity with the end by means of love. Hence there must needs be two theological virtues in the human appetite, namely, hope and charity.

Objection 1. It would seem that the order of the theological virtues is not that faith precedes hope, and hope charity. For the root precedes that which grows from it. Now charity is the root of all the virtues, according to Eph. 3:17: "Being rooted and founded in charity." Therefore charity precedes the others.

Objection 2. Further, Augustine says (De Doctr. Christ. i): "A man cannot love what he does not believe to exist. But if he believes and loves, by doing good works he ends in hoping." Therefore it seems that faith precedes charity, and charity hope.

Objection 3. Further, love is the principle of all our emotions, as stated above (a. 2, ad 3). Now hope is a kind of emotion, since it is a passion, as stated above (q. 25, a. 2). Therefore charity, which is love, precedes hope.

On the contrary, The Apostle enumerates them thus (1 Cor. 13:13): "Now there remain faith, hope, charity."

I answer that, Order is twofold: order of generation, and order of perfection. By order of generation, in respect of which matter precedes form, and the imperfect precedes the perfect, in one same subject faith precedes hope, and hope charity, as to their acts: because habits are all infused together. For the movement of the appetite cannot tend to anything, either by hoping or loving, unless that thing be apprehended by the sense or by the intellect. Now it is by faith that the intellect apprehends the object of hope and love. Hence in the order of generation, faith precedes hope and charity. In like manner a man loves a thing because he apprehends it as his good. Now from the very fact that a man

hopes to be able to obtain some good through someone, he looks on the man in whom he hopes as a good of his own. Hence for the very reason that a man hopes in someone, he proceeds to love him: so that in the order of generation, hope precedes charity as regards their respective acts.

But in the order of perfection, charity precedes faith and hope: because both faith and hope are quickened by charity, and receive from charity their full complement as virtues. For thus charity is the mother and the root of all the virtues, inasmuch as it is the form of them all, as we shall state further on (IIa IIae, q. 23, a. 8).

This suffices for the Reply to the First Objection.

Reply to Objection 2. Augustine is speaking of that hope whereby a man hopes to obtain bliss through the merits which he has already: this belongs to hope quickened by and following charity. But it is possible for a man before having charity, to hope through merits not already possessed, but which he hopes to possess.

Reply to Objection 3. As stated above (q. 40, a. 7), in treating of the passions, hope regards two things. One as its principal object, viz. the good hoped for. With regard to this, love always precedes hope: for good is never hoped for unless it be desired and loved. Hope also regards the person from whom a man hopes to be able to obtain some good. With regard to this, hope precedes love at first; though afterwards hope is increased by love. Because from the fact that a man thinks that he can obtain a good through someone, he begins to love him: and from the fact that he loves him, he then hopes all the more in him.

FIRST PART OF THE SECOND PART, QUESTION 63

Of the Cause of Virtues (In Four Articles)

We must now consider the cause of virtues; and under this head there are four points of inquiry:

- (1) Whether virtue is in us by nature?
- (2) Whether any virtue is caused in us by habituation?
- (3) Whether any moral virtues are in us by infusion?
- (4) Whether virtue acquired by habituation, is of the same species as infused virtue?

Whether virtue is in us by nature?

Ia IIae q. 63 a. 1

Objection 1. It would seem that virtue is in us by nature. For Damascene says (De Fide Orth. iii, 14): “Virtues are natural to us and are equally in all of us.” And Antony says in his sermon to the monks: “If the will contradicts nature it is perverse, if it follow nature it is virtuous.” Moreover, a gloss on Mat. 4:23, “Jesus went about,” etc., says: “He taught them natural virtues, i.e. chastity, justice, humility, which man possesses naturally.”

Objection 2. Further, the virtuous good consists in accord with reason, as was clearly shown above (q. 55, a. 4, ad 2). But that which accords with reason is natural to man; since reason is part of man’s nature. Therefore virtue is in man by nature.

Objection 3. Further, that which is in us from birth is said to be natural to us. Now virtues are in some from birth: for it is written (Job 31:18): “From my infancy mercy grew up with me; and it came out with me from my mother’s womb.” Therefore virtue is in man by nature.

On the contrary, Whatever is in man by nature is common to all men, and is not taken away by sin, since even in the demons natural gifts remain, as Dionysius states (Div. Nom. iv). But virtue is not in all men; and is cast out by sin. Therefore it is not in man by nature.

I answer that, With regard to corporeal forms, it has been maintained by some that they are wholly from within, by those, for instance, who upheld the theory of “latent forms”*. Others held that forms are entirely from without, those, for instance, who thought that corporeal forms originated from some separate cause. Others, however, esteemed that they are partly from within, in so far as they pre-exist potentially in matter; and partly from without, in so far as they are brought into act by the agent.

In like manner with regard to sciences and virtues, some held that they are wholly from within, so that all virtues and sciences would pre-exist in the soul naturally, but that the hindrances to science and virtue, which are due to the soul being weighed down by the body, are removed by study and practice, even as iron is made bright by being polished. This was the opinion of the Platonists. Others said that they are wholly from

without, being due to the inflow of the active intellect, as Avicenna maintained. Others said that sciences and virtues are within us by nature, so far as we are adapted to them, but not in their perfection: this is the teaching of the Philosopher (Ethic. ii, 1), and is nearer the truth.

To make this clear, it must be observed that there are two ways in which something is said to be natural to a man; one is according to his specific nature, the other according to his individual nature. And, since each thing derives its species from its form, and its individuation from matter, and, again, since man’s form is his rational soul, while his matter is his body, whatever belongs to him in respect of his rational soul, is natural to him in respect of his specific nature; while whatever belongs to him in respect of the particular temperament of his body, is natural to him in respect of his individual nature. For whatever is natural to man in respect of his body, considered as part of his species, is to be referred, in a way, to the soul, in so far as this particular body is adapted to this particular soul.

In both these ways virtue is natural to man inchoatively. This is so in respect of the specific nature, in so far as in man’s reason are to be found instilled by nature certain naturally known principles of both knowledge and action, which are the nurseries of intellectual and moral virtues, and in so far as there is in the will a natural appetite for good in accordance with reason. Again, this is so in respect of the individual nature, in so far as by reason of a disposition in the body, some are disposed either well or ill to certain virtues: because, to wit, certain sensitive powers are acts of certain parts of the body, according to the disposition of which these powers are helped or hindered in the exercise of their acts, and, in consequence, the rational powers also, which the aforesaid sensitive powers assist. In this way one man has a natural aptitude for science, another for fortitude, another for temperance: and in these ways, both intellectual and moral virtues are in us by way of a natural aptitude, inchoatively, but not perfectly, since nature is determined to one, while the perfection of these virtues does not depend on one particular mode of action, but on various modes, in respect of the various matters, which constitute the sphere of virtue’s action,

* Anaxagoras; Cf. Ia, q. 45, a. 8; q. 65, a. 4

and according to various circumstances.

It is therefore evident that all virtues are in us by nature, according to aptitude and inchoation, but not according to perfection, except the theological virtues, which are entirely from without.

This suffices for the Replies to the Objections. For

the first two argue about the nurseries of virtue which are in us by nature, inasmuch as we are rational beings. The third objection must be taken in the sense that, owing to the natural disposition which the body has from birth, one has an aptitude for pity, another for living temperately, another for some other virtue.

Whether any virtue is caused in us by habituation?

Ia IIae q. 63 a. 2

Objection 1. It would seem that virtues can not be caused in us by habituation. Because a gloss of Augustine* commenting on Rom. 14:23, "All that is not of faith is sin," says: "The whole life of an unbeliever is a sin: and there is no good without the Sovereign Good. Where knowledge of the truth is lacking, virtue is a mockery even in the best behaved people." Now faith cannot be acquired by means of works, but is caused in us by God, according to Eph. 2:8: "By grace you are saved through faith." Therefore no acquired virtue can be in us by habituation.

Objection 2. Further, sin and virtue are contraries, so that they are incompatible. Now man cannot avoid sin except by the grace of God, according to Wis. 8:21: "I knew that I could not otherwise be continent, except God gave it." Therefore neither can any virtues be caused in us by habituation, but only by the gift of God.

Objection 3. Further, actions which lead toward virtue, lack the perfection of virtue. But an effect cannot be more perfect than its cause. Therefore a virtue cannot be caused by actions that precede it.

On the contrary, Dionysius says (Div. Nom. iv) that good is more efficacious than evil. But vicious habits are caused by evil acts. Much more, therefore, can virtuous habits be caused by good acts.

I answer that, We have spoken above (q. 51, Aa. 2,3) in a general way about the production of habits from acts; and speaking now in a special way of this matter in relation to virtue, we must take note that, as stated above (q. 55, Aa. 3,4), man's virtue perfects him in relation to good. Now since the notion of good consists in "mode, species, and order," as Augustine states (De Nat. Boni. iii) or in "number, weight, and measure," as expressed in Wis. 11:21, man's good must needs be appraised with respect to some rule. Now this rule is twofold, as stated above (q. 19, Aa. 3,4), viz. human reason and Divine Law. And since Divine Law is the higher rule, it extends to more things, so that whatever is ruled by human reason, is ruled by the Divine Law too; but the converse does not hold.

It follows that human virtue directed to the good

which is defined according to the rule of human reason can be caused by human acts: inasmuch as such acts proceed from reason, by whose power and rule the aforesaid good is established. On the other hand, virtue which directs man to good as defined by the Divine Law, and not by human reason, cannot be caused by human acts, the principle of which is reason, but is produced in us by the Divine operation alone. Hence Augustine in giving the definition of the latter virtue inserts the words, "which God works in us without us" (Super Ps. 118, Serm. xxvi). It is also of these virtues that the First Objection holds good.

Reply to Objection 2. Mortal sin is incompatible with divinely infused virtue, especially if this be considered in its perfect state. But actual sin, even mortal, is compatible with humanly acquired virtue; because the use of a habit in us is subject to our will, as stated above (q. 49, a. 3): and one sinful act does not destroy a habit of acquired virtue, since it is not an act but a habit, that is directly contrary to a habit. Wherefore, though man cannot avoid mortal sin without grace, so as never to sin mortally, yet he is not hindered from acquiring a habit of virtue, whereby he may abstain from evil in the majority of cases, and chiefly in matters most opposed to reason. There are also certain mortal sins which man can nowise avoid without grace, those, namely, which are directly opposed to the theological virtues, which are in us through the gift of grace. This, however, will be more fully explained later (q. 109, a. 4).

Reply to Objection 3. As stated above (a. 1; q. 51, a. 1), certain seeds or principles of acquired virtue pre-exist in us by nature. These principles are more excellent than the virtues acquired through them: thus the understanding of speculative principles is more excellent than the science of conclusions, and the natural rectitude of the reason is more excellent than the rectification of the appetite which results through the appetite partaking of reason, which rectification belongs to moral virtue. Accordingly human acts, in so far as they proceed from higher principles, can cause acquired human virtues.

* Cf. Lib. Sentent. Prosperi cvi.

Objection 1. It would seem that no virtues besides the theological virtues are infused in us by God. Because God does not do by Himself, save perhaps sometimes miraculously, those things that can be done by second causes; for, as Dionysius says (Coel. Hier. iv), “it is God’s rule to bring about extremes through the mean.” Now intellectual and moral virtues can be caused in us by our acts, as stated above (a. 2). Therefore it is not reasonable that they should be caused in us by infusion.

Objection 2. Further, much less superfluity is found in God’s works than in the works of nature. Now the theological virtues suffice to direct us to supernatural good. Therefore there are no other supernatural virtues needing to be caused in us by God.

Objection 3. Further, nature does not employ two means where one suffices: much less does God. But God sowed the seeds of virtue in our souls, according to a gloss on Heb. 1*. Therefore it is unfitting for Him to cause in us other virtues by means of infusion.

On the contrary, It is written (Wis. 8:7): “She teacheth temperance and prudence and justice and fortitude.”

I answer that, Effects must needs be proportionate to their causes and principles. Now all virtues, intellectual and moral, that are acquired by our actions,

arise from certain natural principles pre-existing in us, as above stated (a. 1; q. 51, a. 1): instead of which natural principles, God bestows on us the theological virtues, whereby we are directed to a supernatural end, as stated (q. 62, a. 1). Wherefore we need to receive from God other habits corresponding, in due proportion, to the theological virtues, which habits are to the theological virtues, what the moral and intellectual virtues are to the natural principles of virtue.

Reply to Objection 1. Some moral and intellectual virtues can indeed be caused in us by our actions: but such are not proportionate to the theological virtues. Therefore it was necessary for us to receive, from God immediately, others that are proportionate to these virtues.

Reply to Objection 2. The theological virtues direct us sufficiently to our supernatural end, inchoatively: i.e. to God Himself immediately. But the soul needs further to be perfected by infused virtues in regard to other things, yet in relation to God.

Reply to Objection 3. The power of those naturally instilled principles does not extend beyond the capacity of nature. Consequently man needs in addition to be perfected by other principles in relation to his supernatural end.

Objection 1. It would seem that infused virtue does not differ in species from acquired virtue. Because acquired and infused virtues, according to what has been said (a. 3), do not differ seemingly, save in relation to the last end. Now human habits and acts are specified, not by their last, but by their proximate end. Therefore the infused moral or intellectual virtue does not differ from the acquired virtue.

Objection 2. Further, habits are known by their acts. But the act of infused and acquired temperance is the same, viz. to moderate desires of touch. Therefore they do not differ in species.

Objection 3. Further, acquired and infused virtue differ as that which is wrought by God immediately, from that which is wrought by a creature. But the man whom God made, is of the same species as a man begotten naturally; and the eye which He gave to the man born blind, as one produced by the power of generation. Therefore it seems that acquired and infused virtue belong to the same species.

On the contrary, Any change introduced into the difference expressed in a definition involves a difference of species. But the definition of infused virtue contains the words, “which God works in us without us,” as stated above (q. 55, a. 4). Therefore acquired virtue,

to which these words cannot apply, is not of the same species as infused virtue.

I answer that, There is a twofold specific difference among habits. The first, as stated above (q. 54, a. 2; q. 56, a. 2; q. 60, a. 1), is taken from the specific and formal aspects of their objects. Now the object of every virtue is a good considered as in that virtue’s proper matter: thus the object of temperance is a good in respect of the pleasures connected with the concupiscence of touch. The formal aspect of this object is from reason which fixes the mean in these concupiscences: while the material element is something on the part of the concupiscences. Now it is evident that the mean that is appointed in such like concupiscences according to the rule of human reason, is seen under a different aspect from the mean which is fixed according to Divine rule. For instance, in the consumption of food, the mean fixed by human reason, is that food should not harm the health of the body, nor hinder the use of reason: whereas, according to the Divine rule, it behooves man to “chastise his body, and bring it into subjection” (1 Cor. 9:27), by abstinence in food, drink and the like. It is therefore evident that infused and acquired temperance differ in species; and the same applies to the other virtues.

* Cf. Jerome on Gal. 1: 15,16

The other specific differences among habits is taken from the things to which they are directed: for a man's health and a horse's are not of the same species, on account of the difference between the natures to which their respective healths are directed. In the same sense, the Philosopher says (Polit. iii, 3) that citizens have diverse virtues according as they are well directed to diverse forms of government. In the same way, too, those infused moral virtues, whereby men behave well in respect of their being "fellow-citizens with the saints, and of the household [Douay: 'domestics'] of God" (Eph. 2:19), differ from the acquired virtues, whereby man behaves well in respect of human affairs.

Reply to Objection 1. Infused and acquired virtue

differ not only in relation to the ultimate end, but also in relation to their proper objects, as stated.

Reply to Objection 2. Both acquired and infused temperance moderate desires for pleasures of touch, but for different reasons, as stated: wherefore their respective acts are not identical.

Reply to Objection 3. God gave the man born blind an eye for the same act as the act for which other eyes are formed naturally: consequently it was of the same species. It would be the same if God wished to give a man miraculously virtues, such as those that are acquired by acts. But the case is not so in the question before us, as stated.

Objection 1. It would seem that virtue is in us by nature. For Damascene says (*De Fide Orth.* iii, 14): “Virtues are natural to us and are equally in all of us.” And Antony says in his sermon to the monks: “If the will contradicts nature it is perverse, if it follow nature it is virtuous.” Moreover, a gloss on *Mat.* 4:23, “Jesus went about,” etc., says: “He taught them natural virtues, i.e. chastity, justice, humility, which man possesses naturally.”

Objection 2. Further, the virtuous good consists in accord with reason, as was clearly shown above (q. 55, a. 4, ad 2). But that which accords with reason is natural to man; since reason is part of man’s nature. Therefore virtue is in man by nature.

Objection 3. Further, that which is in us from birth is said to be natural to us. Now virtues are in some from birth: for it is written (*Job* 31:18): “From my infancy mercy grew up with me; and it came out with me from my mother’s womb.” Therefore virtue is in man by nature.

On the contrary, Whatever is in man by nature is common to all men, and is not taken away by sin, since even in the demons natural gifts remain, as Dionysius states (*Div. Nom.* iv). But virtue is not in all men; and is cast out by sin. Therefore it is not in man by nature.

I answer that, With regard to corporeal forms, it has been maintained by some that they are wholly from within, by those, for instance, who upheld the theory of “latent forms”*. Others held that forms are entirely from without, those, for instance, who thought that corporeal forms originated from some separate cause. Others, however, esteemed that they are partly from within, in so far as they pre-exist potentially in matter; and partly from without, in so far as they are brought into act by the agent.

In like manner with regard to sciences and virtues, some held that they are wholly from within, so that all virtues and sciences would pre-exist in the soul naturally, but that the hindrances to science and virtue, which are due to the soul being weighed down by the body, are removed by study and practice, even as iron is made bright by being polished. This was the opinion of the Platonists. Others said that they are wholly from without, being due to the inflow of the active intellect, as Avicenna maintained. Others said that sciences and virtues are within us by nature, so far as we are adapted to them, but not in their perfection: this is the teaching of the Philosopher (*Ethic.* ii, 1), and is nearer the truth.

To make this clear, it must be observed that there

are two ways in which something is said to be natural to a man; one is according to his specific nature, the other according to his individual nature. And, since each thing derives its species from its form, and its individuation from matter, and, again, since man’s form is his rational soul, while his matter is his body, whatever belongs to him in respect of his rational soul, is natural to him in respect of his specific nature; while whatever belongs to him in respect of the particular temperament of his body, is natural to him in respect of his individual nature. For whatever is natural to man in respect of his body, considered as part of his species, is to be referred, in a way, to the soul, in so far as this particular body is adapted to this particular soul.

In both these ways virtue is natural to man inchoatively. This is so in respect of the specific nature, in so far as in man’s reason are to be found instilled by nature certain naturally known principles of both knowledge and action, which are the nurseries of intellectual and moral virtues, and in so far as there is in the will a natural appetite for good in accordance with reason. Again, this is so in respect of the individual nature, in so far as by reason of a disposition in the body, some are disposed either well or ill to certain virtues: because, to wit, certain sensitive powers are acts of certain parts of the body, according to the disposition of which these powers are helped or hindered in the exercise of their acts, and, in consequence, the rational powers also, which the aforesaid sensitive powers assist. In this way one man has a natural aptitude for science, another for fortitude, another for temperance: and in these ways, both intellectual and moral virtues are in us by way of a natural aptitude, inchoatively, but not perfectly, since nature is determined to one, while the perfection of these virtues does not depend on one particular mode of action, but on various modes, in respect of the various matters, which constitute the sphere of virtue’s action, and according to various circumstances.

It is therefore evident that all virtues are in us by nature, according to aptitude and inchoation, but not according to perfection, except the theological virtues, which are entirely from without.

This suffices for the Replies to the Objections. For the first two argue about the nurseries of virtue which are in us by nature, inasmuch as we are rational beings. The third objection must be taken in the sense that, owing to the natural disposition which the body has from birth, one has an aptitude for pity, another for living temperately, another for some other virtue.

* Anaxagoras; Cf. Ia, q. 45, a. 8; q. 65, a. 4

Objection 1. It would seem that virtues can not be caused in us by habituation. Because a gloss of Augustine* commenting on Rom. 14:23, "All that is not of faith is sin," says: "The whole life of an unbeliever is a sin: and there is no good without the Sovereign Good. Where knowledge of the truth is lacking, virtue is a mockery even in the best behaved people." Now faith cannot be acquired by means of works, but is caused in us by God, according to Eph. 2:8: "By grace you are saved through faith." Therefore no acquired virtue can be in us by habituation.

Objection 2. Further, sin and virtue are contraries, so that they are incompatible. Now man cannot avoid sin except by the grace of God, according to Wis. 8:21: "I knew that I could not otherwise be continent, except God gave it." Therefore neither can any virtues be caused in us by habituation, but only by the gift of God.

Objection 3. Further, actions which lead toward virtue, lack the perfection of virtue. But an effect cannot be more perfect than its cause. Therefore a virtue cannot be caused by actions that precede it.

On the contrary, Dionysius says (Div. Nom. iv) that good is more efficacious than evil. But vicious habits are caused by evil acts. Much more, therefore, can virtuous habits be caused by good acts.

I answer that, We have spoken above (q. 51, Aa. 2,3) in a general way about the production of habits from acts; and speaking now in a special way of this matter in relation to virtue, we must take note that, as stated above (q. 55, Aa. 3,4), man's virtue perfects him in relation to good. Now since the notion of good consists in "mode, species, and order," as Augustine states (De Nat. Boni. iii) or in "number, weight, and measure," as expressed in Wis. 11:21, man's good must needs be appraised with respect to some rule. Now this rule is twofold, as stated above (q. 19, Aa. 3,4), viz. human reason and Divine Law. And since Divine Law is the higher rule, it extends to more things, so that whatever is ruled by human reason, is ruled by the Divine Law too; but the converse does not hold.

It follows that human virtue directed to the good

which is defined according to the rule of human reason can be caused by human acts: inasmuch as such acts proceed from reason, by whose power and rule the aforesaid good is established. On the other hand, virtue which directs man to good as defined by the Divine Law, and not by human reason, cannot be caused by human acts, the principle of which is reason, but is produced in us by the Divine operation alone. Hence Augustine in giving the definition of the latter virtue inserts the words, "which God works in us without us" (Super Ps. 118, Sermon. xxvi). It is also of these virtues that the First Objection holds good.

Reply to Objection 2. Mortal sin is incompatible with divinely infused virtue, especially if this be considered in its perfect state. But actual sin, even mortal, is compatible with humanly acquired virtue; because the use of a habit in us is subject to our will, as stated above (q. 49, a. 3): and one sinful act does not destroy a habit of acquired virtue, since it is not an act but a habit, that is directly contrary to a habit. Wherefore, though man cannot avoid mortal sin without grace, so as never to sin mortally, yet he is not hindered from acquiring a habit of virtue, whereby he may abstain from evil in the majority of cases, and chiefly in matters most opposed to reason. There are also certain mortal sins which man can nowise avoid without grace, those, namely, which are directly opposed to the theological virtues, which are in us through the gift of grace. This, however, will be more fully explained later (q. 109, a. 4).

Reply to Objection 3. As stated above (a. 1; q. 51, a. 1), certain seeds or principles of acquired virtue pre-exist in us by nature. These principles are more excellent than the virtues acquired through them: thus the understanding of speculative principles is more excellent than the science of conclusions, and the natural rectitude of the reason is more excellent than the rectification of the appetite which results through the appetite partaking of reason, which rectification belongs to moral virtue. Accordingly human acts, in so far as they proceed from higher principles, can cause acquired human virtues.

* Cf. Lib. Sentent. Prosperi cvi.

Objection 1. It would seem that no virtues besides the theological virtues are infused in us by God. Because God does not do by Himself, save perhaps sometimes miraculously, those things that can be done by second causes; for, as Dionysius says (Coel. Hier. iv), “it is God’s rule to bring about extremes through the mean.” Now intellectual and moral virtues can be caused in us by our acts, as stated above (a. 2). Therefore it is not reasonable that they should be caused in us by infusion.

Objection 2. Further, much less superfluity is found in God’s works than in the works of nature. Now the theological virtues suffice to direct us to supernatural good. Therefore there are no other supernatural virtues needing to be caused in us by God.

Objection 3. Further, nature does not employ two means where one suffices: much less does God. But God sowed the seeds of virtue in our souls, according to a gloss on Heb. 1*. Therefore it is unfitting for Him to cause in us other virtues by means of infusion.

On the contrary, It is written (Wis. 8:7): “She teacheth temperance and prudence and justice and fortitude.”

I answer that, Effects must needs be proportionate to their causes and principles. Now all virtues, intellectual and moral, that are acquired by our actions,

arise from certain natural principles pre-existing in us, as above stated (a. 1; q. 51, a. 1): instead of which natural principles, God bestows on us the theological virtues, whereby we are directed to a supernatural end, as stated (q. 62, a. 1). Wherefore we need to receive from God other habits corresponding, in due proportion, to the theological virtues, which habits are to the theological virtues, what the moral and intellectual virtues are to the natural principles of virtue.

Reply to Objection 1. Some moral and intellectual virtues can indeed be caused in us by our actions: but such are not proportionate to the theological virtues. Therefore it was necessary for us to receive, from God immediately, others that are proportionate to these virtues.

Reply to Objection 2. The theological virtues direct us sufficiently to our supernatural end, inchoatively: i.e. to God Himself immediately. But the soul needs further to be perfected by infused virtues in regard to other things, yet in relation to God.

Reply to Objection 3. The power of those naturally instilled principles does not extend beyond the capacity of nature. Consequently man needs in addition to be perfected by other principles in relation to his supernatural end.

* Cf. Jerome on Gal. 1: 15,16

Objection 1. It would seem that infused virtue does not differ in species from acquired virtue. Because acquired and infused virtues, according to what has been said (a. 3), do not differ seemingly, save in relation to the last end. Now human habits and acts are specified, not by their last, but by their proximate end. Therefore the infused moral or intellectual virtue does not differ from the acquired virtue.

Objection 2. Further, habits are known by their acts. But the act of infused and acquired temperance is the same, viz. to moderate desires of touch. Therefore they do not differ in species.

Objection 3. Further, acquired and infused virtue differ as that which is wrought by God immediately, from that which is wrought by a creature. But the man whom God made, is of the same species as a man begotten naturally; and the eye which He gave to the man born blind, as one produced by the power of generation. Therefore it seems that acquired and infused virtue belong to the same species.

On the contrary, Any change introduced into the difference expressed in a definition involves a difference of species. But the definition of infused virtue contains the words, “which God works in us without us,” as stated above (q. 55, a. 4). Therefore acquired virtue, to which these words cannot apply, is not of the same species as infused virtue.

I answer that, There is a twofold specific difference among habits. The first, as stated above (q. 54, a. 2; q. 56, a. 2; q. 60, a. 1), is taken from the specific and formal aspects of their objects. Now the object of every virtue is a good considered as in that virtue’s proper matter: thus the object of temperance is a good in respect of the pleasures connected with the concupiscence of touch. The formal aspect of this object is from reason which fixes the mean in these concupiscences: while the material element is something on the part of the concupiscences. Now it is evident that the mean that is appointed in such like concupiscences according

to the rule of human reason, is seen under a different aspect from the mean which is fixed according to Divine rule. For instance, in the consumption of food, the mean fixed by human reason, is that food should not harm the health of the body, nor hinder the use of reason: whereas, according to the Divine rule, it behooves man to “chastise his body, and bring it into subjection” (1 Cor. 9:27), by abstinence in food, drink and the like. It is therefore evident that infused and acquired temperance differ in species; and the same applies to the other virtues.

The other specific differences among habits is taken from the things to which they are directed: for a man’s health and a horse’s are not of the same species, on account of the difference between the natures to which their respective healths are directed. In the same sense, the Philosopher says (Polit. iii, 3) that citizens have diverse virtues according as they are well directed to diverse forms of government. In the same way, too, those infused moral virtues, whereby men behave well in respect of their being “fellow-citizens with the saints, and of the household [Douay: ‘domestics’] of God” (Eph. 2:19), differ from the acquired virtues, whereby man behaves well in respect of human affairs.

Reply to Objection 1. Infused and acquired virtue differ not only in relation to the ultimate end, but also in relation to their proper objects, as stated.

Reply to Objection 2. Both acquired and infused temperance moderate desires for pleasures of touch, but for different reasons, as stated: wherefore their respective acts are not identical.

Reply to Objection 3. God gave the man born blind an eye for the same act as the act for which other eyes are formed naturally: consequently it was of the same species. It would be the same if God wished to give a man miraculously virtues, such as those that are acquired by acts. But the case is not so in the question before us, as stated.

FIRST PART OF THE SECOND PART, QUESTION 64

Of the Mean of Virtue (In Four Articles)

We must now consider the properties of virtues: and (1) the mean of virtue, (2) the connection between virtues, (3) equality of virtues, (4) the duration of virtues. Under the first head there are four points of inquiry:

- (1) Whether moral virtue observes the mean?
- (2) Whether the mean of moral virtue is the real mean or the rational mean?
- (3) Whether the intellectual virtues observe the mean?
- (4) Whether the theological virtues do?

Whether moral virtues observe the mean?

Ia IIae q. 64 a. 1

Objection 1. It would seem that moral virtue does not observe the mean. For the nature of a mean is incompatible with that which is extreme. Now the nature of virtue is to be something extreme; for it is stated in *De Coelo* i that “virtue is the limit of power.” Therefore moral virtue does not observe the mean.

Objection 2. Further, the maximum is not a mean. Now some moral virtues tend to a maximum: for instance, magnanimity to very great honors, and magnificence to very large expenditure, as stated in *Ethic.* iv, 2,3. Therefore not every moral virtue observes the mean.

Objection 3. Further, if it is essential to a moral virtue to observe the mean, it follows that a moral virtue is not perfected, but the contrary corrupted, through tending to something extreme. Now some moral virtues are perfected by tending to something extreme; thus virginity, which abstains from all sexual pleasure, observes the extreme, and is the most perfect chastity: and to give all to the poor is the most perfect mercy or liberality. Therefore it seems that it is not essential to moral virtue that it should observe the mean.

On the contrary, The Philosopher says (*Ethic.* ii, 6) that “moral virtue is a habit of choosing the mean.”

I answer that, As already explained (q. 55, a. 3), the nature of virtue is that it should direct man to good. Now moral virtue is properly a perfection of the appetitive part of the soul in regard to some determinate matter: and the measure or rule of the appetitive movement in respect of appetible objects is the reason. But the good of that which is measured or ruled consists in its conformity with its rule: thus the good things made by art is that they follow the rule of art. Consequently, in things of this sort, evil consists in discordance from their rule or measure. Now this may happen either by their exceeding the measure or by their falling short of it; as is clearly the case in all things ruled or measured. Hence it is evident that the good of moral virtue consists in conformity with the rule of reason. Now it is clear that between excess and deficiency the mean is equality or conformity. Therefore it is evident that moral virtue observes the mean.

Reply to Objection 1. Moral virtue derives good-

ness from the rule of reason, while its matter consists in passions or operations. If therefore we compare moral virtue to reason, then, if we look at that which is has of reason, it holds the position of one extreme, viz. conformity; while excess and defect take the position of the other extreme, viz. deformity. But if we consider moral virtue in respect of its matter, then it holds the position of mean, in so far as it makes the passion conform to the rule of reason. Hence the Philosopher says (*Ethic.* ii, 6) that “virtue, as to its essence, is a mean state,” in so far as the rule of virtue is imposed on its proper matter: “but it is an extreme in reference to the ‘best’ and the ‘excellent,’” viz. as to its conformity with reason.

Reply to Objection 2. In actions and passions the mean and the extremes depend on various circumstances: hence nothing hinders something from being extreme in a particular virtue as to one circumstance, while the same thing is a mean in respect of other circumstances, through being in conformity with reason. This is the case with magnanimity and magnificence. For if we look at the absolute quantity of the respective objects of these virtues, we shall call it an extreme and a maximum: but if we consider the quantity in relation to other circumstances, then it has the character of a mean: since these virtues tend to this maximum in accordance with the rule of reason, i.e. “where” it is right, “when” it is right, and for an “end” that is right. There will be excess, if one tends to this maximum “when” it is not right, or “where” it is not right, or for an undue “end”; and there will be deficiency if one fails to tend thereto “where” one ought, and “when” one ought. This agrees with the saying of the Philosopher (*Ethic.* iv, 3) that the “magnanimous man observes the extreme in quantity, but the mean in the right mode of his action.”

Reply to Objection 3. The same is to be said of virginity and poverty as of magnanimity. For virginity abstains from all sexual matters, and poverty from all wealth, for a right end, and in a right manner, i.e. according to God’s word, and for the sake of eternal life. But if this be done in an undue manner, i.e. out of unlawful superstition, or again for vainglory, it will be in excess. And if it be not done when it ought to be done, or as it ought to be done, it is a vice by deficiency: for

instance, in those who break their vows of virginity or poverty.

Whether the mean of moral virtue is the real mean, or the rational mean?

Ia IIae q. 64 a. 2

Objection 1. It would seem that the mean of moral virtue is not the rational mean, but the real mean. For the good of moral virtue consists in its observing the mean. Now, good, as stated in *Metaph. ii, text. 8*, is in things themselves. Therefore the mean of moral virtue is a real mean.

Objection 2. Further, the reason is a power of apprehension. But moral virtue does not observe a mean between apprehensions, but rather a mean between operations or passions. Therefore the mean of moral virtue is not the rational, but the real mean.

Objection 3. Further, a mean that is observed according to arithmetical or geometrical proportion is a real mean. Now such is the mean of justice, as stated in *Ethic. v, 3*. Therefore the mean of moral virtue is not the rational, but the real mean.

On the contrary, The Philosopher says (*Ethic. ii, 6*) that “moral virtue observes the mean fixed, in our regard, by reason.”

I answer that, The rational mean can be understood in two ways. First, according as the mean is observed in the act itself of reason, as though the very act of reason were made to observe the mean: in this sense, since moral virtue perfects not the act of reason, but the act of the appetitive power, the mean of moral virtue is not the rational mean. Secondly, the mean of reason may be

considered as that which the reason puts into some particular matter. In this sense every mean of moral virtue is a rational mean, since, as above stated (a. 1), moral virtue is said to observe the mean, through conformity with right reason.

But it happens sometimes that the rational mean is also the real mean: in which case the mean of moral virtue is the real mean, for instance, in justice. On the other hand, sometimes the rational mean is not the real mean, but is considered in relation to us: and such is the mean in all the other moral virtues. The reason for this is that justice is about operations, which deal with external things, wherein the right has to be established simply and absolutely, as stated above (q. 60, a. 2): wherefore the rational mean in justice is the same as the real mean, in so far, to wit as justice gives to each one his due, neither more nor less. But the other moral virtues deal with interior passions wherein the right cannot be established in the same way, since men are variously situated in relation to their passions; hence the rectitude of reason has to be established in the passions, with due regard to us, who are moved in respect of the passions.

This suffices for the Replies to the Objections. For the first two arguments take the rational mean as being in the very act of reason, while the third argues from the mean of justice.

Whether the intellectual virtues observe the mean?

Ia IIae q. 64 a. 3

Objection 1. It would seem that the intellectual virtues do not observe the mean. Because moral virtue observes the mean by conforming to the rule of reason. But the intellectual virtues are in reason itself, so that they seem to have no higher rule. Therefore the intellectual virtues do not observe the mean.

Objection 2. Further, the mean of moral virtue is fixed by an intellectual virtue: for it is stated in *Ethic. ii, 6*, that “virtue observes the mean appointed by reason, as a prudent man would appoint it.” If therefore intellectual virtue also observe the mean, this mean will have to be appointed for them by another virtue, so that there would be an indefinite series of virtues.

Objection 3. Further, a mean is, properly speaking, between contraries, as the Philosopher explains (*Metaph. x, text. 22,23*). But there seems to be no contrariety in the intellect; since contraries themselves, as they are in the intellect, are not in opposition to one another, but are understood together, as white and black, healthy and sick. Therefore there is no mean in the intellectual virtues.

On the contrary, Art is an intellectual virtue; and yet there is a mean in art (*Ethic. ii, 6*). Therefore also

intellectual virtue observes the mean.

I answer that, The good of anything consists in its observing the mean, by conforming with a rule or measure in respect of which it may happen to be excessive or deficient, as stated above (a. 1). Now intellectual virtue, like moral virtue, is directed to the good, as stated above (q. 56, a. 3). Hence the good of an intellectual virtue consists in observing the mean, in so far as it is subject to a measure. Now the good of intellectual virtue is the true; in the case of contemplative virtue, it is the true taken absolutely (*Ethic. vi, 2*); in the case of practical virtue, it is the true in conformity with a right appetite.

Now truth apprehended by our intellect, if we consider it absolutely, is measured by things; since things are the measure of our intellect, as stated in *Metaph. x, text. 5*; because there is truth in what we think or say, according as the thing is so or not. Accordingly the good of speculative intellectual virtue consists in a certain mean, by way of conformity with things themselves, in so far as the intellect expresses them as being what they are, or as not being what they are not: and it is in this that the nature of truth consists. There will be excess if something false is affirmed, as though some-

thing were, which in reality it is not: and there will be deficiency if something is falsely denied, and declared not to be, whereas in reality it is.

The truth of practical intellectual virtue, if we consider it in relation to things, is by way of that which is measured; so that both in practical and in speculative intellectual virtues, the mean consists in conformity with things. But if we consider it in relation to the appetite, it has the character of a rule and measure. Consequently the rectitude of reason is the mean of moral virtue, and also the mean of prudence—of prudence as ruling and measuring, of moral virtue, as ruled and measured by that mean. In like manner the difference between excess and deficiency is to be applied in both cases.

Reply to Objection 1. Intellectual virtues also have their measure, as stated, and they observe the mean according as they conform to that measure.

Reply to Objection 2. There is no need for an indefinite series of virtues: because the measure and rule

of intellectual virtue is not another kind of virtue, but things themselves.

Reply to Objection 3. The things themselves that are contrary have no contrariety in the mind, because one is the reason for knowing the other: nevertheless there is in the intellect contrariety of affirmation and negation, which are contraries, as stated at the end of *Peri Hermenias*. For though “to be” and “not to be” are not in contrary, but in contradictory opposition to one another, so long as we consider their signification in things themselves, for on the one hand we have “being” and on the other we have simply “non-being”; yet if we refer them to the act of the mind, there is something positive in both cases. Hence “to be” and “not to be” are contradictory: but the opinion stating that “good is good” is contrary to the opinion stating that “good is not good”: and between two such contraries intellectual virtue observes the mean.

Whether the theological virtues observe the mean?

Ia IIae q. 64 a. 4

Objection 1. It would seem that theological virtue observes the mean. For the good of other virtues consists in their observing the mean. Now the theological virtues surpass the others in goodness. Therefore much more does theological virtue observe the mean.

Objection 2. Further, the mean of moral virtue depends on the appetite being ruled by reason; while the mean of intellectual virtue consists in the intellect being measured by things. Now theological virtue perfects both intellect and appetite, as stated above (q. 62, a. 3). Therefore theological virtue also observes the mean.

Objection 3. Further, hope, which is a theological virtue, is a mean between despair and presumption. Likewise faith holds a middle course between contrary heresies, as Boethius states (*De Duab. Natur. vii*): thus, by confessing one Person and two natures in Christ, we observe the mean between the heresy of Nestorius, who maintained the existence of two persons and two natures, and the heresy of Eutyches, who held to one person and one nature. Therefore theological virtue observes the mean.

On the contrary, Wherever virtue observes the mean it is possible to sin by excess as well as by deficiency. But there is no sinning by excess against God, Who is the object of theological virtue: for it is written (*Ecclus. 43:33*): “Blessing the Lord, exalt Him as much as you can: for He is above all praise.” Therefore theological virtue does not observe the mean.

I answer that, As stated above (a. 1), the mean of virtue depends on conformity with virtue’s rule or measure, in so far as one may exceed or fall short of that rule. Now the measure of theological virtue may be twofold. One is taken from the very nature of virtue, and thus the measure and rule of theological virtue is God Himself: because our faith is ruled according to

Divine truth; charity, according to His goodness; hope, according to the immensity of His omnipotence and loving kindness. This measure surpasses all human power: so that never can we love God as much as He ought to be loved, nor believe and hope in Him as much as we should. Much less therefore can there be excess in such things. Accordingly the good of such virtues does not consist in a mean, but increases the more we approach to the summit.

The other rule or measure of theological virtue is by comparison with us: for although we cannot be borne towards God as much as we ought, yet we should approach to Him by believing, hoping and loving, according to the measure of our condition. Consequently it is possible to find a mean and extremes in theological virtue, accidentally and in reference to us.

Reply to Objection 1. The good of intellectual and moral virtues consists in a mean of reason by conformity with a measure that may be exceeded: whereas this is not so in the case of theological virtue, considered in itself, as stated above.

Reply to Objection 2. Moral and intellectual virtues perfect our intellect and appetite in relation to a created measure and rule; whereas the theological virtues perfect them in relation to an uncreated rule and measure. Wherefore the comparison fails.

Reply to Objection 3. Hope observes the mean between presumption and despair, in relation to us, in so far, to wit, as a man is said to be presumptuous, through hoping to receive from God a good in excess of his condition; or to despair through failing to hope for that which according to his condition he might hope for. But there can be no excess of hope in comparison with God, Whose goodness is infinite. In like manner faith holds a middle course between contrary heresies, not by com-

parison with its object, which is God, in Whom we cannot believe too much; but in so far as human opinion itself takes a middle position between contrary opinions, as was explained above.

Objection 1. It would seem that moral virtue does not observe the mean. For the nature of a mean is incompatible with that which is extreme. Now the nature of virtue is to be something extreme; for it is stated in *De Coelo* i that “virtue is the limit of power.” Therefore moral virtue does not observe the mean.

Objection 2. Further, the maximum is not a mean. Now some moral virtues tend to a maximum: for instance, magnanimity to very great honors, and magnificence to very large expenditure, as stated in *Ethic.* iv, 2,3. Therefore not every moral virtue observes the mean.

Objection 3. Further, if it is essential to a moral virtue to observe the mean, it follows that a moral virtue is not perfected, but the contrary corrupted, through tending to something extreme. Now some moral virtues are perfected by tending to something extreme; thus virginity, which abstains from all sexual pleasure, observes the extreme, and is the most perfect chastity: and to give all to the poor is the most perfect mercy or liberality. Therefore it seems that it is not essential to moral virtue that it should observe the mean.

On the contrary, The Philosopher says (*Ethic.* ii, 6) that “moral virtue is a habit of choosing the mean.”

I answer that, As already explained (q. 55, a. 3), the nature of virtue is that it should direct man to good. Now moral virtue is properly a perfection of the appetitive part of the soul in regard to some determinate matter: and the measure or rule of the appetitive movement in respect of appetible objects is the reason. But the good of that which is measured or ruled consists in its conformity with its rule: thus the good things made by art is that they follow the rule of art. Consequently, in things of this sort, evil consists in discordance from their rule or measure. Now this may happen either by their exceeding the measure or by their falling short of it; as is clearly the case in all things ruled or measured. Hence it is evident that the good of moral virtue consists in conformity with the rule of reason. Now it is clear that between excess and deficiency the mean is equality or conformity. Therefore it is evident that moral virtue observes the mean.

Reply to Objection 1. Moral virtue derives goodness from the rule of reason, while its matter consists in

passions or operations. If therefore we compare moral virtue to reason, then, if we look at that which is has of reason, it holds the position of one extreme, viz. conformity; while excess and defect take the position of the other extreme, viz. deformity. But if we consider moral virtue in respect of its matter, then it holds the position of mean, in so far as it makes the passion conform to the rule of reason. Hence the Philosopher says (*Ethic.* ii, 6) that “virtue, as to its essence, is a mean state,” in so far as the rule of virtue is imposed on its proper matter: “but it is an extreme in reference to the ‘best’ and the ‘excellent,’ ” viz. as to its conformity with reason.

Reply to Objection 2. In actions and passions the mean and the extremes depend on various circumstances: hence nothing hinders something from being extreme in a particular virtue as to one circumstance, while the same thing is a mean in respect of other circumstances, through being in conformity with reason. This is the case with magnanimity and magnificence. For if we look at the absolute quantity of the respective objects of these virtues, we shall call it an extreme and a maximum: but if we consider the quantity in relation to other circumstances, then it has the character of a mean: since these virtues tend to this maximum in accordance with the rule of reason, i.e. “where” it is right, “when” it is right, and for an “end” that is right. There will be excess, if one tends to this maximum “when” it is not right, or “where” it is not right, or for an undue “end”; and there will be deficiency if one fails to tend thereto “where” one ought, and “when” one ought. This agrees with the saying of the Philosopher (*Ethic.* iv, 3) that the “magnanimous man observes the extreme in quantity, but the mean in the right mode of his action.”

Reply to Objection 3. The same is to be said of virginity and poverty as of magnanimity. For virginity abstains from all sexual matters, and poverty from all wealth, for a right end, and in a right manner, i.e. according to God’s word, and for the sake of eternal life. But if this be done in an undue manner, i.e. out of unlawful superstition, or again for vainglory, it will be in excess. And if it be not done when it ought to be done, or as it ought to be done, it is a vice by deficiency: for instance, in those who break their vows of virginity or poverty.

Objection 1. It would seem that the mean of moral virtue is not the rational mean, but the real mean. For the good of moral virtue consists in its observing the mean. Now, good, as stated in *Metaph.* ii, text. 8, is in things themselves. Therefore the mean of moral virtue is a real mean.

Objection 2. Further, the reason is a power of apprehension. But moral virtue does not observe a mean between apprehensions, but rather a mean between operations or passions. Therefore the mean of moral virtue is not the rational, but the real mean.

Objection 3. Further, a mean that is observed according to arithmetical or geometrical proportion is a real mean. Now such is the mean of justice, as stated in *Ethic.* v, 3. Therefore the mean of moral virtue is not the rational, but the real mean.

On the contrary, The Philosopher says (*Ethic.* ii, 6) that “moral virtue observes the mean fixed, in our regard, by reason.”

I answer that, The rational mean can be understood in two ways. First, according as the mean is observed in the act itself of reason, as though the very act of reason were made to observe the mean: in this sense, since moral virtue perfects not the act of reason, but the act of the appetitive power, the mean of moral virtue is not the rational mean. Secondly, the mean of reason may be

considered as that which the reason puts into some particular matter. In this sense every mean of moral virtue is a rational mean, since, as above stated (a. 1), moral virtue is said to observe the mean, through conformity with right reason.

But it happens sometimes that the rational mean is also the real mean: in which case the mean of moral virtue is the real mean, for instance, in justice. On the other hand, sometimes the rational mean is not the real mean, but is considered in relation to us: and such is the mean in all the other moral virtues. The reason for this is that justice is about operations, which deal with external things, wherein the right has to be established simply and absolutely, as stated above (q. 60, a. 2): wherefore the rational mean in justice is the same as the real mean, in so far, to wit as justice gives to each one his due, neither more nor less. But the other moral virtues deal with interior passions wherein the right cannot be established in the same way, since men are variously situated in relation to their passions; hence the rectitude of reason has to be established in the passions, with due regard to us, who are moved in respect of the passions.

This suffices for the Replies to the Objections. For the first two arguments take the rational mean as being in the very act of reason, while the third argues from the mean of justice.

Objection 1. It would seem that the intellectual virtues do not observe the mean. Because moral virtue observes the mean by conforming to the rule of reason. But the intellectual virtues are in reason itself, so that they seem to have no higher rule. Therefore the intellectual virtues do not observe the mean.

Objection 2. Further, the mean of moral virtue is fixed by an intellectual virtue: for it is stated in *Ethic.* ii, 6, that “virtue observes the mean appointed by reason, as a prudent man would appoint it.” If therefore intellectual virtue also observe the mean, this mean will have to be appointed for them by another virtue, so that there would be an indefinite series of virtues.

Objection 3. Further, a mean is, properly speaking, between contraries, as the Philosopher explains (*Metaph.* x, text. 22,23). But there seems to be no contrariety in the intellect; since contraries themselves, as they are in the intellect, are not in opposition to one another, but are understood together, as white and black, healthy and sick. Therefore there is no mean in the intellectual virtues.

On the contrary, Art is an intellectual virtue; and yet there is a mean in art (*Ethic.* ii, 6). Therefore also intellectual virtue observes the mean.

I answer that, The good of anything consists in its observing the mean, by conforming with a rule or measure in respect of which it may happen to be excessive or deficient, as stated above (a. 1). Now intellectual virtue, like moral virtue, is directed to the good, as stated above (q. 56, a. 3). Hence the good of an intellectual virtue consists in observing the mean, in so far as it is subject to a measure. Now the good of intellectual virtue is the true; in the case of contemplative virtue, it is the true taken absolutely (*Ethic.* vi, 2); in the case of practical virtue, it is the true in conformity with a right appetite.

Now truth apprehended by our intellect, if we consider it absolutely, is measured by things; since things are the measure of our intellect, as stated in *Metaph.* x, text. 5; because there is truth in what we think or say, according as the thing is so or not. Accordingly the good of speculative intellectual virtue consists in a certain mean, by way of conformity with things them-

selves, in so far as the intellect expresses them as being what they are, or as not being what they are not: and it is in this that the nature of truth consists. There will be excess if something false is affirmed, as though something were, which in reality it is not: and there will be deficiency if something is falsely denied, and declared not to be, whereas in reality it is.

The truth of practical intellectual virtue, if we consider it in relation to things, is by way of that which is measured; so that both in practical and in speculative intellectual virtues, the mean consists in conformity with things. But if we consider it in relation to the appetite, it has the character of a rule and measure. Consequently the rectitude of reason is the mean of moral virtue, and also the mean of prudence—of prudence as ruling and measuring, of moral virtue, as ruled and measured by that mean. In like manner the difference between excess and deficiency is to be applied in both cases.

Reply to Objection 1. Intellectual virtues also have their measure, as stated, and they observe the mean according as they conform to that measure.

Reply to Objection 2. There is no need for an indefinite series of virtues: because the measure and rule of intellectual virtue is not another kind of virtue, but things themselves.

Reply to Objection 3. The things themselves that are contrary have no contrariety in the mind, because one is the reason for knowing the other: nevertheless there is in the intellect contrariety of affirmation and negation, which are contraries, as stated at the end of *Peri Hermenias*. For though “to be” and “not to be” are not in contrary, but in contradictory opposition to one another, so long as we consider their signification in things themselves, for on the one hand we have “being” and on the other we have simply “non-being”; yet if we refer them to the act of the mind, there is something positive in both cases. Hence “to be” and “not to be” are contradictory: but the opinion stating that “good is good” is contrary to the opinion stating that “good is not good”: and between two such contraries intellectual virtue observes the mean.

Objection 1. It would seem that theological virtue observes the mean. For the good of other virtues consists in their observing the mean. Now the theological virtues surpass the others in goodness. Therefore much more does theological virtue observe the mean.

Objection 2. Further, the mean of moral virtue depends on the appetite being ruled by reason; while the mean of intellectual virtue consists in the intellect being measured by things. Now theological virtue perfects both intellect and appetite, as stated above (q. 62, a. 3). Therefore theological virtue also observes the mean.

Objection 3. Further, hope, which is a theological virtue, is a mean between despair and presumption. Likewise faith holds a middle course between contrary heresies, as Boethius states (*De Duab. Natur.* vii): thus, by confessing one Person and two natures in Christ, we observe the mean between the heresy of Nestorius, who maintained the existence of two persons and two natures, and the heresy of Eutyches, who held to one person and one nature. Therefore theological virtue observes the mean.

On the contrary, Wherever virtue observes the mean it is possible to sin by excess as well as by deficiency. But there is no sinning by excess against God, Who is the object of theological virtue: for it is written (*Ecclus.* 43:33): “Blessing the Lord, exalt Him as much as you can: for He is above all praise.” Therefore theological virtue does not observe the mean.

I answer that, As stated above (a. 1), the mean of virtue depends on conformity with virtue’s rule or measure, in so far as one may exceed or fall short of that rule. Now the measure of theological virtue may be twofold. One is taken from the very nature of virtue, and thus the measure and rule of theological virtue is God Himself: because our faith is ruled according to Divine truth; charity, according to His goodness; hope, according to the immensity of His omnipotence and lov-

ing kindness. This measure surpasses all human power: so that never can we love God as much as He ought to be loved, nor believe and hope in Him as much as we should. Much less therefore can there be excess in such things. Accordingly the good of such virtues does not consist in a mean, but increases the more we approach to the summit.

The other rule or measure of theological virtue is by comparison with us: for although we cannot be borne towards God as much as we ought, yet we should approach to Him by believing, hoping and loving, according to the measure of our condition. Consequently it is possible to find a mean and extremes in theological virtue, accidentally and in reference to us.

Reply to Objection 1. The good of intellectual and moral virtues consists in a mean of reason by conformity with a measure that may be exceeded: whereas this is not so in the case of theological virtue, considered in itself, as stated above.

Reply to Objection 2. Moral and intellectual virtues perfect our intellect and appetite in relation to a created measure and rule; whereas the theological virtues perfect them in relation to an uncreated rule and measure. Wherefore the comparison fails.

Reply to Objection 3. Hope observes the mean between presumption and despair, in relation to us, in so far, to wit, as a man is said to be presumptuous, through hoping to receive from God a good in excess of his condition; or to despair through failing to hope for that which according to his condition he might hope for. But there can be no excess of hope in comparison with God, Whose goodness is infinite. In like manner faith holds a middle course between contrary heresies, not by comparison with its object, which is God, in Whom we cannot believe too much; but in so far as human opinion itself takes a middle position between contrary opinions, as was explained above.

FIRST PART OF THE SECOND PART, QUESTION 65

Of the Connection of Virtues (In Five Articles)

We must now consider the connection of virtues: under which head there are five points of inquiry:

- (1) Whether the moral virtues are connected with one another?
- (2) Whether the moral virtues can be without charity?
- (3) Whether charity can be without them?
- (4) Whether faith and hope can be without charity?
- (5) Whether charity can be without them?

Whether the moral virtues are connected with one another?

Ia IIae q. 65 a. 1

Objection 1. It would seem that the moral virtues are not connected with one another. Because moral virtues are sometimes caused by the exercise of acts, as is proved in *Ethic. ii, 1,2*. But man can exercise himself in the acts of one virtue, without exercising himself in the acts of some other virtue. Therefore it is possible to have one moral virtue without another.

Objection 2. Further, magnificence and magnanimity are moral virtues. Now a man may have other moral virtues without having magnificence or magnanimity: for the Philosopher says (*Ethic. iv, 2,3*) that “a poor man cannot be magnificent,” and yet he may have other virtues; and (*Ethic. iv*) that “he who is worthy of small things, and so accounts his worth, is modest, but not magnanimous.” Therefore the moral virtues are not connected with one another.

Objection 3. Further, as the moral virtues perfect the appetitive part of the soul, so do the intellectual virtues perfect the intellective part. But the intellectual virtues are not mutually connected: since we may have one science, without having another. Neither, therefore, are the moral virtues connected with one another.

Objection 4. Further, if the moral virtues are mutually connected, this can only be because they are united together in prudence. But this does not suffice to connect the moral virtues together. For, seemingly, one may be prudent about things to be done in relation to one virtue, without being prudent in those that concern another virtue: even as one may have the art of making certain things, without the art of making certain others. Now prudence is right reason about things to be done. Therefore the moral virtues are not necessarily connected with one another.

On the contrary, Ambrose says on *Lk. 6:20*: “The virtues are connected and linked together, so that whoever has one, is seen to have several”: and Augustine says (*De Trin. vi, 4*) that “the virtues that reside in the human mind are quite inseparable from one another”: and Gregory says (*Moral. xxii, 1*) that “one virtue without the other is either of no account whatever, or very imperfect”: and Cicero says (*Quaest. Tusc. ii*): “If you confess to not having one particular virtue, it must needs be that you have none at all.”

I answer that, Moral virtue may be considered either as perfect or as imperfect. An imperfect moral virtue, temperance for instance, or fortitude, is nothing but an inclination in us to do some kind of good deed, whether such inclination be in us by nature or by habituation. If we take the moral virtues in this way, they are not connected: since we find men who, by natural temperament or by being accustomed, are prompt in doing deeds of liberality, but are not prompt in doing deeds of chastity.

But the perfect moral virtue is a habit that inclines us to do a good deed well; and if we take moral virtues in this way, we must say that they are connected, as nearly as all are agreed in saying. For this two reasons are given, corresponding to the different ways of assigning the distinction of the cardinal virtues. For, as we stated above (q. 61, Aa. 3,4), some distinguish them according to certain general properties of the virtues: for instance, by saying that discretion belongs to prudence, rectitude to justice, moderation to temperance, and strength of mind to fortitude, in whatever matter we consider these properties to be. In this way the reason for the connection is evident: for strength of mind is not commended as virtuous, if it be without moderation or rectitude or discretion: and so forth. This, too, is the reason assigned for the connection by Gregory, who says (*Moral. xxii, 1*) that “a virtue cannot be perfect” as a virtue, “if isolated from the others: for there can be no true prudence without temperance, justice and fortitude”: and he continues to speak in like manner of the other virtues (cf. q. 61, a. 4, obj. 1). Augustine also gives the same reason (*De Trin. vi, 4*).

Others, however, differentiate these virtues in respect of their matters, and it is in this way that Aristotle assigns the reason for their connection (*Ethic. vi, 13*). Because, as stated above (q. 58, a. 4), no moral virtue can be without prudence; since it is proper to moral virtue to make a right choice, for it is an elective habit. Now right choice requires not only the inclination to a due end, which inclination is the direct outcome of moral virtue, but also correct choice of things conducive to the end, which choice is made by prudence, that counsels, judges, and commands in those

things that are directed to the end. In like manner one cannot have prudence unless one has the moral virtues: since prudence is “right reason about things to be done,” and the starting point of reason is the end of the thing to be done, to which end man is rightly disposed by moral virtue. Hence, just as we cannot have speculative science unless we have the understanding of the principles, so neither can we have prudence without the moral virtues: and from this it follows clearly that the moral virtues are connected with one another.

Reply to Objection 1. Some moral virtues perfect man as regards his general state, in other words, with regard to those things which have to be done in every kind of human life. Hence man needs to exercise himself at the same time in the matters of all moral virtues. And if he exercise himself, by good deeds, in all such matters, he will acquire the habits of all the moral virtues. But if he exercise himself by good deeds in regard to one matter, but not in regard to another, for instance, by behaving well in matters of anger, but not in matters of concupiscence; he will indeed acquire a certain habit of restraining his anger; but this habit will lack the nature of virtue, through the absence of prudence, which is wanting in matters of concupiscence. In the same way, natural inclinations fail to have the complete character of virtue, if prudence be lacking.

But there are some moral virtues which perfect man with regard to some eminent state, such as magnificence and magnanimity; and since it does not happen to all in common to be exercised in the matter of such virtues, it is possible for a man to have the other moral virtues, without actually having the habits of these virtues—provided we speak of acquired virtue. Nevertheless, when once a man has acquired those other virtues he possesses these in proximate potentiality. Because when, by practice, a man has acquired liberality in small gifts and expenditure, if he were to come in for a large sum of money, he would acquire the habit of magnificence with but little practice: even as a geometer, by dint of little study, acquires scientific knowledge about some conclusion which had never been presented to his mind before. Now we speak of having a thing when we are on the point of having it, according

to the saying of the Philosopher (Phys. ii, text. 56): “That which is scarcely lacking is not lacking at all.”

This suffices for the Reply to the Second Objection.

Reply to Objection 3. The intellectual virtues are about divers matters having no relation to one another, as is clearly the case with the various sciences and arts. Hence we do not observe in them the connection that is to be found among the moral virtues, which are about passions and operations, that are clearly related to one another. For all the passions have their rise in certain initial passions, viz. love and hatred, and terminate in certain others, viz. pleasure and sorrow. In like manner all the operations that are the matter of moral virtue are related to one another, and to the passions. Hence the whole matter of moral virtues falls under the one rule of prudence.

Nevertheless, all intelligible things are related to first principles. And in this way, all the intellectual virtues depend on the understanding of principles; even as prudence depends on the moral virtues, as stated. On the other hand, the universal principles which are the object of the virtue of understanding of principles, do not depend on the conclusions, which are the objects of the other intellectual virtues, as do the moral virtues depend on prudence, because the appetite, in a fashion, moves the reason, and the reason the appetite, as stated above (q. 9, a. 1; q. 58, a. 5, ad 1).

Reply to Objection 4. Those things to which the moral virtues incline, are as the principles of prudence: whereas the products of art are not the principles, but the matter of art. Now it is evident that, though reason may be right in one part of the matter, and not in another, yet in no way can it be called right reason, if it be deficient in any principle whatever. Thus, if a man be wrong about the principle, “A whole is greater than its part,” he cannot acquire the science of geometry, because he must necessarily wander from the truth in his conclusion. Moreover, things “done” are related to one another, but not things “made,” as stated above (ad 3). Consequently the lack of prudence in one department of things to be done, would result in a deficiency affecting other things to be done: whereas this does not occur in things to be made.

Whether moral virtues can be without charity?

Ia IIae q. 65 a. 2

Objection 1. It would seem that moral virtues can be without charity. For it is stated in the Liber Sentent. Prosperi vii, that “every virtue save charity may be common to the good and bad.” But “charity can be in none except the good,” as stated in the same book. Therefore the other virtues can be had without charity.

Objection 2. Further, moral virtues can be acquired by means of human acts, as stated in Ethic. ii, 1,2, whereas charity cannot be had otherwise than by infusion, according to Rom. 5:5: “The charity of God is poured forth in our hearts by the Holy Ghost Who is

given to us.” Therefore it is possible to have the other virtues without charity.

Objection 3. Further, the moral virtues are connected together, through depending on prudence. But charity does not depend on prudence; indeed, it surpasses prudence, according to Eph. 3:19: “The charity of Christ, which surpasseth all knowledge.” Therefore the moral virtues are not connected with charity, and can be without it.

On the contrary, It is written (1 Jn. 3:14): “He that loveth not, abideth in death.” Now the spiritual life is

perfected by the virtues, since it is “by them” that “we lead a good life,” as Augustine states (*De Lib. Arb.* ii, 17,19). Therefore they cannot be without the love of charity.

I answer that, As stated above (q. 63, a. 2), it is possible by means of human works to acquire moral virtues, in so far as they produce good works that are directed to an end not surpassing the natural power of man: and when they are acquired thus, they can be without charity, even as they were in many of the Gentiles. But in so far as they produce good works in proportion to a supernatural last end, thus they have the character of virtue, truly and perfectly; and cannot be acquired by human acts, but are infused by God. Such like moral virtues cannot be without charity. For it has been stated above (a. 1; q. 58, Aa. 4,5) that the other moral virtues cannot be without prudence; and that prudence cannot be without the moral virtues, because these latter make man well disposed to certain ends, which are the starting-point of the procedure of prudence. Now for prudence to proceed aright, it is much more necessary that man be well disposed towards his ultimate end, which is the effect of charity, than that he be well disposed in respect of other ends, which is the effect of moral virtue: just as in speculative matters right reason has greatest need of the first indemonstrable prin-

ciple, that “contradictories cannot both be true at the same time.” It is therefore evident that neither can infused prudence be without charity; nor, consequently, the other moral virtues, since they cannot be without prudence.

It is therefore clear from what has been said that only the infused virtues are perfect, and deserve to be called virtues simply: since they direct man well to the ultimate end. But the other virtues, those, namely, that are acquired, are virtues in a restricted sense, but not simply: for they direct man well in respect of the last end in some particular genus of action, but not in respect of the last end simply. Hence a gloss of Augustine* on the words, “All that is not of faith is sin” (*Rom.* 14:23), says: “He that fails to acknowledge the truth, has no true virtue, even if his conduct be good.”

Reply to Objection 1. Virtue, in the words quoted, denotes imperfect virtue. Else if we take moral virtue in its perfect state, “it makes its possessor good,” and consequently cannot be in the wicked.

Reply to Objection 2. This argument holds good of virtue in the sense of acquired virtue.

Reply to Objection 3. Though charity surpasses science and prudence, yet prudence depends on charity, as stated: and consequently so do all the infused moral virtues.

Whether charity can be without moral virtue?

Ia IIae q. 65 a. 3

Objection 1. It would seem possible to have charity without the moral virtues. For when one thing suffices for a certain purpose, it is superfluous to employ others. Now charity alone suffices for the fulfilment of all the works of virtue, as is clear from *1 Cor.* 13:4, seqq.: “Charity is patient, is kind,” etc. Therefore it seems that if one has charity, other virtues are superfluous.

Objection 2. Further, he that has a habit of virtue easily performs the works of that virtue, and those works are pleasing to him for their own sake: hence “pleasure taken in a work is a sign of habit” (*Ethic.* ii, 3). Now many have charity, being free from mortal sin, and yet they find it difficult to do works of virtue; nor are these works pleasing to them for their own sake, but only for the sake of charity. Therefore many have charity without the other virtues.

Objection 3. Further, charity is to be found in every saint: and yet there are some saints who are without certain virtues. For Bede says (on *Lk.* 17:10) that the saints are more humbled on account of their not having certain virtues, than rejoiced at the virtues they have. Therefore, if a man has charity, it does not follow of necessity that he has all the moral virtues.

On the contrary, The whole Law is fulfilled through charity, for it is written (*Rom.* 13:8): “He that loveth his neighbor, hath fulfilled the Law.” Now it is not possible to fulfil the whole Law, without having all

the moral virtues: since the law contains precepts about all acts of virtue, as stated in *Ethic.* v, 1,2. Therefore he that has charity, has all the moral virtues. Moreover, Augustine says in a letter (*Epis.* clxvii)[†] that charity contains all the cardinal virtues.

I answer that, All the moral virtues are infused together with charity. The reason for this is that God operates no less perfectly in works of grace than in works of nature. Now, in the works of nature, we find that whenever a thing contains a principle of certain works, it has also whatever is necessary for their execution: thus animals are provided with organs whereby to perform the actions that their souls empower them to do. Now it is evident that charity, inasmuch as it directs man to his last end, is the principle of all the good works that are referable to his last end. Wherefore all the moral virtues must needs be infused together with charity, since it is through them that man performs each different kind of good work.

It is therefore clear that the infused moral virtues are connected, not only through prudence, but also on account of charity: and, again, that whoever loses charity through mortal sin, forfeits all the infused moral virtues.

Reply to Objection 1. In order that the act of a lower power be perfect, not only must there be perfection in the higher, but also in the lower power: for if the principal agent were well disposed, perfect action

* Cf. *Lib. Sentent. Prosperi* cvi. † Cf. *Serm.* xxxix and xlvi de Temp.

would not follow, if the instrument also were not well disposed. Consequently, in order that man work well in things referred to the end, he needs not only a virtue disposing him well to the end, but also those virtues which dispose him well to whatever is referred to the end: for the virtue which regards the end is the chief and moving principle in respect of those things that are referred to the end. Therefore it is necessary to have the moral virtues together with charity.

Reply to Objection 2. It happens sometimes that a man who has a habit, finds it difficult to act in accordance with the habit, and consequently feels no pleasure and complacency in the act, on account of some

impediment supervening from without: thus a man who has a habit of science, finds it difficult to understand, through being sleepy or unwell. In like manner sometimes the habits of moral virtue experience difficulty in their works, by reason of certain ordinary dispositions remaining from previous acts. This difficulty does not occur in respect of acquired moral virtue: because the repeated acts by which they are acquired, remove also the contrary dispositions.

Reply to Objection 3. Certain saints are said not to have certain virtues, in so far as they experience difficulty in the acts of those virtues, for the reason stated; although they have the habits of all the virtues.

Whether faith and hope can be without charity?

Ia IIae q. 65 a. 4

Objection 1. It would seem that faith and hope are never without charity. Because, since they are theological virtues, they seem to be more excellent than even the infused moral virtues. But the infused moral virtues cannot be without charity. Neither therefore can faith and hope be without charity.

Objection 2. Further, “no man believes unwillingly” as Augustine says (Tract. xxvi in Joan.). But charity is in the will as a perfection thereof, as stated above (q. 62, a. 3). Therefore faith cannot be without charity.

Objection 3. Further, Augustine says (Enchiridion viii) that “there can be no hope without love.” But love is charity: for it is of this love that he speaks. Therefore hope cannot be without charity.

On the contrary, A gloss on Mat. 1:2 says that “faith begets hope, and hope, charity.” Now the begetter precedes the begotten, and can be without it. Therefore faith can be without hope; and hope, without charity.

I answer that, Faith and hope, like the moral virtues, can be considered in two ways; first in an inchoate state; secondly, as complete virtues. For since virtue is directed to the doing of good works, perfect virtue is that which gives the faculty of doing a perfectly good work, and this consists in not only doing what is good, but also in doing it well. Else, if what is done is good, but not well done, it will not be perfectly good; wherefore neither will the habit that is the principle of such an act, have the perfect character of virtue. For instance, if a man do what is just, what he does is good: but it will not be the work of a perfect virtue unless he do it well, i.e. by choosing rightly, which is the result of prudence; for which reason justice cannot be a perfect virtue without prudence.

Accordingly faith and hope can exist indeed in a fashion without charity: but they have not the perfect

character of virtue without charity. For, since the act of faith is to believe in God; and since to believe is to assent to someone of one’s own free will: to will not as one ought, will not be a perfect act of faith. To will as one ought is the outcome of charity which perfects the will: since every right movement of the will proceeds from a right love, as Augustine says (De Civ. Dei xiv, 9). Hence faith may be without charity, but not as a perfect virtue: just as temperance and fortitude can be without prudence. The same applies to hope. Because the act of hope consists in looking to God for future bliss. This act is perfect, if it is based on the merits which we have; and this cannot be without charity. But to expect future bliss through merits which one has not yet, but which one proposes to acquire at some future time, will be an imperfect act; and this is possible without charity. Consequently, faith and hope can be without charity; yet, without charity, they are not virtues properly so-called; because the nature of virtue requires that by it, we should not only do what is good, but also that we should do it well (Ethic. ii, 6).

Reply to Objection 1. Moral virtue depends on prudence: and not even infused prudence has the character of prudence without charity; for this involves the absence of due order to the first principle, viz. the ultimate end. On the other hand faith and hope, as such, do not depend either on prudence or charity; so that they can be without charity, although they are not virtues without charity, as stated.

Reply to Objection 2. This argument is true of faith considered as a perfect virtue.

Reply to Objection 3. Augustine is speaking here of that hope whereby we look to gain future bliss through merits which we have already; and this is not without charity.

Objection 1. It would seem that charity can be without faith and hope. For charity is the love of God. But it is possible for us to love God naturally, without already having faith, or hope in future bliss. Therefore charity can be without faith and hope.

Objection 2. Further, charity is the root of all the virtues, according to Eph. 3:17: "Rooted and founded in charity." Now the root is sometimes without branches. Therefore charity can sometimes be without faith and hope, and the other virtues.

Objection 3. Further, there was perfect charity in Christ. And yet He had neither faith nor hope: because He was a perfect comprehensor, as we shall explain further on (IIIa, q. 7, Aa. 3,4). Therefore charity can be without faith and hope.

On the contrary, The Apostle says (Heb. 11:6): "Without faith it is impossible to please God"; and this evidently belongs most to charity, according to Prov. 8:17: "I love them that love me." Again, it is by hope that we are brought to charity, as stated above (q. 62, a. 4). Therefore it is not possible to have charity without faith and hope.

I answer that, Charity signifies not only the love of God, but also a certain friendship with Him; which implies, besides love, a certain mutual return of love, together with mutual communion, as stated in Ethic. viii, 2. That this belongs to charity is evident from 1 Jn. 4:16: "He that abideth in charity, abideth in God, and

God in him," and from 1 Cor. 1:9, where it is written: "God is faithful, by Whom you are called unto the fellowship of His Son." Now this fellowship of man with God, which consists in a certain familiar colloquy with Him, is begun here, in this life, by grace, but will be perfected in the future life, by glory; each of which things we hold by faith and hope. Wherefore just as friendship with a person would be impossible, if one disbelieved in, or despaired of, the possibility of their fellowship or familiar colloquy; so too, friendship with God, which is charity, is impossible without faith, so as to believe in this fellowship and colloquy with God, and to hope to attain to this fellowship. Therefore charity is quite impossible without faith and hope.

Reply to Objection 1. Charity is not any kind of love of God, but that love of God, by which He is loved as the object of bliss, to which object we are directed by faith and hope.

Reply to Objection 2. Charity is the root of faith and hope, in so far as it gives them the perfection of virtue. But faith and hope as such are the precursors of charity, as stated above (q. 62, a. 4), and so charity is impossible without them.

Reply to Objection 3. In Christ there was neither faith nor hope, on account of their implying an imperfection. But instead of faith, He had manifest vision, and instead of hope, full comprehension*: so that in Him was perfect charity.

* See above, q. 4, a. 3

Objection 1. It would seem that the moral virtues are not connected with one another. Because moral virtues are sometimes caused by the exercise of acts, as is proved in *Ethic.* ii, 1,2. But man can exercise himself in the acts of one virtue, without exercising himself in the acts of some other virtue. Therefore it is possible to have one moral virtue without another.

Objection 2. Further, magnificence and magnanimity are moral virtues. Now a man may have other moral virtues without having magnificence or magnanimity: for the Philosopher says (*Ethic.* iv, 2,3) that “a poor man cannot be magnificent,” and yet he may have other virtues; and (*Ethic.* iv) that “he who is worthy of small things, and so accounts his worth, is modest, but not magnanimous.” Therefore the moral virtues are not connected with one another.

Objection 3. Further, as the moral virtues perfect the appetitive part of the soul, so do the intellectual virtues perfect the intellective part. But the intellectual virtues are not mutually connected: since we may have one science, without having another. Neither, therefore, are the moral virtues connected with one another.

Objection 4. Further, if the moral virtues are mutually connected, this can only be because they are united together in prudence. But this does not suffice to connect the moral virtues together. For, seemingly, one may be prudent about things to be done in relation to one virtue, without being prudent in those that concern another virtue: even as one may have the art of making certain things, without the art of making certain others. Now prudence is right reason about things to be done. Therefore the moral virtues are not necessarily connected with one another.

On the contrary, Ambrose says on *Lk.* 6:20: “The virtues are connected and linked together, so that whoever has one, is seen to have several”: and Augustine says (*De Trin.* vi, 4) that “the virtues that reside in the human mind are quite inseparable from one another”: and Gregory says (*Moral.* xxii, 1) that “one virtue without the other is either of no account whatever, or very imperfect”: and Cicero says (*Quaest. Tusc.* ii): “If you confess to not having one particular virtue, it must needs be that you have none at all.”

I answer that, Moral virtue may be considered either as perfect or as imperfect. An imperfect moral virtue, temperance for instance, or fortitude, is nothing but an inclination in us to do some kind of good deed, whether such inclination be in us by nature or by habituation. If we take the moral virtues in this way, they are not connected: since we find men who, by natural temperament or by being accustomed, are prompt in doing deeds of liberality, but are not prompt in doing deeds of chastity.

But the perfect moral virtue is a habit that inclines us to do a good deed well; and if we take moral virtues in this way, we must say that they are connected, as nearly

as all are agreed in saying. For this two reasons are given, corresponding to the different ways of assigning the distinction of the cardinal virtues. For, as we stated above (q. 61, Aa. 3,4), some distinguish them according to certain general properties of the virtues: for instance, by saying that discretion belongs to prudence, rectitude to justice, moderation to temperance, and strength of mind to fortitude, in whatever matter we consider these properties to be. In this way the reason for the connection is evident: for strength of mind is not commended as virtuous, if it be without moderation or rectitude or discretion: and so forth. This, too, is the reason assigned for the connection by Gregory, who says (*Moral.* xxii, 1) that “a virtue cannot be perfect” as a virtue, “if isolated from the others: for there can be no true prudence without temperance, justice and fortitude”: and he continues to speak in like manner of the other virtues (cf. q. 61, a. 4, obj. 1). Augustine also gives the same reason (*De Trin.* vi, 4).

Others, however, differentiate these virtues in respect of their matters, and it is in this way that Aristotle assigns the reason for their connection (*Ethic.* vi, 13). Because, as stated above (q. 58, a. 4), no moral virtue can be without prudence; since it is proper to moral virtue to make a right choice, for it is an elective habit. Now right choice requires not only the inclination to a due end, which inclination is the direct outcome of moral virtue, but also correct choice of things conducive to the end, which choice is made by prudence, that counsels, judges, and commands in those things that are directed to the end. In like manner one cannot have prudence unless one has the moral virtues: since prudence is “right reason about things to be done,” and the starting point of reason is the end of the thing to be done, to which end man is rightly disposed by moral virtue. Hence, just as we cannot have speculative science unless we have the understanding of the principles, so neither can we have prudence without the moral virtues: and from this it follows clearly that the moral virtues are connected with one another.

Reply to Objection 1. Some moral virtues perfect man as regards his general state, in other words, with regard to those things which have to be done in every kind of human life. Hence man needs to exercise himself at the same time in the matters of all moral virtues. And if he exercise himself, by good deeds, in all such matters, he will acquire the habits of all the moral virtues. But if he exercise himself by good deeds in regard to one matter, but not in regard to another, for instance, by behaving well in matters of anger, but not in matters of concupiscence; he will indeed acquire a certain habit of restraining his anger; but this habit will lack the nature of virtue, through the absence of prudence, which is wanting in matters of concupiscence. In the same way, natural inclinations fail to have the complete character of virtue, if prudence be lacking.

But there are some moral virtues which perfect man with regard to some eminent state, such as magnificence and magnanimity; and since it does not happen to all in common to be exercised in the matter of such virtues, it is possible for a man to have the other moral virtues, without actually having the habits of these virtues—provided we speak of acquired virtue. Nevertheless, when once a man has acquired those other virtues he possesses these in proximate potentiality. Because when, by practice, a man has acquired liberality in small gifts and expenditure, if he were to come in for a large sum of money, he would acquire the habit of magnificence with but little practice: even as a geometer, by dint of little study, acquires scientific knowledge about some conclusion which had never been presented to his mind before. Now we speak of having a thing when we are on the point of having it, according to the saying of the Philosopher (*Phys.* ii, text. 56): “That which is scarcely lacking is not lacking at all.”

This suffices for the Reply to the Second Objection.

Reply to Objection 3. The intellectual virtues are about divers matters having no relation to one another, as is clearly the case with the various sciences and arts. Hence we do not observe in them the connection that is to be found among the moral virtues, which are about passions and operations, that are clearly related to one another. For all the passions have their rise in certain initial passions, viz. love and hatred, and terminate in certain others, viz. pleasure and sorrow. In like manner all the operations that are the matter of moral virtue are

related to one another, and to the passions. Hence the whole matter of moral virtues falls under the one rule of prudence.

Nevertheless, all intelligible things are related to first principles. And in this way, all the intellectual virtues depend on the understanding of principles; even as prudence depends on the moral virtues, as stated. On the other hand, the universal principles which are the object of the virtue of understanding of principles, do not depend on the conclusions, which are the objects of the other intellectual virtues, as do the moral virtues depend on prudence, because the appetite, in a fashion, moves the reason, and the reason the appetite, as stated above (q. 9, a. 1; q. 58, a. 5, ad 1).

Reply to Objection 4. Those things to which the moral virtues incline, are as the principles of prudence: whereas the products of art are not the principles, but the matter of art. Now it is evident that, though reason may be right in one part of the matter, and not in another, yet in no way can it be called right reason, if it be deficient in any principle whatever. Thus, if a man be wrong about the principle, “A whole is greater than its part,” he cannot acquire the science of geometry, because he must necessarily wander from the truth in his conclusion. Moreover, things “done” are related to one another, but not things “made,” as stated above (ad 3). Consequently the lack of prudence in one department of things to be done, would result in a deficiency affecting other things to be done: whereas this does not occur in things to be made.

Objection 1. It would seem that moral virtues can be without charity. For it is stated in the *Liber Sentent. Prosperi vii*, that “every virtue save charity may be common to the good and bad.” But “charity can be in none except the good,” as stated in the same book. Therefore the other virtues can be had without charity.

Objection 2. Further, moral virtues can be acquired by means of human acts, as stated in *Ethic. ii, 1,2*, whereas charity cannot be had otherwise than by infusion, according to *Rom. 5:5*: “The charity of God is poured forth in our hearts by the Holy Ghost Who is given to us.” Therefore it is possible to have the other virtues without charity.

Objection 3. Further, the moral virtues are connected together, through depending on prudence. But charity does not depend on prudence; indeed, it surpasses prudence, according to *Eph. 3:19*: “The charity of Christ, which surpasseth all knowledge.” Therefore the moral virtues are not connected with charity, and can be without it.

On the contrary, It is written (*1 Jn. 3:14*): “He that loveth not, abideth in death.” Now the spiritual life is perfected by the virtues, since it is “by them” that “we lead a good life,” as Augustine states (*De Lib. Arb. ii, 17,19*). Therefore they cannot be without the love of charity.

I answer that, As stated above (q. 63, a. 2), it is possible by means of human works to acquire moral virtues, in so far as they produce good works that are directed to an end not surpassing the natural power of man: and when they are acquired thus, they can be without charity, even as they were in many of the Gentiles. But in so far as they produce good works in proportion to a supernatural last end, thus they have the character of virtue, truly and perfectly; and cannot be acquired by human acts, but are infused by God. Such like moral virtues cannot be without charity. For it has been

stated above (a. 1; q. 58, Aa. 4,5) that the other moral virtues cannot be without prudence; and that prudence cannot be without the moral virtues, because these latter make man well disposed to certain ends, which are the starting-point of the procedure of prudence. Now for prudence to proceed aright, it is much more necessary that man be well disposed towards his ultimate end, which is the effect of charity, than that he be well disposed in respect of other ends, which is the effect of moral virtue: just as in speculative matters right reason has greatest need of the first indemonstrable principle, that “contradictories cannot both be true at the same time.” It is therefore evident that neither can infused prudence be without charity; nor, consequently, the other moral virtues, since they cannot be without prudence.

It is therefore clear from what has been said that only the infused virtues are perfect, and deserve to be called virtues simply: since they direct man well to the ultimate end. But the other virtues, those, namely, that are acquired, are virtues in a restricted sense, but not simply: for they direct man well in respect of the last end in some particular genus of action, but not in respect of the last end simply. Hence a gloss of Augustine* on the words, “All that is not of faith is sin” (*Rom. 14:23*), says: “He that fails to acknowledge the truth, has no true virtue, even if his conduct be good.”

Reply to Objection 1. Virtue, in the words quoted, denotes imperfect virtue. Else if we take moral virtue in its perfect state, “it makes its possessor good,” and consequently cannot be in the wicked.

Reply to Objection 2. This argument holds good of virtue in the sense of acquired virtue.

Reply to Objection 3. Though charity surpasses science and prudence, yet prudence depends on charity, as stated: and consequently so do all the infused moral virtues.

* Cf. *Lib. Sentent. Prosperi cvi*.

Objection 1. It would seem possible to have charity without the moral virtues. For when one thing suffices for a certain purpose, it is superfluous to employ others. Now charity alone suffices for the fulfilment of all the works of virtue, as is clear from 1 Cor. 13:4, seqq.: “Charity is patient, is kind,” etc. Therefore it seems that if one has charity, other virtues are superfluous.

Objection 2. Further, he that has a habit of virtue easily performs the works of that virtue, and those works are pleasing to him for their own sake: hence “pleasure taken in a work is a sign of habit” (Ethic. ii, 3). Now many have charity, being free from mortal sin, and yet they find it difficult to do works of virtue; nor are these works pleasing to them for their own sake, but only for the sake of charity. Therefore many have charity without the other virtues.

Objection 3. Further, charity is to be found in every saint: and yet there are some saints who are without certain virtues. For Bede says (on Lk. 17:10) that the saints are more humbled on account of their not having certain virtues, than rejoiced at the virtues they have. Therefore, if a man has charity, it does not follow of necessity that he has all the moral virtues.

On the contrary, The whole Law is fulfilled through charity, for it is written (Rom. 13:8): “He that loveth his neighbor, hath fulfilled the Law.” Now it is not possible to fulfil the whole Law, without having all the moral virtues: since the law contains precepts about all acts of virtue, as stated in Ethic. v, 1,2. Therefore he that has charity, has all the moral virtues. Moreover, Augustine says in a letter (Epis. clxvii)* that charity contains all the cardinal virtues.

I answer that, All the moral virtues are infused together with charity. The reason for this is that God operates no less perfectly in works of grace than in works of nature. Now, in the works of nature, we find that whenever a thing contains a principle of certain works, it has also whatever is necessary for their execution: thus animals are provided with organs whereby to perform the actions that their souls empower them to do. Now it is

evident that charity, inasmuch as it directs man to his last end, is the principle of all the good works that are referable to his last end. Wherefore all the moral virtues must needs be infused together with charity, since it is through them that man performs each different kind of good work.

It is therefore clear that the infused moral virtues are connected, not only through prudence, but also on account of charity: and, again, that whoever loses charity through mortal sin, forfeits all the infused moral virtues.

Reply to Objection 1. In order that the act of a lower power be perfect, not only must there be perfection in the higher, but also in the lower power: for if the principal agent were well disposed, perfect action would not follow, if the instrument also were not well disposed. Consequently, in order that man work well in things referred to the end, he needs not only a virtue disposing him well to the end, but also those virtues which dispose him well to whatever is referred to the end: for the virtue which regards the end is the chief and moving principle in respect of those things that are referred to the end. Therefore it is necessary to have the moral virtues together with charity.

Reply to Objection 2. It happens sometimes that a man who has a habit, finds it difficult to act in accordance with the habit, and consequently feels no pleasure and complacency in the act, on account of some impediment supervening from without: thus a man who has a habit of science, finds it difficult to understand, through being sleepy or unwell. In like manner sometimes the habits of moral virtue experience difficulty in their works, by reason of certain ordinary dispositions remaining from previous acts. This difficulty does not occur in respect of acquired moral virtue: because the repeated acts by which they are acquired, remove also the contrary dispositions.

Reply to Objection 3. Certain saints are said not to have certain virtues, in so far as they experience difficulty in the acts of those virtues, for the reason stated; although they have the habits of all the virtues.

* Cf. Serm. xxxix and xlvi de Temp.

Objection 1. It would seem that faith and hope are never without charity. Because, since they are theological virtues, they seem to be more excellent than even the infused moral virtues. But the infused moral virtues cannot be without charity. Neither therefore can faith and hope be without charity.

Objection 2. Further, “no man believes unwillingly” as Augustine says (Tract. xxvi in Joan.). But charity is in the will as a perfection thereof, as stated above (q. 62, a. 3). Therefore faith cannot be without charity.

Objection 3. Further, Augustine says (Enchiridion viii) that “there can be no hope without love.” But love is charity: for it is of this love that he speaks. Therefore hope cannot be without charity.

On the contrary, A gloss on Mat. 1:2 says that “faith begets hope, and hope, charity.” Now the begetter precedes the begotten, and can be without it. Therefore faith can be without hope; and hope, without charity.

I answer that, Faith and hope, like the moral virtues, can be considered in two ways; first in an inchoate state; secondly, as complete virtues. For since virtue is directed to the doing of good works, perfect virtue is that which gives the faculty of doing a perfectly good work, and this consists in not only doing what is good, but also in doing it well. Else, if what is done is good, but not well done, it will not be perfectly good; wherefore neither will the habit that is the principle of such an act, have the perfect character of virtue. For instance, if a man do what is just, what he does is good: but it will not be the work of a perfect virtue unless he do it well, i.e. by choosing rightly, which is the result of prudence; for which reason justice cannot be a perfect virtue without prudence.

Accordingly faith and hope can exist indeed in a fashion without charity: but they have not the perfect

character of virtue without charity. For, since the act of faith is to believe in God; and since to believe is to assent to someone of one’s own free will: to will not as one ought, will not be a perfect act of faith. To will as one ought is the outcome of charity which perfects the will: since every right movement of the will proceeds from a right love, as Augustine says (De Civ. Dei xiv, 9). Hence faith may be without charity, but not as a perfect virtue: just as temperance and fortitude can be without prudence. The same applies to hope. Because the act of hope consists in looking to God for future bliss. This act is perfect, if it is based on the merits which we have; and this cannot be without charity. But to expect future bliss through merits which one has not yet, but which one proposes to acquire at some future time, will be an imperfect act; and this is possible without charity. Consequently, faith and hope can be without charity; yet, without charity, they are not virtues properly so-called; because the nature of virtue requires that by it, we should not only do what is good, but also that we should do it well (Ethic. ii, 6).

Reply to Objection 1. Moral virtue depends on prudence: and not even infused prudence has the character of prudence without charity; for this involves the absence of due order to the first principle, viz. the ultimate end. On the other hand faith and hope, as such, do not depend either on prudence or charity; so that they can be without charity, although they are not virtues without charity, as stated.

Reply to Objection 2. This argument is true of faith considered as a perfect virtue.

Reply to Objection 3. Augustine is speaking here of that hope whereby we look to gain future bliss through merits which we have already; and this is not without charity.

Objection 1. It would seem that charity can be without faith and hope. For charity is the love of God. But it is possible for us to love God naturally, without already having faith, or hope in future bliss. Therefore charity can be without faith and hope.

Objection 2. Further, charity is the root of all the virtues, according to Eph. 3:17: "Rooted and founded in charity." Now the root is sometimes without branches. Therefore charity can sometimes be without faith and hope, and the other virtues.

Objection 3. Further, there was perfect charity in Christ. And yet He had neither faith nor hope: because He was a perfect comprehensor, as we shall explain further on (IIIa, q. 7, Aa. 3,4). Therefore charity can be without faith and hope.

On the contrary, The Apostle says (Heb. 11:6): "Without faith it is impossible to please God"; and this evidently belongs most to charity, according to Prov. 8:17: "I love them that love me." Again, it is by hope that we are brought to charity, as stated above (q. 62, a. 4). Therefore it is not possible to have charity without faith and hope.

I answer that, Charity signifies not only the love of God, but also a certain friendship with Him; which implies, besides love, a certain mutual return of love, together with mutual communion, as stated in Ethic. viii, 2. That this belongs to charity is evident from 1 Jn. 4:16: "He that abideth in charity, abideth in God, and

God in him," and from 1 Cor. 1:9, where it is written: "God is faithful, by Whom you are called unto the fellowship of His Son." Now this fellowship of man with God, which consists in a certain familiar colloquy with Him, is begun here, in this life, by grace, but will be perfected in the future life, by glory; each of which things we hold by faith and hope. Wherefore just as friendship with a person would be impossible, if one disbelieved in, or despaired of, the possibility of their fellowship or familiar colloquy; so too, friendship with God, which is charity, is impossible without faith, so as to believe in this fellowship and colloquy with God, and to hope to attain to this fellowship. Therefore charity is quite impossible without faith and hope.

Reply to Objection 1. Charity is not any kind of love of God, but that love of God, by which He is loved as the object of bliss, to which object we are directed by faith and hope.

Reply to Objection 2. Charity is the root of faith and hope, in so far as it gives them the perfection of virtue. But faith and hope as such are the precursors of charity, as stated above (q. 62, a. 4), and so charity is impossible without them.

Reply to Objection 3. In Christ there was neither faith nor hope, on account of their implying an imperfection. But instead of faith, He had manifest vision, and instead of hope, full comprehension*: so that in Him was perfect charity.

* See above, q. 4, a. 3

FIRST PART OF THE SECOND PART, QUESTION 66

Of Equality Among the Virtues (In Six Articles)

We must now consider equality among the virtues: under which head there are six points of inquiry:

- (1) Whether one virtue can be greater or less than another?
- (2) Whether all the virtues existing together in one subject are equal?
- (3) Of moral virtue in comparison with intellectual virtue;
- (4) Of the moral virtues as compared with one another;
- (5) Of the intellectual virtues in comparison with one another;
- (6) Of the theological virtues in comparison with one another.

Whether one virtue can be greater or less than another?

Ia IIae q. 66 a. 1

Objection 1. It would seem that one virtue cannot be greater or less than another. For it is written (Apoc. 21:16) that the sides of the city of Jerusalem are equal; and a gloss says that the sides denote the virtues. Therefore all virtues are equal; and consequently one cannot be greater than another.

Objection 2. Further, a thing that, by its nature, consists in a maximum, cannot be more or less. Now the nature of virtue consists in a maximum, for virtue is “the limit of power,” as the Philosopher states (De Coelo i, text. 116); and Augustine says (De Lib. Arb. ii, 19) that “virtues are very great boons, and no one can use them to evil purpose.” Therefore it seems that one virtue cannot be greater or less than another.

Objection 3. Further, the quantity of an effect is measured by the power of the agent. But perfect, viz. infused virtues, are from God Whose power is uniform and infinite. Therefore it seems that one virtue cannot be greater than another.

On the contrary, Wherever there can be increase and greater abundance, there can be inequality. Now virtues admit of greater abundance and increase: for it is written (Mat. 5:20): “Unless your justice abound more than that of the Scribes and Pharisees, you shall not enter into the kingdom of heaven”: and (Prov. 15:5): “In abundant justice there is the greatest strength [virtus].” Therefore it seems that a virtue can be greater or less than another.

I answer that, When it is asked whether one virtue can be greater than another, the question can be taken in two senses. First, as applying to virtues of different species. In this sense it is clear that one virtue is greater than another; since a cause is always more excellent than its effect; and among effects, those nearest to the cause are the most excellent. Now it is clear from what has been said (q. 18, a. 5; q. 61, a. 2) that the cause and root of human good is the reason. Hence prudence which perfects the reason, surpasses in goodness the other moral virtues which perfect the appetitive power, in so far as it partakes of reason. And among these, one is better than another, according as it approaches nearer to the reason. Consequently justice, which is in the will,

excels the remaining moral virtues; and fortitude, which is in the irascible part, stands before temperance, which is in the concupiscible, which has a smaller share of reason, as stated in Ethic. vii, 6.

The question can be taken in another way, as referring to virtues of the same species. In this way, according to what was said above (q. 52, a. 1), when we were treating of the intensity of habits, virtue may be said to be greater or less in two ways: first, in itself; secondly with regard to the subject that partakes of it. If we consider it in itself, we shall call it greater or little, according to the things to which it extends. Now whosoever has a virtue, e.g. temperance, has it in respect of whatever temperance extends to. But this does not apply to science and art: for every grammarian does not know everything relating to grammar. And in this sense the Stoics said rightly, as Simplicius states in his Commentary on the Predicaments, that virtue cannot be more or less, as science and art can; because the nature of virtue consists in a maximum.

If, however, we consider virtue on the part of the subject, it may then be greater or less, either in relation to different times, or in different men. Because one man is better disposed than another to attain to the mean of virtue which is defined by right reason; and this, on account of either greater habituation, or a better natural disposition, or a more discerning judgment of reason, or again a greater gift of grace, which is given to each one “according to the measure of the giving of Christ,” as stated in Eph. 4:9. And here the Stoics erred, for they held that no man should be deemed virtuous, unless he were, in the highest degree, disposed to virtue. Because the nature of virtue does not require that man should reach the mean of right reason as though it were an indivisible point, as the Stoics thought; but it is enough that he should approach the mean, as stated in Ethic. ii, 6. Moreover, one same indivisible mark is reached more nearly and more readily by one than by another: as may be seen when several arches aim at a fixed target.

Reply to Objection 1. This equality is not one of absolute quantity, but of proportion: because all virtues grow in a man proportionately, as we shall see further

on (a. 2).

Reply to Objection 2. This “limit” which belongs to virtue, can have the character of something “more” or “less” good, in the ways explained above: since, as stated, it is not an indivisible limit.

Reply to Objection 3. God does not work by ne-

cessity of nature, but according to the order of His wisdom, whereby He bestows on men various measures of virtue, according to Eph. 4:7: “To every one of you [Vulg.: ‘us’] is given grace according to the measure of the giving of Christ.”

Whether all the virtues that are together in one man, are equal?

Ia IIae q. 66 a. 2

Objection 1. It would seem that the virtues in one same man are not all equally intense. For the Apostle says (1 Cor. 7:7): “Everyone hath his proper gift from God; one after this manner, and another after that.” Now one gift would not be more proper than another to a man, if God infused all the virtues equally into each man. Therefore it seems that the virtues are not all equal in one and the same man.

Objection 2. Further, if all the virtues were equally intense in one and the same man, it would follow that whoever surpasses another in one virtue, would surpass him in all the others. But this is clearly not the case: since various saints are specially praised for different virtues; e.g. Abraham for faith (Rom. 4), Moses for his meekness (Num. 7:3), Job for his patience (Tob. 2:12). This is why of each Confessor the Church sings: “There was not found his like in keeping the law of the most High,”* since each one was remarkable for some virtue or other. Therefore the virtues are not all equal in one and the same man.

Objection 3. Further, the more intense a habit is, the greater one’s pleasure and readiness in making use of it. Now experience shows that a man is more pleased and ready to make use of one virtue than of another. Therefore the virtues are not all equal in one and the same man.

On the contrary, Augustine says (De Trin. vi, 4) that “those who are equal in fortitude are equal in prudence and temperance,” and so on. Now it would not be so, unless all the virtues in one man were equal. Therefore all virtues are equal in one man.

I answer that, As explained above (a. 1), the comparative greatness of virtues can be understood in two ways. First, as referring to their specific nature: and in this way there is no doubt that in a man one virtue is greater than another, for example, charity, than faith and hope. Secondly, it may be taken as referring to the degree of participation by the subject, according as a virtue becomes intense or remiss in its subject. In this sense all the virtues in one man are equal with an equality of proportion, in so far as their growth in man is equal: thus the fingers are unequal in size, but equal in proportion, since they grow in proportion to one another.

Now the nature of this equality is to be explained in the same way as the connection of virtues; for equality among virtues is their connection as to greatness. Now it has been stated above (q. 65, a. 1) that a twofold con-

nection of virtues may be assigned. The first is according to the opinion of those who understood these four virtues to be four general properties of virtues, each of which is found together with the other in any matter. In this way virtues cannot be said to be equal in any matter unless they have all these properties equal. Augustine alludes to this kind of equality (De Trin. vi, 4) when he says: “If you say these men are equal in fortitude, but that one is more prudent than the other; it follows that the fortitude of the latter is less prudent. Consequently they are not really equal in fortitude, since the former’s fortitude is more prudent. You will find that this applies to the other virtues if you run over them all in the same way.”

The other kind of connection among virtues followed the opinion of those who hold these virtues to have their own proper respective matters (q. 65, Aa. 1,2). In this way the connection among moral virtues results from prudence, and, as to the infused virtues, from charity, and not from the inclination, which is on the part of the subject, as stated above (q. 65, a. 1). Accordingly the nature of the equality among virtues can also be considered on the part of prudence, in regard to that which is formal in all the moral virtues: for in one and the same man, so long as his reason has the same degree of perfection, the mean will be proportionately defined according to right reason in each matter of virtue.

But in regard to that which is material in the moral virtues, viz. the inclination to the virtuous act, one may be readier to perform the act of one virtue, than the act of another virtue, and this either from nature, or from habituation, or again by the grace of God.

Reply to Objection 1. This saying of the Apostle may be taken to refer to the gifts of gratuitous grace, which are not common to all, nor are all of them equal in the one same subject. We might also say that it refers to the measure of sanctifying grace, by reason of which one man has all the virtues in greater abundance than another man, on account of his greater abundance of prudence, or also of charity, in which all the infused virtues are connected.

Reply to Objection 2. One saint is praised chiefly for one virtue, another saint for another virtue, on account of his more admirable readiness for the act of one virtue than for the act of another virtue.

This suffices for the Reply to the Third Objection.

* See Lesson in the Mass Statuit (Dominican Missal)

Objection 1. It would seem that the moral virtues are better than the intellectual. Because that which is more necessary, and more lasting, is better. Now the moral virtues are “more lasting even than the sciences” (Ethic. i) which are intellectual virtues: and, moreover, they are more necessary for human life. Therefore they are preferable to the intellectual virtues.

Objection 2. Further, virtue is defined as “that which makes its possessor good.” Now man is said to be good in respect of moral virtue, and art in respect of intellectual virtue, except perhaps in respect of prudence alone. Therefore moral is better than intellectual virtue.

Objection 3. Further, the end is more excellent than the means. But according to Ethic. vi, 12, “moral virtue gives right intention of the end; whereas prudence gives right choice of the means.” Therefore moral virtue is more excellent than prudence, which is the intellectual virtue that regards moral matters.

On the contrary, Moral virtue is in that part of the soul which is rational by participation; while intellectual virtue is in the essentially rational part, as stated in Ethic. i, 13. Now rational by essence is more excellent than rational by participation. Therefore intellectual virtue is better than moral virtue.

I answer that, A thing may be said to be greater or less in two ways: first, simply; secondly, relatively. For nothing hinders something from being better simply, e.g. “learning than riches,” and yet not better relatively, i.e. “for one who is in want”*. Now to consider a thing simply is to consider it in its proper specific nature. Accordingly, a virtue takes its species from its object, as explained above (q. 54, a. 2; q. 60, a. 1). Hence, speaking simply, that virtue is more excellent, which has the more excellent object. Now it is evident that the object of the reason is more excellent than the object of the appetite: since the reason apprehends things in the universal, while the appetite tends to things themselves, whose being is restricted to the particular. Consequently, speaking simply, the intellectual virtues,

which perfect the reason, are more excellent than the moral virtues, which perfect the appetite.

But if we consider virtue in its relation to act, then moral virtue, which perfects the appetite, whose function it is to move the other powers to act, as stated above (q. 9, a. 1), is more excellent. And since virtue is so called from its being a principle of action, for it is the perfection of a power, it follows again that the nature of virtue agrees more with moral than with intellectual virtue, though the intellectual virtues are more excellent habits, simply speaking.

Reply to Objection 1. The moral virtues are more lasting than the intellectual virtues, because they are practised in matters pertaining to the life of the community. Yet it is evident that the objects of the sciences, which are necessary and invariable, are more lasting than the objects of moral virtue, which are certain particular matters of action. That the moral virtues are more necessary for human life, proves that they are more excellent, not simply, but relatively. Indeed, the speculative intellectual virtues, from the very fact that they are not referred to something else, as a useful thing is referred to an end, are more excellent. The reason for this is that in them we have a kind of beginning of that happiness which consists in the knowledge of truth, as stated above (q. 3, a. 6).

Reply to Objection 2. The reason why man is said to be good simply, in respect of moral virtue, but not in respect of intellectual virtue, is because the appetite moves the other powers to their acts, as stated above (q. 56, a. 3). Wherefore this argument, too, proves merely that moral virtue is better relatively.

Reply to Objection 3. Prudence directs the moral virtues not only in the choice of the means, but also in appointing the end. Now the end of each moral virtue is to attain the mean in the matter proper to that virtue; which mean is appointed according to the right ruling of prudence, as stated in Ethic. ii, 6; vi, 13.

Objection 1. It would seem that justice is not the chief of the moral virtues. For it is better to give of one’s own than to pay what is due. Now the former belongs to liberality, the latter to justice. Therefore liberality is apparently a greater virtue than justice.

Objection 2. Further, the chief quality of a thing is, seemingly, that in which it is most perfect. Now, according to Jam. 1:4, “Patience hath a perfect work.” Therefore it would seem that patience is greater than justice.

Objection 3. Further, “Magnanimity has a great influence on every virtue,” as stated in Ethic. iv, 3. There-

fore it magnifies even justice. Therefore it is greater than justice.

On the contrary, The Philosopher says (Ethic. v, 1) that “justice is the most excellent of the virtues.”

I answer that, A virtue considered in its species may be greater or less, either simply or relatively. A virtue is said to be greater simply, whereby a greater rational good shines forth, as stated above (a. 1). In this way justice is the most excellent of all the moral virtues, as being most akin to reason. This is made evident by considering its subject and its object: its subject, because this is the will, and the will is the rational appetite,

* Aristotle, Topic. iii.

as stated above (q. 8, a. 1; q. 26, a. 1): its object or matter, because it is about operations, whereby man is set in order not only in himself, but also in regard to another. Hence “justice is the most excellent of virtues” (Ethic. v, 1). Among the other moral virtues, which are about the passions, the more excellent the matter in which the appetitive movement is subjected to reason, so much the more does the rational good shine forth in each. Now in things touching man, the chief of all is life, on which all other things depend. Consequently fortitude which subjects the appetitive movement to reason in matters of life and death, holds the first place among those moral virtues that are about the passions, but is subordinate to justice. Hence the Philosopher says (Rhet. 1) that “those virtues must needs be greatest which receive the most praise: since virtue is a power of doing good. Hence the brave man and the just man are honored more than others; because the former,” i.e. fortitude, “is useful in war, and the latter,” i.e. justice, “both in war and in peace.” After fortitude comes temperance, which subjects the appetite to reason in matters directly relating to life, in the one individual, or in the one species, viz. in matters of food and of sex. And so these three virtues, together with prudence, are called principal virtues, in excellence also.

A virtue is said to be greater relatively, by reason of its helping or adorning a principal virtue: even as substance is more excellent simply than accident: and yet relatively some particular accident is more excellent

than substance in so far as it perfects substance in some accidental mode of being.

Reply to Objection 1. The act of liberality needs to be founded on an act of justice, for “a man is not liberal in giving, unless he gives of his own” (Polit. ii, 3). Hence there could be no liberality apart from justice, which discerns between “meum” and “tuum”: whereas justice can be without liberality. Hence justice is simply greater than liberality, as being more universal, and as being its foundation: while liberality is greater relatively since it is an ornament and an addition to justice.

Reply to Objection 2. Patience is said to have “a perfect work,” by enduring evils, wherein it excludes not only unjust revenge, which is also excluded by justice; not only hatred, which is also suppressed by charity; nor only anger, which is calmed by gentleness; but also inordinate sorrow, which is the root of all the above. Wherefore it is more perfect and excellent through plucking up the root in this matter. It is not, however, more perfect than all the other virtues simply. Because fortitude not only endures trouble without being disturbed, but also fights against it if necessary. Hence whoever is brave is patient; but the converse does not hold, for patience is a part of fortitude.

Reply to Objection 3. There can be no magnanimity without the other virtues, as stated in Ethic. iv, 3. Hence it is compared to them as their ornament, so that relatively it is greater than all the others, but not simply.

Whether wisdom is the greatest of the intellectual virtues?

Ia IIae q. 66 a. 5

Objection 1. It would seem that wisdom is not the greatest of the intellectual virtues. Because the commander is greater than the one commanded. Now prudence seems to command wisdom, for it is stated in Ethic. i, 2 that political science, which belongs to prudence (Ethic. vi, 8), “orders that sciences should be cultivated in states, and to which of these each individual should devote himself, and to what extent.” Since, then, wisdom is one of the sciences, it seems that prudence is greater than wisdom.

Objection 2. Further, it belongs to the nature of virtue to direct man to happiness: because virtue is “the disposition of a perfect thing to that which is best,” as stated in Phys. vii, text. 17. Now prudence is “right reason about things to be done,” whereby man is brought to happiness: whereas wisdom takes no notice of human acts, whereby man attains happiness. Therefore prudence is a greater virtue than wisdom.

Objection 3. Further, the more perfect knowledge is, the greater it seems to be. Now we can have more perfect knowledge of human affairs, which are the subject of science, than of Divine things, which are the object of wisdom, which is the distinction given by Augustine (De Trin. xii, 14): because Divine things are incomprehensible, according to Job 26:26: “Behold God

is great, exceeding our knowledge.” Therefore science is a greater virtue than wisdom.

Objection 4. Further, knowledge of principles is more excellent than knowledge of conclusions. But wisdom draws conclusions from indemonstrable principles which are the object of the virtue of understanding, even as other sciences do. Therefore understanding is a greater virtue than wisdom.

On the contrary, The Philosopher says (Ethic. vi, 7) that wisdom is “the head” among “the intellectual virtues.”

I answer that, As stated above (a. 3), the greatness of a virtue, as to its species, is taken from its object. Now the object of wisdom surpasses the objects of all the intellectual virtues: because wisdom considers the Supreme Cause, which is God, as stated at the beginning of the Metaphysics. And since it is by the cause that we judge of an effect, and by the higher cause that we judge of the lower effects; hence it is that wisdom exercises judgment over all the other intellectual virtues, directs them all, and is the architect of them all.

Reply to Objection 1. Since prudence is about human affairs, and wisdom about the Supreme Cause, it is impossible for prudence to be a greater virtue than wisdom, “unless,” as stated in Ethic. vi, 7, “man were the

greatest thing in the world.” Wherefore we must say, as stated in the same book (*Ethic. vi*), that prudence does not command wisdom, but vice versa: because “the spiritual man judgeth all things; and he himself is judged by no man” (1 Cor. 2:15). For prudence has no business with supreme matters which are the object of wisdom: but its command covers things directed to wisdom, viz. how men are to obtain wisdom. Wherefore prudence, or political science, is, in this way, the servant of wisdom; for it leads to wisdom, preparing the way for her, as the doorkeeper for the king.

Reply to Objection 2. Prudence considers the means of acquiring happiness, but wisdom considers the very object of happiness, viz. the Supreme Intelligible. And if indeed the consideration of wisdom were perfect in respect of its object, there would be perfect happiness in the act of wisdom: but as, in this life, the act of wisdom is imperfect in respect of its principal object, which is God, it follows that the act of wisdom is a beginning or participation of future happiness, so that wisdom is nearer than prudence to happiness.

Reply to Objection 3. As the Philosopher says (*De Anima i*, text. 1), “one knowledge is preferable to another, either because it is about a higher object, or because it is more certain.” Hence if the objects be equally good and sublime, that virtue will be greater which possesses more certain knowledge. But a virtue which is less certain about a higher and better object, is preferable to that which is more certain about an object of

inferior degree. Wherefore the Philosopher says (*De Coelo ii*, text. 60) that “it is a great thing to be able to know something about celestial beings, though it be based on weak and probable reasoning”; and again (*De Part. Animal. i*, 5) that “it is better to know a little about sublime things, than much about mean things.” Accordingly wisdom, to which knowledge about God pertains, is beyond the reach of man, especially in this life, so as to be his possession: for this “belongs to God alone” (*Metaph. i*, 2): and yet this little knowledge about God which we can have through wisdom is preferable to all other knowledge.

Reply to Objection 4. The truth and knowledge of indemonstrable principles depends on the meaning of the terms: for as soon as we know what is a whole, and what is a part, we know at once that every whole is greater than its part. Now to know the meaning of being and non-being, of whole and part, and of other things consequent to being, which are the terms whereof indemonstrable principles are constituted, is the function of wisdom: since universal being is the proper effect of the Supreme Cause, which is God. And so wisdom makes use of indemonstrable principles which are the object of understanding, not only by drawing conclusions from them, as other sciences do, but also by passing its judgment on them, and by vindicating them against those who deny them. Hence it follows that wisdom is a greater virtue than understanding.

Whether charity is the greatest of the theological virtues?

Ia IIae q. 66 a. 6

Objection 1. It would seem that charity is not the greatest of the theological virtues. Because, since faith is in the intellect, while hope and charity are in the appetitive power, it seems that faith is compared to hope and charity, as intellectual to moral virtue. Now intellectual virtue is greater than moral virtue, as was made evident above (q. 62, a. 3). Therefore faith is greater than hope and charity.

Objection 2. Further, when two things are added together, the result is greater than either one. Now hope results from something added to charity; for it presupposes love, as Augustine says (*Enchiridion viii*), and it adds a certain movement of stretching forward to the beloved. Therefore hope is greater than charity.

Objection 3. Further, a cause is more noble than its effect. Now faith and hope are the cause of charity: for a gloss on *Mat. 1:3* says that “faith begets hope, and hope charity.” Therefore faith and hope are greater than charity.

On the contrary, The Apostle says (1 Cor. 13:13): “Now there remain faith, hope, charity, these three; but the greatest of these is charity.”

I answer that, As stated above (a. 3), the greatness of a virtue, as to its species, is taken from its object. Now, since the three theological virtues look at God as

their proper object, it cannot be said that any one of them is greater than another by reason of its having a greater object, but only from the fact that it approaches nearer than another to that object; and in this way charity is greater than the others. Because the others, in their very nature, imply a certain distance from the object: since faith is of what is not seen, and hope is of what is not possessed. But the love of charity is of that which is already possessed: since the beloved is, in a manner, in the lover, and, again, the lover is drawn by desire to union with the beloved; hence it is written (1 Jn. 4:16): “He that abideth in charity, abideth in God, and God in him.”

Reply to Objection 1. Faith and hope are not related to charity in the same way as prudence to moral virtue; and for two reasons. First, because the theological virtues have an object surpassing the human soul: whereas prudence and the moral virtues are about things beneath man. Now in things that are above man, to love them is more excellent than to know them. Because knowledge is perfected by the known being in the knower: whereas love is perfected by the lover being drawn to the beloved. Now that which is above man is more excellent in itself than in man: since a thing is contained according to the mode of the con-

tainer. But it is the other way about in things beneath man. Secondly, because prudence moderates the appetitive movements pertaining to the moral virtues, whereas faith does not moderate the appetitive movement tending to God, which movement belongs to the theological virtues: it only shows the object. And this appetitive movement towards its object surpasses human knowledge, according to Eph. 3:19: "The charity of Christ which surpasseth all knowledge."

Reply to Objection 2. Hope presupposes love of that which a man hopes to obtain; and such love is love

of concupiscence, whereby he who desires good, loves himself rather than something else. On the other hand, charity implies love of friendship, to which we are led by hope, as stated above (q. 62, a. 4).

Reply to Objection 3. An efficient cause is more noble than its effect: but not a disposing cause. For otherwise the heat of fire would be more noble than the soul, to which the heat disposes the matter. It is in this way that faith begets hope, and hope charity: in the sense, to wit, that one is a disposition to the other.

Objection 1. It would seem that one virtue cannot be greater or less than another. For it is written (Apoc. 21:16) that the sides of the city of Jerusalem are equal; and a gloss says that the sides denote the virtues. Therefore all virtues are equal; and consequently one cannot be greater than another.

Objection 2. Further, a thing that, by its nature, consists in a maximum, cannot be more or less. Now the nature of virtue consists in a maximum, for virtue is “the limit of power,” as the Philosopher states (De Coelo i, text. 116); and Augustine says (De Lib. Arb. ii, 19) that “virtues are very great boons, and no one can use them to evil purpose.” Therefore it seems that one virtue cannot be greater or less than another.

Objection 3. Further, the quantity of an effect is measured by the power of the agent. But perfect, viz. infused virtues, are from God Whose power is uniform and infinite. Therefore it seems that one virtue cannot be greater than another.

On the contrary, Wherever there can be increase and greater abundance, there can be inequality. Now virtues admit of greater abundance and increase: for it is written (Mat. 5:20): “Unless your justice abound more than that of the Scribes and Pharisees, you shall not enter into the kingdom of heaven”: and (Prov. 15:5): “In abundant justice there is the greatest strength [virtus].” Therefore it seems that a virtue can be greater or less than another.

I answer that, When it is asked whether one virtue can be greater than another, the question can be taken in two senses. First, as applying to virtues of different species. In this sense it is clear that one virtue is greater than another; since a cause is always more excellent than its effect; and among effects, those nearest to the cause are the most excellent. Now it is clear from what has been said (q. 18, a. 5; q. 61, a. 2) that the cause and root of human good is the reason. Hence prudence which perfects the reason, surpasses in goodness the other moral virtues which perfect the appetitive power, in so far as it partakes of reason. And among these, one is better than another, according as it approaches nearer to the reason. Consequently justice, which is in the will, excels the remaining moral virtues; and fortitude, which is in the irascible part, stands before temperance, which is in the concupiscible, which has a smaller share of reason, as stated in Ethic. vii, 6.

The question can be taken in another way, as referring to virtues of the same species. In this way, accord-

ing to what was said above (q. 52, a. 1), when we were treating of the intensity of habits, virtue may be said to be greater or less in two ways: first, in itself; secondly with regard to the subject that partakes of it. If we consider it in itself, we shall call it greater or little, according to the things to which it extends. Now whosoever has a virtue, e.g. temperance, has it in respect of whatever temperance extends to. But this does not apply to science and art: for every grammarian does not know everything relating to grammar. And in this sense the Stoics said rightly, as Simplicius states in his Commentary on the Predicaments, that virtue cannot be more or less, as science and art can; because the nature of virtue consists in a maximum.

If, however, we consider virtue on the part of the subject, it may then be greater or less, either in relation to different times, or in different men. Because one man is better disposed than another to attain to the mean of virtue which is defined by right reason; and this, on account of either greater habituation, or a better natural disposition, or a more discerning judgment of reason, or again a greater gift of grace, which is given to each one “according to the measure of the giving of Christ,” as stated in Eph. 4:9. And here the Stoics erred, for they held that no man should be deemed virtuous, unless he were, in the highest degree, disposed to virtue. Because the nature of virtue does not require that man should reach the mean of right reason as though it were an indivisible point, as the Stoics thought; but it is enough that he should approach the mean, as stated in Ethic. ii, 6. Moreover, one same indivisible mark is reached more nearly and more readily by one than by another: as may be seen when several arches aim at a fixed target.

Reply to Objection 1. This equality is not one of absolute quantity, but of proportion: because all virtues grow in a man proportionately, as we shall see further on (a. 2).

Reply to Objection 2. This “limit” which belongs to virtue, can have the character of something “more” or “less” good, in the ways explained above: since, as stated, it is not an indivisible limit.

Reply to Objection 3. God does not work by necessity of nature, but according to the order of His wisdom, whereby He bestows on men various measures of virtue, according to Eph. 4:7: “To every one of you [Vulg.: ‘us’] is given grace according to the measure of the giving of Christ.”

Objection 1. It would seem that the virtues in one same man are not all equally intense. For the Apostle says (1 Cor. 7:7): “Everyone hath his proper gift from God; one after this manner, and another after that.” Now one gift would not be more proper than another to a man, if God infused all the virtues equally into each man. Therefore it seems that the virtues are not all equal in one and the same man.

Objection 2. Further, if all the virtues were equally intense in one and the same man, it would follow that whoever surpasses another in one virtue, would surpass him in all the others. But this is clearly not the case: since various saints are specially praised for different virtues; e.g. Abraham for faith (Rom. 4), Moses for his meekness (Num. 7:3), Job for his patience (Tob. 2:12). This is why of each Confessor the Church sings: “There was not found his like in keeping the law of the most High,”*, since each one was remarkable for some virtue or other. Therefore the virtues are not all equal in one and the same man.

Objection 3. Further, the more intense a habit is, the greater one’s pleasure and readiness in making use of it. Now experience shows that a man is more pleased and ready to make use of one virtue than of another. Therefore the virtues are not all equal in one and the same man.

On the contrary, Augustine says (De Trin. vi, 4) that “those who are equal in fortitude are equal in prudence and temperance,” and so on. Now it would not be so, unless all the virtues in one man were equal. Therefore all virtues are equal in one man.

I answer that, As explained above (a. 1), the comparative greatness of virtues can be understood in two ways. First, as referring to their specific nature: and in this way there is no doubt that in a man one virtue is greater than another, for example, charity, than faith and hope. Secondly, it may be taken as referring to the degree of participation by the subject, according as a virtue becomes intense or remiss in its subject. In this sense all the virtues in one man are equal with an equality of proportion, in so far as their growth in man is equal: thus the fingers are unequal in size, but equal in proportion, since they grow in proportion to one another.

Now the nature of this equality is to be explained in the same way as the connection of virtues; for equality among virtues is their connection as to greatness. Now it has been stated above (q. 65, a. 1) that a twofold con-

nection of virtues may be assigned. The first is according to the opinion of those who understood these four virtues to be four general properties of virtues, each of which is found together with the other in any matter. In this way virtues cannot be said to be equal in any matter unless they have all these properties equal. Augustine alludes to this kind of equality (De Trin. vi, 4) when he says: “If you say these men are equal in fortitude, but that one is more prudent than the other; it follows that the fortitude of the latter is less prudent. Consequently they are not really equal in fortitude, since the former’s fortitude is more prudent. You will find that this applies to the other virtues if you run over them all in the same way.”

The other kind of connection among virtues followed the opinion of those who hold these virtues to have their own proper respective matters (q. 65, Aa. 1,2). In this way the connection among moral virtues results from prudence, and, as to the infused virtues, from charity, and not from the inclination, which is on the part of the subject, as stated above (q. 65, a. 1). Accordingly the nature of the equality among virtues can also be considered on the part of prudence, in regard to that which is formal in all the moral virtues: for in one and the same man, so long as his reason has the same degree of perfection, the mean will be proportionately defined according to right reason in each matter of virtue.

But in regard to that which is material in the moral virtues, viz. the inclination to the virtuous act, one may be readier to perform the act of one virtue, than the act of another virtue, and this either from nature, or from habituation, or again by the grace of God.

Reply to Objection 1. This saying of the Apostle may be taken to refer to the gifts of gratuitous grace, which are not common to all, nor are all of them equal in the one same subject. We might also say that it refers to the measure of sanctifying grace, by reason of which one man has all the virtues in greater abundance than another man, on account of his greater abundance of prudence, or also of charity, in which all the infused virtues are connected.

Reply to Objection 2. One saint is praised chiefly for one virtue, another saint for another virtue, on account of his more admirable readiness for the act of one virtue than for the act of another virtue.

This suffices for the Reply to the Third Objection.

* See Lesson in the Mass Statuit (Dominican Missal)

Objection 1. It would seem that the moral virtues are better than the intellectual. Because that which is more necessary, and more lasting, is better. Now the moral virtues are “more lasting even than the sciences” (Ethic. i) which are intellectual virtues: and, moreover, they are more necessary for human life. Therefore they are preferable to the intellectual virtues.

Objection 2. Further, virtue is defined as “that which makes its possessor good.” Now man is said to be good in respect of moral virtue, and art in respect of intellectual virtue, except perhaps in respect of prudence alone. Therefore moral is better than intellectual virtue.

Objection 3. Further, the end is more excellent than the means. But according to Ethic. vi, 12, “moral virtue gives right intention of the end; whereas prudence gives right choice of the means.” Therefore moral virtue is more excellent than prudence, which is the intellectual virtue that regards moral matters.

On the contrary, Moral virtue is in that part of the soul which is rational by participation; while intellectual virtue is in the essentially rational part, as stated in Ethic. i, 13. Now rational by essence is more excellent than rational by participation. Therefore intellectual virtue is better than moral virtue.

I answer that, A thing may be said to be greater or less in two ways: first, simply; secondly, relatively. For nothing hinders something from being better simply, e.g. “learning than riches,” and yet not better relatively, i.e. “for one who is in want”*. Now to consider a thing simply is to consider it in its proper specific nature. Accordingly, a virtue takes its species from its object, as explained above (q. 54, a. 2; q. 60, a. 1). Hence, speaking simply, that virtue is more excellent, which has the more excellent object. Now it is evident that the object of the reason is more excellent than the object of the appetite: since the reason apprehends things in the universal, while the appetite tends to things themselves, whose being is restricted to the particular. Consequently, speaking simply, the intellectual virtues,

which perfect the reason, are more excellent than the moral virtues, which perfect the appetite.

But if we consider virtue in its relation to act, then moral virtue, which perfects the appetite, whose function it is to move the other powers to act, as stated above (q. 9, a. 1), is more excellent. And since virtue is so called from its being a principle of action, for it is the perfection of a power, it follows again that the nature of virtue agrees more with moral than with intellectual virtue, though the intellectual virtues are more excellent habits, simply speaking.

Reply to Objection 1. The moral virtues are more lasting than the intellectual virtues, because they are practised in matters pertaining to the life of the community. Yet it is evident that the objects of the sciences, which are necessary and invariable, are more lasting than the objects of moral virtue, which are certain particular matters of action. That the moral virtues are more necessary for human life, proves that they are more excellent, not simply, but relatively. Indeed, the speculative intellectual virtues, from the very fact that they are not referred to something else, as a useful thing is referred to an end, are more excellent. The reason for this is that in them we have a kind of beginning of that happiness which consists in the knowledge of truth, as stated above (q. 3, a. 6).

Reply to Objection 2. The reason why man is said to be good simply, in respect of moral virtue, but not in respect of intellectual virtue, is because the appetite moves the other powers to their acts, as stated above (q. 56, a. 3). Wherefore this argument, too, proves merely that moral virtue is better relatively.

Reply to Objection 3. Prudence directs the moral virtues not only in the choice of the means, but also in appointing the end. Now the end of each moral virtue is to attain the mean in the matter proper to that virtue; which mean is appointed according to the right ruling of prudence, as stated in Ethic. ii, 6; vi, 13.

* Aristotle, Topic. iii.

Objection 1. It would seem that justice is not the chief of the moral virtues. For it is better to give of one's own than to pay what is due. Now the former belongs to liberality, the latter to justice. Therefore liberality is apparently a greater virtue than justice.

Objection 2. Further, the chief quality of a thing is, seemingly, that in which it is most perfect. Now, according to Jam. 1:4, "Patience hath a perfect work." Therefore it would seem that patience is greater than justice.

Objection 3. Further, "Magnanimity has a great influence on every virtue," as stated in Ethic. iv, 3. Therefore it magnifies even justice. Therefore it is greater than justice.

On the contrary, The Philosopher says (Ethic. v, 1) that "justice is the most excellent of the virtues."

I answer that, A virtue considered in its species may be greater or less, either simply or relatively. A virtue is said to be greater simply, whereby a greater rational good shines forth, as stated above (a. 1). In this way justice is the most excellent of all the moral virtues, as being most akin to reason. This is made evident by considering its subject and its object: its subject, because this is the will, and the will is the rational appetite, as stated above (q. 8, a. 1; q. 26, a. 1): its object or matter, because it is about operations, whereby man is set in order not only in himself, but also in regard to another. Hence "justice is the most excellent of virtues" (Ethic. v, 1). Among the other moral virtues, which are about the passions, the more excellent the matter in which the appetitive movement is subjected to reason, so much the more does the rational good shine forth in each. Now in things touching man, the chief of all is life, on which all other things depend. Consequently fortitude which subjects the appetitive movement to reason in matters of life and death, holds the first place among those moral virtues that are about the passions, but is subordinate to justice. Hence the Philosopher says (Rhet. 1) that "those virtues must needs be greatest which receive the most praise: since virtue is a power of doing good. Hence the brave man and the just man are honored more

than others; because the former," i.e. fortitude, "is useful in war, and the latter," i.e. justice, "both in war and in peace." After fortitude comes temperance, which subjects the appetite to reason in matters directly relating to life, in the one individual, or in the one species, viz. in matters of food and of sex. And so these three virtues, together with prudence, are called principal virtues, in excellence also.

A virtue is said to be greater relatively, by reason of its helping or adorning a principal virtue: even as substance is more excellent simply than accident: and yet relatively some particular accident is more excellent than substance in so far as it perfects substance in some accidental mode of being.

Reply to Objection 1. The act of liberality needs to be founded on an act of justice, for "a man is not liberal in giving, unless he gives of his own" (Polit. ii, 3). Hence there could be no liberality apart from justice, which discerns between "meum" and "tuum": whereas justice can be without liberality. Hence justice is simply greater than liberality, as being more universal, and as being its foundation: while liberality is greater relatively since it is an ornament and an addition to justice.

Reply to Objection 2. Patience is said to have "a perfect work," by enduring evils, wherein it excludes not only unjust revenge, which is also excluded by justice; not only hatred, which is also suppressed by charity; nor only anger, which is calmed by gentleness; but also inordinate sorrow, which is the root of all the above. Wherefore it is more perfect and excellent through plucking up the root in this matter. It is not, however, more perfect than all the other virtues simply. Because fortitude not only endures trouble without being disturbed, but also fights against it if necessary. Hence whoever is brave is patient; but the converse does not hold, for patience is a part of fortitude.

Reply to Objection 3. There can be no magnanimity without the other virtues, as stated in Ethic. iv, 3. Hence it is compared to them as their ornament, so that relatively it is greater than all the others, but not simply.

Objection 1. It would seem that wisdom is not the greatest of the intellectual virtues. Because the commander is greater than the one commanded. Now prudence seems to command wisdom, for it is stated in *Ethic. i, 2* that political science, which belongs to prudence (*Ethic. vi, 8*), “orders that sciences should be cultivated in states, and to which of these each individual should devote himself, and to what extent.” Since, then, wisdom is one of the sciences, it seems that prudence is greater than wisdom.

Objection 2. Further, it belongs to the nature of virtue to direct man to happiness: because virtue is “the disposition of a perfect thing to that which is best,” as stated in *Phys. vii, text. 17*. Now prudence is “right reason about things to be done,” whereby man is brought to happiness: whereas wisdom takes no notice of human acts, whereby man attains happiness. Therefore prudence is a greater virtue than wisdom.

Objection 3. Further, the more perfect knowledge is, the greater it seems to be. Now we can have more perfect knowledge of human affairs, which are the subject of science, than of Divine things, which are the object of wisdom, which is the distinction given by Augustine (*De Trin. xii, 14*): because Divine things are incomprehensible, according to *Job 26:26*: “Behold God is great, exceeding our knowledge.” Therefore science is a greater virtue than wisdom.

Objection 4. Further, knowledge of principles is more excellent than knowledge of conclusions. But wisdom draws conclusions from indemonstrable principles which are the object of the virtue of understanding, even as other sciences do. Therefore understanding is a greater virtue than wisdom.

On the contrary, The Philosopher says (*Ethic. vi, 7*) that wisdom is “the head” among “the intellectual virtues.”

I answer that, As stated above (a. 3), the greatness of a virtue, as to its species, is taken from its object. Now the object of wisdom surpasses the objects of all the intellectual virtues: because wisdom considers the Supreme Cause, which is God, as stated at the beginning of the *Metaphysics*. And since it is by the cause that we judge of an effect, and by the higher cause that we judge of the lower effects; hence it is that wisdom exercises judgment over all the other intellectual virtues, directs them all, and is the architect of them all.

Reply to Objection 1. Since prudence is about human affairs, and wisdom about the Supreme Cause, it is impossible for prudence to be a greater virtue than wisdom, “unless,” as stated in *Ethic. vi, 7*, “man were the greatest thing in the world.” Wherefore we must say, as stated in the same book (*Ethic. vi*), that prudence does not command wisdom, but vice versa: because “the spiritual man judgeth all things; and he himself is

judged by no man” (1 Cor. 2:15). For prudence has no business with supreme matters which are the object of wisdom: but its command covers things directed to wisdom, viz. how men are to obtain wisdom. Wherefore prudence, or political science, is, in this way, the servant of wisdom; for it leads to wisdom, preparing the way for her, as the doorkeeper for the king.

Reply to Objection 2. Prudence considers the means of acquiring happiness, but wisdom considers the very object of happiness, viz. the Supreme Intelligible. And if indeed the consideration of wisdom were perfect in respect of its object, there would be perfect happiness in the act of wisdom: but as, in this life, the act of wisdom is imperfect in respect of its principal object, which is God, it follows that the act of wisdom is a beginning or participation of future happiness, so that wisdom is nearer than prudence to happiness.

Reply to Objection 3. As the Philosopher says (*De Anima i, text. 1*), “one knowledge is preferable to another, either because it is about a higher object, or because it is more certain.” Hence if the objects be equally good and sublime, that virtue will be greater which possesses more certain knowledge. But a virtue which is less certain about a higher and better object, is preferable to that which is more certain about an object of inferior degree. Wherefore the Philosopher says (*De Coelo ii, text. 60*) that “it is a great thing to be able to know something about celestial beings, though it be based on weak and probable reasoning”; and again (*De Part. Animal. i, 5*) that “it is better to know a little about sublime things, than much about mean things.” Accordingly wisdom, to which knowledge about God pertains, is beyond the reach of man, especially in this life, so as to be his possession: for this “belongs to God alone” (*Metaph. i, 2*): and yet this little knowledge about God which we can have through wisdom is preferable to all other knowledge.

Reply to Objection 4. The truth and knowledge of indemonstrable principles depends on the meaning of the terms: for as soon as we know what is a whole, and what is a part, we know at once that every whole is greater than its part. Now to know the meaning of being and non-being, of whole and part, and of other things consequent to being, which are the terms whereof indemonstrable principles are constituted, is the function of wisdom: since universal being is the proper effect of the Supreme Cause, which is God. And so wisdom makes use of indemonstrable principles which are the object of understanding, not only by drawing conclusions from them, as other sciences do, but also by passing its judgment on them, and by vindicating them against those who deny them. Hence it follows that wisdom is a greater virtue than understanding.

Objection 1. It would seem that charity is not the greatest of the theological virtues. Because, since faith is in the intellect, while hope and charity are in the appetitive power, it seems that faith is compared to hope and charity, as intellectual to moral virtue. Now intellectual virtue is greater than moral virtue, as was made evident above (q. 62, a. 3). Therefore faith is greater than hope and charity.

Objection 2. Further, when two things are added together, the result is greater than either one. Now hope results from something added to charity; for it presupposes love, as Augustine says (*Enchiridion* viii), and it adds a certain movement of stretching forward to the beloved. Therefore hope is greater than charity.

Objection 3. Further, a cause is more noble than its effect. Now faith and hope are the cause of charity: for a gloss on Mat. 1:3 says that “faith begets hope, and hope charity.” Therefore faith and hope are greater than charity.

On the contrary, The Apostle says (1 Cor. 13:13): “Now there remain faith, hope, charity, these three; but the greatest of these is charity.”

I answer that, As stated above (a. 3), the greatness of a virtue, as to its species, is taken from its object. Now, since the three theological virtues look at God as their proper object, it cannot be said that any one of them is greater than another by reason of its having a greater object, but only from the fact that it approaches nearer than another to that object; and in this way charity is greater than the others. Because the others, in their very nature, imply a certain distance from the object: since faith is of what is not seen, and hope is of what is not possessed. But the love of charity is of that which is already possessed: since the beloved is, in a manner, in the lover, and, again, the lover is drawn by desire to union with the beloved; hence it is written (1 Jn. 4:16):

“He that abideth in charity, abideth in God, and God in him.”

Reply to Objection 1. Faith and hope are not related to charity in the same way as prudence to moral virtue; and for two reasons. First, because the theological virtues have an object surpassing the human soul: whereas prudence and the moral virtues are about things beneath man. Now in things that are above man, to love them is more excellent than to know them. Because knowledge is perfected by the known being in the knower: whereas love is perfected by the lover being drawn to the beloved. Now that which is above man is more excellent in itself than in man: since a thing is contained according to the mode of the container. But it is the other way about in things beneath man. Secondly, because prudence moderates the appetitive movements pertaining to the moral virtues, whereas faith does not moderate the appetitive movement tending to God, which movement belongs to the theological virtues: it only shows the object. And this appetitive movement towards its object surpasses human knowledge, according to Eph. 3:19: “The charity of Christ which surpasseth all knowledge.”

Reply to Objection 2. Hope presupposes love of that which a man hopes to obtain; and such love is love of concupiscence, whereby he who desires good, loves himself rather than something else. On the other hand, charity implies love of friendship, to which we are led by hope, as stated above (q. 62, a. 4).

Reply to Objection 3. An efficient cause is more noble than its effect: but not a disposing cause. For otherwise the heat of fire would be more noble than the soul, to which the heat disposes the matter. It is in this way that faith begets hope, and hope charity: in the sense, to wit, that one is a disposition to the other.

FIRST PART OF THE SECOND PART, QUESTION 67

Of the Duration of Virtues After This Life (In Six Articles)

We must now consider the duration of virtues after this life, under which head there are six points of inquiry:

- (1) Whether the moral virtues remain after this life?
- (2) Whether the intellectual virtues remain?
- (3) Whether faith remains?
- (4) Whether hope remains?
- (5) Whether anything remains of faith or hope?
- (6) Whether charity remains?

Whether the moral virtues remain after this life?

Ia IIae q. 67 a. 1

Objection 1. It would seem that the moral virtues do not remain after this life. For in the future state of glory men will be like angels, according to Mat. 22:30. But it is absurd to put moral virtues in the angels*, as stated in Ethic. x, 8. Therefore neither in man will there be moral virtues after this life.

Objection 2. Further, moral virtues perfect man in the active life. But the active life does not remain after this life: for Gregory says (Moral. iv, 18): "The works of the active life pass away from the body." Therefore moral virtues do not remain after this life.

Objection 3. Further, temperance and fortitude, which are moral virtues, are in the irrational parts of the soul, as the Philosopher states (Ethic. iii, 10). Now the irrational parts of the soul are corrupted, when the body is corrupted: since they are acts of bodily organs. Therefore it seems that the moral virtues do not remain after this life.

On the contrary, It is written (Wis. 1:15) that "justice is perpetual and immortal."

I answer that, As Augustine says (De Trin. xiv, 9), Cicero held that the cardinal virtues do not remain after this life; and that, as Augustine says (De Trin. xiv, 9), "in the other life men are made happy by the mere knowledge of that nature, than which nothing is better or more lovable, that Nature, to wit, which created all others." Afterwards he concludes that these four virtues remain in the future life, but after a different manner.

In order to make this evident, we must note that in these virtues there is a formal element, and a quasi-material element. The material element in these virtues is a certain inclination of the appetitive part to the passions and operations according to a certain mode: and since this mode is fixed by reason, the formal element is precisely this order of reason.

Accordingly we must say that these moral virtues do not remain in the future life, as regards their material element. For in the future life there will be no concupiscences and pleasures in matters of food and sex; nor fear and daring about dangers of death; nor distributions and commutations of things employed in this present

life. But, as regards the formal element, they will remain most perfect, after this life, in the Blessed, in as much as each one's reason will have most perfect rectitude in regard to things concerning him in respect of that state of life: and his appetitive power will be moved entirely according to the order of reason, in things pertaining to that same state. Hence Augustine says (De Trin. xiv, 9) that "prudence will be there without any danger of error; fortitude, without the anxiety of bearing with evil; temperance, without the rebellion of the desires: so that prudence will neither prefer nor equal any good to God; fortitude will adhere to Him most steadfastly; and temperance will delight in Him Who knows no imperfection." As to justice, it is yet more evident what will be its act in that life, viz. "to be subject to God": because even in this life subjection to a superior is part of justice.

Reply to Objection 1. The Philosopher is speaking there of these moral virtues, as to their material element; thus he speaks of justice, as regards "commutations and distributions"; of fortitude, as to "matters of terror and danger"; of temperance, in respect of "lewd desires."

The same applies to the Second Objection. For those things that concern the active life, belong to the material element of the virtues.

Reply to Objection 3. There is a twofold state after this life; one before the resurrection, during which the soul will be separate from the body; the other, after the resurrection, when the souls will be reunited to their bodies. In this state of resurrection, the irrational powers will be in the bodily organs, just as they now are. Hence it will be possible for fortitude to be in the irascible, and temperance in the concupiscible part, in so far as each power will be perfectly disposed to obey the reason. But in the state preceding the resurrection, the irrational parts will not be in the soul actually, but only radically in its essence, as stated in the Ia, q. 77, a. 8. Wherefore neither will these virtues be actually, but only in their root, i.e. in the reason and will, wherein are certain nurseries of these virtues, as stated above (q. 63, a. 1). Justice, however, will remain because it is

* "Whatever relates to moral action is petty, and unworthy of the gods" (Ethic. x, 8)

in the will. Hence of justice it is specially said that it is “perpetual and immortal”; both by reason of its subject,

since the will is incorruptible; and because its act will not change, as stated.

Whether the intellectual virtues remain after this life?

Ia IIae q. 67 a. 2

Objection 1. It would seem that the intellectual virtues do not remain after this life. For the Apostle says (1 Cor. 13:8,9) that “knowledge shall be destroyed,” and he states the reason to be because “we know in part.” Now just as the knowledge of science is in part, i.e. imperfect; so also is the knowledge of the other intellectual virtues, as long as this life lasts. Therefore all the intellectual virtues will cease after this life.

Objection 2. Further, the Philosopher says (Categor. vi) that since science is a habit, it is a quality difficult to remove: for it is not easily lost, except by reason of some great change or sickness. But no bodily change is so great as that of death. Therefore science and the other intellectual virtues do not remain after death.

Objection 3. Further, the intellectual virtues perfect the intellect so that it may perform its proper act well. Now there seems to be no act of the intellect after this life, since “the soul understands nothing without a phantasm” (De Anima iii, text. 30); and, after this life, the phantasms do not remain, since their only subject is an organ of the body. Therefore the intellectual virtues do not remain after this life.

On the contrary, The knowledge of what is universal and necessary is more constant than that of particular and contingent things. Now the knowledge of contingent particulars remains in man after this life; for instance, the knowledge of what one has done or suffered, according to Lk. 16:25: “Son, remember that thou didst receive good things in thy life-time, and likewise Lazarus evil things.” Much more, therefore, does the knowledge of universal and necessary things remain, which belong to science and the other intellectual virtues.

I answer that, As stated in the Ia, q. 79, a. 6 some have held that the intelligible species do not remain in the passive intellect except when it actually understands; and that so long as actual consideration ceases, the species are not preserved save in the sensitive powers which are acts of bodily organs, viz. in the powers of imagination and memory. Now these powers cease when the body is corrupted: and consequently, accord-

ing to this opinion, neither science nor any other intellectual virtue will remain after this life when once the body is corrupted.

But this opinion is contrary to the mind of Aristotle, who states (De Anima iii, text. 8) that “the possible intellect is in act when it is identified with each thing as knowing it; and yet, even then, it is in potentiality to consider it actually.” It is also contrary to reason, because intelligible species are contained by the “possible” intellect immovably, according to the mode of their container. Hence the “possible” intellect is called “the abode of the species” (De Anima iii) because it preserves the intelligible species.

And yet the phantasms, by turning to which man understands in this life, by applying the intelligible species to them as stated in the Ia, q. 84, a. 7; Ia, q. 85, a. 1, ad 5, cease as soon as the body is corrupted. Hence, so far as the phantasms are concerned, which are the quasi-material element in the intellectual virtues, these latter cease when the body is destroyed: but as regards the intelligible species, which are in the “possible” intellect, the intellectual virtues remain. Now the species are the quasi-formal element of the intellectual virtues. Therefore these remain after this life, as regards their formal element, just as we have stated concerning the moral virtues (a. 1).

Reply to Objection 1. The saying of the Apostle is to be understood as referring to the material element in science, and to the mode of understanding; because, to it, neither do the phantasms remain, when the body is destroyed; nor will science be applied by turning to the phantasms.

Reply to Objection 2. Sickness destroys the habit of science as to its material element, viz. the phantasms, but not as to the intelligible species, which are in the “possible” intellect.

Reply to Objection 3. As stated in the Ia, q. 89, a. 1 the separated soul has a mode of understanding, other than by turning to the phantasms. Consequently science remains, yet not as to the same mode of operation; as we have stated concerning the moral virtues (a. 1).

Whether faith remains after this life?

Ia IIae q. 67 a. 3

Objection 1. It would seem that faith remains after this life. Because faith is more excellent than science. Now science remains after this life, as stated above (a. 2). Therefore faith remains also.

Objection 2. Further, it is written (1 Cor. 3:11): “Other foundation no man can lay, but that which is laid; which is Christ Jesus,” i.e. faith in Jesus Christ. Now

if the foundation is removed, that which is built upon it remains no more. Therefore, if faith remains not after this life, no other virtue remains.

Objection 3. Further, the knowledge of faith and the knowledge of glory differ as perfect from imperfect. Now imperfect knowledge is compatible with perfect knowledge: thus in an angel there can be “evening”

and “morning” knowledge*; and a man can have science through a demonstrative syllogism, together with opinion through a probable syllogism, about one same conclusion. Therefore after this life faith also is compatible with the knowledge of glory.

On the contrary, The Apostle says (2 Cor. 5:6,7): “While we are in the body, we are absent from the Lord: for we walk by faith and not by sight.” But those who are in glory are not absent from the Lord, but present to Him. Therefore after this life faith does not remain in the life of glory.

I answer that, Opposition is of itself the proper cause of one thing being excluded from another, in so far, to wit, as wherever two things are opposite to one another, we find opposition of affirmation and negation. Now in some things we find opposition in respect of contrary forms; thus in colors we find white and black. In others we find opposition in respect of perfection and imperfection: wherefore in alterations, more and less are considered to be contraries, as when a thing from being less hot is made more hot (Phys. v, text. 19). And since perfect and imperfect are opposite to one another, it is impossible for perfection and imperfection to affect the same thing at the same time.

Now we must take note that sometimes imperfection belongs to a thing’s very nature, and belongs to its species: even as lack of reason belongs to the very specific nature of a horse and an ox. And since a thing, so long as it remains the same identically, cannot pass from one species to another, it follows that if such an imperfection be removed, the species of that thing is changed: even as it would no longer be an ox or a horse, were it to be rational. Sometimes, however, the imperfection does not belong to the specific nature, but is accidental to the individual by reason of something else; even as sometimes lack of reason is accidental to a man, because he is asleep, or because he is drunk, or for some like reason; and it is evident, that if such an imperfection be removed, the thing remains substantially.

Now it is clear that imperfect knowledge belongs to the very nature of faith: for it is included in its definition; faith being defined as “the substance of things to be hoped for, the evidence of things that appear not” (Heb. 11:1). Wherefore Augustine says (Tract. xl in Joan.): “Where is faith? Believing without seeing.” But it is an imperfect knowledge that is of things unapparent or unseen. Consequently imperfect knowledge belongs to the very nature of faith: therefore it is clear that the knowledge of faith cannot be perfect and remain identically the same.

But we must also consider whether it is compatible with perfect knowledge: for there is nothing to prevent some kind of imperfect knowledge from being sometimes with perfect knowledge. Accordingly we must observe that knowledge can be imperfect in three ways: first, on the part of the knowable object; secondly, on the part of the medium; thirdly, on the part of the sub-

ject. The difference of perfect and imperfect knowledge on the part of the knowable object is seen in the “morning” and “evening” knowledge of the angels: for the “morning” knowledge is about things according to the being which they have in the Word, while the “evening” knowledge is about things according as they have being in their own natures, which being is imperfect in comparison with the First Being. On the part of the medium, perfect and imperfect knowledge are exemplified in the knowledge of a conclusion through a demonstrative medium, and through a probable medium. On the part of the subject the difference of perfect and imperfect knowledge applies to opinion, faith, and science. For it is essential to opinion that we assent to one of two opposite assertions with fear of the other, so that our adhesion is not firm: to science it is essential to have firm adhesion with intellectual vision, for science possesses certitude which results from the understanding of principles: while faith holds a middle place, for it surpasses opinion in so far as its adhesion is firm, but falls short of science in so far as it lacks vision.

Now it is evident that a thing cannot be perfect and imperfect in the same respect; yet the things which differ as perfect and imperfect can be together in the same respect in one and the same other thing. Accordingly, knowledge which is perfect on the part of the object is quite incompatible with imperfect knowledge about the same object; but they are compatible with one another in respect of the same medium or the same subject: for nothing hinders a man from having at one and the same time, through one and the same medium, perfect and imperfect knowledge about two things, one perfect, the other imperfect, e.g. about health and sickness, good and evil. In like manner knowledge that is perfect on the part of the medium is incompatible with imperfect knowledge through one and the same medium: but nothing hinders them being about the same subject or in the same subject: for one man can know the same conclusions through a probable and through a demonstrative medium. Again, knowledge that is perfect on the part of the subject is incompatible with imperfect knowledge in the same subject. Now faith, of its very nature, contains an imperfection on the part of the subject, viz. that the believer sees not what he believes: whereas bliss, of its very nature, implies perfection on the part of the subject, viz. that the Blessed see that which makes them happy, as stated above (q. 3, a. 8). Hence it is manifest that faith and bliss are incompatible in one and the same subject.

Reply to Objection 1. Faith is more excellent than science, on the part of the object, because its object is the First Truth. Yet science has a more perfect mode of knowing its object, which is not incompatible with vision which is the perfection of happiness, as the mode of faith is incompatible.

Reply to Objection 2. Faith is the foundation in as much as it is knowledge: consequently when this

* Cf. Ia, q. 58, a. 6

knowledge is perfected, the foundation will be perfected also.

The Reply to the Third Objection is clear from what has been said.

Whether hope remains after death, in the state of glory?

Ia IIae q. 67 a. 4

Objection 1. It would seem that hope remains after death, in the state of glory. Because hope perfects the human appetite in a more excellent manner than the moral virtues. But the moral virtues remain after this life, as Augustine clearly states (*De Trin.* xiv, 9). Much more then does hope remain.

Objection 2. Further, fear is opposed to hope. But fear remains after this life: in the Blessed, filial fear, which abides for ever—in the lost, the fear of punishment. Therefore, in a like manner, hope can remain.

Objection 3. Further, just as hope is of future good, so is desire. Now in the Blessed there is desire for future good; both for the glory of the body, which the souls of the Blessed desire, as Augustine declares (*Gen. ad lit.* xii, 35); and for the glory of the soul, according to *Ecclus.* 24:29: “They that eat me, shall yet hunger, and they that drink me, shall yet thirst,” and *1 Pet.* 1:12: “On Whom the angels desire to look.” Therefore it seems that there can be hope in the Blessed after this life is past.

On the contrary, The Apostle says (*Rom.* 8:24): “What a man seeth, why doth he hope for?” But the Blessed see that which is the object of hope, viz. God. Therefore they do not hope.

I answer that, As stated above (a. 3), that which, in its very nature, implies imperfection of its subject, is incompatible with the opposite perfection in that subject. Thus it is evident that movement of its very nature implies imperfection of its subject, since it is “the act of that which is in potentiality as such” (*Phys.* iii): so that as soon as this potentiality is brought into act, the movement ceases; for a thing does not continue to become white, when once it is made white. Now hope denotes a movement towards that which is not possessed, as is clear from what we have said above about the passion of hope (q. 40, Aa. 1,2). Therefore when we possess that which we hope for, viz. the enjoyment of God, it will no longer be possible to have hope.

Reply to Objection 1. Hope surpasses the moral virtues as to its object, which is God. But the acts of the moral virtues are not incompatible with the perfection of happiness, as the act of hope is; except perhaps, as regards their matter, in respect of which they do not remain. For moral virtue perfects the appetite, not only in respect of what is not yet possessed, but also as regards something which is in our actual possession.

Reply to Objection 2. Fear is twofold, servile and filial, as we shall state further on (*IIa IIae*, q. 19, a. 2). Servile fear regards punishment, and will be impossible in the life of glory, since there will no longer be possibility of being punished. Filial fear has two acts: one is an act of reverence to God, and with regard to this act, it remains: the other is an act of fear lest we be separated from God, and as regards this act, it does not remain. Because separation from God is in the nature of an evil: and no evil will be feared there, according to *Prov.* 1:33: “He . . . shall enjoy abundance without fear of evils.” Now fear is opposed to hope by opposition of good and evil, as stated above (q. 23, a. 2; q. 40, a. 1), and therefore the fear which will remain in glory is not opposed to hope. In the lost there can be fear of punishment, rather than hope of glory in the Blessed. Because in the lost there will be a succession of punishments, so that the notion of something future remains there, which is the object of fear: but the glory of the saints has no succession, by reason of its being a kind of participation of eternity, wherein there is neither past nor future, but only the present. And yet, properly speaking, neither in the lost is there fear. For, as stated above (q. 42, a. 2), fear is never without some hope of escape: and the lost have no such hope. Consequently neither will there be fear in them; except speaking in a general way, in so far as any expectation of future evil is called fear.

Reply to Objection 3. As to the glory of the soul, there can be no desire in the Blessed, in so far as desire looks for something future, for the reason already given (ad 2). Yet hunger and thirst are said to be in them because they never weary, and for the same reason desire is said to be in the angels. With regard to the glory of the body, there can be desire in the souls of the saints, but not hope, properly speaking; neither as a theological virtue, for thus its object is God, and not a created good; nor in its general signification. Because the object of hope is something difficult, as stated above (q. 40, a. 1): while a good whose unerring cause we already possess, is not compared to us as something difficult. Hence he that has money is not, properly speaking, said to hope for what he can buy at once. In like manner those who have the glory of the soul are not, properly speaking, said to hope for the glory of the body, but only to desire it.

Objection 1. It would seem that something of faith and hope remains in glory. For when that which is proper to a thing is removed, there remains what is common; thus it is stated in De Causis that “if you take away rational, there remains living, and when you remove living, there remains being.” Now in faith there is something that it has in common with beatitude, viz. knowledge: and there is something proper to it, viz. darkness, for faith is knowledge in a dark manner. Therefore, the darkness of faith removed, the knowledge of faith still remains.

Objection 2. Further, faith is a spiritual light of the soul, according to Eph. 1:17,18: “The eyes of your heart enlightened. . . in the knowledge of God”; yet this light is imperfect in comparison with the light of glory, of which it is written (Ps. 35:10): “In Thy light we shall see light.” Now an imperfect light remains when a perfect light supervenes: for a candle is not extinguished when the sun’s rays appear. Therefore it seems that the light of faith itself remains with the light of glory.

Objection 3. Further, the substance of a habit does not cease through the withdrawal of its matter: for a man may retain the habit of liberality, though he have lost his money: yet he cannot exercise the act. Now the object of faith is the First Truth as unseen. Therefore when this ceases through being seen, the habit of faith can still remain.

On the contrary, Faith is a simple habit. Now a simple thing is either withdrawn entirely, or remains entirely. Since therefore faith does not remain entirely, but is taken away as stated above (a. 3), it seems that it is withdrawn entirely.

I answer that, Some have held that hope is taken away entirely: but that faith is taken away in part, viz. as to its obscurity, and remains in part, viz. as to the substance of its knowledge. And if this be understood to mean that it remains the same, not identically but generically, it is absolutely true; since faith is of the same genus, viz. knowledge, as the beatific vision. On the other hand, hope is not of the same genus as heavenly bliss: because it is compared to the enjoyment of bliss, as movement is to rest in the term of movement.

But if it be understood to mean that in heaven the knowledge of faith remains identically the same, this is absolutely impossible. Because when you remove a specific difference, the substance of the genus does not remain identically the same: thus if you remove the difference constituting whiteness, the substance of

color does not remain identically the same, as though the identical color were at one time whiteness, and, at another, blackness. The reason is that genus is not related to difference as matter to form, so that the substance of the genus remains identically the same, when the difference is removed, as the substance of matter remains identically the same, when the form is changed: for genus and difference are not the parts of a species, else they would not be predicated of the species. But even as the species denotes the whole, i.e. the compound of matter and form in material things, so does the difference, and likewise the genus; the genus denotes the whole by signifying that which is material; the difference, by signifying that which is formal; the species, by signifying both. Thus, in man, the sensitive nature is as matter to the intellectual nature, and animal is predicated of that which has a sensitive nature, rational of that which has an intellectual nature, and man of that which has both. So that the one same whole is denoted by these three, but not under the same aspect.

It is therefore evident that, since the signification of the difference is confined to the genus if the difference be removed, the substance of the genus cannot remain the same: for the same animal nature does not remain, if another kind of soul constitute the animal. Hence it is impossible for the identical knowledge, which was previously obscure, to become clear vision. It is therefore evident that, in heaven, nothing remains of faith, either identically or specifically the same, but only generically.

Reply to Objection 1. If “rational” be withdrawn, the remaining “living” thing is the same, not identically, but generically, as stated.

Reply to Objection 2. The imperfection of candlelight is not opposed to the perfection of sunlight, since they do not regard the same subject: whereas the imperfection of faith and the perfection of glory are opposed to one another and regard the same subject. Consequently they are incompatible with one another, just as light and darkness in the air.

Reply to Objection 3. He that loses his money does not therefore lose the possibility of having money, and therefore it is reasonable for the habit of liberality to remain. But in the state of glory not only is the object of faith, which is the unseen, removed actually, but even its possibility, by reason of the unchangeableness of heavenly bliss: and so such a habit would remain to no purpose.

Objection 1. It would seem that charity does not remain after this life, in glory. Because according to 1 Cor. 13:10, “when that which is perfect is come, that which is in part,” i.e. that which is imperfect, “shall be

done away.” Now the charity of the wayfarer is imperfect. Therefore it will be done away when the perfection of glory is attained.

Objection 2. Further, habits and acts are differen-

tiated by their objects. But the object of love is good apprehended. Since therefore the apprehension of the present life differs from the apprehension of the life to come, it seems that charity is not the same in both cases.

Objection 3. Further, things of the same kind can advance from imperfection to perfection by continuous increase. But the charity of the wayfarer can never attain to equality with the charity of heaven, however much it be increased. Therefore it seems that the charity of the wayfarer does not remain in heaven.

On the contrary, The Apostle says (1 Cor. 13:8): "Charity never falleth away."

I answer that, As stated above (a. 3), when the imperfection of a thing does not belong to its specific nature, there is nothing to hinder the identical thing passing from imperfection to perfection, even as man is perfected by growth, and whiteness by intensity. Now charity is love, the nature of which does not include imperfection, since it may relate to an object either possessed or not possessed, either seen or not seen. Therefore

charity is not done away by the perfection of glory, but remains identically the same.

Reply to Objection 1. The imperfection of charity is accidental to it; because imperfection is not included in the nature of love. Now although that which is accidental to a thing be withdrawn, the substance remains. Hence the imperfection of charity being done away, charity itself is not done away.

Reply to Objection 2. The object of charity is not knowledge itself; if it were, the charity of the wayfarer would not be the same as the charity of heaven: its object is the thing known, which remains the same, viz. God Himself.

Reply to Objection 3. The reason why charity of the wayfarer cannot attain to the perfection of the charity of heaven, is a difference on the part of the cause: for vision is a cause of love, as stated in Ethic. ix, 5: and the more perfectly we know God, the more perfectly we love Him.

Objection 1. It would seem that the moral virtues do not remain after this life. For in the future state of glory men will be like angels, according to Mat. 22:30. But it is absurd to put moral virtues in the angels*, as stated in Ethic. x, 8. Therefore neither in man will there be moral virtues after this life.

Objection 2. Further, moral virtues perfect man in the active life. But the active life does not remain after this life: for Gregory says (Moral. iv, 18): “The works of the active life pass away from the body.” Therefore moral virtues do not remain after this life.

Objection 3. Further, temperance and fortitude, which are moral virtues, are in the irrational parts of the soul, as the Philosopher states (Ethic. iii, 10). Now the irrational parts of the soul are corrupted, when the body is corrupted: since they are acts of bodily organs. Therefore it seems that the moral virtues do not remain after this life.

On the contrary, It is written (Wis. 1:15) that “justice is perpetual and immortal.”

I answer that, As Augustine says (De Trin. xiv, 9), Cicero held that the cardinal virtues do not remain after this life; and that, as Augustine says (De Trin. xiv, 9), “in the other life men are made happy by the mere knowledge of that nature, than which nothing is better or more lovable, that Nature, to wit, which created all others.” Afterwards he concludes that these four virtues remain in the future life, but after a different manner.

In order to make this evident, we must note that in these virtues there is a formal element, and a quasi-material element. The material element in these virtues is a certain inclination of the appetitive part to the passions and operations according to a certain mode: and since this mode is fixed by reason, the formal element is precisely this order of reason.

Accordingly we must say that these moral virtues do not remain in the future life, as regards their material element. For in the future life there will be no concupiscences and pleasures in matters of food and sex; nor fear and daring about dangers of death; nor distributions and commutations of things employed in this present life. But, as regards the formal element, they will remain most perfect, after this life, in the Blessed, in as

much as each one’s reason will have most perfect rectitude in regard to things concerning him in respect of that state of life: and his appetitive power will be moved entirely according to the order of reason, in things pertaining to that same state. Hence Augustine says (De Trin. xiv, 9) that “prudence will be there without any danger of error; fortitude, without the anxiety of bearing with evil; temperance, without the rebellion of the desires: so that prudence will neither prefer nor equal any good to God; fortitude will adhere to Him most steadfastly; and temperance will delight in Him Who knows no imperfection.” As to justice, it is yet more evident what will be its act in that life, viz. “to be subject to God”: because even in this life subjection to a superior is part of justice.

Reply to Objection 1. The Philosopher is speaking there of these moral virtues, as to their material element; thus he speaks of justice, as regards “commutations and distributions”; of fortitude, as to “matters of terror and danger”; of temperance, in respect of “lewd desires.”

The same applies to the Second Objection. For those things that concern the active life, belong to the material element of the virtues.

Reply to Objection 3. There is a twofold state after this life; one before the resurrection, during which the soul will be separate from the body; the other, after the resurrection, when the souls will be reunited to their bodies. In this state of resurrection, the irrational powers will be in the bodily organs, just as they now are. Hence it will be possible for fortitude to be in the irascible, and temperance in the concupiscible part, in so far as each power will be perfectly disposed to obey the reason. But in the state preceding the resurrection, the irrational parts will not be in the soul actually, but only radically in its essence, as stated in the Ia, q. 77, a. 8. Wherefore neither will these virtues be actually, but only in their root, i.e. in the reason and will, wherein are certain nurseries of these virtues, as stated above (q. 63, a. 1). Justice, however, will remain because it is in the will. Hence of justice it is specially said that it is “perpetual and immortal”; both by reason of its subject, since the will is incorruptible; and because its act will not change, as stated.

* “Whatever relates to moral action is petty, and unworthy of the gods” (Ethic. x, 8)

Objection 1. It would seem that the intellectual virtues do not remain after this life. For the Apostle says (1 Cor. 13:8,9) that “knowledge shall be destroyed,” and he states the reason to be because “we know in part.” Now just as the knowledge of science is in part, i.e. imperfect; so also is the knowledge of the other intellectual virtues, as long as this life lasts. Therefore all the intellectual virtues will cease after this life.

Objection 2. Further, the Philosopher says (Categor. vi) that since science is a habit, it is a quality difficult to remove: for it is not easily lost, except by reason of some great change or sickness. But no bodily change is so great as that of death. Therefore science and the other intellectual virtues do not remain after death.

Objection 3. Further, the intellectual virtues perfect the intellect so that it may perform its proper act well. Now there seems to be no act of the intellect after this life, since “the soul understands nothing without a phantasm” (De Anima iii, text. 30); and, after this life, the phantasms do not remain, since their only subject is an organ of the body. Therefore the intellectual virtues do not remain after this life.

On the contrary, The knowledge of what is universal and necessary is more constant than that of particular and contingent things. Now the knowledge of contingent particulars remains in man after this life; for instance, the knowledge of what one has done or suffered, according to Lk. 16:25: “Son, remember that thou didst receive good things in thy life-time, and likewise Lazarus evil things.” Much more, therefore, does the knowledge of universal and necessary things remain, which belong to science and the other intellectual virtues.

I answer that, As stated in the Ia, q. 79, a. 6 some have held that the intelligible species do not remain in the passive intellect except when it actually understands; and that so long as actual consideration ceases, the species are not preserved save in the sensitive powers which are acts of bodily organs, viz. in the powers of imagination and memory. Now these powers cease when the body is corrupted: and consequently, accord-

ing to this opinion, neither science nor any other intellectual virtue will remain after this life when once the body is corrupted.

But this opinion is contrary to the mind of Aristotle, who states (De Anima iii, text. 8) that “the possible intellect is in act when it is identified with each thing as knowing it; and yet, even then, it is in potentiality to consider it actually.” It is also contrary to reason, because intelligible species are contained by the “possible” intellect immovably, according to the mode of their container. Hence the “possible” intellect is called “the abode of the species” (De Anima iii) because it preserves the intelligible species.

And yet the phantasms, by turning to which man understands in this life, by applying the intelligible species to them as stated in the Ia, q. 84, a. 7; Ia, q. 85, a. 1, ad 5, cease as soon as the body is corrupted. Hence, so far as the phantasms are concerned, which are the quasi-material element in the intellectual virtues, these latter cease when the body is destroyed: but as regards the intelligible species, which are in the “possible” intellect, the intellectual virtues remain. Now the species are the quasi-formal element of the intellectual virtues. Therefore these remain after this life, as regards their formal element, just as we have stated concerning the moral virtues (a. 1).

Reply to Objection 1. The saying of the Apostle is to be understood as referring to the material element in science, and to the mode of understanding; because, to it, neither do the phantasms remain, when the body is destroyed; nor will science be applied by turning to the phantasms.

Reply to Objection 2. Sickness destroys the habit of science as to its material element, viz. the phantasms, but not as to the intelligible species, which are in the “possible” intellect.

Reply to Objection 3. As stated in the Ia, q. 89, a. 1 the separated soul has a mode of understanding, other than by turning to the phantasms. Consequently science remains, yet not as to the same mode of operation; as we have stated concerning the moral virtues (a. 1).

Objection 1. It would seem that faith remains after this life. Because faith is more excellent than science. Now science remains after this life, as stated above (a. 2). Therefore faith remains also.

Objection 2. Further, it is written (1 Cor. 3:11): “Other foundation no man can lay, but that which is laid; which is Christ Jesus,” i.e. faith in Jesus Christ. Now if the foundation is removed, that which is built upon it remains no more. Therefore, if faith remains not after this life, no other virtue remains.

Objection 3. Further, the knowledge of faith and the knowledge of glory differ as perfect from imperfect. Now imperfect knowledge is compatible with perfect knowledge: thus in an angel there can be “evening” and “morning” knowledge*; and a man can have science through a demonstrative syllogism, together with opinion through a probable syllogism, about one same conclusion. Therefore after this life faith also is compatible with the knowledge of glory.

On the contrary, The Apostle says (2 Cor. 5:6,7): “While we are in the body, we are absent from the Lord: for we walk by faith and not by sight.” But those who are in glory are not absent from the Lord, but present to Him. Therefore after this life faith does not remain in the life of glory.

I answer that, Opposition is of itself the proper cause of one thing being excluded from another, in so far, to wit, as wherever two things are opposite to one another, we find opposition of affirmation and negation. Now in some things we find opposition in respect of contrary forms; thus in colors we find white and black. In others we find opposition in respect of perfection and imperfection: wherefore in alterations, more and less are considered to be contraries, as when a thing from being less hot is made more hot (Phys. v, text. 19). And since perfect and imperfect are opposite to one another, it is impossible for perfection and imperfection to affect the same thing at the same time.

Now we must take note that sometimes imperfection belongs to a thing’s very nature, and belongs to its species: even as lack of reason belongs to the very specific nature of a horse and an ox. And since a thing, so long as it remains the same identically, cannot pass from one species to another, it follows that if such an imperfection be removed, the species of that thing is changed: even as it would no longer be an ox or a horse, were it to be rational. Sometimes, however, the imperfection does not belong to the specific nature, but is accidental to the individual by reason of something else; even as sometimes lack of reason is accidental to a man, because he is asleep, or because he is drunk, or for some like reason; and it is evident, that if such an imperfection be removed, the thing remains substantially.

Now it is clear that imperfect knowledge belongs to the very nature of faith: for it is included in its defini-

tion; faith being defined as “the substance of things to be hoped for, the evidence of things that appear not” (Heb. 11:1). Wherefore Augustine says (Tract. xl in Joan.): “Where is faith? Believing without seeing.” But it is an imperfect knowledge that is of things unapparent or unseen. Consequently imperfect knowledge belongs to the very nature of faith: therefore it is clear that the knowledge of faith cannot be perfect and remain identically the same.

But we must also consider whether it is compatible with perfect knowledge: for there is nothing to prevent some kind of imperfect knowledge from being sometimes with perfect knowledge. Accordingly we must observe that knowledge can be imperfect in three ways: first, on the part of the knowable object; secondly, on the part of the medium; thirdly, on the part of the subject. The difference of perfect and imperfect knowledge on the part of the knowable object is seen in the “morning” and “evening” knowledge of the angels: for the “morning” knowledge is about things according to the being which they have in the Word, while the “evening” knowledge is about things according as they have being in their own natures, which being is imperfect in comparison with the First Being. On the part of the medium, perfect and imperfect knowledge are exemplified in the knowledge of a conclusion through a demonstrative medium, and through a probable medium. On the part of the subject the difference of perfect and imperfect knowledge applies to opinion, faith, and science. For it is essential to opinion that we assent to one of two opposite assertions with fear of the other, so that our adhesion is not firm: to science it is essential to have firm adhesion with intellectual vision, for science possesses certitude which results from the understanding of principles: while faith holds a middle place, for it surpasses opinion in so far as its adhesion is firm, but falls short of science in so far as it lacks vision.

Now it is evident that a thing cannot be perfect and imperfect in the same respect; yet the things which differ as perfect and imperfect can be together in the same respect in one and the same other thing. Accordingly, knowledge which is perfect on the part of the object is quite incompatible with imperfect knowledge about the same object; but they are compatible with one another in respect of the same medium or the same subject: for nothing hinders a man from having at one and the same time, through one and the same medium, perfect and imperfect knowledge about two things, one perfect, the other imperfect, e.g. about health and sickness, good and evil. In like manner knowledge that is perfect on the part of the medium is incompatible with imperfect knowledge through one and the same medium: but nothing hinders them being about the same subject or in the same subject: for one man can know the same conclusions through a probable and through a demon-

* Cf. Ia, q. 58, a. 6

strative medium. Again, knowledge that is perfect on the part of the subject is incompatible with imperfect knowledge in the same subject. Now faith, of its very nature, contains an imperfection on the part of the subject, viz. that the believer sees not what he believes: whereas bliss, of its very nature, implies perfection on the part of the subject, viz. that the Blessed see that which makes them happy, as stated above (q. 3, a. 8). Hence it is manifest that faith and bliss are incompatible in one and the same subject.

Reply to Objection 1. Faith is more excellent than

science, on the part of the object, because its object is the First Truth. Yet science has a more perfect mode of knowing its object, which is not incompatible with vision which is the perfection of happiness, as the mode of faith is incompatible.

Reply to Objection 2. Faith is the foundation in as much as it is knowledge: consequently when this knowledge is perfected, the foundation will be perfected also.

The Reply to the Third Objection is clear from what has been said.

Objection 1. It would seem that hope remains after death, in the state of glory. Because hope perfects the human appetite in a more excellent manner than the moral virtues. But the moral virtues remain after this life, as Augustine clearly states (*De Trin.* xiv, 9). Much more then does hope remain.

Objection 2. Further, fear is opposed to hope. But fear remains after this life: in the Blessed, filial fear, which abides for ever—in the lost, the fear of punishment. Therefore, in a like manner, hope can remain.

Objection 3. Further, just as hope is of future good, so is desire. Now in the Blessed there is desire for future good; both for the glory of the body, which the souls of the Blessed desire, as Augustine declares (*Gen.* ad lit. xii, 35); and for the glory of the soul, according to *Ecclus.* 24:29: “They that eat me, shall yet hunger, and they that drink me, shall yet thirst,” and *1 Pet.* 1:12: “On Whom the angels desire to look.” Therefore it seems that there can be hope in the Blessed after this life is past.

On the contrary, The Apostle says (*Rom.* 8:24): “What a man seeth, why doth he hope for?” But the Blessed see that which is the object of hope, viz. God. Therefore they do not hope.

I answer that, As stated above (a. 3), that which, in its very nature, implies imperfection of its subject, is incompatible with the opposite perfection in that subject. Thus it is evident that movement of its very nature implies imperfection of its subject, since it is “the act of that which is in potentiality as such” (*Phys.* iii): so that as soon as this potentiality is brought into act, the movement ceases; for a thing does not continue to become white, when once it is made white. Now hope denotes a movement towards that which is not possessed, as is clear from what we have said above about the passion of hope (q. 40, Aa. 1,2). Therefore when we possess that which we hope for, viz. the enjoyment of God, it will no longer be possible to have hope.

Reply to Objection 1. Hope surpasses the moral virtues as to its object, which is God. But the acts of the moral virtues are not incompatible with the perfection of happiness, as the act of hope is; except perhaps, as regards their matter, in respect of which they do not remain. For moral virtue perfects the appetite, not only in respect of what is not yet possessed, but also as regards something which is in our actual possession.

Reply to Objection 2. Fear is twofold, servile and filial, as we shall state further on (*Ia IIae*, q. 19, a. 2). Servile fear regards punishment, and will be impossible in the life of glory, since there will no longer be possibility of being punished. Filial fear has two acts: one is an act of reverence to God, and with regard to this act, it remains: the other is an act of fear lest we be separated from God, and as regards this act, it does not remain. Because separation from God is in the nature of an evil: and no evil will be feared there, according to *Prov.* 1:33: “He... shall enjoy abundance without fear of evils.” Now fear is opposed to hope by opposition of good and evil, as stated above (q. 23, a. 2; q. 40, a. 1), and therefore the fear which will remain in glory is not opposed to hope. In the lost there can be fear of punishment, rather than hope of glory in the Blessed. Because in the lost there will be a succession of punishments, so that the notion of something future remains there, which is the object of fear: but the glory of the saints has no succession, by reason of its being a kind of participation of eternity, wherein there is neither past nor future, but only the present. And yet, properly speaking, neither in the lost is there fear. For, as stated above (q. 42, a. 2), fear is never without some hope of escape: and the lost have no such hope. Consequently neither will there be fear in them; except speaking in a general way, in so far as any expectation of future evil is called fear.

Reply to Objection 3. As to the glory of the soul, there can be no desire in the Blessed, in so far as desire looks for something future, for the reason already given (ad 2). Yet hunger and thirst are said to be in them because they never weary, and for the same reason desire is said to be in the angels. With regard to the glory of the body, there can be desire in the souls of the saints, but not hope, properly speaking; neither as a theological virtue, for thus its object is God, and not a created good; nor in its general signification. Because the object of hope is something difficult, as stated above (q. 40, a. 1): while a good whose unerring cause we already possess, is not compared to us as something difficult. Hence he that has money is not, properly speaking, said to hope for what he can buy at once. In like manner those who have the glory of the soul are not, properly speaking, said to hope for the glory of the body, but only to desire it.

Objection 1. It would seem that something of faith and hope remains in glory. For when that which is proper to a thing is removed, there remains what is common; thus it is stated in *De Causis* that “if you take away rational, there remains living, and when you remove living, there remains being.” Now in faith there is something that it has in common with beatitude, viz. knowledge: and there is something proper to it, viz. darkness, for faith is knowledge in a dark manner. Therefore, the darkness of faith removed, the knowledge of faith still remains.

Objection 2. Further, faith is a spiritual light of the soul, according to Eph. 1:17,18: “The eyes of your heart enlightened. . . in the knowledge of God”; yet this light is imperfect in comparison with the light of glory, of which it is written (Ps. 35:10): “In Thy light we shall see light.” Now an imperfect light remains when a perfect light supervenes: for a candle is not extinguished when the sun’s rays appear. Therefore it seems that the light of faith itself remains with the light of glory.

Objection 3. Further, the substance of a habit does not cease through the withdrawal of its matter: for a man may retain the habit of liberality, though he have lost his money: yet he cannot exercise the act. Now the object of faith is the First Truth as unseen. Therefore when this ceases through being seen, the habit of faith can still remain.

On the contrary, Faith is a simple habit. Now a simple thing is either withdrawn entirely, or remains entirely. Since therefore faith does not remain entirely, but is taken away as stated above (a. 3), it seems that it is withdrawn entirely.

I answer that, Some have held that hope is taken away entirely: but that faith is taken away in part, viz. as to its obscurity, and remains in part, viz. as to the substance of its knowledge. And if this be understood to mean that it remains the same, not identically but generically, it is absolutely true; since faith is of the same genus, viz. knowledge, as the beatific vision. On the other hand, hope is not of the same genus as heavenly bliss: because it is compared to the enjoyment of bliss, as movement is to rest in the term of movement.

But if it be understood to mean that in heaven the knowledge of faith remains identically the same, this is absolutely impossible. Because when you remove a specific difference, the substance of the genus does not remain identically the same: thus if you remove the difference constituting whiteness, the substance of

color does not remain identically the same, as though the identical color were at one time whiteness, and, at another, blackness. The reason is that genus is not related to difference as matter to form, so that the substance of the genus remains identically the same, when the difference is removed, as the substance of matter remains identically the same, when the form is changed: for genus and difference are not the parts of a species, else they would not be predicated of the species. But even as the species denotes the whole, i.e. the compound of matter and form in material things, so does the difference, and likewise the genus; the genus denotes the whole by signifying that which is material; the difference, by signifying that which is formal; the species, by signifying both. Thus, in man, the sensitive nature is as matter to the intellectual nature, and animal is predicated of that which has a sensitive nature, rational of that which has an intellectual nature, and man of that which has both. So that the one same whole is denoted by these three, but not under the same aspect.

It is therefore evident that, since the signification of the difference is confined to the genus if the difference be removed, the substance of the genus cannot remain the same: for the same animal nature does not remain, if another kind of soul constitute the animal. Hence it is impossible for the identical knowledge, which was previously obscure, to become clear vision. It is therefore evident that, in heaven, nothing remains of faith, either identically or specifically the same, but only generically.

Reply to Objection 1. If “rational” be withdrawn, the remaining “living” thing is the same, not identically, but generically, as stated.

Reply to Objection 2. The imperfection of candlelight is not opposed to the perfection of sunlight, since they do not regard the same subject: whereas the imperfection of faith and the perfection of glory are opposed to one another and regard the same subject. Consequently they are incompatible with one another, just as light and darkness in the air.

Reply to Objection 3. He that loses his money does not therefore lose the possibility of having money, and therefore it is reasonable for the habit of liberality to remain. But in the state of glory not only is the object of faith, which is the unseen, removed actually, but even its possibility, by reason of the unchangeableness of heavenly bliss: and so such a habit would remain to no purpose.

Objection 1. It would seem that charity does not remain after this life, in glory. Because according to 1 Cor. 13:10, “when that which is perfect is come, that which is in part,” i.e. that which is imperfect, “shall be done away.” Now the charity of the wayfarer is imperfect. Therefore it will be done away when the perfection of glory is attained.

Objection 2. Further, habits and acts are differentiated by their objects. But the object of love is good apprehended. Since therefore the apprehension of the present life differs from the apprehension of the life to come, it seems that charity is not the same in both cases.

Objection 3. Further, things of the same kind can advance from imperfection to perfection by continuous increase. But the charity of the wayfarer can never attain to equality with the charity of heaven, however much it be increased. Therefore it seems that the charity of the wayfarer does not remain in heaven.

On the contrary, The Apostle says (1 Cor. 13:8): “Charity never falleth away.”

I answer that, As stated above (a. 3), when the imperfection of a thing does not belong to its specific nature, there is nothing to hinder the identical thing passing from imperfection to perfection, even as man is per-

fectured by growth, and whiteness by intensity. Now charity is love, the nature of which does not include imperfection, since it may relate to an object either possessed or not possessed, either seen or not seen. Therefore charity is not done away by the perfection of glory, but remains identically the same.

Reply to Objection 1. The imperfection of charity is accidental to it; because imperfection is not included in the nature of love. Now although that which is accidental to a thing be withdrawn, the substance remains. Hence the imperfection of charity being done away, charity itself is not done away.

Reply to Objection 2. The object of charity is not knowledge itself; if it were, the charity of the wayfarer would not be the same as the charity of heaven: its object is the thing known, which remains the same, viz. God Himself.

Reply to Objection 3. The reason why charity of the wayfarer cannot attain to the perfection of the charity of heaven, is a difference on the part of the cause: for vision is a cause of love, as stated in Ethic. ix, 5: and the more perfectly we know God, the more perfectly we love Him.

FIRST PART OF THE SECOND PART, QUESTION 68

Of the Gifts (In Eight Articles)

We now come to consider the Gifts; under which head there are eight points of inquiry:

- (1) Whether the Gifts differ from the virtues?
- (2) Of the necessity of the Gifts?
- (3) Whether the Gifts are habits?
- (4) Which, and how many are they?
- (5) Whether the Gifts are connected?
- (6) Whether they remain in heaven?
- (7) Of their comparison with one another;
- (8) Of their comparison with the virtues.

Whether the Gifts differ from the virtues?

Ia IIae q. 68 a. 1

Objection 1. It would seem that the gifts do not differ from the virtues. For Gregory commenting on Job 1:2, “There were born to him seven sons,” says (Moral. i, 12): “Seven sons were born to us, when through the conception of heavenly thought, the seven virtues of the Holy Ghost take birth in us”: and he quotes the words of Is. 11:2,3: “And the Spirit... of understanding... shall rest upon him,” etc. where the seven gifts of the Holy Ghost are enumerated. Therefore the seven gifts of the Holy Ghost are virtues.

Objection 2. Further, Augustine commenting on Mat. 12:45, “Then he goeth and taketh with him seven other spirits,” etc., says (De Quaest. Evang. i, qu. 8): “The seven vices are opposed to the seven virtues of the Holy Ghost,” i.e. to the seven gifts. Now the seven vices are opposed to the seven virtues, commonly so called. Therefore the gifts do not differ from the virtues commonly so called.

Objection 3. Further, things whose definitions are the same, are themselves the same. But the definition of virtue applies to the gifts; for each gift is “a good quality of the mind, whereby we lead a good life,” etc.*. Likewise the definition of a gift can apply to the infused virtues: for a gift is “an unreturnable giving,” according to the Philosopher (Topic. iv, 4). Therefore the virtues and gifts do not differ from one another.

Objection 4. Several of the things mentioned among the gifts, are virtues: for, as stated above (q. 57, a. 2), wisdom, understanding, and knowledge are intellectual virtues, counsel pertains to prudence, piety to a kind of justice, and fortitude is a moral virtue. Therefore it seems that the gifts do not differ from the virtues.

On the contrary, Gregory (Moral. i, 12) distinguishes seven gifts, which he states to be denoted by the seven sons of Job, from the three theological virtues, which, he says, are signified by Job’s three daughters. He also distinguishes (Moral. ii, 26) the same seven gifts from the four cardinal virtues, which he says were signified by the four corners of the house.

I answer that, If we speak of gift and virtue with regard to the notion conveyed by the words themselves, there is no opposition between them. Because the word “virtue” conveys the notion that it perfects man in relation to well-doing, while the word “gift” refers to the cause from which it proceeds. Now there is no reason why that which proceeds from one as a gift should not perfect another in well-doing: especially as we have already stated (q. 63, a. 3) that some virtues are infused into us by God. Wherefore in this respect we cannot differentiate gifts from virtues. Consequently some have held that the gifts are not to be distinguished from the virtues. But there remains no less a difficulty for them to solve; for they must explain why some virtues are called gifts and some not; and why among the gifts there are some, fear, for instance, that are not reckoned virtues.

Hence it is that others have said that the gifts should be held as being distinct from the virtues; yet they have not assigned a suitable reason for this distinction, a reason, to wit, which would apply either to all the virtues, and to none of the gifts, or vice versa. For, seeing that of the seven gifts, four belong to the reason, viz. wisdom, knowledge, understanding and counsel, and three to the appetite, viz. fortitude, piety and fear; they held that the gifts perfect the free-will according as it is a faculty of the reason, while the virtues perfect it as a faculty of the will: since they observed only two virtues in the reason or intellect, viz. faith and prudence, the others being in the appetitive power or the affections. If this distinction were true, all the virtues would have to be in the appetite, and all the gifts in the reason.

Others observing that Gregory says (Moral. ii, 26) that “the gift of the Holy Ghost, by coming into the soul endows it with prudence, temperance, justice, and fortitude, and at the same time strengthens it against every kind of temptation by His sevenfold gift,” said that the virtues are given us that we may do good works, and the gifts, that we may resist temptation. But neither is this distinction sufficient. Because the virtues also resist

* Cf. q. 55, a. 4

those temptations which lead to the sins that are contrary to the virtues; for everything naturally resists its contrary: which is especially clear with regard to charity, of which it is written (Cant 8:7): “Many waters cannot quench charity.”

Others again, seeing that these gifts are set down in Holy Writ as having been in Christ, according to Is. 11:2,3, said that the virtues are given simply that we may do good works, but the gifts, in order to conform us to Christ, chiefly with regard to His Passion, for it was then that these gifts shone with the greatest splendor. Yet neither does this appear to be a satisfactory distinction. Because Our Lord Himself wished us to be conformed to Him, chiefly in humility and meekness, according to Mat. 11:29: “Learn of Me, because I am meek and humble of heart,” and in charity, according to Jn. 15:12: “Love one another, as I have loved you.” Moreover, these virtues were especially resplendent in Christ’s Passion.

Accordingly, in order to differentiate the gifts from the virtues, we must be guided by the way in which Scripture expresses itself, for we find there that the term employed is “spirit” rather than “gift.” For thus it is written (Is. 11:2,3): “The spirit... of wisdom and of understanding... shall rest upon him,” etc.: from which words we are clearly given to understand that these seven are there set down as being in us by Divine inspiration. Now inspiration denotes motion from without. For it must be noted that in man there is a twofold principle of movement, one within him, viz. the reason; the other extrinsic to him, viz. God, as stated above (q. 9, Aa. 4,6): moreover the Philosopher says this in the chapter On Good Fortune (Ethic. Eudem. vii, 8).

Now it is evident that whatever is moved must be proportionate to its mover: and the perfection of the mobile as such, consists in a disposition whereby it is disposed to be well moved by its mover. Hence the more exalted the mover, the more perfect must be the disposition whereby the mobile is made proportionate to its mover: thus we see that a disciple needs a more perfect disposition in order to receive a higher teaching from his master. Now it is manifest that human virtues perfect man according as it is natural for him to be moved by his reason in his interior and exterior actions. Con-

sequently man needs yet higher perfections, whereby to be disposed to be moved by God. These perfections are called gifts, not only because they are infused by God, but also because by them man is disposed to become amenable to the Divine inspiration, according to Is. 50:5: “The Lord... hath opened my ear, and I do not resist; I have not gone back.” Even the Philosopher says in the chapter On Good Fortune (Ethic. Eudem., vii, 8) that for those who are moved by Divine instinct, there is no need to take counsel according to human reason, but only to follow their inner promptings, since they are moved by a principle higher than human reason. This then is what some say, viz. that the gifts perfect man for acts which are higher than acts of virtue.

Reply to Objection 1. Sometimes these gifts are called virtues, in the broad sense of the word. Nevertheless, they have something over and above the virtues understood in this broad way, in so far as they are Divine virtues, perfecting man as moved by God. Hence the Philosopher (Ethic. vii, 1) above virtue commonly so called, places a kind of “heroic” or “divine virtue*,” in respect of which some men are called “divine.”

Reply to Objection 2. The vices are opposed to the virtues, in so far as they are opposed to the good as appointed by reason; but they are opposed to the gifts, in as much as they are opposed to the Divine instinct. For the same thing is opposed both to God and to reason, whose light flows from God.

Reply to Objection 3. This definition applies to virtue taken in its general sense. Consequently, if we wish to restrict it to virtue as distinguished from the gifts, we must explain the words, “whereby we lead a good life” as referring to the rectitude of life which is measured by the rule of reason. Likewise the gifts, as distinct from infused virtue, may be defined as something given by God in relation to His motion; something, to wit, that makes man to follow well the promptings of God.

Reply to Objection 4. Wisdom is called an intellectual virtue, so far as it proceeds from the judgment of reason: but it is called a gift, according as its work proceeds from the Divine prompting. The same applies to the other virtues.

Whether the gifts are necessary to man for salvation?

Ia IIae q. 68 a. 2

Objection 1. It would seem that the gifts are not necessary to man for salvation. Because the gifts are ordained to a perfection surpassing the ordinary perfection of virtue. Now it is not necessary for man’s salvation that he should attain to a perfection surpassing the ordinary standard of virtue; because such perfection falls, not under the precept, but under a counsel. Therefore the gifts are not necessary to man for salvation.

Objection 2. Further, it is enough, for man’s salva-

tion, that he behave well in matters concerning God and matters concerning man. Now man’s behavior to God is sufficiently directed by the theological virtues; and his behavior towards men, by the moral virtues. Therefore gifts are not necessary to man for salvation.

Objection 3. Further, Gregory says (Moral. ii, 26) that “the Holy Ghost gives wisdom against folly, understanding against dullness, counsel against rashness, fortitude against fears, knowledge against ignorance, piety

* *arete heroike kai theia*

against hardness of our heart, and fear against pride.” But a sufficient remedy for all these things is to be found in the virtues. Therefore the gifts are not necessary to man for salvation.

On the contrary, Of all the gifts, wisdom seems to be the highest, and fear the lowest. Now each of these is necessary for salvation: since of wisdom it is written (Wis. 7:28): “God loveth none but him that dwelleth with wisdom”; and of fear (Ecclus. 1:28): “He that is without fear cannot be justified.” Therefore the other gifts that are placed between these are also necessary for salvation.

I answer that, As stated above (a. 1), the gifts are perfections of man, whereby he is disposed so as to be amenable to the promptings of God. Wherefore in those matters where the prompting of reason is not sufficient, and there is need for the prompting of the Holy Ghost, there is, in consequence, need for a gift.

Now man’s reason is perfected by God in two ways: first, with its natural perfection, to wit, the natural light of reason; secondly, with a supernatural perfection, to wit, the theological virtues, as stated above (q. 62, a. 1). And, though this latter perfection is greater than the former, yet the former is possessed by man in a more perfect manner than the latter: because man has the former in his full possession, whereas he possesses the latter imperfectly, since we love and know God imperfectly. Now it is evident that anything that has a nature or a form or a virtue perfectly, can of itself work according to them: not, however, excluding the operation of God, Who works inwardly in every nature and in every will. On the other hand, that which has a nature, or form, or virtue imperfectly, cannot of itself work, unless it be moved by another. Thus the sun which possesses light perfectly, can shine by itself; whereas the moon which has the nature of light imperfectly, sheds only a borrowed light. Again, a physician, who knows the medical art perfectly, can work by himself; but his pupil, who is not yet fully instructed, cannot work by himself, but needs to receive instructions from him.

Accordingly, in matters subject to human reason,

and directed to man’s connatural end, man can work through the judgment of his reason. If, however, even in these things man receive help in the shape of special promptings from God, this will be out of God’s superabundant goodness: hence, according to the philosophers, not every one that had the acquired moral virtues, had also the heroic or divine virtues. But in matters directed to the supernatural end, to which man’s reason moves him, according as it is, in a manner, and imperfectly, informed by the theological virtues, the motion of reason does not suffice, unless it receive in addition the prompting or motion of the Holy Ghost, according to Rom. 8:14,17: “Whosoever are led by the Spirit of God, they are sons of God. . . and if sons, heirs also”: and Ps. 142:10: “Thy good Spirit shall lead me into the right land,” because, to wit, none can receive the inheritance of that land of the Blessed, except he be moved and led thither by the Holy Ghost. Therefore, in order to accomplish this end, it is necessary for man to have the gift of the Holy Ghost.

Reply to Objection 1. The gifts surpass the ordinary perfection of the virtues, not as regards the kind of works (as the counsels surpass the commandments), but as regards the manner of working, in respect of man being moved by a higher principle.

Reply to Objection 2. By the theological and moral virtues, man is not so perfected in respect of his last end, as not to stand in continual need of being moved by the yet higher promptings of the Holy Ghost, for the reason already given.

Reply to Objection 3. Whether we consider human reason as perfected in its natural perfection, or as perfected by the theological virtues, it does not know all things, nor all possible things. Consequently it is unable to avoid folly and other like things mentioned in the objection. God, however, to Whose knowledge and power all things are subject, by His motion safeguards us from all folly, ignorance, dullness of mind and hardness of heart, and the rest. Consequently the gifts of the Holy Ghost, which make us amenable to His promptings, are said to be given as remedies to these defects.

Whether the gifts of the Holy Ghost are habits?

Ia IIae q. 68 a. 3

Objection 1. It would seem that the gifts of the Holy Ghost are not habits. Because a habit is a quality abiding in man, being defined as “a quality difficult to remove,” as stated in the Predicaments (Categor. vi). Now it is proper to Christ that the gifts of the Holy Ghost rest in Him, as stated in Is. 11:2,3: “He upon Whom thou shalt see the Spirit descending and remaining upon Him, He it is that baptizeth”; on which words Gregory comments as follows (Moral. ii, 27): “The Holy Ghost comes upon all the faithful; but, in a singular way, He dwells always in the Mediator.” Therefore the gifts of the Holy Ghost are not habits.

Objection 2. Further, the gifts of the Holy Ghost

perfect man according as he is moved by the Spirit of God, as stated above (Aa. 1,2). But in so far as man is moved by the Spirit of God, he is somewhat like an instrument in His regard. Now to be perfected by a habit is befitting, not an instrument, but a principal agent. Therefore the gifts of the Holy Ghost are not habits.

Objection 3. Further, as the gifts of the Holy Ghost are due to Divine inspiration, so is the gift of prophecy. Now prophecy is not a habit: for “the spirit of prophecy does not always reside in the prophets,” as Gregory states (Hom. i in Ezechiel). Neither, therefore, are the gifts of the Holy Ghost.

On the contrary, Our Lord in speaking of the Holy

Ghost said to His disciples (Jn. 14:17): "He shall abide with you, and shall be in you." Now the Holy Ghost is not in a man without His gifts. Therefore His gifts abide in man. Therefore they are not merely acts or passions but abiding habits.

I answer that, As stated above (a. 1), the gifts are perfections of man, whereby he becomes amenable to the promptings of the Holy Ghost. Now it is evident from what has been already said (q. 56, a. 4; q. 58, a. 2), that the moral virtues perfect the appetitive power according as it partakes somewhat of the reason, in so far, to wit, as it has a natural aptitude to be moved by the command of reason. Accordingly the gifts of the Holy Ghost, as compared with the Holy Ghost Himself, are related to man, even as the moral virtues, in comparison with the reason, are related to the appetitive power. Now the moral virtues are habits, whereby the powers of appetite are disposed to obey reason promptly. Therefore the gifts of the Holy Ghost are habits whereby man is

perfected to obey readily the Holy Ghost.

Reply to Objection 1. Gregory solves this objection (Moral. ii, 27) by saying that "by those gifts without which one cannot obtain life, the Holy Ghost ever abides in all the elect, but not by His other gifts." Now the seven gifts are necessary for salvation, as stated above (a. 2). Therefore, with regard to them, the Holy Ghost ever abides in holy men.

Reply to Objection 2. This argument holds, in the case of an instrument which has no faculty of action, but only of being acted upon. But man is not an instrument of that kind; for he is so acted upon, by the Holy Ghost, that he also acts himself, in so far as he has a free-will. Therefore he needs a habit.

Reply to Objection 3. Prophecy is one of those gifts which are for the manifestation of the Spirit, not for the necessity of salvation: hence the comparison fails.

Whether the seven gifts of the Holy Ghost are suitably enumerated?

Ia IIae q. 68 a. 4

Objection 1. It would seem that seven gifts of the Holy Ghost are unsuitably enumerated. For in that enumeration four are set down corresponding to the intellectual virtues, viz. wisdom, understanding, knowledge, and counsel, which corresponds to prudence; whereas nothing is set down corresponding to art, which is the fifth intellectual virtue. Moreover, something is included corresponding to justice, viz. piety, and something corresponding to fortitude, viz. the gift of fortitude; while there is nothing to correspond to temperance. Therefore the gifts are enumerated insufficiently.

Objection 2. Further, piety is a part of justice. But no part of fortitude is assigned to correspond thereto, but fortitude itself. Therefore justice itself, and not piety, ought to have been set down.

Objection 3. Further, the theological virtues, more than any, direct us to God. Since, then, the gifts perfect man according as he is moved by God, it seems that some gifts, corresponding to the theological virtues, should have been included.

Objection 4. Further, even as God is an object of fear, so is He of love, of hope, and of joy. Now love, hope, and joy are passions condivided with fear. Therefore, as fear is set down as a gift, so ought the other three.

Objection 5. Further, wisdom is added in order to direct understanding; counsel, to direct fortitude; knowledge, to direct piety. Therefore, some gift should have been added for the purpose of directing fear. Therefore the seven gifts of the Holy Ghost are unsuitably enumerated.

On the contrary, stands the authority of Holy Writ (Is. 11:2,3).

I answer that, As stated above (a. 3), the gifts are habits perfecting man so that he is ready to follow the

promptings of the Holy Ghost, even as the moral virtues perfect the appetitive powers so that they obey the reason. Now just as it is natural for the appetitive powers to be moved by the command of reason, so it is natural for all the forces in man to be moved by the instinct of God, as by a superior power. Therefore whatever powers in man can be the principles of human actions, can also be the subjects of gifts, even as they are virtues; and such powers are the reason and appetite.

Now the reason is speculative and practical: and in both we find the apprehension of truth (which pertains to the discovery of truth), and judgment concerning the truth. Accordingly, for the apprehension of truth, the speculative reason is perfected by "understanding"; the practical reason, by "counsel." In order to judge aright, the speculative reason is perfected by "wisdom"; the practical reason by "knowledge." The appetitive power, in matters touching a man's relations to another, is perfected by "piety"; in matters touching himself, it is perfected by "fortitude" against the fear of dangers; and against inordinate lust for pleasures, by "fear," according to Prov. 15:27: "By the fear of the Lord every one declineth from evil," and Ps. 118:120: "Pierce Thou my flesh with Thy fear: for I am afraid of Thy judgments." Hence it is clear that these gifts extend to all those things to which the virtues, both intellectual and moral, extend.

Reply to Objection 1. The gifts of the Holy Ghost perfect man in matters concerning a good life: whereas art is not directed to such matters, but to external things that can be made, since art is the right reason, not about things to be done, but about things to be made (Ethic. vi, 4). However, we may say that, as regards the infusion of the gifts, the art is on the part of the Holy Ghost, Who is the principal mover, and not on the part of men,

who are His organs when He moves them. The gift of fear corresponds, in a manner, to temperance: for just as it belongs to temperance, properly speaking, to restrain man from evil pleasures for the sake of the good appointed by reason, so does it belong to the gift of fear, to withdraw man from evil pleasures through fear of God.

Reply to Objection 2. Justice is so called from the rectitude of the reason, and so it is more suitably called a virtue than a gift. But the name of piety denotes the reverence which we give to our father and to our country. And since God is the Father of all, the worship of God is also called piety, as Augustine states (*De Civ. Dei* x, 1). Therefore the gift whereby a man, through reverence for God, works good to all, is fittingly called piety.

Reply to Objection 3. The mind of man is not moved by the Holy Ghost, unless in some way it be united to Him: even as the instrument is not moved by the craftsman, unless there be contact or some other kind of union between them. Now the primal union of man with God is by faith, hope and charity: and, con-

sequently, these virtues are presupposed to the gifts, as being their roots. Therefore all the gifts correspond to these three virtues, as being derived therefrom.

Reply to Objection 4. Love, hope and joy have good for their object. Now God is the Sovereign Good: wherefore the names of these passions are transferred to the theological virtues which unite man to God. On the other hand, the object of fear is evil, which can no-wise apply to God: hence fear does not denote union with God, but withdrawal from certain things through reverence for God. Hence it does not give its name to a theological virtue, but to a gift, which withdraws us from evil, for higher motives than moral virtue does.

Reply to Objection 5. Wisdom directs both the intellect and the affections of man. Hence two gifts are set down as corresponding to wisdom as their directing principle; on the part of the intellect, the gift of understanding; on the part of the affections, the gift of fear. Because the principal reason for fearing God is taken from a consideration of the Divine excellence, which wisdom considers.

Whether the gifts of the Holy Ghost are connected?

Ia IIae q. 68 a. 5

Objection 1. It would seem that the gifts are not connected, for the Apostle says (1 Cor. 12:8): “To one... by the Spirit, is given the word of wisdom, and to another, the word of knowledge, according to the same Spirit.” Now wisdom and knowledge are reckoned among the gifts of the Holy Ghost. Therefore the gifts of the Holy Ghost are given to divers men, and are not connected together in the same man.

Objection 2. Further, Augustine says (*De Trin.* xiv, 1) that “many of the faithful have not knowledge, though they have faith.” But some of the gifts, at least the gift of fear, accompany faith. Therefore it seems that the gifts are not necessarily connected together in one and the same man.

Objection 3. Further, Gregory says (*Moral.* i) that wisdom “is of small account if it lack understanding, and understanding is wholly useless if it be not based upon wisdom... Counsel is worthless, when the strength of fortitude is lacking thereto... and fortitude is very weak if it be not supported by counsel... Knowledge is nought if it hath not the use of piety... and piety is very useless if it lack the discernment of knowledge... and assuredly, unless it has these virtues with it, fear itself rises up to the doing of no good action”: from which it seems that it is possible to have one gift without another. Therefore the gifts of the Holy Ghost are not connected.

On the contrary, Gregory prefaces the passage above quoted, with the following remark: “It is worthy of note in this feast of Job’s sons, that by turns they fed one another.” Now the sons of Job, of whom he is speaking, denote the gifts of the Holy Ghost. Therefore the gifts of the Holy Ghost are connected together by strengthening one another.

I answer that, The true answer to this question is easily gathered from what has been already set down. For it has been stated (a. 3) that as the powers of the appetite are disposed by the moral virtues as regards the governance of reason, so all the powers of the soul are disposed by the gifts as regards the motion of the Holy Ghost. Now the Holy Ghost dwells in us by charity, according to Rom. 5:5: “The charity of God is poured forth in our hearts by the Holy Ghost, Who is given to us,” even as our reason is perfected by prudence. Wherefore, just as the moral virtues are united together in prudence, so the gifts of the Holy Ghost are connected together in charity: so that whoever has charity has all the gifts of the Holy Ghost, none of which can one possess without charity.

Reply to Objection 1. Wisdom and knowledge can be considered in one way as gratuitous graces, in so far, to wit, as man so far abounds in the knowledge of things Divine and human, that he is able both to instruct the believer and confound the unbeliever. It is in this sense that the Apostle speaks, in this passage, about wisdom and knowledge: hence he mentions pointedly the “word” of wisdom and the “word” of knowledge. They may be taken in another way for the gifts of the Holy Ghost: and thus wisdom and knowledge are nothing else but perfections of the human mind, rendering it amenable to the promptings of the Holy Ghost in the knowledge of things Divine and human. Consequently it is clear that these gifts are in all who are possessed of charity.

Reply to Objection 2. Augustine is speaking there of knowledge, while expounding the passage of the Apostle quoted above (obj. 1): hence he is referring to

knowledge, in the sense already explained, as a gratuitous grace. This is clear from the context which follows: “For it is one thing to know only what a man must believe in order to gain the blissful life, which is no other than eternal life; and another, to know how to impart this to godly souls, and to defend it against the ungodly, which latter the Apostle seems to have styled by the proper name of knowledge.”

Reply to Objection 3. Just as the connection of the cardinal virtues is proved in one way from the fact

that one is, in a manner, perfected by another, as stated above (q. 65, a. 1); so Gregory wishes to prove the connection of the gifts, in the same way, from the fact that one cannot be perfect without the other. Hence he had already observed that “each particular virtue is to the last degree destitute, unless one virtue lend its support to another.” We are therefore not to understand that one gift can be without another; but that if understanding were without wisdom, it would not be a gift; even as temperance, without justice, would not be a virtue.

Whether the gifts of the Holy Ghost remain in heaven?

Ia IIae q. 68 a. 6

Objection 1. It would seem that the gifts of the Holy Ghost do not remain in heaven. For Gregory says (Moral. ii, 26) that by means of His sevenfold gift the “Holy Ghost instructs the mind against all temptations.” Now there will be no temptations in heaven, according to Is. 11:9: “They shall not hurt, nor shall they kill in all My holy mountain.” Therefore there will be no gifts of the Holy Ghost in heaven.

Objection 2. Further, the gifts of the Holy Ghost are habits, as stated above (a. 3). But habits are of no use, where their acts are impossible. Now the acts of some gifts are not possible in heaven; for Gregory says (Moral. i, 15) that “understanding... penetrates the truths heard... counsel... stays us from acting rashly... fortitude... has no fear of adversity... piety satisfies the inmost heart with deeds of mercy,” all of which are incompatible with the heavenly state. Therefore these gifts will not remain in the state of glory.

Objection 3. Further, some of the gifts perfect man in the contemplative life, e.g. wisdom and understanding; and some in the active life, e.g. piety and fortitude. Now the active life ends with this as Gregory states (Moral. vi). Therefore not all the gifts of the Holy Ghost will be in the state of glory.

On the contrary, Ambrose says (De Spiritu Sancto i, 20): “The city of God, the heavenly Jerusalem is not washed with the waters of an earthly river: it is the Holy Ghost, of Whose outpouring we but taste, Who, proceeding from the Fount of life, seems to flow more abundantly in those celestial spirits, a seething torrent of sevenfold heavenly virtue.”

I answer that, We may speak of the gifts in two ways: first, as to their essence; and thus they will be most perfectly in heaven, as may be gathered from the passage of Ambrose, just quoted. The reason for this is that the gifts of the Holy Ghost render the human mind amenable to the motion of the Holy Ghost: which will be especially realized in heaven, where God will be “all in all” (1 Cor. 15:28), and man entirely subject unto Him. Secondly, they may be considered as regards the matter about which their operations are: and thus, in the present life they have an operation about a matter, in respect of which they will have no operation in the state

of glory. Considered in this way, they will not remain in the state of glory; just as we have stated to be the case with regard to the cardinal virtues (q. 67, a. 1).

Reply to Objection 1. Gregory is speaking there of the gifts according as they are compatible with the present state: for it is thus that they afford us protection against evil temptations. But in the state of glory, where all evil will have ceased, we shall be perfected in good by the gifts of the Holy Ghost.

Reply to Objection 2. Gregory, in almost every gift, includes something that passes away with the present state, and something that remains in the future state. For he says that “wisdom strengthens the mind with the hope and certainty of eternal things”; of which two, hope passes, and certainty remains. Of understanding, he says “that it penetrates the truths heard, refreshing the heart and enlightening its darkness,” of which, hearing passes away, since “they shall teach no more every man... his brother” (Jer. 31:3,4); but the enlightening of the mind remains. Of counsel he says that it “prevents us from being impetuous,” which is necessary in the present life; and also that “it makes the mind full of reason,” which is necessary even in the future state. Of fortitude he says that it “fears not adversity,” which is necessary in the present life; and further, that it “sets before us the viands of confidence,” which remains also in the future life. With regard to knowledge he mentions only one thing, viz. that “she overcomes the void of ignorance,” which refers to the present state. When, however, he adds “in the womb of the mind,” this may refer figuratively to the fulness of knowledge, which belongs to the future state. Of piety he says that “it satisfies the inmost heart with deeds of mercy.” These words taken literally refer only to the present state: yet the inward regard for our neighbor, signified by “the inmost heart,” belongs also to the future state, when piety will achieve, not works of mercy, but fellowship of joy. Of fear he says that “it oppresses the mind, lest it pride itself in present things,” which refers to the present state, and that “it strengthens it with the meat of hope for the future,” which also belongs to the present state, as regards hope, but may also refer to the future state, as regards being “strengthened” for things we hope are here, and obtain there.

Reply to Objection 3. This argument considers the gifts as to their matter. For the matter of the gifts will not be the works of the active life; but all the gifts will

have their respective acts about things pertaining to the contemplative life, which is the life of heavenly bliss.

Whether the gifts are set down by Isaias in their order of dignity?

Ia IIae q. 68 a. 7

Objection 1. It would seem that the gifts are not set down by Isaias in their order of dignity. For the principal gift is, seemingly, that which, more than the others, God requires of man. Now God requires of man fear, more than the other gifts: for it is written (Dt. 10:12): “And now, Israel, what doth the Lord thy God require of thee, but that thou fear the Lord thy God?” and (Malachi 1:6): “If . . . I be a master, where is My fear?” Therefore it seems that fear, which is mentioned last, is not the lowest but the greatest of the gifts.

Objection 2. Further, piety seems to be a kind of common good; since the Apostle says (1 Tim. 4:8): “Piety [Douay: ‘Godliness’] is profitable to all things.” Now a common good is preferable to particular goods. Therefore piety, which is given the last place but one, seems to be the most excellent gift.

Objection 3. Further, knowledge perfects man’s judgment, while counsel pertains to inquiry. But judgment is more excellent than inquiry. Therefore knowledge is a more excellent gift than counsel; and yet it is set down as being below it.

Objection 4. Further, fortitude pertains to the appetitive power, while science belongs to reason. But reason is a more excellent power than the appetite. Therefore knowledge is a more excellent gift than fortitude; and yet the latter is given the precedence. Therefore the gifts are not set down in their order of dignity.

On the contrary, Augustine says*: “It seems to me that the sevenfold operation of the Holy Ghost, of which Isaias speaks, agrees in degrees and expression with these [of which we read in Mat. 5:3]: but there is a difference of order, for there [viz. in Isaias] the enumeration begins with the more excellent gifts, here, with the lower gifts.”

I answer that, The excellence of the gifts can be measured in two ways: first, simply, viz. by comparison to their proper acts as proceeding from their principles; secondly, relatively, viz. by comparison to their matter. If we consider the excellence of the gifts simply, they follow the same rule as the virtues, as to their comparison one with another; because the gifts perfect man for all the acts of the soul’s powers, even as the virtues do, as stated above (a. 4). Hence, as the intellectual virtues have the precedence of the moral virtues, and among the intellectual virtues, the contemplative are preferable to the active, viz. wisdom, understanding and science to prudence and art (yet so that wisdom stands before understanding, and understanding before science, and

prudence and synesis before eubulia): so also among the gifts, wisdom, understanding, knowledge, and counsel are more excellent than piety, fortitude, and fear; and among the latter, piety excels fortitude, and fortitude fear, even as justice surpasses fortitude, and fortitude temperance. But in regard to their matter, fortitude and counsel precede knowledge and piety: because fortitude and counsel are concerned with difficult matters, whereas piety and knowledge regard ordinary matters. Consequently the excellence of the gifts corresponds with the order in which they are enumerated; but so far as wisdom and understanding are given the preference to the others, their excellence is considered simply, while, so far, as counsel and fortitude are preferred to knowledge and piety, it is considered with regard to their matter.

Reply to Objection 1. Fear is chiefly required as being the foundation, so to speak, of the perfection of the other gifts, for “the fear of the Lord is the beginning of wisdom” (Ps. 110:10; Eccus. 1:16), and not as though it were more excellent than the others. Because, in the order of generation, man departs from evil on account of fear (Prov. 16:16), before doing good works, and which result from the other gifts.

Reply to Objection 2. In the words quoted from the Apostle, piety is not compared with all God’s gifts, but only with “bodily exercise,” of which he had said it “is profitable to little.”

Reply to Objection 3. Although knowledge stands before counsel by reason of its judgment, yet counsel is more excellent by reason of its matter: for counsel is only concerned with matters of difficulty (Ethic. iii, 3), whereas the judgment of knowledge embraces all matters.

Reply to Objection 4. The directive gifts which pertain to the reason are more excellent than the executive gifts, if we consider them in relation to their acts as proceeding from their powers, because reason transcends the appetite as a rule transcends the thing ruled. But on the part of the matter, counsel is united to fortitude as the directive power to the executive, and so is knowledge united to piety: because counsel and fortitude are concerned with matters of difficulty, while knowledge and piety are concerned with ordinary matters. Hence counsel together with fortitude, by reason of their matter, are given the preference to knowledge and piety.

* De Serm. Dom. in Monte i, 4

Objection 1. It would seem that the virtues are more excellent than the gifts. For Augustine says (*De Trin.* xv, 18) while speaking of charity: “No gift of God is more excellent than this. It is this alone which divides the children of the eternal kingdom from the children of eternal damnation. Other gifts are bestowed by the Holy Ghost, but, without charity, they avail nothing.” But charity is a virtue. Therefore a virtue is more excellent than the gifts of the Holy Ghost.

Objection 2. Further, that which is first naturally, seems to be more excellent. Now the virtues precede the gifts of the Holy Ghost; for Gregory says (*Moral.* ii, 26) that “the gift of the Holy Ghost in the mind it works on, forms first of all justice, prudence, fortitude, temperance. . . and doth afterwards give it a temper in the seven virtues” [viz. the gifts], so “as against folly to bestow wisdom; against dullness, understanding; against rashness, counsel; against fear, fortitude; against ignorance, knowledge; against hardness of heart, piety; against piety, fear.” Therefore the virtues are more excellent than the gifts.

Objection 3. Further, Augustine says (*De Lib. Arb.* ii, 19) that “the virtues cannot be used to evil purpose.” But it is possible to make evil use of the gifts, for Gregory says (*Moral.* i, 18): “We offer up the sacrifice of prayer. . . lest wisdom may uplift; or understanding, while it runs nimbly, deviate from the right path; or counsel, while it multiplies itself, grow into confusion; that fortitude, while it gives confidence, may not make us rash; lest knowledge, while it knows and yet loves not, may swell the mind; lest piety, while it swerves from the right line, may become distorted; and lest fear, while it is unduly alarmed, may plunge us into the pit of despair.” Therefore the virtues are more excellent than the gifts of the Holy Ghost.

On the contrary, The gifts are bestowed to assist the virtues and to remedy certain defects, as is shown in the passage quoted (obj. 2), so that, seemingly, they accomplish what the virtues cannot. Therefore the gifts are more excellent than the virtues.

I answer that, As was shown above (q. 58, a. 3; q. 62, a. 1), there are three kinds of virtues: for some are theological, some intellectual, and some moral. The theological virtues are those whereby man’s mind is united to God; the intellectual virtues are those whereby reason itself is perfected; and the moral virtues are those which perfect the powers of appetite in obedience to the

reason. On the other hand the gifts of the Holy Ghost dispose all the powers of the soul to be amenable to the Divine motion.

Accordingly the gifts seem to be compared to the theological virtues, by which man is united to the Holy Ghost his Mover, in the same way as the moral virtues are compared to the intellectual virtues, which perfect the reason, the moving principle of the moral virtues. Wherefore as the intellectual virtues are more excellent than the moral virtues and control them, so the theological virtues are more excellent than the gifts of the Holy Ghost and regulate them. Hence Gregory says (*Moral.* i, 12) that “the seven sons,” i.e. the seven gifts, “never attain the perfection of the number ten, unless all they do be done in faith, hope, and charity.”

But if we compare the gifts to the other virtues, intellectual and moral, then the gifts have the precedence of the virtues. Because the gifts perfect the soul’s powers in relation to the Holy Ghost their Mover; whereas the virtues perfect, either the reason itself, or the other powers in relation to reason: and it is evident that the more exalted the mover, the more excellent the disposition whereby the thing moved requires to be disposed. Therefore the gifts are more perfect than the virtues.

Reply to Objection 1. Charity is a theological virtue; and such we grant to be more perfect than the gifts.

Reply to Objection 2. There are two ways in which one thing precedes another. One is in order of perfection and dignity, as love of God precedes love of our neighbor: and in this way the gifts precede the intellectual and moral virtues, but follow the theological virtues. The other is the order of generation or disposition: thus love of one’s neighbor precedes love of God, as regards the act: and in this way moral and intellectual virtues precede the gifts, since man, through being well subordinate to his own reason, is disposed to be rightly subordinate to God.

Reply to Objection 3. Wisdom and understanding and the like are gifts of the Holy Ghost, according as they are quickened by charity, which “dealet not perversely” (1 Cor. 13:4). Consequently wisdom and understanding and the like cannot be used to evil purpose, in so far as they are gifts of the Holy Ghost. But, lest they depart from the perfection of charity, they assist one another. This is what Gregory means to say.

Objection 1. It would seem that the gifts do not differ from the virtues. For Gregory commenting on Job 1:2, “There were born to him seven sons,” says (Moral. i, 12): “Seven sons were born to us, when through the conception of heavenly thought, the seven virtues of the Holy Ghost take birth in us”: and he quotes the words of Is. 11:2,3: “And the Spirit... of understanding... shall rest upon him,” etc. where the seven gifts of the Holy Ghost are enumerated. Therefore the seven gifts of the Holy Ghost are virtues.

Objection 2. Further, Augustine commenting on Mat. 12:45, “Then he goeth and taketh with him seven other spirits,” etc., says (De Quaest. Evang. i, qu. 8): “The seven vices are opposed to the seven virtues of the Holy Ghost,” i.e. to the seven gifts. Now the seven vices are opposed to the seven virtues, commonly so called. Therefore the gifts do not differ from the virtues commonly so called.

Objection 3. Further, things whose definitions are the same, are themselves the same. But the definition of virtue applies to the gifts; for each gift is “a good quality of the mind, whereby we lead a good life,” etc.*. Likewise the definition of a gift can apply to the infused virtues: for a gift is “an unreturnable giving,” according to the Philosopher (Topic. iv, 4). Therefore the virtues and gifts do not differ from one another.

Objection 4. Several of the things mentioned among the gifts, are virtues: for, as stated above (q. 57, a. 2), wisdom, understanding, and knowledge are intellectual virtues, counsel pertains to prudence, piety to a kind of justice, and fortitude is a moral virtue. Therefore it seems that the gifts do not differ from the virtues.

On the contrary, Gregory (Moral. i, 12) distinguishes seven gifts, which he states to be denoted by the seven sons of Job, from the three theological virtues, which, he says, are signified by Job’s three daughters. He also distinguishes (Moral. ii, 26) the same seven gifts from the four cardinal virtues, which he says were signified by the four corners of the house.

I answer that, If we speak of gift and virtue with regard to the notion conveyed by the words themselves, there is no opposition between them. Because the word “virtue” conveys the notion that it perfects man in relation to well-doing, while the word “gift” refers to the cause from which it proceeds. Now there is no reason why that which proceeds from one as a gift should not perfect another in well-doing: especially as we have already stated (q. 63, a. 3) that some virtues are infused into us by God. Wherefore in this respect we cannot differentiate gifts from virtues. Consequently some have held that the gifts are not to be distinguished from the virtues. But there remains no less a difficulty for them to solve; for they must explain why some virtues are called gifts and some not; and why among the gifts there are some, fear, for instance, that are not reckoned virtues.

Hence it is that others have said that the gifts should be held as being distinct from the virtues; yet they have not assigned a suitable reason for this distinction, a reason, to wit, which would apply either to all the virtues, and to none of the gifts, or vice versa. For, seeing that of the seven gifts, four belong to the reason, viz. wisdom, knowledge, understanding and counsel, and three to the appetite, viz. fortitude, piety and fear; they held that the gifts perfect the free-will according as it is a faculty of the reason, while the virtues perfect it as a faculty of the will: since they observed only two virtues in the reason or intellect, viz. faith and prudence, the others being in the appetitive power or the affections. If this distinction were true, all the virtues would have to be in the appetite, and all the gifts in the reason.

Others observing that Gregory says (Moral. ii, 26) that “the gift of the Holy Ghost, by coming into the soul endows it with prudence, temperance, justice, and fortitude, and at the same time strengthens it against every kind of temptation by His sevenfold gift,” said that the virtues are given us that we may do good works, and the gifts, that we may resist temptation. But neither is this distinction sufficient. Because the virtues also resist those temptations which lead to the sins that are contrary to the virtues; for everything naturally resists its contrary: which is especially clear with regard to charity, of which it is written (Cant 8:7): “Many waters cannot quench charity.”

Others again, seeing that these gifts are set down in Holy Writ as having been in Christ, according to Is. 11:2,3, said that the virtues are given simply that we may do good works, but the gifts, in order to conform us to Christ, chiefly with regard to His Passion, for it was then that these gifts shone with the greatest splendor. Yet neither does this appear to be a satisfactory distinction. Because Our Lord Himself wished us to be conformed to Him, chiefly in humility and meekness, according to Mat. 11:29: “Learn of Me, because I am meek and humble of heart,” and in charity, according to Jn. 15:12: “Love one another, as I have loved you.” Moreover, these virtues were especially resplendent in Christ’s Passion.

Accordingly, in order to differentiate the gifts from the virtues, we must be guided by the way in which Scripture expresses itself, for we find there that the term employed is “spirit” rather than “gift.” For thus it is written (Is. 11:2,3): “The spirit... of wisdom and of understanding... shall rest upon him,” etc.: from which words we are clearly given to understand that these seven are there set down as being in us by Divine inspiration. Now inspiration denotes motion from without. For it must be noted that in man there is a twofold principle of movement, one within him, viz. the reason; the other extrinsic to him, viz. God, as stated above (q. 9, Aa. 4,6): moreover the Philosopher says this in

* Cf. q. 55, a. 4

the chapter On Good Fortune (Ethic. Eudem. vii, 8).

Now it is evident that whatever is moved must be proportionate to its mover: and the perfection of the mobile as such, consists in a disposition whereby it is disposed to be well moved by its mover. Hence the more exalted the mover, the more perfect must be the disposition whereby the mobile is made proportionate to its mover: thus we see that a disciple needs a more perfect disposition in order to receive a higher teaching from his master. Now it is manifest that human virtues perfect man according as it is natural for him to be moved by his reason in his interior and exterior actions. Consequently man needs yet higher perfections, whereby to be disposed to be moved by God. These perfections are called gifts, not only because they are infused by God, but also because by them man is disposed to become amenable to the Divine inspiration, according to Is. 50:5: "The Lord. . . hath opened my ear, and I do not resist; I have not gone back." Even the Philosopher says in the chapter On Good Fortune (Ethic. Eudem., vii, 8) that for those who are moved by Divine instinct, there is no need to take counsel according to human reason, but only to follow their inner promptings, since they are moved by a principle higher than human reason. This then is what some say, viz. that the gifts perfect man for acts which are higher than acts of virtue.

Reply to Objection 1. Sometimes these gifts are called virtues, in the broad sense of the word. Never-

theless, they have something over and above the virtues understood in this broad way, in so far as they are Divine virtues, perfecting man as moved by God. Hence the Philosopher (Ethic. vii, 1) above virtue commonly so called, places a kind of "heroic" or "divine virtue*," in respect of which some men are called "divine."

Reply to Objection 2. The vices are opposed to the virtues, in so far as they are opposed to the good as appointed by reason; but they are opposed to the gifts, in as much as they are opposed to the Divine instinct. For the same thing is opposed both to God and to reason, whose light flows from God.

Reply to Objection 3. This definition applies to virtue taken in its general sense. Consequently, if we wish to restrict it to virtue as distinguished from the gifts, we must explain the words, "whereby we lead a good life" as referring to the rectitude of life which is measured by the rule of reason. Likewise the gifts, as distinct from infused virtue, may be defined as something given by God in relation to His motion; something, to wit, that makes man to follow well the promptings of God.

Reply to Objection 4. Wisdom is called an intellectual virtue, so far as it proceeds from the judgment of reason: but it is called a gift, according as its work proceeds from the Divine prompting. The same applies to the other virtues.

* *arete heroike kai theia*

Objection 1. It would seem that the gifts are not necessary to man for salvation. Because the gifts are ordained to a perfection surpassing the ordinary perfection of virtue. Now it is not necessary for man's salvation that he should attain to a perfection surpassing the ordinary standard of virtue; because such perfection falls, not under the precept, but under a counsel. Therefore the gifts are not necessary to man for salvation.

Objection 2. Further, it is enough, for man's salvation, that he behave well in matters concerning God and matters concerning man. Now man's behavior to God is sufficiently directed by the theological virtues; and his behavior towards men, by the moral virtues. Therefore gifts are not necessary to man for salvation.

Objection 3. Further, Gregory says (*Moral.* ii, 26) that "the Holy Ghost gives wisdom against folly, understanding against dullness, counsel against rashness, fortitude against fears, knowledge against ignorance, piety against hardness of our heart, and fear against pride." But a sufficient remedy for all these things is to be found in the virtues. Therefore the gifts are not necessary to man for salvation.

On the contrary, Of all the gifts, wisdom seems to be the highest, and fear the lowest. Now each of these is necessary for salvation: since of wisdom it is written (*Wis.* 7:28): "God loveth none but him that dwelleth with wisdom"; and of fear (*Ecclus.* 1:28): "He that is without fear cannot be justified." Therefore the other gifts that are placed between these are also necessary for salvation.

I answer that, As stated above (a. 1), the gifts are perfections of man, whereby he is disposed so as to be amenable to the promptings of God. Wherefore in those matters where the prompting of reason is not sufficient, and there is need for the prompting of the Holy Ghost, there is, in consequence, need for a gift.

Now man's reason is perfected by God in two ways: first, with its natural perfection, to wit, the natural light of reason; secondly, with a supernatural perfection, to wit, the theological virtues, as stated above (q. 62, a. 1). And, though this latter perfection is greater than the former, yet the former is possessed by man in a more perfect manner than the latter: because man has the former in his full possession, whereas he possesses the latter imperfectly, since we love and know God imperfectly. Now it is evident that anything that has a nature or a form or a virtue perfectly, can of itself work according to them: not, however, excluding the operation of God, Who works inwardly in every nature and in every will. On the other hand, that which has a nature, or form,

or virtue imperfectly, cannot of itself work, unless it be moved by another. Thus the sun which possesses light perfectly, can shine by itself; whereas the moon which has the nature of light imperfectly, sheds only a borrowed light. Again, a physician, who knows the medical art perfectly, can work by himself; but his pupil, who is not yet fully instructed, cannot work by himself, but needs to receive instructions from him.

Accordingly, in matters subject to human reason, and directed to man's connatural end, man can work through the judgment of his reason. If, however, even in these things man receive help in the shape of special promptings from God, this will be out of God's superabundant goodness: hence, according to the philosophers, not every one that had the acquired moral virtues, had also the heroic or divine virtues. But in matters directed to the supernatural end, to which man's reason moves him, according as it is, in a manner, and imperfectly, informed by the theological virtues, the motion of reason does not suffice, unless it receive in addition the prompting or motion of the Holy Ghost, according to *Rom.* 8:14,17: "Whosoever are led by the Spirit of God, they are sons of God. . . and if sons, heirs also": and *Ps.* 142:10: "Thy good Spirit shall lead me into the right land," because, to wit, none can receive the inheritance of that land of the Blessed, except he be moved and led thither by the Holy Ghost. Therefore, in order to accomplish this end, it is necessary for man to have the gift of the Holy Ghost.

Reply to Objection 1. The gifts surpass the ordinary perfection of the virtues, not as regards the kind of works (as the counsels surpass the commandments), but as regards the manner of working, in respect of man being moved by a higher principle.

Reply to Objection 2. By the theological and moral virtues, man is not so perfected in respect of his last end, as not to stand in continual need of being moved by the yet higher promptings of the Holy Ghost, for the reason already given.

Reply to Objection 3. Whether we consider human reason as perfected in its natural perfection, or as perfected by the theological virtues, it does not know all things, nor all possible things. Consequently it is unable to avoid folly and other like things mentioned in the objection. God, however, to Whose knowledge and power all things are subject, by His motion safeguards us from all folly, ignorance, dullness of mind and hardness of heart, and the rest. Consequently the gifts of the Holy Ghost, which make us amenable to His promptings, are said to be given as remedies to these defects.

Objection 1. It would seem that the gifts of the Holy Ghost are not habits. Because a habit is a quality abiding in man, being defined as “a quality difficult to remove,” as stated in the Predicaments (Categor. vi). Now it is proper to Christ that the gifts of the Holy Ghost rest in Him, as stated in Is. 11:2,3: “He upon Whom thou shalt see the Spirit descending and remaining upon Him, He it is that baptizeth”; on which words Gregory comments as follows (Moral. ii, 27): “The Holy Ghost comes upon all the faithful; but, in a singular way, He dwells always in the Mediator.” Therefore the gifts of the Holy Ghost are not habits.

Objection 2. Further, the gifts of the Holy Ghost perfect man according as he is moved by the Spirit of God, as stated above (Aa. 1,2). But in so far as man is moved by the Spirit of God, he is somewhat like an instrument in His regard. Now to be perfected by a habit is befitting, not an instrument, but a principal agent. Therefore the gifts of the Holy Ghost are not habits.

Objection 3. Further, as the gifts of the Holy Ghost are due to Divine inspiration, so is the gift of prophecy. Now prophecy is not a habit: for “the spirit of prophecy does not always reside in the prophets,” as Gregory states (Hom. i in Ezechiel). Neither, therefore, are the gifts of the Holy Ghost.

On the contrary, Our Lord in speaking of the Holy Ghost said to His disciples (Jn. 14:17): “He shall abide with you, and shall be in you.” Now the Holy Ghost is not in a man without His gifts. Therefore His gifts abide in man. Therefore they are not merely acts or passions but abiding habits.

I answer that, As stated above (a. 1), the gifts are

perfections of man, whereby he becomes amenable to the promptings of the Holy Ghost. Now it is evident from what has been already said (q. 56, a. 4; q. 58, a. 2), that the moral virtues perfect the appetitive power according as it partakes somewhat of the reason, in so far, to wit, as it has a natural aptitude to be moved by the command of reason. Accordingly the gifts of the Holy Ghost, as compared with the Holy Ghost Himself, are related to man, even as the moral virtues, in comparison with the reason, are related to the appetitive power. Now the moral virtues are habits, whereby the powers of appetite are disposed to obey reason promptly. Therefore the gifts of the Holy Ghost are habits whereby man is perfected to obey readily the Holy Ghost.

Reply to Objection 1. Gregory solves this objection (Moral. ii, 27) by saying that “by those gifts without which one cannot obtain life, the Holy Ghost ever abides in all the elect, but not by His other gifts.” Now the seven gifts are necessary for salvation, as stated above (a. 2). Therefore, with regard to them, the Holy Ghost ever abides in holy men.

Reply to Objection 2. This argument holds, in the case of an instrument which has no faculty of action, but only of being acted upon. But man is not an instrument of that kind; for he is so acted upon, by the Holy Ghost, that he also acts himself, in so far as he has a free-will. Therefore he needs a habit.

Reply to Objection 3. Prophecy is one of those gifts which are for the manifestation of the Spirit, not for the necessity of salvation: hence the comparison fails.

Objection 1. It would seem that seven gifts of the Holy Ghost are unsuitably enumerated. For in that enumeration four are set down corresponding to the intellectual virtues, viz. wisdom, understanding, knowledge, and counsel, which corresponds to prudence; whereas nothing is set down corresponding to art, which is the fifth intellectual virtue. Moreover, something is included corresponding to justice, viz. piety, and something corresponding to fortitude, viz. the gift of fortitude; while there is nothing to correspond to temperance. Therefore the gifts are enumerated insufficiently.

Objection 2. Further, piety is a part of justice. But no part of fortitude is assigned to correspond thereto, but fortitude itself. Therefore justice itself, and not piety, ought to have been set down.

Objection 3. Further, the theological virtues, more than any, direct us to God. Since, then, the gifts perfect man according as he is moved by God, it seems that some gifts, corresponding to the theological virtues, should have been included.

Objection 4. Further, even as God is an object of fear, so is He of love, of hope, and of joy. Now love, hope, and joy are passions condivided with fear. Therefore, as fear is set down as a gift, so ought the other three.

Objection 5. Further, wisdom is added in order to direct understanding; counsel, to direct fortitude; knowledge, to direct piety. Therefore, some gift should have been added for the purpose of directing fear. Therefore the seven gifts of the Holy Ghost are unsuitably enumerated.

On the contrary, stands the authority of Holy Writ (Is. 11:2,3).

I answer that, As stated above (a. 3), the gifts are habits perfecting man so that he is ready to follow the promptings of the Holy Ghost, even as the moral virtues perfect the appetitive powers so that they obey the reason. Now just as it is natural for the appetitive powers to be moved by the command of reason, so it is natural for all the forces in man to be moved by the instinct of God, as by a superior power. Therefore whatever powers in man can be the principles of human actions, can also be the subjects of gifts, even as they are virtues; and such powers are the reason and appetite.

Now the reason is speculative and practical: and in both we find the apprehension of truth (which pertains to the discovery of truth), and judgment concerning the truth. Accordingly, for the apprehension of truth, the speculative reason is perfected by "understanding"; the practical reason, by "counsel." In order to judge aright, the speculative reason is perfected by "wisdom"; the practical reason by "knowledge." The appetitive power, in matters touching a man's relations to another, is perfected by "piety"; in matters touching himself, it is perfected by "fortitude" against the fear of dangers; and against inordinate lust for pleasures, by "fear," accord-

ing to Prov. 15:27: "By the fear of the Lord every one declineth from evil," and Ps. 118:120: "Pierce Thou my flesh with Thy fear: for I am afraid of Thy judgments." Hence it is clear that these gifts extend to all those things to which the virtues, both intellectual and moral, extend.

Reply to Objection 1. The gifts of the Holy Ghost perfect man in matters concerning a good life: whereas art is not directed to such matters, but to external things that can be made, since art is the right reason, not about things to be done, but about things to be made (Ethic. vi, 4). However, we may say that, as regards the infusion of the gifts, the art is on the part of the Holy Ghost, Who is the principal mover, and not on the part of men, who are His organs when He moves them. The gift of fear corresponds, in a manner, to temperance: for just as it belongs to temperance, properly speaking, to restrain man from evil pleasures for the sake of the good appointed by reason, so does it belong to the gift of fear, to withdraw man from evil pleasures through fear of God.

Reply to Objection 2. Justice is so called from the rectitude of the reason, and so it is more suitably called a virtue than a gift. But the name of piety denotes the reverence which we give to our father and to our country. And since God is the Father of all, the worship of God is also called piety, as Augustine states (De Civ. Dei x, 1). Therefore the gift whereby a man, through reverence for God, works good to all, is fittingly called piety.

Reply to Objection 3. The mind of man is not moved by the Holy Ghost, unless in some way it be united to Him: even as the instrument is not moved by the craftsman, unless there be contact or some other kind of union between them. Now the primal union of man with God is by faith, hope and charity: and, consequently, these virtues are presupposed to the gifts, as being their roots. Therefore all the gifts correspond to these three virtues, as being derived therefrom.

Reply to Objection 4. Love, hope and joy have good for their object. Now God is the Sovereign Good: wherefore the names of these passions are transferred to the theological virtues which unite man to God. On the other hand, the object of fear is evil, which can no-wise apply to God: hence fear does not denote union with God, but withdrawal from certain things through reverence for God. Hence it does not give its name to a theological virtue, but to a gift, which withdraws us from evil, for higher motives than moral virtue does.

Reply to Objection 5. Wisdom directs both the intellect and the affections of man. Hence two gifts are set down as corresponding to wisdom as their directing principle; on the part of the intellect, the gift of understanding; on the part of the affections, the gift of fear. Because the principal reason for fearing God is taken from a consideration of the Divine excellence, which wisdom considers.

Objection 1. It would seem that the gifts are not connected, for the Apostle says (1 Cor. 12:8): “To one... by the Spirit, is given the word of wisdom, and to another, the word of knowledge, according to the same Spirit.” Now wisdom and knowledge are reckoned among the gifts of the Holy Ghost. Therefore the gifts of the Holy Ghost are given to divers men, and are not connected together in the same man.

Objection 2. Further, Augustine says (De Trin. xiv, 1) that “many of the faithful have not knowledge, though they have faith.” But some of the gifts, at least the gift of fear, accompany faith. Therefore it seems that the gifts are not necessarily connected together in one and the same man.

Objection 3. Further, Gregory says (Moral. i) that wisdom “is of small account if it lack understanding, and understanding is wholly useless if it be not based upon wisdom... Counsel is worthless, when the strength of fortitude is lacking thereto... and fortitude is very weak if it be not supported by counsel... Knowledge is nought if it hath not the use of piety... and piety is very useless if it lack the discernment of knowledge... and assuredly, unless it has these virtues with it, fear itself rises up to the doing of no good action”: from which it seems that it is possible to have one gift without another. Therefore the gifts of the Holy Ghost are not connected.

On the contrary, Gregory prefaces the passage above quoted, with the following remark: “It is worthy of note in this feast of Job’s sons, that by turns they fed one another.” Now the sons of Job, of whom he is speaking, denote the gifts of the Holy Ghost. Therefore the gifts of the Holy Ghost are connected together by strengthening one another.

I answer that, The true answer to this question is easily gathered from what has been already set down. For it has been stated (a. 3) that as the powers of the appetite are disposed by the moral virtues as regards the governance of reason, so all the powers of the soul are disposed by the gifts as regards the motion of the Holy Ghost. Now the Holy Ghost dwells in us by charity, according to Rom. 5:5: “The charity of God is poured forth in our hearts by the Holy Ghost, Who is given to us,” even as our reason is perfected by pru-

dence. Wherefore, just as the moral virtues are united together in prudence, so the gifts of the Holy Ghost are connected together in charity: so that whoever has charity has all the gifts of the Holy Ghost, none of which can one possess without charity.

Reply to Objection 1. Wisdom and knowledge can be considered in one way as gratuitous graces, in so far, to wit, as man so far abounds in the knowledge of things Divine and human, that he is able both to instruct the believer and confound the unbeliever. It is in this sense that the Apostle speaks, in this passage, about wisdom and knowledge: hence he mentions pointedly the “word” of wisdom and the “word” of knowledge. They may be taken in another way for the gifts of the Holy Ghost: and thus wisdom and knowledge are nothing else but perfections of the human mind, rendering it amenable to the promptings of the Holy Ghost in the knowledge of things Divine and human. Consequently it is clear that these gifts are in all who are possessed of charity.

Reply to Objection 2. Augustine is speaking there of knowledge, while expounding the passage of the Apostle quoted above (obj. 1): hence he is referring to knowledge, in the sense already explained, as a gratuitous grace. This is clear from the context which follows: “For it is one thing to know only what a man must believe in order to gain the blissful life, which is no other than eternal life; and another, to know how to impart this to godly souls, and to defend it against the ungodly, which latter the Apostle seems to have styled by the proper name of knowledge.”

Reply to Objection 3. Just as the connection of the cardinal virtues is proved in one way from the fact that one is, in a manner, perfected by another, as stated above (q. 65, a. 1); so Gregory wishes to prove the connection of the gifts, in the same way, from the fact that one cannot be perfect without the other. Hence he had already observed that “each particular virtue is to the last degree destitute, unless one virtue lend its support to another.” We are therefore not to understand that one gift can be without another; but that if understanding were without wisdom, it would not be a gift; even as temperance, without justice, would not be a virtue.

Objection 1. It would seem that the gifts of the Holy Ghost do not remain in heaven. For Gregory says (Moral. ii, 26) that by means of His sevenfold gift the “Holy Ghost instructs the mind against all temptations.” Now there will be no temptations in heaven, according to Is. 11:9: “They shall not hurt, nor shall they kill in all My holy mountain.” Therefore there will be no gifts of the Holy Ghost in heaven.

Objection 2. Further, the gifts of the Holy Ghost are habits, as stated above (a. 3). But habits are of no use, where their acts are impossible. Now the acts of some gifts are not possible in heaven; for Gregory says (Moral. i, 15) that “understanding... penetrates the truths heard... counsel... stays us from acting rashly... fortitude... has no fear of adversity... piety satisfies the inmost heart with deeds of mercy,” all of which are incompatible with the heavenly state. Therefore these gifts will not remain in the state of glory.

Objection 3. Further, some of the gifts perfect man in the contemplative life, e.g. wisdom and understanding: and some in the active life, e.g. piety and fortitude. Now the active life ends with this as Gregory states (Moral. vi). Therefore not all the gifts of the Holy Ghost will be in the state of glory.

On the contrary, Ambrose says (De Spiritu Sancto i, 20): “The city of God, the heavenly Jerusalem is not washed with the waters of an earthly river: it is the Holy Ghost, of Whose outpouring we but taste, Who, proceeding from the Fount of life, seems to flow more abundantly in those celestial spirits, a seething torrent of sevenfold heavenly virtue.”

I answer that, We may speak of the gifts in two ways: first, as to their essence; and thus they will be most perfectly in heaven, as may be gathered from the passage of Ambrose, just quoted. The reason for this is that the gifts of the Holy Ghost render the human mind amenable to the motion of the Holy Ghost: which will be especially realized in heaven, where God will be “all in all” (1 Cor. 15:28), and man entirely subject unto Him. Secondly, they may be considered as regards the matter about which their operations are: and thus, in the present life they have an operation about a matter, in respect of which they will have no operation in the state of glory. Considered in this way, they will not remain in the state of glory; just as we have stated to be the case with regard to the cardinal virtues (q. 67, a. 1).

Reply to Objection 1. Gregory is speaking there of the gifts according as they are compatible with the present state: for it is thus that they afford us protection against evil temptations. But in the state of glory, where all evil will have ceased, we shall be perfected in good by the gifts of the Holy Ghost.

Reply to Objection 2. Gregory, in almost every gift, includes something that passes away with the present state, and something that remains in the future state. For he says that “wisdom strengthens the mind with the hope and certainty of eternal things”; of which two, hope passes, and certainty remains. Of understanding, he says “that it penetrates the truths heard, refreshing the heart and enlightening its darkness,” of which, hearing passes away, since “they shall teach no more every man... his brother” (Jer. 31:3,4); but the enlightening of the mind remains. Of counsel he says that it “prevents us from being impetuous,” which is necessary in the present life; and also that “it makes the mind full of reason,” which is necessary even in the future state. Of fortitude he says that it “fears not adversity,” which is necessary in the present life; and further, that it “sets before us the viands of confidence,” which remains also in the future life. With regard to knowledge he mentions only one thing, viz. that “she overcomes the void of ignorance,” which refers to the present state. When, however, he adds “in the womb of the mind,” this may refer figuratively to the fulness of knowledge, which belongs to the future state. Of piety he says that “it satisfies the inmost heart with deeds of mercy.” These words taken literally refer only to the present state: yet the inward regard for our neighbor, signified by “the inmost heart,” belongs also to the future state, when piety will achieve, not works of mercy, but fellowship of joy. Of fear he says that “it oppresses the mind, lest it pride itself in present things,” which refers to the present state, and that “it strengthens it with the meat of hope for the future,” which also belongs to the present state, as regards hope, but may also refer to the future state, as regards being “strengthened” for things we hope are here, and obtain there.

Reply to Objection 3. This argument considers the gifts as to their matter. For the matter of the gifts will not be the works of the active life; but all the gifts will have their respective acts about things pertaining to the contemplative life, which is the life of heavenly bliss.

Objection 1. It would seem that the gifts are not set down by Isaias in their order of dignity. For the principal gift is, seemingly, that which, more than the others, God requires of man. Now God requires of man fear, more than the other gifts: for it is written (Dt. 10:12): “And now, Israel, what doth the Lord thy God require of thee, but that thou fear the Lord thy God?” and (Malachi 1:6): “If... I be a master, where is My fear?” Therefore it seems that fear, which is mentioned last, is not the lowest but the greatest of the gifts.

Objection 2. Further, piety seems to be a kind of common good; since the Apostle says (1 Tim. 4:8): “Piety [Douay: ‘Godliness’] is profitable to all things.” Now a common good is preferable to particular goods. Therefore piety, which is given the last place but one, seems to be the most excellent gift.

Objection 3. Further, knowledge perfects man’s judgment, while counsel pertains to inquiry. But judgment is more excellent than inquiry. Therefore knowledge is a more excellent gift than counsel; and yet it is set down as being below it.

Objection 4. Further, fortitude pertains to the appetitive power, while science belongs to reason. But reason is a more excellent power than the appetite. Therefore knowledge is a more excellent gift than fortitude; and yet the latter is given the precedence. Therefore the gifts are not set down in their order of dignity.

On the contrary, Augustine says*: “It seems to me that the sevenfold operation of the Holy Ghost, of which Isaias speaks, agrees in degrees and expression with these [of which we read in Mat. 5:3]: but there is a difference of order, for there [viz. in Isaias] the enumeration begins with the more excellent gifts, here, with the lower gifts.”

I answer that, The excellence of the gifts can be measured in two ways: first, simply, viz. by comparison to their proper acts as proceeding from their principles; secondly, relatively, viz. by comparison to their matter. If we consider the excellence of the gifts simply, they follow the same rule as the virtues, as to their comparison one with another; because the gifts perfect man for all the acts of the soul’s powers, even as the virtues do, as stated above (a. 4). Hence, as the intellectual virtues have the precedence of the moral virtues, and among the intellectual virtues, the contemplative are preferable to the active, viz. wisdom, understanding and science to prudence and art (yet so that wisdom stands before understanding, and understanding before science, and

prudence and synesis before eubulia): so also among the gifts, wisdom, understanding, knowledge, and counsel are more excellent than piety, fortitude, and fear; and among the latter, piety excels fortitude, and fortitude fear, even as justice surpasses fortitude, and fortitude temperance. But in regard to their matter, fortitude and counsel precede knowledge and piety: because fortitude and counsel are concerned with difficult matters, whereas piety and knowledge regard ordinary matters. Consequently the excellence of the gifts corresponds with the order in which they are enumerated; but so far as wisdom and understanding are given the preference to the others, their excellence is considered simply, while, so far, as counsel and fortitude are preferred to knowledge and piety, it is considered with regard to their matter.

Reply to Objection 1. Fear is chiefly required as being the foundation, so to speak, of the perfection of the other gifts, for “the fear of the Lord is the beginning of wisdom” (Ps. 110:10; Eccclus. 1:16), and not as though it were more excellent than the others. Because, in the order of generation, man departs from evil on account of fear (Prov. 16:16), before doing good works, and which result from the other gifts.

Reply to Objection 2. In the words quoted from the Apostle, piety is not compared with all God’s gifts, but only with “bodily exercise,” of which he had said it “is profitable to little.”

Reply to Objection 3. Although knowledge stands before counsel by reason of its judgment, yet counsel is more excellent by reason of its matter: for counsel is only concerned with matters of difficulty (Ethic. iii, 3), whereas the judgment of knowledge embraces all matters.

Reply to Objection 4. The directive gifts which pertain to the reason are more excellent than the executive gifts, if we consider them in relation to their acts as proceeding from their powers, because reason transcends the appetite as a rule transcends the thing ruled. But on the part of the matter, counsel is united to fortitude as the directive power to the executive, and so is knowledge united to piety: because counsel and fortitude are concerned with matters of difficulty, while knowledge and piety are concerned with ordinary matters. Hence counsel together with fortitude, by reason of their matter, are given the preference to knowledge and piety.

* De Serm. Dom. in Monte i, 4

Objection 1. It would seem that the virtues are more excellent than the gifts. For Augustine says (De Trin. xv, 18) while speaking of charity: “No gift of God is more excellent than this. It is this alone which divides the children of the eternal kingdom from the children of eternal damnation. Other gifts are bestowed by the Holy Ghost, but, without charity, they avail nothing.” But charity is a virtue. Therefore a virtue is more excellent than the gifts of the Holy Ghost.

Objection 2. Further, that which is first naturally, seems to be more excellent. Now the virtues precede the gifts of the Holy Ghost; for Gregory says (Moral. ii, 26) that “the gift of the Holy Ghost in the mind it works on, forms first of all justice, prudence, fortitude, temperance. . . and doth afterwards give it a temper in the seven virtues” [viz. the gifts], so “as against folly to bestow wisdom; against dullness, understanding; against rashness, counsel; against fear, fortitude; against ignorance, knowledge; against hardness of heart, piety; against piety, fear.” Therefore the virtues are more excellent than the gifts.

Objection 3. Further, Augustine says (De Lib. Arb. ii, 19) that “the virtues cannot be used to evil purpose.” But it is possible to make evil use of the gifts, for Gregory says (Moral. i, 18): “We offer up the sacrifice of prayer. . . lest wisdom may uplift; or understanding, while it runs nimbly, deviate from the right path; or counsel, while it multiplies itself, grow into confusion; that fortitude, while it gives confidence, may not make us rash; lest knowledge, while it knows and yet loves not, may swell the mind; lest piety, while it swerves from the right line, may become distorted; and lest fear, while it is unduly alarmed, may plunge us into the pit of despair.” Therefore the virtues are more excellent than the gifts of the Holy Ghost.

On the contrary, The gifts are bestowed to assist the virtues and to remedy certain defects, as is shown in the passage quoted (obj. 2), so that, seemingly, they accomplish what the virtues cannot. Therefore the gifts are more excellent than the virtues.

I answer that, As was shown above (q. 58, a. 3; q. 62, a. 1), there are three kinds of virtues: for some are theological, some intellectual, and some moral. The theological virtues are those whereby man’s mind is united to God; the intellectual virtues are those whereby reason itself is perfected; and the moral virtues are those which perfect the powers of appetite in obedience to the

reason. On the other hand the gifts of the Holy Ghost dispose all the powers of the soul to be amenable to the Divine motion.

Accordingly the gifts seem to be compared to the theological virtues, by which man is united to the Holy Ghost his Mover, in the same way as the moral virtues are compared to the intellectual virtues, which perfect the reason, the moving principle of the moral virtues. Wherefore as the intellectual virtues are more excellent than the moral virtues and control them, so the theological virtues are more excellent than the gifts of the Holy Ghost and regulate them. Hence Gregory says (Moral. i, 12) that “the seven sons,” i.e. the seven gifts, “never attain the perfection of the number ten, unless all they do be done in faith, hope, and charity.”

But if we compare the gifts to the other virtues, intellectual and moral, then the gifts have the precedence of the virtues. Because the gifts perfect the soul’s powers in relation to the Holy Ghost their Mover; whereas the virtues perfect, either the reason itself, or the other powers in relation to reason: and it is evident that the more exalted the mover, the more excellent the disposition whereby the thing moved requires to be disposed. Therefore the gifts are more perfect than the virtues.

Reply to Objection 1. Charity is a theological virtue; and such we grant to be more perfect than the gifts.

Reply to Objection 2. There are two ways in which one thing precedes another. One is in order of perfection and dignity, as love of God precedes love of our neighbor: and in this way the gifts precede the intellectual and moral virtues, but follow the theological virtues. The other is the order of generation or disposition: thus love of one’s neighbor precedes love of God, as regards the act: and in this way moral and intellectual virtues precede the gifts, since man, through being well subordinate to his own reason, is disposed to be rightly subordinate to God.

Reply to Objection 3. Wisdom and understanding and the like are gifts of the Holy Ghost, according as they are quickened by charity, which “dealeth not perversely” (1 Cor. 13:4). Consequently wisdom and understanding and the like cannot be used to evil purpose, in so far as they are gifts of the Holy Ghost. But, lest they depart from the perfection of charity, they assist one another. This is what Gregory means to say.

FIRST PART OF THE SECOND PART, QUESTION 69

Of the Beatitudes (In Four Articles)

We must now consider the beatitudes: under which head there are four points of inquiry:

- (1) Whether the beatitudes differ from the gifts and virtues?
- (2) Of the rewards of the beatitudes: whether they refer to this life?
- (3) Of the number of the beatitudes;
- (4) Of the fittingness of the rewards ascribed to the beatitudes.

Whether the beatitudes differ from the virtues and gifts?

Ia IIae q. 69 a. 1

Objection 1. It would seem that the beatitudes do not differ from the virtues and gifts. For Augustine (De Serm. Dom. in Monte i, 4) assigns the beatitudes recited by Matthew (v 3, seqq.) to the gifts of the Holy Ghost; and Ambrose in his commentary on Luke 6:20, seqq., ascribes the beatitudes mentioned there, to the four cardinal virtues. Therefore the beatitudes do not differ from the virtues and gifts.

Objection 2. Further, there are but two rules of the human will: the reason and the eternal law, as stated above (q. 19, a. 3; q. 21, a. 1). Now the virtues perfect man in relation to reason; while the gifts perfect him in relation to the eternal law of the Holy Ghost, as is clear from what has been said (q. 68, Aa. 1,3, seqq.). Therefore there cannot be anything else pertaining to the rectitude of the human will, besides the virtues and gifts. Therefore the beatitudes do not differ from them.

Objection 3. Further, among the beatitudes are included meekness, justice, and mercy, which are said to be virtues. Therefore the beatitudes do not differ from the virtues and gifts.

On the contrary, Certain things are included among the beatitudes, that are neither virtues nor gifts, e.g. poverty, mourning, and peace. Therefore the beatitudes differ from the virtues and gifts.

I answer that, As stated above (q. 2, a. 7; q. 3, a. 1), happiness is the last end of human life. Now one is said to possess the end already, when one hopes to possess it; wherefore the Philosopher says (Ethic. i, 9) that “children are said to be happy because they are full of hope”; and the Apostle says (Rom. 8:24): “We are

saved by hope.” Again, we hope to obtain an end, because we are suitably moved towards that end, and approach thereto; and this implies some action. And a man is moved towards, and approaches the happy end by works of virtue, and above all by the works of the gifts, if we speak of eternal happiness, for which our reason is not sufficient, since we need to be moved by the Holy Ghost, and to be perfected with His gifts that we may obey and follow him. Consequently the beatitudes differ from the virtues and gifts, not as habit, but as act from habit.

Reply to Objection 1. Augustine and Ambrose assign the beatitudes to the gifts and virtues, as acts are ascribed to habits. But the gifts are more excellent than the cardinal virtues, as stated above (q. 68, a. 8). Wherefore Ambrose, in explaining the beatitudes propounded to the throng, assigns them to the cardinal virtues, whereas Augustine, who is explaining the beatitudes delivered to the disciples on the mountain, and so to those who were more perfect, ascribes them to the gifts of the Holy Ghost.

Reply to Objection 2. This argument proves that no other habits, besides the virtues and gifts, rectify human conduct.

Reply to Objection 3. Meekness is to be taken as denoting the act of meekness: and the same applies to justice and mercy. And though these might seem to be virtues, they are nevertheless ascribed to gifts, because the gifts perfect man in all matters wherein the virtues perfect him, as stated above (q. 68, a. 2).

Whether the rewards assigned to the beatitudes refer to this life?

Ia IIae q. 69 a. 2

Objection 1. It would seem that the rewards assigned to the beatitudes do not refer to this life. Because some are said to be happy because they hope for a reward, as stated above (a. 1). Now the object of hope is future happiness. Therefore these rewards refer to the life to come.

Objection 2. Further, certain punishments are set down in opposition to the beatitudes, Lk. 6:25, where we read: “Woe to you that are filled; for you shall

hunger. Woe to you that now laugh, for you shall mourn and weep.” Now these punishments do not refer to this life, because frequently men are not punished in this life, according to Job 21:13: “They spend their days in wealth.” Therefore neither do the rewards of the beatitudes refer to this life.

Objection 3. Further, the kingdom of heaven which is set down as the reward of poverty is the happiness of

heaven, as Augustine says (*De Civ. Dei* xix)*. Again, abundant fullness is not to be had save in the life to come, according to Ps. 16:15: "I shall be filled [Douay: 'satisfied'] when Thy glory shall appear." Again, it is only in the future life that we shall see God, and that our Divine sonship will be made manifest, according to 1 Jn. 3:2: "We are now the sons of God; and it hath not yet appeared what we shall be. We know that, when He shall appear, we shall be like to Him, because we shall see Him as He is." Therefore these rewards refer to the future life.

On the contrary, Augustine says (*De Serm. Dom. in Monte* i, 4): "These promises can be fulfilled in this life, as we believe them to have been fulfilled in the apostles. For no words can express that complete change into the likeness even of an angel, which is promised to us after this life."

I answer that, Expounders of Holy Writ are not agreed in speaking of these rewards. For some, with Ambrose (*Super Luc.* v), hold that all these rewards refer to the life to come; while Augustine (*De Serm. Dom. in Monte* i, 4) holds them to refer to the present life; and Chrysostom in his homilies (*In Matth.* xv) says that some refer to the future, and some to the present life.

In order to make the matter clear we must take note that hope of future happiness may be in us for two reasons. First, by reason of our having a preparation for, or a disposition to future happiness; and this is by way of merit; secondly, by a kind of imperfect inchoation of future happiness in holy men, even in this life. For it is one thing to hope that the tree will bear fruit, when the leaves begin to appear, and another, when we see the first signs of the fruit.

Accordingly, those things which are set down as merits in the beatitudes, are a kind of preparation for, or disposition to happiness, either perfect or inchoate: while those that are assigned as rewards, may be either perfect happiness, so as to refer to the future life, or some beginning of happiness, such as is found in those who have attained perfection, in which case they refer to the present life. Because when a man begins to make progress in the acts of the virtues and gifts, it is to be hoped that he will arrive at perfection, both as a way-

farer, and as a citizen of the heavenly kingdom.

Reply to Objection 1. Hope regards future happiness as the last end: yet it may also regard the assistance of grace as that which leads to that end, according to Ps. 27:7: "In Him hath my heart hoped, and I have been helped."

Reply to Objection 2. Although sometimes the wicked do not undergo temporal punishment in this life, yet they suffer spiritual punishment. Hence Augustine says (*Confess.* i): "Thou hast decreed, and it is so, Lord—that the disordered mind should be its own punishment." The Philosopher, too, says of the wicked (*Ethic.* ix, 4) that "their soul is divided against itself. . . one part pulls this way, another that"; and afterwards he concludes, saying: "If wickedness makes a man so miserable, he should strain every nerve to avoid vice." In like manner, although, on the other hand, the good sometimes do not receive material rewards in this life, yet they never lack spiritual rewards, even in this life, according to Mat. 19:29, and Mk. 10:30: "Ye shall receive a hundred times as much" even "in this time."

Reply to Objection 3. All these rewards will be fully consummated in the life to come: but meanwhile they are, in a manner, begun, even in this life. Because the "kingdom of heaven," as Augustine says (*De Civ. Dei* xiv)*, can denote the beginning of perfect wisdom, in so far as "the spirit" begins to reign in men. The "possession" of the land denotes the well-ordered affections of the soul that rests, by its desire, on the solid foundation of the eternal inheritance, signified by "the land." They are "comforted" in this life, by receiving the Holy Ghost, Who is called the "Paraclete," i.e. the Comforter. They "have their fill," even in this life, of that food of which Our Lord said (*Jn.* 4:34): "My meat is to do the will of Him that sent Me." Again, in this life, men "obtain" God's "Mercy." Again, the eye being cleansed by the gift of understanding, we can, so to speak, "see God." Likewise, in this life, those who are the "peacemakers" of their own movements, approach to likeness to God, and are called "the children of God." Nevertheless these things will be more perfectly fulfilled in heaven.

Whether the beatitudes are suitably enumerated?

Ia IIae q. 69 a. 3

Objection 1. It would seem that the beatitudes are unsuitably enumerated. For the beatitudes are assigned to the gifts, as stated above (a. 1, ad 1). Now some of the gifts, viz. wisdom and understanding, belong to the contemplative life: yet no beatitude is assigned to the act of contemplation, for all are assigned to matters connected with the active life. Therefore the beatitudes are insufficiently enumerated.

Objection 2. Further, not only do the executive gifts belong to the active life, but also some of the directive

gifts, e.g. knowledge and counsel: yet none of the beatitudes seems to be directly connected with the acts of knowledge or counsel. Therefore the beatitudes are insufficiently indicated.

Objection 3. Further, among the executive gifts connected with the active life, fear is said to be connected with poverty, while piety seems to correspond to the beatitude of mercy: yet nothing is included directly connected with justice. Therefore the beatitudes are insufficiently enumerated.

* Cf. *De Serm. Dom. in Monte* i, 1 * Cf. *De Serm. Dom. in Monte*, i, 1

Objection 4. Further, many other beatitudes are mentioned in Holy Writ. Thus, it is written (Job 5:17): “Blessed is the man whom God correcteth”; and (Ps. i, 1): “Blessed is the man who hath not walked in the counsel of the ungodly”; and (Prov. 3:13): “Blessed is the man that findeth wisdom.” Therefore the beatitudes are insufficiently enumerated.

Objection 5. On the other hand, it seems that too many are mentioned. For there are seven gifts of the Holy Ghost: whereas eight beatitudes are indicated.

Objection 6. Further, only four beatitudes are indicated in the sixth chapter of Luke. Therefore the seven or eight mentioned in Matthew 5 are too many.

I answer that, These beatitudes are most suitably enumerated. To make this evident it must be observed that beatitude has been held to consist in one of three things: for some have ascribed it to a sensual life, some, to an active life, and some, to a contemplative life*. Now these three kinds of happiness stand in different relations to future beatitude, by hoping for which we are said to be happy. Because sensual happiness, being false and contrary to reason, is an obstacle to future beatitude; while happiness of the active life is a disposition of future beatitude; and contemplative happiness, if perfect, is the very essence of future beatitude, and, if imperfect, is a beginning thereof.

And so Our Lord, in the first place, indicated certain beatitudes as removing the obstacle of sensual happiness. For a life of pleasure consists of two things. First, in the affluence of external goods, whether riches or honors; from which man is withdrawn—by a virtue so that he uses them in moderation—and by a gift, in a more excellent way, so that he despises them altogether. Hence the first beatitude is: “Blessed are the poor in spirit,” which may refer either to the contempt of riches, or to the contempt of honors, which results from humility. Secondly, the sensual life consists in following the bent of one’s passions, whether irascible or concupiscible. From following the irascible passions man is withdrawn—by a virtue, so that they are kept within the bounds appointed by the ruling of reason—and by a gift, in a more excellent manner, so that man, according to God’s will, is altogether undisturbed by them: hence the second beatitude is: “Blessed are the meek.” From following the concupiscible passions, man is withdrawn—by a virtue, so that man uses these passions in moderation—and by gift, so that, if necessary, he casts them aside altogether; nay more, so that, if need be, he makes a deliberate choice of sorrow†; hence the third beatitude is: “Blessed are they that mourn.”

Active life consists chiefly in man’s relations with his neighbor, either by way of duty or by way of spontaneous gratuity. To the former we are disposed—by a virtue, so that we do not refuse to do our duty to our neighbor, which pertains to justice—and by a gift, so that we do the same much more heartily, by accomplishing works of justice with an ardent desire, even

as a hungry and thirsty man eats and drinks with eager appetite. Hence the fourth beatitude is: “Blessed are they that hunger and thirst after justice.” With regard to spontaneous favors we are perfected—by a virtue, so that we give where reason dictates we should give, e.g. to our friends or others united to us; which pertains to the virtue of liberality—and by a gift, so that, through reverence for God, we consider only the needs of those on whom we bestow our gratuitous bounty: hence it is written (Lk. 14:12,13): “When thou makest a dinner or supper, call not thy friends, nor thy brethren,” etc... “but... call the poor, the maimed,” etc.; which, properly, is to have mercy: hence the fifth beatitude is: “Blessed are the merciful.”

Those things which concern the contemplative life, are either final beatitude itself, or some beginning thereof: wherefore they are included in the beatitudes, not as merits, but as rewards. Yet the effects of the active life, which dispose man for the contemplative life, are included in the beatitudes. Now the effect of the active life, as regards those virtues and gifts whereby man is perfected in himself, is the cleansing of man’s heart, so that it is not defiled by the passions: hence the sixth beatitude is: “Blessed are the clean of heart.” But as regards the virtues and gifts whereby man is perfected in relation to his neighbor, the effect of the active life is peace, according to Is. 32:17: “The work of justice shall be peace”: hence the seventh beatitude is “Blessed are the peacemakers.”

Reply to Objection 1. The acts of the gifts which belong to the active life are indicated in the merits: but the acts of the gifts pertaining to the contemplative life are indicated in the rewards, for the reason given above. Because to “see God” corresponds to the gift of understanding; and to be like God by being adoptive “children of God,” corresponds to the gift of wisdom.

Reply to Objection 2. In things pertaining to the active life, knowledge is not sought for its own sake, but for the sake of operation, as even the Philosopher states (Ethic. ii, 2). And therefore, since beatitude implies something ultimate, the beatitudes do not include the acts of those gifts which direct man in the active life, such acts, to wit, as are elicited by those gifts, as, e.g. to counsel is the act of counsel, and to judge, the act of knowledge: but, on the other hand, they include those operative acts of which the gifts have the direction, as, e.g. mourning in respect of knowledge, and mercy in respect of counsel.

Reply to Objection 3. In applying the beatitudes to the gifts we may consider two things. One is likeness of matter. In this way all the first five beatitudes may be assigned to knowledge and counsel as to their directing principles: whereas they must be distributed among the executive gifts: so that, to wit, hunger and thirst for justice, and mercy too, correspond to piety, which perfects man in his relations to others; meekness to fortitude, for Ambrose says on Lk. 6:22: “It is the

* See q. 3 † Cf. q. 35, a. 3

business of fortitude to conquer anger, and to curb indignation,” fortitude being about the irascible passions: poverty and mourning to the gift of fear, whereby man withdraws from the lusts and pleasures of the world.

Secondly, we may consider the motives of the beatitudes: and, in this way, some of them will have to be assigned differently. Because the principal motive for meekness is reverence for God, which belongs to piety. The chief motive for mourning is knowledge, whereby man knows his failings and those of worldly things, according to Eccles. 1:18: “He that addeth knowledge, addeth also sorrow [Vulg: labor].” The principal motive for hungering after the works of justice is fortitude of the soul: and the chief motive for being merciful is God’s counsel, according to Dan. 4:24: “Let my counsel be acceptable to the king [Vulg: to thee, O king]: and redeem thou thy sins with alms, and thy iniquities with works of mercy to the poor.” It is thus that Augustine assigns them (De Serm. Dom. in Monte i, 4).

Reply to Objection 4. All the beatitudes mentioned in Holy Writ must be reduced to these, either as to the merits or as to the rewards: because they must all belong either to the active or to the contemplative life. Accordingly, when we read, “Blessed is the man whom the Lord correcteth,” we must refer this to the beatitude of mourning: when we read, “Blessed is the man that hath not walked in the counsel of the ungodly,” we must refer it to cleanness of heart: and when we read, “Blessed is the man that findeth wisdom,” this must be referred to the reward of the seventh beatitude. The same applies

to all others that can be adduced.

Reply to Objection 5. The eighth beatitude is a confirmation and declaration of all those that precede. Because from the very fact that a man is confirmed in poverty of spirit, meekness, and the rest, it follows that no persecution will induce him to renounce them. Hence the eighth beatitude corresponds, in a way, to all the preceding seven.

Reply to Objection 6. Luke relates Our Lord’s sermon as addressed to the multitude (Lk. 6:17). Hence he sets down the beatitudes according to the capacity of the multitude, who know no other happiness than pleasure, temporal and earthly: wherefore by these four beatitudes Our Lord excludes four things which seem to belong to such happiness. The first of these is abundance of external goods, which he sets aside by saying: “Blessed are ye poor.” The second is that man be well off as to his body, in food and drink, and so forth; this he excludes by saying in the second place: “Blessed are ye that hunger.” The third is that it should be well with man as to joyfulness of heart, and this he puts aside by saying: “Blessed are ye that weep now.” The fourth is the outward favor of man; and this he excludes, saying, fourthly: “Blessed shall you be, when men shall hate you.” And as Ambrose says on Lk. 6:20, “poverty corresponds to temperance, which is unmoved by delights; hunger, to justice, since who hungers is compassionate and, through compassion gives; mourning, to prudence, which deplores perishable things; endurance of men’s hatred belongs to fortitude.”

Whether the rewards of the beatitudes are suitably enumerated?

Ia IIae q. 69 a. 4

Objection 1. It would seem that the rewards of the beatitudes are unsuitably enumerated. Because the kingdom of heaven, which is eternal life, contains all good things. Therefore, once given the kingdom of heaven, no other rewards should be mentioned.

Objection 2. Further, the kingdom of heaven is assigned as the reward, both of the first and of the eighth beatitude. Therefore, on the same ground it should have been assigned to all.

Objection 3. Further, the beatitudes are arranged in the ascending order, as Augustine remarks (De Serm. Dom. in Monte i, 4): whereas the rewards seem to be placed in the descending order, since to “possess the land” is less than to possess “the kingdom of heaven.” Therefore these rewards are unsuitably enumerated.

On the contrary, stands the authority of Our Lord Who propounded these rewards.

I answer that, These rewards are most suitably assigned, considering the nature of the beatitudes in relation to the three kinds of happiness indicated above (a. 3). For the first three beatitudes concerned the withdrawal of man from those things in which sensual happiness consists: which happiness man desires by seeking the object of his natural desire, not where he should

seek it, viz. in God, but in temporal and perishable things. Wherefore the rewards of the first three beatitudes correspond to these things which some men seek to find in earthly happiness. For men seek in external things, viz. riches and honors, a certain excellence and abundance, both of which are implied in the kingdom of heaven, whereby man attains to excellence and abundance of good things in God. Hence Our Lord promised the kingdom of heaven to the poor in spirit. Again, cruel and pitiless men seek by wrangling and fighting to destroy their enemies so as to gain security for themselves. Hence Our Lord promised the meek a secure and peaceful possession of the land of the living, whereby the solid reality of eternal goods is denoted. Again, men seek consolation for the toils of the present life, in the lusts and pleasures of the world. Hence Our Lord promises comfort to those that mourn.

Two other beatitudes belong to the works of active happiness, which are the works of virtues directing man in his relations to his neighbor: from which operations some men withdraw through inordinate love of their own good. Hence Our Lord assigns to these beatitudes rewards in correspondence with the motives for which men recede from them. For there are some

who recede from acts of justice, and instead of rendering what is due, lay hands on what is not theirs, that they may abound in temporal goods. Wherefore Our Lord promised those who hunger after justice, that they shall have their fill. Some, again, recede from works of mercy, lest they be busied with other people's misery. Hence Our Lord promised the merciful that they should obtain mercy, and be delivered from all misery.

The last two beatitudes belong to contemplative happiness or beatitude: hence the rewards are assigned in correspondence with the dispositions included in the merit. For cleanness of the eye disposes one to see clearly: hence the clean of heart are promised that they shall see God. Again, to make peace either in oneself or among others, shows a man to be a follower of God, Who is the God of unity and peace. Hence, as a reward, he is promised the glory of the Divine sonship, consisting in perfect union with God through consummate wisdom.

Reply to Objection 1. As Chrysostom says (Hom. xv in Matth.), all these rewards are one in reality, viz. eternal happiness, which the human intellect cannot grasp. Hence it was necessary to describe it by means of various boons known to us, while observing due proportion to the merits to which those rewards are assigned.

Reply to Objection 2. Just as the eighth beatitude is a confirmation of all the beatitudes, so it deserves all the rewards of the beatitudes. Hence it returns to the first, that we may understand all the other rewards to be attributed to it in consequence. Or else, according to Ambrose (Super Luc. v), the kingdom of heaven is promised to the poor in spirit, as regards the glory of the soul; but to those who suffer persecution in their bodies, it is promised as regards the glory of the body.

Reply to Objection 3. The rewards are also arranged in ascending order. For it is more to possess the land of the heavenly kingdom than simply to have it: since we have many things without possessing them firmly and peacefully. Again, it is more to be comforted in the kingdom than to have and possess it, for there are many things the possession of which is accompanied by sorrow. Again, it is more to have one's fill than simply to be comforted, because fulness implies abundance of comfort. And mercy surpasses satiety, for thereby man receives more than he merited or was able to desire. And yet more is it to see God, even as he is a greater man who not only dines at court, but also sees the king's countenance. Lastly, the highest place in the royal palace belongs to the king's son.

Objection 1. It would seem that the beatitudes do not differ from the virtues and gifts. For Augustine (De Serm. Dom. in Monte i, 4) assigns the beatitudes recited by Matthew (v 3, seqq.) to the gifts of the Holy Ghost; and Ambrose in his commentary on Luke 6:20, seqq., ascribes the beatitudes mentioned there, to the four cardinal virtues. Therefore the beatitudes do not differ from the virtues and gifts.

Objection 2. Further, there are but two rules of the human will: the reason and the eternal law, as stated above (q. 19, a. 3; q. 21, a. 1). Now the virtues perfect man in relation to reason; while the gifts perfect him in relation to the eternal law of the Holy Ghost, as is clear from what has been said (q. 68, Aa. 1,3, seqq.). Therefore there cannot be anything else pertaining to the rectitude of the human will, besides the virtues and gifts. Therefore the beatitudes do not differ from them.

Objection 3. Further, among the beatitudes are included meekness, justice, and mercy, which are said to be virtues. Therefore the beatitudes do not differ from the virtues and gifts.

On the contrary, Certain things are included among the beatitudes, that are neither virtues nor gifts, e.g. poverty, mourning, and peace. Therefore the beatitudes differ from the virtues and gifts.

I answer that, As stated above (q. 2, a. 7; q. 3, a. 1), happiness is the last end of human life. Now one is said to possess the end already, when one hopes to possess it; wherefore the Philosopher says (Ethic. i, 9) that “children are said to be happy because they are full of hope”; and the Apostle says (Rom. 8:24): “We are

saved by hope.” Again, we hope to obtain an end, because we are suitably moved towards that end, and approach thereto; and this implies some action. And a man is moved towards, and approaches the happy end by works of virtue, and above all by the works of the gifts, if we speak of eternal happiness, for which our reason is not sufficient, since we need to be moved by the Holy Ghost, and to be perfected with His gifts that we may obey and follow him. Consequently the beatitudes differ from the virtues and gifts, not as habit, but as act from habit.

Reply to Objection 1. Augustine and Ambrose assign the beatitudes to the gifts and virtues, as acts are ascribed to habits. But the gifts are more excellent than the cardinal virtues, as stated above (q. 68, a. 8). Wherefore Ambrose, in explaining the beatitudes propounded to the throng, assigns them to the cardinal virtues, whereas Augustine, who is explaining the beatitudes delivered to the disciples on the mountain, and so to those who were more perfect, ascribes them to the gifts of the Holy Ghost.

Reply to Objection 2. This argument proves that no other habits, besides the virtues and gifts, rectify human conduct.

Reply to Objection 3. Meekness is to be taken as denoting the act of meekness: and the same applies to justice and mercy. And though these might seem to be virtues, they are nevertheless ascribed to gifts, because the gifts perfect man in all matters wherein the virtues perfect him, as stated above (q. 68, a. 2).

Objection 1. It would seem that the rewards assigned to the beatitudes do not refer to this life. Because some are said to be happy because they hope for a reward, as stated above (a. 1). Now the object of hope is future happiness. Therefore these rewards refer to the life to come.

Objection 2. Further, certain punishments are set down in opposition to the beatitudes, Lk. 6:25, where we read: “Woe to you that are filled; for you shall hunger. Woe to you that now laugh, for you shall mourn and weep.” Now these punishments do not refer to this life, because frequently men are not punished in this life, according to Job 21:13: “They spend their days in wealth.” Therefore neither do the rewards of the beatitudes refer to this life.

Objection 3. Further, the kingdom of heaven which is set down as the reward of poverty is the happiness of heaven, as Augustine says (De Civ. Dei xix)*. Again, abundant fullness is not to be had save in the life to come, according to Ps. 16:15: “I shall be filled [Douay: ‘satisfied’] when Thy glory shall appear.” Again, it is only in the future life that we shall see God, and that our Divine sonship will be made manifest, according to 1 Jn. 3:2: “We are now the sons of God; and it hath not yet appeared what we shall be. We know that, when He shall appear, we shall be like to Him, because we shall see Him as He is.” Therefore these rewards refer to the future life.

On the contrary, Augustine says (De Serm. Dom. in Monte i, 4): “These promises can be fulfilled in this life, as we believe them to have been fulfilled in the apostles. For no words can express that complete change into the likeness even of an angel, which is promised to us after this life.”

I answer that, Expounders of Holy Writ are not agreed in speaking of these rewards. For some, with Ambrose (Super Luc. v), hold that all these rewards refer to the life to come; while Augustine (De Serm. Dom. in Monte i, 4) holds them to refer to the present life; and Chrysostom in his homilies (In Matth. xv) says that some refer to the future, and some to the present life.

In order to make the matter clear we must take note that hope of future happiness may be in us for two reasons. First, by reason of our having a preparation for, or a disposition to future happiness; and this is by way of merit; secondly, by a kind of imperfect inchoation of future happiness in holy men, even in this life. For it is one thing to hope that the tree will bear fruit, when the leaves begin to appear, and another, when we see the first signs of the fruit.

Accordingly, those things which are set down as

merits in the beatitudes, are a kind of preparation for, or disposition to happiness, either perfect or inchoate: while those that are assigned as rewards, may be either perfect happiness, so as to refer to the future life, or some beginning of happiness, such as is found in those who have attained perfection, in which case they refer to the present life. Because when a man begins to make progress in the acts of the virtues and gifts, it is to be hoped that he will arrive at perfection, both as a wayfarer, and as a citizen of the heavenly kingdom.

Reply to Objection 1. Hope regards future happiness as the last end: yet it may also regard the assistance of grace as that which leads to that end, according to Ps. 27:7: “In Him hath my heart hoped, and I have been helped.”

Reply to Objection 2. Although sometimes the wicked do not undergo temporal punishment in this life, yet they suffer spiritual punishment. Hence Augustine says (Confess. i): “Thou hast decreed, and it is so, Lord—that the disordered mind should be its own punishment.” The Philosopher, too, says of the wicked (Ethic. ix, 4) that “their soul is divided against itself. . . one part pulls this way, another that”; and afterwards he concludes, saying: “If wickedness makes a man so miserable, he should strain every nerve to avoid vice.” In like manner, although, on the other hand, the good sometimes do not receive material rewards in this life, yet they never lack spiritual rewards, even in this life, according to Mat. 19:29, and Mk. 10:30: “Ye shall receive a hundred times as much” even “in this time.”

Reply to Objection 3. All these rewards will be fully consummated in the life to come: but meanwhile they are, in a manner, begun, even in this life. Because the “kingdom of heaven,” as Augustine says (De Civ. Dei xiv)†, can denote the beginning of perfect wisdom, in so far as “the spirit” begins to reign in men. The “possession” of the land denotes the well-ordered affections of the soul that rests, by its desire, on the solid foundation of the eternal inheritance, signified by “the land.” They are “comforted” in this life, by receiving the Holy Ghost, Who is called the “Paraclete,” i.e. the Comforter. They “have their fill,” even in this life, of that food of which Our Lord said (Jn. 4:34): “My meat is to do the will of Him that sent Me.” Again, in this life, men “obtain” God’s “Mercy.” Again, the eye being cleansed by the gift of understanding, we can, so to speak, “see God.” Likewise, in this life, those who are the “peacemakers” of their own movements, approach to likeness to God, and are called “the children of God.” Nevertheless these things will be more perfectly fulfilled in heaven.

* Cf. De Serm. Dom. in Monte i, 1 † Cf. De Serm. Dom. in Monte, i, 1

Objection 1. It would seem that the beatitudes are unsuitably enumerated. For the beatitudes are assigned to the gifts, as stated above (a. 1, ad 1). Now some of the gifts, viz. wisdom and understanding, belong to the contemplative life: yet no beatitude is assigned to the act of contemplation, for all are assigned to matters connected with the active life. Therefore the beatitudes are insufficiently enumerated.

Objection 2. Further, not only do the executive gifts belong to the active life, but also some of the directive gifts, e.g. knowledge and counsel: yet none of the beatitudes seems to be directly connected with the acts of knowledge or counsel. Therefore the beatitudes are insufficiently indicated.

Objection 3. Further, among the executive gifts connected with the active life, fear is said to be connected with poverty, while piety seems to correspond to the beatitude of mercy: yet nothing is included directly connected with justice. Therefore the beatitudes are insufficiently enumerated.

Objection 4. Further, many other beatitudes are mentioned in Holy Writ. Thus, it is written (Job 5:17): "Blessed is the man whom God correcteth"; and (Ps. i, 1): "Blessed is the man who hath not walked in the counsel of the ungodly"; and (Prov. 3:13): "Blessed is the man that findeth wisdom." Therefore the beatitudes are insufficiently enumerated.

Objection 5. On the other hand, it seems that too many are mentioned. For there are seven gifts of the Holy Ghost: whereas eight beatitudes are indicated.

Objection 6. Further, only four beatitudes are indicated in the sixth chapter of Luke. Therefore the seven or eight mentioned in Matthew 5 are too many.

I answer that, These beatitudes are most suitably enumerated. To make this evident it must be observed that beatitude has been held to consist in one of three things: for some have ascribed it to a sensual life, some, to an active life, and some, to a contemplative life*. Now these three kinds of happiness stand in different relations to future beatitude, by hoping for which we are said to be happy. Because sensual happiness, being false and contrary to reason, is an obstacle to future beatitude; while happiness of the active life is a disposition of future beatitude; and contemplative happiness, if perfect, is the very essence of future beatitude, and, if imperfect, is a beginning thereof.

And so Our Lord, in the first place, indicated certain beatitudes as removing the obstacle of sensual happiness. For a life of pleasure consists of two things. First, in the affluence of external goods, whether riches or honors; from which man is withdrawn—by a virtue so that he uses them in moderation—and by a gift, in a more excellent way, so that he despises them altogether. Hence the first beatitude is: "Blessed are the poor in spirit," which may refer either to the contempt

of riches, or to the contempt of honors, which results from humility. Secondly, the sensual life consists in following the bent of one's passions, whether irascible or concupiscible. From following the irascible passions man is withdrawn—by a virtue, so that they are kept within the bounds appointed by the ruling of reason—and by a gift, in a more excellent manner, so that man, according to God's will, is altogether undisturbed by them: hence the second beatitude is: "Blessed are the meek." From following the concupiscible passions, man is withdrawn—by a virtue, so that man uses these passions in moderation—and by gift, so that, if necessary, he casts them aside altogether; nay more, so that, if need be, he makes a deliberate choice of sorrow[†]; hence the third beatitude is: "Blessed are they that mourn."

Active life consists chiefly in man's relations with his neighbor, either by way of duty or by way of spontaneous gratuity. To the former we are disposed—by a virtue, so that we do not refuse to do our duty to our neighbor, which pertains to justice—and by a gift, so that we do the same much more heartily, by accomplishing works of justice with an ardent desire, even as a hungry and thirsty man eats and drinks with eager appetite. Hence the fourth beatitude is: "Blessed are they that hunger and thirst after justice." With regard to spontaneous favors we are perfected—by a virtue, so that we give where reason dictates we should give, e.g. to our friends or others united to us; which pertains to the virtue of liberality—and by a gift, so that, through reverence for God, we consider only the needs of those on whom we bestow our gratuitous bounty: hence it is written (Lk. 14:12,13): "When thou makest a dinner or supper, call not thy friends, nor thy brethren," etc. . . "but . . . call the poor, the maimed," etc.; which, properly, is to have mercy: hence the fifth beatitude is: "Blessed are the merciful."

Those things which concern the contemplative life, are either final beatitude itself, or some beginning thereof: wherefore they are included in the beatitudes, not as merits, but as rewards. Yet the effects of the active life, which dispose man for the contemplative life, are included in the beatitudes. Now the effect of the active life, as regards those virtues and gifts whereby man is perfected in himself, is the cleansing of man's heart, so that it is not defiled by the passions: hence the sixth beatitude is: "Blessed are the clean of heart." But as regards the virtues and gifts whereby man is perfected in relation to his neighbor, the effect of the active life is peace, according to Is. 32:17: "The work of justice shall be peace": hence the seventh beatitude is "Blessed are the peacemakers."

Reply to Objection 1. The acts of the gifts which belong to the active life are indicated in the merits: but the acts of the gifts pertaining to the contemplative life are indicated in the rewards, for the reason given above.

* See q. 3 † Cf. q. 35, a. 3

Because to “see God” corresponds to the gift of understanding; and to be like God by being adoptive “children of God,” corresponds to the gift of wisdom.

Reply to Objection 2. In things pertaining to the active life, knowledge is not sought for its own sake, but for the sake of operation, as even the Philosopher states (*Ethic. ii, 2*). And therefore, since beatitude implies something ultimate, the beatitudes do not include the acts of those gifts which direct man in the active life, such acts, to wit, as are elicited by those gifts, as, e.g. to counsel is the act of counsel, and to judge, the act of knowledge: but, on the other hand, they include those operative acts of which the gifts have the direction, as, e.g. mourning in respect of knowledge, and mercy in respect of counsel.

Reply to Objection 3. In applying the beatitudes to the gifts we may consider two things. One is likeness of matter. In this way all the first five beatitudes may be assigned to knowledge and counsel as to their directing principles: whereas they must be distributed among the executive gifts: so that, to wit, hunger and thirst for justice, and mercy too, correspond to piety, which perfects man in his relations to others; meekness to fortitude, for Ambrose says on Lk. 6:22: “It is the business of fortitude to conquer anger, and to curb indignation,” fortitude being about the irascible passions: poverty and mourning to the gift of fear, whereby man withdraws from the lusts and pleasures of the world.

Secondly, we may consider the motives of the beatitudes: and, in this way, some of them will have to be assigned differently. Because the principal motive for meekness is reverence for God, which belongs to piety. The chief motive for mourning is knowledge, whereby man knows his failings and those of worldly things, according to Eccles. 1:18: “He that addeth knowledge, addeth also sorrow [Vulg: labor].” The principal motive for hungering after the works of justice is fortitude of the soul: and the chief motive for being merciful is God’s counsel, according to Dan. 4:24: “Let my counsel be acceptable to the king [Vulg: to thee, O king]: and redeem thou thy sins with alms, and thy iniquities with works of mercy to the poor.” It is thus that Augustine

assigns them (*De Serm. Dom. in Monte i, 4*).

Reply to Objection 4. All the beatitudes mentioned in Holy Writ must be reduced to these, either as to the merits or as to the rewards: because they must all belong either to the active or to the contemplative life. Accordingly, when we read, “Blessed is the man whom the Lord correcteth,” we must refer this to the beatitude of mourning: when we read, “Blessed is the man that hath not walked in the counsel of the ungodly,” we must refer it to cleanness of heart: and when we read, “Blessed is the man that findeth wisdom,” this must be referred to the reward of the seventh beatitude. The same applies to all others that can be adduced.

Reply to Objection 5. The eighth beatitude is a confirmation and declaration of all those that precede. Because from the very fact that a man is confirmed in poverty of spirit, meekness, and the rest, it follows that no persecution will induce him to renounce them. Hence the eighth beatitude corresponds, in a way, to all the preceding seven.

Reply to Objection 6. Luke relates Our Lord’s sermon as addressed to the multitude (Lk. 6:17). Hence he sets down the beatitudes according to the capacity of the multitude, who know no other happiness than pleasure, temporal and earthly: wherefore by these four beatitudes Our Lord excludes four things which seem to belong to such happiness. The first of these is abundance of external goods, which he sets aside by saying: “Blessed are ye poor.” The second is that man be well off as to his body, in food and drink, and so forth; this he excludes by saying in the second place: “Blessed are ye that hunger.” The third is that it should be well with man as to joyfulness of heart, and this he puts aside by saying: “Blessed are ye that weep now.” The fourth is the outward favor of man; and this he excludes, saying, fourthly: “Blessed shall you be, when men shall hate you.” And as Ambrose says on Lk. 6:20, “poverty corresponds to temperance, which is unmoved by delights; hunger, to justice, since who hungers is compassionate and, through compassion gives; mourning, to prudence, which deplores perishable things; endurance of men’s hatred belongs to fortitude.”

Objection 1. It would seem that the rewards of the beatitudes are unsuitably enumerated. Because the kingdom of heaven, which is eternal life, contains all good things. Therefore, once given the kingdom of heaven, no other rewards should be mentioned.

Objection 2. Further, the kingdom of heaven is assigned as the reward, both of the first and of the eighth beatitude. Therefore, on the same ground it should have been assigned to all.

Objection 3. Further, the beatitudes are arranged in the ascending order, as Augustine remarks (De Serm. Dom. in Monte i, 4): whereas the rewards seem to be placed in the descending order, since to “possess the land” is less than to possess “the kingdom of heaven.” Therefore these rewards are unsuitably enumerated.

On the contrary, stands the authority of Our Lord Who propounded these rewards.

I answer that, These rewards are most suitably assigned, considering the nature of the beatitudes in relation to the three kinds of happiness indicated above (a. 3). For the first three beatitudes concerned the withdrawal of man from those things in which sensual happiness consists: which happiness man desires by seeking the object of his natural desire, not where he should seek it, viz. in God, but in temporal and perishable things. Wherefore the rewards of the first three beatitudes correspond to these things which some men seek to find in earthly happiness. For men seek in external things, viz. riches and honors, a certain excellence and abundance, both of which are implied in the kingdom of heaven, whereby man attains to excellence and abundance of good things in God. Hence Our Lord promised the kingdom of heaven to the poor in spirit. Again, cruel and pitiless men seek by wrangling and fighting to destroy their enemies so as to gain security for themselves. Hence Our Lord promised the meek a secure and peaceful possession of the land of the living, whereby the solid reality of eternal goods is denoted. Again, men seek consolation for the toils of the present life, in the lusts and pleasures of the world. Hence Our Lord promises comfort to those that mourn.

Two other beatitudes belong to the works of active happiness, which are the works of virtues directing man in his relations to his neighbor: from which operations some men withdraw through inordinate love of their own good. Hence Our Lord assigns to these beatitudes rewards in correspondence with the motives for which men recede from them. For there are some who recede from acts of justice, and instead of render-

ing what is due, lay hands on what is not theirs, that they may abound in temporal goods. Wherefore Our Lord promised those who hunger after justice, that they shall have their fill. Some, again, recede from works of mercy, lest they be busied with other people’s misery. Hence Our Lord promised the merciful that they should obtain mercy, and be delivered from all misery.

The last two beatitudes belong to contemplative happiness or beatitude: hence the rewards are assigned in correspondence with the dispositions included in the merit. For cleanness of the eye disposes one to see clearly: hence the clean of heart are promised that they shall see God. Again, to make peace either in oneself or among others, shows a man to be a follower of God, Who is the God of unity and peace. Hence, as a reward, he is promised the glory of the Divine sonship, consisting in perfect union with God through consummate wisdom.

Reply to Objection 1. As Chrysostom says (Hom. xv in Matth.), all these rewards are one in reality, viz. eternal happiness, which the human intellect cannot grasp. Hence it was necessary to describe it by means of various boons known to us, while observing due proportion to the merits to which those rewards are assigned.

Reply to Objection 2. Just as the eighth beatitude is a confirmation of all the beatitudes, so it deserves all the rewards of the beatitudes. Hence it returns to the first, that we may understand all the other rewards to be attributed to it in consequence. Or else, according to Ambrose (Super Luc. v), the kingdom of heaven is promised to the poor in spirit, as regards the glory of the soul; but to those who suffer persecution in their bodies, it is promised as regards the glory of the body.

Reply to Objection 3. The rewards are also arranged in ascending order. For it is more to possess the land of the heavenly kingdom than simply to have it: since we have many things without possessing them firmly and peacefully. Again, it is more to be comforted in the kingdom than to have and possess it, for there are many things the possession of which is accompanied by sorrow. Again, it is more to have one’s fill than simply to be comforted, because fulness implies abundance of comfort. And mercy surpasses satiety, for thereby man receives more than he merited or was able to desire. And yet more is it to see God, even as he is a greater man who not only dines at court, but also sees the king’s countenance. Lastly, the highest place in the royal palace belongs to the king’s son.

Objection 1. It would seem that there is nothing voluntary in human acts. For that is voluntary “which has its principle within itself.” as Gregory of Nyssa*, Damascene (De Fide Orth. ii, 24), and Aristotle (Ethic. iii, 1) declare. But the principle of human acts is not in man himself, but outside him: since man’s appetite is moved to act, by the appetible object which is outside him, and is as a “mover unmoved” (De Anima iii, 10). Therefore there is nothing voluntary in human acts.

Objection 2. Further, the Philosopher (Phys. viii, 2) proves that in animals no new movement arises that is not preceded by a motion from without. But all human acts are new, since none is eternal. Consequently, the principle of all human acts is from without: and therefore there is nothing voluntary in them.

Objection 3. Further, he that acts voluntarily, can act of himself. But this is not true of man; for it is written (Jn. 15:5): “Without Me you can do nothing.” Therefore there is nothing voluntary in human acts.

On the contrary, Damascene says (De Fide Orth. ii) that “the voluntary is an act consisting in a rational operation.” Now such are human acts. Therefore there is something voluntary in human acts.

I answer that, There must needs be something voluntary in human acts. In order to make this clear, we must take note that the principle of some acts or movements is within the agent, or that which is moved; whereas the principle of some movements or acts is outside. For when a stone is moved upwards, the principle of this movement is outside the stone: whereas when it is moved downwards, the principle of this movement is in the stone. Now of those things that are moved by an intrinsic principle, some move themselves, some not. For since every agent or thing moved, acts or is moved for an end, as stated above (q. 1, a. 2); those are perfectly moved by an intrinsic principle, whose intrinsic principle is one not only of movement but of movement for an end. Now in order for a thing to be done for an end, some knowledge of the end is necessary. Therefore, whatever so acts or is moved by an intrinsic principle, that it has some knowledge of the end, has within itself the principle of its act, so that it not only acts, but acts for an end. On the other hand, if a thing has no knowledge of the end, even though it have an intrinsic principle of action or movement, nevertheless the principle of acting or being moved for an end is not in that thing, but in something else, by which the principle of its action towards an end is not in that thing, but in something else, by which the principle of its action towards an end is imprinted on it. Wherefore such like things are not said to move themselves, but to be moved by others. But those things which have a knowledge of the end are said to move themselves because there is in them a principle by which they not only act but

also act for an end. And consequently, since both are from an intrinsic principle, to wit, that they act and that they act for an end, the movements of such things are said to be voluntary: for the word “voluntary” implies that their movements and acts are from their own inclination. Hence it is that, according to the definitions of Aristotle, Gregory of Nyssa, and Damascene†, the voluntary is defined not only as having “a principle within” the agent, but also as implying “knowledge.” Therefore, since man especially knows the end of his work, and moves himself, in his acts especially is the voluntary to be found.

Reply to Objection 1. Not every principle is a first principle. Therefore, although it is essential to the voluntary act that its principle be within the agent, nevertheless it is not contrary to the nature of the voluntary act that this intrinsic principle be caused or moved by an extrinsic principle: because it is not essential to the voluntary act that its intrinsic principle be a first principle. Yet again it must be observed that a principle of movement may happen to be first in a genus, but not first simply: thus in the genus of things subject to alteration, the first principle of alteration is a heavenly body, which is nevertheless, is not the first mover simply, but is moved locally by a higher mover. And so the intrinsic principle of the voluntary act, i.e. the cognitive and appetitive power, is the first principle in the genus of appetitive movement, although it is moved by an extrinsic principle according to other species of movement.

Reply to Objection 2. New movements in animals are indeed preceded by a motion from without; and this in two respects. First, in so far as by means of an extrinsic motion an animal’s senses are confronted with something sensible, which, on being apprehended, moves the appetite. Thus a lion, on seeing a stag in movement and coming towards him, begins to be moved towards the stag. Secondly, in so far as some extrinsic motion produces a physical change in an animal’s body, as in the case of cold or heat; and through the body being affected by the motion of an outward body, the sensitive appetite which is the power of a bodily organ, is also moved indirectly; thus it happens that through some alteration in the body the appetite is roused to the desire of something. But this is not contrary to the nature of voluntariness, as stated above (ad 1), for such movements caused by an extrinsic principle are of another genus of movement.

Reply to Objection 3. God moves man to act, not only by proposing the appetible to the senses, or by effecting a change in his body, but also by moving the will itself; because every movement either of the will or of nature, proceeds from God as the First Mover. And just as it is not incompatible with nature that the natural movement be from God as the First Mover, inasmuch

* Nemesius, De Natura Hom. xxxii. † See Objection 1

as nature is an instrument of God moving it: so it is not contrary to the essence of a voluntary act, that it proceed from God, inasmuch as the will is moved by God. Nevertheless both natural and voluntary movements have this in common, that it is essential that they should proceed from a principle within the agent.

Objection 1. It would seem that there is nothing voluntary in irrational animals. For a thing is called “voluntary” from “voluntas” [will]. Now since the will is in the reason (De Anima iii, 9), it cannot be in irrational animals. Therefore neither is there anything voluntary in them.

Objection 2. Further, according as human acts are voluntary, man is said to be master of his actions. But irrational animals are not masters of their actions; for “they act not; rather are they acted upon,” as Damascene says (De Fide Orth. ii, 27). Therefore there is no such thing as a voluntary act in irrational animals.

Objection 3. Further, Damascene says (De Fide Orth. 24) that “voluntary acts lead to praise and blame.” But neither praise nor blame is due to the acts of irrational minds. Therefore such acts are not voluntary.

On the contrary, The Philosopher says (Ethic. iii, 2) that “both children and irrational animals participate in the voluntary.” The same is said by Damascene (De Fide Orth. 24) and Gregory of Nyssa*.

I answer that, As stated above (a. 1), it is essential to the voluntary act that its principle be within the agent, together with some knowledge of the end. Now knowledge of the end is twofold; perfect and imperfect. Perfect knowledge of the end consists in not only apprehending the thing which is the end, but also in knowing it under the aspect of end, and the relationship of the means to that end. And such knowledge belongs to none but the rational nature. But imperfect knowledge of the end consists in mere apprehension of the end, without knowing it under the aspect of end, or the relationship

of an act to the end. Such knowledge of the end is exercised by irrational animals, through their senses and their natural estimative power.

Consequently perfect knowledge of the end leads to the perfect voluntary; inasmuch as, having apprehended the end, a man can, from deliberating about the end and the means thereto, be moved, or not, to gain that end. But imperfect knowledge of the end leads to the imperfect voluntary; inasmuch as the agent apprehends the end, but does not deliberate, and is moved to the end at once. Wherefore the voluntary in its perfection belongs to none but the rational nature: whereas the imperfect voluntary is within the competency of even irrational animals.
